these representations and warranties relating to sales of loans to: the US government-sponsored enterprises Fannie Mae and Freddie Mac (GSEs); institutional investors, primarily banks; and non-agency, or private label, securitizations. The loans sold are primarily loans that the Group has purchased from other parties. The scope of representations and warranties, if any, depends on the transaction, but can include: ownership of the mortgage loans and legal capacity to sell the loans; loan-to-value ratios and other characteristics of the property, the borrower and the loan; validity of the liens securing the loans and absence of delinquent taxes or related liens; conformity to underwriting standards and completeness of documentation; and origination in compliance with law. If it is determined that representations and warranties were breached, the Group may be required to repurchase the related loans or indemnify the investors to make them whole for losses. Whether the Group will incur a loss in connection with repurchases and make whole payments depends on: the extent to which claims are made; the validity of such claims (including the likelihood and ability to enforce claims); whether the Group can successfully claim against parties that sold loans to the Group and made representations and warranties to the Group; the residential real estate market, including the number of defaults; and whether the obligations of the securitization vehicles were guaranteed or insured by third parties.

With respect to its outstanding repurchase claims, the Group is unable to estimate reasonably possible losses in excess of the amounts accrued because of the heterogeneity of its portfolio, the complexity of legal and factual determinations related to each claim, the limited amount of discovery and/or other factors.

The following tables present the total amount of residential mortgage loans sold during the period from January 1, 2004 to December 31, 2013 by counterparty type and the development of outstanding repurchase claims and provisions for outstanding repurchase claims in 2013 and 2012, including realized losses from the repurchase of residential mortgage loans sold.

Residential mortgage loans sold

January 1, 2004 to December 31, 2013 (USD billion)

| | |
|----------------------------------|--------------------|
| Government-sponsored enterprises | 8.2 |
| Private investors ¹ | 23.5 |
| Non-agency securitizations | 133.8 ² |
| Total | 165.5 |

¹ Primarily banks.

² The outstanding balance of residential mortgage loans sold was USD 26.2 billion as of December 31, 2013. The difference of the total balance of mortgage loans sold and the outstanding balance as of December 31, 2013 was attributable to borrower payments of USD 88.9 billion and losses of USD 18.7 billion due to loan defaults.

Residential mortgage loans sold – outstanding repurchase claims

| Claims rescinded | (24) | (4) | 0 | (28) | (37) | (18) | 0 | (55) |
| Transfers to/from arbitration and litigation, net ³ | 0 | 0 | (2,342) ⁴ | (2,342) | 0 | 0 | (841) | (841) |
| Balance at end of period | 77 | 420 | 83 | 580 | 67 | 464 | 1,395 | 1,926 |

¹ Settled at a repurchase price of USD 6 million and USD 15 million in 2013 and 2012, respectively.

² Settled at USD 48 million and USD 41 million in 2013 and 2012, respectively.

³ Refer to "Note 38 – Litigation" for repurchase claims that are in arbitration or litigation.

⁴ Transfers to arbitration and litigation disclosed in 2013 include portfolios of claims of approximately USD 0.3 billion for which formal legal proceedings had commenced in prior periods.

Provisions for outstanding repurchase claims

| | 2013 | 2012 |
|---|------------------------|-----------------------|
| Provisions for outstanding repurchase claims (USD million)¹ | | |
| Balance at beginning of period | 55 | 59 |
| Increase/(decrease) in provisions, net | 145 | 52 |
| Realized losses ² | (54) ³ | (56) ⁴ |
| Balance at end of period | 146³ | 55⁵ |

¹ Excludes provisions for repurchase claims related to residential mortgage loans sold that are in arbitration or litigation. Refer to "Note 38 – Litigation" for further information.

² Includes indemnifications paid to resolve loan repurchase claims.

³ Primarily related to government-sponsored enterprises and private investors.

⁴ Primarily related to government-sponsored enterprises and non-agency securitizations.

⁵ Primarily related to government-sponsored enterprises.

Representations and warranties relating to residential mortgage loans sold to non-agency securitization vehicles are more limited in scope than those relating to residential mortgage loans sold to GSEs, and it can be more difficult to establish causation and standing in making a repurchase claim for breach of representations and warranties on residential mortgage loans sold in non-agency securitizations. The Group is involved in litigation relating to representations and warranties on residential mortgage loans sold.

► Refer to "Note 38 – Litigation" for further information.

Repurchase claims on residential mortgage loans sold that are subject to arbitration or litigation proceedings, or become so during the reporting period, are not included in the Guarantees and commitments disclosure of repurchase claims and related loss contingencies and provisions but are addressed in litigation and related loss contingencies and provisions.

Repurchase claims relating to residential mortgage loans sold may increase in the future based on the large number of defaults in residential mortgages, including those sold or securitized by the Group.

Disposal-related contingencies and other indemnifications

The Group has certain guarantees for which its maximum contingent liability cannot be quantified. These guarantees are not reflected in the "Guarantees" table and are discussed below.

Disposal-related contingencies

In connection with the sale of assets or businesses, the Group sometimes provides the acquirer with certain indemnification provisions. These indemnification provisions vary by counterparty in scope and duration and depend upon the type of assets or businesses sold. They are designed to transfer the potential risk of certain unquantifiable and unknowable loss contingencies, such as litigation, tax and intellectual property matters, from the acquirer to the seller. The Group closely monitors all such contractual agreements in order to ensure that indemnification provisions are adequately provided for in the Group's consolidated financial statements.

Other indemnifications

The Group provides indemnifications to certain counterparties in connection with its normal operating activities, for which it is not possible to estimate the maximum amount that it could be obligated to pay. As a normal part of issuing its own securities, the Group typically agrees to reimburse holders for additional tax withholding charges or assessments resulting from changes in applicable tax laws or the interpretation of those laws. Securities that include these agreements to pay additional amounts generally also include a related redemption or call provision if the obligation to pay the additional amounts results from a change in law or its interpretation and the obligation cannot be avoided by the issuer taking reasonable steps to avoid the payment of additional amounts. Since such potential obligations are dependent on future changes in tax laws, the related liabilities the Group may incur as a result of such changes cannot be reasonably estimated. In light

of the related call provisions typically included, the Group does not expect any potential liabilities in respect of tax gross-ups to be material.

The Group is a member of numerous securities exchanges and clearing houses and may, as a result of its membership arrangements, be required to perform if another member defaults. The Group has determined that it is not possible to estimate the maximum amount of these obligations and believes that any potential requirement to make payments under these arrangements is remote.

Lease commitments

Lease commitments (CHF million)

| | |
|---|--------------|
| 2014 | 580 |
| 2015 | 527 |
| 2016 | 474 |
| 2017 | 412 |
| 2018 | 365 |
| Thereafter | 3,063 |
| Future operating lease commitments | 5,421 |
| Less minimum non-cancellable sublease rentals | 171 |
| Total net future minimum lease commitments | 5,250 |

Rental expense for operating leases

| in | 2013 | 2012 | 2011 |
|--|------------|------------|------------|
| Rental expense for operating leases (CHF million) | | | |
| Minimum rental expense | 642 | 631 | 554 |
| Sublease rental income | (85) | (98) | (97) |
| Total net expenses for operating leases | 557 | 533 | 457 |

Operating lease commitments

The Group has contractual commitments under operating lease arrangements for certain premises and equipment. Under operating leases, the leased property is not reported on the balance sheet of the lessee. Lease payments required by the contract are generally expensed on a straight-line basis over the term of the

lease. The related commitments for future rental expenses under operating leases are included in the table "Lease commitments".

From time to time, the Group may enter into sale-leaseback transactions, in which an asset is sold and immediately leased back. If specific criteria are met, such asset is derecognized from the balance sheet and an operating lease is recognized. If the present value of the lease payments is equal to or higher than 10% of the fair value of the property sold, any resulting gains up to an amount equal to the present value of the lease payments are deferred and recognized in the statement of operations over the term of the lease as a reduction of rental expense. Gains on sale-leaseback transactions for which the lease payments are lower than 10% of the fair value of the property sold or gains in excess of the present value of the lease payments are recognized in the statements of operations upon completion of the sale.

Sale-leaseback transactions

In the first quarter of 2012, the Group sold the office complex of its European headquarters at One Cabot Square in London to OCS Investment S.à.r.l. and leased back this property under an operating lease arrangement for 22 years, with two options to extend the lease by five years each. OCS Investment S.à.r.l. is a company wholly owned by the Qatar Investment Authority, which is a minority shareholder of the Group.

In the fourth quarter of 2012, the Group sold the Uetlihof office complex in Zurich, the Group's principal office building worldwide, to Norges Bank, a minority shareholder of the Group, and leased back this property under an operating lease arrangement for 25 years, with the option to extend the lease by up to 15 years. Norges Bank, through its Investment Management unit, was acting as the buyer on behalf of the Norwegian Government Pension Fund Global.

During 2013 and 2012, the Group entered into several smaller sale-leaseback transactions in respect of own property, which were all recognized as operating lease arrangements with lease terms of between two and ten years and between five and ten years, respectively. The total contractual rental expenses were CHF 78 million for the 2013 sale-leaseback transactions and CHF 41 million for the 2012 sale-leaseback transactions.

Other commitments

| end of | Maturity less than 1 year | Maturity between 1 to 3 years | Maturity between 3 to 5 years | Maturity greater than 5 years | Total gross amount | Total net amount ¹ | Collateral received |
|---|------------------------------------|--|--|--|--------------------------|-------------------------------------|------------------------|
| 2013 (CHF million) | | | | | | | |
| Irrevocable commitments under documentary credits | 5,484 | 27 | 1 | 0 | 5,512 | 5,452 | 3,381 |

| Other commitments | 949 | 864 | 172 | 576 | 2,561 | 2,561 | 131 |
| Total other commitments | 85,516 | 24,511 | 37,968 | 6,599 | 154,594 | 148,926 | 81,671 |

¹ Total net amount is computed as the gross amount less any participations.

² Irrevocable loan commitments do not include a total gross amount of CHF 90,254 million and CHF 78,887 million of unused credit limits as of December 31, 2013 and 2012, respectively, which were revocable at the Group's sole discretion upon notice to the client. Prior period has been adjusted to the current presentation.

Irrevocable commitments under documentary credits

Irrevocable commitments under documentary credits include exposures from trade finance related to commercial letters of credit under which the Group guarantees payments to exporters against presentation of shipping and other documents.

Irrevocable loan commitments

Irrevocable loan commitments are irrevocable credit facilities extended to clients and include fully or partially undrawn commitments that are legally binding and cannot be unconditionally cancelled by the Group. Commitments to originate mortgage loans that will be held for sale are considered derivatives for accounting purposes and are not included in this disclosure. Such commitments are reflected as derivatives in the consolidated balance sheets.

Forward reverse repurchase agreements

Forward reverse repurchase agreements represent transactions in which the initial cash exchange of the  reverse repurchase transactions takes place on specified future dates.

Other commitments

Other commitments include private equity commitments, firm commitments in underwriting securities, commitments arising from deferred payment letters of credit and from acceptances in circulation and liabilities for call and put options on shares and other equity instruments.

33 Transfers of financial assets and variable interest entities

In the normal course of business, the Group enters into transactions with, and makes use of, SPEs. An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it and is generally structured to isolate the SPE's assets from creditors of other entities, including the Group. The principal uses of SPEs are to assist the Group and its clients in securitizing financial assets and creating investment products. The Group also uses SPEs for other client-driven activity, such as to facilitate financings, and for Group tax or regulatory purposes.

Transfers of financial assets

Securitizations

The majority of the Group's securitization activities involve mortgages and mortgage-related securities and are predominantly transacted using SPEs. In a typical securitization, the SPE purchases assets financed by proceeds received from the SPE's issuance of debt and equity instruments, certificates,  CP and other notes of indebtedness. These assets and liabilities are recorded on the balance sheet of the SPE and not reflected on the Group's consolidated balance sheet, unless either the Group sold the assets to the entity and the accounting requirements for sale were not met or the Group consolidates the SPE.

The Group purchases commercial and residential mortgages for the purpose of securitization and sells these

mortgage loans to SPEs. These SPEs issue commercial mortgage-backed securities (CMBS), residential mortgage-backed securities (RMBS) and ABS that are collateralized by the assets transferred to the SPE and that pay a return based on the returns on those assets. Investors in these mortgage-backed securities or ABS typically have recourse to the assets in the SPEs, unless a third-party guarantee has been received to further enhance the creditworthiness of the assets. The investors and the SPEs have no recourse to the Group's assets. The Group is typically an underwriter of, and makes a market in, these securities.

The Group also transacts in re-securitizations of previously issued RMBS securities. Typically, certificates issued out of an existing securitization vehicle are sold into a newly created and separate securitization vehicle. Often, these re-securitizations are initiated in order to repack an existing security to give the investor a higher rated tranche.

The Group also uses SPEs for other asset-backed financings relating to client-driven activity and for Group tax or regulatory purposes. Types of structures included in this category include CDOs, leveraged finance, repack and other types of transactions, including life insurance structures, emerging market structures set up for financing, loan participation or loan origination purposes, and other alternative structures created for the purpose of investing in venture capital-like investments. CDOs are collateralized by the assets transferred to the CDO vehicle and pay a return based on the returns on those assets. Leveraged finance structures are used to assist in the syndication of certain loans held by the Group, while repack structures are designed to give a client collateralized exposure to specific cash flows or credit risk backed by collateral purchased from the Group. In these asset-backed financing structures investors typically only have recourse to the collateral of the SPE and do not have recourse to the Group's assets.

When the Group transfers assets into an SPE, it must assess whether that transfer is accounted for as a sale of the assets. Transfers of assets may not meet sale requirements if the assets have not been legally isolated from the Group and/or if the Group's continuing involvement is deemed to give it effective control over the assets. If the transfer is not deemed a sale, it is instead accounted for as a secured borrowing, with the transferred assets as collateral.

Gains and losses on securitization transactions depend, in part, on the carrying values of mortgages and CDOs involved in the transfer and are allocated between the assets sold and any beneficial interests retained according to the relative fair values at the date of sale.

The Group does not retain material servicing responsibilities from securitization activities.

The following table provides the gains or losses and proceeds from the transfer of assets relating to 2013, 2012 and 2011 securitizations of financial assets that qualify for sale accounting and

subsequent derecognition, along with the cash flows between the Group and the SPEs used in any securitizations in which the Group still has continuing involvement, regardless of when the securitization occurred.

Securitizations

| in | 2013 | 2012 | 2011 |
|--|--------|--------|--------|
| Gains and cash flows (CHF million) | | | |
| CMBS | | | |
| Net gain ¹ | 4 | 56 | 6 |
| Proceeds from transfer of assets | 5,574 | 6,156 | 974 |
| Servicing fees | 0 | 0 | 1 |
| Cash received on interests that continue to be held | 70 | 57 | 205 |
| RMBS | | | |
| Net gain/(loss) ¹ | (8) | 3 | 65 |
| Proceeds from transfer of assets | 24,523 | 15,143 | 30,695 |
| Purchases of previously transferred financial assets or its underlying collateral | (10) | (25) | (4) |
| Servicing fees | 4 | 3 | 3 |
| Cash received on interests that continue to be held | 486 | 554 | 382 |
| Other asset-backed financings | | | |
| Net gain ¹ | 15 | 83 | 24 |
| Proceeds from transfer of assets | 915 | 591 | 1,268 |
| Purchases of previously transferred financial assets or its underlying collateral ² | (213) | (621) | (256) |
| Servicing fees | 0 | 0 | 1 |
| Cash received on interests that continue to be held | 633 | 1,350 | 701 |

¹ Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the SPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization. The gains or losses on the sale of the collateral are the difference between the fair value on the day prior to the securitization pricing date and the sale price of the loans.

² Represents market making activity and voluntary repurchases at fair value where no repurchase obligations were present.

Continuing involvement in transferred financial assets

The Group may have continuing involvement in the financial assets that are transferred to an SPE, which may take several forms, including, but not limited to, servicing, recourse and guarantee arrangements, agreements to purchase or redeem transferred assets, derivative instruments, pledges of collateral and beneficial interests in the transferred assets. Beneficial interests, which are valued at fair value, include rights to receive all or portions of specified cash inflows received by an SPE, including, but not limited to, senior and subordinated shares of interest, principal, or other cash inflows to be "passed through" or "paid through", premiums due to guarantors, CP obligations, and residual interests, whether in the form of debt or equity.

The Group's exposure resulting from continuing involvement in transferred financial assets is generally limited to beneficial interests typically held by the Group in the form of instruments issued by SPEs that are senior, subordinated or residual tranches. These instruments are held by the Group typically in connection with underwriting or market-making activities and are included in trading assets in the consolidated balance sheets. Any changes in the fair value of these beneficial interests are recognized in the consolidated statements of operations.

Investors usually have recourse to the assets in the SPE and often benefit from other credit enhancements, such as collateral accounts, or from liquidity facilities, such as lines of credit or liquidity put option of asset purchase agreements. The SPE may also enter into a derivative contract in order to convert the yield or currency of the underlying assets to match the needs of the SPE investors, or to limit or change the credit risk of the SPE. The Group may be the provider of certain credit enhancements as well as the counterparty to any related derivative contract.

The following table provides the outstanding principal balance of assets to which the Group continued to be exposed after the transfer of the financial assets to any SPE and the total assets of the SPE as of the end of 2013 and 2012, regardless of when the transfer of assets occurred.

Principal amounts outstanding and total assets of SPEs resulting from continuing involvement

| end of | 2013 | 2012 |
|--------------------------------------|--------|--------|
| CHF million | | |
| CMBS | | |
| Principal amount outstanding | 37,308 | 30,050 |
| Total assets of SPE | 48,715 | 45,407 |
| RMBS | | |
| Principal amount outstanding | 45,571 | 58,112 |
| Total assets of SPE | 48,741 | 60,469 |
| Other asset-backed financings | | |
| Principal amount outstanding | 27,854 | 32,805 |
| Total assets of SPE | 27,854 | 32,805 |

Principal amount outstanding relates to assets transferred from the Group and does not include principal amounts for assets transferred from third parties.

Fair value of beneficial interests

The fair value measurement of the beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any continuing involvement does not include any benefits from financial instruments that the Group may utilize to hedge the inherent risks.

Key economic assumptions at the time of transfer

► Refer to "Fair value measurement" in Note 34 – Financial instruments for further information on fair value hierarchy.

Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

| | 2013 | | 2012 | |
|---|----------------|----------|----------------|----------|
| at time of transfer | CMBS | RMBS | CMBS | RMBS |
| CHF million, except where indicated | | | | |
| Fair value of beneficial interests | 633 | 2,993 | 761 | 2,219 |
| of which level 2 | 476 | 2,879 | 654 | 2,090 |
| of which level 3 | 156 | 114 | 107 | 129 |
| Weighted-average life, in years | 7.3 | 7.7 | 8.4 | 5.0 |
| Prepayment speed assumption (rate per annum), in % ¹ | – ² | 2.0–31.0 | – ² | 0.1–34.9 |
| Cash flow discount rate (rate per annum), in % ³ | 1.6–11.6 | 0.0–45.9 | 0.8–10.7 | 0.1–25.7 |
| Expected credit losses (rate per annum), in % | 0.0–7.5 | 0.0–45.8 | 0.5–9.0 | 0.0–25.1 |

Transfers of assets in which the Group does not have beneficial interests are not included in this table.

¹ Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

² To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

³ The rate was based on the weighted-average yield on the beneficial interests.

Key economic assumptions as of the reporting date

The following table provides the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of the end of 2013 and 2012.

Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

| | 2013 | | | 2012 | | |
|---|-------------------|----------|--|-------------------|----------|--|
| | CMBS ¹ | RMBS | Other asset-backed financing activities ² | CMBS ¹ | RMBS | Other asset-backed financing activities ² |
| CHF million, except where indicated | | | | | | |
| Fair value of beneficial interests | 1,132 | 2,354 | 284 | 274 | 1,929 | 692 |
| of which non-investment grade | 26 | 359 | 204 | 90 | 342 | 686 |
| Weighted-average life, in years | 6.5 | 8.6 | 3.7 | 4.0 | 5.2 | 3.6 |
| Prepayment speed assumption (rate per annum), in % ³ | – | 1.0–23.5 | – | – | 0.1–27.6 | – |
| Impact on fair value from 10% adverse change | – | (26.6) | – | – | (38.5) | – |
| Impact on fair value from 20% adverse change | – | (48.6) | – | – | (74.3) | – |
| Cash flow discount rate (rate per annum), in % ⁴ | 1.1–37.1 | 1.7–22.4 | 1.0–23.1 | 1.1–50.2 | 0.2–42.8 | 0.7–51.7 |
| Impact on fair value from 10% adverse change | (25.5) | (65.0) | (2.4) | (14.8) | (62.8) | (1.0) |
| Impact on fair value from 20% adverse change | (50.0) | (124.9) | (4.9) | (19.9) | (93.5) | (1.8) |
| Expected credit losses (rate per annum), in % | 0.2–36.6 | 0.1–17.3 | 0.7–21.0 | 0.9–49.5 | 0.9–42.8 | 0.3–51.4 |
| Impact on fair value from 10% adverse change | (10.9) | (42.2) | (0.4) | (14.4) | (55.9) | (0.8) |
| Impact on fair value from 20% adverse change | (21.5) | (79.6) | (0.7) | (19.2) | (80.3) | (1.6) |

¹ To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

² CDOs within this category are generally structured to be protected from prepayment risk.

³ Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

⁴ The rate was based on the weighted-average yield on the beneficial interests.

These sensitivities are hypothetical and do not reflect economic hedging activities. Changes in fair value based on a 10% or 20% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the beneficial interests is calculated without changing any other assumption. In practice, changes in one assumption may result in changes in other assumptions (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

Secured borrowings

The following table provides the carrying amounts of transferred financial assets and the related liabilities where sale treatment was not achieved as of the end of 2013 and 2012.

► Refer to "Note 35 – Asset pledged and collateral" for further information.

Variable interest entities

As a normal part of its business, the Group engages in various transactions that include entities that are considered VIEs and are grouped into three primary categories: CDOs, CP conduits and financial intermediation. VIEs are SPEs that typically either lack sufficient equity to finance their activities without additional subordinated financial support or are structured such that the holders of the voting rights do not substantively participate in the gains and losses of the entity. VIEs may be sponsored by the Group, unrelated third parties or clients. Such entities are required to be assessed for consolidation, compelling the primary beneficiary to consolidate the VIE. The consolidation assessment requires an entity to determine whether it has the power to direct the activities that most significantly affect the economics of the VIE as well as whether the reporting entity has potentially significant benefits or losses in the VIE. The primary beneficiary assessment must be re-evaluated on an ongoing basis.

Application of the requirements for consolidation of VIEs may require the exercise of significant management judgment. In the event consolidation of a VIE is required, the exposure to the Group is limited to that portion of the VIE's assets attributable to any variable interest held by the Group prior to any risk management activities to hedge the Group's net exposure. Any interests held in the VIE by third parties, even though consolidated by the Group, will not typically impact its results of operations.

Transactions with VIEs are generally executed to facilitate securitization activities or to meet specific client needs, such as providing liquidity or investing opportunities, and, as part of these activities, the Group may hold interests in the VIEs. Securitization-related transactions with VIEs involve selling or purchasing assets as well as possibly entering into related derivatives with those VIEs, providing liquidity, credit or other support. Other transactions with VIEs include derivative transactions in the Group's capacity as the prime broker. The Group also enters into lending arrangements with VIEs for the purpose of financing projects or the acquisition of assets. Typically, the VIE's assets are restricted in nature in that they are held primarily to satisfy the obligations of the entity. Further, the Group is involved with VIEs which were formed for the purpose of offering alternative investment solutions to clients. Such VIEs relate primarily to private equity investments, fund-linked vehicles or funds of funds, where the Group acts as structurer, manager, distributor, broker, market maker or liquidity provider.

As a consequence of these activities, the Group holds variable interests in VIEs. Such variable interests consist of financial instruments issued by VIEs and which are held by the Group, certain derivatives with VIEs or loans to VIEs. Guarantees issued by the Group to or on behalf of VIEs may also qualify as variable interests. For such guarantees, including derivatives that act as guarantees, the notional amount of the respective guarantees is presented to represent the exposure. In general, investors in consolidated VIEs do not have recourse to the Group in the event of a default, except where a guarantee was provided to the investors

or where the Group is the counterparty to a derivative transaction involving VIEs.

Total assets of consolidated and non-consolidated VIEs for which the Group has involvement represent the total assets of the VIEs even though the Group's involvement may be significantly less due to interests held by third-party investors. The asset balances for non-consolidated VIEs where the Group has significant involvement represent the most current information available to the Group regarding the remaining principal balance of assets owned. In most cases, the asset balances represent an amortized cost basis without regards to impairments in fair value, unless fair value information is readily available.

The Group's maximum exposure to loss is different from the carrying value of the assets of the VIE. This maximum exposure to loss consists of the carrying value of the Group variable interests held as trading assets, derivatives and loans and the notional amount of guarantees to VIEs, rather than the amount of total assets of the VIEs. The maximum exposure to loss does not reflect the Group's risk management activities, including effects from financial instruments that the Group may utilize to economically hedge the risks inherent in these VIEs. The economic risks associated with VIE exposures held by the Group, together with all relevant risk mitigation initiatives, are included in the Group's risk management framework.

The Group has not provided financial or other support to consolidated or non-consolidated VIEs that it was not contractually required to provide.

Collateralized debt obligations

The Group engages in CDO transactions to meet client and investor needs, earn fees and sell financial assets. The Group may act as underwriter, placement agent or asset manager and may warehouse assets prior to the closing of a transaction. As part of its structured finance business, the Group purchases loans and other debt obligations from and on behalf of clients for the purpose of securitization. The loans and other debt obligations are sold to VIEs, which in turn issue CDOs to fund the purchase of assets such as investment grade and high yield corporate debt instruments.

Typically, the collateral manager in a managed CDO is deemed to be the entity that has the power to direct the activities that most affect the economics of the entity. In a static CDO this "power" role is more difficult to analyze and may be the sponsor of the entity or the CDS counterparty.

CDOs provide credit risk exposure to a portfolio of ABS (cash CDOs) or a reference portfolio of securities (synthetic CDOs). Cash CDO transactions hold actual securities whereas synthetic CDO transactions use CDS to exchange the underlying credit risk instead of using cash assets. The Group may also act as a derivative counterparty to the VIEs, which are typically not variable interests, and may invest in portions of the notes or equity issued by the VIEs. The CDO entities may have actively managed portfolios or static portfolios.

The securities issued by these VIEs are payable solely from the cash flows of the related collateral, and third-party creditors of these VIEs do not have recourse to the Group in the event of default.

The Group's exposure in CDO transactions is typically limited to interests retained in connection with its underwriting or market-making activities. Unless the Group has been deemed to have "power" over the entity and these interests are potentially significant, the Group is not the primary beneficiary of the vehicle and does not consolidate the entity. The Group's maximum exposure to loss does not include any effects from financial instruments used to economically hedge the risks of the VIEs.

Commercial paper conduit

The Group continues to act as the administrator and provider of liquidity and credit enhancement facilities for one asset-backed CP conduit, Alpine, a client-focused multi-seller conduit vehicle. Alpine publishes portfolio and asset data and submits its portfolio to a rating agency for public ratings based on the cash flows of the portfolio taken as a whole. This CP conduit purchases assets, primarily loans and receivables, from clients and finances such purchases through the issuance of CP backed by these assets. For an asset to qualify for acquisition by the CP conduit, it must be rated at least investment grade after giving effect to the related asset-specific credit enhancement primarily provided by the client seller of the asset. The clients provide credit support to investors of the CP conduit in the form of over-collateralization and other asset-specific enhancements. Further, an unaffiliated investor retains a limited first-loss position in Alpine's entire portfolio. Alpine is a separate legal entity that is wholly owned by the Group. However, its assets are available to satisfy only the claims of its creditors. In addition, the Group, as administrator and liquidity and credit enhancement facilities provider, has significant exposure to and power over the activities of Alpine. Alpine is considered a VIE for accounting purposes and the Group is deemed the primary beneficiary and consolidates this entity.

The overall average maturity of the conduit's outstanding CP was approximately 19 days and 27 days as of December 31, 2013 and 2012, respectively. As of December 31, 2013 and 2012, Alpine had the highest short-term ratings from Moody's and Dominion Bond Rating Service and was rated A-1 by Standard & Poor's and F-1 by Fitch. The majority of Alpine's purchased assets were highly rated loans or receivables in the consumer sector, including residential mortgages and advance financing receivables, and auto and equipment loans or leases. As of December 31, 2013 and 2012, those assets had an average rating of AA, based on the lowest of each asset's external or internal rating, and an average maturity of 2.1 years and 2.9 years as of December 31, 2013 and 2012, respectively.

The Group's commitment to this CP conduit consists of obligations under liquidity agreements and a program-wide credit enhancement agreement. The liquidity agreements are asset-specific arrangements, which require the Group to purchase assets from the CP conduit in certain circumstances, including a lack of

liquidity in the CP market such that the CP conduit cannot refinance its obligations or, in some cases, a default of an underlying asset. The Group may, at its discretion, purchase assets that fall below investment grade in order to support the CP conduit. In both circumstances, the asset-specific credit enhancements provided by the client seller of the assets and the first-loss investor's respective exposures to those assets remain unchanged. In entering into such agreements, the Group reviews the credit risk associated with these transactions on the same basis that would apply to other extensions of credit. The program-wide credit enhancement agreement with the CP conduit would absorb potential defaults of the assets, but is senior to the credit protection provided by the client seller of assets and the first-loss investor.

The Group believes that the likelihood of incurring a loss equal to the maximum exposure is remote because the assets held by the CP conduit, after giving effect to related asset-specific credit enhancement primarily provided by the clients, are classified as investment grade. The Group's economic risks associated with the purchased assets of the CP conduit are included in the Group's risk management framework including counterparty, economic capital and scenario analysis.

Financial intermediation

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients.

The Group considers the likelihood of incurring a loss equal to the maximum exposure to be remote because of the Group's risk mitigation efforts, including, but not limited to, economic hedging strategies and collateral arrangements. The Group's economic risks associated with consolidated and non-consolidated VIE exposures arising from financial intermediation, together with all relevant risk mitigation initiatives, are included in the Group's risk management framework.

Financial intermediation consists of securitizations, funds, loans, and other vehicles.

Securitizations

Securitizations are primarily ◉ CMBS, ◉ RMBS and ABS vehicles. The Group acts as an underwriter, market maker, liquidity provider, derivative counterparty and/or provider of credit enhancements to VIEs related to certain securitization transactions.

The maximum exposure to loss is the carrying value of the loan securities and derivative positions that are variable interests, if any, plus the exposure arising from any credit enhancements the Group provided. The Group's maximum exposure to loss does not include any effects from financial instruments used to economically hedge the risks of the VIEs.

The activities that have the most significant impact on the securitization vehicle are the decisions relating to defaulted loans, which are controlled by the servicer. The party that controls the servicing has the ability to make decisions that significantly affect the result of the activities of the securitization vehicle. If a securitization vehicle has multiple parties that control servicing over specific assets, the Group determines it has power when it has

control over the servicing of greater than 50% of the assets in the securitization vehicle. When a servicer or its related party also has an economic interest that has the potential to absorb a significant portion of the gains and/or losses, it will be deemed the primary beneficiary and consolidate the vehicle. If the Group determines that it controls the relevant servicing, it then determines if it has the obligation to absorb losses from, or the right to receive benefits of, the securitization vehicle that could potentially be significant to the vehicle, primarily by evaluating the amount and nature of securities issued by the vehicle that it holds. Factors considered in this analysis include the level of subordination of the securities held as well as the size of the position, based on the percentage of the class of securities and the total deal classes of securities issued. The more subordinated the level of securities held, the more likely it is that the Group will be the primary beneficiary. This consolidation analysis is performed each reporting period based on changes in inventory and the levels of assets remaining in the securitization. The Group typically consolidates securitization vehicles when it is the servicer and has holdings stemming from its role as underwriter. Short-term market making holdings in vehicles are not typically considered to be potentially significant for the purposes of this assessment.

In the case of re-securitizations of previously issued RMBS securities, the re-securitization vehicles are passive in nature and do not have any significant ongoing activities that require management, and decisions relating to the design of the securitization transaction at its inception is the key power relating to the vehicle. Activities at inception include selecting the assets and determining the capital structure. The power over a re-securitization vehicle is typically shared between the Group and the investor(s) involved in the design and creation of the vehicle. The Group concludes that it is the primary beneficiary of a re-securitization vehicle when it owns substantially all of the bonds issued from the vehicle.

Funds

Funds include investment structures such as mutual funds, funds of funds, private equity funds and fund-linked products where the investors' interest is typically in the form of debt rather than equity, thereby making them VIEs. The Group may have various relationships with such VIEs in the form of structurer, investment advisor, investment manager, administrator, custodian, underwriter, placement agent, market maker and/or as prime broker. These activities include the use of VIEs in structuring fund-linked products, hedge funds of funds or private equity investments to provide clients with investment opportunities in alternative investments. In such transactions, a VIE holds underlying investments and issues securities that provide the investors with a return based on the performance of those investments.

The maximum exposure to loss consists of the fair value of instruments issued by such structures that are held by the Group as a result of underwriting or market-making activities, financing provided to the vehicles and the Group's exposure resulting from principal protection and redemptions features. The investors

typically retain the risk of loss on such transactions, but for certain fund types, the Group may provide principal protection on the securities to limit the investors' exposure to downside market risk. The Group's maximum exposure to loss does not include any effects from financial instruments used to economically hedge the risk of the VIEs.

Another model is used to assess funds for consolidation under US GAAP. Rather than the consolidation model which incorporates power and the potential to absorb significant risk and rewards, a previous consolidation model is used which results in the Group being the primary beneficiary and consolidating the funds if it holds more than 50% of their outstanding issuances.

Loans

Loans are single-financing vehicles where the Group provides financing for specified assets or business ventures and the respective owner of the assets or manager of the businesses provides the equity in the vehicle. These tailored lending arrangements are established to purchase, lease or otherwise finance and manage clients' assets.

The maximum exposure to loss is the carrying value of the Group's loan exposure, which is subject to the same credit risk management procedures as loans issued directly to clients. The clients' creditworthiness is carefully reviewed, loan-to-value ratios are strictly set and, in addition, clients provide equity, additional collateral or guarantees, all of which significantly reduce the Group's exposure. The Group considers the likelihood of incurring a loss equal to the maximum exposure to be remote because of the Group's risk mitigation efforts, which includes over-collateralization and effective monitoring to ensure that a sufficient loan-to-value ratio is maintained.

The third-party sponsor of the VIE will typically have control over the assets during the life structure and have the potential to absorb significant gains and losses; the Group is typically not the primary beneficiary of these structures and will not have to consolidate them. However, a change in the structure, such as a default of the sponsor, may result in the Group gaining control over the assets. If the Group's lending is significant, it may then be required to consolidate the entity.

Other

Other includes additional vehicles where the Group provides financing and trust preferred issuance vehicles. Trust preferred issuance vehicles are utilized to assist the Group in raising capital-efficient financing. The VIE issues preference shares which are guaranteed by the Group and uses the proceeds to purchase the debt of the Group. The Group's guarantee of its own debt is not considered a variable interest and, as it has no holdings in these vehicles, the Group has no maximum exposure to loss. Non-consolidated VIEs include only the total assets of trust preferred issuance vehicles, as the Group has no variable interests with these entities.

Consolidated VIEs

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The Group consolidates all VIEs related to financial intermediation for which it was the primary beneficiary.

The consolidated VIEs tables provide the carrying amounts and classifications of the assets and liabilities of consolidated VIEs as of the end of 2013 and 2012.

Consolidated VIEs in which the Group was the primary beneficiary

| end of | CDO | CP Conduit | Financial intermediation | | | | Total |

Non-consolidated VIEs

The non-consolidated VIEs tables provide the carrying amounts and classification of the assets of variable interests recorded in the Group's consolidated balance sheets, maximum exposure to loss and total assets of the non-consolidated VIEs.

Maximum exposure to loss represents the variable interests of non-consolidated VIEs that are recorded by the Group (for example, direct holdings in vehicles, loans and other receivables), as well as notional amounts of guarantees and off-balance sheet commitments which are variable interests that have been extended to non-consolidated VIEs. Such amounts, particularly notional

amounts of derivatives and guarantees, do not represent the anticipated losses in connection with these transactions as they do not take into consideration the effect of collateral, recoveries or the probability of loss. In addition, they exclude the effect of offsetting financial instruments that are held to mitigate these risks and have not been reduced by unrealized losses previously recorded by the Group in connection with guarantees or derivatives.

Non-consolidated VIE assets are related to the non-consolidated VIEs with which the Group has variable interests. These amounts represent the assets of the entities themselves and are typically unrelated to the exposures the Group has with the entity

and thus are not amounts that are considered for risk management purposes.

Certain VIEs have not been included in the following table, including VIEs structured by third parties in which the Group's interest is in the form of securities held in the Group's inventory, certain single-asset financing vehicles not sponsored by the Group to which the Group provides financing but has very little risk of loss due to over-collateralization and guarantees, failed sales where the Group does not have any other holdings and other entities out of scope.

34 Financial instruments

The disclosure of the Group's financial instruments below includes the following sections:

- Concentration of credit risk;
- Fair value measurement (including fair value hierarchy, transfers between levels; level 3 reconciliation; qualitative and quantitative disclosures of valuation techniques and nonrecurring fair value changes)
- Fair value option; and
- Disclosures about fair value of financial instruments not carried at fair value.

CONCENTRATIONS OF CREDIT RISK

Credit risk concentrations arise when a number of counterparties are engaged in similar business activities, are located in the same geographic region or when there are similar economic features that would cause their ability to meet contractual obligations to be similarly impacted by changes in economic conditions.

The Group regularly monitors the credit risk portfolio by counterparties, industry, country and products to ensure that such potential concentrations are identified, using a comprehensive range of quantitative tools and metrics. Credit limits relating to counterparties and products are managed through counterparty limits which set the maximum credit exposures the Group is willing to assume to specific counterparties over specified periods. Country limits are established to avoid any undue country risk concentration.

From an industry point of view, the combined credit exposure of the Group is diversified. A large portion of the credit exposure is with individual clients, particularly through residential mortgages in Switzerland, or relates to transactions with financial institutions. In both cases, the customer base is extensive and the number and variety of transactions are broad. For transactions with financial institutions, the business is also geographically diverse, with operations focused in the Americas, Europe and, to a lesser extent, Asia Pacific.

FAIR VALUE MEASUREMENT

A significant portion of the Group's financial instruments are carried at **◻** fair value. Deterioration of financial markets could significantly impact the fair value of these financial instruments and the results of operations.

The fair value of the majority of the Group's financial instruments is based on quoted prices in active markets or observable inputs. These instruments include government and agency securities, certain **◻** CP, most investment grade corporate debt, certain high yield debt securities, exchange-traded and certain **◻** OTC derivative instruments and most listed equity securities.

In addition, the Group holds financial instruments for which no prices are available and which have little or no observable inputs. For these instruments, the determination of fair value requires subjective assessment and judgment, depending on liquidity, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. In such circumstances, valuation is determined based on management's own judgments about the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. These instruments include certain OTC derivatives, including equity and credit derivatives, certain corporate equity-linked securities, mortgage-related and **◻** CDO securities, private equity investments, certain loans and credit products, including leveraged finance, certain syndicated loans and certain high yield bonds, and life finance instruments.

The fair value of financial assets and liabilities is impacted by factors such as benchmark interest rates, prices of financial instruments issued by third parties, commodity prices, foreign exchange rates and index prices or rates. In addition, valuation adjustments are an integral part of the valuation process when market prices are not indicative of the credit quality of a counterparty, and are applied to both OTC derivatives and debt instruments. The impact of changes in a counterparty's credit spreads (known as **◻** credit valuation adjustments) is considered when measuring the fair value of assets, and the impact of changes in the Group's own credit spreads (known as **◻** debit valuation adjustments) is considered when measuring the fair value of its liabilities. For OTC derivatives, the impact of changes in both the Group's and the counterparty's credit standing is considered when measuring their fair value, based on current **◻** CDS prices. The adjustments also take into account contractual factors designed to reduce the Group's credit exposure to a counterparty, such as collateral held and master **◻** netting agreements. For hybrid debt instruments with embedded derivative features, the impact of changes in the Group's credit standing is considered when measuring their fair value, based on current funded debt spreads.

ASU 2011-04 permits a reporting entity to measure the fair value of a group of financial assets and financial liabilities on the basis of the price that would be received to sell a net long position or paid to transfer a net short position for a particular risk

exposure in an orderly transaction between market participants at the measurement date. This change to the fair value measurement guidance is consistent with industry practice. As such, the Group continues to apply bid and offer adjustments to net portfolios of cash securities and/or derivative instruments to adjust the value of the net position from a mid-market price to the appropriate bid or offer level that would be realized under normal market conditions for the net long or net short position for a specific market risk. In addition, the Group reflects the net exposure to credit risk for its derivative instruments where the Group has legally enforceable agreements with its counterparties that mitigate credit risk exposure in the event of default. Valuation adjustments are recorded in a reasonable and consistent manner that results in an allocation to the relevant disclosures in the notes to the financial statements as if the valuation adjustment had been allocated to the individual unit of account.

Fair value hierarchy

The levels of the fair value hierarchy are defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group has the ability to access. This level of the fair value hierarchy provides the most reliable evidence of fair value and is used to measure fair value whenever available.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly. These inputs include: (i) quoted prices for similar assets or liabilities in active markets; (ii) quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current or price quotations vary substantially either over time or among market makers, or in which little information is publicly available; (iii) inputs other than quoted prices that are observable for the asset or liability; or (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3: Inputs that are unobservable for the asset or liability. These inputs reflect the Group's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available in the circumstances, which include the Group's own data. The Group's own data used to develop unobservable inputs is adjusted if information indicates that market participants would use different assumptions.

The Group records net open positions at bid prices if long, or at ask prices if short, unless the Group is a market maker in such positions, in which case mid-pricing is utilized. Fair value measurements are not adjusted for transaction costs.

Assets and liabilities measured at fair value on a recurring basis

| end of 2013 | Level 1 | Level 2 | Level 3 | Netting impact ¹ | Total |

¹ Derivative contracts are reported on a gross basis by level. The impact of netting represents legally enforceable master netting agreements.

Transfers between level 1 and level 2

All transfers between level 1 and level 2 are reported through the last day of the reporting period.

In 2013, transfers to level 1 out of level 2 were from trading assets and trading liabilities. The transfers were primarily in exchange traded derivatives as they moved closer to maturity and pricing inputs became more observable. Transfers out of level 1 to level 2 were primarily from trading assets. The transfers were primarily in equity as suitable closing prices were unobtainable as of the end of 2013.

Gains and losses on assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (level 3)

| in | 2013 | | | 2012 | | |
|--|------------------|----------------|--------------------------|------------------|----------------|--------------------------|
| | Trading revenues | Other revenues | Total revenues | Trading revenues | Other revenues | Total revenues |
| Gains and losses on assets and liabilities (CHF million) | | | | | | |
| Net realized/unrealized gains/(losses) included in net revenues | (746) | 536 | (210)¹ | (1,018) | 268 | (750)¹ |
| Whereof: | | | | | | |
| Unrealized gains/(losses) relating to assets and liabilities still held as of the reporting date | (2,850) | 414 | (2,436) | (1,209) | (82) | (1,291) |

¹ Excludes net realized/unrealized gains/(losses) attributable to foreign currency translation impact.

Both observable and unobservable inputs may be used to determine the fair value of positions that have been classified within level 3. As a result, the unrealized gains and losses for assets and liabilities within level 3 presented in the table above may include changes in fair value that were attributable to both observable and unobservable inputs.

The Group employs various economic hedging techniques in order to manage risks, including risks in level 3 positions. Such techniques may include the purchase or sale of financial instruments that are classified in levels 1 and/or 2. The realized and unrealized gains and losses for assets and liabilities in level 3 presented in the table above do not reflect the related realized or unrealized gains and losses arising on economic hedging instruments classified in levels 1 and/or 2.

Transfers in and out of level 3

Transfers into level 3 assets during 2013 were CHF 7,429 million, primarily from loans held-for-sale and trading assets. The transfers were primarily in the corporate credit, private equity and prime services businesses due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 2013 were CHF 9,761 million, primarily in trading assets, loans held-for-sale and loans. The transfers out of level 3 assets were primarily in the Brazil trading, private equity, corporate credit, prime services, rates and equity derivatives businesses due to improved observability of pricing data and increased availability of pricing information from external providers.

Transfers into level 3 assets during 2012 were CHF 7,493 million, primarily from trading assets and loans held-for-sale. The transfers were primarily in the equity derivatives, private equity, corporate credit, corporate bank and securitized products (consolidated SPE positions) businesses due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 2012 were CHF 11,516 million, primarily in trading assets and loans held-for-sale. The transfers out of level 3 assets were primarily in the equity derivatives, private equity, securitized products (consolidated SPE positions), corporate credit, rates and CMBS businesses due to improved observability of pricing data and increased availability of pricing information from external providers.

Qualitative disclosures of valuation techniques

Overview

The Group has implemented and maintains a valuation control framework, which is supported by policies and procedures that define the principles for controlling the valuation of the Group's financial instruments. Product Control and Risk Management create, review and approve significant valuation policies and procedures. The framework includes three main internal processes: (i) valuation governance; (ii) independent price verification and significant unobservable inputs review; and (iii) a cross-functional pricing model review. Through this framework, the Group determines the reasonableness of the fair value of its financial instruments.

On a monthly basis, meetings are held for each business line with senior representatives of the Front Office and Product Control to discuss independent price verification results, valuation adjustments, and other significant valuation issues. On a quarterly basis, a review of significant changes in the fair value of financial instruments is undertaken by Product Control and conclusions are reached regarding the reasonableness of those changes. Additionally, on a quarterly basis, meetings are held for each business line with senior representatives of the Front Office, Product Control, Risk Management, and Financial Accounting to discuss independent price verification results, valuation issues, business and market updates, as well as a review of significant changes in fair value from the prior quarter, significant unobservable inputs and prices used in valuation techniques, and valuation adjustments.

The results of these meetings are aggregated for presentation to the Valuation and Risk Management Committee (VARMC) and the Audit Committee. The VARMC, which is comprised of Executive Board members and the heads of the business and control functions, meets to review and ratify valuation review conclusions, and to resolve significant valuation issues for the Group. Oversight of the valuation control framework is through specific and regular reporting on valuation directly to the Group's Executive Board through the VARMC.

One of the key components of the governance process is the segregation of duties between the Front Office and Product Control. The Front Office is responsible for measuring inventory at fair value on a daily basis, while Product Control is responsible for independently reviewing and validating those valuations on a periodic basis. The Front Office values the inventory using, wherever

possible, observable market data which may include executed transactions, dealer quotes, or broker quotes for the same or similar instruments. Product Control validates this inventory using independently sourced data that also includes executed transactions, dealer quotes, and broker quotes.

Product Control utilizes independent pricing service data as part of their review process. Independent pricing service data is analyzed to ensure that it is representative of fair value including confirming that the data corresponds to executed transactions or executable broker quotes, review and assessment of contributors to ensure they are active market participants, review of statistical data and utilization of pricing challenges. The analysis also includes understanding the sources of the pricing service data and any models or assumptions used in determining the results. The purpose of the review is to judge the quality and reliability of the data for fair value measurement purposes and its appropriate level of usage within the Product Control independent valuation review.

For certain financial instruments the fair value is estimated in full or in part using valuation techniques based on assumptions that are not supported by market observable prices, rates, or other inputs. In addition, there may be uncertainty about a valuation, which results from the choice of valuation technique or model used, the assumptions embedded in those models, the extent to which inputs are not market observable, or as a consequence of other elements affecting the valuation technique or model. Model calibration is performed when significant new market information becomes available or at a minimum on a quarterly basis as part of the business review of significant unobservable inputs for level 3 instruments. For models that have been deemed to be significant to the overall fair value of the financial instrument, model validation is performed as part of the periodic review of the related model.

The Group performs a sensitivity analysis of its significant level 3 financial instruments. This sensitivity analysis estimates a fair value range by changing the related significant unobservable inputs value. This sensitivity analysis is an internal mechanism to monitor the impact of reasonable alternative inputs or prices for level 3 financial instruments. Where a model-based technique is used to determine the fair value of the level 3 financial instrument, an alternative input value is utilized to derive an estimated fair value range. Where a price-based technique is used to determine the fair value of the level 3 financial instruments, Front Office professional judgment is used to estimate a fair value range.

The following information on the valuation techniques and significant unobservable inputs of the various financial instruments, and the sensitivity of fair value measurements to changes in significant unobservable inputs, should be read in conjunction with the tables “Quantitative information about level 3 assets at fair value” and “Quantitative information about level 3 liabilities at fair value”.

Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions

Securities purchased under resale agreements and securities sold under repurchase agreements are measured at fair value

using discounted cash flow analysis. Future cash flows are discounted using observable market interest rate repurchase/resale curves for the applicable maturity and underlying collateral of the instruments. As such, the significant majority of both securities purchased under resale agreements and securities sold under repurchase agreements are included in level 2 of the fair value hierarchy. Structured resale and repurchase agreements include embedded derivatives, which are measured using the same techniques as described below for stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships. If the value of the embedded derivative is determined using significant unobservable inputs, those structured resale and repurchase agreements are classified within level 3 of the fair value hierarchy. Significant unobservable input is funding spread.

Securities purchased under resale agreements are usually fully collateralized or over collateralized by government securities, money market instruments, corporate bonds, or other debt instruments. In the event of counterparty default, the collateral service agreement provides the Group with the right to liquidate the collateral held.

Debt securities

Foreign governments and corporates

Government debt securities typically have quoted prices in active markets and are categorized as level 1 instruments. For debt securities for which market prices are not available, valuations are based on yields reflecting credit rating, historical performance, delinquencies, loss severity, the maturity of the security, recent transactions in the market or other modeling techniques, which may involve judgment. Those securities where the price or model inputs are observable in the market are categorized as level 2 instruments, while those securities where prices are not observable and significant model inputs are unobservable are categorized as level 3 of the fair value hierarchy.

Corporate bonds are priced to reflect current market levels either through recent market transactions or broker or dealer quotes. Where a market price for the particular security is not directly available, valuations are obtained based on yields reflected by other instruments in the specific or similar entity's capital structure and adjusting for differences in seniority and maturity, benchmarking to a comparable security where market data is available (taking into consideration differences in credit, liquidity and maturity), or through the application of cash flow modeling techniques utilizing observable inputs, such as current interest rate curves and observable CDS spreads. Significant unobservable inputs may include price, buyback probability, correlation and credit spread. For securities using market comparable price, the differentiation between level 2 and level 3 is based upon the relative significance of any yield adjustments as well as the accuracy of the comparison characteristics (i.e., the observable comparable security may be in the same country but a different industry and may have a different seniority level – the lower the comparability the more likely the security will be level 3).

CMBS, RMBS and CDO securities

Fair values of ◉ RMBS, ◉ CMBS and CDO may be available through quoted prices, which are often based on the prices at which similarly structured and collateralized securities trade between dealers and to and from customers. Fair values of RMBS, CMBS and CDO for which there are significant unobservable inputs are valued using capitalization rate. Price may not be observable for fair value measurement purposes for many reasons, such as the length of time since the last executed transaction for the related security, use of a price from a similar instrument, or use of a price from an indicative quote. Fair values determined by market comparable price may include discounted cash flow models using the inputs prepayment rates, default rates, loss severity and discount rates. Prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness.

For most structured debt securities, determination of fair value requires subjective assessment depending on liquidity, ownership concentration, and the current economic and competitive environment. Valuation is determined based on the Front Office's own assumptions about how market participants would price the asset. Collateralized bond and loan obligations are split into various structured tranches and each tranche is valued based upon its individual rating and the underlying collateral supporting the structure. Valuation models are used to value both cash and synthetic CDOs.

Equity securities

The majority of the Group's positions in equity securities are traded on public stock exchanges for which quoted prices are readily and regularly available and are therefore categorized as level 1 instruments. Level 2 and level 3 equities include fund-linked products, convertible bonds or equity securities with restrictions that are not traded in active markets. Significant unobservable inputs may include earnings before interest, taxes, depreciation and amortization (EBITDA) multiple, discount rate and capitalization rate.

Derivatives

◉ Derivatives held for trading purposes or used in hedge accounting relationships include both OTC and exchange-traded derivatives. The fair values of exchange-traded derivatives measured using observable exchange prices are included in level 1 of the fair value hierarchy. For exchange-traded derivatives where the volume of trading is low, the observable exchange prices may not be considered executable at the reporting date. These derivatives are valued in the same manner as similar observable OTC derivatives and are included in level 2 of the fair value hierarchy. If the similar OTC derivative used for valuing the exchange-traded derivative is not observable, then the exchange-traded derivative is included in level 3 of the fair value hierarchy.

The fair values of OTC derivatives are determined on the basis of either industry standard models or internally developed proprietary models. Both model types use various observable and

unobservable inputs in order to determine fair value. The inputs include those characteristics of the derivative that have a bearing on the economics of the instrument. The determination of the fair value of many derivatives involves only a limited degree of subjectivity because the required inputs are observable in the marketplace, while more complex derivatives may use unobservable inputs that rely on specific proprietary modeling assumptions. Where observable inputs (prices from exchanges, dealers, brokers or market consensus data providers) are not available, attempts are made to infer values from observable prices through model calibration (spot and forward rates, mean reversion, benchmark interest rate curves and volatility inputs for commonly traded option products). For inputs that cannot be derived from other sources, estimates from historical data may be made. OTC derivatives where the majority of the value is derived from market observable inputs are categorized as level 2 instruments, while those where the majority of the value is derived from unobservable inputs are categorized as level 3 of the fair value hierarchy.

Our valuation of derivatives does not include an adjustment for the cost of funding uncollateralized OTC derivatives due to a lack of clear observability in the marketplace.

Interest rate derivatives

OTC vanilla interest rate products, such as interest rate swaps, swaptions, and caps and floors are valued by discounting the anticipated future cash flows. The future cash flows and discounting are derived from market standard yield curves and industry standard volatility inputs. Where applicable, exchange-traded prices are also used to value exchange-traded futures and options and can be used in yield curve construction. For more complex products, inputs include, but are not limited to correlation, volatility, volatility skew, prepayment rate, credit spread, basis spread and mean reversion.

Foreign exchange derivatives

Foreign exchange derivatives include vanilla products such as spot, forward and option contracts where the anticipated discounted future cash flows are determined from foreign exchange forward curves and industry standard optionality modeling techniques. Where applicable, exchange-traded prices are also used for futures and option prices. For more complex products inputs include, but are not limited to prepayment rate and correlation.

Equity and index-related derivatives

Equity derivatives include vanilla options and swaps in addition to different types of exotic options. Inputs for equity derivatives can include correlation, volatility, skew and buyback probability.

Generally, the interrelationship between the volatility and correlation is positively correlated.

Credit derivatives

Credit derivatives include index and single name CDS in addition to more complex structured credit products. Vanilla products are

valued using industry standard models and inputs that are generally market observable including credit spread and recovery rate.

Complex structured credit derivatives are valued using proprietary models requiring unobservable inputs such as recovery rate, credit spread, correlation and price. These inputs are generally implied from available market observable data. Fair values determined by price may include discounted cash flow models using the inputs prepayment rate, default rate, loss severity and discount rate.

Other trading assets

Other trading assets primarily include RMBS loans and life settlement and premium finance instruments. Life settlement and premium finance instruments are valued using proprietary models with several inputs. The significant unobservable inputs of the fair value for life settlement and premium finance instruments is the estimate of market implied life expectancy, while for RMBS loans it is market comparable price.

For life settlement and premium finance instruments, individual life expectancy rates are typically obtained by multiplying a base mortality curve for the general insured population provided by a professional actuarial organization together with an individual-specific multiplier. Individual-specific multipliers are determined based on data from third-party life expectancy data providers, which examine the insured individual's medical conditions, family history and other factors to arrive at a life expectancy estimate.

For RMBS loans, the use of market comparable price varies depending upon each specific loan. For some loans, similar to unobservable RMBS securities, prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness. For other RMBS loans, the loans are categorized by specific characteristics, such as loan-to-value ratio, average account balance, loan type (single or multi-family), lien, seasoning, coupon, FICO score, locality, delinquency status, cash flow velocity, roll rates, loan purpose, occupancy, servicers advance agreement type, modification status, Federal Housing Administration insurance, property value and documentation quality. Loans with unobservable prices are put into consistent buckets which are then compared to market observable comparable prices in order to assess the reasonableness of those unobservable prices.

Other investments

Private equity, hedge funds and other equity investments

Other equity investments principally includes equity investments in the form of a) direct investments in third-party hedge funds, private equity funds and funds of funds, b) equity-method investments where the Group has the ability to significantly influence the operating and financial policies of the investee, and c) direct investments in non-marketable equity securities.

Direct investments in third-party hedge funds, private equity funds and funds of funds are measured at fair value based on

their published NAVs. Most of these investments are classified as level 3 of the fair value hierarchy, as there are restrictions imposed upon the redemption of the funds at their NAV in the near term. In some cases, NAVs may be adjusted where there is sufficient evidence that the NAV published by the investment manager is not current with observed market movements, it is probable that these investments will be sold for an amount other than NAV or there exist other circumstances that would require an adjustment to the published NAV. Although rarely adjusted, significant judgment is involved in making any adjustments to the published NAVs.

Direct investments in non-marketable equity securities consist of both real estate investments and non-real estate investments. Equity-method investments and direct investments in non-marketable equity securities are initially measured at their transaction price, as this is the best estimate of fair value. Thereafter, these investments are individually measured at fair value based upon a number of factors that include any recent rounds of financing involving third-party investors, comparable company transactions, multiple analyses of cash flows or book values, or discounted cash flow analyses. Unobservable inputs may include credit spread, contingent probability and EBITDA multiple. The availability of information used in these modeling techniques is often limited and involves significant judgment in evaluating these different factors over time. As a result, these investments are included in level 3 of the fair value hierarchy.

Life finance instruments

Life finance instruments include SPIA and other premium finance instruments. Life finance instruments are valued in a similar manner as described for life settlement and premium finance instruments under the other trading assets section above.

Loans

The Group's loan portfolio which is measured at fair value primarily consists of commercial and industrial loans and loans to financial institutions. Within these categories, loans measured at fair value include commercial loans, real estate loans, corporate loans, leverage finance loans and emerging market loans. Fair value is based on recent transactions and quoted prices, where available. Where recent transactions and quoted prices are not available, fair value may be determined by relative value benchmarking (which includes pricing based upon another position in the same capital structure, other comparable loan issues, generic industry credit spreads, implied credit spreads derived from CDS for the specific borrower, and enterprise valuations) or calculated based on the exit price of the collateral, based on current market conditions.

Both the funded and unfunded portion of revolving credit lines on the corporate lending portfolio are valued using a CDS pricing model, which requires estimates of significant inputs including credit spreads, recovery rates, credit conversion factors, and weighted average life of the loan. Significant unobservable inputs may include credit spread and price.

The Group's other assets and liabilities include mortgage loans held in conjunction with securitization activities and assets and

liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP. The fair value of mortgage loans held in conjunction with securitization activities is determined on a whole-loan basis and is consistent with the valuation of RMBS loans discussed in "Other trading assets" above. Whole-loan valuations are calculated based on the exit price reflecting the current market conditions. The fair value of assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP are determined based on the quoted prices for securitized bonds, where available, or on cash flow analyses for securitized bonds, when quoted prices are not available.

Accrual based Private Banking & Wealth Management loans, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, include consumer loans relating to mortgages, loans collateralized by securities or consumer finance, as well as corporate and institutional loans relating to real estate, commercial and industrial loans, and loans to financial institutions, governments and public institutions. Fair values for these loans are determined by using a discounted cash flow model. Future cash flows are discounted using risk-adjusted discount rates which are derived from observable market interest rates for the applicable maturity and currency and from counterparty-related credit spreads.

Deposits

Accrual based deposits with a stated maturity, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, are generally fair valued by using a discounted cash flow model incorporating the Group's credit spreads. The estimated fair value of accrual accounted deposits without a stated maturity approximates the carrying amount; however, the value does not include an estimate of the value attributed to the long-term relationships with its customers that in the aggregate adds significant value to the Group's stable deposit base.

Short-term borrowings and long-term debt

The Group's short-term borrowings and long-term debt include structured notes (hybrid financial instruments that are both bifurcable and non-bifurcable) and vanilla debt. The fair value of structured notes is based on quoted prices, where available. When quoted prices are not available, fair value is determined by using a discounted cash flow model incorporating the Group's credit spreads, the value of derivatives embedded in the debt and the residual term of the issuance based on call options. Derivatives structured into the issued debt are valued consistently with the Group's stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships as discussed above. The fair value of structured debt is heavily influenced by the combined call options and performance of the underlying derivative returns.

Significant unobservable inputs for long-term debt include buyback probability, gap risk, correlation, volatility and price.

Generally, the interrelationships between volatility, skew, correlation, gap risk and credit spreads inputs are positively correlated.

Other liabilities

Failed sales

These liabilities represent the financing of assets that did not achieve sale accounting treatment under US GAAP. Failed sales are valued in a manner consistent with the related underlying financial instruments.

Short-term financial instruments

Certain short-term financial instruments are not carried at fair value on the balance sheet, but a fair value has been disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below. These instruments include: cash and due from banks, cash collateral receivables and payables and other receivables and payables arising in the ordinary course of business. For these financial instruments, the carrying value approximates the fair value due to the relatively short period of time between their origination and expected realization, as well as the minimal credit risk inherent in these instruments.

Sensitivity of fair value measurements to changes in significant unobservable inputs

For level 3 assets with a significant unobservable input of buyback probability, EBITDA multiple, market implied life expectancy (for life finance instruments), correlation, recovery rate, price, volatility, volatility skew, contingent probability and market implied life expectancy (for life settlement and premium finance instruments), in general, an increase in the significant unobservable input would increase the fair value. For level 3 assets instruments with a significant unobservable input of capitalization rate, default rate, discount rate, funding spread, loss severity, prepayment rate and credit spread, in general, an increase in the significant unobservable input would decrease the fair value.

For level 3 liabilities an increase in the related significant unobservable inputs would have the inverse impact on fair value. An increase in the significant unobservable inputs basis spread, mean reversion and skew would decrease the fair value. An increase in the significant unobservable input gap risk would increase the fair value.

Interrelationships between significant unobservable inputs

Except as noted above, there are no material interrelationships between the significant unobservable inputs for the financial instruments. As the significant unobservable inputs move independently, generally an increase or decrease in one significant unobservable input will have no impact on the other significant unobservable inputs.

Quantitative disclosures of valuation techniques

The following tables provide the range of minimum and maximum values of each significant unobservable input for level 3 assets and liabilities by the related valuation technique most significant to the related financial instrument.

³ Risk of unexpected large declines in the underlying values occurring between collateral settlement dates.

Qualitative discussion of the ranges of significant unobservable inputs

The following sections provide further information about the ranges of significant unobservable inputs included in the tables above. The level of aggregation and diversity within the financial instruments disclosed in the tables above result in certain ranges of significant inputs being wide and unevenly distributed across asset and liability categories.

Discount rate

The discount rate is the rate of interest used to calculate the present value of the expected cash flows of a financial instrument. There are multiple factors that will impact the discount rate for any given financial instrument including the coupon on the instrument, the term and the underlying risk of the expected cash flows. Two instruments of similar term and expected cash flows may have significantly different discount rates because the coupons on the instruments are different.

Default rate and loss severity

For financial instruments backed by residential real estate or other assets, diversity in the portfolio is reflected in a wide range for loss severity due to varying levels of default. The lower end of the range represents high performing or government guaranteed collateral with a low probability of default or guaranteed timely payment of principal and interest, while the higher end of the range relates collateral with a greater risk of default.

Credit spread and recovery rate

For financial instruments where credit spread is the significant unobservable input, the wide range represents positions with varying levels of risk. The lower end of the credit spread range typically represents shorter-dated instruments and/or those with better perceived credit risk. The higher end of the range typically comprises longer-dated financial instruments or those referencing non-performing, distressed or impaired reference credits. Similarly, the spread between the reference credit and an index can vary significantly based on the risk of the instrument. The spread will be positive for instruments that have a higher risk of default than the index (which is based on a weighted average of its components) and negative for instruments that have a lower risk of default than the index.

Similarly, recovery rates can vary significantly depending upon the specific assets and terms of each transaction. Transactions with higher seniority or more valuable collateral will have higher recovery rates, while those transactions which are more subordinated or with less valuable collateral will have lower recovery rates.

Correlation

There are many different types of correlation inputs, including credit correlation, cross-asset correlation (such as equity-interest rate correlation), and same-asset correlation (such as interest rate-interest rate correlation). Correlation inputs are generally used to value hybrid and exotic instruments. Generally, same-asset correlation inputs have a narrower range than cross-asset correlation inputs. However, due to the complex and unique nature of these instruments, the ranges for correlation inputs can vary widely across portfolios.

Prepayment rate

Prepayment rates may vary from collateral pool to collateral pool, and are driven by a variety of collateral-specific factors, including the type and location of the underlying borrower, the remaining tenor of the obligation and the level and type (e.g., fixed or floating) of interest rate being paid by the borrower.

Volatility and skew

Volatility and skew are impacted by the underlying risk, term and strike price of the derivative. In the case of interest rate derivatives, volatility rates may vary significantly between different underlying currencies and expiration dates on the options. Similarly, equity derivatives' volatility may vary greatly depending upon the underlying reference name on the derivative.

Market implied life expectancy

Market implied life expectancy is the primary significant unobservable input on such products as life settlement, premium finance and SPIA, and represents the estimated mortality rate for the underlying insured for each contract. This estimate may vary depending upon multiple factors including the age and specific health characteristics of each insured.

Fair value measurements of investments in certain entities that calculate NAV per share

Investments in funds held in trading assets and liabilities primarily include positions held in equity funds of funds as an economic hedge for structured notes and derivatives issued to clients that reference the same underlying risk and liquidity terms of the fund. A majority of these funds have limitations imposed on the amount of withdrawals from the fund during the redemption period due to illiquidity of the investments. In other instances, the withdrawal amounts may vary depending on the redemption notice period and are usually larger for the longer redemption notice periods. In addition, penalties may apply if redemption is within a certain time period from initial investment.

Investment in funds held in other investments principally involves private securities and, to a lesser extent, publicly traded securities and fund of funds. Several of these investments have redemption restrictions subject to the discretion of the Board of Directors of the fund and/or redemption is permitted without restriction, but is limited to a certain percentage of total assets or only after a certain date.

Furthermore, for those investments held in both trading assets and other investments that are nonredeemable, the underlying assets of such funds are expected to be liquidated over the life of the fund, which are generally up to 10 years.

The following table pertains to investments in certain entities that calculate NAV per share or its equivalent, primarily private equity and hedge funds. These investments do not have a readily determinable fair value and are measured at fair value using NAV.

Fair value, unfunded commitments and term of redemption conditions

| end of | 2013 | | | | 2012 | | | |

¹ 55% of the redeemable fair value amount of equity funds is redeemable on demand with a notice period of less than 30 days, 19% is redeemable on an annual basis with a notice period primarily of more than 60 days, 17% is redeemable on a monthly basis with a notice period primarily of less than 30 days, and 9% is redeemable on a quarterly basis with a notice period primarily of more than 45 days.

² 57% of the redeemable fair value amount of equity funds is redeemable on demand with a notice period of less than 30 days, 17% is redeemable on an annual basis with a notice period primarily of more than 60 days, 13% is redeemable on a monthly basis with a notice period primarily of less than 30 days, and 13% is redeemable on a quarterly basis with a notice period primarily of more than 45 days.

³ 45% of the redeemable fair value amount of hedge funds is redeemable on a quarterly basis with a notice period primarily of more than 60 days, 33% is redeemable on demand with a notice period primarily of less than 30 days, and 21% is redeemable on an annual basis with a notice period of more than 60 days.

⁴ 66% of the redeemable fair value amount of hedge funds is redeemable on a quarterly basis with a notice period primarily of more than 60 days, 19% is redeemable on demand with a notice period primarily of less than 30 days, and 11% is redeemable on an annual basis with a notice period of more than 60 days.

⁵ Includes CHF 1,819 million and CHF 1,958 million attributable to noncontrolling interests in 2013 and 2012, respectively.

⁶ Includes CHF 107 million and CHF 107 million attributable to noncontrolling interests in 2013 and 2012, respectively.

⁷ Includes CHF 405 million and CHF 418 million attributable to noncontrolling interests in 2013 and 2012, respectively.

Nonrecurring fair value changes

Certain assets and liabilities are measured at fair value on a non-recurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain

circumstances, for example, when there is evidence of impairment. The Group typically uses nonfinancial assets measured at fair value on a recurring or nonrecurring basis in a manner that reflects their highest and best use.

Nonrecurring fair value changes

| end of | 2013 | 2012 |
|--|------------|------------|
| Assets held-for-sale recorded at fair value on a nonrecurring basis (CHF billion) | | |
| Assets held-for-sale recorded at fair value on a nonrecurring basis | 0.3 | 0.5 |
| of which level 3 | 0.3 | 0.5 |

FAIR VALUE OPTION

The Group has availed itself of the simplification in accounting offered under the fair value option, primarily in Investment Banking and Private Banking & Wealth Management's Asset Management business. This has been accomplished generally by electing the fair value option, both at initial adoption and for subsequent transactions, on items impacted by the hedge accounting requirements of US GAAP. That is, for instruments for which there was an inability to achieve hedge accounting and for which the Group is economically hedged, the Group has elected the fair value option. Similarly, where the Group manages an activity on a fair value basis but previously has been unable to achieve fair value accounting, the Group has utilized the fair value option to align its risk management reporting to its financial accounting.

The Group elected fair value for certain of its financial statement captions as follows:

Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions

The Group has elected to account for structured resale agreements and most matched book resale agreements at fair value. These activities are managed on a fair value basis; thus, fair value accounting is deemed more appropriate for reporting purposes. The Group did not elect the fair value option for firm financing resale agreements as these agreements are generally overnight agreements which approximate fair value, but which are not managed on a fair value basis.

Other investments

The Group has elected to account for certain equity method investments at fair value. These activities are managed on a fair value basis; thus, fair value accounting is deemed more appropriate for reporting purposes. Certain similar instruments, such as those relating to equity method investments in strategic relationships, for example, the Group's ownership interest in certain clearance organizations, which were eligible for the fair value option, were not elected due to the strategic relationship.

Loans

The Group has elected to account for substantially all Investment Banking commercial loans and loan commitments and certain Investment Banking emerging market loans at fair value. These activities are managed on a fair value basis and fair value accounting was deemed more appropriate for reporting purposes. Additionally, recognition on a fair value basis eliminates the mismatch that existed due to the economic hedging the Group employs to manage these loans. Certain similar loans, such as project finance, lease finance, cash collateralized and some bridge loans, which were eligible for the fair value option, were not elected due to the lack of currently available infrastructure to fair value such loans and/or the inability to economically hedge such loans. Additionally, the Group elected not to account for loans granted by its Private Banking & Wealth Management segment at fair value, such as

domestic consumer lending, mortgages and corporate loans, as these loans are not managed on a fair value basis.

Other assets

The Group elected the fair value option for loans held-for-sale, due to the short period over which such loans are held and the intention to sell such loans in the near term. Other assets also include assets of VIEs and mortgage securitizations which do not meet the criteria for sale treatment under US GAAP. The Group did elect the fair value option for these types of transactions.

Due to banks

The Group elected the fair value option for certain time deposits associated with its emerging markets activities.

Customer deposits

The Group's customer deposits include fund-linked deposits. The Group elected the fair value option for these fund-linked deposits. Fund-linked products are managed on a fair value basis and fair value accounting was deemed more appropriate for reporting purposes.

Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions

The Group has elected to account for structured repurchase agreements and most matched book repurchase agreements at fair value. These activities are managed on a fair value basis and fair value accounting was deemed more appropriate for reporting purposes. The Group did not elect the fair value option for firm financing repurchase agreements as these agreements are generally overnight agreements which approximate fair value, but which are not managed on a fair value basis.

Short-term borrowings

The Group's short-term borrowings include hybrid debt instruments with embedded derivative features. Some of these embedded derivative features create bifurcable debt instruments. The Group elected the fair value option for some of these instruments as of January 1, 2006, in accordance with the provisions of US GAAP. New bifurcable debt instruments which were entered into in 2006 are carried at fair value. Some hybrid debt instruments do not result in bifurcable debt instruments. US GAAP permits the Group to elect fair value accounting for non-bifurcable hybrid debt instruments. With the exception of certain bifurcable hybrid debt instruments which the Group did not elect to account for at fair value, the Group has elected to account for all hybrid debt instruments held as of January 1, 2007, and hybrid debt instruments originated after January 1, 2007, at fair value. These activities are managed on a fair value basis and fair value accounting was deemed appropriate for reporting purposes. There are two main populations of similar instruments for which fair value accounting was not elected. The first relates to the lending business transacted by the Group's Private Banking & Wealth Management segment, which includes structured deposits and

similar investment products. These are managed on a bifurcated or accrual basis and fair value accounting was not considered appropriate. The second is where the instruments were or will be maturing in the near term and their fair value will be realized at that time.

Long-term debt

The Group's long-term debt includes hybrid debt instruments with embedded derivative features as described above in Short-term borrowings. The Group's long-term debt also includes debt issuances managed by its Treasury department that do not contain derivative features (vanilla debt). The Group actively manages the interest rate risk on these instruments with derivatives. In particular, fixed-rate debt is hedged with receive-fixed, pay-floating

interest rate swaps. The Group elected to fair value this fixed-rate debt upon implementation of the fair value option on January 1, 2007, with changes in fair value recognized as a component of trading revenues. The Group did not elect to apply the fair value option to fixed-rate debt issued by the Group since January 1, 2008, and instead applies hedge accounting per the guidance of US GAAP.

Other liabilities

Other liabilities include liabilities of VIEs and mortgage securitizations which do not meet the criteria for sale treatment under US GAAP. The Group did elect the fair value option for these types of transactions.

Difference between the aggregate fair value and the aggregate unpaid principal balances of loans and financial instruments

| of which related to credit risk | 112 | 912 | (348) |

¹ Primarily recognized in net interest income.

² Primarily recognized in trading revenues.

³ Primarily recognized in other revenues.

⁴ Changes in fair value related to credit risk are due to the change in the Group's own credit spreads. Other changes in fair value are attributable to changes in foreign currency exchange rates and interest rates, as well as movements in the reference price or index for structured notes. Changes in fair value on Credit Suisse vanilla debt and on debit valuation adjustments on structured notes related to credit risk were CHF (268) million and CHF (111) million in 2013, respectively, CHF (1,663) million and CHF (931) million in 2012, respectively, and CHF 1,210 million and CHF 697 million in 2011, respectively.

Interest income and expense are calculated based on contractual rates specified in the transactions. Interest income and expense are recorded in the consolidated statements of operations depending on the nature of the instrument and related market convention. When interest is included as a component of the change in the instrument's fair value, it is included in trading revenues. Otherwise, it is included in interest and dividend income or interest expense. Dividend income is recognized separately from trading revenues.

The impacts of credit risk on debt securities held as assets presented in the table above have been calculated as the component of the total change in fair value, excluding the impact of changes in base or risk-free interest rates. The impacts of changes in own credit risk on liabilities presented in the table above have been calculated as the difference between the fair values of those instruments as of the reporting date and the theoretical fair values of those instruments calculated by using the yield curve prevailing at the end of the reporting period, adjusted up or down for changes in the Group's own credit spreads from the transition date to the reporting date.

FINANCIAL INSTRUMENTS NOT CARRIED AT FAIR VALUE

The following table provides the carrying value and fair value of financial instruments which are not carried at fair value in the consolidated balance sheet. The disclosure excludes all non-financial

instruments such as lease transactions, real estate, premises and equipment, equity method investments and pension and benefit obligations.

² Primarily includes brokerage payables, cash collateral on derivative instruments and interest and fee payables.

35 Assets pledged and collateral

Assets pledged

The Group pledges assets mainly for repurchase agreements and other securities financing. Certain pledged assets may be encumbered, meaning they have the right to be sold or repledged. The encumbered assets are parenthetically disclosed on the consolidated balance sheet.

Assets pledged

| end of | 2013 | 2012 |
|--|---------|---------|
| Assets pledged (CHF million) | | |
| Total assets pledged or assigned as collateral | 142,952 | 151,419 |
| of which encumbered | 92,300 | 90,745 |

Collateral

The Group receives cash and securities in connection with resale agreements, securities borrowing and loans, derivative transactions and margined broker loans. A substantial portion of the collateral and securities received by the Group was sold or repledged in connection with repurchase agreements, securities sold not yet

purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

Collateral

| end of | 2013 | 2012 |

| Other information (CHF million) | | |
| Cash and securities restricted under foreign banking regulations | 18,130 | 14,340 |
| Swiss National Bank required minimum liquidity reserves | 2,447 | 2,441 |

36 Capital adequacy

The Group is subject to regulation by FINMA. The capital levels of the Group are subject to qualitative judgments by regulators, including FINMA, about the components of capital, risk weightings and other factors. Since January 2013, the Group has operated under the international capital adequacy standards known as Basel III set forth by the BCBS. These standards have affected the measurement of both total eligible capital and risk-weighted assets. The Group has based its capital adequacy calculations on US GAAP, as permitted by FINMA Circular 2008/34.

According to FINMA and Bank for International Settlements (BIS) capital requirements, total regulatory capital is comprised of the following categories: common equity tier 1 (CET1), tier 1 capital and tier 2 capital. CET1 capital consists of total shareholders' equity, regulatory adjustments, including a cumulative dividend accrual, and certain adjustments subject to phase in, including an adjustment for the accounting treatment of pension plans. Tier 1 capital consists of CET1 and additional tier 1 capital, which includes high-trigger and low-trigger capital instruments, certain instruments subject to phase out and certain deductions subject to phase in. Deductions from tier 1 capital during the phase-in period include, among other items, goodwill and intangible assets and other capital deductions, including gains/(losses) due to changes in own credit risks on fair valued financial liabilities, that will be deducted from CET1 once Basel III is fully implemented. Tier 1 capital is supplemented for capital adequacy purposes by tier 2 capital, which consists primarily of unsecured, perpetual, subordinated instruments that are senior only to tier 1 instruments. The sum of tier 1 and tier 2 capital equals total eligible capital.

Risk-weighted assets include consolidated balance sheet assets, net positions in securities not held in the trading portfolio, off-balance sheet transactions converted into credit equivalents, market positions in the trading portfolio and operational risk from processes, people, systems and external events.

As of December 31, 2013 and 2012, the Group was adequately capitalized under the regulatory provisions outlined under both FINMA and BIS guidelines.

BIS statistics – Basel III

| end of | 2013 | 2012 |
|---|----------------|----------------|
| Eligible capital (CHF million) | | |
| CET1 capital | 42,989 | 41,500 |
| Additional tier 1 capital | 3,072 | 2,857 |
| Total tier 1 capital | 46,061 | 44,357 |
| Tier 2 capital | 10,227 | 7,162 |
| Total eligible capital | 56,288 | 51,519 |
| Risk-weighted assets (CHF million) | | |
| Credit risk | 175,631 | 201,764 |
| Market risk | 39,133 | 39,466 |
| Operational risk | 53,075 | 45,125 |
| Non-counterparty risk | 6,007 | 6,126 |
| Risk-weighted assets | 273,846 | 292,481 |
| Capital ratios (%) | | |
| CET1 ratio | 15.7 | 14.2 |
| Tier 1 ratio | 16.8 | 15.2 |
| Total capital ratio | 20.6 | 17.6 |

Broker-dealer operations

Certain Group broker-dealer subsidiaries are also subject to capital adequacy requirements. As of December 31, 2013 and 2012, the Group and its subsidiaries complied with all applicable regulatory capital adequacy requirements.

Dividend restrictions

Certain of the Group's subsidiaries are subject to legal restrictions governing the amount of dividends they can pay (for example, pursuant to corporate law as defined by the Swiss Code of Obligations).

Under the Swiss Code of Obligations, dividends may be paid out only if and to the extent the corporation has distributable profits from previous business years, or if the free reserves of the corporation are sufficient to allow distribution of a dividend. In addition, at least 5% of the annual net profits must be retained and booked as general legal reserves for so long as these reserves amount to less than 20% of the paid-in share capital. The reserves currently exceed this 20% threshold. Furthermore, dividends may be paid out only after shareholder approval at the Annual General Meeting.

As of December 31, 2013 and 2012, the Group was not subject to restrictions on its ability to pay the proposed dividends.

37 Assets under management

The following disclosure provides information regarding assets under management and net new assets as regulated by FINMA.

Assets under management include assets from clients for which the Group provides investment advisory or discretionary asset management services. Assets that are held solely for transaction-related or safekeeping/custody purposes are not considered assets under management. Assets of corporate clients and public institutions that are used primarily for cash management or transaction-related purposes are also not considered assets under management. The classification of assets under management is individually assessed on the basis of each client's intentions and objectives and the banking services provided to the client. Reclassifications between assets under management and assets held for transaction-related or safekeeping purposes result in corresponding net assets inflows or outflows.

Net new assets measure the degree of success in acquiring assets under management. The calculation is based on the direct method, taking into account individual cash payments, security deliveries and cash flows resulting from loan increases or repayments. Interest and dividend income credited to clients and commissions, interest and fees charged for banking services are not taken into account when calculating net new assets, as such charges are not directly related to the Group's success in acquiring assets under management. Similarly, changes in assets under management due to currency and market volatility as well as asset inflows and outflows due to the acquisition or divestiture of businesses are not part of net new assets.

A portion of the Group's assets under management result from double counting. Double counting arises when assets under management are subject to more than one level of asset management services. Each such separate advisory or discretionary service provides additional benefits to the client and represents additional income for the Group. Specifically, double counting primarily results from the investment of assets under management in collective investment instruments managed by the Group. The extent of double counting is disclosed in the following table.

Assets under management

| in / end of | 2013 | 2012 |
|---|--------------------------|----------------|
| Assets under management (CHF billion) | | |
| Assets in collective investment instruments managed by Credit Suisse | 160.3 | 182.2 |
| Assets with discretionary mandates | 255.4 | 225.3 |
| Other assets under management | 866.7 | 843.3 |
| Assets under management (including double counting) ¹ | 1,282.4 | 1,250.8 |
| of which double counting | 47.0 | 63.8 |
| Net new assets (CHF billion) | | |
| Total net new assets (including double counting) | 32.1 ² | 10.8 |

¹ Includes CHF 29.0 billion and CHF 53.0 billion assets under management from discontinued operations as of December 31, 2013 and 2012, respectively.

² Includes CHF (4.0) billion and CHF (0.6) billion net asset outflows from discontinued operations in 2013 and 2012, respectively.

38 Litigation

The Group is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses, including those disclosed below. Some of these proceedings have been brought on behalf of various classes of claimants and seek damages of material and/or indeterminate amounts.

The Group accrues loss contingency litigation provisions and takes a charge to income in connection with certain proceedings when losses, additional losses or ranges of loss are probable and reasonably estimable. The Group also accrues litigation provisions for the estimated fees and expenses of external lawyers and other service providers in relation to such proceedings, including in cases for which it has not accrued a loss contingency provision. The Group accrues these fee and expense litigation provisions and takes a charge to income in connection therewith when such fees and expenses are probable and reasonably estimable. The Group reviews its legal proceedings each quarter to determine the adequacy of its litigation provisions and may increase or release provisions based on management's judgment and the advice of counsel. The establishment of additional provisions or releases of litigation provisions may be necessary in the future as developments in such proceedings warrant.

The specific matters described below include (a) proceedings where the Group has accrued a loss contingency provision, given that it is probable that a loss may be incurred and such loss is reasonably estimable; and (b) proceedings where the Group has not accrued such a loss contingency provision for various reasons, including, but not limited to, the fact that any related losses are not reasonably estimable. The description of certain of the matters below includes a statement that the Group has established a loss contingency provision and discloses the amount of such provision; for the other matters no such statement is made. With respect to the matters for which no such statement is made, either (a) the Group has not established a loss contingency provision, in which case the matter is treated as a contingent liability under the applicable accounting standard, or (b) the Group has established such a provision but believes that disclosure of that fact would violate confidentiality obligations to which the Group is subject or otherwise compromise attorney-client privilege, work product protection or other protections against disclosure or compromise the Group's management of the matter. The future outflow of funds in respect of any matter for which the Group has accrued loss contingency provisions cannot be determined with certainty based on currently available information, and accordingly may ultimately prove to be substantially greater (or may be less) than the provision that is reflected on the Group's balance sheet.

It is inherently difficult to determine whether a loss is probable or even reasonably possible or to estimate the amount of any loss or loss range for many of the Group's legal proceedings. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but

not limited to, the type and nature of the proceeding, the progress of the matter, the advice of counsel, the Group's defenses and its experience in similar matters, as well as its assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings. Factual and legal determinations, many of which are complex, must be made before a loss, additional losses or ranges of loss can be reasonably estimated for any proceeding.

Most matters pending against the Group seek damages of an indeterminate amount. While certain matters specify the damages claimed, such claimed amount may not represent the Group's reasonably possible losses. For certain of the proceedings discussed below the Group has disclosed the amount of damages claimed and certain other quantifiable information that is publicly available.

The following table presents a roll forward of the Group's aggregate litigation provisions.

Litigation provisions

| | 2013 |
|--|--------------|
| CHF million | |
| Balance at beginning of period | 1,157 |
| Increase in litigation accruals | 2,109 |
| Decrease in litigation accruals | (141) |
| Decrease for settlements and other cash payments | (762) |
| Foreign exchange translation | (31) |
| Balance at end of period | 2,332 |

The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings because of their complexity, the novelty of some of the claims, the early stage of the proceedings, the limited amount of discovery that has occurred and/or other factors. The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for the proceedings discussed below for which the Group believes an estimate is possible is zero to CHF 2.4 billion.

After taking into account its litigation provisions, the Group believes, based on currently available information and advice of counsel, that the results of its legal proceedings, in the aggregate, will not have a material adverse effect on the Group's financial condition. However, in light of the inherent uncertainties of such proceedings, including those brought by regulators or other governmental authorities, the ultimate cost to the Group of resolving such proceedings may exceed current litigation provisions and any excess may be material to its operating results for any particular period, depending, in part, upon the operating results for such period.

Research-related litigation

Putative class action lawsuits were filed against Credit Suisse Securities (USA) LLC (CSS LLC) in the wake of publicity surrounding the 2002 industry-wide governmental and regulatory investigations into research analyst practices, with *In re Credit Suisse – AOL Securities Litigation*, filed in the US District Court for the District of Massachusetts, being the remaining outstanding matter. The case was brought on behalf of a class of purchasers of common shares of the former AOL Time Warner Inc. (AOL) who have alleged that CSS LLC's equity research coverage of AOL between January 2001 and July 2002 was false and misleading. The second amended complaint in this action asserted federal securities fraud and control person liability claims against CSS LLC and certain affiliates and former employees of CSS LLC. Plaintiffs estimated damages of approximately USD 3.9 billion. On January 13, 2012, the district court granted summary judgment in favor of the defendants upon its determination to preclude a plaintiff expert witness. The plaintiffs have appealed the summary judgment decision and oral argument on the appeal was held on March 6, 2013.

Enron-related litigation

Two Enron-related actions remain pending against CSS LLC and certain of its affiliates, both in the US District Court for the Southern District of Texas. In these actions, plaintiffs assert they relied on Enron's financial statements, and seek to hold the defendants responsible for any inaccuracies in Enron's financial statements. In *Connecticut Resources Recovery Authority v. Lay, et al.*, the plaintiff seeks to recover from multiple defendants, pursuant to the Connecticut Unfair Trade Practices Act and Connecticut state common law, approximately USD 130 million to USD 180 million in losses it allegedly suffered in a business transaction it entered into with Enron. A motion to dismiss is pending. In *Silvercreek Management Inc. v. Citigroup, Inc., et al.*, the plaintiff seeks to assert federal and state law claims relating to its alleged USD 280 million in losses relating to its Enron investments. A motion to dismiss is pending.

NCFE-related litigation

Lawsuits were filed against CSS LLC and certain of its affiliates with respect to services that they provided to National Century Financial Enterprises, Inc. and its affiliates (NCFE). In these lawsuits, which were consolidated as a multi-district litigation in the US District Court for the Southern District of Ohio (SDO) for pre-trial purposes, investors holding approximately USD 1.9 billion face amount of NCFE's bonds and approximately USD 12 million in preferred stock sued numerous defendants, including the founders and directors of NCFE, the trustees for the bonds, NCFE's auditors and law firm, the rating agencies that rated NCFE's bonds and NCFE's placement agents, including CSS LLC. The lawsuits asserted claims for breach of contract, negligence, fraud and violation of federal and state securities laws and generally alleged that CSS LLC and/or its affiliates knew or should have known that the health care receivables purportedly backing the bonds were

either ineligible for the programs or non-existent. In April 2009, CSS LLC settled with the New York City Pension Fund bond investor plaintiffs for an amount covered by existing provisions. On October 26, 2012, the SDO issued a decision which granted CSS LLC's summary judgment motion to dismiss all the claims brought by the investor in NCFE preferred stock; on October 23, 2013, the US Court of Appeals for the Sixth Circuit affirmed that decision. On March 13, 2013, CSS LLC and its affiliate entered into agreements to settle the bond investor lawsuits and resolve all remaining bond investor claims for an amount partially covered by existing provisions.

Mortgage-related matters

CSS LLC and certain of its affiliates have received requests for information from certain regulators and/or government entities regarding the origination, purchase, securitization and servicing of subprime and non-subprime residential mortgages and related issues. CSS LLC and its affiliates are cooperating with such requests.

Following an investigation, on November 20, 2012, the New York Attorney General, on behalf of the State of New York, filed a civil action in the Supreme Court for the State of New York, New York County (SCNY) against CSS LLC and affiliated entities in their roles as issuer, sponsor, depositor and/or underwriter of RMBS transactions prior to 2008. The action, which references 64 RMBS issued, sponsored, deposited and underwritten by CSS LLC and its affiliates in 2006 and 2007, alleges that CSS LLC and its affiliates misled investors regarding the due diligence and quality control performed on the mortgage loans underlying the RMBS at issue, and seeks an unspecified amount of damages. On December 18, 2013, the New Jersey Attorney General, on behalf of the State of New Jersey, filed a civil action in the Superior Court of New Jersey, Chancery Division, Mercer County, against CSS LLC and affiliated entities in their roles as issuer, sponsor, depositor and/or underwriter of RMBS transactions prior to 2008. The action, which references 13 RMBS issued, sponsored, deposited and underwritten by CSS LLC and its affiliates in 2006 and 2007, alleges that CSS LLC and its affiliates misled investors and engaged in fraud or deceit in connection with the offer and sale of RMBS, and seeks an unspecified amount of damages. Both actions are at early procedural points.

CSS LLC and/or certain of its affiliates have also been named as defendants in various civil litigation matters related to their roles as issuer, sponsor, depositor, underwriter and/or servicer of RMBS transactions. These cases include class action lawsuits and putative class action lawsuits, actions by individual investors in RMBS, actions by monoline insurance companies that guaranteed payments of principal and interest for certain RMBS, and repurchase actions by RMBS trusts. Although the allegations vary by lawsuit, plaintiffs in the class and putative class actions and individual investor actions generally allege that the offering documents of securities issued by various RMBS securitization trusts contained material misrepresentations and omissions, including statements regarding the underwriting standards pursuant to

which the underlying mortgage loans were issued; monoline insurers allege that loans that collateralize RMBS they insured breached representations and warranties made with respect to the loans at the time of securitization; and repurchase action plaintiffs allege breached representations and warranties in respect of mortgage loans and failure to repurchase such mortgage loans as required under the applicable agreements. The amounts disclosed below do not reflect actual realized plaintiff losses to date or anticipated future litigation exposure. Rather, unless otherwise stated, these amounts reflect the original unpaid principal balance amounts as alleged in these actions and do not include any reduction in principal amounts since issuance. Further, amounts attributable to an "operative pleading" for the individual investor actions are not altered for settlements, dismissals or other occurrences, if any, that may have caused the amounts to change subsequent to the operative pleading. In addition to the mortgage-related actions discussed below, a number of other entities have threatened to assert claims against CSS LLC and/or its affiliates in connection with various RMBS issuances, and CSS LLC and/or its affiliates have entered into agreements with some of those entities to toll the relevant statutes of limitations.

Class action litigations

In class actions and putative class actions against CSS LLC as an underwriter of other issuers' RMBS offerings, CSS LLC generally has or had contractual rights to indemnification from the issuers. However, some of these issuers are now defunct, including affiliates of IndyMac Bancorp (IndyMac) and Thornburg Mortgage (Thornburg). With respect to IndyMac, CSS LLC is named as a defendant in a class action, *In re IndyMac Mortgage-Backed Securities Litigation*, pending in the US District Court for the Southern District of New York (SDNY), brought on behalf of purchasers of securities in various IndyMac RMBS offerings. On May 17, 2013, the parties in the suit agreed to a stipulation adding 36 additional offerings to the action, which is subject to court approval. Certain investors sought to intervene in the action to assert claims with respect to additional RMBS offerings. The SDNY denied in part the investors' motions to intervene, and the proposed intervenors appealed that ruling. On June 27, 2013, the US Court of Appeals for the Second Circuit affirmed the SDNY's ruling. Plaintiffs' motion for reconsideration of the court's June 21, 2010 decision on defendants' motion to dismiss was granted on July 23, 2013. With the additional 36 offerings, the claims against CSS LLC and numerous other underwriters and individual defendants relate to approximately USD 26 billion of IndyMac RMBS offerings. CSS LLC served as an underwriter with respect to approximately 34.2% of the IndyMac RMBS at issue or approximately USD 8.9 billion. In a second IndyMac-related class action, *Tsereteli v. Residential Asset Securitization Trust 2006-A8*, in which CSS LLC was the sole underwriter defendant, the parties reached a settlement in the amount of USD 11 million, which was approved by the SDNY and the entire action was thereby resolved. A further class action lawsuit pending in the SDNY against CSS LLC and certain affiliates and employees, *New Jersey Carpenters Health Fund*

v. Home Equity Mortgage Trust 2006-5, relates to two RMBS offerings, totaling approximately USD 1.6 billion, sponsored and underwritten by the Credit Suisse defendants. On March 17, 2014, the SDNY granted plaintiff's motion for class certification for the second of the two RMBS offerings, having previously certified the class for purchasers of the first offering. With respect to a putative class action in the US District Court for the District of New Mexico, *Genesee County Employees' Retirement System v. Thornburg*, in which CSS LLC was a named defendant, the parties reached a settlement in the amount of USD 11.5 million, which was approved by the court and the entire action was thereby resolved.

Individual investor actions

CSS LLC and, in some instances, its affiliates, as an RMBS issuer, underwriter and/or other participant, and in some instances its employees, along with other defendants, are defendants in: two actions brought by Cambridge Place Investment Management Inc. in Massachusetts state court, in which claims against CSS LLC, following the court's motion to dismiss ruling dismissing certain claims, relate to less than USD 525 million of the RMBS at issue, in an amount to be determined; one action brought by The Charles Schwab Corporation in California state court, in which claims against CSS LLC and its affiliates relate to USD 125 million of the RMBS at issue (approximately 9% of the USD 1.4 billion at issue against all defendants in the operative pleading); one action brought by the Federal Deposit Insurance Corporation (FDIC), as receiver for Citizens National Bank and Strategic Capital Bank in the SDNY, in which claims against CSS LLC and its affiliates relate to approximately USD 28 million of the RMBS at issue (approximately 20% of the USD 141 million at issue against all defendants in the operative pleading); three actions brought by the FDIC, as receiver for Colonial Bank: one action in the SDNY, in which claims against CSS LLC relate to approximately USD 92 million of the RMBS at issue (approximately 23% of the USD 394 million at issue against all defendants in the operative pleading), one action in the Circuit Court of Montgomery County, Alabama, in which claims against CSS LLC and its affiliates relate to approximately USD 153 million of the RMBS at issue (approximately 49% of the USD 311 million at issue against all defendants in the operative pleading), and one action in the US District Court for the Central District of California, in which claims against CSS LLC relate to approximately USD 34 million of the RMBS at issue (approximately 12% of the USD 283 million at issue against all defendants in the operative pleading); one action brought by Commerzbank AG London Branch in the SCNY, in which claims against CSS LLC and its affiliates relate to approximately USD 148 million of the RMBS at issue (approximately 6% of the USD 2.3 billion at issue against all defendants in the operative pleading); six individual actions brought by the Federal Home Loan Banks of Seattle, San Francisco, Chicago, Indianapolis and Boston in various state and federal courts, in which claims against CSS LLC and its affiliates relate to approximately USD 249 million in the Seattle action, approximately USD 2.2 billion in the San Francisco actions (approximately 11% of the USD 19 billion at issue against all defendants in the operative

pleadings), approximately USD 38 million in the Chicago action (approximately 1% of the USD 3.3 billion at issue against all defendants in the operative pleading), approximately USD 224 million in the Indianapolis action (approximately 9% of the USD 2.6 billion at issue against all defendants in the operative pleading), and USD 373 million in the Boston action (approximately 7% of the USD 5.7 billion at issue against all defendants in the operative pleading); one action brought by the Federal Housing Finance Agency (FHFA), as conservator for Fannie Mae and Freddie Mac, in the SDNY, in which claims against CSS LLC relate to approximately USD 230 million of the RMBS at issue (approximately 26% of the USD 880 million at issue against all defendants in the operative pleading); one action brought by John Hancock Life Insurance Co. (U.S.A.) and affiliated entities in the US District Court for the District of Minnesota, in which claims against CSS LLC relate to an unstated amount of the RMBS at issue; two actions brought by Massachusetts Mutual Life Insurance Company in the US District Court for the District of Massachusetts, in which claims against CSS LLC and its employee relate to approximately USD 107 million of the RMBS at issue (approximately 97% of the USD 110 million at issue against all defendants in the operative pleadings); one action brought by Watertown Savings Bank in the SCNY, in which claims against CSS LLC and its affiliates relate to an unstated amount of the RMBS at issue; and one action brought by the Western & Southern Life Insurance Company and affiliated entities in Ohio state court, in which claims against CSS LLC and its affiliates relate to approximately USD 260 million of the RMBS at issue (approximately 94% of the USD 276 million at issue against all defendants in the operative pleading).

CSS LLC and certain of its affiliates and/or employees are the only defendants named in: one action brought by Allstate Insurance Company in the SCNY, in which claims against CSS LLC and its affiliates relate to approximately USD 187 million of RMBS; one action brought by Deutsche Zentral-Genossenschaftsbank AG, New York Branch in the SCNY, in which claims against CSS LLC and its affiliates relate to approximately USD 138 million of RMBS; one action brought by IKB Deutsche Industriebank AG and affiliated entities in the SCNY, in which claims against CSS LLC and its affiliates relate to approximately USD 97 million of RMBS; one action brought by Minnesota Life Insurance Company and affiliated entities in Minnesota state court, in which claims against CSS LLC and its affiliates relate to approximately USD 43 million of RMBS; two actions brought by the National Credit Union Administration Board: one as liquidating agent of the US Central Federal Credit Union, Western Corporate Federal Credit Union and Southwest Corporate Federal Credit Union in the US District Court for the District of Kansas, in which claims against CSS LLC and its affiliate relate to approximately USD 311 million of RMBS, and one as liquidating agent of the Southwest Corporate Federal Credit Union and Members United Corporate Federal Credit Union in the SDNY, in which claims against CSS LLC and its affiliates relate to approximately USD 229 million of RMBS; one action brought by Phoenix Light SF Ltd. and affiliated entities in the SCNY, in which claims against CSS LLC and its affiliates relate to approximately

USD 362 million of RMBS; one action brought by The Prudential Insurance Company of America and affiliated entities in the US District Court for the District of New Jersey, in which claims against CSS LLC and its affiliates relate to approximately USD 461 million of RMBS; one action brought by Royal Park Investments SA/NV in the SCNY, in which claims against CSS LLC and its affiliate relate to approximately USD 360 million of RMBS; one dismissed action initially brought by The Union Central Life Insurance Company and affiliated entities in the SDNY, in which there is a pending letter motion to propose a second amended complaint in which claims against CSS LLC and its affiliates and employees relate to approximately USD 65 million of RMBS. These actions are at early or intermediate procedural points.

As disclosed in Credit Suisse's quarterly Financial Reports for 2013, individual investor actions discontinued during the course of 2013 included the following: one of two actions brought by the Federal Home Loan Bank of Chicago against CSS LLC and other financial institutions; one of four actions against CSS LLC brought by the FDIC, as receiver for Colonial Bank; Federal Housing Finance Agency v. JPMorgan Chase & Co., one of the FHFA's actions against CSS LLC and its affiliates and employees and other financial institutions; the action brought by Phoenix Light SF Ltd., with leave to replead, which resulted in the filing of a new action; following a settlement, the action brought by Sealink Funding Limited against CSS LLC and its affiliates; following a settlement, the action brought by Stichting Pensioenfond ABP against CSS LLC and its affiliates and employees; and, following a settlement, the action brought by West Virginia Investment Management Board against CSS LLC. In addition, on February 14, 2014, as a result of a settlement, the SDNY entered a stipulation of voluntary dismissal with prejudice, discontinuing FHFA v. Morgan Stanley, one of the FHFA's actions against CSS LLC and its affiliates and employees, and other financial institutions, relating to approximately USD 1.4 billion of RMBS at issue against CSS LLC. Further, on March 21, 2014, CSS LLC and certain affiliates and employees entered into an agreement with the FHFA to settle all claims in two of three remaining actions filed by the FHFA in the SDNY for USD 885 million, which amount was partially covered by existing provisions. The actions settled on March 21, 2014 related to approximately USD 16.6 billion of RMBS at issue against the Credit Suisse defendants. Additionally, on March 25, 2014, a stipulation of voluntary discontinuance with prejudice was filed with the SCNY, discontinuing the two consolidated actions brought by Landesbank Baden-Württemberg and affiliated entities against CSS LLC and other financial institutions, relating to approximately USD 200 million of RMBS at issue against CSS LLC.

Monoline insurer disputes

CSS LLC and certain of its affiliates are defendants in three pending actions, each commenced by a monoline insurer. The insurers include MBIA Insurance Corp. (MBIA), Assured Guaranty Corp. (Assured), and Financial Guaranty Insurance Company (FGIC), each of which guaranteed payments of principal and interest related to approximately USD 770 million, USD 570 million, and

USD 240 million of RMBS, respectively, issued in eight different offerings sponsored by Credit Suisse. One theory of liability advanced by the monoline insurers is that an affiliate of CSS LLC must repurchase affected mortgage loans from the trusts at issue. In each action, plaintiffs claim that the vast majority of the underlying mortgage loans breach certain representations and warranties, and that CSS LLC and its affiliates have failed to repurchase the allegedly defective loans. In addition, the monoline insurers allege claims for fraud, fraudulent inducement, material misrepresentations, and breaches of warranties, repurchase obligations, access rights and servicing obligations, and reimbursement. MBIA, Assured and FGIC have submitted repurchase demands for loans with an original principal balance of approximately USD 475 million, USD 2.2 billion and USD 37 million, respectively. These actions are pending in the SCNY and are at early or intermediate procedural points. Further, on November 15, 2013, CIFG Assurance North America, Inc. (CIFG) filed an action against CSS LLC in the SCNY, relating to financial guaranty insurance issued by CIFG on a credit default swap guaranteeing payment on approximately USD 396 million of notes of a collateralized debt obligation. CIFG alleges material misrepresentation in the inducement of an insurance contract and fraud relating to alleged affirmative misrepresentations and material omissions made to induce CIFG to guarantee the securities.

Repurchase litigations

DLJ Mortgage Capital, Inc. (DLJ) is a defendant in: one action brought by Asset Backed Securities Corporation Home Equity Loan Trust, Series 2006-HE7, in which plaintiff alleges damages of not less than USD 319 million; one action brought by Home Equity Asset Trust, Series 2006-8, in which plaintiff alleges damages of not less than USD 436 million; one action brought by Home Equity Asset Trust 2007-1, in which plaintiff alleges damages of not less than USD 400 million; one action brought by Home Equity Asset Trust Series 2007-3, in which plaintiff alleges damages of not less than USD 206 million; one action brought by Asset Backed Securities Corporation Home Equity Loan Trust Series AMQ 2007-HE2, in which no damages amount is alleged; one action brought by Home Equity Asset Trust 2007-2, in which plaintiff alleges damages of not less than USD 495 million; and one action brought by CSMC Asset-Backed Trust 2007-NC1, in which no damages amount is alleged. DLJ and its affiliate, Select Portfolio Servicing, Inc. (SPS), are defendants in: one action brought by Home Equity Mortgage Trust Series 2006-1, Home Equity Mortgage Trust Series 2006-3 and Home Equity Mortgage Trust Series 2006-4, in which plaintiffs allege damages of not less than USD 730 million, and allege that SPS obstructed the investigation into the full extent of the defects in the mortgage pools by refusing to afford the trustee reasonable access to certain origination files; and one action brought by Home Equity Mortgage Trust Series 2006-5, in which plaintiff alleges damages of not less than USD 500 million, and alleges that SPS likely discovered DLJ's alleged breaches of representations and warranties but did not notify the trustee of such breaches, in alleged violation of its

contractual obligations. These actions are brought in the SCNY and are at early procedural points.

As disclosed in Credit Suisse's fourth quarter Financial Report of 2013, the following repurchase actions were dismissed with prejudice in 2013: the three consolidated actions brought by Home Equity Asset Trust 2006-5, Home Equity Asset Trust 2006-6 and Home Equity Asset Trust 2006-7 against DLJ.

Refco-related litigation

In March 2008, CSS LLC was named, along with other financial services firms, accountants, lawyers, officers, directors and controlling persons, as a defendant in an action filed in New York State court (later removed to the Southern District of New York) by the Joint Official Liquidators of various SPHinx Funds and the trustee of the SphinX Trust, which holds claims that belonged to PlusFunds Group, Inc. (PlusFunds), the investment manager for the SPHinx Funds. The operative amended complaint asserted claims against CSS LLC for aiding and abetting breaches of fiduciary duty and aiding and abetting fraud by Refco's insiders in connection with Refco's August 2004 notes offering and August 2005 IPO. Plaintiffs sought to recover from defendants more than USD 800 million, consisting of USD 263 million that the SphinX Managed Futures Fund, a SPHinx fund, had on deposit and lost at Refco, several hundred million dollars in alleged additional "lost enterprise" damages of PlusFunds, and pre-judgment interest. In November 2008, CSS LLC filed a motion to dismiss the amended complaint. In February 2012, the court granted in part and denied in part the motion to dismiss, which left intact part of plaintiffs' claim for aiding and abetting fraud. In August 2012, CSS LLC filed a motion for summary judgment with respect to the remaining part of plaintiffs' aiding and abetting fraud claim. In December 2012, the court granted the motion, thus dismissing CSS LLC from the case. The court has not yet issued a final judgment as to CSS LLC, and the dismissal of the claims against CSS LLC will be subject to appeal.

Bank loan litigation

On January 3, 2010, the Bank and other affiliates were named as defendants in a lawsuit filed in the US District Court for the District of Idaho by homeowners in four real estate developments, Tamarack Resort, Yellowstone Club, Lake Las Vegas and Ginn Sur Mer. The Bank arranged, and was the agent bank for, syndicated loans provided for all four developments, which have been or are now in bankruptcy or foreclosure. Plaintiffs generally allege that the Bank and other affiliates committed fraud by using an unaccepted appraisal method to overvalue the properties with the intention to have the borrowers take out loans they could not repay because it would allow the Bank and other affiliates to later push the borrowers into bankruptcy and take ownership of the properties. Plaintiffs demanded USD 24 billion in damages. Cushman & Wakefield, the appraiser for the properties at issue, is also named as a defendant. After the filing of amended complaints and motions to dismiss, the claims were significantly reduced. On September 24, 2013, the court denied the plaintiffs' motion for class certification so the case

cannot proceed as a class action. The Bank and other affiliates are also the subject of certain other related litigation regarding these four and other similar real estate developments.

Auction Rate Securities

On May 27, 2009, Elbit Systems Ltd (Elbit) filed a complaint against the Group in the US District Court for the Northern District of Illinois, seeking approximately USD 16 million related to the purchase of auction rate securities, alleging federal securities law claims and state law aiding and abetting fraud and unjust enrichment causes of action. The case was transferred to the SDNY. On May 22, 2013, the Group and Elbit settled the lawsuit.

Tax and securities law matters

Credit Suisse has been responding to subpoenas and other requests for information from the United States Department of Justice (DOJ), the US Securities and Exchange Commission (SEC) and other authorities involving historical Private Banking services provided on a cross-border basis to US persons. US authorities are investigating possible violations of US tax and securities laws. In particular, the DOJ is investigating whether US clients violated their US tax obligations and whether Credit Suisse and certain of its employees assisted such clients. The SEC has investigated whether certain of our relationship managers triggered obligations for Credit Suisse or the relationship managers in Switzerland to register with the SEC as a broker-dealer or investment advisor. A limited number of current or former employees have been indicted and two former employees have pleaded guilty (in one case, as to conduct while employed at other financial institutions that did not involve Credit Suisse and in the other case as to conduct while employed at a former Credit Suisse subsidiary prior to 2006 and other financial institutions after 2006). Credit Suisse received a grand jury target letter from the DOJ. We understand that certain US authorities are also investigating other Swiss and non-US financial institutions. We have been conducting an internal investigation and are continuing to cooperate with the authorities both in the US and Switzerland to resolve this matter in a responsible manner that complies with our legal obligations. Our provision of Swiss-based information to these US authorities has been in accordance with permission granted by Swiss authorities. The Group has established a loss contingency provision of CHF 895 million with respect to the tax and securities law matters described in this subsection. The Group had previously disclosed a provision of CHF 470 million with respect to these matters, including CHF 175 million in connection with the settlement with the SEC described in the following paragraph.

On February 21, 2014, Credit Suisse AG reached a settlement with the SEC that resolves the SEC's investigation regarding registration as an investment advisor and broker-dealer. In a settled administrative and cease-and-desist proceeding, the SEC charged Credit Suisse AG with violating Section 15(a) of the US Securities Exchange Act of 1934 (Exchange Act) and Section 203(a) of the US Investment Advisers Act of 1940 (Advisers Act). Specifically, the SEC's Order finds that from at least 2002 through its exit from

the US cross-border securities business which Credit Suisse AG began in 2008, Credit Suisse AG, through actions of certain of its relationship managers, violated the federal securities laws by providing certain cross-border brokerage and investment advisory services to US clients at a time when Credit Suisse AG was not registered with the SEC as a broker-dealer or investment advisor. As part of the settlement of the investigation, Credit Suisse AG agreed, among other things, to cease-and-desist from committing or causing any future violations of Section 15(a) of the Exchange Act or Section 203(a) of the Advisers Act and to pay approximately USD 196 million, inclusive of disgorgement of approximately USD 82 million, prejudgment interest of approximately USD 64 million, and a civil money penalty in the amount of USD 50 million. Credit Suisse AG also agreed to the appointment of an independent consultant who will review its cross-border compliance policies with respect to the US securities laws and will verify that Credit Suisse AG has exited the US cross-border business.

Rates-related matters

Regulatory authorities in a number of jurisdictions, including the US, UK, EU and Switzerland, have for an extended period of time been conducting investigations into the setting of LIBOR and other reference rates with respect to a number of currencies, as well as the pricing of certain related derivatives. These ongoing investigations have included information requests from regulators regarding LIBOR-setting practices and reviews of the activities of various financial institutions, including the Group. The Group, which is a member of three LIBOR rate-setting panels (US Dollar LIBOR, Swiss Franc LIBOR and Euro LIBOR), is cooperating fully with these investigations. In particular, it has been reported that regulators are investigating whether financial institutions engaged in an effort to manipulate LIBOR, either individually or in concert with other institutions, in order to improve market perception of these institutions' financial health and/or to increase the value of their proprietary trading positions. In response to regulatory inquiries, Credit Suisse commissioned a review of these issues. To date, Credit Suisse has seen no evidence to suggest that it is likely to have any material exposure in connection with these issues.

In addition, members of the US Dollar LIBOR panel, including Credit Suisse, have been named in various civil lawsuits filed in the US. All but one of these matters have been consolidated for pre-trial purposes into a multi-district litigation in the SDNY. On March 29, 2013, the court dismissed a substantial portion of the case against the panel banks, dismissing the RICO and Sherman Act antitrust claims as well as all state law claims, leaving only certain claims under the Commodity Exchange Act based on LIBOR-related instruments entered into after May 30, 2008.

Subsequently, on August 23, 2013, the court rejected plaintiffs' requests to replead the dismissed causes of action, except for certain of plaintiffs' state law claims, which are being replead by the plaintiffs. The court held a hearing on defendants' motion to dismiss the remaining claims on February 4, 2014. The matter not consolidated in the multi-district litigation is also in the SDNY, which is considering defendants' motion to dismiss that lawsuit.

The reference rates investigations have also included information requests from regulators regarding trading activities and the setting of benchmark rates in the foreign exchange markets. On March 31, 2014, the Swiss Competition Commission announced a formal investigation of numerous Swiss and international financial institutions, including the Group, in relation to the setting of exchange rates in foreign exchange trading. The Group is cooperating fully with these investigations. The investigations are ongoing and it is too soon to predict the final outcome of the investigations. In addition, Credit Suisse and other financial institutions have been named in a number of related civil class action lawsuits filed in US federal court.

Singapore MAS matter

On June 14, 2013, the Monetary Authority of Singapore (MAS) announced it was taking supervisory action against 20 banks for various deficiencies relating to the benchmark processes regarding the Singapore dollar interest rate benchmarks, Singapore Interbank Offered Rates and Swap Offered Rates, and the foreign exchange spot benchmarks commonly used to settle Non-Deliverable Forward foreign exchange contracts. Credit Suisse AG Singapore Branch (CSSB) was one of the named banks. The MAS censured the banks and directed them to adopt measures to address these deficiencies. The MAS has also required 19 of the 20 banks, including CSSB, to set aside additional statutory

reserves for a period of one year. CSSB, along with six other panel banks, has been calibrated in the third of five tiers by the MAS and required to set aside additional statutory reserves of SGD 400-600 million, which were deposited with the MAS in a non-interest bearing account. These additional reserves will be returned to each bank within one year, assuming it has satisfied the MAS that it has adopted sufficient measures to address the identified deficiencies.

CDS-related matters

In July 2013, the Directorate General for Competition of the European Commission (DG Comp) issued a Statement of Objections (SO) to various entities of thirteen CDS dealer banks, certain Markit entities and the International Swaps and Derivatives Association, Inc. (ISDA) in relation to DG Comp's investigation into possible violations of competition law by certain CDS market participants. Certain Credit Suisse entities were among the named bank entities. The SO marks the commencement of enforcement proceedings in respect of what DG Comp alleges were unlawful attempts to prevent the development of exchange traded platforms for CDS between 2006 and 2009. The next step in the process is for the named entities to provide written responses.

In addition, certain Credit Suisse entities, as well as other banks, have been named in civil litigation in the US. Further, Credit Suisse (USA), Inc. has received civil investigative demands from the DOJ.

¹ Deconsolidated under US GAAP as the Group is not the primary beneficiary.

² The Group holds a significant noncontrolling interest.

40 Subsidiary guarantee information

Certain wholly owned finance subsidiaries of the Group, including Credit Suisse Group (Guernsey) I Limited and Credit Suisse Group (Guernsey) III Limited, each of which is a Guernsey incorporated non-cellular company limited by shares, may issue contingent convertible securities fully and unconditionally guaranteed by the Group. There are various legal and regulatory requirements, including the satisfaction of a solvency test under Guernsey law, applicable to some of the Group's subsidiaries that limit their ability to pay dividends or distributions and make loans and advances to the Group.

On March 26, 2007, the Group and the Bank issued full, unconditional and several guarantees of Credit Suisse (USA), Inc.'s outstanding SEC-registered debt securities. In accordance with the guarantees, if Credit Suisse (USA), Inc. fails to make

any timely payment under the agreements governing such debt securities, the holders of the debt securities may demand payment from either the Group or the Bank, without first proceeding against Credit Suisse (USA), Inc. The guarantee from the Group is subordinated to senior liabilities. Credit Suisse (USA), Inc. is an indirect, wholly owned subsidiary of the Group.

In the fourth quarter of 2013, as part of an announced program to evolve the Group's legal entity structure to meet developing and future regulatory requirements and Fed regulation on establishing Intermediate Holding Companies in the US for non-US banks, several existing legal entities were re-parented as subsidiaries of Credit Suisse (USA), Inc. In the tables below, prior periods have been restated to conform to the current presentation to reflect the impact of these transactions.

¹ Includes eliminations and consolidation adjustments.

² Consists of dividend payments from Group companies of CHF 162 million and CHF 188 million from bank and non-bank subsidiaries, respectively, and other cash items from parent company operations such as Group financing.

41 Credit Suisse Group parent company

► Refer to "Note 40 – Subsidiary guarantee information" for the condensed Credit Suisse Group parent company financial information.

42 Significant valuation and income recognition differences between US GAAP and Swiss GAAP banking law (true and fair view)

The Group's consolidated financial statements have been prepared in accordance with US GAAP.

FINMA requires Swiss-domiciled banks which present their financial statements under either US GAAP or International Financial Reporting Standards (IFRS) to provide a narrative explanation of the major differences between Swiss GAAP banking law (true and fair view) and its primary accounting standard.

The principal provisions of the Banking Ordinance and the FINMA Circular 2008/2, "Accounting – banks", governing financial reporting for banks (Swiss GAAP) differ in certain aspects from US GAAP. The following are the major differences:

► Refer to "Note 1 – Summary of significant accounting policies" for a detailed description of the Group's accounting policies.

Scope of consolidation

Under US GAAP, the Group does not consolidate certain entities that issue redeemable preferred securities. Under Swiss GAAP, these entities would continue to be consolidated as the Group holds 100% of the voting rights.

Under Swiss GAAP, majority-owned subsidiaries that are not considered long-term investments or do not operate in the core business of the Group are either accounted for as financial investments or as equity method investments. US GAAP has no such exception relating to the consolidation of majority-owned subsidiaries.

Fair value option

Unlike US GAAP, Swiss GAAP generally does not allow the fair value option concept that creates an optional alternative measurement treatment for certain non-trading financial assets and liabilities, guarantees and commitments. The fair value option permits the use of fair value for initial and subsequent measurement with changes in fair value recorded in the consolidated statements of income.

For issued structured products that include own debt and meet certain restrictive conditions, fair value measurement is applied on a case-by-case basis. The related changes in fair value of both the embedded derivative and the host contract are recorded in trading revenues, except for fair value adjustments relating to own credit that cannot be recognized in the consolidated statements of income.

Other issued structured products which are not in the scope of this interpretation or for which fair value accounting is not elected under Swiss GAAP but for which the fair value option is elected

under US GAAP continue to be bifurcated for Swiss GAAP purposes. This means that the embedded derivative is carried at fair value and the host contract is accounted for at amortized cost.

Other non-trading assets measured at fair value

Under US GAAP, all of our mortgage servicing rights and most of our life settlement contracts are reported at fair value, with changes in value reported in the consolidated statements of operations.

Under Swiss GAAP, mortgage servicing rights and life settlement contracts are carried at the lower of cost or market.

Goodwill amortization

Under US GAAP, goodwill is not amortized but must be tested for impairment annually or more frequently if an event or change in circumstances indicates that the goodwill may be impaired.

Under Swiss GAAP, goodwill is amortized over its useful life, generally not exceeding five years, except for justified cases where a maximum useful life of up to 20 years is acceptable. In addition, goodwill is tested for impairment.

Intangible assets with indefinite lives

Under US GAAP, intangible assets with indefinite lives are not amortized but are tested for impairment annually or more frequently if an event or change in circumstances indicates that the asset may be impaired.

Under Swiss GAAP, intangible assets with indefinite lives are amortized over a useful life, up to a maximum of five years. In addition, these assets are tested for impairment.

Pensions and post-retirement benefits

Under US GAAP, the liability and related pension expense is determined based on the projected unit credit actuarial calculation of the benefit obligation.

Under Swiss GAAP, the liability and related pension expense is primarily determined based on the pension plan valuation in accordance with Swiss GAAP FER 26. A pension asset is recorded if a statutory overfunding of a pension plan leads to a future economic benefit, and a pension liability is recorded if a statutory underfunding of a pension plan leads to a future economic obligation. Pension expenses include the required contributions defined by Swiss law, any additional contribution mandated by the pension fund trustees and any change in value of the pension asset or liability between two measurement dates as determined on the basis of the annual year-end pension plan valuation.

Loan origination fees

US GAAP requires the deferral of certain fees received upfront in connection with the loan origination for loans not held under the fair value option.

Under Swiss GAAP, only upfront payments or fees that are considered interest-related components are deferred (e.g., premiums and discounts). Fees received from the borrower which are considered service-related fees such as commitment fees, structuring fees and arrangement fees are immediately recognized in commission income.

Sale of financial instruments held at amortized cost

Under US GAAP, the gain or loss on sale or early redemption of a financial instrument is immediately recognized in the consolidated statements of operations.

Under Swiss GAAP, the gain or loss on sale or early redemption of an interest-related financial instrument held at amortized cost is deferred over the remaining original term of the financial instrument.

Extinguishment of own debt

Under US GAAP, repurchased or reacquired own debt instruments are extinguished and gains or losses from extinguishment are immediately recognized in other income.

Under Swiss GAAP, repurchased own debt is only extinguished if the respective securities are legally extinguished. Gains or losses from extinguishment of own debt that was accounted for at amortized cost are deferred and amortized over the original term of the repurchased instruments. For reacquired own debt instruments that are not legally extinguished, the repurchased own debt instruments are either held as financial investments at the lower of cost or market or as trading assets at fair value. The carrying value of the repurchased instruments is offset against the respective liability of own debt instruments issued.

Real estate held for investment

Under US GAAP, real estate held for investment is valued at cost less accumulated depreciation and any impairment.

Under Swiss GAAP, real estate held for investment that the Group intends to hold permanently is also valued at cost less accumulated depreciation and any other-than-temporary impairment. If the Group does not intend to hold real estate permanently, it is carried at the lower of cost or market.

Sale and leaseback transactions

Under US GAAP, gains from the sale of property subject to a sale and leaseback agreement are deferred and amortized over the leaseback period.

Under Swiss GAAP, gains from the sale of property subject to a sale and leaseback agreement are only deferred if the provisions of the leaseback contract indicate that the leaseback is a capital lease; if the leaseback contract meets the requirements of an operating lease, such gains are immediately recognized upon sale of the property.

Investments in securities

Available-for-sale securities

Under US GAAP, available-for-sale securities are valued at fair value. Unrealized gains and losses due to fluctuations in fair value (including foreign exchange) are not recorded in the consolidated statements of operations but included net of tax in AOCI, which is part of total shareholders' equity. Declines in fair value below cost deemed to be other-than-temporary are recognized as impairments in the consolidated statements of operations, except for amounts relating to factors other than credit loss on debt securities with no intent or requirement to sell that continue to be included in AOCI. The new cost basis will not be changed for subsequent recoveries in fair value.

Under Swiss GAAP, available-for-sale securities are accounted for at the lower of cost or market with valuation reductions and recoveries due to market fluctuations recorded in other ordinary expenses and income, respectively. Foreign exchange gains and losses are recognized in net trading income.

Non-marketable equity securities

Under US GAAP, non-marketable equity securities are valued at cost less other-than-temporary impairment or at fair value.

Under Swiss GAAP, non-marketable equity securities are carried at the lower of cost or market.

Impairments on held-to-maturity securities

Under US GAAP, declines in fair value of held-to-maturity securities below cost deemed to be other-than-temporary are recognized as impairments in the consolidated statements of operations except for amounts relating to factors other than credit loss on debt securities held with no intent or requirement to sell that are included in AOCI. The impairment cannot be reversed in future periods.

Under Swiss GAAP, all impairments are recognized in the consolidated statements of income. Impairments recognized on held-to-maturity securities are reversed up to the amortized cost if the fair value of the instrument subsequently recovers. A reversal is recorded in the consolidated statements of income.

Trading positions

Under both US GAAP and Swiss GAAP, positions classified in the trading portfolio are valued at fair value. Under US GAAP, this classification is based on management's intent concerning the specific instrument, whereas under Swiss GAAP, the prevailing criteria is the active management of the specific instrument in the context of a documented trading strategy.

Derivatives used for cash flow hedges

Under US GAAP, the effective portion of a cash flow hedge is reported in AOCI.

Under Swiss GAAP, the effective portion of a cash flow hedge is recorded in the compensation account in other assets or other liabilities.

Security collateral received in securities lending transactions

Under US GAAP, security collateral received in securities lending transactions are recorded as assets and a corresponding liability to return the collateral is recognized.

Under Swiss GAAP, security collateral received and the obligation to return collateral of securities lending transactions are not recognized on the balance sheet.

Derecognition of financial instruments

Under US GAAP, financial instruments are only derecognized if the transaction meets certain criteria.

Under Swiss GAAP, a financial instrument is derecognized when the economic control has been transferred from the seller to the buyer.

Discontinued operations

Under US GAAP, the assets and liabilities of an operation held-for-sale are separated from the ordinary captions of the consolidated balance sheets and are reported as discontinued operations measured at the lower of the carrying value or fair value less cost to sell. Accordingly, income and expense from discontinued operations are reported in a separate line item of the consolidated statements of operations.

Under Swiss GAAP, these positions remain in their initial balance sheet captions until disposed of and continue to be valued according to the respective captions.

Extraordinary income and expenses

Unlike US GAAP, Swiss GAAP does report certain expenses or revenues as extraordinary. Extraordinary income and expenses are reported net of tax.

Reserves for general banking risks

US GAAP does not allow general unallocated provisions.

Under Swiss GAAP, reserves for general banking risks are recorded as a separate component between liabilities and shareholders' equity. Reserves for general banking risks are established or released through extraordinary expense and extraordinary income, respectively, or result from the reallocation of provisions which are no longer economically required.

Loan commitments

Under US GAAP, the Group includes unused credit facilities that can be revoked at its sole discretion upon notice to the client in loan commitments.

Under Swiss GAAP, credit facilities that can be revoked at the Group's sole discretion are only disclosed if the notice period exceeds six weeks.

43 Risk assessment

In accordance with the Swiss Code of Obligations the following disclosure provides information regarding the risk assessment process, which was in place for the reporting period and followed by the Board of Directors.

The primary objectives of risk management are to protect the financial strength and reputation of the Group, while ensuring that capital is well deployed to support business activities and grow shareholder value. The risk management organization reflects the specific nature of the various risks in order to ensure that risks are managed within set limits in a transparent and timely manner.

The Board of Directors is responsible for the strategic direction, supervision and control of the Group and for defining its overall tolerance for risk in the form of a risk appetite statement. The Board of Directors has delegated certain responsibilities regarding risk management and oversight to the Risk Committee, the Audit Committee and to the Executive Board.

The Risk Committee is responsible for assisting the Board in fulfilling its oversight responsibilities by providing guidance regarding risk governance and the development of the risk profile and capital adequacy, including the regular review of major risk exposures and overall risk limits. In addition to its other responsibilities, such as reviewing the quarterly and annual financial statements and the performance and effectiveness of internal and external auditors, the Audit Committee reviews management's report on internal control over financial reporting (SOX 404), the annual report on the internal control system and the annual compliance report.

Within the Executive Board of the Group, the Chief Risk Officer (CRO) is responsible for providing risk management oversight and

for establishing an organizational basis to manage and report on all risk management matters. The Capital Allocation & Risk Management Committee (CARMC), the Risk Processes & Standards Committee and the Reputational Risk & Sustainability Committee have been established at senior management level to further support the risk management function. CARMC is comprised of at least five members of the Executive Board and senior management appointed by the CEO and operates rotating through the following three cycles: (i) Asset & Liability Management including capital, funding and liquidity; (ii) Market & Credit Risks; and (iii) Internal Control Systems including operational risks, legal and compliance issues and internal control matters. CARMC may delegate its authority to set and approve certain limits for position risk, funding, liquidity and capital to the CRO or divisional risk management committees. The divisional risk management committees regularly review and discuss division-specific market and credit risk matters, operational risks, legal and compliance issues and internal control matters.

During the reporting period, the Board of Directors received the quarterly risk reports from the CRO and the annual internal control system and compliance reports from the office of the General Counsel, which formed the basis of the Board of Directors' risk reviews. Additional risk information was provided at each meeting of the Risk Committee and at most Board meetings. The Board of Directors, assisted by its Risk and Audit Committees, performed a systematic risk assessment in accordance with established policies and procedures.

Controls and procedures

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

The Group has evaluated the effectiveness of the design and operation of its disclosure controls and procedures as of the end of the period covered by this report under the supervision and with the participation of management, including the Group CEO and Chief Financial Officer (CFO), pursuant to Rule 13(a)-15(a) under the Securities Exchange Act of 1934 (the Exchange Act). There are inherent limitations to the effectiveness of any system of controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective controls and procedures can only provide reasonable assurance of achieving their control objectives.

The CEO and CFO concluded that, as of December 31, 2013, the design and operation of the Group's disclosure controls and procedures were effective, in all material respects, to ensure that information required to be disclosed in reports filed and submitted under the Exchange Act is recorded, processed, summarized and reported as and when required.

MANAGEMENT REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of the Group is responsible for establishing and maintaining adequate internal control over financial reporting. The Group's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with US GAAP. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may deteriorate.

Management has made an evaluation and assessment of the Group's internal control over financial reporting as of December 31, 2013 using the criteria issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in "Internal Control – Integrated Framework (1992)".

Based upon its review and evaluation, management, including the Group CEO and CFO, has concluded that the Group's internal control over financial reporting is effective as of December 31, 2013.

KPMG AG, the Group's independent auditors, have issued an unqualified opinion on the effectiveness of the Group's internal control over financial reporting as of December 31, 2013, as stated in their report, which follows.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There were no changes in the Group's internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Group's internal control over financial reporting.

Report of the Independent Registered Public Accounting Firm to the General Meeting of Shareholders of

Credit Suisse Group AG, Zurich

We have audited Credit Suisse Group AG and subsidiaries' (the "Group") internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control—Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Group's board of directors and management are responsible for maintaining effective internal control over financial reporting and the Group's management is responsible for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Group's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

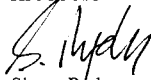

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

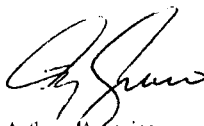

In our opinion, the Group maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control—Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) and Swiss Auditing Standards, the consolidated balance sheets of the Group as of December 31, 2013 and 2012, and the related consolidated statements of operations, changes in equity, comprehensive income and cash flows, and notes thereto, for each of the years in the three-year period ended December 31, 2013, and our report dated April 3, 2014 expressed an unqualified opinion on those consolidated financial statements.

Report of the Statutory Auditor on the Financial Statements to the General Meeting of Shareholder of

Credit Suisse Group AG, Zurich

As statutory auditor, we have audited the accompanying financial statements of Credit Suisse Group AG (the "Group"), which comprise the balance sheet, income statement and notes for the year ended December 31, 2013.

Board of Directors' Responsibility

The board of directors is responsible for the preparation of the financial statements in accordance with the requirements of Swiss law and the Group's articles of incorporation. This responsibility includes designing, implementing and maintaining an internal control system relevant to the preparation of financial statements that are free from material misstatement, whether due to fraud or error. The board of directors is further responsible for selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Swiss law and Swiss Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers the internal control system relevant to the entity's preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control system. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of accounting estimates made, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements for the year ended December 31, 2013 comply with Swiss law and the Group's articles of incorporation.

Credit Suisse Group AG, Zurich
Report of the Statutory Auditor
on the Financial Statements to the
General Meeting of Shareholder

Report on Other Legal Requirements

We confirm that we meet the legal requirements on licensing according to the Auditor Oversight Act (AOA) (Switzerland) and independence (article 728 CO and article 11 AOA) and that there are no circumstances incompatible with our independence.

In accordance with article 728a paragraph 1 item 3 CO and Swiss Auditing Standard 890, we confirm that an internal control system exists, which has been designed for the preparation of financial statements according to the instructions of the board of directors.

We further confirm that the proposed appropriation of available earnings complies with Swiss law and the Group's articles of incorporation. We recommend that the financial statements submitted to you be approved.

Notes to the financial statements

1 Accounting principles

The financial statements of Credit Suisse Group AG are prepared in accordance with the regulations of the Swiss Code of Obligations and are stated in Swiss francs (CHF). The financial year ends on December 31.

2 Contingent liabilities

| end of | 2013 | 2012 |
|---|--------|--------|
| CHF million | | |
| Aggregate indemnity liabilities, guarantees and other contingent liabilities (net of exposures recorded as liabilities) | 43,857 | 51,363 |
| of which have been entered into on behalf of subsidiaries | 43,857 | 51,363 |

The company belongs to the Swiss value-added tax group of Credit Suisse Group, and thus carries joint liability to the Swiss federal tax authority for value-added tax debts of the entire group.

3 Compensation to members of the Executive Board and the Board of Directors

As required by applicable Swiss law (Article 663b bis and Article 663c, paragraph 3 of the Swiss Code of Obligations), the following disclosure describes compensation paid to and equity holdings of

the members of the Board of Directors (Board) and the members of the Executive Board as well as loans granted to this group of people and persons and companies related to them.

Executive Board compensation

Executive Board compensation for 2013

| in | Base salary | Unrestricted cash | Value of STI awards | Value of LTI awards | Pension and similar benefits and other benefits ¹ | Dividend equivalents ² | Payments and awards due to contractual agreements ³ | Total compensation ⁴ |
|---|-------------|-------------------|---------------------|---------------------|--|-----------------------------------|--|---------------------------------|
| 2013 (CHF million, except where indicated) | | | | | | | | |
| 9 members | 14.08 | 3.93 | 21.86 ⁵ | 21.58 | 0.58 | 2.74 | – | 64.77 |
| % of total compensation | 22% | 6% | 34% | 33% | | | | |
| of which CEO: | | | | | | | | |
| Brady W. Dougan | 2.50 | 0.69 | 2.77 | 3.46 | 0.01 | 0.36 | – | 9.79 |
| % of total compensation | 26% | 7% | 28% | 35% | | | | |

¹ Other benefits consist of housing allowances, lump sum expenses and child allowances.

² Share awards granted prior to January 1, 2014 carry the right to an annual payment equal to the dividend payable on each Group share. The dividend equivalents were paid in respect of awards granted in prior years and were delivered in a combination of cash and shares, consistent with dividends paid on actual shares.

³ During 2013, there were no payments made to Executive Board members for contractual agreements.

⁴ Does not include CHF 4.8 million of charitable contributions made by the Group for which the CEO and three other Executive Board members are able to make recommendations.

⁵ Short-term incentive awards for 2013 comprise CHF 20.56 million performance shares as well as CHF 1.3 million granted as blocked shares and performance shares to the Executive Board members who were categorized as UK Code Staff under the regulations of the PRA and the Executive Board member that stepped down. The applicable Group share price for all share awards was CHF 28.78.

Executive Board compensation for 2012

| in | Base salary | Unrestricted cash | Value of STI awards | Value of LTI awards | Pension and similar benefits and other benefits ¹ | Dividend equivalents ² | Payments and awards due to contractual agreements ³ | Total compensation ⁴ |
|---|-------------|--------------------|---------------------|---------------------|--|-----------------------------------|--|---------------------------------|
| 2012 (CHF million, except where indicated) | | | | | | | | |
| 13 members ⁵ | 17.75 | 13.56 ⁶ | 20.95 ⁷ | 15.40 | 4.28 | 2.18 | – | 74.12 |
| % of total compensation | 24% | 18% | 28% | 21% | | | | |
| of which highest paid: Robert Shafir | 1.40 | 0.70 | 3.50 | 2.80 | 1.91 ⁸ | 0.28 | – | 10.59 |
| % of total compensation | 13% | 7% | 33% | 26% | | | | |
| of which CEO: Brady W. Dougan | 2.50 | 0.50 | 2.50 | 2.00 | 0.04 | 0.23 | – | 7.77 |
| % of total compensation | 32% | 6% | 32% | 26% | | | | |

¹ Other benefits consist of housing allowances, lump sum expenses, child allowances and carried interest.

² Share awards carry the right to an annual payment equal to the dividend payable on each Group share. The dividend equivalents were paid in respect of awards granted in prior years.

³ During 2012, there were no payments made to Executive Board members for contractual agreements.

⁴ Does not include CHF 3.9 million of charitable contributions made by the Group for which the CEO and a former Executive Board member are able to make recommendations.

⁵ Of the 13 members, 5 left the Executive Board during 2012: Karl Landert and Antonio Quintella stepped down from the Executive Board effective April 30, 2012 and May 31, 2012, respectively, and Osama Abbasi, Walter Berchtold and Fawzi Kyriakos-Saad left the Executive Board effective November 30, 2012. The base salary and incentive compensation for these individuals has been pro rated accordingly. These individuals were paid incentive compensation in the form of unrestricted cash and STI awards for their performance in their respective roles on the Executive Board in 2012.

⁶ Includes pro rated unrestricted cash of CHF 10.2 million paid to the five individuals who left the Executive Board during 2012.

⁷ All short-term incentive awards for 2012 were granted as performance shares. The applicable Group share price for the performance share awards was CHF 24.62.

⁸ CHF 1.87 million of this amount was granted as carried interest in 2012. In addition, in connection with his role at the time as CEO of the Asset Management division, in 2008 Mr. Shafir received a carried interest award in certain alternative investment funds. The value realized over time depends on the investment performance of the funds over their lifetime up to fifteen years. The initial value of the award is determined by making assumptions about the return that will be realized on the funds. The aggregate theoretical value of these awards was approximately USD 10 million assuming an estimated 9 percent return on all fund investments over their projected lifetime, and reducing this estimated return by 25 percent to reflect potential underperformance in some of the funds.

Other aspects of Executive Board compensation

Charitable contributions

Consistent with the prior three years, a portion of the Executive Board incentive compensation pool for 2013 was approved by the Compensation Committee to fund charitable contributions by the Group. The total amount approved for charitable contributions was CHF 4.8 million for 2013. The contributions will benefit eligible registered charities. The CEO and three other Executive Board members are able to make recommendations in respect of the allocation of the 2013 contributions to various specific charities.

Former Executive Board members

Generally, former members of the Group's most senior executive body who no longer provide services to the Group are still eligible

to receive office infrastructure and secretarial support. These services are based on existing resources and are not used on a regular basis. No additional fees, severance payments or other forms of compensation were paid to former members of the Executive Board who no longer provide services to the Group during 2013.

Executive Board shareholdings and loans

Executive Board shareholdings

The table "Executive Board holdings and values of deferred share-based awards by individual" discloses the shareholdings of the Executive Board members, their immediate family and companies in which they have a controlling interest as well as the value of the unvested share-based compensation awards held by Executive Board members as of December 31, 2013.

| Total | 1,677,465 ³ | 3,804,568 | 5,482,033 | 322,312 | 1,095 | 103,527,465 | 110,187,696 |

¹ Includes shares that were initially granted as deferred compensation and have vested.

² Consists of options with an expiration date of January 22, 2013 and an exercise price of CHF 30.60.

³ In addition to the number of owned shares shown, the following Executive Board members held an aggregate number of 2,320 mandatory and contingent convertible securities (MACCS): Brady Dougan (1,336), Romeo Cerutti (60), Hans-Ulrich Meister (262), Robert Shafir (571), Eric Varvel (91); these securities were converted into an aggregate number of 143,033 shares on March 29, 2013 at a conversion price of CHF 16.29 and were settled and delivered in April 2013.

Executive Board loans

The majority of loans outstanding to Executive Board members are mortgages or loans against securities. Such loans are made on the same terms available to employees under the Group's employee benefit plans. As of December 31, 2013, 2012 and 2011, outstanding loans to Executive Board members amounted to CHF 10 million, CHF 8 million and CHF 22 million, respectively. The number of individuals with outstanding loans at the beginning and the end of 2013 was three and four, respectively, and the highest loan outstanding was USD 5 million to Eric Varvel.

All mortgage loans to Executive Board members are granted either with variable or fixed interest rates over a certain period. Typically, mortgages are granted for periods of up to ten years.

Interest rates applied are based on refinancing costs plus a margin, and interest rates and other terms are consistent with those applicable to other employees. Loans against securities are granted at interest rates and on terms applicable to such loans granted to other employees. The same credit approval and risk assessment procedures apply to Executive Board members as for other employees. Unless otherwise noted, all loans to Executive Board members were made in the ordinary course of business and substantially on the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons and in consideration of the terms which apply to all Group employees. These loans did not involve more than the normal risk of collectability or present other unfavorable features.

¹ Includes the additional fees for the full-time Chairman and the three committee chairmen as well as the additional fees of CHF 294,000 (GBP 200,000) paid to Noreen Doyle in 2013 as a non-executive director and chair of the boards of two of the Group's UK subsidiaries, Credit Suisse International and Credit Suisse Securities Europe Limited. The additional fees of CHF 400,000 were awarded to Jean Lanier as Chairman of the Compensation Committee in 2013, a role to which he was appointed as of the 2013 AGM on April 26, 2013.

² Other compensation for the Chairman included pension benefits, lump sum expenses and child and health care allowances.

³ The value of the Group shares is included in total compensation. Group shares are subject to a four-year blocking period.

⁴ The Chairman and the three committee chairmen received an annual base board fee paid in cash. They also received additional fees paid in cash and/or shares as determined by the Board in the course of the regular compensation process. The additional fees paid to the three committee chairmen covered their regular memberships in other committees that they do not chair. The additional fees awarded to these four individuals for 2013 were paid in Group shares (50%) and cash (50%). The applicable Group share price was CHF 28.78.

⁵ Except for the Chairman and the three committee chairmen, members of the Board were paid an annual base board fee and a committee fee for their respective committee membership in advance for the period from one AGM to the other, i.e., from April 26, 2013 to May 9, 2014. The annual committee fees are CHF 150,000 for the Audit Committee and CHF 100,000 for each of the Risk and Compensation Committees. For 2013, these total combined fees were paid in Group shares (50%) and cash (50%). The applicable Group share price as of the 2013 AGM was CHF 26.83.

¹ Includes the additional fees for the full-time Chairman and the three committee chairmen as well as the additional fees paid to Noreen Doyle in 2012 as a non-executive director of two of the Group's UK subsidiaries, Credit Suisse International and Credit Suisse Securities Europe Limited. The additional fees of CHF 182,600 for Noreen Doyle corresponded to the annual fees of GBP 125,000 which Noreen Doyle received in 2012 as a non-executive director (annual fee of GBP 100,000) and audit committee chair (additional fee of GBP 25,000) of Credit Suisse International and Credit Suisse Securities Europe Limited.

² Other compensation for the Chairman included lump sum expenses, child and health care allowances and pension benefits.

³ The value of the Group shares is included in total compensation. Group shares are subject to a four-year blocking period.

⁴ The Chairman and the three committee chairmen received an annual base board fee paid in cash. They also received additional fees paid in cash and/or share awards as determined by the Board in the course of the regular compensation process. The additional fees awarded to these four individuals for 2012 were paid in Group shares (50%) and cash (50%). The applicable Group share price was CHF 24.62.

⁵ Except for the Chairman and the three committee chairmen, members of the Board were paid an annual base board fee and a committee fee for their respective committee membership in advance for the period from one AGM to the other, i.e., from April 26, 2012 to April 27, 2013. The annual committee fees are CHF 150,000 for the Audit Committee and CHF 100,000 for each of the Risk and Compensation Committees. For 2012, these total combined fees were paid in Group shares (50%) and cash (50%). The applicable Group share price as of the 2012 annual general meeting was CHF 22.16.

Former members of the Board of Directors

Two former members of the Board of Directors are eligible to receive office infrastructure and secretarial support. These services are based on existing resources and are not used on a regular basis. No additional fees, severance payments or other forms of compensation were paid to former members of the Board of Directors or related parties during 2013.

Board of Directors shareholdings and loans

Board of Directors shareholdings

The table below discloses the shareholdings of the Board of Directors members, their immediate family and companies in which they have a controlling interest. As of December 31, 2013, there were no Board of Directors members with outstanding options.

¹ Includes Group shares that are subject to a blocking period of up to four years.

² In addition to the shareholdings shown, the following Board members held an aggregate number of 1,519 mandatory and contingent convertible securities (MACCS): Urs Rohner (395), Peter Brabeck-Letmathe (175), Jassim Bin Hamad J.J. Al Thani (17), Iris Bohnet (11), Walter Kielholz (431), Andreas Koopmann (44), Aziz R.D. Syriani (113), Richard Thornburgh (297) and John Tiner (36); these securities were converted into an aggregate number of 93,247 shares on March 29, 2013 at a conversion price of CHF 16.29 and were settled and delivered in April 2013.

³ Excludes 30,872, 76,774 and 92,745 shares held by Robert H. Benmosche, Aziz R.D. Syriani and David W. Syz, respectively, as of December 31, 2012, who stepped down from the Board as of April 26, 2013.

Board loans

The majority of loans outstanding to members of the Board of Directors are mortgages or loans against securities. Such loans are made to Board of Directors members on the same terms available to third-party clients. As of December 31, 2013, 2012 and 2011, outstanding loans to Board of Directors members amounted to CHF 55 million, CHF 41 million and CHF 34 million, respectively.

Board of Directors members with loans do not benefit from employee conditions, but are subject to conditions applied to clients with a comparable credit standing. Board of Directors members who were previously employees of the Group may still have outstanding loans, which were provided at the time that employee conditions applied to them. Unless otherwise noted, all loans to Board of Directors members are made in the ordinary course of business and substantially on the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons. Such loans do not involve more than the normal risk of collectability or present other unfavorable features. In addition to the loans listed below, the Group or any of its banking subsidiaries may enter into financing and other banking agreements with companies in which current Board of Directors members have a significant influence as defined by the US Securities and Exchange Commission. Examples include holding executive and/or board level roles in these companies. Unless otherwise noted, loans extended by the Group to such companies are also made in the ordinary course of business and at prevailing market conditions. As of December 31, 2013, 2012 and 2011, there was no loan exposure to such related party companies that was not made in the ordinary course of business and at prevailing market conditions.

Board of Directors loans by individual

¹ 400.0 million shares reserved for high-trigger capital instruments.

² 98.9 million shares reserved for high-trigger capital instruments.

9 General reserves

General reserves were CHF 1,800 million as of the end of 2013 compared to CHF 4,810 million as of the end of 2012. The decrease of CHF 3,010 million was related to the conversion and settlement of mandatory and contingent convertible securities (MACCS) issued in July 2012. On April 8, 2013, the Group

settled and delivered 199,964,015 newly issued shares in connection with the conversion of MACCS and, after the issuance of the shares, transferred CHF 8 million, representing the par value of the issued shares, to share capital, and CHF 3,002 million, representing the capital surplus, to reserves from capital contributions.

10 Risk assessment

► Refer to "Note 43 – Risk assessment" in V – Consolidated financial statements – Credit Suisse Group for further information on the company's risk assessment in accordance with the Swiss Code of Obligations.

**Confirmation to the Board of Directors relating to the Conditional Increase of Share Capital of
Credit Suisse Group AG, Zurich**

We have been engaged to audit the issuance of new shares during the period from 1 January 2013 to 3 April 2013 according to the resolutions of the general meeting of shareholders from 29 September 2000 in accordance with article 653f para. 1 CO.

It is the responsibility of the board of directors to issue the new shares in accordance with the provisions in the articles of incorporation. Our responsibility is to audit whether the issuance has been conducted in accordance with the provisions of Swiss law and the articles of incorporation. We confirm that we meet the licensing and independence requirements as stipulated by Swiss law.

Our audit was conducted in accordance with Swiss Auditing Standards, which require that an audit be planned and performed to obtain reasonable assurance that material breaches of Swiss law or the articles of incorporation are recognized. We have performed the procedures deemed necessary under the circumstances and believe that our audit provides a reasonable basis for our opinion.

In our opinion, the issuance of 18,822,723 registered shares with nominal value of CHF 0.04 each and a total nominal value of CHF 752,908.92 complies with Swiss law and the articles of incorporation.

Independent Auditor's Report to the Board of Directors of

Credit Suisse Group AG, Zurich

We have audited the issue of new shares by Credit Suisse Group AG during the period from 4 April 2013 to 31 December 2013 pursuant to the resolution of the General Meeting of Shareholders of 26 April 2013 in accordance with article 653f para. 1 Code of Obligations (CO).

Board of Directors' Responsibility

The Board of Directors is responsible for the issue of new shares in accordance with the legal requirements and the company's articles of incorporation.

Auditor's Responsibility

Our responsibility is to express an opinion based on our audit as to whether the issue of new shares complies with Swiss law and the company's articles of incorporation. We conducted our audit in accordance with Swiss Auditing Standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the issue of new shares complies with the legal requirements and the company's articles of incorporation.

An audit involves performing procedures to obtain audit evidence so that material breaches of the legal requirements and the company's articles of incorporation for the issue of new shares may be identified with reasonable assurance. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material breaches of the requirements concerning the issue of new shares, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the issue of 18,950,402 registered shares with a nominal value of CHF 0.04 complies with Swiss law and the company's articles of incorporation.

Report of the Independent Registered Public Accounting Firm

Credit Suisse AG, Zurich

We have audited the accompanying consolidated balance sheets of Credit Suisse AG and subsidiaries (the “Bank”) as of December 31, 2013 and 2012, and the related consolidated statements of operations, changes in equity, comprehensive income and cash flows, and notes thereto, for each of the years in the three-year period ended December 31, 2013. These consolidated financial statements are the responsibility of the Bank's management and the Board of Directors. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States) and Swiss Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Bank as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Bank's internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control—Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated April 3, 2014 expressed an unqualified opinion on the effectiveness of the Bank's internal control over financial reporting.

¹ Reflects Credit Suisse Group shares which are reported as treasury shares. Those shares are held to economically hedge share award obligations.

² Distributions to owners in funds include the return of original capital invested and any related dividends.

³ Transactions with and without ownership changes related to fund activity are all displayed under "not changing ownership".

⁴ Net income attributable to noncontrolling interests excludes CHF (12) million due to redeemable noncontrolling interests.

⁵ Includes a net tax charge of CHF 24 million from the excess recognized compensation expense over fair value of shares delivered.

⁶ Includes a contribution in kind of preferred shares in Credit Suisse Holdings (USA), Inc. from Credit Suisse Group AG to Credit Suisse AG and a capital contribution from Credit Suisse Group AG to Credit Suisse AG.

The accompanying notes to the consolidated financial statements are an integral part of these statements.

Notes to the consolidated financial statements

1 Summary of significant accounting policies

The accompanying consolidated financial statements of Credit Suisse AG (the Bank), a Swiss bank subsidiary of Credit Suisse Group AG (the Group), are prepared in accordance with accounting principles generally accepted in the US (US GAAP) and are stated in Swiss francs (CHF). The financial year for the Bank ends on December 31. Certain reclassifications have been made to the prior year's consolidated financial statements to conform to the current year's presentation which had no impact on net income/ (loss) or total shareholder's equity.

In preparing the consolidated financial statements, management is required to make estimates and assumptions including, but not limited to, the fair value measurements of certain financial assets and liabilities, the allowance for loan losses, the evaluation of variable interest entities (VIEs), the impairment of assets other than loans, recognition of deferred tax assets, tax uncertainties, pension liabilities, as well as various contingencies. These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the dates of the consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. While management evaluates its estimates and assumptions on an ongoing basis, actual results could differ materially from management's estimates. Market conditions may increase the risk and complexity of the judgments applied in these estimates.

► Refer to "Note 1 – Summary of significant accounting policies" in V – Consolidated financial statements – Credit Suisse Group for a summary of significant accounting policies, with the exception of the following accounting policies.

Pensions and other post-retirement benefits

Credit Suisse sponsors a Group defined benefit pension plan in Switzerland that covers eligible employees of the Bank domiciled in Switzerland. The Bank also has single-employer defined benefit pension plans and defined contribution pension plans in Switzerland and other countries around the world.

For the Bank's participation in the Group defined benefit pension plan, no retirement benefit obligation is recognized in the consolidated balance sheets of the Bank and defined contribution accounting is applied, as the Bank is not the sponsoring entity of the Group plan.

For single-employer defined benefit plans, the Bank uses the projected unit credit actuarial method to determine the present value of its projected benefit obligations (PBO) and the current and past service costs or credits related to its defined benefit and other post-retirement benefit plans. The measurement date used to perform the actuarial valuation is December 31.

Certain key assumptions are used in performing the actuarial valuations. These assumptions must be made concerning the future events that will determine the amount and timing of the benefit payments and thus require significant judgment and estimates by Bank management. For example, assumptions have to be made

with regard to discount rates, expected return on plan assets and salary increases.

The assumed discount rates reflect the rates at which the pension benefits could be effectively settled. These rates are determined based on yields of high-quality corporate bonds currently available and are expected to be available during the period to maturity of the pension benefits. In countries where no deep market in high-quality corporate bonds exists, the estimate is based on governmental bonds adjusted to include a risk premium reflecting the additional risk for corporate bonds.

The expected long-term rate of return on plan assets is determined on a plan-by-plan basis, taking into account asset allocation, historical rate of return, benchmark indices for similar-type pension plan assets, long-term expectations of future returns and investment strategy.

Health care cost trend rates are determined by reviewing external data and the Bank's own historical trends for health care costs. Salary increases are determined by reviewing external data and considering internal projections.

The funded status of the Bank's defined benefit post-retirement and pension plans is recognized in the consolidated balance sheets.

Actuarial gains and losses in excess of 10% of the greater of the PBO or the market value of plan assets and unrecognized prior service costs or credits are amortized to net periodic pension and other post-retirement benefit costs on a straight-line basis over the average remaining service life of active employees expected to receive benefits.

The Bank records pension expense for defined contribution plans when the employee renders service to the company, essentially coinciding with the cash contributions to the plans.

Own shares, own bonds and financial instruments on Group shares

The Bank's shares are wholly-owned by Credit Suisse Group AG and are not subject to trading. The Bank may buy and sell Credit Suisse Group AG shares (Group shares), own bonds and financial instruments on Group shares within its normal trading and market-making activities. In addition, the Bank may hold Group shares to economically hedge commitments arising from employee share-based compensation awards. Group shares are reported as trading assets, unless those shares are held to economically hedge share award obligations. Hedging shares are reported as treasury shares, resulting in a reduction to total shareholder's equity. Financial instruments on Group shares are recorded as assets or liabilities and carried at fair value. Dividends received on Group shares and unrealized and realized gains and losses on Group shares are recorded according to the classification of the shares as trading assets or treasury shares. Purchases of bonds originally issued by the Bank are recorded as an extinguishment of debt.

2 Recently issued accounting standards

► Refer to "Note 2 – Recently issued accounting standards" in V – Consolidated financial statements – Credit Suisse Group for recently adopted accounting standards and standards to be adopted in future periods.

The impact on the Bank's and Group's financial position, results of operations or cash flows was or is expected to be identical.

3 Business developments and subsequent events

► Refer to "Note 3 – Business developments, significant shareholders and subsequent events" in V – Consolidated financial statements – Credit Suisse Group for further information.

4 Discontinued operations

In July 2013, the Bank completed the sale of its exchange-traded funds (ETF) business to BlackRock and recognized a pre-tax gain on disposal of CHF 146 million in the third quarter of 2013 net of allocated goodwill of CHF 72 million. The sale price received by the Bank may increase through future contingent payments, if specified thresholds are met. BlackRock is a company unrelated to the Bank.

In August 2013, the Bank announced the sale of Customized Fund Investment Group (CFIG), its private equity fund of funds and co-investment business, to Grosvenor Capital Management. This transaction was completed in January 2014 and related gains of approximately CHF 90 million will be recognized in the first quarter of 2014. As of December 31, 2013, CFIG had total assets of CHF 31 million that were held-for-sale. The Bank will continue to hold investments in, and have unfunded commitments to, investment funds managed by CFIG. Grosvenor Capital Management is a company unrelated to the Bank.

In August 2013, the Bank completed the sale of Strategic Partners, its dedicated secondary private equity business, to Blackstone and recognized a pre-tax gain on disposal of CHF 91 million in the third quarter of 2013 net of allocated goodwill of CHF 37 million. The Bank will continue to receive carried interest from (and guarantee related claw-back obligations), hold limited partner interests in, and have unfunded commitments to, investment funds managed by Strategic Partners. The Bank will also continue to guarantee minimum investment returns to certain third-party investors under existing side letter agreements. Blackstone is a company unrelated to the Bank.

In December 2013, the Bank completed the spin-off of DLJ Investment Partners, a dedicated private equity mezzanine investment business of the Bank, to Portfolio Advisors, LLC with no gain or loss from disposal and insignificant impact on net revenues, operating expenses and net income/(loss) from discontinued operations for any of the periods reported. Portfolio Advisors, LLC is a company unrelated to the Bank.

In December 2013, the Bank announced the sale of its domestic private banking business booked in Germany (German

private banking business) to ABN AMRO. This transaction is subject to customary closing conditions and is expected to close in the course of 2014. As of December 31, 2013, the German private banking business had total assets and liabilities of CHF 1,553 million and CHF 1,140 million, respectively, that were held-for-sale. ABN AMRO is a company unrelated to the Bank.

► Refer to "Note 4 – Discontinued operations" in V – Consolidated financial statements – Credit Suisse Group for further information.

5 Segment information

For the purposes of the presentation of reportable segments, the Bank has included accounts of affiliate entities wholly owned by the same parent which are managed together with the operating segments of the Bank. These affiliate entities include certain bank and trust affiliates, primarily managed by Private Banking & Wealth Management. Income from continuing operations before taxes of these non-consolidated affiliate entities included in the segment presentation for the years ended December 31, 2013, 2012 and 2011 was CHF 243 million, CHF 237 million and CHF

259 million, respectively. For the same periods, net revenues of these non-consolidated affiliate entities included in the segment presentation were CHF 659 million, CHF 684 million and CHF 707 million, respectively, and total assets of these non-consolidated affiliate entities included in the segment presentation as of December 31, 2013 and 2012, were CHF 25.4 billion and CHF 25.8 billion, respectively.

► Refer to "Note 5 – Segment information" in V – Consolidated financial statements – Credit Suisse Group for further information.

| Net revenues | 25,330 | 23,178 | 24,853 |
| Income/(loss) before taxes (CHF million) | | | |
| Private Banking & Wealth Management | 3,240 | 3,775 | 2,961 |
| Investment Banking | 1,719 | 2,002 | (593) |
| Adjustments ^{1, 3} | (1,289) | (3,795) | 143 |
| Income before taxes | 3,670 | 1,982 | 2,511 |

¹ Adjustments represent certain consolidating entries and balances, including those relating to items that are managed but are not legally owned by the Bank and vice versa, and certain expenses that were not allocated to the segments.

² Includes noncontrolling interest-related revenues of CHF 682 million, CHF 365 million and CHF 900 million in 2013, 2012 and 2011, respectively, from the consolidation of certain private equity funds and other entities in which the Bank does not have a significant economic interest in such revenues.

³ Includes noncontrolling interest income of CHF 635 million, CHF 307 million and CHF 816 million in 2013, 2012 and 2011, respectively, from the consolidation of certain private equity funds and other entities in which the Bank does not have a significant economic interest in such income.

Total assets

| end of | 2013 | 2012 |
|-------------------------------------|----------------|----------------|
| Total assets (CHF million) | | |
| Private Banking & Wealth Management | 279,139 | 275,683 |
| Investment Banking | 502,799 | 563,758 |
| Adjustments ¹ | 72,474 | 68,719 |
| Total assets | 854,412 | 908,160 |

Beginning in the first quarter of 2013, segment assets exclude intra-group balances between the segments. Prior period has been reclassified to conform to the current presentation.

¹ Adjustments represent certain consolidating entries and balances, including those relating to items that are managed but are not legally owned by the Bank and vice versa, and certain expenses that were not allocated to the segments.

Net revenues and income/(loss) from continuing operations before taxes by geographic location

| in | 2013 | 2012 | 2011 |
|--|---------------|---------------|---------------|
| Net revenues (CHF million) | | | |
| Switzerland | 7,479 | 7,968 | 7,754 |
| EMEA | 4,797 | 3,444 | 6,389 |
| Americas | 10,847 | 9,942 | 9,011 |
| Asia Pacific | 2,207 | 1,824 | 1,699 |
| Net revenues | 25,330 | 23,178 | 24,853 |
| Income/(loss) from continuing operations before taxes (CHF million) | | | |
| Switzerland | 300 | 1,170 | (176) |
| EMEA | 195 | (1,374) | 1,312 |
| Americas | 3,317 | 3,023 | 2,330 |
| Asia Pacific | (142) | (837) | (955) |
| Income from continuing operations before taxes | 3,670 | 1,982 | 2,511 |

The designation of net revenues and income/(loss) from continuing operations before taxes is based on the location of the office recording the transactions. This presentation does not reflect the way the Bank is managed.

Total assets by geographic location

| end of | 2013 | 2012 |
|-----------------------------------|----------------|----------------|
| Total assets (CHF million) | | |
| Switzerland | 181,584 | 183,735 |

Gross unrealized losses on investment securities and the related fair value

| | Less than 12 months | | 12 months or more | | Total | |
|---|---------------------|-------------------------|-------------------|-------------------------|------------|-------------------------|
| end of | Fair value | Gross unrealized losses | Fair value | Gross unrealized losses | Fair value | Gross unrealized losses |
| 2013 (CHF million) | | | | | | |
| Debt securities issued by foreign governments | 89 | 1 | 0 | 0 | 89 | 1 |
| Debt securities available-for-sale | 89 | 1 | 0 | 0 | 89 | 1 |

There were no unrealized losses on investment securities in 2012. No significant impairment was recorded as the Bank does not intend to sell the investments, nor is it more likely than not that the

Bank will be required to sell the investments before the recovery of their amortized cost bases, which may be maturity.

Proceeds from sales, realized gains and realized losses from available-for-sale securities

| Total debt securities | 1,498 | 1,526 | 1.82 |

16 Other investments

| end of | 2013 | 2012 |
|---|---------------|---------------|
| Other investments (CHF million) | | |
| Equity method investments | 2,008 | 2,147 |
| Non-marketable equity securities ¹ | 5,988 | 7,156 |
| Real estate held for investment | 557 | 641 |
| Life finance instruments ² | 1,654 | 1,872 |
| Total other investments | 10,207 | 11,816 |

¹ Includes private equity, hedge funds and restricted stock investments as well as certain investments in non-marketable mutual funds for which the Bank has neither significant influence nor control over the investee.

² Includes life settlement contracts at investment method and SPIA contracts.

Non-marketable equity securities include investments in entities that regularly calculate net asset value per share or its equivalent.

► Refer to "Note 33 – Financial instruments" for further information on such investments.

Substantially all non-marketable equity securities are carried at fair value. There were no non-marketable equity securities not carried at fair value that have been in a continuous unrealized loss position.

The Bank performs a regular impairment analysis of real estate portfolios. The carrying values of the impaired properties

were written down to their respective fair values, establishing a new cost base. For these properties, the fair values were measured based on either discounted cash flow analyses or external market appraisals. Impairments of CHF 48 million, CHF 13 million and CHF 3 million were recorded in 2013, 2012 and 2011, respectively.

Accumulated depreciation related to real estate held for investment amounted to CHF 289 million, CHF 280 million and CHF 278 million for 2013, 2012 and 2011, respectively.

► Refer to "Note 17 – Other investments" in V – Consolidated financial statements – Credit Suisse Group for further information.

17 Loans, allowance for loan losses and credit quality

| end of | 2013 | 2012 |

| Gross impaired loans | 637 | 281 | 918 | 30 | 450 | 480 | 1,398 |

As of December 31, 2013 and 2012, loans held-to-maturity carried at amortized cost did not include any subprime residential mortgages. Accordingly, impaired loans did not include any subprime residential mortgages. As of December 31, 2013 and 2012, the Bank did not have any material commitments to lend additional funds to debtors whose loan terms have been modified in troubled debt restructurings.

In 2013, 2012 and 2011, the number of troubled debt restructurings and related financial effects and the number of defaults and related carrying values of loans, which had been restructured within the previous 12 months, were not material.

Details of significant reclassification adjustments

| | |
|---|------|
| in | 2013 |
| Reclassification adjustments, included in net income (CHF million) | |
| Cumulative translation adjustments | |
| Sale of subsidiaries ¹ | 83 |
| Actuarial gains/(losses) | |
| Amortization of recognized actuarial losses ² | 92 |
| Tax expense/(benefit) | (34) |
| Net of tax | 58 |

¹ Includes net releases of CHF 84 million on the sale of JO Hambro, which was settled in the third quarter of 2013. These were reclassified from cumulative translation adjustments and included in net income in other revenues, offset by a gain on the transaction.

² These components are included in the computation of total benefit costs. Refer to "Note 29 – Pension and other post-retirement benefits" for further information.

25 Offsetting of financial assets and financial liabilities

► Refer to "Note 26 – Offsetting of financial assets and financial liabilities" in V – Consolidated financial statements – Credit Suisse Group for further information.

Offsetting of derivatives

| Income tax expense | 1,177 | 447 | 444 |

2013

Foreign tax rate differential of CHF 215 million reflected a foreign tax expense in respect of profits earned in higher tax jurisdictions, mainly Brazil and the US, partially offset by foreign tax rate differential related to profits earned in lower tax jurisdictions, mainly Guernsey and the Bahamas. The total foreign tax expense of CHF 1,244 million was not only impacted by the foreign tax expense based on statutory tax rates but also by tax impacts related to additional reconciling items explained below.

Other non-deductible expenses of CHF 493 million included non-deductible interest expenses of CHF 247 million, non-taxable offshore expenses of CHF 9 million, non-deductible bank levy costs and other non-deductible compensation expenses and management costs of CHF 93 million, non-deductible provision accruals of CHF 103 million and other various smaller non-deductible expenses.

Lower taxed income of CHF 374 million included a net tax benefit of CHF 49 million resulting from the reversal of a deferred tax liability previously recorded to cover for a taxable timing difference related to a re-investment relief. In addition, 2013 included a Swiss income tax benefit of CHF 41 million as a result of foreign branch earnings beneficially impacting the earnings mix, a tax benefit of CHF 61 million related to non-taxable life insurance income, CHF 56 million related to exempt offshore income, CHF 45 million in respect of non-taxable dividend income, CHF 18 million related to non-taxable foreign exchange gains, CHF 67 million related to tax credits and CHF 19 million related to permanent tax benefits from tax deductible goodwill amortization. The remaining balance included various smaller items.

Changes in tax law and rates of CHF 184 million reflected a tax expense caused by the reduction of deferred tax assets mainly due to the impact of the change in UK corporation tax.

Changes in deferred tax valuation allowances of CHF 381 million included the impact of the increase of valuation allowances of CHF 245 million mainly in respect of four of the Bank's operating entities, three in Europe and one in Asia, relating to current year earnings. Additionally, 2013 included an increase in valuation allowance for previously recognized deferred tax assets in respect of one of the Bank's operating entities in the UK of CHF 278 million. Also included was a tax benefit of CHF 143 million resulting from the release of valuation allowances on deferred tax assets mainly for two of the Bank's operating entities, one in Japan and one in the UK.

Other of CHF 19 million included a tax benefit of CHF 57 million relating to the current year's earnings mix and the re-assessment of deferred tax assets in Switzerland reflecting changes in forecasted future profitability related to deferred tax assets and a CHF 36 million income tax benefit following a change in the tax status of one of the Bank's US entities, partially offset by a tax expense of CHF 41 million relating to the increase of tax contingency accruals and a tax expense of CHF 41 million relating to non-recoverable foreign taxes. The remaining balance included various smaller items.

2012

Foreign tax rate differential of CHF 279 million reflected a foreign tax expense in respect of profits earned in higher tax jurisdictions, mainly Brazil and the US, partially offset by foreign tax rate differential related to profits earned in lower tax jurisdictions, mainly Guernsey and the Bahamas. The total foreign tax expense of CHF 483 million was not only impacted by the foreign tax expense based on statutory tax rates but also by tax impacts related to additional reconciling items explained below.

Other non-deductible expenses of CHF 382 million included non-deductible interest expenses of CHF 259 million, non-taxable offshore expenses of CHF 8 million, non-deductible bank levy costs and other non-deductible compensation expenses of CHF 57 million and other various smaller non-deductible expenses.

Lower taxed income of CHF 413 million included a Swiss income tax benefit of CHF 114 million as a result of foreign branch earnings beneficially impacting the earnings mix. In addition, 2012 included a tax benefit of CHF 48 million related to non-taxable life insurance income, CHF 29 million related to exempt offshore income, CHF 40 million in respect of non-taxable dividend income, CHF 11 million related to non-taxable foreign exchange gains and CHF 100 million related to tax credits. The remaining balance included various smaller items, amongst others related to permanent tax benefits from tax deductible goodwill amortization and tax holidays.

Changes in tax law and rates of CHF 182 million reflected a tax expense caused by the reduction of deferred tax assets mainly due to the impact of the change in UK corporation tax.

Changes in deferred tax valuation allowances of CHF 10 million included an increase to the valuation allowance of CHF 834 million in respect of five of the Bank's operating entities, three in Europe and two in Asia, mainly relating to deferred tax assets on current year tax losses and pre-existing loss carry-forwards. Additionally, 2012 included a tax benefit of CHF 820 million resulting from the release of valuation allowances on deferred tax assets for one of the Bank's operating entities in the US.

Other of CHF 156 million included a tax benefit of CHF 48 million relating to the re-assessment of deferred tax assets in Switzerland reflecting changes in forecasted future profitability related to such pre-existing deferred tax assets. Also included was a benefit of CHF 70 million relating to return to accrual adjustments following the close of a tax audit cycle and the impact of the closure of an advanced pricing agreement and CHF 43 million relating to the release of tax contingency accruals following the favorable resolution of tax matters.

2011

Foreign tax rate differential of CHF 29 million reflected a foreign tax rate benefit in respect of profits earned in lower tax jurisdictions, mainly Guernsey and the Bahamas, partially offset by foreign tax rate differential related to profits earned in higher tax jurisdictions, mainly Brazil and the US. The foreign tax benefit in relation to foreign tax expense of CHF 730 million was more than offset by tax impacts related to reconciling items explained below.

Other non-deductible expenses of CHF 444 million included non-deductible interest expenses of CHF 240 million, non-taxable offshore expenses of CHF 80 million, non-deductible bank levy costs and other non-deductible compensation expenses of CHF 49 million and other various smaller non-deductible expenses.

Lower taxed income of CHF 422 million included a tax benefit of CHF 40 million related to non-taxable life insurance income, CHF 52 million related to exempt offshore income, CHF 47 million in respect of non-taxable dividend income and CHF 47 million related to non-taxable foreign exchange gains. In addition, 2011 included tax benefits of CHF 42 million related to tax credits and CHF 116 million in respect of the reversal of the deferred tax liability recorded to cover estimated recapture of loss deductions arising from foreign branches of the Bank. The remaining balance included various smaller items, amongst others related to permanent tax benefits from tax deductible goodwill amortization and tax holidays.

Changes in tax law and rates of CHF 170 million reflected a tax expense caused by the reduction of deferred tax assets mainly due to the impact of the change in UK corporation tax.

Changes in deferred tax valuation allowances of CHF 471 million included an increase to the valuation allowance of CHF 428 million in respect of three of the Bank's operating entities, two in the UK and one in Asia, mainly relating to deferred tax assets on tax loss carry-forwards. Additionally, 2011 included a tax benefit of CHF 7 million resulting from the release of valuation allowances on deferred tax assets for one of the Bank's operating entities in the US.

Other of CHF 381 million included a tax benefit of CHF 261 million relating to the increase of deferred tax assets in two of the Bank's operating entities, one in Switzerland (CHF 129 million) and one in the US (CHF 132 million). The increase is related to the re-measurement of existing deferred tax assets on net operating losses due to changes in the mix of the sources of income and related tax rates that these net operating losses are expected to be applied to. Also included was an amount of CHF 125 million relating to the release of tax contingency accruals following the favorable resolution of tax matters.

As of December 31, 2013, the Bank had accumulated undistributed earnings from foreign subsidiaries of CHF 5.6 billion. No deferred tax liability was recorded in respect of those amounts as these earnings are considered indefinitely reinvested. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

Details of the tax effect of temporary differences

| end of | 2013 | 2012 |

| Real estate | (75) | (78) |
| Other | (153) | (208) |
| Gross deferred tax liabilities | (2,188) | (2,723) |
| Net deferred tax assets | 6,099 | 6,991 |

The decrease in net deferred tax assets from 2012 to 2013 of CHF 892 million was primarily due to the impact of taxable income in 2013 decreasing deferred tax assets by CHF 411 million and the recognition of a valuation allowance against deferred tax assets, mainly in the UK, of CHF 278 million. In addition, the decrease reflected a write-down of deferred tax assets of CHF 184 million as a result of changes to corporation tax rates in the UK, the tax impacts directly recorded in equity, mainly related to share-based compensation and other tax recorded in accumulated other comprehensive income/(loss) (AOCI) of CHF 44 million and foreign exchange translation losses of CHF 182 million, which are included within currency translation adjustments recorded in AOCI. These decreases were partially offset by an increase in net deferred tax asset balances following a re-measurement of deferred tax balances in Switzerland and the release of valuation allowances in Japan and the UK of CHF 207 million.

Due to uncertainty concerning its ability to generate the necessary amount and mix of taxable income in future periods, the Bank recorded a valuation allowance against deferred tax assets in the amount of CHF 2.7 billion as of December 31, 2013 compared to CHF 2.6 billion as of December 31, 2012.

Amounts and expiration dates of net operating loss carry-forwards

| Tax benefits associated with share-based compensation (CHF million) | | | |
| Tax benefits recorded in the consolidated statements of operations | 481 | 596 | 464 |
| Windfall tax benefits/(shortfall tax charges) recorded in additional paid-in capital | (24) | 30 | (277) |
| Tax benefits in respect of tax on dividend equivalent payments | 22 | 12 | 1 |

► Refer to "Note 27 – Employee deferred compensation" for further information on share-based compensation.

Windfall deductions and dividend equivalents aggregating CHF 0.9 billion and CHF 0.9 billion for 2013 and 2012, respectively, did not result in a reduction of income taxes payable because certain entities were in a net operating loss position. When the income tax benefit of these deductions is realized, an estimated CHF 170 million tax benefit will be recorded in additional paid-in capital.

of completion is uncertain, it is reasonably possible that some of these will be resolved within 12 months of the reporting date.

It is reasonably possible that there will be a decrease of between zero and CHF 74 million in unrecognized tax benefits within 12 months of the reporting date.

The Bank remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Switzerland – 2009; Brazil – 2008; Japan – 2008; the UK – 2006; the US – 2006; and the Netherlands – 2005.

Does not include the estimated unrecognized compensation expense relating to grants made in 2014 for 2013.

Share awards

On January 16, 2014, the Bank granted 30.1 million share awards with a total value of CHF 824 million. The estimated unrecognized compensation expense of CHF 821 million was determined based on the fair value of the award on the grant date, includes the current estimate of future forfeitures and will be recognized over the three-year vesting period, subject to early retirement rules. On January 17, 2013 and January 19, 2012, the Bank granted 37.8 million and 19.7 million share awards with a total value of CHF 947 million and CHF 432 million, respectively, equivalent to the Group's closing share price on the grant date.

On January 16, 2014, the Bank granted 0.5 million blocked shares with a total value of CHF 15 million that vested immediately upon grant, have no future service requirements and were attributed to services performed in 2013. On January 17, 2013 and January 19, 2012, the Bank granted 0.1 million and 0.4 million blocked shares with a total value of CHF 3 million and CHF 9 million, respectively.

Contingent Capital Awards

On January 16, 2014, the Bank awarded Contingent Capital Awards with a total value of CHF 391 million that will be expensed over the three-year period from the grant date. The estimated unrecognized compensation expense of CHF 433 million was determined based on the fair value of the award on the grant date, includes the current estimated outcome of the relevant performance criteria, estimated future forfeitures and the expected semi-annual cash payments of interest and will be recognized over the three-year vesting period.

2011 Partner Asset Facility

In January 2012, the Bank awarded 2011 Partner Asset Facility (PAF2) units with a fair value of CHF 497 million and the associated compensation expenses were fully expensed in the first quarter of 2012, as the awards were fully vested as of March 31, 2012.

Adjustable Performance Plan Awards

In July 2012, the Bank executed a voluntary exchange offer, under which employees had the right to voluntarily convert all or a portion of their respective unvested Adjustable Performance Plan cash awards into Adjustable Performance Plan share awards. Adjustable Performance Plan holders elected to convert CHF 479 million of their Adjustable Performance Plan cash awards into the new

Adjustable Performance Plan share awards during the election period, which represented an approximate conversion rate of 50%.

Upon conversion, CHF 435 million of the liability related to Adjustable Performance Plan cash awards that were converted into the Adjustable Performance Plan share awards were reclassified to total shareholder's equity.

Liabilities due to own pension funds

Liabilities due to the Bank's own defined benefit pension funds as of December 31, 2013 and 2012 of CHF 2,852 million and CHF 2,804 million, respectively, were reflected in various liability accounts in the Bank's consolidated balance sheets.

29 Pension and other post-retirement benefits

The Bank participates in a defined benefit pension plan sponsored by the Group and has defined contribution pension plans, single-employer defined benefit pension plans and other post-retirement defined benefit plans. The Bank's principal plans are located in Switzerland, the US and the UK.

DEFINED CONTRIBUTION PENSION PLANS

The Bank contributes to various defined contribution pension plans primarily in the US and the UK as well as other countries throughout the world. During 2013, 2012 and 2011, the Bank contributed to these plans and recognized as expense CHF 178 million, CHF 219 million and CHF 244 million, respectively.

► Refer to "Note 30 – Pension and other post-retirement benefits" in V – Consolidated financial statements – Credit Suisse Group for further information on defined contribution pension plans.

DEFINED BENEFIT PENSION AND OTHER POST-RETIREMENT BENEFIT PLANS

Defined benefit pension plans

► Refer to "Note 30 – Pension and other post-retirement benefits" in V – Consolidated financial statements – Credit Suisse Group for further information on defined benefit pension plans.

Group pension plan

The Bank covers pension requirements for its employees in Switzerland by participating in a defined benefit pension plan sponsored by the Group (Group plan), the Group's most significant defined benefit pension plan. The plan provides benefits in the event of retirement, death and disability. Various legal entities within the Group participate in the plan, which is set up as an independent trust domiciled in Zurich. Historically, this plan provided traditional defined benefit pensions under the annuity section. In 2010, a new savings section was introduced and as of January 1, 2013, all active employees were transferred to the savings section and the annuity section has ceased accruing new benefits. In the savings section, the benefits are determined on the basis of the accumulated employer and employee contributions and accumulated interest credited. In accordance with US GAAP, the Group accounts for the Group plan as a single-employer defined benefit pension plan and uses the projected unit credit actuarial method to determine the net periodic benefit costs, the PBO and the accumulated benefit obligation (ABO). The Bank accounts for the defined benefit pension plan sponsored by the Group as a multi-employer pension plan because other legal entities within the Group also participate in the plan and the assets contributed by the Bank are not segregated into a separate account or restricted to provide benefits only to employees of the Bank. The assets contributed

by the Bank are commingled with the assets contributed by the other legal entities of the Group and can be used to provide benefits to any employee of any participating legal entity. The Bank's contributions to the Group plan comprise 95% of the total assets contributed to the Group plan by all participating legal entities on an annual basis.

The Bank accounts for the Group plan on a defined contribution basis whereby it only recognizes the amounts required to be contributed to the Group plan during the period as net periodic pension expense and only recognizes a liability for any contributions due and unpaid. No other expenses or balance sheet amounts related to the Group plan were recognized by the Bank. In the savings section of the plan, the Bank's contribution varies between 7.5% and 25% of the pensionable salary depending on the employees' age.

During 2013, 2012 and 2011, the Bank contributed and recognized as expense CHF 390 million, CHF 458 million and CHF 645 million to the Group plan, respectively. The Bank expects to contribute CHF 390 million to the Group plan during 2014. If the Bank had accounted for the Group plan as a single-employer defined benefit plan, the net periodic pension expense recognized by the Bank during 2013, 2012 and 2011 would have been lower by CHF 131 million, CHF 197 million and CHF 476 million, respectively, and the Bank would have recognized CHF 158 million, CHF 88 million and CHF 96 million, respectively, as amortization of actuarial losses and prior service cost for the Group plan.

As of December 31, 2013 and 2012, the ABO of the Group plan was CHF 13.0 billion and CHF 13.8 billion, the PBO was CHF 13.5 billion and CHF 14.3 billion and the fair value of plan assets was CHF 14.9 billion and CHF 14.3 billion, respectively. As of December 31, 2013 and 2012, the Group plan was overfunded on an ABO basis by CHF 1,869 million and CHF 519 million, respectively. On a PBO basis, the Group plan was overfunded by CHF 1,439 million and CHF 44 million as of December 31, 2013 and 2012, respectively. If the Bank had accounted for the Group plan as a defined benefit pension plan, the Bank would have had to recognize the funded status of the Group plan on a PBO basis of CHF 1,367 million and CHF 42 million as an asset as of December 31, 2013 and 2012, respectively, in the consolidated balance sheets.

If the Bank had accounted for the Group plan as a defined benefit plan, the Bank would have used the assumptions made by the Group for the calculation of the expense and liability associated with the Group plan.

► Refer to "Note 30 – Pension and other post-retirement benefits" in V – Consolidated financial statements – Credit Suisse Group for information on assumptions made by the Group for Switzerland.

International pension plans

Various defined benefit pension plans cover the Bank's employees outside Switzerland. These plans provide benefits in the event of retirement, death, disability or termination of employment. Retirement benefits under the plans depend on age, contributions and salary. The Bank's principal defined benefit pension plans outside Switzerland are located in the US and in the UK. Both plans are funded, closed to new participants and have ceased accruing new benefits. Smaller defined benefit pension plans, both funded and unfunded, are operated in other locations.

Other post-retirement defined benefit plans

In the US, the Bank's defined benefit plans provide post-retirement benefits other than pension benefits that primarily focus on health and welfare benefits for certain retired employees. In exchange for

the current services provided by the employee, the Bank promises to provide health and welfare benefits after the employee retires. The Bank's obligation for that compensation is incurred as employees render the services necessary to earn their post-retirement benefits.

Benefit costs of defined benefit plans

The net periodic benefit costs for defined benefit pension and other post-retirement defined benefit plans are the costs of the respective plan for a period during which an employee renders services. The actual amount to be recognized is determined using the standard actuarial methodology which considers, among other factors, current service cost, interest cost, expected return on plan assets and the amortization of both prior service cost/(credit) and actuarial losses/(gains) recognized in AOCI.

Components of total benefit costs

| in | International single-employer defined benefit pension plans | | | Other post-retirement defined benefit plans | | |
|--|--|-----------|-----------|--|-----------|-----------|
| | 2013 | 2012 | 2011 | 2013 | 2012 | 2011 |

| Total benefit costs | 64 | 66 | 47 | 21 | 20 | 14 |

Total benefit costs reflected in compensation and benefits – other for 2013, 2012 and 2011 were CHF 85 million, CHF 86 million and CHF 61 million, respectively.

Benefit obligation

The following table shows the changes in the PBO, the fair value of plan assets and the amounts recognized in the consolidated balance sheets for the international single-employer defined benefit pension plans and other post-retirement defined benefit plans as well as the ABO for the defined benefit pension plans.

Obligations and funded status of the plans

| | International single-employer defined benefit pension plans | | Other post-retirement defined benefit plans | |
|---|--|--------------|--|--------------|
| in / end of | 2013 | 2012 | 2013 | 2012 |
| PBO (CHF million)¹ | | | | |
| Beginning of the measurement period | 2,773 | 2,675 | 180 | 174 |
| Service cost | 24 | 30 | 0 | 1 |
| Interest cost | 122 | 127 | 8 | 8 |
| Plan amendments | 0 | 0 | 0 | 0 |
| Settlements | (4) | 0 | 0 | 0 |
| Curtailments | (2) | (12) | 0 | 0 |
| Special termination benefits | 1 | 1 | 0 | 0 |
| Actuarial losses/(gains) | 69 | 70 | (8) | 10 |
| Plans removed | 0 | (6) | 0 | 0 |
| Benefit payments | (97) | (103) | (8) | (8) |
| Exchange rate losses/(gains) | (43) | (9) | (4) | (5) |
| End of the measurement period | 2,843 | 2,773 | 168 | 180 |
| Fair value of plan assets (CHF million) | | | | |
| Beginning of the measurement period | 2,893 | 2,586 | 0 | 0 |
| Actual return on plan assets | 183 | 234 | 0 | 0 |
| Employer contributions | 67 | 158 | 8 | 8 |
| Settlements | (4) | 0 | 0 | 0 |
| Benefit payments | (97) | (103) | (8) | (8) |
| Exchange rate gains/(losses) | (35) | 18 | 0 | 0 |
| End of the measurement period | 3,007 | 2,893 | 0 | 0 |
| Total funded status recognized (CHF million) | | | | |
| Funded status of the plan – over/(underfunded) | 164 | 120 | (168) | (180) |
| Funded status recognized in the consolidated balance sheet as of December 31 | 164 | 120 | (168) | (180) |
| Total amount recognized (CHF million) | | | | |
| Noncurrent assets | 520 | 695 | 0 | 0 |
| Current liabilities | (8) | (7) | (8) | (8) |
| Noncurrent liabilities | (348) | (568) | (160) | (172) |
| Total amount recognized in the consolidated balance sheet as of December 31 | 164 | 120 | (168) | (180) |
| ABO (CHF million)² | | | | |
| End of the measurement period | 2,785 | 2,714 | – | – |

¹ Including estimated future salary increases.

² Excluding estimated future salary increases.

The total net amount recognized in the consolidated balance sheets as of December 31, 2013 and 2012 was an underfunding of CHF 4 million and CHF 60 million, respectively.

In 2013 and 2012, the Bank made contributions of CHF 67 million and CHF 158 million, respectively, to the international single-employer defined benefit pension plans. In 2014, the Bank expects to contribute CHF 110 million to the international

single-employer defined benefit pension plans and CHF 8 million to other post-retirement defined benefit plans.

PBO or ABO in excess of plan assets

The following table shows the aggregate PBO and ABO, as well as the aggregate fair value of plan assets for those plans with PBO in excess of plan assets and those plans with ABO in excess of plan assets as of December 31, 2013 and 2012, respectively.

Defined benefit pension plans in which PBO or ABO exceeded plan assets

| December 31 | PBO exceeds fair value of plan assets ¹ | | ABO exceeds fair value of plan assets ¹ | |
|---------------------------|---|-------|---|-------|
| | 2013 | 2012 | 2013 | 2012 |
| CHF million | | | | |
| PBO | 1,334 | 1,400 | 1,319 | 1,382 |
| ABO | 1,307 | 1,364 | 1,298 | 1,354 |
| Fair value of plan assets | 978 | 825 | 964 | 810 |

¹ Includes only those defined benefit pension plans where the PBO/ABO exceeded the fair value of plan assets.

Amount recognized in AOCI and other comprehensive income

The following table shows the actuarial gains/(losses) and prior service credit/(cost) which were recorded in AOCI and subsequently recognized as components of net periodic benefit costs.

Amounts recognized in AOCI, net of tax

| end of | International single-employer defined benefit pension plans | | Other post-retirement defined benefit plans | | Total | |
|---|--|--------------|--|-------------|--------------|--------------|
| | 2013 | 2012 | 2013 | 2012 | 2013 | 2012 |
| Amounts recognized in AOCI (CHF million) | | | | | | |
| Actuarial gains/(losses) | (674) | (617) | (40) | (53) | (714) | (670) |
| Prior service credit/(cost) | 0 | 0 | 3 | 3 | 3 | 3 |
| Total | (674) | (617) | (37) | (50) | (711) | (667) |

The following tables show the changes in other comprehensive income due to actuarial gains/(losses) and prior service credit/(cost) recognized in AOCI during 2013 and 2012, and the

amortization of the aforementioned items as components of net periodic benefit costs for these periods, as well as the amounts expected to be amortized in 2014.

Amounts recognized in other comprehensive income

| | International single-employer defined benefit pension plans | | | Other post-retirement defined benefit plans | | | |
|--|--|-------------------|-------|--|-----|-----|-----------|
| in | Gross | Tax | Net | Gross | Tax | Net | Total net |
| 2013 (CHF million) | | | | | | | |
| Actuarial gains/(losses) | (47) | (62) ¹ | (109) | 8 | (3) | 5 | (104) |
| Amortization of actuarial losses/(gains) | 79 | (29) | 50 | 13 | (5) | 8 | 58 |
| Immediate recognition due to curtailment/settlement | 2 | 0 | 2 | 0 | 0 | 0 | 2 |
| Total amounts recognized in other comprehensive income | 34 | (91) | (57) | 21 | (8) | 13 | (44) |
| 2012 (CHF million) | | | | | | | |
| Actuarial gains/(losses) | 0 | 0 | 0 | (10) | 4 | (6) | (6) |
| Amortization of actuarial losses/(gains) | 74 | (27) | 47 | 13 | (5) | 8 | 55 |
| Amortization of prior service cost/(credit) | (1) | 1 | 0 | (2) | 1 | (1) | (1) |
| Immediate recognition due to curtailment/settlement | 12 | (2) | 10 | 0 | 0 | 0 | 10 |
| Total amounts recognized in other comprehensive income | 85 | (28) | 57 | 1 | 0 | 1 | 58 |

¹ Includes the impact from the valuation allowance recognized on deferred tax assets on one of the Bank's entities in the UK, offsetting the tax benefit of CHF 37 million attributable to the UK pension plan.

Amounts in AOCI, net of tax, expected to be amortized in 2014

| in 2014 | International single-employer defined benefit pension plans | Other post-retirement defined benefit plans |
|--|---|---|
| CHF million | | |
| Amortization of actuarial losses/(gains) | 38 | 5 |
| Total | 38 | 5 |

Assumptions

Weighted-average assumptions used to determine net periodic benefit costs and benefit obligation

| December 31 | International single-employer defined benefit pension plans | | | Other post-retirement defined benefit plans | | |
|--|---|------|------|---|------|------|
| | 2013 | 2012 | 2011 | 2013 | 2012 | 2011 |
| Net periodic benefit cost (%) | | | | | | |
| Discount rate | 4.5 | 4.8 | 5.5 | 4.3 | 4.7 | 5.5 |
| Salary increases | 4.0 | 4.0 | 4.2 | – | – | – |
| Expected long-term rate of return on plan assets | 6.2 | 6.4 | 7.3 | – | – | – |
| Benefit obligation (%) | | | | | | |
| Discount rate | 4.7 | 4.5 | 4.8 | 5.1 | 4.3 | 4.7 |
| Salary increases | 4.3 | 4.0 | 4.0 | – | – | – |

Health care cost assumptions

The health care cost trend is used to determine the appropriate other post-retirement defined benefit costs. In determining those costs, an annual weighted-average rate is assumed in the cost of covered health care benefits.

The following table provides an overview of health care cost trend rates assumed and the sensitivity of a one percentage point increase or decrease of the rate.

Health care cost trend rates and sensitivity

| in / end of | 2013 | 2012 | 2011 |
|--|-------|-------|-------|
| Health care cost trend rate (%) | | | |
| Annual weighted-average health care cost trend rate ¹ | 8.00 | 9.00 | 9.00 |
| Increase/(decrease) in post-retirement expenses (CHF million) | | | |
| One percentage point increase in health care cost trend rates | 1.3 | 1.4 | 1.3 |
| One percentage point decrease in health care cost trend rates | (1.0) | (1.1) | (1.1) |
| Increase/(decrease) in post-retirement benefit obligation (CHF million) | | | |
| One percentage point increase in health care cost trend rates | 23 | 27 | 23 |
| One percentage point decrease in health care cost trend rates | (19) | (22) | (19) |

¹ The annual health care cost trend rate is assumed to decrease gradually to achieve the long-term health care cost trend rate of 5% by 2021.

The annual health care cost trend rate used to determine the defined benefit cost for 2014 is 8.00%.

Plan assets and investment strategy

► Refer to "Note 30 – Pension and other post-retirement benefits" in V – Consolidated financial statements – Credit Suisse Group for further information.

As of December 31, 2013 and 2012, no Group debt or equity securities were included in plan assets for the international single-employer defined benefit pension plans.

Fair value of plan assets

The following tables present the plan assets measured at fair value on a recurring basis as of December 31, 2013 and 2012, for the Bank's defined benefits plans.

Plan assets measured at fair value on a recurring basis

| end of | 2013 | | | | 2012 | | | |
|--|-------------------|-----------------|------------|--------------|------------|--------------------|------------|--------------|

► Refer to "Note 8 – Trading revenues" for gains and losses on trading activities by product type.

Disclosures relating to contingent credit risk

The following table provides the Bank's current net exposure from contingent credit risk relating to derivative contracts with bilateral counterparties and special purpose entities (SPEs) that include credit support agreements, the related collateral posted and the additional collateral required in a one-notch and a two-notch downgrade event, respectively. The table also includes derivative contracts with contingent credit risk features without credit support agreements that have accelerated termination event conditions. The current net exposure for derivative contracts with bilateral counterparties and contracts with accelerated termination event conditions is the aggregate ► fair value of derivative instruments that were in a net liability position. For SPEs, the current net exposure is the contractual amount that is used to determine the collateral payable in the event of a downgrade. The contractual amount could include both the NRV and a percentage of the notional value of the derivative.

Credit protection sold/purchased

The following tables do not include all credit derivatives and differ from the credit derivatives in the "Fair value of derivative instruments" table. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative

as a derivative instrument (a) in which one or more of its underlyings are related to the credit risk of a specified entity (or a group of entities) or an index based on the credit risk of a group of entities and (b) that exposes the seller to potential loss from credit risk-related events specified in the contract.

Certain cash collateralized debt obligations (CDOs) and other instruments were excluded as they do not fall within the scope of

US GAAP rules. Total return swaps (TRS) of CHF 7.4 billion and CHF 6.0 billion as of December 31, 2013 and 2012, respectively, were also excluded because a TRS does not expose the seller to potential loss from credit risk-related events specified in the contract. A TRS only provides protection against a loss in asset value and not against additional amounts as a result of specific credit events.

¹ Total net amount is computed as the gross amount less any participations.

² Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Bank had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments.

³ Collateral for derivatives accounted for as guarantees is not significant.

⁴ Prior period has been corrected.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guarantee an amount of up to CHF 6 billion. Upon occurrence of a payout event triggered by a specified restriction of business imposed by the Swiss Financial Market Supervisory Authority FINMA (FINMA) or by the compulsory liquidation of another deposit-taking bank, the Bank's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA's estimate for the Bank, the Bank's share in the deposit insurance guarantee program for the period July 1, 2013 to June 30, 2014 is CHF 0.5 billion. These deposit insurance guarantees were reflected in other guarantees.

► Refer to "Note 32 – Guarantees and commitments" in V – Consolidated financial statements – Credit Suisse Group for further information.

PAF2 transaction

The Bank's results are impacted by the risk of counterparty defaults and the potential for changes in counterparty credit spreads related to derivative trading activities of the Bank. In the first quarter of 2012, the Bank entered into the PAF2 transaction to hedge the counterparty credit risk of a referenced portfolio of derivatives and their credit spread volatility. The hedge covered approximately USD 12 billion notional amount of expected positive exposure from counterparties of the Bank, and was addressed in

three layers: (i) first loss (USD 0.5 billion), (ii) mezzanine (USD 0.8 billion) and (iii) senior (USD 11 billion). The first loss element was retained by the Bank and actively managed through normal credit procedures. The mezzanine layer was hedged by transferring the risk of default and counterparty credit spread movements to eligible employees in the form of PAF2 awards, as part of their deferred compensation granted in the annual compensation process.

The model used to value the PAF2 awards is the standard Gaussian copula valuation model used for synthetic CDO trades with adjustments necessary to incorporate the specific nature of the PAF2 transaction. The key model inputs are notional value, correlation assumption, credit spreads, liquidity and recovery rates of the portfolio, the Bank's own credit spread and the maturity of the trade. In the model, the credit spreads of the counterparties determine the respective probability of default. Such probability is used to compute the expected value of the cash flows contingent on survival and on default of the counterparties in the reference portfolio. The credit spreads are sourced using observable data from CDS on the specific reference entity. Where a specific reference entity curve does not exist for a reference name in the portfolio, a proxy curve is used. The expected value of the counterparty exposure on default determines the equivalent notional value for the given name. This is computed from the effective positive exposure which is the weighted average over time of the expected exposure used by the Bank for counterparty risk management. As of December 31, 2013, the carrying value of the PAF2 awards was CHF 649 million. The amount of the PAF2

awards compensation expense for 2013 was CHF 83 million and is included in the amount reflected in the “Deferred compensation expense” table in Note 27 – Employee deferred compensation, which includes deferred compensation expense for a smaller plan unrelated to the hedging aspects of this transaction.

The Bank had purchased protection on the senior layer to hedge against the potential for future counterparty credit spread volatility. This was executed through a credit default swap (CDS), accounted for at fair value, with a third-party entity. The value of the senior layer was calculated using the same model as for the PAF2 awards. The Bank also had a credit support facility with this entity that allowed the Bank to provide credit support in connection with other assets that are commonly financed through the issuance of commercial paper (CP) and, in connection with the CDS, to provide immediately available funding to this entity in certain circumstances. Among others, such circumstances included: (i) a disruption of the CP market such that the entity could not issue or roll a CP to fund the CDS payment or repay a maturing CP; (ii) the interest payable on the CP exceeded certain thresholds and the Bank instructed the entity to draw on the facility instead of issuing a CP; (iii) a CP was issued by the entity to fund a CDS payment and subsequently the short-term rating of the facility provider was downgraded; or (iv) to repay any outstanding CP at the maturity date of the facility. Any funded amount could be settled by the assignment of the rights and obligations of the CDS to the Bank. The credit support facility was accounted for on an accrual basis.

In December 2012, the  Basel Committee on Banking Supervision (BCBS) published updated regulatory guidance that made the PAF2 transaction as it was structured ineligible for counterparty credit spread hedging under the  Basel III framework. As a result of this new guidance, the Bank had the right to exercise a regulatory call to restructure or terminate the CDS and the credit support facility layer at par and terminate the mezzanine layer at fair value. In October 2013, the Bank exercised the call to terminate the CDS and the credit support facility at par.

As of December 31, 2013, the mezzanine layer in the form of PAF2 awards remained in place. In February 2014, the Bank terminated the PAF2 awards and exchanged them at fair value

for other compensation awards in the form of either Contingent Capital Awards or for an interest in a fund at the discretion of the award holders.

► Refer to “Note 27 – Employee deferred compensation” for further information.

Representations and warranties on residential mortgage loans sold

In connection with Investment Banking’s sale of US residential mortgage loans, the Bank has provided certain representations and warranties relating to the loans sold.

► Refer to “Note 32 – Guarantees and commitments” in V – Consolidated financial statements – Credit Suisse Group for further information.

With respect to its outstanding repurchase claims, the Bank is unable to estimate reasonably possible losses in excess of the amounts accrued because of the heterogeneity of its portfolio, the complexity of legal and factual determinations related to each claim, the limited amount of discovery and/or other factors.

The following tables present the total amount of residential mortgage loans sold during the period from January 1, 2004 to December 31, 2013 by counterparty type and the development of outstanding repurchase claims and provisions for outstanding repurchase claims in 2013 and 2012, including realized losses from the repurchase of residential mortgage loans sold.

Residential mortgage loans sold

| January 1, 2004 to December 31, 2013 (USD billion) | |
|--|--------------------|
| Government-sponsored enterprises | 8.2 |
| Private investors ¹ | 23.5 |
| Non-agency securitizations | 133.8 ² |
| Total | 165.5 |

¹ Primarily banks.
² The outstanding balance of residential mortgage loans sold was USD 26.2 billion as of December 31, 2013. The difference of the total balance of mortgage loans sold and the outstanding balance as of December 31, 2013 was attributable to borrower payments of USD 88.9 billion and losses of USD 18.7 billion due to loan defaults.

Residential mortgage loans sold – outstanding repurchase claims

Sale-leaseback transactions

In the first quarter of 2012, the Bank sold the office complex of its European headquarters at One Cabot Square in London to OCS Investment S.à.r.l. and leased back this property under an operating lease arrangement for 22 years, with two options to extend the lease by five years each. OCS Investment S.à.r.l. is a company wholly owned by the Qatar Investment Authority, which is a minority shareholder of the Group.

In the fourth quarter of 2012, the Bank sold the Uetlihof office complex in Zurich, the Bank's principal office building worldwide,

to Norges Bank, a minority shareholder of the Group, and leased back this property under an operating lease arrangement for 25 years, with the option to extend the lease by up to 15 years. Norges Bank, through its Investment Management unit, was acting as the buyer on behalf of the Norwegian Government Pension Fund Global.

During 2013 and 2012, the Bank entered into several smaller sale-leaseback transactions in respect of own property, which were all recognized as operating lease arrangements with lease terms of between two and ten years and between five and ten years, respectively. The total contractual rental expenses were CHF 78 million for the 2013 sale-leaseback transactions and CHF 41 million for the 2012 sale-leaseback transactions.

| Net gain ¹ | 4 | 56 | 6 |
| Proceeds from transfer of assets | 5,574 | 6,156 | 974 |
| Servicing fees | 0 | 0 | 1 |
| Cash received on interests that continue to be held | 70 | 57 | 205 |
| RMBS | | | |
| Net gain/(loss) ¹ | (8) | 3 | 65 |
| Proceeds from transfer of assets | 24,523 | 15,143 | 30,695 |
| Purchases of previously transferred financial assets or its underlying collateral | (10) | (25) | (4) |
| Servicing fees | 4 | 3 | 3 |
| Cash received on interests that continue to be held | 486 | 554 | 382 |
| Other asset-backed financings | | | |
| Net gain ¹ | 15 | 83 | 24 |
| Proceeds from transfer of assets | 915 | 591 | 1,268 |
| Purchases of previously transferred financial assets or its underlying collateral ² | (213) | (621) | (256) |
| Servicing fees | 0 | 0 | 1 |
| Cash received on interests that continue to be held | 633 | 1,350 | 701 |

¹ Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the SPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization. The gains or losses on the sale of the collateral is the difference between the fair value on the day prior to the securitization pricing date and the sale price of the loans.

² Represents market making activity and voluntary repurchases at fair value where no repurchase obligations were present.

Continuing involvement in transferred financial assets

The following table provides the outstanding principal balance of assets to which the Bank continued to be exposed after the transfer of the financial assets to any SPE and the total assets of the SPE as of the end of 2013 and 2012, regardless of when the transfer of assets occurred.

Principal amounts outstanding and total assets of SPEs resulting from continuing involvement

| end of | 2013 | 2012 |
|--------------------------------------|--------|--------|
| CHF million | | |
| CMBS | | |
| Principal amount outstanding | 37,308 | 30,050 |
| Total assets of SPE | 48,715 | 45,407 |
| RMBS | | |
| Principal amount outstanding | 45,571 | 58,112 |
| Total assets of SPE | 48,741 | 60,469 |
| Other asset-backed financings | | |
| Principal amount outstanding | 27,854 | 32,805 |
| Total assets of SPE | 27,854 | 32,805 |

Principal amount outstanding relates to assets transferred from the Bank and does not include principle amounts for assets transferred from third parties.

Fair value of beneficial interests

The fair value measurement of beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any continuing involvement does not include any benefits from financial instruments that the Bank may utilize to hedge the inherent risks.

Key economic assumptions at the time of transfer

► Refer to "Note 33 – Financial instruments" for further information on fair value hierarchy.

Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

| | 2013 | | 2012 | |
|---|----------------|----------|----------------|----------|
| at time of transfer | CMBS | RMBS | CMBS | RMBS |
| CHF million, except where indicated | | | | |
| Fair value of beneficial interests | 633 | 2,993 | 761 | 2,219 |
| of which level 2 | 476 | 2,879 | 654 | 2,090 |
| of which level 3 | 156 | 114 | 107 | 129 |
| Weighted-average life, in years | 7.3 | 7.7 | 8.4 | 5.0 |
| Prepayment speed assumption (rate per annum), in % ¹ | – ² | 2.0–31.0 | – ² | 0.1–34.9 |
| Cash flow discount rate (rate per annum), in % ³ | 1.6–11.6 | 0.0–45.9 | 0.8–10.7 | 0.1–25.7 |
| Expected credit losses (rate per annum), in % | 0.0–7.5 | 0.0–45.8 | 0.5–9.0 | 0.0–25.1 |

Transfers of assets in which the Bank does not have beneficial interests are not included in this table.

¹ Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

² To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

³ The rate was based on the weighted-average yield on the beneficial interests.

Sensitivity analysis

The following table provides the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of the end of 2013 and 2012.

Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

| end of | 2013 | | | 2012 | | |
|---|-------------------|----------|--|-------------------|----------|--|
| | CMBS ¹ | RMBS | Other asset-backed financing activities ² | CMBS ¹ | RMBS | Other asset-backed financing activities ² |
| CHF million, except where indicated | | | | | | |

| Impact on fair value from 10% adverse change | (10.9) | (42.2) | (0.4) | (14.4) | (55.9) | (0.8) |
| Impact on fair value from 20% adverse change | (21.5) | (79.6) | (0.7) | (19.2) | (80.3) | (1.6) |

¹ To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

² CDOs within this category are generally structured to be protected from prepayment risk.

³ Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

⁴ The rate was based on the weighted-average yield on the beneficial interests.

Secured borrowings

The following table provides the carrying amounts of transferred financial assets and the related liabilities where sale treatment was not achieved as of the end of 2013 and 2012.

Carrying amounts of transferred financial assets and liabilities where sale treatment was not achieved

| Other asset-backed financings | | |
| Trading assets | 216 | 1,171 |
| Other assets | 157 | 913 |
| Liability to SPE, included in Other liabilities | (373) | (2,084) |

Variable interest entities

► Refer to "Note 33 – Transfers of financial assets and variable interest entities" in V – Consolidated financial statements – Credit Suisse Group for further information.

Consolidated VIEs

The Bank has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The Bank consolidated all VIEs related to financial intermediation for which it was the primary beneficiary.

Non-consolidated VIEs

Non-consolidated VIE assets are related to the non-consolidated VIEs with which the Bank has variable interests. These amounts represent the assets of the entities themselves and are typically

unrelated to the exposures the Bank has with the entity and thus are not amounts that are considered for risk management purposes.

Non-consolidated VIEs

¹ For all transfers to level 3 or out of level 3, the Bank determines and discloses as level 3 events only gains or losses through the last day of the reporting period.

² Includes unrealized gains recorded in trading revenues of CHF 238 million primarily related to subprime exposures in securitized business and market movements across the wider loans held-for-sale portfolio.

² Primarily includes brokerage payables, cash collateral on derivative instruments and interest and fee payables.

34 Assets pledged and collateral

Assets pledged

The Bank pledges assets mainly for repurchase agreements and other securities financing. Certain pledged assets may be encumbered, meaning they have the right to be sold or repledged. The encumbered assets are parenthetically disclosed on the consolidated balance sheet.

Assets pledged

| end of | 2013 | 2012 |
|--|---------|---------|
| Assets pledged (CHF million) | | |
| Total assets pledged or assigned as collateral | 137,207 | 145,598 |
| of which encumbered | 92,300 | 90,745 |

Collateral

The Bank receives cash and securities in connection with resale agreements, securities borrowing and loans, derivative transactions and margined broker loans. A substantial portion of the collateral and securities received by the Bank was sold or repledged in connection with repurchase agreements, securities sold not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

Collateral

| end of | 2013 | 2012 |
|--|---------|---------|
| Collateral (CHF million) | | |
| Fair value of collateral received with the right to sell or repledge | 359,508 | 402,784 |
| of which sold or repledged | 267,902 | 292,531 |

Other information

| end of | 2013 | 2012 |
|--|--------|--------|
| Other information (CHF million) | | |
| Cash and securities restricted under foreign banking regulations | 18,130 | 14,340 |
| Swiss National Bank required minimum liquidity reserves | 2,305 | 2,312 |

► Refer to "Note 35 – Assets pledged and collateral" in V – Consolidated financial statements – Credit Suisse Group for further information.

35 Capital adequacy

The Bank is subject to regulation by FINMA. The capital levels of the Bank are subject to qualitative judgments by regulators, including FINMA, about the components of capital, risk weightings and other factors. Since January 2013, the Bank has operated under the international capital adequacy standards known as Basel III set forth by the BCBS. These standards have affected the measurement of both total eligible capital and risk-weighted assets.

As of December 31, 2013 and 2012, the Bank was adequately capitalized under the regulatory provisions outlined under both FINMA and the Bank for International Settlements (BIS) guidelines.

► Refer to "Note 36 – Capital adequacy" in V – Consolidated financial statements – Credit Suisse Group for further information.

Broker-dealer operations

Certain Bank broker-dealer subsidiaries are also subject to capital adequacy requirements. As of December 31, 2013 and 2012, the Bank and its subsidiaries complied with all applicable regulatory capital adequacy requirements.

Dividend restrictions

Certain of the Bank's subsidiaries are subject to legal restrictions governing the amount of dividends they can pay (for example, pursuant to corporate law as defined by the Swiss Code of Obligations).

As of December 31, 2013 and 2012, the Bank was not subject to restrictions on its ability to pay the proposed dividends.

BIS statistics – Basel III

| end of | 2013 | 2012 |
|---|----------------|----------------|
| Eligible capital (CHF million) | | |
| CET1 capital | 38,028 | 36,717 |

38 Significant valuation and income recognition differences between US GAAP and Swiss GAAP banking law (true and fair view)

► Refer to "Note 42 – Significant valuation and income recognition differences between US GAAP and Swiss GAAP banking law (true and fair view)" in V – Consolidated financial statements – Credit Suisse Group for further information.

39 Risk assessment

During the reporting period the Board of Directors and its Risk Committee performed risk assessments in accordance with established policies and procedures.

The governance of the Bank and the Group, including risk governance, is fully aligned. Both the Board of Directors and the Executive Board are comprised of the same individuals.

► Refer to "Note 43 – Risk assessment" in V – Consolidated financial statements – Credit Suisse Group for information in accordance with the Swiss Code of Obligations on the risk assessment process followed by the Board of Directors.

Controls and procedures

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

The Bank has evaluated the effectiveness of the design and operation of its disclosure controls and procedures as of the end of the period covered by this report under the supervision and with the participation of management, including the Bank Chief Executive Officer (CEO) and Chief Financial Officer (CFO), pursuant to Rule 13(a)-15(a) under the Securities Exchange Act of 1934 (the Exchange Act). There are inherent limitations to the effectiveness of any system of controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective controls and procedures can only provide reasonable assurance of achieving their control objectives.

The CEO and CFO concluded that, as of December 31, 2013, the design and operation of the Bank's disclosure controls and procedures were effective, in all material respects, to ensure that information required to be disclosed in reports filed and submitted under the Exchange Act is recorded, processed, summarized and reported as and when required.

MANAGEMENT REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of the Bank is responsible for establishing and maintaining adequate internal control over financial reporting. The Bank's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with US GAAP. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may deteriorate.

Management has made an evaluation and assessment of the Bank's internal control over financial reporting as of December 31, 2013 using the criteria issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in "Internal Control – Integrated Framework (1992)".

Based upon its review and evaluation, management, including the Bank CEO and CFO, has concluded that the Bank's internal control over financial reporting is effective as of December 31, 2013.

KPMG AG, the Bank's independent auditors, have issued an unqualified opinion on the effectiveness of the Bank's internal control over financial reporting as of December 31, 2013, as stated in their report, which follows.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There were no changes in the Bank's internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Bank's internal control over financial reporting.

Report of the Independent Registered Public Accounting Firm to the General Meeting of Shareholders of

Credit Suisse AG, Zurich

We have audited Credit Suisse AG and subsidiaries' (the "Bank") internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control—Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Bank's board of directors and management are responsible for maintaining effective internal control over financial reporting and the Bank's management is responsible for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Bank's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

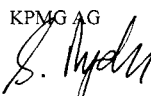

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Bank maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control—Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) and Swiss Auditing Standards, the consolidated balance sheets of the Bank as of December 31, 2013 and 2012, and the related consolidated statements of operations, changes in equity, comprehensive income and cash flows, and notes thereto, for each of the years in the three-year period ended December 31, 2013, and our report dated April 3, 2014 expressed an unqualified opinion on those consolidated financial statements.

Report of the Statutory Auditor on the Financial Statements to the General Meeting of

Credit Suisse AG, Zurich

As statutory auditor, we have audited the accompanying financial statements of Credit Suisse AG (the "Bank"), which comprise the balance sheet, statements of income and notes for the year ended December 31, 2013.

Board of Directors' Responsibility

The board of directors is responsible for the preparation of the financial statements in accordance with the requirements of Swiss law and the Bank's articles of incorporation. This responsibility includes designing, implementing and maintaining an internal control system relevant to the preparation financial statements that are free from material misstatement, whether due to fraud or error. The board of directors is further responsible for selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Swiss law and Swiss Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers the internal control system relevant to the entity's preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control system. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of accounting estimates made, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements for the year ended December 31, 2013 comply with Swiss law and the Bank's articles of incorporation.

Credit Suisse AG, Zurich
Report of the Statutory Auditor
on the Financial Statements
to the General Meeting

Report on Other Legal and Regulatory Requirements

We confirm that we meet the legal requirements on licensing according to the Auditor Oversight Act (AOA) (Switzerland) and independence (article 728 CO and article 11 AOA) and that there are no circumstances incompatible with our independence.

In accordance with article 728a paragraph 1 item 3 CO and Swiss Auditing Standard 890, we confirm that an internal control system exists, which has been designed for the preparation of financial statements according to the instructions of the board of directors.

We further confirm that the proposed appropriation of available earnings complies with Swiss law and the Bank's articles of incorporation. We recommend that the financial statements submitted to you be approved.

Financial review

The Credit Suisse AG (Bank) parent company (Bank parent company) recorded net operating income of CHF 11,117 million in 2013, up 9% compared to CHF 10,235 million in 2012. After deduction of operating expenses totaling CHF 6,641 million, down 7% from 2012, gross operating profit was CHF 4,476 million, up CHF 1,351 million, or 43%, compared to 2012.

Depreciation of noncurrent assets of CHF 2,894 million, which included a CHF 2,092 million impairment of participating interests, decreased from CHF 3,267 million in 2012. Valuation adjustments, provisions and losses of CHF 773 million in 2013 was up CHF 247 million, or 47%, compared to 2012 and included CHF 600 million in connection with the US tax matter, including CHF 175 million in connection with the settlement with the SEC in February 2014. The resulting operating profit in 2013 was CHF 809 million, compared to an operating loss of CHF 668 million in 2012. The Bank parent company recorded net profit of CHF 1,066 million in 2013, compared to a net profit of CHF 183 million in 2012.

Net interest income of CHF 3,631 million in 2013 increased CHF 640 million, or 21%, compared to 2012. Net commission and service fee activities of CHF 5,234 million in 2013 increased CHF 179 million, or 4%, compared to 2012. The Bank parent company reported net trading income of CHF 801 million, up CHF 655 million from 2012, mainly due to trading gains in equity instruments and reduced trading losses in credit products included in other trading losses, partially offset by trading losses in interest-related instruments. Net other ordinary income was CHF 1,451 million compared to CHF 2,043 million in 2012. The decrease of CHF 592 million, or 29%, was mainly related to reduced income from the disposal of financial investments, a decrease in income received from services provided for other companies of Credit Suisse Group (Group) and lower income from participating interests.

Operating expenses of CHF 6,641 million were down CHF 469 million, or 7%, compared to 2012. Personnel expenses decreased CHF 464 million, or 9%. Property, equipment and administrative costs were stable at CHF 2,016 million. Extraordinary income in 2013 of CHF 807 million reflected realized gains from the sale of real estate of CHF 156 million, the release of replacement reserves totaling CHF 320 million and realized gains from the disposal of participating interests of CHF 230 million, mainly related to the sale of the exchange-traded funds (ETF) business to BlackRock and the sale of the equity and debt underwriting and advisory services businesses in France to Credit Suisse Securities (Europe) Ltd., a subsidiary of the Bank parent company. Other extraordinary income of CHF 101 million was substantially all related to prior periods. The losses realized on the disposal of participating interests included realized losses of CHF 218 million from the partial redemption of ordinary shares in Credit Suisse Capital (Guernsey) I Limited in December 2013, and realized losses of CHF 70 million from the repatriation and liquidation of three participating interests.

Changes in shareholder's equity included a capital contribution by the shareholder of CHF 4,468 million, of which CHF 3,578 million related to a contribution in kind of preferred shares in Credit Suisse Holdings (USA), Inc. from the Credit Suisse Group AG to the Bank parent company.

At the Annual General Meeting on May 9, 2014, the registered shareholders will be asked to approve the Board of Directors' proposed appropriation of retained earnings, which includes a dividend of CHF 10 million.

| Derivative financial instruments (CHF million) | | |
| Gross positive replacement values | 52,735 | 54,088 |
| Gross negative replacement values | 51,018 | 53,437 |
| Contract volume | 4,239,043 | 4,885,466 |

The company belongs to the Swiss value-added tax group of Credit Suisse Group, and thus carries joint liability to the Swiss Federal Tax Administration for value-added tax debts of the entire Group.

Contingent liabilities to other Bank entities include guarantees for obligations, performance-related guarantees and letters of comfort issued to third parties. Contingencies with a stated amount are included in the off-balance sheet section of the financial statements. In some instances, the Bank parent company's exposure is not defined as an amount but relates to specific circumstances such as the solvency of subsidiaries or the performance of a service.

Further, as shareholder of Credit Suisse International, an unlimited company incorporated in England and Wales, the Bank parent company has joint and several unlimited obligations to meet any insufficiency in the assets in the event of liquidation.

Notes to the financial statements

1 Description of business activities

The Bank parent company is a Swiss bank with total assets of CHF 606.4 billion and shareholder's equity of CHF 44.5 billion as of December 31, 2013.

The Bank parent company is a 100% subsidiary of Credit Suisse Group AG domiciled in Switzerland. Since November 30, 2012, the Bank parent company's business consists of two divisions, Private Banking & Wealth Management and Investment Banking:

- Private Banking & Wealth Management offers comprehensive advice and a wide range of financial solutions to private, corporate and institutional clients. The Private Banking & Wealth Management division comprises the Wealth Management Clients, Corporate & Institutional Clients and Asset Management businesses. Wealth Management Clients serves ultra-high-net-worth and high-net-worth individuals around the globe in addition to affluent and retail clients in Switzerland. Corporate

& Institutional Clients serves the needs of corporations and institutional clients, mainly in Switzerland. Asset Management offers a wide range of investment products and solutions across asset classes and for all investment styles, serving governments, institutions, corporations and individuals worldwide.

- Investment Banking offers investment banking and securities products and services to corporate, institutional and government clients around the world. Its products and services include debt and equity underwriting, sales and trading, mergers and acquisitions advice, divestitures, corporate sales, restructuring and investment research.

The two divisions are complemented by Shared Services, which provides support in the areas of finance, operations, human resources, legal and compliance, risk management and information technology.

2 Accounting and valuation policies

Basis for accounting

The Bank parent company's stand-alone financial statements are prepared in accordance with the accounting rules of the Swiss Federal Law on Banks and Savings Banks, the corresponding Implementing Ordinance and the  Swiss Financial Market Supervisory Authority FINMA (FINMA) Circular 2008/2, "Accounting – banks" (Swiss GAAP statutory).

The Bank's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the US (US GAAP), which differ in certain material respects from Swiss GAAP statutory.

► Refer to "Note 1 – Summary of significant accounting policies" in VII – Consolidated financial statements – Credit Suisse (Bank) for a detailed description of the Bank's accounting and valuation principles.

► Refer to "Note 38 – Significant valuation and income recognition differences between US GAAP and Swiss GAAP banking law (true and fair view)" in VII – Consolidated financial statements – Credit Suisse (Bank) for information on significant valuation and income recognition differences between US GAAP and Swiss GAAP banking law (true and fair view).

Additional differences between US GAAP and Swiss GAAP statutory are stated below and should be read in conjunction with Note 1 – Summary of significant accounting policies in VII – Consolidated financial statements – Credit Suisse (Bank). Certain reclassifications have been made to the prior year's financial statements to conform to the current year's presentation and had no impact on net profit or total shareholder's equity.

Foreign currency translations

Under US GAAP, foreign currency translation adjustments resulting from the consolidation of branches with functional currencies other than the Swiss franc are included in accumulated other

comprehensive income/(loss) (AOCI) in shareholders' equity. Under Swiss GAAP, foreign currency translation adjustments from the consolidation of foreign branches is recognized in trading income.

Under US GAAP, foreign currency translation adjustments for available-for-sale securities are reported in AOCI, which is part of total shareholder's equity, whereas for Swiss GAAP statutory purposes they are included in the statements of income.

Share-based compensation

Under US GAAP, share-based compensation plans are treated as equity awards. Under Swiss GAAP, such plans are treated as liability awards with changes in  fair value of unsettled awards recognized in the statements of income.

Treasury shares and derivatives on own shares

Under US GAAP, treasury shares are recognized at cost directly in equity. Under Swiss GAAP, own shares and  derivatives on own shares are recognized as assets or liabilities. Treasury shares can be classified as trading assets and marked to market through the statements of income or as financial investment carried at lower of cost or market. Derivatives on own shares are reported at fair value in other assets or other liabilities.

Derivatives used for fair value hedging

Under US GAAP, the full amount of unrealized losses on derivatives classified as hedging instruments and the corresponding gains on the hedged available-for-sale securities are recognized in income. Under Swiss GAAP, the amount representing the portion exceeding historical cost of the hedged financial investments is recorded in the compensation account.

Deferred taxes

US GAAP allows the recognition of deferred tax assets on net operating loss carry-forwards. Such recognition is not allowed for Swiss GAAP statutory purposes.

Investments in equity securities

Under US GAAP, investments in equity securities where the Bank parent company has the ability to significantly influence the operating and financial policies of an investee are accounted for under the equity method of accounting or the fair value option. Under the equity method of accounting, the Bank parent company's share of the profit or loss, as well as any impairment on the investee, if applicable, are reported in other revenues. Under Swiss GAAP, neither the equity method of accounting nor the fair value option is allowed for such investments. Investments in equity securities that are held with the intention of a permanent investment are recorded as participating interests irrespective of the percentage ownership of voting shares held. Equity securities held for trading purposes that meet the criteria for trading positions are recorded in the trading portfolio at fair value. Equity securities that are not held for permanent investment purposes and do not qualify as trading portfolio positions are recorded as financial investments at lower of cost or market.

Participating interests

Participating interests are initially recognized at cost. For the purpose of testing the Bank parent company's participating interests for impairment, the portfolio method is applied. An impairment is recorded if the carrying value of a portfolio of participating interests exceeds its fair value.

Notes on risk management

► Refer to "Note 8 – Trading revenues" and "Note 30 – Derivatives and hedging activities" in VII – Consolidated financial statements – Credit Suisse (Bank) for information on the Bank parent company's policy with regard to risk management and the use of financial derivatives.

Subsequent events

On February 25, 2014, the Bank parent company transferred assets and liabilities of CHF 242 million and CHF 238 million, respectively, relating to its US cross-border business for no consideration to CS International Advisors AG, a wholly owned Swiss subsidiary of the Bank parent company incorporated in December 2013. CS International Advisors AG is a Swiss bank.

On March 18, 2014, a second tranche of ordinary shares in Credit Suisse Capital (Guernsey) I Limited held by the Bank parent company was redeemed at par value resulting in a factual liquidation of the participation. On March 21, 2014, additional liquidation proceeds of CHF 40 million were distributed to the Bank parent company. The net impact of this factual liquidation on the Bank parent company's pre-tax income was a loss of CHF 236 million, which will be recorded in 2014.

On April 3, 2014, Credit Suisse Group AG announced that its previously reported 2013 results were updated to reflect additional litigation provisions in connection with the US tax matter. The impact of those additional provisions were also reflected in the Bank parent company's 2013 results.

► Refer to "Note 3 – Business developments and subsequent events" in VII – Consolidated financial statements – Credit Suisse (Bank) for further information on the US tax matter.

3 Additional information on the parent company statements of income

| in | 2013 | 2012 |
|---|--------------------|--------------------|
| Net trading income (CHF million) | | |
| Income from trading in interest-related instruments | (323) | 771 |
| Income/(loss) from trading in equity instruments | 377 | (527) |
| Income from foreign exchange and banknote trading | 1,061 | 1,002 |

| Fair value of securities received under securities lending and borrowing and reverse repurchase agreements with the right to resell or repledge | 46,402 | 73,486 |
| of which resold or repledged | 26,150 | 35,491 |

7 Balance sheet items that include issued structured products at fair value

| | 2013 | | 2012 | |
|--|------------------|---------------------------------|------------------|---------------------------------|
| end of | Total book value | Of which reported at fair value | Total book value | Of which reported at fair value |
| Balance sheet items that include issued structured products at fair value (CHF million) | | | | |
| Liabilities from money market instruments | 54,544 | 5,568 | 35,260 | 4,916 |
| Bonds and mortgage-backed bonds | 89,348 | 11,257 | 107,573 | 11,801 |
| Total | 143,892 | 16,825 | 142,833 | 16,717 |

8 Liabilities due to own pension plans

Liabilities due to the Bank parent company's own pension plans as of December 31, 2013 and 2012 of CHF 2,841 million and CHF 2,553 million, respectively, are reflected in various liability accounts in the Bank parent company's balance sheet.

► Refer to "Note 29 – Pension and other post-retirement benefits" in VII – Consolidated financial statements – Credit Suisse (Bank) for further information.

Swiss pension plan

The Bank parent company's employees are covered by the pension plan of the "Pensionskasse der Credit Suisse Group AG (Schweiz)" (the Swiss pension plan). All Swiss subsidiaries of Credit Suisse Group AG participate in this plan. The Swiss pension plan is an independent self-insured pension plan set up as a trust and qualifies as a defined contribution plan (savings plan) under Swiss law.

As of January 1, 2013, all covered active employees, which previously were insured in the annuity section of the pension plan, were converted to the savings section. The impact from this conversion was recognized by the Bank parent company upon announcement of this plan amendment in 2011. The annuity section of the plan has ceased accruing new benefits.

The Swiss pension plan's annual financial statements are prepared in accordance with Swiss GAAP FER 26 based on the

full population of covered employees. Individual annual financial statements for each participating company are not prepared. As a multi-employer plan with unrestricted joint liability for all participating companies, the economic interest in the Swiss pension plan's over- or underfunding is allocated to each participating company based on an allocation key determined by the plan.

Pension plan economic benefit/(obligation), pension contributions accrued and pension expenses

| end of / in | Bank parent company's share in over/(under)-funding ¹ | Economic benefit/(obligation) recorded by Bank parent company ² | | | Pension contributions – accrued liabilities | Pension expenses included in personnel expenses ³ | |
|----------------------------------|--|--|------|--------|---|--|------|
| | 2013 | 2013 | 2012 | Change | 2013 | 2013 | 2012 |
| CHF million | | | | | | | |
| Pension plan – status overfunded | 1,453 | – | – | – | 37 | 412 | 465 |

¹ Represents the Bank parent company's share of 93.89% in the total overfunding of the Swiss pension plan of CHF 1,548 million.

² In line with Swiss GAAP statutory accounting guidance, the Bank parent company's economic benefit from its share in the overfunding of the Swiss pension plan is not recorded in the Bank parent company's statutory balance sheet.

³ Includes a release of employer contribution reserves of CHF 51 million and CHF 142 million in 2013 and 2012, respectively, which were established in 2011 in the context of headcount reductions and the plan amendment announced.

As of December 31, 2013 and 2012, the Bank parent company had an employer contribution reserve of CHF 43 million and CHF 94 million, respectively, of which CHF 12 million and CHF 19 million, respectively, were dedicated to specific events, such as

early retirements, and subject to a waiver by the Bank parent company. In line with Swiss GAAP statutory accounting guidance, contributions to the employer contribution reserves are not recorded in the Bank parent company's statutory balance sheet.

9 Valuation adjustments and provisions

| | Total 2012 | Utilized for purpose | Recoveries, endangered interest, currency differences | New charges to income statement | Releases to income statement | Total 2013 |
|---|--------------|----------------------|---|---------------------------------|------------------------------|--------------|
| Valuation adjustments and provisions (CHF million) | | | | | | |
| Provisions for deferred taxes | 102 | 0 | 1 | 11 | (54) | 60 |
| Valuation adjustments and provisions for default risks | 1,090 | (205) | 73 | 274 | (256) | 976 |
| Valuation adjustments and provisions for other business risks ¹ | 36 | (16) | 2 | 121 | (6) | 137 |
| Other provisions ^{2, 3} | 890 | (16) | (25) | 737 | (432) ⁴ | 1,154 |
| Subtotal | 2,016 | (237) | 50 | 1,132 | (694) | 2,267 |
| Total valuation adjustments and provisions | 2,118 | (237) | 51 | 1,143 | (748) | 2,327 |
| Less direct charge-offs against specific assets | (1,090) | | | | | (976) |
| Total valuation adjustments and provisions as shown in the balance sheet | 1,028 | | | | | 1,351 |

¹ Provisions are not discounted due to their short-term nature.

² Includes provisions in respect of litigation claims of CHF 961 million and CHF 370 million as of December 31, 2013 and 2012, respectively.

³ Includes provisions for pension benefit obligations from international plans of CHF 2 million and CHF 4 million as of December 31, 2013 and 2012, respectively.

⁴ Includes a release of replacement reserves of CHF 320 million.

10 Composition of share and participation capital, conditional, conversion and reserve capital

| end of | 2013 | | | 2012 | | |
|--|---------------|---------------------------------------|--|------------|---------------------------------------|--|
| | Quantity | Total nominal value in CHF million | | Quantity | Total nominal value in CHF million | |
| Share and participation capital | | | | | | |
| Registered shares ¹ | 4,399,665,200 | 4,400 ² | | 43,996,652 | 4,400 ² | |
| Participation securities (at CHF 0.01 par value per share) ³ | 1,500,000 | 0 ⁴ | | 1,500,000 | 0 ⁴ | |
| Total share and participation capital | | 4,400 | | | 4,400 | |
| Conditional, conversion and reserve capital | | | | | | |
| Conditional capital (at CHF 100 par value per share) ⁵ | — | — | | 20,000,000 | 2,000 | |
| of which used for capital increases | — | — | | 0 | 0 | |
| Unlimited conversion capital (at CHF 1 par value per share) ⁶ | unlimited | unlimited | | — | — | |
| of which used for capital increases | 0 | 0 | | — | — | |
| of which reserved for capital instruments outstanding | 0 | 0 | | — | — | |
| Reserve capital (at CHF 1 par value per share) ⁷ | 4,399,665,200 | 4,400 | | — | — | |
| of which used for capital increases | 0 | 0 | | — | — | |
| of which reserved for planned capital increases | 0 | 0 | | — | — | |

¹ The increase in the number of shares reflects the split of the par value per share from CHF 100 to CHF 1 effective November 19, 2013.

² The dividend eligible capital equals the total nominal value. As of December 31, 2013 and 2012, the total nominal value of registered shares was CHF 4,399,665,200. Refer to footnotes 3 and 4 for the conversion of participation securities of Class A into registered shares.

³ For information on principal characteristics of participation securities, refer to Articles 4a, 4b and 4c in the Articles of Association of Credit Suisse AG. On December 27, 2013, the holders of Class A participation securities irrevocably waived their preference rights and agreed to a conversion of the 750,000 Class A participation securities into 7,500 registered shares of Credit Suisse AG. On the same date, the Articles of Association of Credit Suisse AG were amended accordingly. The waiver of preference rights became effective on December 27, 2013 and conversion into registered shares became effective with the entry in the Commercial Register of the Canton of Zurich on January 16, 2014.

⁴ The dividend eligible capital equals the total nominal value. As of December 31, 2013 and 2012, the total nominal value of participation securities was CHF 15,000. On December 27, 2013, the shareholder of Credit Suisse AG amended the Articles of Association to convert the Class A participation securities into registered shares of Credit Suisse AG. Following effectiveness of conversion (see footnote 3), only a total nominal value of participation securities of CHF 7,500 is entitled to dividends while a nominal value of CHF 7,500 that was converted into registered shares is entitled to dividends as registered shares.

⁵ With the amendment of Article 4d of the Articles of Association of Credit Suisse AG effective November 19, 2013, the conditional capital was cancelled.

⁶ For information on principal characteristics of unlimited conversion capital, refer to Article 4d in the Articles of Association of Credit Suisse AG.

⁷ For information on principal characteristics of reserve capital, refer to Article 4e in the Articles of Association of Credit Suisse AG.

11 Major shareholders and groups of shareholders

Net interest income and interest rate spread

| in | 2013 | | 2012 | | 2011 | |
|---|------------------------------------|---------------------------|------------------------------------|---------------------------|------------------------------------|---------------------------|
| | Net interest income in CHF million | Interest rate spread in % | Net interest income in CHF million | Interest rate spread in % | Net interest income in CHF million | Interest rate spread in % |
| Net interest income and interest rate spread | | | | | | |
| Switzerland | 2,116 | 1.50 | 2,129 | 1.60 | 2,262 | 1.50 |
| Foreign | 5,999 | 0.60 | 5,014 | 0.40 | 4,164 | 0.50 |
| Total net | 8,115 | 1.00 | 7,143 | 0.80 | 6,426 | 0.70 |

The average rates earned and paid on related assets and liabilities can fluctuate within wide ranges and are influenced by several key factors. The most significant factor is changes in global interest rates. Additional factors include changes in the geographic

and product mix of the Group's business, and foreign exchange rate movements between the Swiss franc and the currency of the underlying individual assets and liabilities.

Selected margin information

| in | 2013 | 2012 | 2011 |
|---|------|------|------|
| Selected margin information (average rate in %) | | | |
| Switzerland | 1.35 | 1.37 | 1.46 |
| Foreign | 0.92 | 0.67 | 0.57 |
| Net interest margin | 1.01 | 0.79 | 0.72 |

The US Federal Reserve set the federal funds rate, which was a target band of 0.00% to 0.25% throughout 2013.

The Swiss National Bank set the three-month Swiss franc London Interbank Offered Rate, which was 0.0% to 0.25% throughout 2013.

The European Central Bank set the fixed rate tenders, which stood at 0.25% at the end of 2013.

The Bank of England set the bank rate at 0.50% in early 2009 and it remained at this level throughout 2013.

Analysis of changes in net interest income

Carrying value of financial investments

| end of | 2013 | 2012 | 2011 |
|--|--------------|--------------|--------------|
| Carrying value of financial investments (CHF million) | | | |
| Debt securities issued by Swiss federal, cantonal or local governmental entities | 402 | 483 | 348 |
| Debt securities issued by foreign governments | 1,388 | 1,605 | 3,322 |
| Corporate debt securities | 606 | 845 | 791 |
| Collateralized debt obligations | 490 | 470 | 607 |
| Total debt securities | 2,886 | 3,403 | 5,068 |

As of December 31, 2012, no aggregate investment in debt securities of a specific counterparty was in excess of 10% of consolidated shareholders' equity.

Maturities and weighted-average yields of debt securities included in financial investments

| | Within 1 year | | 1 to 5 years | | 5 to 10 years | | Over 10 years | | Total | |
|--|--------------------------------|---------------|--------------------------------|---------------|--------------------------------|---------------|--------------------------------|---------------|--------------------------------|---------------|
| | Amount in CHF million | Yield in % | Amount in CHF million | Yield in % | Amount in CHF million | Yield in % | Amount in CHF million | Yield in % | Amount in CHF million | Yield in % |
| end of 2013 | | | | | | | | | | |
| Debt securities | | | | | | | | | | |
| Debt securities issued by the Swiss federal, cantonal or local governmental entities | 18 | 2.39 | 92 | 2.28 | 210 | 1.83 | 69 | 1.45 | 389 | 1.90 |
| Debt securities issued by foreign governments | 134 | 3.22 | 1,156 | 2.02 | 40 | 3.15 | 20 | 1.47 | 1,350 | 2.16 |
| Corporate debt securities | 341 | 0.60 | 224 | 3.07 | 25 | 2.38 | 0 | n/a | 590 | 1.61 |
| Collateralized debt obligations | 50 | 1.94 | 230 | 1.56 | 200 | 2.21 | 0 | n/a | 480 | 1.87 |
| Total debt securities | 543 | 1.43 | 1,702 | 2.11 | 475 | 2.13 | 89 | 1.46 | 2,809 | 1.96 |

Since substantially all investment securities are taxable securities, the yields presented above are on a tax-equivalent basis.

The values above are based upon amortized cost, whereas certain financial investments are carried at fair value in the consolidated balance sheets.

Cross-border outstandings represent net claims against non-local country counterparties for countries where the aggregate amount outstanding to borrowers exceeds 0.75% of total assets. Monetary assets are loans (including accrued interest), acceptances, interest-bearing deposits with other banks, other interest-bearing investments and any other monetary asset with a fixed exchange value for cash. To the extent local currency outstandings are hedged or funded by local currency borrowings, such amounts are excluded from cross-border outstandings.

Balances shown are the Swiss franc equivalent of amounts greater than USD 100,000 together with their remaining maturities.

Selected information on short-term borrowings

| in | 2013 | 2012 | 2011 |
|--|---------|---------|---------|
| Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions (CHF million) | | | |
| Outstanding as of December 31 | 94,032 | 132,721 | 176,559 |
| Maximum amount outstanding at any month-end during the year | 150,092 | 219,447 | 176,559 |
| Approximate average amount outstanding during the year | 112,475 | 181,758 | 156,472 |
| Interest expense for the year ended December 31 | 1,156 | 1,677 | 1,621 |
| Approximate weighted-average interest rate during the year | 1.0% | 0.9% | 1.0% |
| Approximate weighted-average interest rate at year-end | 0.6% | 0.7% | 0.8% |
| Commercial paper (CHF million) | | | |
| Outstanding as of December 31 | 12,095 | 10,882 | 21,444 |
| Maximum amount outstanding at any month-end during the year | 16,967 | 18,144 | 21,444 |
| Approximate average amount outstanding during the year | 14,555 | 13,876 | 16,232 |
| Interest expense for the year ended December 31 | 52 | 54 | 52 |
| Approximate weighted-average interest rate during the year | 0.4% | 0.4% | 0.3% |
| Approximate weighted-average interest rate at year-end | 0.3% | 0.3% | 0.4% |
| Other short-term borrowings (CHF million) | | | |
| Outstanding as of December 31 | 8,097 | 7,759 | 4,671 |
| Maximum amount outstanding at any month-end during the year | 9,861 | 9,444 | 9,218 |
| Approximate average amount outstanding during the year | 6,926 | 9,224 | 8,004 |
| Interest expense for the year ended December 31 | 80 | 130 | 17 |
| Approximate weighted-average interest rate during the year | 1.2% | 1.4% | 0.2% |
| Approximate weighted-average interest rate at year-end | 1.2% | 1.7% | 1.2% |

Generally, original maturities of central bank funds purchased, securities sold under repurchase agreements and securities lending transactions are less than six months, commercial paper are less than six months and other short-term borrowings are one year or less.

STATISTICAL INFORMATION – BANK

Statistical information for the Group is required under the SEC's specialized industry guide for bank holding companies – Industry Guide 3. Certain statistical information is also included in VII – Consolidated financial statements – Credit Suisse (Bank), including Notes 6 – Net interest income, 15 – Investment securities, 17 – Loans, allowance for loan losses and credit quality, 22 – Deposits, 23 – Long-term debt, 30 – Derivatives and hedging activities, 31 – Guarantees and commitments and 33 – Financial instruments. Except to the extent described below, such statistical information for the Bank is not materially different, either in absolute amount or in terms of trends, from such statistical information for the Group. The principal differences described below relate to the banking businesses of the Group that are not included in the Bank's consolidated financial statements and intercompany eliminations.

The short-term borrowings of the Bank and the Group may differ from period to period. As of December 31, 2013, 2012 and 2011, the Bank had short-term borrowings of CHF 20.2 billion, CHF 14.8 billion and CHF 26.1 billion compared to short-term borrowings of CHF 20.2 billion, CHF 18.6 billion and CHF 26.1 billion at the Group, respectively. The lower level of short-term borrowings at the Bank compared to the Group at year-end 2012 was related to the mandatory and contingent convertible securities issued by the Group.

In addition, certain elements of the Group's and the Bank's investment portfolio may differ from period to period. As of December 31, 2013, the carrying value of the Group's debt securities was CHF 2.9 billion compared to CHF 1.5 billion for the Bank. The higher value of debt securities at the Group compared to the Bank primarily related to debt securities issued by Swiss federal, cantonal or local governmental entities, foreign governments and corporates, and collateralized debt obligations held by Neue Aargauer Bank, principally for liquidity management purposes.

The Bank's loan portfolio constitutes substantially all of the Group's consolidated loan portfolio. As of December 31, 2013, 2012 and 2011, the Bank's total loans were CHF 231.2 billion, CHF 227.5 billion and CHF 219.4 billion or 93.6%, 93.9% and 94.0% of the Group's total loans of CHF 247.1 billion, CHF 242.2 billion and CHF 233.4 billion, respectively. Differences between the Bank and the Group in the composition and maturity profile of the loan portfolio, allowance for loan losses, write-offs and impaired loans as of December 31, 2013, December 31, 2012 and December 31, 2011 principally related to Neue Aargauer Bank and BANK-now, primarily in the Swiss consumer segment.

► Refer to "Note 17 – Loans, allowance for loan losses and credit quality" in VII – Consolidated financial statements – Credit Suisse (Bank) for additional information on the Bank's loan portfolio and related allowances.

Other information

EXCHANGE CONTROLS

There are no restrictions presently in force under our Articles of Association or Swiss law that limit the right of non-resident or foreign owners to hold our securities freely or, when entitled, to vote their securities freely. The Swiss federal government may from time to time impose sanctions, including exchange control restrictions, on particular countries, regimes, organizations or persons. A current list, in German, of such sanctions can be found at www.seco-admin.ch. Other than these sanctions, there are currently no Swiss exchange control laws or laws restricting the import or export of capital, including, but not limited to, the remittance of dividends, interest or other payments to non-resident holders of our securities.

AMERICAN DEPOSITARY SHARES

Under Swiss law, holders of  American Depositary Shares (ADS) are not shareholders and are not recorded in our share register. A nominee for the ADS depositary is the registered holder of the shares underlying the ADS. Rights of ADS holders to exercise voting rights, receive dividends and other matters are governed by the deposit agreement pursuant to which the ADS are issued. For further information relating to our ADS, see the Registration Statement on Form F-6 filed with the SEC. Subject to any applicable law to the contrary, with respect to ADS for which timely voting instructions are not received by the ADS depositary in relation to any proposed resolution or for which voting instructions are received by the ADS depositary but do not specify how the ADS depositary shall vote in relation to any proposed resolution, the ADS depositary shall, or shall instruct the nominee to, vote such shares underlying the ADS in favor of such resolution if it has been proposed by the Board of Directors or otherwise in accordance with the recommendation of the Board of Directors.

TAXATION

The following summary contains a description of the principal Swiss and US federal income tax consequences of the purchase, ownership and disposition of our shares or ADS (Shares), but it does not purport to be a comprehensive description of all of the tax considerations that may be relevant to a decision to own or dispose of Shares. In particular, the summary is directed only to holders that hold Shares as capital assets and does not address tax considerations applicable to investors that may be subject to special tax rules, such as banks, tax-exempt entities, insurance companies, dealers in securities or currencies, traders in securities electing to mark to market, persons that actually or constructively own 10% or more of our voting stock, persons that hold Shares as a position in a “straddle” or “conversion” transaction, or as part of a “synthetic security” or other integrated financial transaction, or persons that have a “functional currency” other than the Swiss franc or US dollar.

This summary is based on the current tax laws of Switzerland and the US, including the current “Convention Between the United States of America and the Swiss Confederation for the Avoidance of Double Taxation with Respect to Taxes on Income” (Treaty), the US Internal Revenue Code of 1986, as amended (IR Code), existing and proposed regulations thereunder, published rulings and court decisions, all of which are subject to change, possibly with retroactive effect.

This discussion does not generally address any aspects of US taxation other than federal income taxation or any aspects of Swiss taxation other than income and capital taxation. Prospective investors are urged to consult their tax advisors regarding the US federal, state and local, Swiss and other tax consequences of owning and disposing of Shares.

Swiss taxation

Withholding tax on dividends and similar distributions

Dividends paid and other similar cash, in-kind taxable distributions made by us to a holder of Shares (including stock dividends) and taxable income resulting from partial liquidation as referred to below under “Capital gains tax realized on Shares” are subject to a federal withholding tax at a rate of 35%. The withholding tax will be withheld by us on the gross distributions and will be paid to the Swiss Federal Tax Administration. The repayment of nominal value of the Shares or repayment of capital contribution reserves (Kapitaleinlagen) is not subject to Swiss withholding tax.

Swiss recipients

Swiss resident individuals are generally entitled to a full refund or tax credit for the withholding tax if they are the beneficial owners of such distributions at the time the distribution is due and duly report the receipt thereof in the relevant Swiss income tax return. Swiss resident legal entities are generally entitled to a full refund for the withholding tax if they are the beneficial owners of such distributions at the time the distribution is due and duly book it as revenue in their profit and loss statement.

Non-resident recipients

The recipient of a taxable distribution who is an individual or a legal entity not resident in Switzerland for tax purposes may be entitled to a total or partial refund of the withholding tax if the country in which such recipient resides for tax purposes has entered into a bilateral treaty for the avoidance of double taxation with Switzerland and the further conditions of such treaty are met. Holders of Shares not resident in Switzerland should be aware that the procedures for claiming treaty benefits (and the time frame required for obtaining a refund) may differ from country to country. Holders of Shares not resident in Switzerland should consult their own legal, financial or tax advisors regarding receipt, ownership, purchases, sales or other dispositions of Shares and the procedures for claiming a refund of the withholding tax.

Residents of the US

A non-Swiss resident holder who is a resident of the US for purposes of the Treaty is eligible for a reduced rate of withholding tax on dividends equal to 15% of the dividend, provided that such holder: (i) qualifies for benefits under the Treaty; (ii) holds, directly or indirectly, less than 10% of our voting stock; and (iii) does not conduct business through a permanent establishment or fixed base in Switzerland to which Shares are attributable. Such an eligible US holder may apply for a refund of the amount of the withholding tax in excess of the 15% Treaty rate. The claim for refund must be filed on Swiss Tax Form 82 (82C for corporations; 82I for individuals; 82E for other entities), which may be obtained from any Swiss consulate general in the US or from the Federal Tax Administration of Switzerland at the address below, together with an instruction form. Four copies of the form must be duly completed, signed before a notary public of the US and sent to the Federal Tax Administration of Switzerland, Eigerstrasse 65, CH-3003, Bern, Switzerland. The form must be accompanied by suitable evidence of deduction of Swiss tax withheld at source, such as certificates of deduction, signed bank vouchers or credit slips. The form may be filed no later than December 31 of the third year following the calendar year in which the dividend became payable.

Income and profit tax on dividends and similar distributions

Individuals

An individual who is a Swiss resident for tax purposes, or who is a non-Swiss resident holding Shares as part of a Swiss business operation or Swiss permanent establishment, is required to report the receipt of taxable distributions received on the Shares in her or his relevant Swiss tax returns. An exemption from income tax applies with regard to distributions out of capital contribution reserves (Kapitaleinlagen).

Legal entities

Legal entities resident in Switzerland and non-Swiss resident legal entities holding Shares as part of a Swiss permanent establishment are required to include taxable distributions (including capital repayments or distributions out of capital contribution reserves) received on the Shares in their income subject to Swiss corporate income tax. A Swiss corporation or co-operative or a non-Swiss corporation or co-operative holding Shares as part of a Swiss permanent establishment may, under certain circumstances, benefit from relief from taxation with respect to taxable distributions (Beteiligungsabzug).

Non-resident recipients

Recipients of dividends and similar distributions on Shares who are neither residents of Switzerland for tax purposes nor holders of Shares as part of a Swiss business operation or a Swiss permanent establishment are not subject to Swiss income tax in respect of such distributions.

Capital gains tax realized on Shares

Individuals

Swiss resident individuals who hold Shares as part of their private property generally are exempt from Swiss federal, cantonal and communal taxes with respect to capital gains realized upon the sale or other disposal of Shares, unless such individuals are qualified as security trading professionals for income tax purposes. Gains realized upon a repurchase of Shares by us for the purpose of a capital reduction are characterized as a partial liquidation of the company. In this case, the difference between the nominal value and the distributed capital contribution, if any, of the shares and their repurchase price qualifies as taxable income to Swiss resident individuals holding Shares as part of their private property. Individuals who are Swiss residents for tax purposes and who hold the Shares as business assets (including security trading professionals for income tax purposes), or who are non-Swiss residents holding Shares as part of a Swiss business operation or Swiss permanent establishment, are required to include capital gains realized upon the disposal of Shares in their income subject to Swiss income tax.

Legal entities

Legal entities resident in Switzerland or non-Swiss resident legal entities holding Shares as part of a Swiss permanent establishment are required to include capital gains realized upon the disposal of Shares in their income subject to Swiss corporate income tax.

Non-resident individuals and legal entities

Individuals and legal entities which are not resident in Switzerland for tax purposes and do not hold Shares as part of a Swiss business operation or a Swiss permanent establishment are not subject to Swiss income tax on gains realized upon the disposal of the Shares.

Net worth and capital taxes

Individuals

Individuals who are Swiss residents for tax purposes or who are non-Swiss residents holding Shares as part of a Swiss business operation or Swiss permanent establishment are required to include their Shares in their assets that are subject to cantonal and communal net worth taxes.

Legal entities

Legal entities resident in Switzerland or non-Swiss resident legal entities holding Shares as part of a Swiss permanent establishment are required to include their Shares in their assets that are subject to cantonal and communal capital tax. In some cantons profit tax credits might be available for offsetting with the annual cantonal and communal capital tax.

Non-resident individuals and legal entities

Individuals and legal entities which are not resident in Switzerland for tax purposes and do not hold Shares as part of a Swiss

business operation or a Swiss permanent establishment are not subject to Swiss cantonal and communal net worth and capital taxes.

Stamp duties upon transfer of securities

The transfer of Shares, whether by Swiss residents or non-resident holders, may be subject to a Swiss securities transfer duty of 0.15% (0.075% for each party to a transaction) of the transaction value if the transfer occurs through or with a Swiss bank or other Swiss or foreign securities dealer as defined in the Swiss Federal Stamp Duty Act. Newly issued shares distributed by way of a stock or scrip dividend are not subject to the Swiss securities transfer duty. The stamp duty is paid by the securities dealer and may be charged to the parties in a taxable transaction who are not securities dealers. In addition to this stamp duty, the sale of Shares by or through a member of the SIX Swiss Exchange (SIX) may be subject to a minor SIX levy on the sale proceeds (this levy also includes the  Swiss Financial Market Supervisory Authority FINMA (FINMA) surcharge).

Final foreign withholding taxes

On January 1, 2013, bilateral tax agreements between Switzerland and the United Kingdom and between Switzerland and Austria entered into force. The agreements, among other things, require a Swiss paying agent to levy a non-refundable (final) tax at specified rates in respect of an individual resident in the United Kingdom or in Austria, as applicable, on interest, dividends or capital gain paid, or credited to an account, relating to the Shares. The final withholding tax substitutes the United Kingdom or Austrian income tax, as applicable, on such interest, dividends or capital gain. Such a person may, however, opt for voluntary disclosure of the interest, dividends or capital gain to the tax authority of his or her country of residency rather than be subject to the final withholding tax specified in the agreements. Switzerland may conclude similar treaties with other European countries.

US federal income tax

For purposes of this discussion, a "US Holder" is any beneficial owner of Shares that is: (i) a citizen or resident of the US; (ii) a corporation organized under the laws of the US or any political subdivision thereof; or (iii) any other person that is subject to US federal income tax on a net income basis in respect of Shares. A "Non-US Holder" is any beneficial owner of Shares that is a foreign corporation or non-resident alien individual.

Taxation of dividends

US Holders

For US federal income tax purposes, a US Holder will be required to include the full amount (before reduction for Swiss withholding tax) of a dividend paid with respect to Shares, generally as ordinary income. Subject to certain exceptions for short-term and hedged positions, the US dollar amount of dividends received by an individual with respect to our Shares will be subject to taxation at a

maximum rate of 20% if the dividends are "qualified dividends". Dividends paid on the Shares will be treated as qualified dividends if we were not, in the year prior to the year in which the dividend was paid, and are not, in the year in which the dividend is paid, a passive foreign investment company (PFIC). Based on our audited consolidated financial statements, we believe that the Group was not treated as a PFIC for US federal income tax purposes with respect to our 2012 or 2013 taxable years. In addition, based on the audited consolidated financial statements of the Group and our current expectations regarding the value and nature of our assets and the sources and nature of our income, we do not anticipate the Group becoming a PFIC for the 2014 taxable year. Holders of our Shares should consult their own tax advisors regarding the availability of the reduced dividend tax rate in light of the considerations discussed above and their own particular circumstances. For this purpose, a "dividend" will include any distribution paid by us with respect to Shares, but only to the extent such distribution is not in excess of our current and accumulated earnings and profits as defined for US federal income tax purposes. Such dividend will constitute income from sources outside of the US. Subject to the limitations and conditions provided in the IR Code, a US Holder may deduct from its US federal taxable income, or claim as a credit against its US federal income tax liability, the Swiss withholding tax withheld. Under the IR Code, dividend payments by us on Shares are not eligible for the dividends received deduction generally allowed to corporate shareholders. Any distribution that exceeds our earnings and profits will be treated as a non-taxable return of capital to the extent of the US Holder's tax basis in Shares and thereafter as capital gain.

In general, a US Holder will be required to determine the amount of any dividend paid in Swiss francs by translating the Swiss francs into US dollars at the "spot rate" of exchange on the date of receipt. The tax basis of Swiss francs received by the US Holder generally will equal the US dollar equivalent of such Swiss francs, translated at the spot rate of exchange on the date such Swiss franc dividends are received. Upon a subsequent exchange of such Swiss francs for US dollars, or upon the use of such Swiss francs to purchase property, a US Holder will generally recognize ordinary income or loss in the amount equal to the difference between such US Holder's tax basis for the Swiss francs and the US dollars received or, if property is received, the fair market value of the property. In addition, a US Holder may be required to recognize domestic-source foreign currency gain or loss on the receipt of a refund in respect of Swiss withholding tax to the extent the US dollar value of the refund differs from the US dollar equivalent of the amount on the date of receipt of the underlying dividend.

Non-US Holders

Dividends paid to a Non-US Holder in respect of Shares will generally not be subject to US federal income tax unless such dividends are effectively connected with the conduct of a trade or business within the US by such Non-US Holder.

Capital gains tax upon disposal of shares

US Holders

A gain or loss realized by a US Holder on the sale or other disposition of Shares will be subject to US federal income taxation as a capital gain or loss in an amount equal to the difference between the US Holder's basis in Shares and the amount realized on the disposition. Such gain or loss will generally be a long-term capital gain or loss if the US Holder holds the Shares for more than one year. A long-term capital gain realized by a US Holder that is an individual generally is subject to taxation at reduced rates.

Non-US Holders

A Non-US Holder will generally not be subject to US federal income tax in respect of gains realized on a sale or other disposition of Shares unless the gain is effectively connected with a trade or business of the Non-US Holder in the US.

Backup withholding tax and information reporting requirements

Dividends paid on, and proceeds from the sale or other disposition of, Shares paid to a US Holder generally may be subject to the information reporting requirements of the IR Code and may be subject to backup withholding unless the holder: (i) establishes that it is a corporation or other exempt holder; or (ii) provides an accurate taxpayer identification number on a properly completed US Internal Revenue Service (IRS) Form W-9 and certifies that no loss of exemption from backup withholding has occurred. The amount of any backup withholding from a payment to a holder will be allowed as a credit against the US Holder's US federal income tax liability and may entitle such holder to a refund, provided that certain required information is furnished to the IRS.

A Non-US Holder may be required to comply with certification and identification procedures in order to establish its exemption from information reporting and backup withholding.

LISTING DETAILS

Credit Suisse Group's shares are listed on the SIX under the symbol "CSGN". The Group's ADS are traded on the New York Stock Exchange under the symbol "CS".

The Group's shares are in registered form with a par value of CHF 0.04 per share.

TRADING IN OUR OWN SHARES

The Group buys and sells its own shares and derivatives on its own shares within its normal trading and market-making activities mainly through its Swiss broker-dealer operations. In the Swiss market, the Group buys and sells its shares and derivatives on these shares to facilitate customer orders, to provide liquidity as a market maker and to hedge derivative instruments.

The net long or short position held by the Group's Swiss bank subsidiaries in the Group's own shares has been at non-material levels relative to the number of the Group's outstanding shares, due in part to FINMA regulations requiring a 100% capital charge to the relevant legal entity for the entire net position in the Group's shares. In addition to FINMA rules, the Group's trading in its own shares in the Swiss market is subject to regulation under the Swiss Federal Act on Stock Exchanges and Securities Trading, the rules of the SIX and the European Exchange electronic exchange, and the Swiss Bankers Association Code of Conduct for Securities Dealers. Trading is also limited by the Group's risk management limits, internal capital allocation rules, balance sheet requirements, counterparty restrictions and other internal regulations and guidelines. Swiss law further limits the Group's ability to hold or repurchase its own shares.

The Group may from time to time place orders for its own shares to satisfy obligations under various employee and management incentive share plans, and potentially for shares to be used as payment in acquisitions. In addition, the Group may purchase shares with the intent of cancellation. Typically in Switzerland, the purchase of shares for cancellation is done under a separate program from the repurchase of shares to be re-issued under employee and management incentive share plans.

► Refer to "Share repurchases" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management – Additional information for further information on trading in the Group's shares and shares repurchases.

PROPERTY AND EQUIPMENT

Our principal executive offices, which we own, are located at Paradeplatz 8, Zurich, Switzerland. As of the end of 2013, we maintained 509 offices and branches worldwide, of which approximately 63% were located in Switzerland.

As of the end of 2013, approximately 27% of our worldwide offices and branches were owned directly by us, with the remainder being held under commercial leases, 56% of which expire after 2018. The book value of the ten largest owned properties

was approximately CHF 1.0 billion as of the end of 2013. Some of our principal facilities are subject to mortgages and other security interests granted to secure indebtedness to certain financial institutions. As of the end of 2013, the total amount of indebtedness secured by these facilities was not material to us.

We believe that our current facilities are adequate for existing operations. Management regularly evaluates our operating facilities for suitability, market presence, renovation and maintenance.

Glossary

A

Advanced execution services® (AES®) AES® is a suite of algorithmic trading strategies, tools, and analytics operated by Credit Suisse to facilitate global equity trading. By employing algorithms to execute client orders and limit volatility, AES® helps institutions and hedge funds reduce market impact. AES® provides access to exchanges in more than 35 countries worldwide via more than 45 leading trading platforms.

Advanced internal ratings-based approach (A-IRB) Under the A-IRB approach, risk weights are determined by using internal risk parameters. We have received approval from FINMA to use, and have fully implemented, the A-IRB approach whereby we provide our own estimates for probability of default (PD), loss given default (LGD) and exposure at default (EAD). We use the A-IRB approach to determine our institutional credit risk and most of our retail credit risk.

Advanced measurement approach (AMA) The AMA is used for measuring operational risk. The methodology is based upon the identification of a number of key risk scenarios that describe the major operational risks we face. Groups of senior staff review each scenario and discuss the likelihood of occurrence and the potential severity of loss. Internal and external loss data, along with certain business environment and internal control factors, such as self-assessment results and key risk indicators, are considered as part of this process. Based on the output from these meetings, we enter the scenario parameters into an operational risk model that generates a loss distribution from which the level of capital required to cover operational risk is determined. We have received approval from FINMA to use an internal model for the calculation of operational risk capital, which is aligned with the requirements of the AMA under the Basel framework.

Affluent and retail clients We define affluent and retail clients as individuals having assets under management below CHF 1 million.

American Depositary Shares (ADS) An American depositary receipt is a negotiable certificate evidencing an ADS, issued by a depositary bank, that represents all or part of an underlying share of a foreign-based company held in custody.

B

Backtesting Backtesting is a process used to evaluate the performance of VaR models. It consists of a comparison between actual trading revenues and 1-day, 99% VaR. Regulators also use backtesting to evaluate model performance. VaR models that experience less than five exceptions in a rolling 12-month period are deemed to be statistically correct and attract no additional regulatory capital charges.

Basel III In December 2010, the Basel Committee on Banking Supervision (BCBS) issued the Basel III framework, which is a comprehensive set of reform measures to strengthen the regulation, supervision and risk management of the banking sector. These measures aim to improve the banking sector's ability to absorb shocks arising from financial and economic stress, whatever the source, improve risk management and governance and strengthen banks' transparency and disclosures. The phase-in period for Basel III is January 1, 2013 through January 1, 2019.

Basel Committee on Banking Supervision (BCBS) The Basel Committee on Banking Supervision (BCBS) provides a forum for regular cooperation on banking supervisory matters. Its objective is to enhance the understanding of key supervisory issues and improve the quality of banking supervision worldwide. It seeks to do so by exchanging information on national supervisory issues, approaches and techniques, with a view to promoting common understanding. At times, the BCBS uses this common understanding to develop guidelines and supervisory standards in areas where they are considered desirable. In this regard, the BCBS is best known for its international standards on capital adequacy, the Core Principles for Effective Banking Supervision and the Concordat on cross-border banking supervision.

Booking center Part of a legal entity of Credit Suisse AG that is registered with a domestic banking license where client assets are administered and booked.

C

Collateralized debt obligation (CDO) A CDO is a type of structured asset-backed security whose value and payments are derived from a portfolio of underlying fixed-income assets.

Commercial mortgage-backed securities (CMBS) CMBS are a type of mortgage-backed security that is secured by loans on commercial property and can provide liquidity to real estate investors and commercial lenders.

Commercial paper (CP) Commercial paper is an unsecured money-market security with a fixed maturity of 1 to 364 days, issued by large banks and corporations to raise funds to meet short term debt obligations.

Constant prepayment rate (CPR) A loan prepayment rate that is equal to the proportion of the principal of a pool of loans that is assumed to be paid off prematurely in each period. The calculation of this estimate is based on a number of factors such as historical prepayment rates for previous loans that are similar to ones in the pool and on future economic outlooks.

Credit default swap (CDS) A CDS is a contractual agreement in which the buyer of the swap pays a periodic fee in return for a contingent payment by the seller of the swap following a credit event of a reference entity. A credit event is commonly defined as bankruptcy, insolvency, receivership, material adverse restructuring of debt or failure to meet payment obligations when due.

Credit valuation adjustment (CVA) The CVA represents the market value of counterparty credit risk for uncollateralized OTC derivative instruments.

D

Debit valuation adjustment (DVA) The DVA represents the market value of our own credit risk for uncollateralized OTC derivative instruments.

Derivatives Derivatives are financial instruments or contracts that meet all of the following three characteristics: (1) their value changes in response to changes in an underlying price, such as interest rate, security price, foreign exchange rate, credit rating/price, or index; (2) they require no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors; and (3) their terms require or permit net settlement (US GAAP) or they settle at a future date (IFRS).

F

Fair value The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Flow-based Flow-based businesses refer to products that are generally more liquid, less complex and less volatile and which tend to provide a more stable earnings base generated from fees and/or trading activity initiated by or in facilitation of client business. Flow-based businesses include foreign exchange, interest-rate products, cash equities, vanilla derivative products and prime services.

G

G-7 The G-7 represents the finance ministers from seven industrialized nations: the US, UK, France, Germany, Italy, Canada and Japan.

H

Haircut The percentage by which an asset's market value is reduced for the purpose of calculating capital, margin requirements and collateral levels. This is used to provide a cushion when lending against collateral to account for possible adverse movements in the value of the collateral.

High-net-worth individuals (HNWI) We define high-net-worth individuals as individuals having assets under management in excess of CHF 1 million.

I

Incremental risk charge (IRC) The IRC represents an estimate of the issuer default and migration risk of positions in the trading book over a one-year capital horizon at a 99.9% confidence level, taking into account the liquidity horizons of individual positions. This includes sovereign debt, but excludes securitizations and correlation products.

L

Liquidity coverage ratio (LCR) The LCR aims to ensure that banks have a stock of unencumbered high-quality liquid assets available to meet liquidity needs for a 30-day time horizon under a severe stress scenario. The LCR is comprised of two components: the value of the stock of high quality liquid assets in stressed conditions and the total net cash outflows calculated according to specified scenario parameters. The ratio of liquid assets over net cash outflows should be at least 100%.

London Interbank Offered Rate (LIBOR) LIBOR is a daily reference rate based on the interest rates at which banks borrow unsecured funds from other banks in the London wholesale money market.

Loss given default (LGD) LGD parameters consider seniority, collateral, counterparty industry and, in certain cases, fair value markdowns. LGD estimates are based on an empirical analysis of historical loss rates and are calibrated to reflect time and cost of recovery as well as economic downturn conditions. For much of the Private Banking & Wealth Management loan portfolio, the LGD is primarily dependent upon the type and amount of collateral pledged. For other retail credit risk, predominantly loans secured by financial collateral, pool LGDs differentiate between standard and higher risks, as well as domestic and foreign transactions. The credit approval and collateral monitoring processes are based on loan-to-value limits. For mortgages (residential or commercial), recovery rates are differentiated by type of property.

M

Match funded Match funded balance sheet items consist of assets and liabilities with close to equal liquidity durations and value so that the liquidity and funding generated or required by the positions are substantially equivalent.

Material risk takers and controllers (MRTC) MRTC are employees who, either individually or as a part of a group, are considered to have a potentially material impact on the Group's risk profile.

N

Negative replacement value (NRV) NRV represents the negative fair value of a derivative financial instrument at a given financial reporting date. A negative replacement value reflects the amount payable to the counterparty if the derivative transaction were to be settled at the reporting date, or alternatively, the cost at a given reporting date to close an open derivative position with a fully offsetting transaction.

Net stable funding ratio (NSFR) The NSFR is intended to ensure banks maintain a structurally sound long-term funding profile beyond one year and is a complementary measure to the LCR. It is structured to ensure that illiquid assets are funded with an appropriate amount of stable long-term funds. The standard is defined as the ratio of available stable funding over the amount of required stable funding. The ratio should always be at least 100%.

Netting agreements Netting agreements are contracts between two parties where under certain circumstances, such as insolvency, bankruptcy or any other credit event, mutual claims from outstanding business transactions can be offset against each other. The inclusion of a legally binding netting agreement reduces the default risk from a gross to a net amount.

O

Over-the-counter (OTC) Over-the-counter securities and derivatives are not traded on an exchange but via private contracts between counterparties.

P

Position risk Component of the economic capital framework, which is used to assess, monitor and report risk exposures throughout the Group. Position risk is the level of unexpected loss in economic value on our portfolio of positions over a one-year horizon which is exceeded with a given small probability (1% for risk management purposes; 0.03% for capital management purposes).

Positive replacement value (PRV) PRV represents the positive fair value of a derivative financial instrument at a given reporting date. A positive replacement value reflects the amount receivable from the counterparty if the derivative transaction were to be settled at the reporting date, or alternatively, the cost at a given reporting date to enter into the exact same transaction for the residual term, if the existing counterparty should default.

Probability of default (PD) PD parameters capture the risk of a counterparty defaulting over a one-year time horizon. PD estimates are based on time-weighted averages of historical default rates by rating grade, with low-default-portfolio estimation techniques applied for higher quality rating grades. Each PD reflects the internal rating for the relevant obligor.

R

Regulatory VaR Regulatory VaR is a version of VaR that uses an exponential weighting technique that automatically increases VaR where recent short-term market volatility is greater than long-term volatility in the two-year dataset. Regulatory VaR uses an expected shortfall calculation based on average losses, and a ten-day holding period adjusted to one day for presentation purposes. This results in a more responsive VaR model, as the overall increases in market volatility are reflected almost immediately in the regulatory VaR model.

Repurchase agreements Repurchase agreements are securities sold under agreements to repurchase substantially identical securities. These transactions normally do not constitute economic sales and are therefore treated as collateralized financing transactions and are carried in the balance sheet at the amount of cash received (liability) and cash disbursed (asset), respectively.

Residential mortgage-backed securities (RMBS) RMBS are a type of mortgage-backed security composed of a wide array of different non-commercial mortgage debts. They securitize the mortgage payments of non-commercial real estate. Different residential mortgages with varying credit ratings are pooled together and sold in tranches to investors.

Reverse repurchase agreements Reverse repurchase agreements are purchases of securities under agreements to resell substantially identical securities. These transactions normally do not constitute economic sales and are therefore treated as collateralized financing transactions and are carried in the balance sheet at the amount of cash received (liability) and cash disbursed (asset), respectively.

Risk management VaR Risk management VaR is a version of VaR that uses an exponential weighting technique that automatically adjusts VaR where recent short-term market volatility differs from long-term volatility in the two-year dataset. Risk management VaR uses an expected shortfall calculation based on average losses, and a one-day holding period. This results in a more responsive VaR model, as the overall changes in market volatility are reflected almost immediately in the risk management VaR model.

Risk mitigation Risk mitigation refers to measures undertaken by the Group or the Bank to actively manage its risk exposure. For credit risk exposure, such measures would normally include utilizing credit hedges and collateral, such as cash and marketable securities. Credit hedges represent the notional exposure that can be transferred to other market counterparties, generally through the use of credit default swaps.

Risk not in VaR (RNIV) RNIV is a framework intended to ensure that capital is held to meet all risks which are not captured, or not captured adequately, by the Group's VaR and stressed VaR models. These include, but are not limited to incomplete, missing and/or illiquid risk factors such as certain basis, correlation, higher-order and cross risks, and calibration parameters. The RNIV framework is continuously updated to incorporate new RNIVs.

Risk-weighted assets (RWA) The value of the Group's assets weighted according to certain identified risks for compliance with regulatory provisions.

S

Stressed VaR Stressed VaR replicates a VaR calculation on the current portfolio of the Group or the Bank, taking into account a one-year observation period relating to significant financial stress; it helps reduce the pro-cyclicality of the minimum capital requirements for market risk.

Swiss Financial Supervisory Authority FINMA (FINMA) FINMA, as an independent supervisory authority, protects creditors, investors and policy holders, ensuring the smooth functioning of the financial markets and preserving their reputation. In its role as state supervisory authority, FINMA acts as an oversight authority of banks, insurance companies, exchanges, securities dealers, collective investment schemes, distributors and insurance intermediaries. It is responsible for combating money laundering and, where necessary, conducts restructuring and bankruptcy proceedings and issues operating licenses for companies in the supervised sectors. Through its supervisory activities, it ensures that supervised institutions comply with the requisite laws, ordinances, directives and regulations and continues to fulfill the licensing requirements. FINMA also acts as a regulatory body; it participates in legislative procedures, issues its own ordinances and circulars where authorized to do so, and is responsible for the recognition of self-regulatory standards.

T

Too Big to Fail In 2011, the Swiss Parliament passed legislation relating to big banks. The legislation includes capital and liquidity requirements and rules regarding risk diversification and emergency plans designed to maintain systemically relevant functions even in the event of threatened insolvency.

Total return swap (TRS) A TRS is a swap agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In total return swaps, the underlying asset, referred to as the reference asset, is usually an equity index, loans, or bonds.

U

Ultra-high-net-worth individuals (UHNWI) Ultra-high-net-worth individuals have assets under management in excess of CHF 50 million or total wealth exceeding CHF 250 million.

V

Value-at-Risk (VaR) VaR is a technique used to measure the potential loss in fair value of financial instruments based on a statistical analysis of historical price trends and volatilities. VaR as a concept is applicable for all financial risk types with valid regular price histories; the use of VaR allows the comparison of risk in different businesses, such as fixed income and equity.

Cautionary statement regarding forward-looking information

This report contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market and interest rate fluctuations and interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries in 2014 and beyond;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of sovereign issuers, structured credit products or other credit-related exposures;

- the ability to achieve our strategic objectives, including improved performance, reduced risks, lower costs and more efficient use of capital;
- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices;
- competition in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation and other contingencies;
- the ability to achieve our cost efficiency goals and cost targets; and
- our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in *I – Information on the company – Risk factors*.

CREDIT SUISSE AG

(Translation of registrant's name into English)

Paradeplatz 8, CH 8001 Zurich, Switzerland
(Address of principal executive office)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F ☒

Form 40-F ☐

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

Note: Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's "home country"), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes ☐

No ☒

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-

Introduction

This report filed on Form 6-K/A contains certain information about Credit Suisse AG to be incorporated by reference in the Registration Statement on Form F-3 (file no. 333-180300). Credit Suisse Group AG's revised financial report for the fourth quarter of 2013 (Credit Suisse Revised Financial Report 4Q13) is attached as an exhibit to this Form 6-K/A and was filed with the US Securities and Exchange Commission (SEC) on April 3, 2014. The Bank is incorporating by reference the Credit Suisse Revised Financial Report 4Q13 (except for the sections entitled "Dear shareholders", "Investor information" and "Financial calendar and contacts"). The Credit Suisse Revised Financial Report 4Q13 contains information for the three months and the year ended December 31, 2013.

This report on Form 6-K/A (including the exhibit hereto) supersedes and replaces the report on Form 6-K of Credit Suisse AG filed on February 6, 2014 (accession number 0001370368-14-000008) in its entirety.

Unless the context otherwise requires, references herein to "Credit Suisse Group", "Credit Suisse", "the Group", "we", "us" and "our" mean Credit Suisse Group AG and its consolidated subsidiaries and the term "the Bank" means Credit Suisse AG, the Swiss bank subsidiary of the Group, and its consolidated subsidiaries.

The Bank, a Swiss bank and joint stock corporation established under Swiss law, is a wholly-owned subsidiary of the Group. The Bank's registered head office is in Zurich, and it has additional executive offices and principal branches in London, New York, Hong Kong, Singapore and Tokyo.

References herein to "CHF" are to Swiss francs.

Forward-looking statements

This Form 6-K/A and the information incorporated by reference in this Form 6-K/A include statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. In addition, in the future the Group, the Bank and others on their behalf may make statements that constitute forward-looking statements.

When evaluating forward-looking statements, you should carefully consider the cautionary statement regarding forward-looking information, the risk factors and other information set forth in the Group's and the Bank's annual report on Form 20-F for the year ended December 31, 2012 (the Credit Suisse 2012 20-F), and subsequent annual reports on Form 20-F filed by the Group and the Bank with the SEC and the Group's and the Bank's reports on Form 6-K furnished to or filed with the SEC, and other uncertainties and events.

Operating and financial review and prospects

Except where noted, the business of the Bank is substantially the same as the business of the Group, and substantially all of the Bank's operations are conducted through the Private Banking & Wealth Management and Investment Banking segments. These segment results are included in Core Results. Certain other assets, liabilities and results of operations are managed as part of the activities of the two segments. However, since they are legally owned by the Group, they are not included in the Bank's consolidated financial statements. These relate principally to the activities of Neue Aargauer Bank and BANK-now, which are managed as part of Private Banking & Wealth Management. Core Results also includes certain Corporate Center activities of the Group that are not applicable to the Bank.

These operations and activities vary from period to period and give rise to differences between the Bank's consolidated assets, liabilities, revenues and expenses, including pensions and taxes, and those of the Group.

Differences between the Group and the Bank businesses

| Entity | Principal business activity |
|---------------------------------|--|
| Neue Aargauer Bank | Banking (in the Swiss canton of Aargau) |
| BANK-now | Private credit and car leasing (in Switzerland) |
| Financing vehicles of the Group | Special purpose vehicles for various funding activities of the Group, including for purposes of raising consolidated capital |

² Based on amounts attributable to shareholders.

³ A non-GAAP financial measure. Tangible shareholders' equity is calculated by deducting goodwill and other intangible assets from total shareholders' equity.

⁴ Proposal of the Board of Directors to the Annual General Meeting on May 9, 2014; to be paid out of reserves from capital contributions.

⁵ Paid out of reserves from capital contributions.

Brady W. Dougan, Chief Executive Officer (left) and Urs Rohner, Chairman of the Board of Directors.

DEAR SHAREHOLDERS

In 2013, our priorities were to further improve profitability, continue to strengthen our capital position and reduce risks and leverage exposure while expanding market share in targeted markets. We made strong progress towards these objectives, while at the same time taking a number of additional strategic measures, both on a Group level and in our two divisions, to continue the transformation of our business.

Credit Suisse also made progress towards resolving legacy issues. In February 2014, Credit Suisse announced that it reached a settlement with the US Securities and Exchange Commission (SEC) and agreed to pay USD 196 million for violations of US securities laws that centered on activities between 2002 and 2008. The investigation by the US Department of Justice (DOJ) in the US tax-related matter remains outstanding. Primarily due to an increase in the litigation provision held against this matter, Credit Suisse announced in April 2014 that it incurred an after-tax charge of CHF 468 million in respect of its preliminary full-year 2013 and fourth-quarter 2013 results. In March 2014, we announced that Credit Suisse reached an agreement with the Federal Housing

Finance Agency (FHFA), as conservator for Fannie Mae and Freddie Mac. As a result of this settlement, we incurred an after-tax charge in respect of our preliminary fourth quarter and full-year 2013 results of CHF 275 million.

For the full-year of 2013, underlying* Core pre-tax income was CHF 5,745 million, up 15% from 2012, and the return on equity was 10%. Including significant items, such as certain litigation provisions recognized in the fourth quarter, as well as realignment costs and fair value losses on own debt due to the improvement in our own credit spreads, reported Core pre-tax income for the full year was CHF 3,504 million, compared to CHF 1,888 million in 2012, and the reported return on equity was 6%.

In October 2013, we created non-strategic units within our two divisions and separated non-strategic items in the Corporate Center to further accelerate our reduction of capital and costs associated with non-strategic activities and to shift resources to focus on our strategic businesses and growth initiatives. Under this new reporting structure, our strategic businesses reported Core pre-tax income of CHF 7,132 million for the full-year 2013. The

return on equity of 13% for our strategic businesses in the full year 2013 demonstrates the strength of our core franchises within our two divisions. In addition, we showed continued cost discipline with compensation and benefits expense down 9% from 2012 for the Group and down 10% in Investment Banking.

Our result for the fourth quarter of 2013 reflects strong profitability in Private Banking & Wealth Management and a solid performance in the strategic businesses of Investment Banking, with particular strength in Equities and Underwriting. On an underlying* basis, Core pre-tax income for the quarter was CHF 1,256 million and return on equity was 8%. Reported Core pre-tax loss was CHF 466 million for the fourth quarter and return on equity was a negative 5%.

Strategic achievements in 2013

In 2013, we made significant progress in transforming our business to the changing environment through a number of strategic measures. We accelerated the shift of resources to focus on growth in high-returning businesses – particularly in Private Banking & Wealth Management by creating non-strategic units. This also represented an important step toward achieving a more balanced allocation of capital between our two divisions.

During the year, we made significant further progress in our efforts to address the “Too Big to Fail” topic. We largely completed the capital plan announced in July 2012 and ended the year with a Look-through Basel III CET1 ratio of 10.0%. At the same time, we further reduced leverage exposure and reported a Look-through Swiss Total Capital leverage ratio of 3.7% at year end. Based on our preliminary assessment, the Basel Committee’s revised guidelines on the calculation of the leverage ratio would increase our year-end 2013 ratio to around 4%, which would meet the 2019 Swiss requirement. We completed the exchange of CHF 3.8 billion of hybrid tier 1 notes into high-trigger capital instruments, successfully issued CHF 6 billion of low-trigger capital notes and are now just approximately CHF 3 billion away from meeting the Swiss 2019 progressive capital requirement. Furthermore, as part of our 2013 compensation structure, we introduced a similar instrument which aligns compensation incentives to the capital strength of the Group, as well as providing additional tier 1 benefits. In November 2013, we announced our program to evolve the Group’s legal entity structure, which is designed to both meet future requirements for global recovery and resolution planning and result in a substantially less complex and more efficient operating infrastructure in view of the new regulatory requirements.

In Private Banking & Wealth Management, we improved the profitability of our strategic businesses in 2013, also completing the integration of our former Private Banking and Asset Management divisions. The integrated Private Banking & Wealth Management division allows us to better manage the alignment of the products, advice and services that we deliver to our clients and is expected to further enhance the productivity and efficiency of our businesses. With this integrated value chain, we can support

our highly scalable business model in Private Banking & Wealth Management, which is suited to the new regulatory environment. The pre-tax income in the strategic businesses of Asset Management increased 32% from 2012 to 2013, which underscores the strength of the ongoing business and its importance in profit generation within the Private Banking & Wealth Management franchise.

In 2013, we continued to reallocate resources to growth areas, with a particular focus on emerging markets businesses, our global ultra-high-net-worth individual (UHNWI) client franchise and on leveraging our strong market position in Switzerland. In 2013, net new assets from Wealth Management Clients were CHF 18.9 billion, with emerging markets growing at 8%, and continued strong growth in the UHNWI client segment. We also recorded CHF 15.0 billion in net new assets from Asset Management, reflecting significant inflows from higher-margin products, and we continued to see strong inflows of CHF 8.8 billion from the Corporate & Institutional Clients business.

During 2013, we continued to adapt our onshore client service model for Western Europe, adjusting capacity to meet client needs, efficiently managing costs across our businesses and improving our overall market position. We announced the sale of our domestic private banking business booked in Germany in December, while at the same time remaining highly committed to serving the German wealth management market.

We will remain focused on further improving the profitability of our Private Banking & Wealth Management businesses by delivering growth in emerging markets and continuing to adjust our capacity in mature markets to client needs.

In Investment Banking, we continued to see the benefit of our sustained market share positions across our high-returning businesses, combined with a reduced cost base and lower leverage and capital usage. In October 2013, we announced the restructuring of our Rates business, given the increasing focus of regulators on leverage exposures and in view of the fundamental changes in the Rates market. This step forms part of the evolution of our Investment Banking business model and is expected to provide us with a simplified and more capital-efficient business, with a focus on meeting client liquidity needs. In connection with this measure, we also announced the creation of a cross-asset Global Macro Products group, combining our Rates, Foreign Exchange and Commodities businesses into a single platform. This set-up offers clients a comprehensive approach across the macro asset classes and allows us to focus our resources on those areas and products that matter most to them.

We believe that our Investment Banking division, featuring a top-three Equities franchise, a strong and profitable Underwriting & Advisory business and a Fixed Income franchise focused on high-returning yield businesses, is well positioned to continue to serve our clients’ needs and deliver strong returns and profitability in 2014.

Performance of our businesses in the fourth quarter and the full-year 2013

In Private Banking & Wealth Management, we delivered pre-tax income of CHF 1,048 million for our strategic businesses in the fourth quarter of 2013 and a return on Basel III allocated capital of 34%. Pre-tax income for Private Banking & Wealth Management in the fourth quarter was CHF 424 million, taking into account litigation provisions of CHF 600 million in connection with the US tax matter, including in connection with the settlement with the SEC in February 2014 and an increase in litigation provisions relating to the ongoing DOJ investigation. Net revenues of CHF 3,429 million in the fourth quarter were higher compared to the prior quarter and last year's fourth quarter, driven by stronger transaction- and performance-based revenues with robust performance fees and an increase in management fees in Asset Management. Total operating expenses increased, reflecting the higher litigation provisions.

For the full year, Private Banking & Wealth Management reported increased pre-tax income of CHF 3,627 million for its strategic businesses, mainly driven by the successful restructuring of Asset Management business and growth in emerging markets and in the Wealth Management Clients business. Pre-tax income for the full-year 2013 was CHF 3,240 million.

In Investment Banking, we delivered pre-tax income of CHF 468 million for our strategic businesses in the fourth quarter of 2013 and a return on Basel III allocated capital of 10%. Including an after-tax charge of CHF 275 million relating to the FHFA settlement in March 2014 recognized in the fourth quarter, Investment Banking reported a pre-tax loss of CHF 564 million. Net revenues of CHF 2,668 million increased compared to both the prior quarter and the fourth quarter of 2012. This increase reflected solid performance in the strategic businesses, with particular strength in our Equities, Credit and Underwriting franchises, and reduced revenue losses from the non-strategic unit, partially offset by lower Rates results. Total operating expenses increased compared to both the third quarter of 2013 and the fourth quarter of 2012, primarily driven by the higher litigation provisions.

For the full year, Investment Banking reported increased pre-tax income of CHF 3,853 million for its strategic business. Continued sustained market share positions across our high-returning businesses, combined with a reduced cost base and lower leverage

and capital usage, helped us achieve a return on Basel III allocated capital of 19% for 2013. Reported pre-tax income for 2013 was CHF 1,719 million. Total compensation and benefit expense was 10% lower in 2013 than in 2012. Since the fourth quarter of 2012, we reduced Basel III risk-weighted assets by USD 11 billion to USD 176 billion. Business reductions of USD 27 billion in 2013 were partially offset by increases relating to methodology changes and parameter updates of CHF 10 billion and, in the fourth quarter, an operational risk-related add-on of USD 6 billion.

We are confident that the continued momentum we see in our strategic businesses, combined with the successful execution of the run-off of positions and losses in our non-strategic units, will allow us to achieve our targeted return on equity of 15% over the cycle.

Given the progress that we have made in executing our capital plan and in reducing leverage and risk-weighted asset usage while, at the same time, improving the operational efficiency of the bank, the Board of Directors will propose a cash distribution of CHF 0.70 per share to be paid out of reserves from capital contributions for the financial year 2013 at the annual general meeting of Credit Suisse Group on May 9, 2014. This is intended to provide a basis for future progression in our dividend payments as we continue to execute our strategy and resolve legacy issues.

We would like to thank our shareholders and clients for the trust they have placed in Credit Suisse and, in particular, our employees for their contribution to the success of our business.

Sincerely

Urs Rohner

Brady W. Dougan

April 2014

As of January 1, 2013, Basel III was implemented in Switzerland along with the Swiss “Too Big to Fail” legislation and regulations thereunder. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown herein. Capital and ratio numbers for periods prior to 2013 are based on estimates, which are calculated as if the Basel III framework had been in place in Switzerland during such periods. For Private Banking & Wealth Management’s strategic businesses, return on Basel III allocated capital is calculated using income after tax denominated in Swiss francs and assumes (i) a tax rate of 30% in 4Q13 and 29% in 2013; and (ii) that capital is allocated at 10% of average Basel III risk-weighted assets. For Investment Banking’s strategic businesses, return on Basel III allocated capital is calculated using income after tax denominated in US dollars and assumes (i) a tax rate of 30% in 4Q13 and 28% in 2013; and (ii) that capital is allocated at 10% of average Basel III risk-weighted assets.

Unless otherwise noted, leverage ratio, leverage exposure and total capital amounts included herein are based on the current FINMA framework. The Swiss Total Capital leverage ratio is calculated as Swiss Total Capital, divided by a three-month average leverage exposure, which consists of balance sheet assets, off-balance sheet exposures, which consist of guarantees and commitments, and regulatory adjustments, which include cash collateral netting reversals and derivative add-ons.

All references to pre-tax income for Core results refer to income from continuing operations before taxes.

Financial Report 4Q13 – revised

Explanation of revision

As announced on March 21, 2014, we entered into an agreement with the Federal Housing Finance Agency (FHFA) to end all claims in two pending securities lawsuits filed by the FHFA against Credit Suisse. As a result of this settlement, we increased our existing FHFA-related litigation provisions by CHF 467 million, resulting in an after tax charge of CHF 275 million in respect of our previously reported unaudited financial results for 4Q13 and 2013.

As announced on April 3, 2014, we updated our previously reported unaudited financial results for 4Q13 and 2013 to reflect additional after tax charges of CHF 468 million. These charges primarily reflect an increase in the litigation provision relating to the ongoing US Department of Justice investigation into the US tax-related matter, as well as other less significant adjustments for certain unrelated matters.

This revised 4Q13 Financial Report updates those financial results and related information to reflect these events and does not update or modify any other information contained in the report originally published on February 6, 2014 that does not relate to these events.

► Refer to "Note 29 – Litigation" in III – Condensed consolidated financial statements – unaudited for further information.

For purposes of this report, unless the context otherwise requires, the terms "Credit Suisse," "the Group," "we," "us" and "our" mean Credit Suisse Group AG and its consolidated subsidiaries. The business of Credit Suisse AG, the Swiss bank subsidiary of the Group, is substantially similar to the Group, and we use these terms to refer to both when the subject is the same or substantially similar. We use the term "the Bank" when we are only referring to Credit Suisse AG, the Swiss bank subsidiary of the Group, and its consolidated subsidiaries.

Abbreviations are explained in the List of abbreviations in the back of this report.

Publications referenced in this report, whether via website links or otherwise, are not incorporated into this report.

In various tables, use of "–" indicates not meaningful or not applicable.

Credit Suisse at a glance

Credit Suisse

As one of the world's leading financial services providers, we are committed to delivering our combined financial experience and expertise to corporate, institutional and government clients and to high-net-worth individuals worldwide, as well as to private clients in Switzerland. Founded in 1856, today we have a global reach with operations in over 50 countries and 46,000 employees from approximately 150 different nations. Our broad footprint helps us to generate a geographically balanced stream of revenues and net new assets and allows us to capture diverse growth opportunities around the world. We serve our diverse clients through our two divisions, which cooperate closely to provide holistic financial solutions, including innovative products and specially tailored advice.

Private Banking & Wealth Management

Private Banking & Wealth Management offers comprehensive advice and a wide range of financial solutions to private, corporate and institutional clients. The Private Banking & Wealth Management division comprises the Wealth Management Clients, Corporate & Institutional Clients and Asset Management businesses. In Wealth Management Clients we serve ultra-high-net-worth and high-net-worth individuals around the globe and private clients in Switzerland. Our Corporate & Institutional Clients business serves the needs of corporations and institutional clients, mainly in Switzerland. Asset Management offers a wide range of investment products and solutions across diverse asset classes and investment styles, serving governments, institutions, corporations and individuals worldwide.

Investment Banking

Investment Banking provides a broad range of financial products and services, including global securities sales, trading and execution, prime brokerage and capital raising services, corporate advisory and comprehensive investment research, with a focus on businesses that are client-driven, flow-based and capital-efficient. Clients include corporations, governments, institutional investors, including hedge funds, and private individuals around the world. Credit Suisse delivers its investment banking capabilities via regional and local teams based in major global financial centers. Strongly anchored in Credit Suisse's integrated model, Investment Banking works closely with Private Banking & Wealth Management to provide clients with customized financial solutions.

Operating environment

Global economic activity remained robust in 4Q13. Equity markets ended the quarter stronger and volatility remained at low levels. Government bond yields remained stable. The performance of the US dollar against most major currencies was mixed in 4Q13.

ECONOMIC ENVIRONMENT

The global economic environment was robust in 4Q13. The negative effects of a government shutdown in the US during October on US economic growth were limited. Leading indicators in the US remained at relatively high levels and improved further. Indicators for the labor and housing market in the US continued to show further strength. The mild recovery in the Eurozone continued, though there was a growing divergence between the accelerated growth in Germany and the weaker data in France towards the end of the year. In the emerging markets, China displayed further signs of growth stabilizing at robust levels, while business confidence in the manufacturing sectors of Russia and Brazil was more muted.

At its meeting in mid-December 2013, the US Federal Reserve (Fed) decided to reduce the pace of its monthly asset purchases from USD 85 billion to USD 75 billion effective as of January 2014. It also continued to signal its intent to keep the federal funds rate low for the foreseeable future. The European Central Bank

(ECB) cut its main refinancing rate in early November in reaction to very low inflation rates in the Eurozone. In Latin America, central banks pursued diverging courses, with Mexico and Chile lowering rates and Brazil increasing them for the sixth time in 2013. In Asia, Indonesia and India raised rates further, while central banks in Eastern Europe left rates largely unchanged.

Global equity markets had positive returns in 4Q13. Developed markets, led by Japan, the US and Germany, continued to outperform emerging markets despite good performance from China and India (refer to the charts "Equity markets"). All global sectors had gains during the quarter. In general, the more cyclical sectors such as IT, industrials and consumer discretionary continued to outperform the global market reflecting the improved global growth outlook. Equity market volatility, as measured by the Chicago Board Options Exchange Market Volatility Index (VIX), continued at low levels for most of the quarter. Risk appetite increased and the Credit Suisse Hedge Fund Index increased 4.2% in 4Q13.

Yield curves

Bond yields for most currencies increased slightly during the quarter.

Source: Datastream, Credit Suisse

Equity markets

Equity performance was strong in 4Q13. Volatility remained low after a peak at the beginning of the quarter.

Benchmark bond yields moved slightly higher in 4Q13 (refer to the charts "Yield curves"). The US debt ceiling debate in October temporarily increased market uncertainties and kept bond yields lower; however, once an agreement on the debt ceiling was reached, improving economic data helped to push global benchmark bond yields higher again. With the global improvement of macroeconomic indicators and a supportive liquidity market, credit markets posted a good performance in 4Q13 (refer to the chart "Credit spreads"). Emerging market sovereign bonds were more volatile, especially in local currency, mainly as a result of exchange rate volatility.

US dollar performance in 4Q13 against most major currencies was mixed. The euro, Swiss franc and British pound appreciated against the US dollar, helped by signs of economic recovery in Europe. However, commodity currencies such as the Australian and Canadian dollars weakened, as growth in both countries remained weak. The Japanese yen continued to weaken against the US dollar as higher US interest rates provided the US dollar with support. Currencies of certain emerging market economies, such as the Brazilian real, the South African rand and the Turkish lira weakened. The Chinese yuan continued its strengthening trend against the US dollar.

Commodity markets were mixed in 4Q13. In the first half of the quarter, commodity prices declined, partly driven by seasonality and higher bond yields. In the second half, the overall commodity index recovered, driven by oil and gas markets as well as industrial metals which benefited from recovering economic growth and strengthening demand. In contrast, gold prices declined during November and December as concerns about the Fed's tapering of future asset purchases resulted in further investment outflows.

Credit spreads

With the global improvement of macroeconomic data, credit spreads tightened in 4Q13.

SECTOR ENVIRONMENT

After outperforming the broader market in the beginning of the quarter, European bank stocks increased 8% in 4Q13, in line with global equity markets as measured by the MSCI World index, while North American bank stocks increased 9% (refer to the charts “Equity Markets”).

In private banking, clients maintained a cautious investment stance, with cash deposits remaining high despite the low interest rates. The low interest rate environment continued to adversely impact earnings. Although the Swiss National Bank (SNB) reiterated concerns about the build-up of imbalances in mortgage and real estate markets in Switzerland, Swiss mortgage rates remained at low levels. Overall the wealth management sector continued to adapt to further industry-specific regulatory changes.

For investment banking, global equity trading volumes increased compared to 3Q13, driven by higher volumes across

European and US cash equities and equity derivatives. Compared to 4Q12, volumes were higher across European cash equities, but weaker across US cash equities and equity derivatives. Global announced mergers and acquisitions (M&A) volumes decreased compared to 3Q13 and 4Q12 as the pace of new announcements decreased in December. Global completed M&A volumes increased compared to 3Q13 and remained stable versus 4Q12. Global equity underwriting volumes increased significantly versus both 3Q13 and 4Q12, driven by increased initial public offering (IPO) issuance activity levels. Global debt underwriting volumes decreased compared to both 3Q13 and 4Q12. US fixed income volumes decreased compared to 3Q13 with lower corporate and mortgage-backed volumes partially offset by higher volumes of federal agency and stable treasuries. Compared to 4Q12, weaker federal agency and mortgage-backed volumes were partially offset by higher volumes of treasuries and corporates.

Credit Suisse

In 4Q13, we recorded a net loss attributable to shareholders of CHF 476 million. Diluted loss per share was CHF (0.37) and return on equity attributable to shareholders was (4.5)%. For 2013, we had net income attributable to shareholders of CHF 2,326 million and return on equity attributable to shareholders was 5.7%, up from 3.9% in 2012.

As of the end of 4Q13, our CET1 ratio under Basel III was 15.7% and 10.0% on a look-through basis. Our risk-weighted assets increased slightly compared to 3Q13 to CHF 273.8 billion.

INFORMATION AND DEVELOPMENTS

Format of presentation and changes in reporting

In managing the business, revenues are evaluated in the aggregate, including an assessment of trading gains and losses and the related interest income and expense from financing and hedging positions. For this reason, individual revenue categories may not be indicative of performance.

As of January 1, 2013, the Basel Committee on Banking Supervision (BCBS) Basel III framework was implemented in Switzerland along with the Swiss “Too Big to Fail” legislation and regulations thereunder. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Our calculations of 4Q12 capital and ratio amounts, which are presented in order to show meaningful comparative information, use estimates as of December 31, 2012, as if the Basel III framework had been implemented in Switzerland as of such date.

References to Swiss leverage exposure refer to the aggregate of balance sheet assets, off-balance sheet exposures, consisting of guarantees and commitments, and regulatory adjustments, including cash collateral netting reversals and derivative add-ons.

► Refer to “Swiss leverage ratio” in II – Treasury, risk, balance sheet and off-balance sheet – Capital management – Capital metrics under Swiss requirements for further information.

Beginning in 1Q13, assets within the Private Banking & Wealth Management and Investment Banking segments exclude intra-Group balances between the segments. Prior periods have been reclassified to conform to the current presentation.

Strategic development of our businesses

In 4Q13, we created non-strategic units within our Investment Banking and Private Banking & Wealth Management divisions and separated non-strategic items in the Corporate Center to further accelerate our reduction of capital and costs associated with non-strategic activities and positions and to shift resources to focus on our strategic businesses and growth initiatives. The results are disclosed separately within the divisional results and we have implemented a governance structure to accelerate position and expense reductions. We believe this new reporting structure, which clearly delineates between strategic and non-strategic results, enhances the transparency of our financial disclosures while providing increased focus on our strategic businesses within the business divisions and on the Group level. Prior periods have been restated to conform to the current presentation.

We decided to retain these non-strategic units within the divisions, rather than establishing a single non-strategic unit, so as to benefit from senior management’s expertise and focus. The non-strategic units have separate management within each division and a clear governance structure through the establishment of a Non-Strategic Oversight Board. As a result, we expect that the establishment of

these non-strategic units will drive further reductions in Swiss leverage exposure and risk-weighted assets. It is also expected to free up capital for future growth in Private Banking & Wealth Management,

accelerating a move towards a more balanced capital allocation between Investment Banking and Private Banking & Wealth Management, and to allow us to return capital to our shareholders.

Credit Suisse reporting structure

| Credit Suisse | | | | | |
|-------------------------------------|--|-----------------------------------|---------------------------------------|---------------------|--|
| Core Results | | | | | Non-controlling interest without significant economic interest |
| Private Banking & Wealth Management | | | Investment Banking | Corporate Center | |
| Strategic results | Wealth Management Clients | Corporate & Institutional Clients | Asset Management | | |
| Non-strategic results | Non-strategic unit Private Banking & Wealth Management | | Non-strategic unit Investment Banking | Non-strategic items | |

Non-strategic activities and positions are defined as:

- activities with significant capital absorption under new regulations and returns below expectations;
- activities with significant leverage exposures identified for de-risking;
- activities no longer feasible or economically attractive under emerging regulatory frameworks;
- assets and liabilities of business activities we are winding down;
- infrastructure associated with activities deemed non-strategic or redundant; and
- other items reported in the Corporate Center, which we do not consider representative of our core performance.

In Private Banking & Wealth Management, we established a non-strategic unit which includes positions relating to the restructuring of the former Asset Management division, run-off operations relating to our small markets exit initiative and certain legacy cross-border related run-off operations, litigation costs, primarily related to the US tax matter, the impact of restructuring our German onshore operations, other smaller non-strategic positions formerly in our Corporate & Institutional Clients business and the run-off and active reduction of selected products.

In Investment Banking, we transferred into the divisional non-strategic unit our fixed income wind-down portfolio, legacy rates business, primarily capital instruments that are not compliant with the Basel III capital framework and capital-intensive structured positions, legacy funding costs associated with non-Basel

III compliant debt instruments, as well as certain legacy litigation costs and other small non-strategic positions.

In the Corporate Center, we separately present non-strategic items, which we do not consider representative of our core performance. Such items include the valuation impacts from movements in credit spreads on our own liabilities carried at fair value, certain business realignment costs and IT architecture simplification expenses, certain litigation provisions, business wind-down costs and impairments not included in the divisional non-strategic units and legacy funding costs associated with non-Basel III compliant debt instruments not included in the results of the Investment Banking non-strategic unit. Corporate Center items previously disclosed as adjustments from our reported to underlying results are now presented as non-strategic items, with the exception of business divisions' non-strategic realignment costs, which beginning 4Q13 are reported directly in the relevant divisional non-strategic unit. Strategic business division realignment costs will continue to be reported in the Corporate Center.

Discontinued operations

The Private Banking & Wealth Management division completed the sale of our Customized Fund Investment Group (CFG) business in January 2014, and in 4Q13 announced the sale of our domestic private banking business booked in Germany to ABN AMRO, which is expected to close in the course of 2014. These transactions qualify for discontinued operations treatment in 4Q13 under US generally accepted principles (US GAAP), and revenues and expenses of these businesses and the relevant gains on disposal are classified as discontinued operations in the Group's

consolidated statements of operations. In the Private Banking & Wealth Management segment, the gains and expenses related to the business disposals are included in the segment's non-strategic results. The reclassification of the revenues and expenses from the segment results to discontinued operations for reporting at the Group level is effected through the Corporate Center. Prior periods for the Group's results have been restated to conform to the current presentation.

Significant litigation matters in 2013

On March 21, 2014, we entered into an agreement with the Federal Housing Finance Agency (FHFA) to settle litigation claims related to the sale of approximately USD 16.6 billion of residential mortgage-backed securities between 2005 and 2007. Under the terms of the agreement, we will pay USD 885 million to resolve all claims in two pending securities lawsuits filed by the FHFA against us.

For 2013, we recorded litigation provisions of CHF 600 million in our Private Banking & Wealth Management division in connection with the US tax matter, where we continue to work towards a resolution, including CHF 175 million in connection with the settlement with the SEC in February 2014.

► Refer to "Note 29 – Litigation" in III – Condensed consolidated financial statements – unaudited for further information on litigation.

Board of Directors and Management changes

As of December 31, 2013, Tobias Guldemann stepped down from the Executive Board and his position as Chief Risk Officer. Effective January 1, 2014, Joachim Oechslin assumed the role of Chief Risk Officer and joined the Executive Board.

Capital distribution proposal

At the Annual General Meeting on May 9, 2014, the Board of Directors will propose a cash distribution of CHF 0.70 per share to be paid out of reserves from capital contributions for the financial year 2013. The distribution out of reserves from capital contributions will be free of Swiss withholding tax and will not be subject to income tax for Swiss resident individuals holding the shares as a private investment.

Evolution of legal entity structure

Since 2012, we have been developing a program to evolve the Group's legal entity structure to meet developing and future regulatory requirements. This has been prepared in discussion with our primary regulator Swiss Financial Market Supervisory Authority FINMA (FINMA) and will address regulations in Switzerland, the US and the UK with respect to future requirements for global recovery and resolution planning by systemically important banks such as Credit Suisse that will facilitate resolution of an institution in the event of a failure. We expect these changes will result in a substantially less complex and more efficient operating infrastructure for the Group. Furthermore, Swiss banking law provides for the possibility of a limited reduction in capital requirements in the event of an improvement in resolvability which this program intends to deliver.

The key components of the program are:

- in Switzerland we plan to create a subsidiary for our Swiss-booked business (primarily wealth management, retail and corporate and institutional clients as well as the product and sales hub in Switzerland);
- our UK operations will remain the hub of our European investment banking business and we are planning that our two principal UK operating subsidiaries will be consolidated into a single subsidiary. The program will look to align non-European business to the appropriate entities in the Americas and in Asia Pacific;
- in the US, our existing broker-dealer subsidiary is planned to remain a subsidiary of our existing US holding company. The holding company will hold its US-based operating businesses and be subject to the Fed final rules for supervision of foreign banking operations in the US. Additionally, subject to US regulatory approvals, our US derivatives business, currently booked in one of the above noted UK operating subsidiaries, is anticipated to be transferred to the existing US broker-dealer;
- we intend to create a separately capitalized global infrastructure legal entity in Switzerland and a US subsidiary of the above noted US holding company. In principle, these will include all Shared Services functions; and
- once the legal framework is finalized, we plan to issue bail-in eligible debt out of the existing Group holding company to enable a single point of entry bail-in resolution strategy.

The program has been approved by the Board of Directors of the Group, but is subject to final approval by FINMA. Implementation of the program is underway, with a number of key components expected to be implemented from mid-2015.

Allocations and funding

Responsibility for each product is allocated to a segment, which records all related revenues and expenses. Revenue-sharing and service level agreements, which aim to reflect the pricing structure of unrelated third-party transactions, govern the compensation received by one segment for generating revenue or providing services on behalf of another. Corporate services and business support are provided by the Shared Services area and these costs are allocated to the segments and Corporate Center based on their requirements and other relevant measures.

We centrally manage our funding activities, with new securities for funding and capital purposes issued primarily by the Bank which lends funds to our operating subsidiaries and affiliates. Capital is distributed to the segments considering factors such as regulatory capital requirements, utilized economic capital and the historic and future potential return on capital. Transfer pricing, using market rates, is used to record net revenues and expenses relating to this funding in each of the segments, and our businesses are also credited to the extent they provide long-term stable funding.

► Refer to "Allocations and funding" in II – Operating and financial review – Core Results in the Credit Suisse Annual Report 2012 for further information.

Fair valuations

Fair value can be a relevant measurement for financial instruments when it aligns the accounting for these instruments with how we manage our business. The levels of the fair value hierarchy as defined by the relevant accounting guidance are not a measurement of economic risk, but rather an indication of the observability of prices or valuation inputs.

► Refer to "Note 1 – Summary of significant accounting policies" and "Note 27 – Financial instruments" in III – Condensed consolidated financial statements – unaudited for further information.

Models were used to value financial instruments for which no prices are available and which have little or no observable inputs (level 3). Models are developed internally and are reviewed by functions independent of the front office to ensure they are appropriate for current market conditions. The models require subjective assessment and varying degrees of judgment depending on liquidity, concentration, pricing assumptions and risks affecting the specific instrument. The models consider observable and unobservable parameters in calculating the value of these products, including certain indices relating to these products. Consideration of these indices is more significant in periods of lower market activity.

As of the end of 4Q13, 47% and 33% of our total assets and total liabilities, respectively, were measured at fair value.

While the majority of our level 3 assets are recorded in Investment Banking, some are recorded in Private Banking & Wealth Management's Asset Management business, specifically certain private equity investments. Total assets at fair value recorded as level 3 decreased by CHF 0.1 billion during 4Q13, primarily due to a decrease in other investments and loans held-for-sale, partially offset by an increase in loans. The decrease in other investments primarily reflected net sales partially offset by realized and unrealized gains. The decrease in loans held-for-sale primarily reflected net sales and net settlements. The increase in loans primarily reflected net issuances.

Our level 3 assets, excluding assets attributable to noncontrolling interests and assets of consolidated variable interest entities (VIEs) that are not risk-weighted assets under the Basel framework, were CHF 29.8 billion, compared to CHF 29.2 billion as of the end of 3Q13. As of the end of 4Q13, these assets comprised 4% of total assets and 8% of total assets measured at fair value, both adjusted on the same basis, compared to 3% and 7%, respectively, as of the end of 3Q13.

We believe that the range of any valuation uncertainty, in the aggregate, would not be material to our financial condition, however, it may be material to our operating results for any particular period, depending, in part, upon the operating results for such period.

Regulatory developments and proposals

Government leaders and regulators continued to focus on reform of the financial services industry, including capital, leverage and liquidity requirements, changes in compensation practices and systemic risk.

In October 2013, the Board of Governors of the Federal Reserve System, the Office of the Comptroller of the Currency and the

Federal Deposit Insurance Corporation issued a proposed rule to introduce the Basel III liquidity coverage ratio (LCR) in the US, applicable to certain large US banking organizations. The US LCR proposal is generally consistent with the LCR published by the BCBS in January 2013, but it is stricter in certain respects and would be phased in between January 1, 2015 and January 1, 2017. If Credit Suisse is required to form an intermediate holding company under the Fed's proposed rules for foreign banking organizations, it might be required to comply with the US LCR proposal.

On November 14, 2013, staff of the US Commodity Futures Trading Commission (CFTC) published an advisory stating that CFTC "transaction-level" requirements, such as mandatory clearing, mandatory exchange trading, real-time public reporting and external business conduct, apply to a swap between a non-US swap dealer, such as Credit Suisse International (CSI) or Credit Suisse Securities Europe Limited (CSSEL), and another non-US person if the swap is arranged, negotiated or executed by US personnel or agents of the non-US swap dealer. This advisory is currently scheduled to go into effect on September 15, 2014, and the CFTC has requested public comments on it. If this advisory is not rescinded or modified, it could result in some market disruption and impose significant compliance costs on CSI and CSSEL. In light of this advisory, on December 4, 2013, several US financial trade associations filed a lawsuit in the US District Court for the District of Columbia challenging the advisory and the CFTC's July 2013 guidance regarding the cross-border application of its swaps rules. The lawsuit asks the court to vacate the July 2013 guidance and enjoin the CFTC from enforcing its rules outside the US. Depending on the outcome of this lawsuit, the extent to which CSI and CSSEL are subject to CFTC rules may differ significantly from the framework currently applicable under the CFTC's guidance. We are monitoring the progress of the lawsuit and assessing our contingency plans for the different scenarios that could result from it.

On November 20, 2013, the Swiss Federal Council approved the final Ordinance Against Excessive Compensation (Compensation Ordinance). The Compensation Ordinance came into effect on January 1, 2014 and implements key elements of the so-called "Minder Initiative". It imposes restrictions and requirements on board and executive compensation for Swiss public companies, implements criminal sanctions in certain cases of intentional non-compliance and is generally intended to strengthen shareholder rights. Specifically, the board members, board chairperson and the compensation committee members must now be directly elected by shareholders annually, for the first time at the annual general meeting in 2014.

On December 10, 2013, US regulators released the final version of the so-called "Volcker Rule", which limits the ability of banking entities to sponsor or invest in certain private equity or hedge funds and to engage in certain types of proprietary trading. The final rule extended the end of the conformance period for the Volcker Rule until July 21, 2015 (with the possibility of extensions under certain circumstances), by which time financial institutions subject to the rule must bring their activities and investments into compliance. We are analyzing the final rule, assessing how it

affects our businesses, and re-initiating an implementation program to come into compliance.

On December 11, 2013, the European Parliament reached a political agreement with the European Council Presidency on a legislative proposal for a directive establishing a framework for the recovery and resolution of credit institutions and investment firms, known as the Bank Recovery and Resolution Directive. The framework will give national regulators wide-ranging powers (notably new bail-in powers) to intervene where an entity is likely to fail in order to avoid adverse effects on wider financial stability. It is anticipated that the Bank Recovery and Resolution Directive will enter into force on January 1, 2015 and the bail-in powers will become effective on January 1, 2016 at the latest. Our EU subsidiaries will be affected to varying degrees.

On December 13, 2013, the Swiss Federal Council launched a consultation process for a new act to be named Financial Market Infrastructure Act (FMIA). The core purpose of the FMIA is to adjust Swiss regulation of financial market infrastructure and derivatives trading to market developments and international requirements, in particular the regulation on over-the-counter (OTC) Derivatives, Central Counterparties and Trade Repositories (also known as the European Market Infrastructure Regulation, or EMIR) of the EU. In addition, it proposes to amend the Swiss Federal Law on Banks and Savings Banks of November 8, 1934, as amended (Bank Law), seeking to subject parent companies of financial groups or conglomerates and certain unregulated companies of the group domiciled in Switzerland to the Swiss resolution regime that applies to banks. If enacted, Credit Suisse Group would, and certain of its unregulated subsidiaries could, become subject to the Swiss bank resolution regime and the resolution authority of FINMA. The consultation process on FMIA is scheduled to run until March 31, 2014.

On December 18, 2013, the UK Financial Services Act 2013 (Banking Reform Act) was enacted. The Banking Reform Act provides for the creation of a "retail ring-fence" that will prohibit large retail deposit banks from engaging in a broad range of investment and other banking activities in the same entity. However, it is expected that our Private Banking & Wealth Management business in the UK may benefit from the de minimis exemption from the retail ring-fence requirements which is anticipated to exclude certain banks holding core deposits of below £25 billion. The Banking Reform Act also introduces certain other reforms, including requirements for primary loss absorbing capacity in order to facilitate the use of the new bail-in tool, which is itself introduced by the Banking Reform Act. The Banking Reform Act will also establish a more stringent regulatory regime for certain senior personnel of the bank, as well as create a new criminal offense for reckless mismanagement in the banking industry. Secondary legislation to fully implement the Banking Reform Act is expected to be completed by May 2015. The governance rules and the bail-in tool will impact our UK entities, such as CSI and CSSEL.

On December 18, 2013, the Swiss Federal Council adopted the mandate for negotiations regarding a revision of the taxation of savings agreement between the EU and Switzerland. The envisaged revision should bring the agreement in line with the planned revision of the EU

Savings Directive and close current perceived gaps. Switzerland and the EU have officially started negotiations on January 17, 2014.

On December 20, 2013, the CFTC made comparability determinations for some swap dealer entity-level and transaction-level requirements for certain jurisdictions, including the EU. As a result of these determinations, CSI and CSSEL may comply with local EU rules in lieu of certain CFTC requirements regarding risk management, internal controls, chief compliance officer duties and reports, recordkeeping, swap confirmations, portfolio reconciliation and compression, and swap valuation. In addition, the CFTC issued two no-action letters deferring certain CFTC requirements, most notably with respect to trade reporting for swaps with non-US persons, thereby allowing the CFTC more time to consider the comparability of similar rules in other jurisdictions. If the CFTC does not ultimately grant substituted compliance for reporting of swaps with non-US persons, CSI and CSSEL could incur significant operational costs and may lose swap business from non-US clients who do not wish for their trades to be reported to US regulators.

On January 14, 2014, the European Commission, Parliament and Council reached a political agreement on a revised EU Markets in Financial Instruments Directive (MiFID II) and related regulation (MiFIR), which are likely to be enacted in 1Q14. It is expected that the provisions thereof will have to be implemented in the member states and come into effect during the second half of 2016. Although the final text has not yet been published, the European Commission announced that an agreement has been reached to introduce an EU harmonized regime for the cross-border provision of investment services to professional and eligible counterparties in the EU. This new regime for granting access to EU markets for financial services providers based in third countries, including Switzerland, would be based on the positive equivalence determination of the relevant third country jurisdiction by the European Commission and allow for an EU wide passport when providing professional services. Third country financial services providers would be able to continue to provide services and activities to such clients in member states in accordance with national regimes over a transitional period of three years and then pending European Commission's equivalence decisions.

On January 16, 22 and 27, 2014, specified types of interest rate swaps and index credit default swaps (CDS) were deemed "made available to trade" by CFTC-registered swap execution facilities (SEFs). As a result, effective 30 days after those determinations, those types of swaps must be executed on a SEF or designated contract market, unless an exception or exemption applies. It is possible that certain classes of market participants, including some clients of Credit Suisse, will not be prepared to satisfy this requirement, which could result in market disruption and a loss of swap trading revenue for Credit Suisse.

► Refer to "Regulation and supervision" in I – Information on the company in the Credit Suisse Annual Report 2012 for further information.

► Refer to "Regulatory developments and proposals" in II – Treasury, risk, balance sheet and off-balance sheet – Capital management – Regulatory capital framework and "Liquidity and funding management" in II – Treasury, risk, balance sheet and off-balance sheet for further information.

Core Results

In 4Q13, we recorded a net loss attributable to shareholders of CHF 476 million. Net revenues were CHF 5,920 million and total operating expenses were CHF 6,396 million.

In our strategic businesses, we reported income from continuing operations before taxes of CHF 1,448 million and in our non-strategic businesses we reported a loss from continuing operations before taxes of CHF 1,977 million in 4Q13.

RESULTS OVERVIEW

Core Results net revenues of CHF 5,920 million increased 5% compared to 4Q12.

In our strategic businesses, net revenues were stable at CHF 6,038 million compared to 4Q12 with stable net revenues in Private Banking & Wealth Management, reflecting higher transaction- and performance based revenues and higher recurring commissions and fees, offset by lower other revenues and lower net interest income. A decrease in Investment Banking was driven by lower client trading activity in the fixed income business and lower advisory results, partially offset by increased revenues from our equity sales and trading and equity underwriting businesses.

In our non-strategic businesses, net revenue losses of CHF 118 million in 4Q13 improved from net revenue losses of CHF 456 million in 4Q12. Improved results in Investment Banking were driven by portfolio valuation gains, particularly in our legacy fixed income wind-down portfolio, reflecting various portfolio management measures, while improved results in Corporate Center were primarily due to lower fair value losses from movements in own credit spreads in 4Q13. An increase in Private Banking & Wealth Management reflected higher investment-related gains partially offset by lower revenues resulting from the sale of businesses.

► Refer to "Private Banking & Wealth Management", "Investment Banking" and "Corporate Center" for further information.

Provision for credit losses of CHF 53 million in 4Q13 primarily reflected net provisions of CHF 44 million in Private Banking & Wealth Management and CHF 8 million in Investment Banking.

Total operating expenses of CHF 6,396 million were up 24% compared to 4Q12, primarily reflecting 53% higher general and administrative expenses and 6% higher compensation and benefits. In strategic businesses, total operating expenses of CHF 4,554 million increased 5% from 4Q12, mainly reflecting higher compensation and benefits, driven by higher discretionary performance-related compensation expense due to variable compensation accruals, reflecting 2013 full-year results, and higher fee-based revenues. In non-strategic businesses total operating expenses of CHF 1,842 million increased 122% from 4Q12, primarily reflecting higher general and administrative expenses, partially offset by a decrease in compensation and benefits. The increase in general and administrative expenses was primarily due to significantly higher litigation provisions in 4Q13. We recorded provisions of CHF 806 million in connection with mortgage-related matters, including in connection with the agreement with the Federal Housing Finance Agency (FHFA) on March 21, 2014 to settle certain litigation relating to mortgage-backed securities, and CHF 600 million in connection with the US tax matter, including CHF 175 million in connection with the settlement with the SEC in February 2014.

► Refer to "Note 29 – Litigation" in III – Condensed consolidated financial statements – unaudited for further information on litigation.

A significant portion of our business requires inter-regional coordination in order to facilitate the needs of our clients. The methodology for allocating our results by region is dependent on management judgment. For Wealth Management Clients and Corporate & Institutional Clients, results are allocated based on the management reporting structure of our relationship managers and the region where the transaction is recorded. For Asset Management, results are allocated based on the location of the investment advisors and sales teams. For Investment Banking, trading results are allocated based on where the risk is primarily managed and fee-based results are allocated where the client is domiciled.

Income tax benefit of CHF 63 million recorded in 4Q13 included the impact of the geographical mix of results, an income tax benefit of CHF 367 million relating to tax deductions arising from participation valuations and the re-measurement of existing deferred tax assets on net operating losses due to changes in forecasted earnings, partially offset by a tax charge of CHF 278 million relating to a valuation allowance recognized on existing deferred tax assets in respect of one of the Group's entities in the UK. Overall, net deferred tax assets decreased CHF 148 million to CHF 5,791 million as of the end of 4Q13 compared to 3Q13. Deferred tax assets on net operating losses decreased by CHF 227 million to CHF 1,380 million during 4Q13. The Core Results effective tax rate was 11.9% in 4Q13, compared to 53.5% in 3Q13.

► Refer to "Note 21 – Tax" in III – Condensed consolidated financial statements – unaudited for further information.

For the full year 2013, net income attributable to shareholders was CHF 2,326 million, up 72% compared to 2012. Net revenues were CHF 25,217 million, up 8% compared to 2012.

Strategic net revenues were stable at CHF 25,543 million compared to 2012 with stable net revenues for Private Banking & Wealth Management, reflecting higher transaction- and performance-based revenues and higher recurring commissions and fees offset by lower net interest income and other revenues. Strategic net revenues for Investment Banking were slightly lower,

reflecting decreased revenues in fixed income sales and trading and advisory revenues, partially offset by increased revenues in equity sales and trading and debt and equity underwriting.

In our non-strategic businesses, net revenue losses of CHF 326 million in 2013 improved from net revenue losses of CHF 2,242 million in 2012. An improvement in Corporate Center mainly reflected fair value losses of CHF 315 million from movements in own credit spreads in 2013 compared to fair value losses from movements in own credit spreads of CHF 2,939 million in 2012. Improved results in Investment Banking were driven by portfolio valuation gains and lower funding costs, while a decrease in Private Banking & Wealth Management was due to lower recurring commissions and fees and lower transaction- and performance-based revenues, reflecting the impact of sales of non-strategic businesses during the course of the year.

Provision for credit losses decreased 2%, reflecting decreases in Private Banking & Wealth Management that were partly offset by increases in Investment Banking.

Compensation and benefits decreased 9%, due to lower discretionary performance-related compensation expense and lower salary expense, reflecting lower headcount. General and administrative expenses increased 19%, reflecting substantially higher litigation provisions in Investment Banking and Private Banking & Wealth Management.

¹ Core Results include the results of our integrated banking business, excluding revenues and expenses in respect of noncontrolling interests without SEI.

² Calculated using income after tax denominated in CHF; assumes tax rate of 30% in 4Q13 and 3Q13, 25% in 4Q12 and capital allocated at 10% of average risk-weighted assets.

³ Represents risk-weighted assets on a fully phased-in "look-through" basis.

Cost savings and strategy implementation

We continued to adapt our client-focused, capital-efficient strategy to optimize our use of capital and improve our cost structure. We target cost savings of CHF 3.8 billion by the end of 2014 and more than CHF 4.5 billion by the end of 2015. These targets are measured against our annualized 6M11 expense run rate measured at constant foreign exchange rates and adjusted to exclude business realignment and other significant non-operating expenses and variable compensation expenses.

The majority of the expected future savings is expected to be realized from shared infrastructure and support services across the Group, mainly through the consolidation of fragmented and duplicate functions globally and the continued consolidation of IT applications and functions.

We have also targeted further savings within our two operating divisions. Within Private Banking & Wealth Management, we expect to deliver cost benefits from the creation of the integrated Private Banking & Wealth Management division, exiting a number

of small non-strategic markets, repositioning select non-profitable onshore operations, rationalization of front office and support functions, including simplification of our operating platform, streamlining of the offshore affluent and Swiss client coverage model and from announced divestitures. Within Investment Banking, we expect to deliver cost benefits from the restructuring of our rates business, the initiatives already completed in 2012, from continuing to review and realize efficiencies across business lines and geographic regions and from continuing to refine our business mix and align resources with highest returning opportunities. We expect to incur approximately CHF 1.4 billion of business realignment costs associated with these measures during the course of 2014 to 2015.

We incurred CHF 131 million of business realignment costs associated with these measures in 4Q13.

► Refer to "Cost savings and strategy implementation" in II – Operating and financial review – Core Results – Information and developments in the Credit Suisse Annual Report 2012 for further information.

Compensation and benefits

Compensation and benefits for a given year reflect the strength and breadth of the business results and staffing levels and include fixed components, such as salaries, benefits and the amortization of share-based and other deferred compensation from prior-year awards, and a discretionary variable component.

The variable component reflects the performance-based variable compensation for the current year. The portion of the performance-based compensation for the current year deferred through share-based and other awards is expensed in future periods and is subject to vesting and other conditions.

► Refer to "Compensation and benefits" in II – Operating and financial review – Core Results – Information and developments in the Credit Suisse Annual Report 2012 for further information.

Variable compensation for 2013

Part of deferred compensation for 2013 was awarded in the form of Contingent Capital Awards (CCA). The CCA plan is a new deferred compensation plan for Executive Board members, managing directors and directors. These awards convey similar rights and risks to those of certain of the contingent capital instruments that have been issued by us in the market. As CCA qualify as additional tier 1 capital of the Group, their vesting and the form of distribution to employees upon settlement is subject to approval by FINMA. Prior to settlement, CCA are subject to being cancelled in full upon specified triggering events, including the Group's Basel III common equity tier 1 (CET1) ratio falling below specified levels, or a determination by FINMA that cancellation of the CCA and other similar capital instruments is necessary, or that we require public sector capital support, to prevent us from becoming insolvent.

Personnel

Headcount at the end of 4Q13 was 46,000, down 400 from 3Q13 and down 1,400 from 4Q12. The decrease in 4Q13 reflected headcount reductions in Investment Banking and Private Banking & Wealth Management resulting from our cost efficiency initiatives.

Number of employees by division

| end of | 4Q13 | 3Q13 | 4Q12 |
|--|---------------|---------------|---------------|
| Number of employees by division (full-time equivalents) | | | |
| Private Banking & Wealth Management | 26,000 | 26,100 | 27,300 |
| Investment Banking | 19,700 | 20,000 | 19,800 |
| Corporate Center | 300 | 300 | 300 |
| Number of employees | 46,000 | 46,400 | 47,400 |

Key performance indicators

Our key performance indicators (KPIs) for the Group and for our Private Banking & Wealth Management and Investment Banking divisions reflect our strategic plan, the regulatory environment and the market cycle. With the revised presentation of strategic and non-strategic results for the Group, our stated KPIs are measured on the basis of reported results rather than on the basis of underlying results as was the case in prior periods beginning in 1Q13.

We believe the execution of our strategic initiatives including the run-off of non-strategic operations, will enable us achieve our targets over a three to five year period across market cycles.

► Refer to "Key performance indicators" in Private Banking & Wealth Management and Investment Banking results for further information on divisional KPIs.

Collaboration revenues

Beginning 2Q13, collaboration revenues are calculated as the percentage of the Group's net revenues represented by the aggregate collaboration revenues arising when more than one of the Group's divisions participate in a transaction.

Additionally, within the Private Banking & Wealth Management division, collaboration revenues include revenues arising from cross-selling and client referral activities between the Wealth Management Clients and Corporate & Institutional Clients businesses on the one hand and the Asset Management and the securities trading and sales businesses on the other hand. Prior period measures of collaboration revenues were not materially impacted by this change and have not been restated. Collaboration revenues are measured by a dedicated governance structure and implemented through an internal revenue sharing structure. Only the net revenues generated by a transaction are considered. Position risk related to trading revenues, private equity and other investment-related gains, valuation adjustments and centrally managed treasury revenues are not included in collaboration revenues.

Key performance indicators

Our KPIs are targets to be achieved over a three to five year period across market cycles. As such, year to date results may be more meaningful than individual quarterly results. Our KPIs are assessed annually as part of our normal planning process and may be revised to reflect our strategic plan, the regulatory environment and market and industry trends.

| in / end of | Target | 4Q13 | 2013 | 2012 |

¹ Source: Bloomberg. Total shareholder return is calculated as equal to the appreciation or depreciation of a particular share, plus any dividends, over a given period, expressed as a percentage of the share's value at the beginning of the period.

² The peer group for this comparison comprises Bank of America, Barclays, BNP Paribas, Citigroup, Deutsche Bank, HSBC, JPMorgan Chase, Société Générale and UBS. The total shareholder return of this peer group is calculated as a simple, unweighted average of the return reported by Bloomberg for each of the members of the peer group.

Private Banking & Wealth Management

In 4Q13, we reported income before taxes of CHF 424 million and net revenues of CHF 3,429 million.

In our strategic businesses, we reported income before taxes of CHF 1,048 million and net revenues of CHF 3,260 million. Compared to 4Q12, income before taxes increased 2%, with higher transaction- and performance-based revenues, higher recurring commissions and fees, lower net interest income and slightly higher operating expenses.

In our non-strategic businesses, we reported a loss before taxes of CHF 624 million reflecting higher litigation

provisions in 4Q13 in connection with the US tax matter. In 3Q13, we reported income before taxes of CHF 210 million, which included gains from the sale of former Asset Management businesses.

For 2013, we reported income before taxes of CHF 3,240 million and net revenues of CHF 13,442 million. In our strategic businesses, we reported income before taxes of CHF 3,627 million and net revenues of CHF 12,434 million. In our non-strategic businesses, we reported a loss before taxes of CHF 387 million and net revenues of CHF 1,008 million.

Strategic results

OVERVIEW

Our strategic results comprise businesses from Wealth Management Clients, Corporate & Institutional Clients and Asset Management.

4Q13 results

In 4Q13, our strategic businesses reported income before taxes of CHF 1,048 million and net revenues of CHF 3,260 million.

Net revenues were 11% higher compared to 3Q13 largely driven by significant seasonal performance fees. Compared to 4Q12, net revenues were stable due to higher transaction- and performance-based revenues and higher recurring commissions and fees, offset by lower other revenues and lower net interest income. Provision for credit losses was CHF 27 million on a net loan portfolio of CHF 212 billion. Total operating expenses were slightly higher compared to 3Q13 and 4Q12.

Full-year 2013 results

In 2013, our strategic businesses reported income before taxes of CHF 3,627 million and net revenues of CHF 12,434 million.

Net revenues were stable compared to 2012, with higher transaction- and performance-based revenues and higher recurring commissions and fees offset by lower net interest income and lower other revenues. Provision for credit losses was CHF 82 million in 2013 on a net loan portfolio of CHF 212 billion. Total operating expenses were stable compared to 2012 reflecting slightly lower compensation and benefits offset by higher commission expenses.

¹ Calculated using income after tax denominated in CHF; assumes tax rate of 30% in 4Q13 and 3Q13, 29% in 2013, 25% in 4Q12 and 2012 and capital allocated at 10% of average risk-weighted assets.

² Includes the impact of an operational risk add-on of CHF 1.6 billion in 4Q13.

RESULTS DETAIL

The following provides a comparison of our 4Q13 strategic results versus 4Q12 (YoY) and versus 3Q13 (QoQ).

Net revenues

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees and fees for general banking products and services. Transaction- and performance-based revenues arise primarily from brokerage and product issuing fees, foreign exchange fees from client transactions, performance-based fees related to assets under management and custody assets, trading and sales income, placement fees, equity participations income and other transaction-based income. Other revenues include investment-related gains and losses and equity participations and other gains and losses.

YoY: Stable at CHF 3,260 million

Net revenues were stable as higher transaction- and performance-based revenues and higher recurring commissions and fees were offset by lower other revenues and lower net interest income. Transaction- and performance-based revenues were higher, mainly driven by higher performance fees and carried interest, higher placement fees, and higher sales and trading income, partially offset by lower revenues from integrated solutions. Higher recurring commissions and fees reflected higher asset management fees, higher investment account and services fees, higher banking services fees, and higher discretionary mandate management fees, partially offset by lower investment product management fees. Lower other revenues mainly reflected an impairment related to Asset Management Finance LLC (AMF) of CHF 68 million in 4Q13, compared to 4Q12 gains of CHF 45 million relating to the sale of Wincasa and gains of CHF 25 million related to a recovery case in Corporate & Institutional Clients, partially offset by a 4Q12 impairment of CHF 16 million related to AMF. In a low

interest rate environment, net interest income decreased due to significantly lower deposit margins and slightly lower loan margins on higher average deposit and loan volumes.

QoQ: Up 11% from CHF 2,934 million to CHF 3,260 million

Higher net revenues primarily reflected significantly higher transaction- and performance-based revenues, partially offset by lower other revenues. Significantly higher transaction- and performance-based revenues reflected seasonally higher performance fees and carried interest and higher placement and transaction fees. Lower other revenues reflected the impairment of CHF 68 million related to AMF in 4Q13 compared to an impairment of CHF 18 million in 3Q13. Stable recurring commissions and fees mainly reflected lower investment product management fees offset by higher asset management fees. Stable net interest income reflected slightly lower deposit and loan margins on stable average deposit and loan volumes.

Provision for credit losses

The Wealth Management Clients loan portfolio is substantially comprised of residential mortgages in Switzerland and loans collateralized by securities. Our Corporate & Institutional Clients loan portfolio has relatively low concentrations and is mainly secured by mortgages, securities and other financial collateral.

YoY: Down 43% from CHF 47 million to CHF 27 million

Provision for credit losses decreased. Wealth Management Clients recorded net provisions of CHF 18 million and Corporate & Institutional Clients recorded net provisions of CHF 9 million in 4Q13.

QoQ: Up 108% from CHF 13 million to CHF 27 million

Provision for credit losses was lower in Wealth Management Clients and higher in Corporate & Institutional Clients. In 3Q13, Wealth Management Clients recorded net provisions of CHF 21 million while Corporate & Institutional Clients recorded a release of provisions of CHF 8 million relating to a small number of large cases.

Operating expenses

Compensation and benefits

YoY: Up 3% from CHF 1,202 million to CHF 1,242 million

Slightly higher compensation and benefits reflected higher discretionary performance-related compensation driven by higher fee-based revenues.

QoQ: Up 3% from CHF 1,205 million to CHF 1,242 million

Slightly higher compensation and benefits reflected higher discretionary performance-related compensation driven by higher fee-based revenues.

General and administrative expenses

YoY: Down 4% from CHF 781 million to CHF 750 million

Lower general and administrative expenses reflected lower travel and entertainment and lower advertising and marketing costs.

QoQ: Up 3% from CHF 726 million to CHF 750 million

Slightly higher general and administrative expenses reflected higher professional services fees, higher advertising and marketing and higher travel and entertainment costs.

WEALTH MANAGEMENT CLIENTS

Net revenues

Net interest income

YoY: Down 5% from CHF 804 million to CHF 760 million

Lower net interest income reflected significantly lower deposit margins on slightly higher average deposit volumes and lower loan margins on higher average loan volumes.

QoQ: Stable at CHF 760 million

Stable net interest income reflected stable deposit margins and slightly lower loan margins on stable average deposit and loan volumes.

Recurring commissions and fees

YoY: Up 8% from CHF 685 million to CHF 742 million

Higher recurring commissions and fees reflected higher investment account and services fees, higher banking services fees and higher discretionary mandate management fees, partially offset by slightly lower investment product management fees.

QoQ: Stable at CHF 742 million

Recurring commissions and fees were stable, reflecting lower investment product management fees partially offset by slightly higher investment account and services fees.

Transaction- and performance-based revenues

YoY: Down 5% from CHF 584 million to CHF 554 million

Lower transaction- and performance-based revenues reflected lower revenues from integrated solutions.

QoQ: Stable at CHF 554 million

Stable transaction- and performance-based revenues reflected semi-annual performance fees from Hedging-Griffo and higher brokerage and product issuing fees, offset by lower foreign exchange client business.

Beginning in 2Q13, fees collected in an agent role in connection with certain customized fund services we provide to clients where those fees are passed on directly to a third-party investment manager are now presented on a net basis per the applicable accounting standards. These fees were previously recorded on a gross basis as fee income and commission expense. Prior periods have been restated to conform to the current presentation.

¹ Reflects gains of CHF 41 million in 2Q12 related to the sale of a non-core business from the integration of Clariden Leu.

² Net revenues divided by average assets under management.

Gross margin

Our gross margin was 104 basis points in 4Q13, five basis points lower compared to 4Q12, mainly reflecting a continued adverse interest rate environment and 5% higher average assets under management. Compared to 3Q13, the gross margin was one basis point lower.

CORPORATE & INSTITUTIONAL CLIENTS

Net revenues

Net interest income

YoY: Down 7% from CHF 299 million to CHF 278 million

The decrease reflected significantly lower deposit margins on higher average deposit volumes, partially offset by higher loan margins on higher average loan volumes.

QoQ: Stable at CHF 278 million

Stable net interest income reflected lower deposit margins on higher average deposit volumes and slightly lower loan margins on stable average loan volumes.

Recurring commissions and fees

YoY: Down 5% from CHF 114 million to CHF 108 million

The decrease in recurring commissions and fees primarily reflected lower investment product management fees, partially offset by higher investment account and services fees.

QoQ: Down 8% from CHF 117 million to CHF 108 million

Recurring commissions and fees included lower banking services and lower investment product management fees partially offset by higher investment account and services fees.

Transaction- and performance-based revenues

YoY: Stable at CHF 102 million

Stable transaction- and performance-based revenues reflected higher trading and sales income and higher foreign exchange client business, offset by lower revenues from integrated solutions.

QoQ: Down 3% from CHF 105 million to CHF 102 million

Lower transaction- and performance-based revenues reflected lower brokerage and product issuing fees.

¹ Includes fair value losses of CHF 6 million on the Clock Finance transaction and gains of CHF 25 million related to a recovery case in 4Q12. Other periods presented relate to fair value gains/(losses) on the Clock Finance transaction.

ASSET MANAGEMENT

Net revenues

Fee-based revenues

YoY: Up 38% from CHF 559 million to CHF 769 million

The increase reflected higher performance fees, asset management fees and private equity placement fees. Higher performance fees were recognized primarily from single manager hedge funds and Hedging-Griffo. The higher asset management fees reflected higher average assets under management in alternative products.

QoQ: Up 95% from CHF 394 million to CHF 769 million

The increase primarily reflected higher performance fees, carried interest on realized private equity gains and private equity placement fees. The increase in performance fees primarily reflected annual performance fees from single manager hedge funds and semi-annual fees from Hedging-Griffo.

Investment-related gains/(losses)

YoY: Up 27% from CHF 15 million to CHF 19 million

In 4Q13, gains of CHF 19 million reflected gains in hedge fund investments. In 4Q12, gains of CHF 15 million reflected gains in hedge fund investments and the real estate sector.

QoQ: Up from CHF (2) million to CHF 19 million

In 4Q13, gains of CHF 19 million reflected gains in hedge fund investments.

Equity participations and other gains/(losses)

YoY: Down from CHF 35 million to CHF (68) million

In 4Q13, we recognized an impairment of CHF 68 million related to AMF. In 4Q12, we recognized a gain of CHF 45 million from the sale of Wincasa which was partially offset by an impairment of CHF 16 million related to AMF.

QoQ: Down from CHF (18) million to CHF (68) million

In 4Q13, we recognized the impairment related to AMF. In 3Q13, we recognized an impairment of CHF 18 million related to AMF.

¹ Includes outflows for private equity assets reflecting realizations at cost and unfunded commitments on which a fee is no longer earned.

Non-strategic results

OVERVIEW

Our non-strategic businesses for Private Banking & Wealth Management include positions relating to the restructuring of the former Asset Management division, run-off operations relating to our small markets exit initiative and certain legacy cross-border related run-off operations, litigation costs, primarily related to the US tax matter, the impact of restructuring our German onshore operations, other smaller non-strategic positions formerly in our Corporate & Institutional Clients business and the run-off and active reduction of selected products.

4Q13 results

In 4Q13, our non-strategic businesses reported a loss before taxes of CHF 624 million reflecting substantially higher litigation provisions of CHF 600 million in connection with the US tax matter, including CHF 175 million in connection with the settlement with the SEC in February 2014. In 3Q13, we reported income before taxes of CHF 210 million, which included gains from the sale of former Asset Management businesses.

Full-year 2013 results

For 2013, our non-strategic businesses reported a loss before taxes of CHF 387 million compared to CHF 401 million in 2012. Net revenues of CHF 1,008 million were significantly lower compared to 2012 due to lower recurring commissions and fees and lower transaction- and performance-based revenues, reflecting the impact of sales of non-strategic businesses during the course of the year. The results in 2013 also reflected the CHF 237 million gain on the sale of our exchange-traded funds (ETF) and secondary private equity businesses and investment-related gains of CHF 128 million, compared to the gain of CHF 384 million in 2012 on the sale of our ownership interest in Aberdeen.

Provision for credit losses was CHF 70 million in 2013 on a net loan portfolio of CHF 4 billion.

Total operating expenses were higher compared to 2012, mainly reflecting substantially higher litigation provisions of CHF 600 million in connection with the US tax matter, including CHF 175 million in connection with the settlement with the SEC in February 2014, and higher professional services fees related to the sale of businesses, partially offset by lower compensation and benefits.

RESULTS DETAIL

The following provides a comparison of our 4Q13 non-strategic results versus 4Q12 (YoY) and versus 3Q13 (QoQ).

Net revenues

YoY: Up 74% from CHF 97 million to CHF 169 million

The increase in net revenues reflected higher investment-related gains partially offset by lower revenues resulting from the sale of businesses. Investment-related gains were CHF 26 million in 4Q13 compared to losses of CHF 90 million primarily related to the planned sale of certain private equity investments in 4Q12. These gains were partially offset by lower asset management and placement fees, primarily reflecting the sales in 3Q13 of our ETF and secondary private equity businesses.

QoQ: Down 56% from CHF 382 million to CHF 169 million

The decrease mainly reflected equity participation gains of CHF 237 million from the sales of our ETF and secondary private equity businesses in 3Q13.

Operating expenses

YoY: Up 300% from CHF 194 million to CHF 776 million

Higher operating expenses reflected substantially higher litigation provisions of CHF 600 million in connection with the US tax matter, including CHF 175 million in connection with the settlement

with the SEC in February 2014, and higher professional services fees resulting from the sale of former Asset Management businesses, partially offset by lower commission and compensation expenses relating to the sales. We also recognized a goodwill impairment of CHF 12 million resulting from the creation of the non-strategic reporting unit in 4Q13.

QoQ: Up 414% from CHF 151 million to CHF 776 million

The higher litigation provisions, the goodwill impairment charge and higher professional services fees relating to the sales of businesses were partially offset by lower compensation expense.

Business developments

In December 2013, we completed the sales of a limited partnership interest and a private equity business resulting in a reduction in our consolidated assets of approximately CHF 450 million and Basel III risk-weighted assets of approximately CHF 340 million.

In January 2014, we completed the sale of CFG, our private equity fund of funds and co-investment business, to Grosvenor Capital Management. We expect to recognize a gain of approximately CHF 90 million in 1Q14.

In December 2013, we announced the sale of our domestic private banking business booked in Germany to ABN AMRO. This transaction is expected to close in the course of 2014.

Assets under management

In **4Q13**, assets under management of CHF 1,282.4 billion increased 1.1% compared to the end of 3Q13, as positive market movements and net new assets were partially offset by adverse foreign exchange-related movements and structural effects mostly arising from disposals of businesses in the division.

In our strategic portfolio, Wealth Management Clients contributed net new assets of CHF 1.7 billion in 4Q13 with continued strong inflows from emerging markets, partially offset by Western European cross-border outflows. Corporate & Institutional Clients in Switzerland reported net new assets of CHF 4.0 billion in 4Q13. Asset Management reported net asset outflows of CHF 0.5 billion in 4Q13, mainly from multi-asset class solutions and fixed income products partially offset by inflows in index strategies and credit products.

Assets under management of CHF 44.4 billion in our non-strategic portfolio relate to businesses we are exiting, including CFGI and our domestic private banking business booked in Germany.

In **2013**, assets under management of CHF 1,282.4 billion increased 2.5% compared to 2012, reflecting net new assets of CHF 32.1 billion and positive market movements, partially offset by adverse foreign exchange-related movements and structural effects.

In our strategic portfolio, Wealth Management Clients contributed net new assets of CHF 18.9 billion, particularly from inflows from emerging markets and our ultra-high-net-worth individual (UHNWI) client segment, partially offset by Western European cross-border outflows. Corporate & Institutional Clients in Switzerland reported strong net new assets of CHF 8.8 billion. Asset Management reported significant net new assets of CHF 15.0 billion, mainly from credit, index strategies and hedge fund products, partially offset by outflows from fixed income.

In our non-strategic portfolio, assets under management declined 47.6% to CHF 44.4 billion mainly reflecting the sale of our ETF and secondary private equity businesses.

¹ Assets managed by Asset Management for Wealth Management Clients, Corporate & Institutional Clients and non-strategic businesses.

Investment Banking

In 4Q13, Investment Banking reported a loss before taxes of CHF 564 million. Results reflect solid performance in our strategic businesses and an increased loss before taxes in our non-strategic businesses, driven by significantly increased litigation provisions in connection with mortgage-related matters. In our strategic businesses, net revenues declined 5% compared to 4Q12, as lower client trading activity in our fixed income business and lower advisory results offset improved performance from our equities franchise. Compared to 3Q13, our strategic businesses delivered resilient revenues reflecting solid results in our equities and underwriting franchises. Our non-strategic businesses reported a loss before taxes of CHF 1,032 million, including litigation provisions in connection with the agreement with the Federal Housing Finance Agency (FHFA) on March 21, 2014 to settle certain litigation relating to mortgage-backed securities.

For full year 2013, total Investment Banking income before taxes was CHF 1,719 million, with net revenues of CHF 12,565 million. Our income before taxes decreased by 14% while revenues remained stable. We also reported

lower leverage levels and capital usage from 2012. Our strategic businesses reported income before taxes of CHF 3,853 million and net revenues of CHF 13,164 million. Our non-strategic businesses reported a loss before taxes of CHF 2,134 million, including the litigation provisions in connection with the agreement with the FHFA and net revenue losses of CHF 599 million.

As of the end of 4Q13, we reported total assets of USD 565 billion, exceeding our Investment Banking balance sheet target of less than USD 600 billion of assets by year-end 2013. Additionally, we reported Swiss leverage exposure of USD 812 billion, exceeding our target of less than USD 840 billion by year-end 2013.

In 2013, we reduced risk-weighted assets under Basel III by USD 11 billion to USD 176 billion as of the end of 4Q13, compared to our year-end target of USD 175 billion. Business reductions of USD 27 billion were partially offset by increases of USD 10 billion from methodology changes and parameter updates and an operational risk add-on in 4Q13 of USD 6 billion.

Strategic results

OVERVIEW

4Q13 results

In 4Q13, our strategic businesses reported income before taxes of CHF 468 million and net revenues of CHF 2,795 million.

Fixed income sales and trading revenues declined from 4Q12, reflecting continued low client trading activity, particularly in global macro products, which includes our rates, foreign exchange and commodities businesses. Revenues also declined compared to 3Q13 due to lower client trading activity in leveraged finance, emerging markets and rates businesses.

Equity sales and trading revenues increased from 4Q12 reflecting continued market leadership, higher equity values and increased client activity. Compared to 3Q13, equity sales and trading revenues were stable.

Underwriting and advisory results were lower compared to 4Q12 as robust equity underwriting performance was offset by lower debt underwriting and advisory revenues. Compared to 3Q13, revenues increased substantially driven by strong equity underwriting issuance activity as well as higher debt underwriting and advisory results.

Compensation and benefits increased compared to both 4Q12 and 3Q13 driven by higher discretionary performance-related compensation expense. Total other operating expenses declined 7% compared to 4Q12 and were stable compared to 3Q13.

Results in 4Q13 were impacted by the weakening of the average rate of the US dollar against the Swiss franc, compared to 4Q12 and 3Q13, which adversely impacted revenues and favorably impacted expenses. Compared to 4Q12, revenues declined 5% and total operating expenses increased 6% in Swiss francs while revenues declined 2% and total operating expenses increased 9% in US dollars. Compared to 3Q13, revenues were up 2% and total

operating expenses increased 12% in Swiss francs while revenues increased 5% and expenses increased 14% in US dollars.

As of the end of 4Q13, we reported risk-weighted assets under Basel III of USD 156 billion reflecting further progress in reducing our risk-weighted assets. We reduced risk-weighted assets under Basel III by USD 8 billion from 4Q12, as USD 22 billion of business reductions offset increases of USD 8 billion due to methodology changes and parameter updates and an operational risk add-on of USD 6 billion in 4Q13. Additionally, we reported Swiss leverage exposure in our strategic businesses of USD 725 billion, a reduction of USD 46 billion, or 6% from 3Q13.

Full-year 2013 results

The transformed Investment Banking division delivered strong profitability in 2013 on slightly lower revenues, a reduced cost base and lower leverage and capital usage.

Revenues in our strategic businesses were slightly lower as strong performance in our equities, credit and underwriting franchises were offset by lower rates and advisory results. Fixed income sales and trading revenues declined 15% compared to 2012, reflecting difficult trading conditions. Specifically, global macro products revenues declined substantially, primarily in rates, driven by reduced client activity and low trading volumes throughout the year. Emerging markets revenues also declined driven by lower financing and origination activity due to less favorable market conditions. Securitized products revenues decreased as higher asset finance origination was more than offset by lower agency security trading activities. These declines were partially offset by strong global credit products revenues driven by significantly higher revenues in our leveraged finance franchise.

¹ Calculated using income after tax denominated in USD; assumes tax rate of 30% in 4Q13 and 3Q13, 28% in 2013, 25% in 4Q12 and 2012 and capital allocated at 10% of average risk-weighted assets.

Equity sales and trading revenues increased 13%, reflecting continued market leadership and increased client activity notwithstanding reduced balance sheet usage. The gains included higher revenues in derivatives, systematic market making and cash equities, partially offset by lower prime services and fund-linked products results. Underwriting and advisory results increased reflecting significantly higher debt underwriting results. In addition equity underwriting results were significantly higher, driven by substantially higher revenues from IPOs and follow-on offerings. These increases were partially offset by significantly lower advisory revenues, reflecting a decline in the total industry M&A fee pool.

Total operating expenses were CHF 9,300 million, down 7% from 2012. Compensation and benefits of CHF 5,326 million decreased by CHF 555 million, or 9%, from 2012, primarily reflecting lower deferred compensation expense from prior-year awards as 2012 included 2011 Partner Asset Facility (PAF2) expenses of CHF 411 million. Total other operating expenses of CHF 3,974 million were down 3% compared to 2012.

The following provides a comparison of our strategic 4Q13 results versus 4Q12 (YoY) and versus 3Q13 (QoQ).

Net revenues**Debt underwriting**

YoY: Down 5% from CHF 508 million to CHF 483 million

The decrease was primarily due to lower results in leveraged finance as market share gains were more than offset by lower global high yield industry-wide issuance volumes. The decrease was partially offset by higher investment grade results, as market share gains more than offset lower global industry-wide issuance volumes. We also had higher structured credit revenues.

QoQ: Up 14% from CHF 424 million to CHF 483 million

The increase was due to higher revenues from leveraged finance, despite slightly lower high yield industry volumes. Results included lower investment grade revenues as an increase in global industry-wide issuance volumes was more than offset by lower market share. We also had lower emerging markets revenues driven by weaker structured lending results.

Equity underwriting

YoY: Up 64% from CHF 167 million to CHF 274 million

The improvement was driven by strong performance across most major equity markets. We had substantially higher revenues from IPOs, as higher global industry-wide issuance activity more than offset lower market share. We also had significantly higher revenues from follow-on offerings driven by higher global industry-wide issuance activity.

QoQ: Up 112% from CHF 129 million to CHF 274 million

The increase was due to substantially higher revenues from IPOs and improved convertibles results reflecting significantly higher global industry-wide issuance activity partly offset by lower market share in both products. We also had higher revenues from follow-on offerings reflecting stronger global industry-wide issuance activity.

Advisory and other fees

YoY: Down 37% from CHF 307 million to CHF 194 million

The decrease was primarily due to significantly lower M&A fees reflecting a decline in the total industry fee pool. We also had lower global completed M&A market share.

QoQ: Up 28% from CHF 152 million to CHF 194 million

The increase was driven by higher M&A fees as an improvement in global industry-wide completed M&A volumes more than offset lower global completed M&A market share.

Fixed income sales and trading

YoY: Down 32% from CHF 1,180 million to CHF 808 million

Fixed income revenues declined significantly reflecting lower client trading volumes particularly in global macro products, primarily due to substantially weaker global rates revenues, as well as lower foreign exchange and commodities results. Lower revenues in securitized products were driven by lower client trading activity in non-agency and agency securities, partially offset by stronger asset finance performance due to higher origination volumes. Corporate lending revenues also declined. Emerging markets revenues decreased, as an improved financing environment was offset by lower trading and origination activity in Brazil and Europe, Middle East and Africa (EMEA). Global credit products revenues were slightly lower reflecting higher trading activity offset by lower origination results. At the end of the quarter, fixed income risk-weighted assets under Basel III totaled USD 91 billion, a reduction of USD 10 billion, or 10%, from a year ago.

QoQ: Down 22% from CHF 1,030 million to CHF 808 million

Fixed income sales and trading revenues declined, reflecting reduced client trading activity. The decrease primarily reflected lower global credit products revenues due to significantly lower leveraged finance revenues. Emerging markets revenues were

also lower reflecting volatile trading conditions in Brazil and EMEA. Global macro products revenues declined, primarily driven by lower rates revenues, though commodities and foreign exchange performance improved from subdued 3Q13 levels. The declines were partially offset by strong securitized products results driven by significantly higher agency performance. Fixed income risk-weighted assets under Basel III increased USD 3 billion, or 3%, from 3Q13.

Equity sales and trading

YoY: Up 19% from CHF 900 million to CHF 1,070 million

Increased results reflected continued market leadership, higher equity values and increased client activity. The increase was primarily driven by substantially higher derivatives revenues due to robust client activity and strong performance in Asia. We also had higher results from systematic market making driven by improved global coverage and significant market events including quantitative easing in Japan and strong US equity markets that resulted in higher global equity volumes. Cash equities revenues increased driven by market share gains and more favorable trading conditions. Prime services revenues were resilient, albeit lower, reflecting sustained market leadership and increased client balances.

QoQ: Down 2% from CHF 1,095 to CHF 1,070 million

Results reflected higher derivatives revenues driven by higher industry trading volumes and higher cash equities results due to both higher industry volumes and market share gains in the US. These increases were offset by lower prime services revenues reflecting lower financing revenues.

Operating expenses

Compensation and benefits

YoY: Up 17% from CHF 1,139 million to CHF 1,335 million

The increase was driven by higher discretionary performance-related compensation expense due to variable compensation accruals reflecting 2013 full-year results. This increase was partially offset by lower salaries, reflecting lower headcount.

QoQ: Up 22% from CHF 1,094 million to CHF 1,335 million

The increase was primarily due to higher discretionary performance-related compensation expense due to variable compensation accrual based on full-year results.

General and administrative expenses

YoY: Down 2% from CHF 810 million to CHF 790 million

The decrease was primarily driven by lower technology costs and lower litigation provisions.

QoQ: Up 5% from CHF 754 million to CHF 790 million

The increase was primarily driven by higher legal and other professional fees. These increases were partially offset by lower litigation provisions.

Non-strategic results

OVERVIEW

Non-strategic results for Investment Banking include the fixed income wind-down portfolio, legacy rates business, primarily capital instruments that are not compliant with the Basel III capital framework and capital-intensive structured positions, legacy funding costs associated with non-Basel III compliant debt instruments, as well as certain legacy litigation costs and other small non-strategic positions.

4Q13 results

In 4Q13, we reported a loss before taxes of CHF 1,032 million and net revenue losses of CHF 127 million. Total operating expenses increased compared to 4Q12 and 3Q13, reflecting significantly higher litigation provisions, primarily in connection with mortgage-related matters of CHF 806 million. Net revenue losses were lower compared to 4Q12 and 3Q13, driven by portfolio valuation gains, particularly in our legacy fixed income wind-down portfolio, reflecting various portfolio management measures.

As of the end of 4Q13, we reported risk-weighted assets under Basel III of USD 20 billion, down USD 3 billion from the end of 4Q12. This compares to our target of USD 6 billion by year-end 2015. Additionally, we reported Swiss leverage exposure of USD 87 billion, a reduction of USD 6 billion, or 6% from 3Q13. This compares to our target of USD 24 billion in Swiss leverage exposure by year-end 2015.

Full-year 2013 results

Results reflected net revenue losses of CHF 599 million in 2013 compared to net revenue losses of CHF 827 million in 2012, driven by portfolio valuation gains and lower funding costs. Total operating expenses increased, primarily driven by significantly higher litigation provisions. In 2013, we reduced risk-weighted assets under Basel III by USD 3 billion to USD 20 billion from the end of 2012.

The following provides a comparison of our non-strategic 4Q13 results versus 4Q12 (YoY) and versus 3Q13 (QoQ).

Net revenues

YoY: Up 56% from CHF (286) million to CHF (127) million

We had reduced net revenue losses driven by significant valuation gains, particularly in our fixed income wind-down portfolio and our legacy rates business, driven by various portfolio management measures. At the end of the quarter, risk-weighted assets under Basel III totaled USD 20 billion, a reduction of USD 3 billion.

QoQ: Up 35% from CHF (196) million to CHF (127) million

Results reflected reduced net revenue losses driven by significant valuation gains, particularly in our fixed income wind-down portfolio and legacy rates business, driven by various portfolio management measures. At the end of the quarter, risk-weighted assets under Basel III of USD 20 billion were flat compared to 3Q13.

Total operating expenses

YoY: Up 442% from CHF 167 million to CHF 905 million

The increase was driven by significantly higher litigation provisions, primarily CHF 806 million in connection with mortgage-related matters in 4Q13, including in connection with the March 2014 FHFA settlement.

QoQ: Up 268% from CHF 246 million to CHF 905 million

The increase was driven by higher other operating expenses in 4Q13, reflecting the higher litigation provisions.

Corporate Center

In 4Q13, we recorded a loss before taxes of CHF 389 million, primarily reflecting fair value losses from movements in own credit spreads and business realignment costs. These negative impacts were partially offset by gains from the sale of real estate.

For 2013, we reported a loss before taxes of CHF 1,455 million, primarily reflecting business realignment costs, fair value losses from movements in own credit spreads, reclassifications to discontinued operations and gains from the sale of real estate.

RESULTS OVERVIEW

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. It also includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

Corporate Center separately presents non-strategic items, which management does not consider representative of our core performance.

► Refer to "Strategic development of our businesses" in Credit Suisse – Information and developments – Format of presentation and changes in reporting for further information on non-strategic items.

In 4Q13, losses before taxes of CHF 389 million improved from losses before taxes of CHF 824 in 4Q12, mainly reflecting litigation provisions of CHF 227 million in 4Q12, as well as lower fair value losses on own credit spreads in 4Q13 of CHF 202 million compared to CHF 376 million in 4Q12. The fair value losses on own long-term vanilla debt reflected the narrowing of credit spreads on senior and subordinated debt across most currencies. 4Q13 results also included lower business realignment costs of CHF 131 million, compared to CHF 285 million in 4Q12. The business realignment costs primarily consisting of severance and other compensation expenses relating to Group-wide cost efficiency

initiatives. The improvement in 4Q13 results was partly offset by lower gains on sale of real estate of CHF 68 million in 4Q13, compared to CHF 151 million in 4Q12 and IT architecture simplification costs of CHF 69 million in 4Q13.

For full year 2013, losses before taxes of CHF 1,455 million improved from losses before taxes of CHF 3,889 million in 2012, mainly reflecting lower fair value losses on own credit spreads of CHF 315 million, compared to CHF 2,939 million in 2012. 2013 results also included lower business realignment costs of CHF 394 million, compared to CHF 680 million in 2012. Business realignment costs in 2013 primarily consisted of severance and other compensation expenses relating to Group-wide cost efficiency initiatives. 2012 results included litigation provisions related to National Century Financial Enterprises, with no litigation provisions in Corporate Center in 2013. The improvement in 2013 results was partly offset by lower gains on sale of real estate of CHF 68 million in 2013, compared to CHF 533 million in 2012 and IT architecture simplification costs of CHF 128 million in 2013. Additionally, Corporate Center's 2013 results included losses of CHF 220 million comprising reclassifications to discontinued operations of revenues and expenses relating to the sales of our ETF and secondary private equity businesses and of our CFG business, which was completed in January 2014, and the announced sale of our domestic private banking business booked in Germany.

¹ Business realignment costs relating to divisional realignment costs are prospectively presented in the relevant divisional non-strategic results beginning in 4Q13.

² Represents litigation provisions related to National Century Financial Enterprises.

³ Represents legacy funding costs associated with non-Basel III compliant debt instruments.

⁴ Includes reclassifications to discontinued operations of revenues and expenses arising from the sale of ETF, secondary private equity and CFG businesses and the announced sale of domestic private banking business booked in Germany.

Impact from movements in own credit spreads

Our Core Results revenues are impacted by changes in credit spreads on fair-valued Credit Suisse long-term vanilla debt and debit valuation adjustments (DVA) relating to certain structured notes liabilities carried at fair value. Our Core Results are also impacted by fair value gains/(losses) on stand-alone derivatives relating to certain of our funding liabilities and reflect the volatility of cross-currency swaps and yield curve volatility and, over the life of the derivatives, will result in no net gains/(losses). These fair value gains/(losses) are recorded in the Corporate Center.

Assets under management

We had net asset inflows from continuing operations of CHF 4.2 billion during 4Q13 and assets under management from continuing operations of CHF 1,253.4 billion as of the end of 4Q13.

Assets under management

Assets under management comprise assets that are placed with us for investment purposes and include discretionary and advisory counterparty assets.

Discretionary assets are assets for which the client fully transfers the discretionary power to a Credit Suisse entity with a management mandate. Discretionary assets are reported in the business in which the advice is provided as well as in the business in which the investment decisions take place. Assets managed by Asset Management for Wealth Management Clients, Corporate & Institutional Clients and the non-strategic business are reported in each applicable business and eliminated at the divisional level.

Advisory assets include assets placed with us where the client is provided access to investment advice but retains discretion over investment decisions.

Assets under management and net new assets include assets managed by consolidated entities, joint ventures and strategic participations. Assets from joint ventures and participations are counted in proportion to our share in the respective entity.

Assets under management from continuing operations of CHF 1,253.4 billion increased 1.1% compared to the end of 3Q13, as positive market movements and net new assets were partially offset by adverse foreign exchange-related movement. Compared to the end of 4Q12, assets under management from continuing operations were CHF 55.6 billion higher, reflecting net new assets of CHF 36.1 billion and positive market movements, partially offset by adverse foreign exchange-related movements and structural effects.

► Refer to "Private Banking & Wealth Management" in I – Credit Suisse results and "Note 36 – Assets under management" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information.

¹ Excludes our portion of assets under management from our former investment in Aberdeen.

² Assets managed by Asset Management for Wealth Management Clients, Corporate & Institutional Clients and the non-strategic businesses.

Client assets

Client assets is a broader measure than assets under management as it includes transactional and custody accounts (assets held solely for transaction-related or safekeeping/custody purposes) and assets of corporate clients and public institutions used primarily for cash management or transaction-related purposes.

Net new assets

Net new assets include individual cash payments, security deliveries and cash flows resulting from loan increases or repayments. Interest and dividend income credited to clients, commissions, interest and fees charged for banking services are not included as they do not reflect success in acquiring assets under management. Furthermore, changes due to foreign exchange-related and market movements as well as asset inflows and outflows due to the acquisition or divestiture of businesses are not part of net new assets.

We recorded net new assets from continuing operations of CHF 4.2 billion in 4Q13.

In our strategic portfolio, Wealth Management Clients contributed net new assets of CHF 1.7 billion in 4Q13 with continued strong inflows from emerging markets partially offset by Western

European cross-border outflows. Corporate & Institutional Clients in Switzerland reported net new assets of CHF 4.0 billion in 4Q13. Asset Management reported net asset outflows of CHF 0.5 billion in 4Q13, mainly from multi-asset class solutions and fixed income products partially offset by inflows in index strategies and credit products. In our non-strategic portfolio, net asset outflows of CHF 1.0 billion reflected the exit of certain businesses, of which CHF 0.2 billion were classified as discontinued operations.

In 2013, we recorded net new assets of CHF 36.1 billion from continuing operations.

In our strategic portfolio, Wealth Management Clients contributed net new assets of CHF 18.9 billion, particularly with inflows from emerging markets and our UHNWI client segment, partially offset by Western European cross-border outflows. Corporate & Institutional Clients in Switzerland reported strong net new assets of CHF 8.8 billion. Asset Management reported significant net new assets of CHF 15.0 billion, mainly from credit and index strategies and hedge funds products, partially offset by outflows from fixed income. In our non-strategic portfolio, net asset outflows of CHF 5.9 billion reflected the exit of certain businesses, of which CHF 4.0 billion were classified as discontinued operations.

- 64 Risk management**
- 75 Balance sheet and off-balance sheet**

Liquidity and funding management

During 4Q13, we maintained a strong liquidity and funding position. The majority of our unsecured funding was generated from core customer deposits and long-term debt.

Overview

Securities for funding and capital purposes are issued primarily by the Bank, our principal operating subsidiary and a US registrant. The Bank lends funds to its operating subsidiaries and affiliates on both a senior and subordinated basis, as needed; the latter typically to meet capital requirements, or as desired by management to support business initiatives.

Our internal liquidity risk management framework is subject to review and monitoring by the FINMA, other regulators and rating agencies.

► Refer to "Treasury management" in III – Treasury, Risk, Balance sheet and Off-balance sheet in the Credit Suisse Annual Report 2012 for further information on liquidity and funding management.

Liquidity risk management framework

Our liquidity and funding policy is designed to ensure that funding is available to meet all obligations in times of stress, whether caused by market events or issues specific to Credit Suisse. We achieve this through a conservative asset/liability management strategy aimed at maintaining long-term funding, including stable deposits, well in excess of illiquid assets. To address short-term liquidity stress, we maintain a liquidity pool, described below, that covers unexpected outflows in the event of severe market and idiosyncratic stress. The assets included in the liquidity pool consist of cash, high grade bonds, major market equity securities and other liquid securities. A portion of the liquidity pool is generated through reverse repurchase agreements with top rated counterparties. Our liquidity risk parameters reflect various liquidity stress assumptions that we believe are conservative. We manage our liquidity profile at a sufficient level such that, in the event we are unable to access unsecured funding, we will have sufficient liquidity to sustain operations for an extended period of time in excess of our minimum target.

In December 2010, the BCBS issued the Basel III international framework for liquidity risk measurement, standards and monitoring. The Basel III framework includes a LCR and a net stable funding ratio (NSFR).

In January 2014, the BCBS issued final LCR rules and disclosure requirements that are to be implemented as part of banks' regular disclosures after January 1, 2015. The BCBS also issued proposed revisions to the NSFR, which are expected to become the minimum standard by the previously announced date of January 1, 2018.

The LCR, which will be phased in beginning January 1, 2015 through January 1, 2019, addresses liquidity risk over a 30-day period. The LCR aims to ensure that banks have a stock of unencumbered high-quality liquid assets available to meet short-term liquidity needs under a severe stress scenario. The LCR is comprised of two components: the value of the stock of high quality liquid assets in stressed conditions and the total net cash outflows calculated according to specified scenario parameters. Under the BCBS requirements, the ratio of liquid assets over net cash outflows is subject to an initial minimum requirement of 60%, which will increase by 10% for four years, reaching 100% by January 1, 2019.

The NSFR, which is expected to be introduced on January 1, 2018 following an observation period which began in 2012, establishes criteria for a minimum amount of stable funding based on the liquidity of a bank's assets and activities over a one-year horizon. The NSFR is a complementary measure to the LCR and is structured to ensure that illiquid assets are funded with an appropriate amount of stable long-term funds. The NSFR is defined as the ratio of available stable funding over the amount of required stable funding and should always be at least 100%.

Although the NSFR is not expected to be introduced until 2018 and is still subject to adjustment by the BCBS and FINMA, we began using the NSFR in 2012 as the primary tool to monitor our structural liquidity position, plan funding and as the basis for our funds transfer pricing policy. We estimate that our NSFR under the current FINMA framework was in excess of 100% as of the end of 4Q13. Where requirements are unclear or left to be determined by the BCBS and FINMA, we have made our own interpretation and assumptions.

In November 2012, the Swiss Federal Council adopted a liquidity ordinance that implements Basel III liquidity requirements into Swiss law subject, in part, to further rule-making in Switzerland. Both quantitative and qualitative requirements are consistent with existing FINMA liquidity requirements. In January 2014, the Swiss Federal Council and FINMA proposed revisions to the liquidity ordinance to include final Basel III LCR rules. Under the proposed revisions, systemically relevant banks like us will be subject to an initial minimum LCR requirement of 100% beginning in 2015.

Funding sources and uses

We fund our balance sheet primarily through core customer deposits, long-term debt and shareholders' equity. We monitor the funding sources, including their concentrations, according to their currency, tenor, geography and maturity and whether they are secured or unsecured. A substantial portion of our balance sheet is match funded and requires no unsecured funding. Match funded balance sheet items consist of assets and liabilities with close to equal liquidity durations and values so that the liquidity and funding generated or required by the positions are substantially equivalent.

Cash and due from banks and reverse repurchase agreements are highly liquid. A significant part of our assets, principally unencumbered trading assets that support the securities business, is comprised of securities inventories and collateralized receivables that fluctuate and are generally liquid. These liquid assets are available to settle short-term liabilities.

These assets include our liquidity pool, which as of the end of 4Q13 based on our internal model was CHF 140 billion, net of a stress test level haircut. The liquidity pool consisted of CHF 55 billion of cash held at major central banks, primarily the Fed, SNB and the ECB, CHF 52 billion of securities issued by governments and government agencies, primarily of the US, Britain, France, Germany and Switzerland and CHF 33 billion of other highly liquid assets including equity securities that form part of major indices. As of December 31, 2013, our internal model included the application of a stress test level haircut equal to approximately 60% of the market value of non-cash positions in the liquidity pool. The haircut reflects our assessment of overall market risk at the time of measurement, potential monetization capacity taking into account increased haircuts, market volatility and the quality of the relevant securities.

Loans, which comprise the largest component of our illiquid assets, are funded by our core customer deposits, with an excess coverage of 22% as of the end of 4Q13 compared to 24% as of the end of 3Q13, reflecting a slight increase in loans and a slight decrease in deposits. We fund other illiquid assets, including real estate, private equity and other long-term investments as well as a haircut for the illiquid portion of securities, with long-term debt and equity, in which we try to maintain a substantial funding buffer.

Our core customer deposits totaled CHF 297 billion as of the end of 4Q13 compared to CHF 298 billion as of the end of 3Q13, reflecting a stable customer deposit base in Private Banking & Wealth Management. Core customer deposits are from clients with whom we have a broad and longstanding relationship. Core customer deposits exclude deposits from banks and certificates of deposit. We place a priority on maintaining and growing customer deposits, as they have proved to be a stable and resilient source of funding even in difficult market conditions. Our core customer deposit funding is supplemented by the issuance of long-term debt.

► Refer to the chart "Balance sheet funding structure" and "Balance sheet and off-balance sheet" for further information.

Balance sheet funding structure

as of December 31, 2013 (CHF billion)

| | | | | |
|---|------------|----------------------|------------|---|
| Reverse repurchase agreements | 84 | Match funded | 117 | Repurchase agreements |
| Encumbered trading assets | 73 | | 40 | Short positions |
| Funding-neutral assets ¹ | 122 | | 122 | Funding-neutral liabilities ¹ |
| Cash & due from banks | 70 | 122% coverage | 41 | Other short-term liabilities ² |
| Unencumbered liquid assets ³ | 150 | | 59 | Due to banks |
| Loans ⁴ | 243 | | 20 | Short-term borrowings |
| Other illiquid assets | 131 | | 62 | time |

| | | | 130 | Long-term debt |
| | | | 47 | Total equity |
| Assets | 873 | | 873 | Liabilities and Equity |

¹ Primarily includes brokerage receivables/payables, positive/negative replacement values and cash collateral.

² Primarily includes excess of funding neutral liabilities (brokerage payables) over corresponding assets.

³ Primarily includes unencumbered trading assets, unencumbered investment securities and excess reverse repurchase agreements, after haircuts.

⁴ Excludes loans with banks.

⁵ Excludes due to banks and certificates of deposit.

Debt issuances and redemptions

Our long-term debt includes senior and subordinated debt issued in US-registered offerings and medium-term note programs, euro market medium-term note programs, stand-alone offerings, structured note programs, covered bond programs, Australian dollar domestic medium-term note programs and a Samurai shelf registration statement in Japan. As a global bank, we have access to multiple markets worldwide and our major funding centers are New York, London, Zurich and Tokyo.

We use a wide range of products and currencies to ensure that our funding is efficient and well diversified across markets and investor types. Substantially all of our unsecured senior debt is issued without financial covenants, such as adverse changes in our credit ratings, cash flows, results of operations or financial ratios, which could trigger an increase in our cost of financing or accelerate the maturity of the debt. Our covered bond funding is in the form of mortgage-backed loans funded by domestic covered bonds issued through Pfandbriefbank Schweizerischer Hypothekar-institute, one of two institutions established by a 1930 act of the Swiss Parliament to centralize the issuance of covered bonds, or from our own international covered bond program.

In 4Q13, we issued CHF 1.2 billion of senior debt. As of the end of 4Q13, our long-term debt outstanding was CHF 130 billion, which included senior and subordinated instruments. We had CHF 35 billion and CHF 14.3 billion of structured notes and covered bonds outstanding, respectively, as of the end of 4Q13 compared to CHF 36.6 billion and CHF 15.2 billion, respectively, as of the end of 4Q12.

► Refer to "Capital issuances and redemptions" in Capital management for information on issuances of capital notes, all of which constitute subordinated debt instruments.

As of the end of 4Q13, the weighted average maturity of long-term debt was 6.7 years (including certificates of deposit with a maturity of one year or longer, but excluding structured notes, and assuming callable securities are redeemed at final maturity, or in 2030 for instruments without a stated final maturity).

Credit ratings

The maximum impact of a simultaneous one, two or three-notch downgrade by all three major rating agencies in the Bank's long-term debt ratings would result in additional collateral requirements or assumed termination payments under certain derivative instruments of CHF 1.4 billion, CHF 3.4 billion and CHF 4.8 billion, respectively, as of the end of 4Q13, and would not be material to our liquidity and funding planning. If the downgrade does not involve all three rating agencies, the impact may be smaller.

As of the end of 4Q13, we were compliant with the requirements related to maintaining a specific credit rating under these derivative instruments.

► Refer to "Credit ratings" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Liquidity and funding management in the Credit Suisse Annual Report 2012 for further information.

Capital management

As of the end of 4Q13, our capital position remained strong with a CET1 ratio of 15.7% under Basel III and 10.0% on a look-through basis. Our RWA under Basel III increased slightly to CHF 273.8 billion compared to 3Q13. Our Swiss leverage ratio was 5.1%.

REGULATORY CAPITAL FRAMEWORK

Overview

Effective January 1, 2013, the Basel II.5 framework, under which we operated in 2012, was replaced by the Basel III framework, which was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder (Swiss Requirements). Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the interpretation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Also, our capital metrics fluctuate during any reporting period in the ordinary course of business. Our 4Q12 calculations of capital and ratio amounts, which are presented in order to show meaningful comparative information, use estimates as of December 31, 2012, as if the Basel III framework had been implemented in Switzerland as of such date.

► Refer to "Capital management" in III – Treasury, Risk, Balance sheet and Off-balance sheet and "Regulation and supervision" in I – Information on the company in the Credit Suisse Annual Report 2012 for further information.

Capital structure under Basel III

The BCBS issued the Basel III framework, with higher minimum capital requirements and conservation and countercyclical buffers, revised risk-based capital measures, a leverage ratio and liquidity standards. The framework was designed to strengthen the resilience of the banking sector and requires banks to hold more capital, mainly in the form of common equity. The new capital standards are being phased in from 2013 through 2018 and are fully effective January 1, 2019 for those countries that have adopted Basel III.

► Refer to the table "Basel III phase-in requirements for Credit Suisse" for capital requirements and applicable effective dates during the phase-in period.

Under Basel III, the minimum CET1 requirement is 4.5% of risk-weighted assets (RWA).

In addition, a 2.5% CET1 capital conservation buffer is required to absorb losses in periods of financial and economic stress. Banks that do not maintain this buffer will be limited in their ability to pay dividends or make discretionary bonus payments or other earnings distributions.

Capital frameworks for Credit Suisse

| Basel III | Swiss Requirements |
|--|--|
| Countercyclical buffer up to 2.5% CET1 | Countercyclical buffer up to 2.5% ¹ CET1 |
| | <div> <div>17.41%</div> <div>4.41%^{2,3} Low-trigger capital instruments</div> <div>Progressive component</div> </div> |
| | <div> <div>3%³ High-trigger capital instruments</div> <div>Buffer component</div> </div> |
| <div> <div>12%</div> <div>Tier 2 2%</div> </div> | |
| <div> <div>10%</div> <div>Additional tier 1 1.5%⁴</div> </div> | <div> <div>10%</div> <div>Additional CET1 buffer 5.5% CET1</div> </div> |
| <div> <div>8.5%</div> <div>Progressive buffer for G-SIB 1.5% CET1</div> </div> | |
| Capital conservation buffer 2.5% CET1 | |
| 4.5% CET1 | <div> <div>4.5% CET1</div> <div>Minimum component</div> </div> |

¹ As of September 30, 2013, banks are required to hold CET1 capital in the amount of 1% of RWA pertaining to mortgage loans that finance residential property in Switzerland.

² The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business and is subject to potential capital rebates that may be granted by FINMA. For 2014, FINMA reduced our 2013 progressive component requirement from 4.41% to 3.66%.

³ Counts towards Basel III minimum requirements as tier 1 or tier 2 capital depending on the quality of the underlying instruments.

⁴ Additional tier 1 instruments must provide for principal loss absorption through a conversion into common equity or write-down feature. The trigger for such a conversion or write-down must include a CET1 ratio of at least 5.125%.

Basel III phase-in requirements for Credit Suisse

| Effective January 1, for the applicable year | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 |

¹ Indicates transition period.

² Includes goodwill and other intangible assets, certain deferred tax assets and participations in financial institutions.

A progressive buffer between 1% and 2.5% (with a possible additional 1% surcharge) of CET1, depending on a bank's systemic importance, is an additional capital requirement for global systemically important banks (G-SIB). The Financial Stability Board (FSB) has identified us as a G-SIB and requires us to maintain a 1.5% progressive buffer.

CET1 capital is subject to certain regulatory deductions and other adjustments to common equity, including the deduction of deferred tax assets for tax-loss carry-forwards, goodwill and other intangible assets and investments in banking and finance entities.

In addition to the CET1 requirements, there is also a requirement for 1.5% additional tier 1 capital and 2% tier 2 capital. These requirements may also be met with CET1 capital. To qualify as additional tier 1 under Basel III, capital instruments must provide for principal loss absorption through a conversion into common equity or a write-down of principal feature. The trigger for such conversion or write-down must include a CET1 ratio of at least 5.125%.

Basel III further provides for a countercyclical buffer that could require banks to hold up to 2.5% of CET1 or other capital that would be available to fully absorb losses. This requirement is expected to be imposed by national regulators where credit growth is deemed to be excessive and leading to the build-up of system-wide risk. This countercyclical buffer will be phased in from January 1, 2016 through January 1, 2019.

Beginning January 1, 2013, capital instruments that do not meet the strict criteria for inclusion in CET1 are excluded. Capital instruments that would no longer qualify as tier 1 or tier 2 capital will be phased out. In addition, instruments with an incentive to redeem prior to their stated maturity, if any, will be phased out at their effective maturity date, generally the date of the first step-up coupon.

Swiss Requirements

As of January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss Requirements. Together with the related implementing ordinances, the legislation includes capital, liquidity, leverage and large exposure requirements and rules for emergency plans designed to maintain systemically relevant functions in the event of threatened insolvency. Certain requirements under the legislation, including those regarding capital, are to be phased in from 2013 through 2018 and are fully effective January 1, 2019. The legislation on capital requirements builds on Basel III, but in respect of systemically relevant banks goes beyond its minimum standards, including requiring us, as a systemically relevant bank, to have the following minimum, buffer and progressive components.

► Refer to the chart "Swiss capital and leverage ratio phase-in requirements for Credit Suisse" for Swiss capital requirements and applicable effective dates during the phase-in period.

The minimum requirement of CET1 capital is 4.5% of RWA.

The buffer requirement is 8.5% and can be met with additional CET1 capital of 5.5% of RWA and a maximum of 3% of high-trigger capital instruments. High-trigger capital instruments must convert into common equity or be written off if the CET1 ratio falls below 7%.

The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business. For 2014, FINMA set our progressive component requirement at 3.66%, a decrease from the 4.41% applicable in 2013, reflecting our size and market share based on data as of year-end 2012. The progressive component requirement may be met with CET1 capital or low-trigger capital instruments. In order to qualify, low-trigger capital instruments must convert into common equity or be written off if the CET1 ratio falls below a specified percentage, the lowest of which may be 5%. In addition, until the end of 2017, the progressive

component requirement may also be met with high-trigger capital instruments. Both high and low-trigger capital instruments must comply with the Basel III minimum requirements for tier 2 capital (including subordination, point-of-non-viability loss absorption and minimum maturity).

Similar to Basel III, the Swiss Requirements include a supplemental countercyclical buffer of up to 2.5% of RWA that can be activated during periods of excess credit growth. In February 2013, upon the request of the SNB, the Swiss Federal Council activated the countercyclical capital buffer, which was effective September 30, 2013 and requires banks to hold CET1 capital in the amount of 1% of their RWA pertaining to mortgage loans that finance residential property in Switzerland. As of December 31, 2013, our countercyclical buffer was CHF 144 million, which is equivalent to an additional requirement of 0.05% of CET1 capital. In January 2014, upon the request of SNB, the Swiss Federal

Council further increased the countercyclical buffer from 1% to 2%, effective June 30, 2014.

We also measure Swiss Core Capital and Swiss Total Capital. Swiss Core Capital consists of CET1 capital and tier 1 participation securities, which FINMA advised may be included with a haircut of 20% until December 31, 2018 at the latest, and may include certain other Swiss adjustments. Our Swiss Total Capital consists of Swiss Core Capital, high-trigger capital instruments and low-trigger capital instruments.

As of January 1, 2013, we must also comply with a leverage ratio applicable to Swiss systemically relevant banks (Swiss leverage ratio). This leverage ratio must be at least 24% of each of the respective minimum, buffer and progressive component requirements. Since the ratio is defined by reference to capital requirements subject to phase-in arrangements, the ratio will also be phased in.

Swiss capital and leverage ratio phase-in requirements for Credit Suisse

as of 2013

Excludes countercyclical buffer required as of September 30, 2013.

¹ The progressive component requirement is dependent on our size (leverage ratio exposure) and the market share of our domestic systemically relevant business and is subject to potential capital rebates that may be granted by FINMA. For 2014, FINMA reduced our 2019 progressive component requirement from 4.41% to 3.66%, which leads to a total capital ratio requirement of 16.66% and a Swiss leverage ratio requirement of 4.0%.

Risk measurement models

Within the Basel framework for FINMA regulatory capital purposes, we implemented risk measurement models, including an incremental risk charge, stressed Value-at-Risk (VaR) and, since January 1, 2013, advanced credit valuation adjustment (CVA). The incremental risk charge is a regulatory capital charge for default and migration risk on positions in the trading books and is intended to complement additional standards being applied to the VaR modeling framework, including stressed VaR. Stressed VaR replicates a VaR calculation on the Group's current portfolio taking into account a one-year observation period relating to significant financial stress and helps reduce the pro-cyclicality of the minimum capital requirements for market risk. Advanced CVA covers the risk of mark-to-market losses on the expected counterparty risk arising from changes in a counterparty's credit spreads.

FINMA, in line with Bank for International Settlements (BIS) requirements, uses a multiplier to impose an increase in market risk capital for every regulatory VaR backtesting exception over four in the prior rolling 12-month period. For the purposes of this measurement, backtesting exceptions are calculated using a subset of actual daily trading revenues that includes only the impact of daily movements in financial market variables such as interest rates, equity prices and foreign exchange rates on the previous night's positions. In 4Q13, our market risk capital multiplier remained at FINMA and BIS minimum levels and we did not experience an increase in market risk capital.

With FINMA approval, we have implemented a Comprehensive Risk Measure framework to calculate a capital charge covering all price risks (default, spread and correlation risk) within the credit correlation products within our trading book portfolio.

Effective January 1, 2013, FINMA introduced increased capital charges for mortgage loans that finance certain residential property in Switzerland (mortgage multiplier). These increased capital charges, which are applied for both BIS and FINMA purposes, will be phased in by January 1, 2019.

► Refer to "Market risk" in Risk management for further information on Credit Suisse's risk measurement models and backtesting exceptions.

Regulatory developments and proposals

In January 2014, the BCBS published the framework and disclosure requirements for the Basel III leverage ratio. The required Basel III leverage ratio, which seeks to measure tier 1 capital against exposure, is expected to be at least 3%. Although the effective date of the Basel III leverage ratio is not until 2018, banks will be required to disclose the ratio on a consolidated basis beginning in 2015, subject to implementation by national regulators.

In accordance with BCBS's G-SIB loss absorbency requirements and FINMA's capital adequacy disclosure requirements, banks with a balance sheet exceeding EUR 200 billion must publish annually 12 financial indicators, such as size and complexity. Depending on these financial indicators, the FSB will set the progressive buffer for G-SIBs. The reporting requirement is effective December 31, 2013 and disclosures must be made by April 30.

From January 1, 2014, the Capital Requirement Directive (CRD) IV package of legislation (comprising a directive and a regulation) will replace the current CRD directive with new measures implementing Basel III and other requirements. As part of the transition to CRD IV, the UK's Prudential Regulation Authority has reviewed the permissions of UK financial institutions, including those of our subsidiaries, to use their current internal modeling for capital calculation purposes as well as new models required for CRD IV compliance. The majority of the models for our subsidiaries were approved and certain models will require updates in line with latest BCBS guidance and regulatory feedback on modeling techniques.

The SNB has previously designated the Group as a financial group of systemic importance under applicable Swiss law. Following that designation, in December 2013, FINMA issued a decree specifying capital adequacy requirements addressed to the Bank on a stand-alone basis and the Bank and the Group, each on a consolidated basis as systemically relevant institutions. It also specified liquidity and risk diversification requirements for the Bank at the stand-alone level. The decree is expected to become effective in 1Q14.

CAPITAL ISSUANCES AND REDEMPTIONS

In December 2013, we issued USD 2.25 billion 7.5% tier 1 capital notes (7.5% tier 1 capital notes).

These notes, together with one other series of tier 1 capital notes and two series of tier 2 capital notes, which were issued in 3Q13, qualify as low-trigger capital instruments and have a write-down feature, which means that the full principal amount of the notes will be permanently written down to zero upon the occurrence of specified triggering events. These events occur when the amount of our CET1 ratio, together with an additional ratio described below that takes into account other outstanding capital instruments, falls below a specified level (5% for the tier 2 capital notes and 5.125% for the tier 1 capital notes). The write-down can only be prevented if FINMA, at our request, is satisfied that certain conditions exist and determines a write-down is not required. The capital notes will also be written down upon a non-viability event, which occurs when FINMA determines that a write-down is necessary, or that we require extraordinary public sector capital support, to prevent us from becoming insolvent, bankrupt or unable to pay a material amount of our debts, or other similar circumstances.

The capital ratio write-down triggers for each of the series of capital notes issued in 2013 take into account the fact that other outstanding capital instruments that contain relatively higher capital ratios as part of their trigger feature are expected to convert or be written down prior to the write-down of the respective 2013 capital notes. The amount of additional capital that is expected to be contributed by such conversion or write down is referred to as the Higher Trigger Capital Amount under the terms of the capital notes issued in 2013.

For the tier 2 capital notes as of the end of 4Q13, the Higher Trigger Capital Amount was CHF 10.0 billion and the Higher Trigger Capital Ratio (i.e., the ratio of the Higher Trigger Capital Amount to the aggregate of all RWA of the Group) was 3.7%. For the tier 1 capital notes as of the end of 4Q13, the Higher Trigger Capital Amount was CHF 7.7 billion and the Higher Trigger Capital Ratio was 2.8%.

► Refer to the table "BIS statistics – Basel III" for further information on the BIS statistics used to calculate such measures.

In October 2013, based on a prior agreement with an entity affiliated with Qatar Investment Authority, we exchanged such entity's holding of all of the CHF 2.5 billion 10% tier 1 capital notes and USD 1.72 billion of the 11% tier 1 capital notes into equivalent principal amounts of tier 1 high-trigger capital instruments. In addition, we redeemed USD 55 million of the 11% tier 1 capital notes for cash.

► Refer to "Related party transactions" in IV – Corporate Governance and Compensation – Corporate Governance – Banking relationships with members of the Board and Executive Board and related party transactions in our 2012 Annual Report for further information on the agreement to exchange.

In December 2013, we redeemed USD 1.5 billion of 8.25% subordinated tier 1 participation securities. Prior to the call and as advised by FINMA, these tier 1 participation securities formed part of Swiss Core Capital under Swiss Requirements, whereas under Basel III, these instruments were included in additional tier 1 instruments subject to phase out. Our remaining USD 1.5 billion of outstanding participation securities are similarly treated and we are reviewing a potential early call of them.

All of the issuances and redemptions effected in 2013 were approved by FINMA.

CAPITAL METRICS UNDER BASEL III

Regulatory capital and ratios – Group

Our CET1 ratio was 15.7% as of the end of 4Q13, compared to 16.3% as of the end of 3Q13, due to an increase in RWA and a decrease in CET1 capital. Our tier 1 ratio was 16.8% as of the end of 4Q13, compared to 17.0% as of the end of 3Q13. Our total capital ratio remained stable at 20.6% as of the end of 4Q13 compared to the end of 3Q13.

CET1 capital was CHF 43.0 billion as of the end of 4Q13 compared to CHF 43.8 billion as of the end of 3Q13, reflecting a net loss, a negative foreign exchange translation impact and a quarterly dividend accrual, partially offset by the impact of share-based compensation.

Additional tier 1 capital increased to CHF 3.1 billion, mainly due to the issuance of the 7.5% tier 1 capital notes. Tier 2 capital decreased slightly to CHF 10.2 billion as of the end of 4Q13.

Total eligible capital was stable at CHF 56.3 billion as of the end of 4Q13 compared to the end of 3Q13, reflecting the decrease in CET1 capital and the redemption of the 8.25% subordinated tier 1 participation securities, partially offset by the issuance of the 7.5% tier 1 capital notes.

RWA increased 2%, from CHF 269.3 billion as of the end of 3Q13 to CHF 273.8 billion as of the end of 4Q13, reflecting an increase in operational risk together with a minor increase in market risk, partially offset by a decrease in credit risk and a decrease resulting from foreign exchange translation.

The increase in operational risk resulted from revisions to the model to measure operational risk as of December 31, 2013 to include all litigation provisions, parameter updates and an add-on component relating to the aggregate range of reasonably possible litigation losses not covered by existing provisions.

The increase in market risk was driven by higher exposures, particularly within fixed income, impacting stressed VaR and incremental risk charges. This was partially offset by decreases in trading book mortgage securitization exposures, reduced regular VaR, particularly within securitized products and global credit products, and lower risks not covered by our VaR model following the inclusion of certain risk components into the modeled VaR.

The decrease in credit risk was driven by a decrease in CVA, primarily within Investment Banking, partially offset by an increase in credit risk within Investment Banking. CVA decreased following increased hedging during the period. The increase in Investment Banking credit risk primarily resulted from increases in lending exposures across various business areas, most notably from increased commitments extended by the leverage finance business, partially offset by decreases in secured financing and unsettled trades.

► Refer to the table "BIS statistics – Basel III" for further information.

► Refer to "Market risk", "Credit risk" and "Operational risk" in Risk management for further information.

Other regulatory disclosures

In connection with the implementation of Basel III, additional regulatory disclosures are required. Additional information on capital instruments, including main features and terms and conditions of regulatory capital instruments that form part of the eligible capital base of the Group, subsidiary regulatory reporting, reconciliation requirements and Pillar 3 disclosures can be found on the Investor Relations website.

► Refer to https://www.credit-suisse.com/investors/en/regulatory_disclosures/index.jsp for additional information.

¹ Converted and settled into 233.5 million shares on April 8, 2013 and reflected in total shareholders' equity as of that date.

² Includes regulatory adjustments not subject to phase in, including a cumulative dividend accrual.

³ Includes regulatory adjustments not subject to phase in, including the cumulative dividend accrual, and an adjustment for tier 1 participation securities.

⁴ Includes an adjustment for the accounting treatment of pension plans pursuant to phase-in requirements and other regulatory adjustments. For the years 2014 – 2018, there will be a five-year (20% per annum) phase in of goodwill and other intangible assets and other capital deductions (e.g., certain deferred tax assets and participations in financial institutions).

⁵ Consists of high-trigger and low-trigger capital instruments. Of this amount, CHF 7.7 billion consists of capital instruments with a capital ratio write-down trigger of 7%, CHF 2.3 billion consists of capital instruments with a capital ratio write-down trigger of 5.125% and CHF 3.7 billion consists of capital instruments with a capital ratio write-down trigger of 5%.

⁶ Includes tier 1 participation securities and hybrid capital instruments that are subject to phase out.

⁷ Includes goodwill and other intangible assets of CHF 8.2 billion and other capital deductions, including gains/(losses) due to changes in own credit risks on fair valued financial liabilities, that will be deducted from CET1 once Basel III is fully implemented.

CET1 capital movement – Basel III

| | 4Q13 | 3Q13 |
|-----------------------------------|------------------|-------------------|
| CET1 capital (CHF million) | | |
| Balance at beginning of period | 43,780 | 44,430 |

| Foreign exchange impact | (516) | (1,033) |
| Other | 201 ¹ | (71) ¹ |
| Balance at end of period | 42,989 | 43,780 |

¹ Reflects the effect of share-based compensation, a dividend accrual and a change in other regulatory adjustments.

Look-through CET1 ratio

For the years 2014 – 2018, there will be a five-year (20% per annum) phase in of goodwill and other intangible assets and other capital deductions (e.g., certain deferred tax assets and participations in financial institutions). Assuming fully phased-in deductions of CHF 8.2 billion of goodwill and other intangible assets and CHF 7.5 billion of other regulatory adjustments, we estimate that our Look-through CET1 ratio as of the end of 4Q13 would be 10.0%, calculated based on Look-through RWA of CHF 266 billion.

Risk-weighted assets

Our balance sheet positions and off-balance sheet exposures translate into RWA that are categorized as market, credit, operational and non-counterparty risk RWA. Market risk RWA reflect the capital requirements of potential changes in the fair values of financial instruments in response to market movements inherent in both balance sheet and off-balance sheet items. Credit risk RWA reflect the capital requirements for the possibility of a loss being incurred as the result of a borrower or counterparty failing to meet its financial obligations or as a result of a deterioration in the credit quality of the borrower or counterparty. Under Basel III, certain regulatory capital adjustments are dependent on the level of CET1 capital (thresholds). The amount above the threshold is deducted from CET1 capital and the amount below the threshold is risk weighted. RWA subject to such threshold adjustments are included in Credit Risk RWA. Operational risk RWA reflect the

capital requirements for the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Non-counterparty-risk RWA primarily reflect the capital requirements for our premises and equipment. It is not the nominal size, but the nature (including risk mitigation such as collateral or hedges) of the balance sheet positions or off-balance sheet exposures that determines the RWA.

CAPITAL METRICS UNDER SWISS REQUIREMENTS

Swiss Core and Total Capital ratios

Swiss Core Capital consists of CET1 capital, tier 1 participation securities which FINMA advised may be included with a haircut of 20% until December 31, 2018 at the latest, and may include certain other adjustments. Swiss Total Capital also includes

high-trigger capital instruments and low-trigger capital instruments. As of the end of 4Q13, our Swiss Core Capital and Swiss Total Capital ratios were 16.2% and 21.2%, respectively, compared to the Swiss capital ratio phase-in requirements of 6.0% and 8.1%, respectively.

¹ The Swiss capital requirements are based on a percentage of RWA.

Look-through Swiss Core and Total Capital ratios

The look-through basis assumes fully phased-in goodwill and other intangible assets and other regulatory adjustments. On a look-through basis, our Swiss Core Capital was CHF 28.3 billion and our Swiss Core Capital ratio was 10.6%, compared to a 10.0% ratio that we target. Our Swiss Total Capital was CHF 42.1 billion and our Swiss Total Capital ratio was 15.7%, each on a look-through basis.

Look-through capital ratios – Group

as of December 31, 2013 (CHF billion)

Rounding differences may occur.

¹ Consists of existing tier 1 participation securities of CHF 1.3 billion and other Swiss regulatory adjustments.

Swiss leverage ratio

The Swiss leverage ratio is calculated as Swiss Total Capital, divided by a three-month average exposure, which consists of balance sheet assets, off-balance sheet exposures, consisting of guarantees and commitments, and regulatory adjustments,

including cash collateral netting reversals and derivative add-ons. As of the end of 4Q13, our Swiss leverage ratio was 5.1%. As of the end of 4Q13, our total exposure was CHF 1,131 billion, compared to our year-end 2013 target of CHF 1,190 billion. We have revised our long-term target to CHF 1,070 billion.

¹ The leverage requirements are based on a percentage of total average exposure.

Look-through Swiss leverage ratio

The look-through basis assumes fully phased-in goodwill and other intangible assets and other regulatory adjustments. On a look-through basis, the Group's Swiss leverage ratio was 3.7%, compared to the 4% requirement for 2019 taking into account FINMA's reduction of our progressive component requirement beginning in 2014.

Total shareholders' equity

Our total shareholders' equity remained unchanged at CHF 42.2 billion as of the end of 4Q13 compared to the end of 3Q13. Total shareholders' equity was impacted by an actuarial pension adjustment, the effect of share-based compensation and the purchase of subsidiary shares from non-controlling interests, relating to the

redemption of tier 1 participation securities, offset by the impact of foreign exchange-related movements on cumulative translation adjustments, a net loss, financial instruments indexed to own shares and dividend payments.

► Refer to the "Consolidated statements of changes in equity (unaudited)" in III – Condensed consolidated financial statements – unaudited for further information on shareholders' equity.

Capital

¹ Management believes that tangible shareholders' equity and tangible book value per share, both non-GAAP financial measures, are meaningful as they are measures used and relied upon by industry analysts and investors to assess valuations and capital adequacy.

Risk management

In 4Q13, overall position risk increased 7%, utilized economic capital increased 5%, average risk management VaR in US dollars was stable at USD 44 million and gross impaired loans decreased 3% to CHF 1.5 billion.

ECONOMIC CAPITAL AND POSITION RISK

Economic capital is used as a consistent and comprehensive tool for risk management, capital management and performance measurement. It is our core Group-wide risk management tool for measuring and reporting all quantifiable risks. Economic capital measures risks in terms of economic realities rather than regulatory or accounting rules and is the estimated capital needed to remain solvent and in business, even under extreme market, business and operational conditions, given our target financial strength (our long-term credit rating).

We regularly review our economic capital methodology in order to ensure that the model remains relevant as markets and business strategies evolve. In the event of methodology changes, prior-period balances are restated in order to show meaningful trends.

In 4Q13, we made an enhancement to the position risk methodology for risk management purposes. For our non-recourse lending business, we refined the modeling of our equity-based collateral to better capture the market risk associated with liquidating the collateral in a stressed environment. The impact of this methodology change on position risk for the Group as of the end of 3Q13 was an increase of CHF 66 million, or 0.6%. This increase was partially offset by a decrease of CHF 12 million due to an enhancement to the dataset, resulting in a CHF 54 million overall net increase in 3Q13 position risk.

For utilized economic capital used for capital management purposes, the impact of the above methodology change on position risk was simultaneously offset in part by the reversal of our previously budgeted estimate for this planned methodology change as reflected in other risks. The net impact of this methodology change on utilized economic capital for the Group as of the end of 3Q13 was an increase of CHF 40 million, or 0.1%. This increase was partially offset by a decrease of CHF 19 million due to the enhancement to the dataset, resulting in a CHF 21 million overall net increase in 3Q13 utilized economic capital.

► Refer to "Economic capital and position risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2012 for further information on economic capital and position risk.

Key position risk trends

Position risk for risk management purposes as of the end of 4Q13 increased 7% compared to the end of 3Q13. Excluding the US dollar translation impact, position risk increased 9%, mainly due to higher interest rate, foreign exchange and credit spread exposures in fixed income trading as well as increased exposures in Eastern Europe in emerging markets country event risk. Position risk also increased due to new loan commitments in Investment Banking in international lending & counterparty exposures.

Position risk

| | 4Q13 | 3Q13 | end of 4Q12 | QoQ | % change YoY |
|--|---------------|---------------|----------------|-----------|-----------------|
| Position risk (CHF million) | | | | | |
| Fixed income trading ¹ | 3,318 | 2,383 | 2,489 | 39 | 33 |
| Equity trading & investments | 1,715 | 1,652 | 1,893 | 4 | (9) |
| Private banking corporate & retail lending | 2,350 | 2,404 | 2,382 | (2) | (1) |
| International lending & counterparty exposures | 4,957 | 4,801 | 4,260 | 3 | 16 |
| Emerging markets country event risk | 1,412 | 1,046 | 1,041 | 35 | 36 |
| Real estate & structured assets ² | 1,862 | 1,755 | 1,985 | 6 | (6) |
| Simple sum across risk categories | 15,614 | 14,041 | 14,050 | 11 | 11 |
| Diversification benefit ³ | (3,571) | (2,831) | (2,820) | 26 | 27 |
| Position risk (99% confidence level for risk management purposes) | 12,043 | 11,210 | 11,230 | 7 | 7 |

Prior-period balances have been restated for methodology changes in order to show meaningful trends.

¹ This category comprises fixed income trading, foreign exchange and commodity exposures.

² This category comprises commercial and residential real estate (including RMBS and CMBS), asset-backed securities exposure, real estate acquired at auction and real estate fund investments.

³ Reflects the net difference between the sum of the position risk categories and the position risk on the total portfolio.

Compared to the end of 4Q12, position risk for risk management purposes increased 7%. Excluding the US dollar translation impact, position risk increased 10%, mainly due to higher foreign exchange, interest rate and credit spread exposure in fixed income trading as well as new loan commitments and increased counterparty risk in Investment Banking in international lending & counterparty exposures. Position risk also increased due to increased exposures in Eastern Europe in emerging markets country event

risk. These increases were partially offset by reduced exposures in equity trading & investments due to private equity sales.

As part of our overall risk management, we hold a portfolio of hedges. Hedges are impacted by market movements, similar to other trading securities, and may result in gains or losses which offset losses or gains on the portfolios they were designated to hedge. Due to the varying nature and structure of hedges, these gains or losses may not wholly offset the losses or gains on the portfolios.

Prior-period balances have been restated for methodology changes in order to show meaningful trends.

¹ Includes primarily high-trigger capital instruments, adjustments to unrealized gains on owned real estate, reduced recognition of deferred tax assets and adjustments to treatment of pensions. Economic adjustments are made to Look-through CET1 capital to enable comparison between economic capital utilization and economic capital resources under the Basel III framework.

² Includes owned real estate risk, expense risk, pension risk, foreign exchange risk between economic capital resources and utilized economic capital, interest rate risk on treasury positions, diversification benefits, the impact from deferred share-based compensation awards and an estimate for the impacts of certain methodology changes planned for 2014.

³ Includes primarily expense risk, diversification benefits from the divisions and foreign exchange risk between economic capital resources and utilized economic capital.

⁴ Includes a diversification benefit of CHF 18 million, CHF 19 million and CHF 19 million as of the end of 4Q13, 3Q13 and 4Q12, respectively.

⁵ Includes a diversification benefit of CHF 18 million, CHF 19 million and CHF 11 million as of the end of 4Q13, 3Q13 and 4Q12, respectively.

Utilized economic capital trends

In 4Q13, our utilized economic capital increased 5%. Excluding the US dollar translation impact, utilized economic capital increased 6%, mainly due to higher position risk primarily in Investment Banking.

For Private Banking & Wealth Management, utilized economic capital decreased 3%, mainly due to decreased position risk in equity trading & investments and private banking corporate & retail lending, partially offset by increased emerging markets country event risk.

For Investment Banking, utilized economic capital increased 10%. Excluding the US dollar translation impact, utilized economic capital increased 12%, mainly due to increased position risk in fixed income trading, international lending & counterparty exposures and emerging markets country event risk.

For Corporate Center, utilized economic capital decreased 1%, mainly due to decreased position risk in equity trading & investments.

MARKET RISK

Trading portfolios

We primarily assume market risk through the trading activities in Investment Banking. Private Banking & Wealth Management also engages in trading activities, but to a much lesser extent. We are active in most of the principal trading markets of the world, using the majority of common trading and hedging products, including derivatives such as swaps, futures, options and structured products (some of which are customized transactions using combinations of derivatives and executed to meet specific client or proprietary needs). As a result of our broad participation in products and markets, our trading strategies are correspondingly diverse and exposures are generally spread across a range of risks and locations. Risks associated with the embedded derivative elements of our structured products are actively monitored and managed on a portfolio basis as part of our overall trading portfolio and are reflected in our VaR measures.

Trading risks are measured using VaR along with a number of other risk measurement tools. VaR measures the potential loss in fair value of trading positions due to adverse market movements over a defined time horizon at a specified confidence level. VaR relies on historical data and is considered a useful tool for estimating potential loss in normal markets in which there are no abrupt changes in market conditions. We use risk management VaR for internal risk management purposes and regulatory VaR for regulatory capital purposes. For risk management VaR, we use a

one-day holding period and a 98% confidence level. This means there is a 1-in-50 chance of incurring a daily mark-to-market trading loss at least as large as the reported VaR. For regulatory VaR, we present one-day, 99% VaR, which is a ten-day VaR adjusted to a one-day holding period. Our VaR methodology is the same for both VaR measures, except for the confidence levels and holding periods. Other tools, including stress testing, are more appropriate for modeling the impact from severe market conditions.

We regularly review our VaR model to ensure that it remains appropriate given evolving market conditions and the composition of our trading portfolio. In 4Q13, we updated our VaR models to better reflect that borrowing costs may differ from the risk-free rate when calculating forward equity prices and to better capture the volatility skew risk for foreign exchange products. The cumulative impact of these updates on the average 4Q13 risk management VaR was immaterial and prior periods have not been restated.

For regulatory capital purposes, we operate under the Basel III market risk framework which includes an incremental risk charge, stressed VaR and, since January 1, 2013, consideration of the impact of changes in a counterparty's credit spreads (also known as CVA).

► Refer to "Market risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2012 for further information.

In order to show the aggregate market risk in our trading books, the chart entitled "Daily risk management VaR" shows the trading-related market risk on a consolidated basis.

We measure VaR in US dollars, as substantially all market risk relates to Investment Banking.

Average risk management VaR was stable at USD 44 million from 3Q13, as an increase in equity exposures was offset by a reduction in interest rate and foreign exchange exposures and lower market volatility. Compared to 4Q12, average risk management VaR decreased 4% due to reduced residential mortgage-backed securities (RMBS), agency collateralized mortgage obligations and cash equity exposures.

Period-end risk management VaR increased 31% to USD 51 million from 3Q13. The increase mainly reflected higher equity exposures, partially offset by a reduction in market volatility. Compared to 4Q12, period-end risk management VaR increased 16%, reflecting increased equity exposures and reduced portfolio diversification benefit, partially offset by lower interest rate and foreign exchange exposures.

One-day, 98% risk management VaR and one-day, 99% regulatory VaR (CHF)

| | | | | | | Risk management VaR (98%) | Regulatory VaR (99%) |
|--------------------|-------------------------------------|---------------------|-----------|--------|---------------------------------|------------------------------|-------------------------|

| End of period | 49 | 13 | 2 | 18 | (38) | 44 | 57 |

Excludes risks associated with counterparty and own credit exposures.

¹ As the maximum and minimum occur on different days for different risk types, it is not meaningful to calculate a portfolio diversification benefit.

Various techniques are used to assess the accuracy of the regulatory VaR model used for trading portfolios, including backtesting. We conduct such backtesting using actual daily trading revenues. Actual daily trading revenues are compared with a regulatory 99% VaR calculated using a one-day holding period. A backtesting exception occurs when a trading loss exceeds the daily VaR estimate. We had no such backtesting exceptions in 4Q13 and in the 12-month-period ending with such quarter. Since there were fewer than five backtesting exceptions in the rolling 12-month period ending as of the end of 4Q13, in line with BIS industry guidelines, the VaR model is deemed to be statistically valid.

For capital purposes, FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital

for every regulatory VaR exception over four in the prior rolling 12-month period calculated using a subset of actual daily trading revenues.

► Refer to “Risk measurement models” in Capital management – Regulatory capital framework for further information on the use of our regulatory VaR model in the calculation of trading book market risk capital requirements.

The histogram entitled “Actual daily trading revenues” compares the actual daily trading revenues for 4Q13 with those for 3Q13 and 4Q12. The dispersion of trading revenues indicates the day-to-day volatility in our trading activities. In 4Q13, we had no trading loss days, compared to one trading loss day in 3Q13.

Daily risk management VaR

Actual daily trading revenues

Banking portfolios

We assume non-trading interest rate risk through interest rate-sensitive positions originated by Private Banking & Wealth Management and risk-transferred to Treasury, money market and funding activities by Treasury and the deployment of our consolidated equity as well as other activities, including market making and trading activities involving banking book positions at the divisions, primarily Investment Banking. Savings accounts and many other retail banking products have no contractual maturity date or direct market-linked interest rate and are risk-transferred from Private Banking & Wealth Management to Treasury on a pooled basis using replicating portfolios (approximating the re-pricing behavior of the underlying product). Treasury and certain other areas of the Group running interest rate risk positions actively manage the positions within approved limits. This risk is monitored on a daily basis.

The impact of a one basis point parallel increase of the yield curves on the fair value of interest rate-sensitive non-trading book positions would have amounted to a valuation increase of CHF 8.5 million as of the end of 4Q13 and 3Q13.

CREDIT RISK

Credit risk is the possibility of a loss being incurred by us as the result of a borrower or counterparty failing to meet its financial obligations or as a result of deterioration in the credit quality of the borrower or counterparty. In the event of a customer default, a bank generally incurs a loss equal to the amount owed by the debtor, less any recoveries from foreclosure, liquidation of collateral, or the restructuring of the debtor company. A change in the credit quality of a counterparty has an impact on the valuation of assets eligible for fair value measurement, with valuation changes recorded in the consolidated statements of operations.

Sources of credit risk

The majority of our credit risk is concentrated in the Wealth Management Clients and Corporate & Institutional Clients businesses within the Private Banking & Wealth Management division and in the Investment Banking division. Credit risk exists within lending products, commitments and letters of credit, and results from counterparty exposure arising from derivatives, foreign exchange and other transactions.

Our regular review of the credit quality of clients and counterparties does not depend on the accounting treatment of the asset or commitment. We regularly review the appropriateness of allowances for credit losses. Changes in the credit quality of counterparties of loans held at fair value are reflected in valuation changes recorded directly in revenues, and therefore are not part of the impaired loans balance.

► Refer to "Credit risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management in the Credit Suisse Annual Report 2012 for further information on credit risk.

► Refer to "Note 27 – Financial instruments" in III – Condensed consolidated financial statements – unaudited for further information on counterparty credit risk.

Selected European credit risk exposures

The scope of our disclosure of European credit risk exposure includes all countries of the EU which are rated below AA or its equivalent by at least one of the three major rating agencies and where our gross exposure exceeds our quantitative threshold of EUR 0.5 billion. We believe this external rating is a useful measure in determining the financial ability of countries to meet their financial obligations, including giving an indication of vulnerability to adverse business, financial and economic conditions.

Monitoring of selected European credit risk exposures

Our credit risk exposure to these European countries is managed as part of our risk management process. The Group makes use of country limits and performs scenario analyses on a regular basis, which include analyses on our indirect sovereign credit risk exposures from our exposures to selected European financial institutions. This assessment of indirect sovereign credit risk exposures includes analysis of publicly available disclosures of counterparties' exposures to the European countries within the defined scope of our disclosure. We monitor the concentration of collateral underpinning our over-the-counter (OTC) derivative and reverse repurchase agreement exposures through monthly reporting. We also monitor the impact of sovereign rating downgrades on collateral eligibility. Strict limits on sovereign collateral from G-7 and non-G-7 countries are monitored monthly. Similar disclosure is part of our regular risk reporting to regulators.

Presentation of selected European credit risk exposures

The basis for the presentation of the country exposure is our internal risk domicile view. The risk domicile view is based on the domicile of the legal counterparty, i.e., it may include exposure to a legal entity domiciled in the reported country where its parent is located outside of the country.

The credit risk exposure in the table and the related description of developments is presented on a risk-based view before deduction of any related allowance for loan losses. Prior to our 4Q13 Financial Report, gross and net credit risk exposures were presented net of the allowance for loan losses. The net impact of this change in presentation was an increase of EUR 0.1 billion in both gross and net sovereign credit risk exposures to Greece as of the end of 4Q13. We present our credit risk exposure and related risk mitigation for the following distinct categories:

- *Gross credit risk exposure* includes the principal amount of loans drawn, letters of credit issued and undrawn portions of committed facilities, the positive replacement value (PRV) of derivative instruments after consideration of legally enforceable netting agreements, the notional value of investments in money market funds and the market values of securities financing transactions and the debt cash trading portfolio (short-term securities) netted at issuer level.
- *Risk mitigation* includes CDS and other hedges, at their net notional amount, guarantees, insurance and collateral (primarily cash, securities and, to a lesser extent, real estate, mainly for Private Banking & Wealth Management exposure to corporates & other). Collateral values applied for the calculation of the net exposure are determined in accordance with our risk management policies and reflect applicable margining considerations.
- *Net credit risk exposure* represents gross credit risk exposure net of risk mitigation.
- *Inventory* represents the long inventory positions in trading and non-trading physical debt and synthetic positions, each at market value, all netted at issuer level. Physical debt is non-derivative debt positions (e.g., bonds), and synthetic positions are created through OTC contracts (e.g., CDS purchased and/or sold and total return swaps (TRS)).

CDS presented in the risk mitigation column are purchased as a direct hedge to our OTC exposure and the risk mitigation impact is considered to be the notional amount of the contract for risk purposes, with the mark-to-market fair value of CDS risk-managed

against the protection provider. Net notional amounts of CDS reflect the notional amount of CDS protection purchased less the notional amount of CDS protection sold and are based on the origin of the CDS reference credit, rather than that of the CDS counterparty. CDS included in the inventory column represent contracts recorded in our trading books that are hedging the credit risk of the instruments included in the inventory column and are disclosed on the same basis as the value of the fixed income instrument they are hedging.

We do not have any tranching CDS positions on these European countries and only an insignificant amount of indexed credit derivatives is included in inventory.

The credit risk of CDS contracts themselves, i.e., the risk that the CDS counterparty will not perform in the event of a default, is managed separately from the credit risk of the reference credit. To mitigate such credit risk, all CDS contracts are collateralized and executed with counterparties with whom we have an enforceable International Swaps and Derivatives Association (ISDA) master agreement that provides for daily margining.

Development of selected European credit risk exposures

On a gross basis, before taking into account risk mitigation, our risk-based sovereign credit risk exposure to Croatia, Cyprus, Greece, Ireland, Italy, Portugal and Spain as of the end of 4Q13 was EUR 4.3 billion, down from EUR 4.5 billion as of the end of 3Q13. Our net exposure to these sovereigns was stable at EUR 0.8 billion compared to the end of 3Q13. Our non-sovereign risk-based credit risk exposure in these countries as of the end of 4Q13 included net exposure to financial institutions of EUR 2.3 billion and to corporates and other counterparties of EUR 1.9 billion, compared to EUR 1.3 billion and EUR 3.3 billion, respectively, as of the end of 3Q13. A significant majority of the purchased credit protection is transacted with banks outside of the disclosed countries. For credit protection purchased from banks in the disclosed countries, such credit risk is reflected in the gross and net exposure to each respective country.

Sovereign debt rating developments

In 4Q13, the long-term sovereign debt ratings of the countries listed in the table were affected as follows: Standard & Poor's increased Cyprus' rating to B- from CCC+ and Moody's increased Greece's rating to Caa3+ from C. The rating changes did not have a significant impact on the Group's financial position, result of operations, liquidity or capital resources.

¹ Includes other hedges (derivative instruments), guarantees, insurance and collateral.² Represents long inventory positions netted at issuer level.³ Substantially all of which results from CDS; represents long positions net of short positions.

Credit risk overview

The following table represents credit risk from loans, irrevocable loan commitments and certain other contingent liabilities, loans held-for-sale, traded loans and derivative instruments before consideration of risk mitigation such as cash collateral and marketable

securities or credit hedges. Irrevocable loan commitments include irrevocable credit facilities for Investment Banking and Private Banking & Wealth Management, but do not include unused credit limits which can be revoked at our sole discretion upon notice to the client.

Credit risk

| Irrevocable commitments under documentary credits | 5,512 | 5,574 | 6,258 | (1) | (12) |
| Total off-balance sheet | 107,418 | 114,225 | 119,064 | (6) | (10) |
| Total credit risk | 414,408 | 423,101 | 423,582 | (2) | (2) |

Before risk mitigation, for example, collateral, credit hedges.

¹ Positive replacement value after netting agreements.

² Irrevocable loan commitments do not include unused credit limits which are revocable at the Group's sole discretion upon notice to the client. Prior periods have been adjusted to the current presentation.

Loan exposure

Compared to the end of 3Q13, gross loans increased CHF 1.8 billion to CHF 248.0 billion. In Private Banking & Wealth Management, gross loans were CHF 216.5 billion, up CHF 1.6 billion from 3Q13, reflecting increased lending driven by the real estate sector, loans collateralized by securities and residential mortgages, partially offset by the reclassification of the loans relating to our domestic private banking business booked in Germany to discontinued assets held-for-sale. Gross loans in Investment Banking increased CHF 209 million to CHF 31.5 billion, primarily from increases in commercial and industrial loans, loans to financial institutions and loans to governments and public institutions, partially offset by the US dollar translation impact.

Gross impaired loans decreased 3% to CHF 1.5 billion compared to the end of 3Q13. In Private Banking & Wealth Management, gross impaired loans decreased CHF 36 million to CHF 1.2 billion, primarily due to lower non-performing and non-interest-earning loans, partially offset by higher potential problem loans. In Investment Banking, gross impaired loans decreased CHF 14

million to CHF 252 million, primarily due to the repayment of a restructured loan.

We recorded a net provision for credit losses of CHF 53 million in 4Q13, stable compared to 3Q13, with a net provision of CHF 44 million and CHF 8 million in Private Banking & Wealth Management and Investment Banking, respectively.

Compared to the end of 4Q12, gross loans increased 2%. An increase in Private Banking & Wealth Management of 4% was primarily due to an increase in loans collateralized by securities, higher residential mortgages and higher loans to the real estate sector, partially offset by the US dollar translation impact, a decrease in consumer finance and the reclassification of the loans relating to our domestic private banking business booked in Germany. In Investment Banking, a decrease of 9% was related to lower loans to financial institutions and consumer finance and the US dollar translation impact, partially offset by higher loans to governments and public institutions, commercial and industrial loans and loans to the real estate sector. Gross impaired loans decreased 14% driven by decreases in potential problem loans and non-interest-earning loans across the Group.

¹ Includes Corporate Center, in addition to Private Banking & Wealth Management and Investment Banking.

² Prior periods have been corrected to reclassify certain counterparty exposures from real estate and commercial and industrial loans to loans to financial institutions and from governments and public institutions to commercial and industrial loans, respectively.

³ Includes loans secured by financial collateral and mortgages. The value of financial collateral and mortgages, considered up to the amount of the related loans, was CHF 67,522 million, CHF 65,953 million and CHF 64,536 million as of the end of 4Q13, 3Q13 and 4Q12, respectively.

⁴ Impaired loans and allowance for loan losses are only based on loans which are not carried at fair value.

⁵ Excludes loans carried at fair value.

OPERATIONAL RISK

We have used an internal model to calculate the regulatory capital requirement for operational risk under the Advanced Measurement Approach (AMA) since 2008. In 2012, following discussions with FINMA, we initiated a project to enhance our internal model to reflect recent developments regarding operational risk measurement methodology and associated regulatory guidance. The revised model has been approved by FINMA for calculating the regulatory capital requirement for operational risk with effect from January 1, 2014. We view the revised model as a significant enhancement to our capability to measure and understand the operational risk profile of the Group that is also more conservative compared with the previous approach.

The model is based on a loss distribution approach that uses historical data on internal and relevant external losses of peers to generate frequency and severity distributions for a range of potential operational risk loss scenarios, such as an unauthorized trading incident or a material business disruption. Business experts and senior management review, and may adjust, the parameters

of these scenarios to take account of business environment and internal control factors, such as risk and control self-assessment results and risk and control indicators, to provide a forward-looking assessment of each scenario. The AMA capital calculation approved by FINMA includes all litigation-related provisions and also an add-on component relating to the aggregate range of reasonably possible litigation losses that are disclosed in our financial statements but are not covered by existing provisions. In 4Q13, this new approach to litigation-related provisions and reasonably possible litigation losses has been applied to the previous AMA model used to calculate regulatory capital requirements as of December 31, 2013. Insurance mitigation is included in the regulatory capital requirement for operational risk where appropriate, by considering the level of insurance coverage for each scenario and incorporating haircuts as appropriate. The internal model then uses the adjusted parameters to generate an overall loss distribution for the Group over a one-year time horizon. The AMA capital requirement represents the 99.9th percentile of this overall loss distribution.

Balance sheet and off-balance sheet

Total assets were CHF 872.8 billion, total liabilities were CHF 825.6 billion and total equity was CHF 47.2 billion. Both total assets and total liabilities were down 2% for the quarter, driven in both cases by the foreign exchange translation impact and a decrease from operating activities. The majority of our transactions are recorded on our balance sheet, however, we also enter into transactions that give rise to both on and off-balance sheet exposure.

BALANCE SHEET

Total assets were CHF 872.8 billion as of the end of 4Q13, down CHF 22.4 billion, or 2%, from the end of 3Q13, reflecting the foreign exchange translation impact and a decrease from operating activities. Excluding the foreign exchange translation impact, total assets decreased CHF 9.5 billion.

Compared to the end of 3Q13, trading assets decreased CHF 15.0 billion, or 6%, due to decreases in debt and equity securities and derivative instruments. Brokerage receivables decreased CHF 4.7 billion, or 8%, primarily reflecting a decrease in open trades and the foreign exchange translation impact. Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions were stable at CHF 160.0 billion. Cash and due from banks were stable at CHF 68.7 billion. Net loans increased CHF 1.8 billion, primarily reflecting increased lending in Private Banking & Wealth Management, driven by the real estate sector, loans collateralized by securities and residential mortgages. All other assets were stable at CHF 115.6 billion, including decreases of CHF 1.8 billion in securities received as collateral, CHF 0.8 in other investments and CHF 0.5 billion in other assets, offset by an increase of CHF 1.5 billion in assets of discontinued operations reclassified as held-for-sale.

Total liabilities were CHF 825.6 billion as of the end of 4Q13, down CHF 20.5 billion, or 2%, from the end of 3Q13, driven by a decrease from operating activities and the foreign exchange translation impact. Excluding the foreign exchange translation impact, total liabilities decreased CHF 9.8 billion.

Compared to the end of 3Q13, trading liabilities decreased CHF 15.7 billion, or 17%, reflecting decreases in derivative instruments and short positions. Brokerage payables decreased CHF 5.3 billion, or 7%, primarily due to lower client activity and the foreign exchange translation impact. Due to banks decreased

CHF 4.4 billion, or 16%, mainly driven by maturing of deposits with central banks. Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions were stable at CHF 94.0 billion. Long-term debt was stable at CHF 130.0 billion, as issuances of senior and subordinated debt were offset by maturing of senior debt and the foreign exchange translation impact. Customer deposits increased CHF 4.8 billion, or 1%, primarily driven by an increase in certificates of deposits. All other liabilities were stable at CHF 95.6 billion, including decreases of CHF 1.8 billion in obligation to return securities received as collateral and CHF 0.4 billion in other liabilities, offset by an increase of CHF 1.1 billion in liabilities of discontinued operations reclassified as held-for-sale.

► Refer to "Funding sources and uses" in Liquidity and funding management and "Capital management" for further information, including our funding of the balance sheet and the leverage ratio.

OFF-BALANCE SHEET

We enter into off-balance sheet arrangements in the normal course of business. Off-balance sheet arrangements are transactions or other contractual arrangements with, or for the benefit of, an entity that is not consolidated. These transactions include derivative instruments, guarantees and similar arrangements, retained or contingent interests in assets transferred to an unconsolidated entity in connection with our involvement with special purpose entities (SPEs), and obligations and liabilities (including contingent obligations and liabilities) under variable interests in unconsolidated entities that provide financing, liquidity, credit and other support.

Notes to the condensed consolidated financial statements – unaudited

Note 1 Summary of significant accounting policies

Basis of presentation

The accompanying unaudited condensed consolidated financial statements of Credit Suisse Group AG (the Group) are prepared in accordance with accounting principles generally accepted in the US (US GAAP) and are stated in Swiss francs (CHF). These condensed consolidated financial statements should be read in conjunction with the US GAAP consolidated financial statements and notes thereto for the year ended December 31, 2012 included in the Credit Suisse Annual Report 2012.

► Refer to "Note 1 – Summary of significant accounting policies" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for a description of the Group's significant accounting policies.

Certain financial information, which is normally included in annual consolidated financial statements prepared in accordance with US GAAP, but not required for interim reporting purposes, has been condensed or omitted. Certain reclassifications have been made

to the prior period's consolidated financial statements to conform to the current period's presentation. These condensed consolidated financial statements reflect, in the opinion of management, all adjustments that are necessary for a fair presentation of the condensed consolidated financial statements for the periods presented. The 3Q13 consolidated statements of operations and comprehensive income, the 3Q13 consolidated balance sheets and the 3Q13 consolidated statements of changes in equity have been added for convenience of the reader and are not a required presentation under US GAAP.

In preparing these condensed consolidated financial statements, management is required to make estimates and assumptions which affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the condensed consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Note 2 Recently issued accounting standards

Recently adopted accounting standards

The following provides the most relevant recently adopted accounting standards.

► Refer to "Note 2 – Recently issued accounting standards" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for a description of accounting standards adopted in 2012.

ASC Topic 210 – Balance Sheet

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-11, "Disclosures about Offsetting Assets and Liabilities" (ASU 2011-11), an update to Accounting Standards Codification (ASC) Topic 210 – Balance Sheet. The amendments in ASU 2011-11 require an entity to prepare additional disclosures about offsetting and related arrangements. In January 2013, the FASB issued ASU 2013-01, "Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities" (ASU 2013-01), an update to ASC Topic 210 – Balance Sheet. ASU 2013-01 clarifies the scope of ASU 2011-11. The adoption of ASU 2011-11 and ASU 2013-01 on January 1, 2013 did not have an impact on the Group's financial position, results of operations or cash flows.

► Refer to "Note 20 – Offsetting of financial assets and financial liabilities" for further information.

ASC Topic 220 – Comprehensive Income

In January 2013, the FASB issued ASU 2013-02, "Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income" (ASU 2013-02), an update to ASC Topic 220 – Comprehensive Income. The amendments require an entity to provide information about the amounts reclassified out of accumulated other comprehensive income (AOCI) by component. The adoption

of ASU 2013-02 on January 1, 2013 did not have an impact on the Group's financial position, results of operations or cash flows.

► Refer to "Note 19 – Accumulated other comprehensive income and additional share information" for further information.

In June 2011, the FASB issued ASU 2011-05, "Presentation of Comprehensive Income" (ASU 2011-05), an update to ASC Topic 220 – Comprehensive Income. ASU 2011-05 provides the entity with an option to present total comprehensive income either in a single continuous statement or in two separate but consecutive statements. The adoption of ASU 2011-05 on January 1, 2012 did not have an impact on the Group's financial position, results of operations or cash flows.

ASC Topic 360 – Property, Plant and Equipment

In December 2011, the FASB issued ASU 2011-10, "Derecognition of in Substance Real Estate – a Scope Clarification, a consensus of the FASB Emerging Issues Task Force" (ASU 2011-10), an update to ASC Topic 360 – Property, Plant and Equipment. The ASU specifies that the guidance in ASC Subtopic 360-20, Property, Plant and Equipment – Real Estate Sales, would apply to an entity that ceases to have a controlling financial interest in a subsidiary that is in substance real estate as a result of default on the subsidiary's non-recourse debt. The adoption of ASU 2011-10 on July 1, 2012 did not have a material impact on the Group's financial position, results of operations or cash flows.

ASC Topic 830 – Foreign Currency Matters

In March 2013, the FASB issued ASU 2013-05, "Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or

of an Investment in a Foreign Entity" (ASU 2013-05), an update to ASC Topic 830 – Foreign Currency Matters. The amendments provide guidance for the treatment of the cumulative translation adjustment when an entity ceases to hold a controlling financial interest in a subsidiary or group of assets within a foreign entity. ASU 2013-05 is effective prospectively for interim and annual reporting periods beginning after December 15, 2013 with early adoption permitted. The Group elected to early adopt ASU 2013-05 on January 1, 2013 which did not have a material impact on the Group's financial position, results of operations or cash flows.

Standards to be adopted in future periods

ASC Topic 946 – Financial Services – Investment Companies

In June 2013, the FASB issued ASU 2013-08, "Amendments to the Scope, Measurement, and Disclosure Requirements" (ASU 2013-08) an update to Topic 946 – Financial Services – Investment Companies. The amendments change the approach to the investment company assessment in Topic 946, clarify the characteristics of an investment company and provide comprehensive guidance for assessing whether an entity is an investment company. The adoption of ASU 2013-08 on January 1, 2014 did not have a material impact on the Group's financial position, results of operations or cash flows.

Note 3 Business developments and subsequent events

Business developments

► Refer to "Note 4 – Discontinued operations" for information on business divestitures in 4Q13.

Subsequent events

In March 2014, the Group completed the spin-off of its DLJ Merchant Banking Partners business for no consideration to an entity controlled by members of current management. The Group will retain certain carried interest rights.

In March 2014, the Group required employees who hold outstanding 2011 Partner Asset Facility (PAF2) awards to reallocate their PAF2 awards. PAF2 awards were linked to a portfolio of the Group's credit exposures, providing risk offset and capital relief. Due to regulatory changes, this capital relief would no longer be

available. As a result, the Group terminated the PAF2 awards and exchanged them at fair value for other compensation awards.

On March 21, 2014, the Group entered into an agreement with the Federal Housing Finance Agency (FHFA) to settle litigation claims related to the sale of approximately USD 16.6 billion of residential mortgage-backed securities between 2005 and 2007. Under the terms of the agreement, the Group will pay USD 885 million to resolve all claims in two pending securities lawsuits filed by the FHFA against Credit Suisse.

On April 3, 2014, the Group announced that its previously reported 2013 results were updated to reflect additional litigation provisions in connection with the US tax matter.

► Refer to "Note 29 – Litigation" for further information.

Note 4 Discontinued operations

In July 2013, the Group completed the sale of its ETF business to BlackRock and recognized a pre-tax gain on disposal of CHF 146 million in 3Q13 net of allocated goodwill of CHF 72 million. The sale price received by the Group may increase through future contingent payments, if specified thresholds are met. BlackRock is a company unrelated to the Group.

In August 2013, the Group announced the sale of CFG, its private equity fund of funds and co-investment business, to Grosvenor Capital Management. This transaction was completed in January 2014 and related gains of approximately CHF 90 million will be recognized in 1Q14. As of the end of 4Q13, CFG had total assets of CHF 31 million that were held-for-sale. The Group will continue to hold investments in and have unfunded commitments

to investment funds managed by CFG. Grosvenor Capital Management is a company unrelated to the Group.

In August 2013, the Group completed the sale of Strategic Partners, its dedicated secondary private equity business, to Blackstone and recognized a pre-tax gain on disposal of CHF 91 million in 3Q13 net of allocated goodwill of CHF 37 million. The Group will continue to receive carried interest from (and guarantee related claw-back obligations), hold limited partner interests in and have unfunded commitments to investment funds managed by Strategic Partners. The Group will also continue to guarantee minimum investment returns to certain third-party investors under existing side letter agreements. Blackstone is a company unrelated to the Group.

In November 2013, the Group announced the spin-off of DLJ Investment Partners, a dedicated private equity mezzanine investment business of the Group, to Portfolio Advisors, LLC. The transaction was completed in December 2013 with no gain or loss from disposal and insignificant impact on net revenues, operating expenses and net income/(loss) from discontinued operations for any of the periods reported. Portfolio Advisors, LLC is a company unrelated to the Group.

In December 2013, the Group announced the sale of its domestic private banking business booked in Germany (German private banking business) to ABN AMRO. This transaction is subject to customary closing conditions and is expected to close in the course of 2014. As of the end of 4Q13, the German private banking business had total assets and liabilities of CHF 1,553 million and CHF 1,140 million, respectively, that were held-for-sale. ABN AMRO is a company unrelated to the Group.

Assets held-for-sale

| end of | 4Q13 | 3Q13 |
|--|--------------|-----------|
| German private banking business (CHF million) | | |
| Cash | 960 | – |
| Loans | 575 | – |
| Other assets | 18 | – |
| Total assets held-for-sale | 1,553 | – |
| CFIG (CHF million) | | |
| Fees receivable | 8 | 6 |
| Goodwill | 23 | 32 |
| Other intangible assets | 0 | 8 |
| Total assets held-for-sale | 31 | 46 |
| Group (CHF million) | | |
| Total assets held-for-sale | 1,584 | 46 |

Liabilities held-for-sale

| end of | 4Q13 | 3Q13 |
|--|--------------|----------|
| German private banking business (CHF million) | | |
| Deposits | 1,118 | – |
| Other liabilities | 22 | – |
| Total liabilities held-for-sale | 1,140 | – |
| CFIG (CHF million) | | |
| Fees payable | 0 | 6 |
| Total liabilities held-for-sale | 0 | 6 |
| Group (CHF million) | | |
| Total liabilities held-for-sale | 1,140 | 6 |

For the operations discontinued in 4Q13 and 3Q13, the revenues, expenses and gains from disposals were included in the results of the Private Banking & Wealth Management segment. The reclassification of these revenues and expenses from the segment results to discontinued operations for Group reporting was effected through the Corporate Center.

The results of operations of the businesses sold have been reflected in income/(loss) from discontinued operations in the consolidated statements of operations for the relevant periods presented. The assets and liabilities of discontinued operations for which the sale has not yet been completed are presented as assets of discontinued operations held-for-sale and liabilities of discontinued operations held-for-sale, respectively, and prior periods are not reclassified.

Note 5 Segment information

Overview

The Group is a global financial services company domiciled in Switzerland. The Group's business consists of two segments: Private Banking & Wealth Management and Investment Banking. The two segments are complemented by Shared Services, which provides support in the areas of finance, operations, human resources, legal and compliance, risk management and IT. Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses that have not been allocated to the segments. In addition, Corporate Center includes consolidation and elimination adjustments required to eliminate intercompany revenues

and expenses. For the operations discontinued, the revenues, expenses and gains from disposals were included in the results of the Private Banking & Wealth Management segment. The reclassification of these revenues and expenses from the segment results to discontinued operations for Group reporting was effected through the Corporate Center. Beginning in 1Q13, segment assets exclude intra-Group balances between the segments. Prior periods have been reclassified to conform to the current presentation.

► Refer to "Note 5 – Segment information" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information on segment information, revenue sharing and cost allocation, funding and taxes.

| Diluted earnings/(loss) per share available for common shares | (0.37) | 0.26 | 0.09 | 1.22 | 0.79 |

Prior periods have been adjusted to reflect the increase in the number of shares outstanding that arose from the 2Q13 stock dividend, as required under US GAAP.

¹ Reflects MACCS issued in July 2012 that were mandatorily convertible into shares on March 29, 2013, which shares were settled and delivered on April 8, 2013.

² Reflects changes in the fair value of the PAF2 units which are reflected in the net profit of the Group until the awards are finally settled. Fair value of the PAF2 units which are reflected in the net profit of the Group are not adjusted for 4Q13, 3Q13, 4Q12, 2013 and 2012, respectively, as the effect would be antidilutive.

³ Reflects weighted-average shares outstanding on PAF2 units. Weighted-average shares on PAF2 units for 4Q13, 3Q13, 4Q12, 2013 and 2012, respectively, were excluded from the diluted earnings per share calculation, as the effect would be antidilutive.

⁴ Weighted-average potential common shares relating to instruments that were not dilutive for the respective periods (and therefore not included in the diluted earnings per share calculation above) but could potentially dilute earnings per share in the future were 36.0 million, 33.7 million, 50.6 million, 35.9 million and 50.3 million for 4Q13, 3Q13, 4Q12, 2013 and 2012, respectively.

⁵ Due to the net loss in 4Q13, 1.7 million weighted-average share options and warrants outstanding and 0.8 million weighted-average share awards outstanding were excluded from the diluted earnings per share calculation, as the effect would be antidilutive.

Note 14 Trading assets and liabilities

| end of | 4Q13 | 3Q13 | 4Q12 |
|--|----------------|----------------|----------------|
| Trading assets (CHF million) | | | |
| Debt securities | 110,116 | 117,354 | 135,871 |
| Equity securities ¹ | 76,695 | 78,605 | 74,895 |

| Due after 10 years | 89 | 88 | 1.46 |
| Total debt securities | 2,809 | 2,886 | 1.96 |

Note 16 Loans, allowance for loan losses and credit quality

Loans are divided in two portfolio segments, “consumer” and “corporate & institutional”. Consumer loans are disaggregated into the classes of mortgages, loans collateralized by securities and consumer finance. Corporate & institutional loans are disaggregated into the classes of real estate, commercial and industrial loans, financial institutions and governments and public institutions.

The determination of the loan classes is primarily driven by the customer segmentation in the two business divisions, Private Banking & Wealth Management and Investment Banking, both of which are engaged in credit activities.

The Group assigns both counterparty and transaction ratings to its credit exposures. The counterparty rating reflects the probability of default of the counterparty. The transaction rating reflects the expected loss, considering collateral, on a given transaction if the counterparty defaults. Credit risk is assessed and monitored on the single obligor and single obligation level as well as on the credit portfolio level as represented by the classes of loans. Credit limits are used to manage counterparty credit risk.

► Refer to “Note 18 – Loans, allowance for loan losses and credit quality” in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information on loans, allowance for loan losses, credit quality and impaired loans.

¹ Includes drawdowns under purchased loan commitments.

² Includes loans previously reclassified to held-for-sale that were not sold and were reclassified back to loans held-to-maturity.

³ All loans held at amortized cost which are sold are reclassified to loans held-for-sale on or prior to the date of the sale.

Credit quality of loans held at amortized cost

Management monitors the credit quality of loans through its credit risk management processes, which are structured to assess, quantify, measure, monitor and manage risk on a consistent basis. This process requires careful consideration of proposed extensions of credit, the setting of specific limits, monitoring during the life of the exposure, active use of credit mitigation tools and a disciplined approach to recognizing credit impairment.

Management evaluates many factors when assessing the credit quality of loans. These factors include the volatility of default probabilities, rating changes, the magnitude of potential loss, internal risk ratings, and geographic, industry and other economic

factors. For the purpose of credit quality disclosures, the Group uses internal risk ratings as credit quality indicators.

The Group employs a set of credit ratings for the purpose of internally rating counterparties. Credit ratings are intended to reflect the risk of default of each obligor or counterparty. Ratings are assigned based on internally developed rating models and processes, which are subject to governance and internally independent validation procedures.

► Refer to "Credit quality of loans held at amortized cost" in V – Consolidated financial statements – Credit Suisse Group – Note 18 – Loans, allowance for loan losses and credit quality in the Credit Suisse Annual Report 2012 for further information on internal ratings and the scope of the credit quality disclosures.

¹ Includes the value of collateral up to the amount of the outstanding related loans. For mortgages, collateral values are generally values at the time of granting the loan.

² Prior period has been corrected to reclassify certain counterparty exposures from real estate and commercial and industrial loans to loans to financial institutions.

Value of collateral

In Private Banking & Wealth Management, all collateral values for loans are regularly reviewed according to our risk management policies and directives, with maximum review periods determined by market liquidity, market transparency and appraisal costs. For example, traded securities are revalued on a daily basis and property values are appraised over a period of more than one year considering the characteristics of the borrower, current developments in the relevant real estate market and the current level of credit exposure to the borrower. If the credit exposure to a borrower has changed significantly, in volatile markets or in times of increasing general market risk, collateral values may be appraised more frequently. Management judgment is applied in assessing

whether markets are volatile or general market risk has increased to a degree that warrants a more frequent update of collateral values. Movements in monitored risk metrics that are statistically different compared to historical experience are considered in addition to analysis of externally-provided forecasts, scenario techniques and macro-economic research. For impaired loans, the fair value of collateral is determined within 90 days of the date the impairment was identified and thereafter regularly revalued by Group credit risk management within the impairment review process.

In Investment Banking, few loans are collateral dependent. The collateral values for these loans are appraised on at least an annual basis, or when a loan-relevant event occurs.

Details on significant reclassification adjustments

| in | 4Q13 | 3Q13 | 2013 |
|---|------|------|-------|
| Reclassification adjustments, included in net income (CHF million) | | | |
| Cumulative translation adjustments | | | |
| Sale of subsidiaries ¹ | (2) | 38 | 84 |
| Actuarial gains/(losses) | | | |
| Amortization of recognized actuarial losses ² | 129 | 87 | 390 |
| Tax expense/(benefit) | (31) | (21) | (96) |
| Net of tax | 98 | 66 | 294 |
| Net prior service credit/(cost) | | | |
| Amortization of recognized prior service credit/(cost) ² | (19) | (27) | (120) |
| Tax expense/(benefit) | 4 | 5 | 25 |
| Net of tax | (15) | (22) | (95) |

¹ Includes net releases of CHF 38 million and CHF 46 million in 3Q13 and 1Q13, respectively, on the sale of JO Hambro which was settled in 3Q13. These were reclassified from cumulative translation adjustments and included in net income in other revenues, offset by a gain on the transaction.

² These components are included in the computation of total pension costs. Refer to "Note 23 – Pension and other post-retirement benefits" for further information.

¹ At par value CHF 0.04 each, fully paid. In addition to the treasury shares, a maximum of 661,049,598 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 498,874,240 of these shares were reserved for capital instruments.

² At par value CHF 0.04 each, fully paid. In addition to the treasury shares, a maximum of 661,735,049 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 498,874,240 of these shares were reserved for capital instruments.

³ At par value CHF 0.04 each, fully paid. In addition to the treasury shares, a maximum of 771,499,654 unissued shares (conditional, conversion and authorized capital) were available for issuance without further approval of the shareholders. 732,326,910 of these shares were reserved for capital instruments (including MACCS).

Note 20 Offsetting of financial assets and financial liabilities

The disclosures set out in the tables below include derivatives, reverse repurchase and repurchase agreements, and securities lending and borrowing transactions that:

- are offset in the Group's consolidated balance sheets; or
- are subject to an enforceable master netting agreement or similar agreement (enforceable master netting agreements), irrespective of whether they are offset in the Group's consolidated balance sheets.

Similar agreements include derivative clearing agreements, global master repurchase agreements and global master securities lending agreements.

Derivatives

The Group transacts bilateral OTC derivatives (OTC derivatives) mainly under International Swaps and Derivatives Association (ISDA) Master Agreements and Swiss Master Agreements for OTC derivative instruments. These agreements provide for the net settlement of all transactions under the agreement through a single payment in the event of default or termination under the agreement. They allow the Group to offset balances from derivative assets and liabilities as well as the receivables and payables to related cash collateral transacted with the same counterparty. Collateral for OTC derivatives is received and provided in the form of cash and marketable securities. Such collateral may be subject to the standard industry terms of an ISDA Credit Support Annex. The terms of an ISDA Credit Support Annex provide that securities received or provided as collateral may be pledged or sold during the term of the transactions and must be returned upon maturity of

the transaction. These terms also give each counterparty the right to terminate the related transactions upon the other counterparty's failure to post collateral. Financial collateral received or pledged for OTC derivatives may also be subject to collateral agreements which restrict the use of financial collateral.

For derivatives transacted with exchanges (exchange-traded derivatives) and central clearing counterparties (OTC-cleared derivatives), positive and negative replacement values and related cash collateral may be offset if the terms of the rules and regulations governing these exchanges and central clearing counterparties permit such netting and offset.

Where no such agreements exist, fair values are recorded on a gross basis.

Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value. There is an exception for certain bifurcable hybrid debt instruments which the Group did not elect to account for at fair value. However, these bifurcated embedded derivatives are generally not subject to enforceable master netting agreements and are not recorded as derivative instruments under trading assets and liabilities or other assets and other liabilities. Information on bifurcated embedded derivatives has therefore not been included in the offsetting disclosures.

The following table presents the gross amount of derivatives subject to enforceable master netting agreements by contract and transaction type, the amount of offsetting, the amount of derivatives not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

¹ Represents derivatives where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

Reverse repurchase and repurchase agreements and securities lending and borrowing transactions

Reverse repurchase and repurchase agreements are generally covered by global master repurchase agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreements are terminated and are settled net in one single payment. Transactions under such agreements are netted in the consolidated balance sheets if they are with the same counterparty, have the same maturity date, settle through the same clearing institution and are subject to the same master netting agreement. The amounts offset are measured on the same basis as the underlying transaction (i.e., on an accrual basis or fair value basis).

Securities lending and borrowing transactions are generally executed under global master securities lending agreements with netting terms similar to ISDA Master Agreements. In certain situations, for example in the event of default, all contracts under the agreement are terminated and are settled net in one single payment. Transactions under these agreements are netted in the consolidated balance sheets if they meet the same right of offset criteria as for reverse repurchase and repurchase agreements. In general, most securities lending and borrowing transactions do not meet the criterion of having the same settlement date specified at

inception of the transaction, and therefore they are not eligible for netting in the consolidated balance sheets. However, securities lending and borrowing transactions with explicit maturity dates may be eligible for netting in the consolidated balance sheets.

Reverse repurchase and repurchase agreements are collateralized principally by government securities, money market instruments and corporate bonds and have terms ranging from overnight to a longer or unspecified period of time. In the event of counterparty default, the reverse repurchase agreement or securities lending agreement provides the Group with the right to liquidate the collateral held. As is the case in the Group's normal course of business, substantially all of the collateral received that may be sold or repledged was sold or repledged as of December 31, 2013 and December 31, 2012. In certain circumstances, financial collateral received may be restricted during the term of the agreement (e.g., in tri-party arrangements).

The following table presents the gross amount of securities purchased under resale agreements and securities borrowing transactions subject to enforceable master netting agreements, the amount of offsetting, the amount of securities purchased under resale agreements and securities borrowing transactions not subject to enforceable master netting agreements and the net amount presented in the consolidated balance sheets.

Offsetting of securities purchased under resale agreements and securities borrowing transactions

| end of | 4Q13 | | | 4Q12 | | |
|---|--------------|---------------|---------------------------|--------------|---------------|---------------------------|
| | Gross | Offsetting | Net | Gross | Offsetting | Net |

| Total not subject to enforceable master netting agreements ¹ | 32.0 | – | 32.0 | 69.5 | – | 69.5 |
| Total | 143.6 | (26.8) | 116.8 | 205.9 | (43.1) | 162.8 |
| of which securities sold under repurchase agreements and securities lending transactions | 120.8 | (26.8) | 94.0 ² | 175.8 | (43.1) | 132.7 ² |
| of which obligation to return securities received as collateral, at fair value | 22.8 | 0.0 | 22.8 | 30.1 | 0.0 | 30.1 |

¹ Represents securities sold under repurchase agreements and securities lending transactions where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place.

² CHF 76,104 million and CHF 108,784 million of the total net amount as of the end of 4Q13 and 4Q12, respectively, are reported at fair value.

The following table presents the net amount presented in the consolidated balance sheets of financial assets and liabilities subject to enforceable master netting agreements and the gross amount of financial instruments and cash collateral not offset in the consolidated balance sheets. The table excludes derivatives, reverse repurchase and repurchase agreements and securities lending and

borrowing transactions not subject to enforceable master netting agreements where a legal opinion supporting the enforceability of netting in the event of default or termination under the agreement is not in place. Net exposure reflects risk mitigation in the form of collateral.

Amounts not offset in the consolidated balance sheets

| end of | 4Q13 | | | | 4Q12 | | | |
|---|--------------|------------------------------------|---|--------------|--------------|------------------------------------|---|--------------|
| | Net | Financial instruments ¹ | Cash collateral received/pledged ¹ | Net exposure | Net | Financial instruments ¹ | Cash collateral received/pledged ¹ | Net exposure |
| Financial assets subject to enforceable master netting agreements (CHF billion) | | | | | | | | |
| Derivatives | 23.6 | 4.9 | 0.1 | 18.6 | 27.3 | 5.8 | 0.0 | 21.5 |
| Securities purchased under resale agreements | 86.9 | 86.9 | 0.0 | 0.0 | 100.3 | 100.3 | 0.0 | 0.0 |
| Securities borrowing transactions | 21.0 | 20.2 | 0.0 | 0.8 | 18.9 | 17.4 | 0.0 | 1.5 |
| Total financial assets subject to enforceable master netting agreements | 131.5 | 112.0 | 0.1 | 19.4 | 146.5 | 123.5 | 0.0 | 23.0 |
| Financial liabilities subject to enforceable master netting agreements (CHF billion) | | | | | | | | |
| Derivatives | 25.6 | 9.9 | 0.0 | 15.7 | 29.4 | 10.8 | 0.0 | 18.6 |
| Securities sold under repurchase agreements | 59.7 | 59.7 | 0.0 | 0.0 | 56.6 | 56.4 | 0.2 | 0.0 |
| Securities lending transactions | 6.6 | 6.2 | 0.0 | 0.4 | 10.8 | 10.2 | 0.0 | 0.6 |
| Obligation to return securities received as collateral, at fair value | 18.5 | 17.5 | 0.0 | 1.0 | 25.9 | 24.2 | 0.0 | 1.7 |
| Total financial liabilities subject to enforceable master netting agreements | 110.4 | 93.3 | 0.0 | 17.1 | 122.7 | 101.6 | 0.2 | 20.9 |

¹ The total amount reported in financial instruments (recognized financial assets and financial liabilities and non-cash financial collateral) and cash collateral is limited to the amount of the related instruments presented in the consolidated balance sheets and therefore any over-collateralization of these positions is not included.

Net exposure is subject to further credit mitigation through the transfer of the exposure to other market counterparties by the use of CDS and credit insurance contracts. Therefore the net exposure

presented in the table above is not representative for the Group's counterparty exposure.

Note 21 Tax

The income tax benefit of CHF 63 million recorded in 4Q13 included the impact of the geographical mix of results, an income tax benefit of CHF 367 million relating to tax deductions arising from participation valuations and the re-measurement of existing deferred tax assets on net operating losses due to changes in forecasted earnings, partially offset by a tax charge of CHF 278 million related to a valuation allowance recognized on existing deferred tax assets in respect of one of the Group's entities in the UK.

The presentation of net deferred tax assets related to net operating losses, net deferred tax assets on temporary differences and net deferred tax liabilities is in accordance with ASC Topic 740 – Income Taxes guidance to interim reporting. Nettable gross deferred tax liabilities are allocated on a pro-rata basis to gross deferred tax assets on net operating losses and gross deferred tax assets on temporary differences. This approach is aligned with the underlying treatment of netting gross deferred tax assets and liabilities under the Basel III framework. Valuation allowances have been allocated against such deferred tax assets on net operating losses first with any remainder allocated to such deferred tax assets on temporary differences. This presentation is considered the most appropriate disclosure given the underlying nature of the gross deferred tax balances.

As of December 31, 2013, the Group had accumulated undistributed earnings from foreign subsidiaries of CHF 6.1 billion which are considered indefinitely reinvested. The Group would need to accrue and pay taxes on these undistributed earnings if such earnings were repatriated. No deferred tax liability was recorded in respect of those amounts as these earnings are considered indefinitely reinvested. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

The Group is currently subject to ongoing tax audits, inquiries and litigation with the tax authorities in a number of jurisdictions, including Brazil, the Netherlands, the US, the UK and Switzerland. Although the timing of completion is uncertain, it is reasonably possible that some of these will be resolved within 12 months of the reporting date. It is reasonably possible that there will be a decrease between zero and CHF 72 million in unrecognized tax benefits within 12 months of the reporting date.

The Group remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Switzerland – 2009; Brazil – 2008; Japan – 2008; the UK – 2006; the US – 2006; and the Netherlands – 2005.

| Income taxable to noncontrolling interests | (80) |
| Tax deductible impairments of Swiss subsidiary investments | (255) |
| Other | (67) |
| Income tax expense/(benefit) | (63) |

Foreign tax rate differential

4Q13 included a foreign tax benefit of CHF 26 million in respect of earnings in higher tax jurisdictions, mainly Brazil and the US.

Changes in tax law and rates

4Q13 included a tax expense of CHF 11 million related to the re-measurement of deferred tax assets resulting from the impact of the reduction of the UK corporate income tax rate from 23% to 20%.

Other non-deductible expenses

4Q13 included non-deductible interest expenses of CHF 46 million, non-deductible bank levy costs and other non-deductible expenses of CHF 8 million and non-deductible provision accruals of CHF 103 million.

Changes in deferred tax valuation allowance

4Q13 included the impact of the net increase of valuation allowances of CHF 39 million in respect of four of the Group's operating entities, two in the UK and two in Asia, relating to current year earnings. Additionally, it also included an increase in valuation allowance for previously recognized deferred tax assets in respect of a Group operating entity in the UK of CHF 278 million, partially offset by the release of valuation allowances in respect of another Group operating entity in the UK of CHF 41 million, both relating to changes in future profitability assumptions.

Lower taxed income

4Q13 included a CHF 19 million income tax benefit related to non-taxable life insurance income, partially offset by a change in the effective tax rate due to actual fourth quarter earnings as compared to the full-year forecast of CHF 13 million.

Other

4Q13 included a tax benefit of CHF 71 million relating to the increase of deferred tax assets in one of the Group's operating entities in Switzerland. This benefit is related to the re-measurement of pre-existing deferred tax assets due to changes in future profitability assumptions. It also included a benefit for other various smaller items, partially offset by a CHF 19 million income tax charge relating to the increase of tax contingency accruals.

Net deferred tax assets

| end of | 4Q13 | 3Q13 |
|--|--------------|--------------|
| Net deferred tax assets (CHF million) | | |
| Deferred tax assets | 6,185 | 6,106 |
| of which net operating losses | 1,380 | 1,607 |
| of which deductible temporary differences | 4,805 | 4,499 |
| Deferred tax liabilities | (394) | (167) |
| Net deferred tax assets | 5,791 | 5,939 |

Note 22 Employee deferred compensation

The Group's current and previous deferred compensation plans include share awards, performance share awards, Plus Bond awards, Partner Asset Facilities awards, Adjustable Performance Plan awards, Restricted Cash Awards, Scaled Incentive Share Units (SISUs), Incentive Share Units (ISUs) and other cash awards.

► Refer to "Note 27 – Employee deferred compensation" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information.

The following tables show the expense for deferred compensation awards recognized in the consolidated statements of operations, the estimated unrecognized expense for deferred compensation awards granted in 4Q13 and prior periods and the associated remaining requisite service period over which the unrecognized expense will be recognized. The estimated unrecognized deferred compensation expense was based on the fair value of each award on the date of grant and included the current estimated outcome of relevant performance criteria and estimated future forfeitures but no estimate for future mark-to-market adjustments.

Deferred compensation expense

| in | 4Q13 | 3Q13 | 4Q12 | 2013 | 2012 |
|--|------------|------------|------------|--------------|--------------|
| Deferred compensation expense (CHF million) | | | | | |
| Share awards | 174 | 183 | 186 | 814 | 786 |
| Performance share awards | 122 | 138 | 81 | 590 | 366 |
| Plus Bond awards ¹ | 11 | 10 | 0 | 37 | 0 |
| 2011 Partner Asset Facility awards ² | 57 | 50 | 60 | 77 | 677 |
| Adjustable Performance Plan share awards | 4 | 6 | 44 | 31 | 74 |
| Adjustable Performance Plan cash awards | (2) | 7 | 18 | 4 | 286 |
| Restricted Cash Awards | 28 | 26 | 37 | 145 | 165 |
| Scaled Incentive Share Units | 9 | 8 | 14 | 41 | 97 |
| Incentive Share Units ³ | (1) | 0 | 11 | (3) | 62 |
| 2008 Partner Asset Facility awards ⁴ | 13 | 27 | 48 | 93 | 173 |
| Other cash awards | 100 | 97 | 103 | 434 | 362 |
| Discontinued operations | (4) | (11) | (5) | (21) | (23) |
| Total deferred compensation expense | 511 | 541 | 597 | 2,242 | 3,025 |

¹ Compensation expense primarily relates to mark-to-market changes of the underlying assets of the Plus Bonds and the amortization of the voluntary Plus Bonds elected in 1Q13 and expensed over a three-year vesting period.

² 2011 Partner Asset Facility awards were granted and expensed in 1Q12. For subsequent periods, compensation expense mainly includes the change in underlying fair value of the indexed assets during the period.

³ Includes clawbacks.

⁴ Compensation expense mainly includes the change in underlying fair value of the indexed assets during the period.

Estimated unrecognized deferred compensation expense

| end of | 4Q13 |
|--|--------------|
| Estimated unrecognized deferred compensation expense (CHF million) | |
| Share awards | 804 |

¹ Represents additional units earned in 1Q13 as the original Adjustable Performance Plan awards met performance criteria in accordance with the terms and conditions of the awards.

Note 23 Pension and other post-retirement benefits

The Group previously disclosed that it expected to contribute CHF 471 million to the Swiss and international defined benefit plans and other post-retirement defined benefit plans in 2013. As

of the end of 4Q13, CHF 486 million of contributions had been made.

Components of total pension costs

| in | 4Q13 | 3Q13 | 4Q12 | 2013 | 2012 |

Note 24 Derivatives and hedging activities

► Refer to "Note 30 – Derivatives and hedging activities" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information.

Fair value of derivative instruments

The tables below present gross derivative replacement values by type of contract and balance sheet location and whether the derivative is used for trading purposes or in a qualifying hedging

relationship. Notional amounts have also been provided as an indication of the volume of derivative activity within the Group.

Information on bifurcated embedded derivatives has not been included in these tables. Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value.

► Refer to "Note 27 – Financial instruments" for further information.

Fair value of derivative instruments

| Total | 0 | 2 | (2) | 2 | 75 |

Represents gains/(losses) on effective portion.

¹ Included in other revenues.

The Group includes all derivative instruments not included in hedge accounting relationships in its trading activities.

► Refer to "Note 8 – Trading revenues" for gains and losses on trading activities by product type.

Disclosures relating to contingent credit risk

Certain of the Group's derivative instruments contain provisions that require it to maintain a specified credit rating from each of the major credit rating agencies. If the ratings fall below the level specified in the contract, the counterparties to the agreements could request payment of additional collateral on those derivative instruments that are in a net liability position. Certain of the derivative contracts also provide for termination of the contract, generally upon a downgrade of either the Group or the counterparty, at the existing mark-to-market replacement value of the derivative contract.

The following table provides the Group's current net exposure from contingent credit risk relating to derivative contracts with bilateral counterparties and SPEs that include credit support agreements, the related collateral posted and the additional collateral required in a one-notch and a two-notch downgrade event, respectively. The table also includes derivative contracts with contingent credit risk features without credit support agreements that have accelerated termination event conditions. The current net exposure for derivative contracts with bilateral counterparties and contracts with accelerated termination event conditions is the aggregate fair value of derivative instruments that were in a net liability position. For SPEs, the current net exposure is the contractual amount that is used to determine the collateral payable in the event of a downgrade. The contractual amount could include both the NRV and a percentage of the notional value of the derivative.

Contingent credit risk

| end of | 4Q13 | | | | 4Q12 | | | |
|---|--------------------------|--------------------------|--------------------------|-------------|--------------------------|--------------------------|--------------------------|-------------|
| | Bilateral counterparties | Special purpose entities | Accelerated terminations | Total | Bilateral counterparties | Special purpose entities | Accelerated terminations | Total |

| Additional collateral required in a one-notch downgrade event | 0.6 | 0.8 | 0.0 | 1.4 | 0.2 | 0.5 | 0.0 | 0.7 |
| Additional collateral required in a two-notch downgrade event | 2.3 | 1.1 | 0.0 | 3.4 | 2.7 ¹ | 1.5 | 0.5 | 4.7 |

¹ Additional collateral required in a two-notch downgrade event has been corrected.

Credit derivatives

► Refer to "Note 30 – Derivatives and hedging activities" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information on credit derivatives.

Credit protection sold/purchased

The following tables do not include all credit derivatives and differ from the credit derivatives in the "Fair value of derivative instruments" tables. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative as a derivative instrument (a) in which one or more of its underlyings are related to the credit risk of a specified entity (or a group of entities) or an index based on the credit risk of a group of entities and (b) that exposes the seller to potential loss from credit risk-related events specified in the contract.

Certain cash collateralized debt obligations (CDOs) and other derivative instruments were excluded as they do not fall within the scope of US GAAP rules. TRS of CHF 7.4 billion and CHF 6.0 billion as of the end of 4Q13 and 4Q12, respectively, were also excluded because a TRS does not expose the seller to potential loss from credit risk-related events specified in the contract. A TRS only provides protection against a loss in asset value and not against additional amounts as a result of specific credit events.

Credit protection sold

Credit protection sold is the maximum potential payout, which is based on the notional value of derivatives and represents the amount of future payments that the Group would be required to make as a result of credit risk-related events.

Credit protection purchased

Credit protection purchased represents those instruments where the underlying reference instrument is identical to the reference instrument of the credit protection sold.

Other protection purchased

In the normal course of business, the Group purchases protection to offset the risk of credit protection sold that may have similar, but not identical, reference instruments and may use similar, but not identical, products, which reduces the total credit derivative exposure. Other protection purchased is based on the notional value of the instruments.

Fair value of credit protection sold

The fair values of the credit protection sold give an indication of the amount of payment risk, as the negative fair values increase when the potential payment under the derivative contracts becomes more probable.

Credit protection sold/purchased

¹ Represents credit protection purchased with identical underlyings and recoveries.

² Based on internal ratings of BBB and above.

³ Credit protection instruments have been corrected to reclassify certain single-name instruments to multi-name instruments.

⁴ Includes the Clock Finance transaction.

The following table reconciles the notional amount of credit derivatives included in the table "Fair value of derivative instruments" to the table "Credit protection sold/purchased".

Credit derivatives

| end of | 4Q13 | 4Q12 |
|---|----------------|----------------|
| Credit derivatives (CHF billion) | | |
| Credit protection sold | 698.7 | 815.0 |
| Credit protection purchased | 663.9 | 766.4 |
| Other protection purchased | 109.0 | 97.7 |
| Other instruments ¹ | 11.7 | 15.3 |
| Total credit derivatives | 1,483.3 | 1,694.4 |

¹ Consists of certain cash collateralized debt obligations, total return swaps and other derivative instruments.

The segregation of the future payments by maturity range and underlying risk gives an indication of the current status of the potential for performance under the derivative contracts.

Maturity of credit protection sold

| end of | Maturity less than 1 year | Maturity between 1 to 5 years | Maturity greater than 5 years | Total |
|---------------------------|---------------------------|-------------------------------|-------------------------------|--------------|
| 4Q13 (CHF billion) | | | | |
| Single-name instruments | 91.2 | 281.4 | 42.0 | 414.6 |
| Multi-name instruments | 19.2 | 208.2 | 56.7 | 284.1 |
| Total instruments | 110.4 | 489.6 | 98.7 | 698.7 |
| 4Q12 (CHF billion) | | | | |

| Multi-name instruments | 42.7 | 171.0 | 71.3 | 285.0 |
| Total instruments | 167.7 | 497.0 | 150.3 | 815.0 |

Note 25 Guarantees and commitments

Guarantees

In the ordinary course of business, guarantees are provided that contingently obligate Credit Suisse to make payments to third parties if the counterparty fails to fulfill its obligation under a borrowing or other contractual arrangement. The total gross amount disclosed within the Guarantees table reflects the maximum potential payment under the guarantees. The carrying value represents the

Group's current best estimate of payments that will be required under existing guarantee arrangements.

Guarantees provided by the Group are classified as follows: credit guarantees and similar instruments, performance guarantees and similar instruments, securities lending indemnifications, derivatives and other guarantees.

► Refer to "Guarantees" in V – Consolidated financial statements – Credit Suisse Group – Note 31 – Guarantees and commitments in the Credit Suisse Annual Report 2012 for a detailed description of guarantees.

Guarantees

| end of | Maturity less than 1 year | Maturity greater than 1 year | Total gross amount | Total net amount ¹ | Carrying value | Collateral received |
|--|---------------------------------|------------------------------------|--------------------------|-------------------------------------|-------------------|------------------------|
| 4Q13 (CHF million) | | | | | | |
| Credit guarantees and similar instruments | 2,826 | 2,090 | 4,916 | 4,768 | 34 | 2,333 |
| Performance guarantees and similar instruments | 4,428 | 2,937 | 7,365 | 6,444 | 87 | 3,312 |
| Securities lending indemnifications | 11,479 | 0 | 11,479 | 11,479 | 0 | 11,479 |
| Derivatives ² | 18,247 | 13,403 | 31,650 | 31,650 | 715 | – ³ |
| Other guarantees | 4,003 | 1,212 | 5,215 | 5,191 | 3 | 2,631 |
| Total guarantees | 40,983 | 19,642 | 60,625 | 59,532 | 839 | 19,755 |
| 4Q12 (CHF million) | | | | | | |
| Credit guarantees and similar instruments ⁴ | 10,104 | 2,483 | 12,587 | 12,200 | 53 | 1,920 |
| Performance guarantees and similar instruments | 5,160 | 4,371 | 9,531 | 8,793 | 139 | 3,336 |
| Securities lending indemnifications | 12,211 | 0 | 12,211 | 12,211 | 0 | 12,211 |
| Derivatives ² | 21,197 | 14,218 | 35,415 | 35,415 | 985 | – ³ |
| Other guarantees | 4,297 | 1,122 | 5,419 | 5,397 | 3 | 2,812 |
| Total guarantees | 52,969 | 22,194 | 75,163 | 74,016 | 1,180 | 20,279 |

¹ Total net amount is computed as the gross amount less any participations.

² Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Group had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments.

³ Collateral for derivatives accounted for as guarantees is not significant.

⁴ Prior period has been corrected.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guarantee an amount of up to CHF 6 billion. Upon occurrence of a payout event triggered by a specified restriction of business imposed by FINMA or by the compulsory liquidation of another deposit-taking bank, the Group's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA's estimate for the Group's banking subsidiaries in Switzerland, the Group's share in the deposit insurance guarantee program for the period July 1, 2013 to June 30, 2014 is CHF 0.6 billion. These deposit insurance guarantees were reflected in other guarantees.

PAF2 transaction

The Group's results are impacted by the risk of counterparty defaults and the potential for changes in counterparty credit spreads related to derivative trading activities of the Group. In 1Q12, the Group entered into the PAF2 transaction to hedge the counterparty credit risk of a referenced portfolio of derivatives and their credit spread volatility. The hedge covered approximately USD 12 billion notional amount of expected positive exposure from counterparties of the Group, and was addressed in three layers: (i) first loss (USD 0.5 billion), (ii) mezzanine (USD 0.8 billion) and (iii) senior (USD 11 billion). The first loss element was retained by the Group and actively managed through normal credit procedures. The mezzanine layer was hedged by transferring the risk of default and counterparty credit spread movements to eligible employees in the form of PAF2 awards, as part of their deferred compensation granted in the annual compensation process.

The model used to value the PAF2 awards is the standard Gaussian copula valuation model used for synthetic collateralized

debt obligation (CDO) trades with adjustments necessary to incorporate the specific nature of the PAF2 transaction. The key model inputs are notional value, correlation assumption, credit spreads, liquidity and recovery rates of the portfolio, the Group's own credit spread and the maturity of the trade. In the model, the credit spreads of the counterparties determine the respective probability of default. Such probability is used to compute the expected value of the cash flows contingent on survival and on default of the counterparties in the reference portfolio. The credit spreads are sourced using observable data from CDS on the specific reference entity. Where a specific reference entity curve does not exist for a reference name in the portfolio, a proxy curve is used. The expected value of the counterparty exposure on default determines the equivalent notional value for the given name. This is computed from the effective positive exposure which is the weighted average over time of the expected exposure used by the Group for counterparty risk management. As of the end of 4Q13, the carrying value of the PAF2 awards was CHF 652 million. The amount of the PAF2 awards compensation expense for 4Q13 was CHF 57 million and is included in the amount reflected in the "Deferred compensation expense" table in Note 22 – Employee deferred compensation, which includes deferred compensation expense for a smaller plan unrelated to the hedging aspects of this transaction.

The Group had purchased protection on the senior layer to hedge against the potential for future counterparty credit spread volatility. This was executed through a CDS, accounted for at fair value, with a third-party entity. The value of the senior layer was calculated using the same model as for the PAF2 awards. The Group also had a credit support facility with this entity that allowed the Group to provide credit support in connection with other assets that are commonly financed through the issuance of commercial paper (CP) and, in connection with the CDS, to provide immediately available funding to this entity in certain circumstances. Among others, such circumstances included: (i) a disruption of the CP market such that the entity could not issue or roll a CP to fund the CDS payment or repay a maturing CP; (ii) the interest payable on the CP exceeded certain thresholds and the Group instructed the entity to draw on the facility instead of issuing a CP; (iii) a CP was issued by the entity to fund a CDS payment and subsequently the short-term rating of the facility provider was downgraded; or (iv) to repay any outstanding CP at the maturity date of the facility. Any funded amount could be settled by the assignment of the rights and obligations of the CDS to the Group. The credit support facility was accounted for on an accrual basis.

In December 2012, the BCBS published updated regulatory guidance that made the PAF2 transaction as it was structured ineligible for counterparty credit spread hedging under the Basel III framework. As a result of this new guidance, the Group had the right to exercise a regulatory call to restructure or terminate the CDS and the credit support facility layer at par and terminate the mezzanine layer at fair value. In October 2013, the Group exercised the call to terminate the CDS and the credit support layer at par. As of the end of 4Q13, the mezzanine layer remained in place.

Representations and warranties on residential mortgage loans sold

In connection with Investment Banking's sale of US residential mortgage loans, the Group has provided certain representations and warranties relating to the loans sold. The Group has provided these representations and warranties relating to sales of loans to: the US government-sponsored enterprises Fannie Mae and Freddie Mac (GSEs); institutional investors, primarily banks; and non-agency, or private label, securitizations. The loans sold are primarily loans that the Group has purchased from other parties. The scope of representations and warranties, if any, depends on the transaction, but can include: ownership of the mortgage loans and legal capacity to sell the loans; loan-to-value ratios and other characteristics of the property, the borrower and the loan; validity of the liens securing the loans and absence of delinquent taxes or related liens; conformity to underwriting standards and completeness of documentation; and origination in compliance with law. If it is determined that representations and warranties were breached, the Group may be required to repurchase the related loans or indemnify the investors to make them whole for losses. Whether the Group will incur a loss in connection with repurchases and make whole payments depends on: the extent to which claims are made; the validity of such claims (including the likelihood and ability to enforce claims); whether the Group can successfully claim against parties that sold loans to the Group and made representations and warranties to the Group; the residential real estate market, including the number of defaults; and whether the obligations of the securitization vehicles were guaranteed or insured by third parties.

With respect to its outstanding repurchase claims, the Group is unable to estimate reasonably possible losses in excess of the amounts accrued because of the heterogeneity of its portfolio, the complexity of legal and factual determinations related to each claim, the limited amount of discovery and/or other factors.

The following tables present the total amount of residential mortgage loans sold during the period from January 1, 2004 to December 31, 2013 by counterparty type and the development of outstanding repurchase claims and provisions for outstanding repurchase claims in 4Q13, 3Q13 and 4Q12, including realized losses from the repurchase of residential mortgage loans sold.

Residential mortgage loans sold

January 1, 2004 to December 31, 2013 (USD billion)

| | |
|--|--------------------|
| Government-sponsored enterprises | 8.2 |
| Private investors ¹ | 23.5 |
| Non-agency securitizations | 133.8 ² |
| Total residential mortgage loans sold | 165.5 |

¹ Primarily banks.

² The outstanding balance of residential mortgage loans sold was USD 26.2 billion as of the end of 4Q13. The difference of the total balance of mortgage loans sold and the outstanding balance as of the end of 4Q13 is attributable to borrower payments of USD 88.9 billion and losses of USD 18.7 billion due to loan defaults.

¹ Settled at a repurchase price of USD 6 million and USD 15 million in 2013 and 2012, respectively.

² Settled at USD 48 million and USD 41 million in 2013 and 2012, respectively.

³ Refer to "Note 29 – Litigation" for repurchase claims that are in arbitration or litigation.

⁴ Transfers to arbitration and litigation disclosed in 2013 include portfolios of claims of approximately USD 0.3 billion for which formal legal proceedings had commenced in prior periods.

Provisions for outstanding repurchase claims

| | 4Q13 | 3Q13 | 4Q12 | 2013 | 2012 |
|--|-------------------------|------------------------|------------------------|-------------------------|------------------------|
| Provisions for outstanding repurchase claims (USD million) ¹ | | | | | |
| Balance at beginning of period | 88 | 98 | 53 | 55 | 59 |
| Increase/(decrease) in provisions, net | 61 | 10 | 25 | 145 | 52 |
| Realized losses ² | (3) ³ | (20) ⁴ | (23) ⁵ | (54) ⁴ | (56) ³ |
| Balance at end of period | 146 ⁴ | 88 ⁶ | 55 ⁶ | 146 ⁴ | 55 ⁶ |

¹ Excludes provisions for repurchase claims related to residential mortgage loans sold that are in arbitration or litigation. Refer to "Note 29 – Litigation" for further information.

² Includes indemnifications paid to resolve loan repurchase claims.

³ Primarily related to government-sponsored enterprises and non-agency securitizations.

⁴ Primarily related to government-sponsored enterprises and private investors.

⁵ Primarily related to non-agency securitizations.

⁶ Primarily related to government-sponsored enterprises.

Representations and warranties relating to residential mortgage loans sold to non-agency securitization vehicles are more limited in scope than those relating to residential mortgage loans sold to GSEs, and it can be more difficult to establish causation and standing in making a repurchase claim for breach of representations and warranties on residential mortgage loans sold in non-agency securitizations. The Group is involved in litigation relating to representations and warranties on residential mortgage loans sold.

► Refer to "Note 29 – Litigation" for further information.

Repurchase claims on residential mortgage loans sold that are subject to arbitration or litigation proceedings, or become so during the reporting period, are not included in the Guarantees and commitments disclosure of repurchase claims and related loss contingencies and provisions but are addressed in litigation and related loss contingencies and provisions.

Repurchase claims relating to residential mortgage loans sold may increase in the future based on the large number of defaults in residential mortgages, including those sold or securitized by the Group.

Disposal-related contingencies and other indemnifications

The Group has certain guarantees for which its maximum contingent liability cannot be quantified. These guarantees include disposal-related contingencies in connection with the sale of assets or businesses, and other indemnifications. These guarantees are not reflected in the "Guarantees" table.

► Refer to "Disposal-related contingencies and other indemnifications" in V – Consolidated financial statements – Credit Suisse Group – Note 31 – Guarantees and commitments in the Credit Suisse Annual Report 2012 for a description of these guarantees.

Other commitments

Other commitments of the Group are classified as follows: irrevocable commitments under documentary credits, irrevocable loan commitments, forward reverse repurchase agreements and other commitments.

► Refer to "Other commitments" in V – Consolidated financial statements – Credit Suisse Group – Note 31 – Guarantees and commitments in the Credit Suisse Annual Report 2012 for a description of these commitments.

Other commitments

| end of | 4Q13 | | | | | | | | 4Q12 | |

¹ Total net amount is computed as the gross amount less any participations.

² Irrevocable loan commitments do not include a total gross amount of CHF 90,254 million and CHF 78,887 million of unused credit limits as of the end of 4Q13 and 4Q12, respectively, which were revocable at the Group's sole discretion upon notice to the client. The prior period has been adjusted to the current presentation.

Note 26 Transfers of financial assets and variable interest entities

In the normal course of business, the Group enters into transactions with, and makes use of, SPEs. An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it and is generally structured to isolate the SPE's assets from creditors of other entities, including the Group. The principal uses of SPEs are to assist the Group and its clients in securitizing financial assets and creating investment products. The Group also uses SPEs for other client-driven activity, such as to facilitate financings, and Group tax or regulatory purposes.

TRANSFERS OF FINANCIAL ASSETS

Securitizations

The majority of the Group's securitization activities involve mortgages and mortgage-related securities and are predominantly transacted using SPEs. In a typical securitization, the SPE purchases assets financed by proceeds received from the SPE's issuance of debt and equity instruments, certificates, CP and other notes of indebtedness. These assets and liabilities are recorded on the balance sheet of the SPE and not reflected on the Group's consolidated balance sheet, unless either the Group sold the assets to the entity and the accounting requirements for sale were not met or the Group consolidates the SPE.

The Group purchases commercial and residential mortgages for the purpose of securitization and sells these mortgage loans to SPEs. These SPEs issue commercial mortgage-backed securities (CMBS), RMBS and asset-backed securities (ABS) that are collateralized by the assets transferred to the SPE and that pay a return based on the returns on those assets. Investors in these mortgage-backed securities or ABS typically have recourse to the assets in the SPEs, unless a third-party guarantee has been received to further enhance the creditworthiness of the assets. The investors and the SPEs have no recourse to the Group's assets. The Group is typically an underwriter of, and makes a market in, these securities.

The Group also transacts in re-securitizations of previously issued RMBS securities. Typically, certificates issued out of an existing securitization vehicle are sold into a newly created and separate securitization vehicle. Often, these re-securitizations are initiated in order to repackage an existing security to give the investor a higher rated tranche.

The Group also uses SPEs for other asset-backed financings relating to client-driven activity and for Group tax or regulatory purposes. Types of structures included in this category include CDOs, leveraged finance, repack and other types of transactions, including life insurance structures, emerging market structures set up for financing, loan participation or loan origination purposes, and other alternative structures created for the purpose of investing in venture capital-like investments. CDOs are collateralized by the assets transferred to the CDO vehicle and pay a return based on the returns on those assets. Leveraged finance structures are used to assist in the syndication of certain loans held by the Group, while repack structures are designed to give a client collateralized exposure to specific cash flows or credit risk backed by collateral purchased from the Group. In these asset-backed financing structures investors typically only have recourse to the collateral of the SPE and do not have recourse to the Group's assets.

When the Group transfers assets into an SPE, it must assess whether that transfer is accounted for as a sale of the assets. Transfers of assets may not meet sale requirements if the assets have not been legally isolated from the Group and/or if the Group's continuing involvement is deemed to give it effective control over the assets. If the transfer is not deemed a sale, it is instead accounted for as a secured borrowing, with the transferred assets as collateral.

Gains and losses on securitization transactions depend, in part, on the carrying values of mortgages and CDOs involved in the transfer and are allocated between the assets sold and any beneficial interests retained according to the relative fair values at the date of sale.

The Group does not retain material servicing responsibilities from securitization activities.

The following table provides the gains or losses and proceeds from the transfer of assets relating to 2013 and 2012 securitizations of financial assets that qualify for sale accounting and subsequent derecognition, along with the cash flows between the Group and the SPEs used in any securitizations in which the Group still has continuing involvement, regardless of when the securitization occurred.

Securitizations

| Purchases of previously transferred financial assets or its underlying collateral | (10) | (25) |
| Servicing fees | 4 | 3 |
| Cash received on interests that continue to be held | 486 | 554 |
| Other asset-backed financings | | |
| Net gain ¹ | 15 | 83 |
| Proceeds from transfer of assets | 915 | 591 |
| Purchases of previously transferred financial assets or its underlying collateral ² | (213) | (621) |
| Cash received on interests that continue to be held | 633 | 1,350 |

¹ Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the SPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization. The gains or losses on the sale of the collateral is the difference between the fair value on the day prior to the securitization pricing date and the sale price of the loans.

² Represents market making activity and voluntary repurchases at fair value where no repurchase obligations were present.

Continuing involvement in transferred financial assets

The Group may have continuing involvement in the financial assets that are transferred to an SPE which may take several forms, including, but not limited to, servicing, recourse and guarantee arrangements, agreements to purchase or redeem transferred assets, derivative instruments, pledges of collateral and beneficial interests in the transferred assets.

► Refer to "Transfer of financial assets" in V – Consolidated financial statements – Credit Suisse Group – Note 32 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2012 for a detailed description of continuing involvement in transferred financial assets.

The following table provides the outstanding principal balance of assets to which the Group continued to be exposed after the transfer of the financial assets to any SPE and the total assets of the SPE as of the end of 4Q13 and 4Q12, regardless of when the transfer of assets occurred.

Principal amounts outstanding and total assets of SPEs resulting from continuing involvement

| end of | 4Q13 | 4Q12 |
|--------------------------------------|--------|--------|
| CHF million | | |
| CMBS | | |
| Principal amount outstanding | 37,308 | 30,050 |
| Total assets of SPE | 48,715 | 45,407 |
| RMBS | | |
| Principal amount outstanding | 45,571 | 58,112 |
| Total assets of SPE | 48,741 | 60,469 |
| Other asset-backed financings | | |
| Principal amount outstanding | 27,854 | 32,805 |
| Total assets of SPE | 27,854 | 32,805 |

Principal amount outstanding relates to assets transferred from the Group and does not include principal amounts for assets transferred from third parties.

Fair value of beneficial interests

The fair value measurement of the beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any continuing involvement does not include any benefits from financial instruments that the Group may utilize to hedge the inherent risks.

Key economic assumptions at the time of transfer

► Refer to "Note 27 – Financial instruments" for information on fair value hierarchy levels.

Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

| | 4Q13 | | 4Q12 | |
|---|----------------|----------|----------------|----------|
| at time of transfer | CMBS | RMBS | CMBS | RMBS |
| CHF million, except where indicated | | | | |
| Fair value of beneficial interests | 633 | 2,993 | 761 | 2,219 |
| of which level 2 | 476 | 2,879 | 654 | 2,090 |
| of which level 3 | 156 | 114 | 107 | 129 |
| Weighted-average life, in years | 7.3 | 7.7 | 8.4 | 5.0 |
| Prepayment speed assumption (rate per annum), in % ¹ | – ² | 2.0–31.0 | – ² | 0.1–34.9 |
| Cash flow discount rate (rate per annum), in % ³ | 1.6–11.6 | 0.0–45.9 | 0.8–10.7 | 0.1–25.7 |
| Expected credit losses (rate per annum), in % | 0.0–7.5 | 0.0–45.8 | 0.5–9.0 | 0.0–25.1 |

Transfers of assets in which the Group does not have beneficial interests are not included in this table.

¹ Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

² To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

³ The rate was based on the weighted-average yield on the beneficial interests.

Key economic assumptions as of the reporting date

The following table provides the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of the end of 4Q13 and 4Q12.

Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

| | 4Q13 | | | 4Q12 | | |
|---|-------------------|----------|--|-------------------|----------|--|
| | CMBS ¹ | RMBS | Other asset-backed financing activities ² | CMBS ¹ | RMBS | Other asset-backed financing activities ² |
| CHF million, except where indicated | | | | | | |
| Fair value of beneficial interests | 1,132 | 2,354 | 284 | 274 | 1,929 | 692 |
| of which non-investment grade | 26 | 359 | 204 | 90 | 342 | 686 |
| Weighted-average life, in years | 6.5 | 8.6 | 3.7 | 4.0 | 5.2 | 3.6 |
| Prepayment speed assumption (rate per annum), in % ³ | – | 1.0–23.5 | – | – | 0.1–27.6 | – |
| Impact on fair value from 10% adverse change | – | (26.6) | – | – | (38.5) | – |
| Impact on fair value from 20% adverse change | – | (48.6) | – | – | (74.3) | – |
| Cash flow discount rate (rate per annum), in % ⁴ | 1.1–37.1 | 1.7–22.4 | 1.0–23.1 | 1.1–50.2 | 0.2–42.8 | 0.7–51.7 |
| Impact on fair value from 10% adverse change | (25.5) | (65.0) | (2.4) | (14.8) | (62.8) | (1.0) |
| Impact on fair value from 20% adverse change | (50.0) | (124.9) | (4.9) | (19.9) | (93.5) | (1.8) |
| Expected credit losses (rate per annum), in % | 0.2–36.6 | 0.1–17.3 | 0.7–21.0 | 0.9–49.5 | 0.9–42.8 | 0.3–51.4 |
| Impact on fair value from 10% adverse change | (10.9) | (42.2) | (0.4) | (14.4) | (55.9) | (0.8) |
| Impact on fair value from 20% adverse change | (21.5) | (79.6) | (0.7) | (19.2) | (80.3) | (1.6) |

¹ To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances.

² CDOs within this category are generally structured to be protected from prepayment risk.

³ Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR.

⁴ The rate was based on the weighted-average yield on the beneficial interests.

These sensitivities are hypothetical and do not reflect economic hedging activities. Changes in fair value based on a 10% or 20% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the beneficial interests is calculated without changing any other assumption. In practice, changes in one assumption may result in changes in other assumptions (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

Secured borrowings

The following table provides the carrying amounts of transferred financial assets and the related liabilities where sale treatment was not achieved as of the end of 4Q13 and 4Q12.

► Refer to "Note 28 – Assets pledged and collateral" for further information.

Carrying amounts of transferred financial assets and liabilities where sale treatment was not achieved

| Trading assets | 216 | 1,171 |
| Other assets | 157 | 913 |
| Liability to SPE, included in Other liabilities | (373) | (2,084) |

VARIABLE INTEREST ENTITIES

As a normal part of its business, the Group engages in various transactions that include entities that are considered VIEs and are grouped into three primary categories: CDOs, CP conduits and financial intermediation.

► Refer to "Variable interest entities" in V – Consolidated financial statements – Credit Suisse Group – Note 32 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2012 for a detailed description of VIEs, CDOs, CP conduit or financial intermediation.

Collateralized debt obligations

The Group engages in CDO transactions to meet client and investor needs, earn fees and sell financial assets. The Group may act as underwriter, placement agent or asset manager and may warehouse assets prior to the closing of a transaction.

Commercial paper conduit

The Group continues to act as the administrator and provider of liquidity and credit enhancement facilities for one asset-backed CP conduit, Alpine, a client-focused multi-seller conduit vehicle. Alpine publishes portfolio and asset data and submits its portfolio to a rating agency for public ratings based on the cash flows of the portfolio taken as a whole. This CP conduit purchases assets, primarily loans and receivables, from clients and finances such purchases through the issuance of CP backed by these assets. For an asset to qualify for acquisition by the CP conduit, it must be rated at least investment grade after giving effect to the related asset-specific credit enhancement primarily provided by the client seller of the asset. The clients provide credit support to investors of the CP conduit in the form of over-collateralization and other asset-specific enhancements. Further, an unaffiliated investor retains a limited first-loss position in Alpine's entire portfolio. Alpine is a separate legal entity that is wholly owned by the Group. However, its assets are available to satisfy only the claims of its creditors. In addition, the Group, as administrator and liquidity and credit enhancement facilities provider, has significant exposure to and power over the activities of Alpine. Alpine is considered a VIE for accounting purposes and the Group is deemed the primary beneficiary and consolidates this entity.

The overall average maturity of the conduit's outstanding CP was approximately 19 days and 27 days as of 4Q13 and 4Q12, respectively. As of 4Q13 and 4Q12, Alpine had the highest short-term ratings from Moody's and Dominion Bond Rating Service and was rated A-1 by Standard & Poor's and F-1 by Fitch. The majority of Alpine's purchased assets were highly rated loans or receivables in the consumer sector, including residential mortgages and advance financing receivables, and auto and equipment loans or leases. As of 4Q13 and 4Q12, those assets had an average rating of AA, based on the lowest of each asset's external or internal rating, and an average maturity of 2.1 years and 2.9 years as of 4Q13 and 4Q12, respectively.

Financial intermediation

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients.

Financial intermediation consists of securitizations, funds, loans and other vehicles.

Consolidated VIEs

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The Group consolidates all VIEs related to financial intermediation for which it was the primary beneficiary.

The consolidated VIEs tables provide the carrying amounts and classifications of the assets and liabilities of consolidated VIEs as of the end of 4Q13 and 4Q12.

Consolidated VIEs in which the Group was the primary beneficiary

| end of | CDO | CP Conduit | Financial intermediation | | | | Total |

Non-consolidated VIEs

The non-consolidated VIEs tables provide the carrying amounts and classification of the assets and liabilities of variable interests recorded in the Group's consolidated balance sheets, maximum exposure to loss and total assets of the non-consolidated VIEs.

Certain VIEs have not been included in the following table, including VIEs structured by third parties in which the Group's interest is in the form of securities held in the Group's inventory,

certain single-asset financing vehicles not sponsored by the Group to which the Group provides financing but has very little risk of loss due to over-collateralization and guarantees, failed sales where the Group does not have any other holdings and other entities out of scope.

► Refer to "Variable interest entities" in V – Consolidated financial statements – Credit Suisse Group – Note 32 – Transfer of financial assets and variable interest entities in the Credit Suisse Annual Report 2012 for further information on non-consolidated VIEs.

Non-consolidated VIEs

Note 27 Financial instruments

The disclosure of the Group's financial instruments below includes the following sections:

- Concentration of credit risk;
- Fair value measurement (including fair value hierarchy, transfers between levels; level 3 reconciliation; qualitative and quantitative disclosures of valuation techniques and nonrecurring fair value changes)
- Fair value option; and
- Disclosures about fair value of financial instruments not carried at fair value.

CONCENTRATIONS OF CREDIT RISK

Credit risk concentrations arise when a number of counterparties are engaged in similar business activities, are located in the same geographic region or when there are similar economic features that would cause their ability to meet contractual obligations to be similarly impacted by changes in economic conditions.

► Refer to "Note 33 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information on the Group's concentrations of credit risk.

FAIR VALUE MEASUREMENT

A significant portion of the Group's financial instruments are carried at fair value. Deterioration of financial markets could significantly impact the fair value of these financial instruments and the results of operations.

The fair value of the majority of the Group's financial instruments is based on quoted prices in active markets or observable inputs. These instruments include government and agency securities, certain CP, most investment grade corporate debt, certain high yield debt securities, exchange-traded and certain OTC derivative instruments and most listed equity securities.

In addition, the Group holds financial instruments for which no prices are available and which have little or no observable inputs. For these instruments, the determination of fair value requires subjective assessment and judgment, depending on liquidity, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. In such circumstances, valuation is determined based on management's own judgments about the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. These instruments include certain OTC derivatives, including equity and credit derivatives, certain corporate equity-linked securities, mortgage-related and CDO securities, private equity investments, certain loans and credit products, including leveraged finance, certain syndicated loans and certain high yield bonds, and life finance instruments.

The fair value of financial assets and liabilities is impacted by factors such as benchmark interest rates, prices of financial instruments issued by third parties, commodity prices, foreign exchange rates and index prices or rates. In addition, valuation adjustments are an integral part of the valuation process when market prices are not indicative of the credit quality of a counterparty, and are applied to both OTC derivatives and debt instruments. The impact of changes in a counterparty's credit spreads (known as CVA) is considered when measuring the fair value of assets and the impact of changes in the Group's own credit spreads (known as DVA) is considered when measuring the fair value of its liabilities. For OTC derivatives, the impact of changes in both the Group's and the counterparty's credit standing is considered when measuring their fair value, based on current CDS prices. The adjustments also take into account contractual factors designed to reduce the Group's credit exposure to a counterparty, such as collateral held and master netting agreements. For hybrid debt instruments with embedded derivative features, the impact of changes in the Group's credit standing is considered when measuring their fair value, based on current funded debt spreads.

ASU 2011-04 permits a reporting entity to measure the fair value of a group of financial assets and financial liabilities on the basis of the price that would be received to sell a net long position or paid to transfer a net short position for a particular risk exposure in an orderly transaction between market participants at the measurement date. This change to the fair value measurement guidance is consistent with industry practice. As such, the Group continues to apply bid and offer adjustments to net portfolios of cash securities and/or derivative instruments to adjust the value of the net position from a mid-market price to the appropriate bid or offer level that would be realized under normal market conditions for the net long or net short position for a specific market risk. In addition, the Group reflects the net exposure to credit risk for its derivative instruments where the Group has legally enforceable agreements with its counterparties that mitigate credit risk exposure in the event of default. Valuation adjustments are recorded in a reasonable and consistent manner that results in an allocation to the relevant disclosures in the notes to the financial statements as if the valuation adjustment had been allocated to the individual unit of account.

Fair value hierarchy

The levels of the fair value hierarchy are defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group has the ability to access. This level of the fair value hierarchy provides the most reliable evidence of fair value and is used to measure fair value whenever available.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly. These inputs include: (i) quoted prices for similar assets or liabilities in active markets; (ii) quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current or price quotations vary substantially either over time or among market makers, or in which little information is publicly available; (iii) inputs other than quoted prices that are observable for the asset or liability; or (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3: Inputs that are unobservable for the asset or liability. These inputs reflect the Group's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available in the circumstances, which include the Group's own data. The Group's own data used to develop unobservable inputs is adjusted if information indicates that market participants would use different assumptions.

¹ Derivative contracts are reported on a gross basis by level. The impact of netting represents legally enforceable master netting agreements.

Transfers between level 1 and level 2

All transfers between level 1 and level 2 are reported through the last day of the reporting period.

In 2013, transfers to level 1 out of level 2 were from trading assets and trading liabilities. The transfers were primarily in exchange traded derivatives as they moved closer to maturity and pricing inputs became more observable. Transfers out of level 1 to level 2 were primarily from trading assets. The transfers were primarily in equity as suitable closing prices were unobtainable as of the end of 2013.

Gains and losses on assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (level 3)

| in | 2013 | | | 2012 | | |
|--|------------------|----------------|--------------------------|------------------|----------------|--------------------------|
| | Trading revenues | Other revenues | Total revenues | Trading revenues | Other revenues | Total revenues |
| Gains and losses on assets and liabilities (CHF million) | | | | | | |
| Net realized/unrealized gains/(losses) included in net revenues | (746) | 536 | (210)¹ | (1,018) | 268 | (750)¹ |
| Whereof: | | | | | | |
| Unrealized gains/(losses) relating to assets and liabilities still held as of the reporting date | (2,850) | 414 | (2,436) | (1,209) | (82) | (1,291) |

¹ Excludes net realized/unrealized gains/(losses) attributable to foreign currency translation impact.

Both observable and unobservable inputs may be used to determine the fair value of positions that have been classified within level 3. As a result, the unrealized gains and losses for assets and liabilities within level 3 presented in the table above may include changes in fair value that were attributable to both observable and unobservable inputs.

The Group employs various economic hedging techniques in order to manage risks, including risks in level 3 positions. Such techniques may include the purchase or sale of financial instruments that are classified in levels 1 and/or 2. The realized and unrealized gains and losses for assets and liabilities in level 3 presented in the table above do not reflect the related realized or unrealized gains and losses arising on economic hedging instruments classified in levels 1 and/or 2.

Transfers in and out of level 3

Transfers into level 3 assets during 2013 were CHF 7,429 million, primarily from loans held-for-sale and trading assets. The transfers were primarily in the corporate credit, private equity and prime services businesses due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 2013 were CHF 9,761 million, primarily in trading assets, loans held-for-sale and loans. The transfers out of level 3 assets were primarily in the Brazil trading, private equity, corporate credit, prime services, rates and equity derivatives businesses due to improved observability of pricing data and increased availability of pricing information from external providers.

Transfers into level 3 assets during 4Q13 were CHF 1,646 million, primarily from trading assets and loans held-for-sale. The transfers were primarily in the corporate credit business due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 4Q13 were CHF 1,750 million, primarily in trading assets and loans held-for-sale. The transfers out of level 3 assets were primarily in the private equity and equity derivatives businesses due to improved observability of pricing data and increased availability of pricing information from external providers.

Qualitative disclosures of valuation techniques

Overview

The Group has implemented and maintains a valuation control framework, which is supported by policies and procedures that define the principles for controlling the valuation of the Group's financial instruments. Product Control and Risk Management create, review and approve significant valuation policies and procedures. The framework includes three main internal processes: (i) valuation governance; (ii) independent price verification and significant unobservable inputs review; and (iii) a cross-functional pricing model review. Through this framework, the Group determines the reasonableness of the fair value of its financial instruments.

On a monthly basis, meetings are held for each business line with senior representatives of the Front Office and Product Control to discuss independent price verification results, valuation adjustments, and other significant valuation issues. On a quarterly basis, a review of significant changes in the fair value of financial instruments is undertaken by Product Control and conclusions are reached regarding the reasonableness of those changes. Additionally, on a quarterly basis, meetings are held for each business line with senior representatives of the Front Office, Product Control, Risk Management, and Financial Accounting to discuss independent price verification results, valuation issues, business and market updates, as well as a review of significant changes in fair value from the prior quarter, significant unobservable inputs and prices used in valuation techniques, and valuation adjustments.

The results of these meetings are aggregated for presentation to the Valuation and Risk Management Committee (VARMC) and the Audit Committee. The VARMC, which is comprised of Executive Board members and the heads of the business and control functions, meets to review and ratify valuation review conclusions, and to resolve significant valuation issues for the Group. Oversight of the valuation control framework is through specific and regular reporting on valuation directly to the Group's Executive Board through the VARMC.

One of the key components of the governance process is the segregation of duties between the Front Office and Product Control. The Front Office is responsible for measuring inventory at fair value on a daily basis, while Product Control is responsible for independently reviewing and validating those valuations on a periodic basis. The Front Office values the inventory using, wherever

possible, observable market data which may include executed transactions, dealer quotes, or broker quotes for the same or similar instruments. Product Control validates this inventory using independently sourced data that also includes executed transactions, dealer quotes, and broker quotes.

Product Control utilizes independent pricing service data as part of their review process. Independent pricing service data is analyzed to ensure that it is representative of fair value including confirming that the data corresponds to executed transactions or executable broker quotes, review and assessment of contributors to ensure they are active market participants, review of statistical data and utilization of pricing challenges. The analysis also includes understanding the sources of the pricing service data and any models or assumptions used in determining the results. The purpose of the review is to judge the quality and reliability of the data for fair value measurement purposes and its appropriate level of usage within the Product Control independent valuation review.

For certain financial instruments the fair value is estimated in full or in part using valuation techniques based on assumptions that are not supported by market observable prices, rates, or other inputs. In addition, there may be uncertainty about a valuation, which results from the choice of valuation technique or model used, the assumptions embedded in those models, the extent to which inputs are not market observable, or as a consequence of other elements affecting the valuation technique or model. Model calibration is performed when significant new market information becomes available or at a minimum on a quarterly basis as part of the business review of significant unobservable inputs for level 3 instruments. For models that have been deemed to be significant to the overall fair value of the financial instrument, model validation is performed as part of the periodic review of the related model.

The Group performs a sensitivity analysis of its significant level 3 financial instruments. This sensitivity analysis estimates a fair value range by changing the related significant unobservable inputs value. This sensitivity analysis is an internal mechanism to monitor the impact of reasonable alternative inputs or prices for level 3 financial instruments. Where a model-based technique is used to determine the fair value of the level 3 financial instrument, an alternative input value is utilized to derive an estimated fair value range. Where a price-based technique is used to determine the fair value of the level 3 financial instruments, Front Office professional judgment is used to estimate a fair value range.

The following information on the valuation techniques and significant unobservable inputs of the various financial instruments, and the sensitivity of fair value measurements to changes in significant unobservable inputs, should be read in conjunction with the tables “Quantitative information about level 3 assets at fair value” and “Quantitative information about level 3 liabilities at fair value”.

Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions

Securities purchased under resale agreements and securities sold under repurchase agreements are measured at fair value

using discounted cash flow analysis. Future cash flows are discounted using observable market interest rate repurchase/resale curves for the applicable maturity and underlying collateral of the instruments. As such, the significant majority of both securities purchased under resale agreements and securities sold under repurchase agreements are included in level 2 of the fair value hierarchy. Structured resale and repurchase agreements include embedded derivatives, which are measured using the same techniques as described below for stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships. If the value of the embedded derivative is determined using significant unobservable inputs, those structured resale and repurchase agreements are classified within level 3 of the fair value hierarchy. Significant unobservable input is funding spread.

Securities purchased under resale agreements are usually fully collateralized or over collateralized by government securities, money market instruments, corporate bonds, or other debt instruments. In the event of counterparty default, the collateral service agreement provides the Group with the right to liquidate the collateral held.

Debt securities

Foreign governments and corporates

Government debt securities typically have quoted prices in active markets and are categorized as level 1 instruments. For debt securities for which market prices are not available, valuations are based on yields reflecting credit rating, historical performance, delinquencies, loss severity, the maturity of the security, recent transactions in the market or other modeling techniques, which may involve judgment. Those securities where the price or model inputs are observable in the market are categorized as level 2 instruments, while those securities where prices are not observable and significant model inputs are unobservable are categorized as level 3 of the fair value hierarchy.

Corporate bonds are priced to reflect current market levels either through recent market transactions or broker or dealer quotes. Where a market price for the particular security is not directly available, valuations are obtained based on yields reflected by other instruments in the specific or similar entity's capital structure and adjusting for differences in seniority and maturity, benchmarking to a comparable security where market data is available (taking into consideration differences in credit, liquidity and maturity), or through the application of cash flow modeling techniques utilizing observable inputs, such as current interest rate curves and observable CDS spreads. Significant unobservable inputs may include price, buyback probability, correlation and credit spread. For securities using market comparable price, the differentiation between level 2 and level 3 is based upon the relative significance of any yield adjustments as well as the accuracy of the comparison characteristics (i.e., the observable comparable security may be in the same country but a different industry and may have a different seniority level – the lower the comparability the more likely the security will be level 3).

CMBS, RMBS and CDO securities

Fair values of RMBS, CMBS and CDO may be available through quoted prices, which are often based on the prices at which similarly structured and collateralized securities trade between dealers and to and from customers. Fair values of RMBS, CMBS and CDO for which there are significant unobservable inputs are valued using capitalization rate. Price may not be observable for fair value measurement purposes for many reasons, such as the length of time since the last executed transaction for the related security, use of a price from a similar instrument, or use of a price from an indicative quote. Fair values determined by market comparable price may include discounted cash flow models using the inputs prepayment rates, default rates, loss severity and discount rates. Prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness.

For most structured debt securities, determination of fair value requires subjective assessment depending on liquidity, ownership concentration, and the current economic and competitive environment. Valuation is determined based on the Front Office's own assumptions about how market participants would price the asset. Collateralized bond and loan obligations are split into various structured tranches and each tranche is valued based upon its individual rating and the underlying collateral supporting the structure. Valuation models are used to value both cash and synthetic CDOs.

Equity securities

The majority of the Group's positions in equity securities are traded on public stock exchanges for which quoted prices are readily and regularly available and are therefore categorized as level 1 instrument. Level 2 and level 3 equities include fund-linked products, convertible bonds or equity securities with restrictions that are not traded in active markets. Significant unobservable inputs may include earnings before interest, taxes, depreciation and amortization (EBITDA) multiple, discount rate and capitalization rate.

Derivatives

Derivatives held for trading purposes or used in hedge accounting relationships include both OTC and exchange-traded derivatives. The fair values of exchange-traded derivatives measured using observable exchange prices are included in level 1 of the fair value hierarchy. For exchange-traded derivatives where the volume of trading is low, the observable exchange prices may not be considered executable at the reporting date. These derivatives are valued in the same manner as similar observable OTC derivatives and are included in level 2 of the fair value hierarchy. If the similar OTC derivative used for valuing the exchange-traded derivative is not observable, then the exchange-traded derivative is included in level 3 of the fair value hierarchy.

The fair values of OTC derivatives are determined on the basis of either industry standard models or internally developed proprietary models. Both model types use various observable and

unobservable inputs in order to determine fair value. The inputs include those characteristics of the derivative that have a bearing on the economics of the instrument. The determination of the fair value of many derivatives involves only a limited degree of subjectivity because the required inputs are observable in the marketplace, while more complex derivatives may use unobservable inputs that rely on specific proprietary modeling assumptions. Where observable inputs (prices from exchanges, dealers, brokers or market consensus data providers) are not available, attempts are made to infer values from observable prices through model calibration (spot and forward rates, mean reversion, benchmark interest rate curves and volatility inputs for commonly traded option products). For inputs that cannot be derived from other sources, estimates from historical data may be made. OTC derivatives where the majority of the value is derived from market observable inputs are categorized as level 2 instruments, while those where the majority of the value is derived from unobservable inputs are categorized as level 3 of the fair value hierarchy.

Our valuation of derivatives does not include an adjustment for the cost of funding uncollateralized OTC derivatives due to a lack of clear observability in the marketplace.

Interest rate derivatives

OTC vanilla interest rate products, such as interest rate swaps, swaptions, and caps and floors are valued by discounting the anticipated future cash flows. The future cash flows and discounting are derived from market standard yield curves and industry standard volatility inputs. Where applicable, exchange-traded prices are also used to value exchange-traded futures and options and can be used in yield curve construction. For more complex products, inputs include, but are not limited to correlation, volatility, volatility skew, prepayment rate, credit spread, basis spread and mean reversion.

Foreign exchange derivatives

Foreign exchange derivatives include vanilla products such as spot, forward and option contracts where the anticipated discounted future cash flows are determined from foreign exchange forward curves and industry standard optionality modeling techniques. Where applicable, exchange-traded prices are also used for futures and option prices. For more complex products inputs include, but are not limited to prepayment rate and correlation.

Equity and index-related derivatives

Equity derivatives include vanilla options and swaps in addition to different types of exotic options. Inputs for equity derivatives can include correlation, volatility, skew and buyback probability.

Generally, the interrelationship between the volatility and correlation is positively correlated.

Credit derivatives

Credit derivatives include index and single name CDS in addition to more complex structured credit products. Vanilla products are

valued using industry standard models and inputs that are generally market observable including credit spread and recovery rate.

Complex structured credit derivatives are valued using proprietary models requiring unobservable inputs such as recovery rate, credit spread, correlation and price. These inputs are generally implied from available market observable data. Fair values determined by price may include discounted cash flow models using the inputs prepayment rate, default rate, loss severity and discount rate.

Other trading assets

Other trading assets primarily include RMBS loans and life settlement and premium finance instruments. Life settlement and premium finance instruments are valued using proprietary models with several inputs. The significant unobservable inputs of the fair value for life settlement and premium finance instruments is the estimate of market implied life expectancy, while for RMBS loans it is market comparable price.

For life settlement and premium finance instruments, individual life expectancy rates are typically obtained by multiplying a base mortality curve for the general insured population provided by a professional actuarial organization together with an individual-specific multiplier. Individual specific multipliers are determined based on data from third-party life expectancy data providers, which examine the insured individual's medical conditions, family history and other factors to arrive at a life expectancy estimate.

For RMBS loans, the use of market comparable price varies depending upon each specific loan. For some loans, similar to unobservable RMBS securities, prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness. For other RMBS loans, the loans are categorized by specific characteristics, such as loan-to-value ratio, average account balance, loan type (single or multi-family), lien, seasoning, coupon, FICO score, locality, delinquency status, cash flow velocity, roll rates, loan purpose, occupancy, servicers advance agreement type, modification status, Federal Housing Administration insurance, property value and documentation quality. Loans with unobservable prices are put into consistent buckets which are then compared to market observable comparable prices in order to assess the reasonableness of those unobservable prices.

Other investments

Private equity, hedge funds and other equity investments

Other equity investments principally includes equity investments in the form of a) direct investments in third-party hedge funds, private equity funds and funds of funds, b) equity-method investments where the Group has the ability to significantly influence the operating and financial policies of the investee, and c) direct investments in non-marketable equity securities.

Direct investments in third-party hedge funds, private equity funds and funds of funds are measured at fair value based on their

published net asset values (NAVs). Most of these investments are classified as level 3 of the fair value hierarchy, as there are restrictions imposed upon the redemption of the funds at their NAV in the near term. In some cases, NAVs may be adjusted where there is sufficient evidence that the NAV published by the investment manager is not current with observed market movements, it is probable that these investments will be sold for an amount other than NAV or there exist other circumstances that would require an adjustment to the published NAV. Although rarely adjusted, significant judgment is involved in making any adjustments to the published NAVs.

Direct investments in non-marketable equity securities consist of both real estate investments and non-real estate investments. Equity-method investments and direct investments in non-marketable equity securities are initially measured at their transaction price, as this is the best estimate of fair value. Thereafter, these investments are individually measured at fair value based upon a number of factors that include any recent rounds of financing involving third-party investors, comparable company transactions, multiple analyses of cash flows or book values, or discounted cash flow analyses. Unobservable inputs may include credit spread, contingent probability and EBITDA multiple. The availability of information used in these modeling techniques is often limited and involves significant judgment in evaluating these different factors over time. As a result, these investments are included in level 3 of the fair value hierarchy.

Life finance instruments

Life finance instruments include Single Premium Immediate Annuities (SPIA) and other premium finance instruments. Life finance instruments are valued in a similar manner as described for life settlement and premium finance instruments under the other trading assets section above.

Loans

The Group's loan portfolio which is measured at fair value primarily consists of commercial and industrial loans and loans to financial institutions. Within these categories, loans measured at fair value include commercial loans, real estate loans, corporate loans, leverage finance loans and emerging market loans. Fair value is based on recent transactions and quoted prices, where available. Where recent transactions and quoted prices are not available, fair value may be determined by relative value benchmarking (which includes pricing based upon another position in the same capital structure, other comparable loan issues, generic industry credit spreads, implied credit spreads derived from CDS for the specific borrower, and enterprise valuations) or calculated based on the exit price of the collateral, based on current market conditions.

Both the funded and unfunded portion of revolving credit lines on the corporate lending portfolio are valued using a CDS pricing model, which requires estimates of significant inputs including credit spreads, recovery rates, credit conversion factors, and weighted average life of the loan. Significant unobservable inputs may include credit spread and price.

The Group's other assets and liabilities include mortgage loans held in conjunction with securitization activities and assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP. The fair value of mortgage loans held in conjunction with securitization activities is determined on a whole-loan basis and is consistent with the valuation of RMBS loans discussed in "Other trading assets" above. Whole-loan valuations are calculated based on the exit price reflecting the current market conditions. The fair value of assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP are determined based on the quoted prices for securitized bonds, where available, or on cash flow analyses for securitized bonds, when quoted prices are not available.

Accrual based Private Banking & Wealth Management loans, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, include consumer loans relating to mortgages, loans collateralized by securities or consumer finance, as well as corporate and institutional loans relating to real estate, commercial and industrial loans, and loans to financial institutions, governments and public institutions. Fair values for these loans are determined by using a discounted cash flow model. Future cash flows are discounted using risk-adjusted discount rates which are derived from observable market interest rates for the applicable maturity and currency and from counterparty-related credit spreads.

Deposits

Accrual based deposits with a stated maturity, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, are generally fair valued by using a discounted cash flow model incorporating the Group's credit spreads. The estimated fair value of accrual accounted deposits without a stated maturity approximates the carrying amount; however, the value does not include an estimate of the value attributed to the long-term relationships with its customers that in the aggregate adds significant value to the Group's stable deposit base.

Short-term borrowings and long-term debt

The Group's short-term borrowings and long-term debt include structured notes (hybrid financial instruments that are both bifurcable and non-bifurcable) and vanilla debt. The fair value of structured notes is based on quoted prices, where available. When quoted prices are not available, fair value is determined by using a discounted cash flow model incorporating the Group's credit spreads, the value of derivatives embedded in the debt and the residual term of the issuance based on call options. Derivatives structured into the issued debt are valued consistently with the Group's stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships as discussed above. The fair value of structured debt is heavily influenced by the combined

call options and performance of the underlying derivative returns. Significant unobservable inputs for long-term debt include buyback probability, gap risk, correlation, volatility and price.

Generally, the interrelationships between volatility, skew, correlation, gap risk and credit spreads inputs are positively correlated.

Other liabilities

Failed sales

These liabilities represent the financing of assets that did not achieve sale accounting treatment under US GAAP. Failed sales are valued in a manner consistent with the related underlying financial instruments.

Short-term financial instruments

Certain short-term financial instruments are not carried at fair value on the balance sheet, but a fair value has been disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below. These instruments include: cash and due from banks, cash collateral receivables and payables and other receivables and payables arising in the ordinary course of business. For these financial instruments, the carrying value approximates the fair value due to the relatively short period of time between their origination and expected realization, as well as the minimal credit risk inherent in these instruments.

Sensitivity of fair value measurements to changes in significant unobservable inputs

For level 3 assets with a significant unobservable input of buyback probability, EBITDA multiple, market implied life expectancy (for life finance instruments), correlation, recovery rate, price, volatility, volatility skew, contingent probability and market implied life expectancy (for life settlement and premium finance instruments), in general, an increase in the significant unobservable input would increase the fair value. For level 3 assets instruments with a significant unobservable input of capitalization rate, default rate, discount rate, funding spread, loss severity, prepayment rate and credit spread, in general, an increase in the significant unobservable input would decrease the fair value.

For level 3 liabilities an increase in the related significant unobservable inputs would have the inverse impact on fair value. An increase in the significant unobservable inputs basis spread, mean reversion and skew would decrease the fair value. An increase in the significant unobservable input gap risk would increase the fair value.

Interrelationships between significant unobservable inputs

Except as noted above, there are no material interrelationships between the significant unobservable inputs for the financial instruments. As the significant unobservable inputs move independently, generally an increase or decrease in one significant unobservable input will have no impact on the other significant unobservable inputs.

Quantitative disclosures of valuation techniques

The following tables provide the representative range of minimum and maximum values and the associated weighted averages of

each significant unobservable input for level 3 assets and liabilities by the related valuation technique most significant to the related financial instrument.

³ Risk of unexpected large declines in the underlying values occurring between collateral settlement dates.

Qualitative discussion of the ranges of significant unobservable inputs

The following sections provide further information about the ranges of significant unobservable inputs included in the tables above. The level of aggregation and diversity within the financial instruments disclosed in the tables above result in certain ranges of significant inputs being wide and unevenly distributed across asset and liability categories.

Discount rate

The discount rate is the rate of interest used to calculate the present value of the expected cash flows of a financial instrument. There are multiple factors that will impact the discount rate for any given financial instrument including the coupon on the instrument, the term and the underlying risk of the expected cash flows. Two instruments of similar term and expected cash flows may have significantly different discount rates because the coupons on the instruments are different.

Default rate and loss severity

For financial instruments backed by residential real estate or other assets, diversity in the portfolio is reflected in a wide range for loss severity due to varying levels of default. The lower end of the range represents high performing or government guaranteed collateral with a low probability of default or guaranteed timely payment of principal and interest while the higher end of the range relates collateral with a greater risk of default.

Credit spread and recovery rate

For financial instruments where credit spread is the significant unobservable input, the wide range represents positions with varying levels of risk. The lower end of the credit spread range typically represents shorter-dated instruments and/or those with better perceived credit risk. The higher end of the range typically comprises longer-dated financial instruments or those referencing non-performing, distressed or impaired reference credits. Similarly, the spread between the reference credit and an index can vary significantly based on the risk of the instrument. The spread will be positive for instruments that have a higher risk of default than the index (which is based on a weighted average of its components) and negative for instruments that have a lower risk of default than the index.

Similarly, recovery rates can vary significantly depending upon the specific assets and terms of each transaction. Transactions with higher seniority or more valuable collateral will have higher recovery rates while those transactions which are more subordinated or with less valuable collateral will have lower recovery rates.

Correlation

There are many different types of correlation inputs, including credit correlation, cross-asset correlation (such as equity-interest rate correlation), and same-asset correlation (such as interest rate-interest rate correlation). Correlation inputs are generally used to value hybrid and exotic instruments. Generally, same-asset correlation inputs have a narrower range than cross-asset correlation inputs. However, due to the complex and unique nature of these instruments, the ranges for correlation inputs can vary widely across portfolios.

Prepayment rate

Prepayment rates may vary from collateral pool to collateral pool, and are driven by a variety of collateral-specific factors, including the type and location of the underlying borrower, the remaining tenor of the obligation and the level and type (e.g., fixed or floating) of interest rate being paid by the borrower.

Volatility and skew

Volatility and skew are impacted by the underlying risk, term and strike price of the derivative. In the case of interest rate derivatives, volatility rates may vary significantly between different underlying currencies and expiration dates on the options. Similarly, equity derivatives' volatility may vary greatly depending upon the underlying reference name on the derivative.

Market implied life expectancy

Market implied life expectancy is the primary significant unobservable input on such products as life settlement, premium finance and SPIA and represents the estimated mortality rate for the underlying insured for each contract. This estimate may vary depending upon multiple factors including the age and specific health characteristics of each insured.

Fair value measurements of investments in certain entities that calculate NAV per share

Investments in funds held in trading assets and liabilities primarily include positions held in equity funds of funds as an economic hedge for structured notes and derivatives issued to clients that reference the same underlying risk and liquidity terms of the fund. A majority of these funds have limitations imposed on the amount of withdrawals from the fund during the redemption period due to illiquidity of the investments. In other instances, the withdrawal amounts may vary depending on the redemption notice period and are usually larger for the longer redemption notice periods. In addition, penalties may apply if redemption is within a certain time period from initial investment.

Investment in funds held in other investments principally involves private securities and, to a lesser extent, publicly traded securities and fund of funds. Several of these investments have redemption restrictions subject to the discretion of the Board of Directors of the fund and/or redemption is permitted without restriction, but is limited to a certain percentage of total assets or only after a certain date.

Furthermore, for those investments held in both trading assets and other investments that are nonredeemable, the underlying assets of such funds are expected to be liquidated over the life of the fund, which are generally up to ten years.

The following table pertains to investments in certain entities that calculate NAV per share or its equivalent, primarily private equity and hedge funds. These investments do not have a readily determinable fair value and are measured at fair value using NAV.

Fair value, unfunded commitments and term of redemption conditions

⁵ Includes CHF 1,819 million and CHF 1,958 million attributable to noncontrolling interests in 4Q13 and 4Q12, respectively.

⁶ Includes CHF 107 million and CHF 107 million attributable to noncontrolling interests in 4Q13 and 4Q12, respectively.

⁷ Includes CHF 405 million and CHF 418 million attributable to noncontrolling interests in 4Q13 and 4Q12, respectively.

Nonrecurring fair value changes

Certain assets and liabilities are measured at fair value on a non-recurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances, for example, when there is evidence of impairment. The Group typically uses nonfinancial assets measured at fair value on a recurring or nonrecurring basis in a manner that reflects their highest and best use.

Nonrecurring fair value changes

| end of | 4Q13 | 4Q12 |
|--|------------|------------|
| Assets held-for-sale recorded at fair value on a nonrecurring basis (CHF billion) | | |
| Assets held-for-sale recorded at fair value on a nonrecurring basis | 0.3 | 0.5 |
| of which level 3 | 0.3 | 0.5 |

FAIR VALUE OPTION

The Group has availed itself of the simplification in accounting offered under the fair value option, primarily in Investment Banking and Private Banking & Wealth Management's Asset Management business. This has been accomplished generally by electing the fair value option, both at initial adoption and for subsequent transactions, on items impacted by the hedge accounting requirements of US GAAP. That is, for instruments for which there was an inability to achieve hedge accounting and for which the Group is economically hedged, the Group has elected the fair value option. Similarly, where the Group manages an activity on a fair value basis but previously has been unable to achieve fair value accounting, the Group has utilized the fair value option to align its risk management reporting to its financial accounting.

► Refer to "Note 33 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012 for further information on the Group's election of the fair value option for certain of its financial statement captions.

Difference between the aggregate fair value and the aggregate unpaid principal balances on loans and financial instruments

¹ Primarily recognized in net interest income.

² Primarily recognized in trading revenues.

³ Primarily recognized in other revenues.

⁴ Changes in fair value related to credit risk are due to the change in the Group's own credit spreads. Other changes in fair value are attributable to changes in foreign currency exchange rates and interest rates, as well as movements in the reference price or index for structured notes. Changes in fair value on Credit Suisse vanilla debt and on debit valuation adjustments on structured notes related to credit risk were CHF (268) million and CHF (111) million in 2013, respectively, and CHF (1,663) million and CHF (931) million in 2012, respectively.

FINANCIAL INSTRUMENTS NOT CARRIED AT FAIR VALUE

The following table provides the carrying value and fair value of financial instruments which are not carried at fair value in the consolidated balance sheet. The disclosure excludes all non-financial instruments such as lease transactions, real estate, premises and equipment, equity method investments and pension and benefit obligations.

Note 28 Assets pledged and collateral

The Group pledges assets mainly for repurchase agreements and other securities financing. Certain pledged assets may be encumbered, meaning they have the right to be sold or repledged. The encumbered assets are disclosed on the consolidated balance sheet.

Assets pledged

| end of | 4Q13 | 4Q12 |
|--|---------|---------|
| Assets pledged (CHF million) | | |
| Total assets pledged or assigned as collateral | 142,952 | 151,419 |
| of which encumbered | 92,300 | 90,745 |

Collateral

The Group receives cash and securities in connection with resale agreements, securities borrowing and loans, derivative transactions and margined broker loans. A substantial portion of the collateral and securities received by the Group was sold or repledged in connection with repurchase agreements, securities sold not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

Collateral

| end of | 4Q13 | 4Q12 |
|--|---------|---------|
| Collateral (CHF million) | | |
| Fair value of collateral received with the right to sell or repledge | 359,517 | 402,793 |
| of which sold or repledged | 267,896 | 292,514 |

Note 29 Litigation

The Group is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses. The Group's material proceedings, related provisions and estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions are described in *Note 37 – Litigation in V – Consolidated financial statements – Credit Suisse Group in the Credit Suisse Annual Report 2012* and updated in subsequent quarterly reports (including below). Some of these proceedings have been brought on behalf of various classes of claimants and seek damages of material and/or indeterminate amounts.

The Group accrues litigation provisions (including estimated fees and expenses of external lawyers and other service providers) and takes a charge to income in connection with certain proceedings when losses, additional losses or ranges of loss are probable and reasonably estimable. The Group reviews its legal proceedings each quarter to determine the adequacy of its litigation provisions and may increase or release provisions based on management's judgment and the advice of counsel. The establishment of additional provisions or releases of litigation provisions may be necessary in the future as developments in such proceedings warrant.

It is inherently difficult to determine whether a loss is probable or even reasonably possible or to estimate the amount of any loss or loss range for many of the Group's legal proceedings. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but not limited to, the type and nature of the proceeding, the progress of the matter, the advice of counsel, the Group's defenses and its experience in similar matters, as well as its assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings. Factual and legal determinations, many of which are complex, must be made before a loss, additional losses or ranges of loss can be reasonably estimated for any proceeding.

Most matters pending against the Group seek damages of an indeterminate amount. While certain matters specify the damages claimed, such claimed amount may not represent the Group's reasonably possible losses. For certain of the proceedings, the Group has disclosed the amount of damages claimed and certain other quantifiable information that is publicly available.

The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings

because of their complexity, the novelty of some of the claims, the early stage of the proceedings, the limited amount of discovery that has occurred and/or other factors. The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for the proceedings discussed in Note 37 referenced above and updated in quarterly reports and below for which the Group believes an estimate is possible is zero to CHF 2.4 billion.

In 4Q13, the Group recorded net litigation provisions of CHF 1,469 million. After taking into account its litigation provisions, the Group believes, based on currently available information and advice of counsel, that the results of its legal proceedings, in the aggregate, will not have a material adverse effect on the Group's financial condition. However, in light of the inherent uncertainties of such proceedings, including those brought by regulators or other governmental authorities, the ultimate cost to the Group of resolving such proceedings may exceed current litigation provisions and any excess may be material to its operating results for any particular period, depending, in part, upon the operating results for such period.

Mortgage-related matters

The amounts disclosed below do not reflect actual realized plaintiff losses to date or anticipated future litigation exposure. Rather, unless otherwise stated, these amounts reflect the original unpaid principal balance amounts as alleged in these actions and do not include any reduction in principal amounts since issuance.

On December 18, 2013, the New Jersey Attorney General, on behalf of the State of New Jersey, filed a civil action in the Superior Court of New Jersey, Chancery Division, Mercer County, against Credit Suisse Securities (USA) LLC (CSS LLC) and affiliated entities in their roles as issuer, sponsor, depositor and/or underwriter of RMBS transactions prior to 2008. The action, which references 13 RMBS issued, sponsored, deposited and underwritten by CSS LLC and its affiliates in 2006 and 2007, alleges that CSS LLC and its affiliates misled investors and engaged in fraud or deceit in connection with the offer and sale of RMBS, seeks an unspecified amount of damages, and is at an early procedural point.

Class actions

On January 27, 2014, the US District Court for the Southern District of New York entered a final judgment and order of dismissal with prejudice, discontinuing the *Tsereteli v. Residential Asset Securitization Trust 2006-A8* class action, as a result of a settlement in the amount of USD 11 million.

Individual investor actions

On October 29, 2013, following a settlement, CSS LLC and its affiliates and employees filed a stipulation of discontinuance with prejudice to discontinue claims against CSS LLC and its affiliates and employees brought by Stichting Pensioenfonds ABP in the Supreme Court for the State of New York, New York County (SCNY). On November 18, 2013, as a result of settlement, the US District Court for the Southern District of New York entered a stipulation of voluntary dismissal with prejudice, discontinuing Federal Housing Finance Agency (FHFA) v. JPMorgan Chase & Co., one of the FHFA's five actions against CSS LLC and its affiliates and employees, and other financial institutions, relating to approximately USD 870 million of RMBS at issue against the Credit Suisse defendants in that case. On November 26, 2013, the Indiana state court presiding in the action brought by the Federal Home Loan Bank of Indianapolis dismissed with prejudice claims pertaining to certain defendants, including one of the RMBS offerings on which CSS LLC and certain of its affiliates were sued, reducing the RMBS at issue relating to claims against CSS LLC and its affiliates in that case by approximately USD 100 million. On December 5, 2013, the Washington state court presiding in the action brought by the Federal Home Loan Bank of Chicago dismissed with prejudice one of the actions against CSS LLC and other financial institutions, reducing the RMBS at issue relating to claims against CSS LLC by USD 20 million. On December 26, 2013, Commerzbank AG London Branch filed an action against CSS LLC and certain of its affiliates and other financial institutions in the SCNY, relating to approximately USD 148 million of the RMBS at issue (approximately 6% of the USD 2.3 billion at issue against all defendants in the operative pleading). On January 6, 2014, following a settlement, CSS LLC and its affiliates filed a stipulation of discontinuance with prejudice to discontinue claims against CSS LLC and its affiliates relating to approximately USD 35 million of RMBS at issue brought by Sealink Funding Limited in the SCNY. On January 24, 2014, the SCNY dismissed with prejudice certain claims in the action against CSS LLC and its affiliates brought by Allstate Insurance Company, reducing the RMBS at issue for CSS LLC and its affiliates from approximately USD 232 million to approximately USD 187 million. On March 21, 2014, CSS LLC and certain affiliates and employees entered into an agreement with the FHFA to settle all claims in two of three remaining actions filed by the FHFA in the SDNY for USD 885 million, which amount was partially covered by existing provisions. The actions settled on March 21, 2014 related to approximately USD 16.6 billion of RMBS at issue against the Credit Suisse defendants.

Repurchase litigations

On January 3, 2014, the SCNY dismissed with prejudice the consolidated actions brought by Home Equity Asset Trust 2006-5, Home Equity Asset Trust 2006-6 and Home Equity Asset Trust 2006-7 against DLJ Mortgage Capital, Inc., in which the plaintiffs had alleged damages of not less than USD 319 million.

Monoline insurer disputes

On November 15, 2013, CIFG Assurance North America, Inc. (CIFG) filed an action against CSS LLC in the SCNY, relating to financial guaranty insurance issued by CIFG on a credit default swap guaranteeing payment on approximately USD 396 million of notes of a collateralized debt obligation. CIFG alleges material misrepresentation in the inducement of an insurance contract and fraud relating to alleged affirmative misrepresentations and material omissions made to induce CIFG to guarantee the securities.

Tax and securities law matters

Credit Suisse has been responding to subpoenas and other requests for information from the United States Department of Justice (DOJ), the US Securities and Exchange Commission (SEC) and other authorities involving historical Private Banking services provided on a cross-border basis to US persons. US authorities are investigating possible violations of US tax and securities laws. In particular, the DOJ is investigating whether US clients violated their US tax obligations and whether Credit Suisse and certain of its employees assisted such clients. The SEC has investigated whether certain of our relationship managers triggered obligations for Credit Suisse or the relationship managers in Switzerland to register with the SEC as a broker-dealer or investment advisor. A limited number of current or former employees have been indicted and two former employees have pleaded guilty (in one case, as to conduct while employed at other financial institutions that did not involve Credit Suisse and in the other case as to conduct while employed at a former Credit Suisse subsidiary prior to 2006 and other financial institutions after 2006). Credit Suisse received a grand jury target letter from the DOJ. We understand that certain US authorities are also investigating other Swiss and non-US financial institutions. We have been conducting an internal investigation and are continuing to cooperate with the authorities both in the US and Switzerland to resolve this matter in a responsible manner that complies with our legal obligations. Our provision of Swiss-based information to these US authorities has been in accordance with permission granted by Swiss authorities. The Group has established a loss contingency provision of CHF 895 million with respect to the tax and securities law matters described in this subsection. The Group had previously disclosed a provision of CHF 470 million with respect to these matters, including CHF 175 million in connection with the settlement with the SEC described in the following paragraph.

On February 21, 2014, Credit Suisse AG reached a settlement with the SEC that resolves the SEC's investigation regarding registration as an investment advisor and broker-dealer. In a settled administrative and cease-and-desist proceeding, the SEC charged Credit Suisse AG with violating Section 15(a) of the US Securities Exchange Act of 1934 (Exchange Act) and Section 203(a) of the US Investment Advisers Act of 1940 (Advisers Act). Specifically, the SEC's Order finds that from at least 2002 through its exit from the US cross-border securities business which Credit Suisse AG began in 2008, Credit Suisse AG, through actions of certain of its relationship managers, violated the federal securities laws by

providing certain cross-border brokerage and investment advisory services to US clients at a time when Credit Suisse AG was not registered with the SEC as a broker-dealer or investment advisor. As part of the settlement of the investigation, Credit Suisse AG agreed, among other things, to cease-and-desist from committing or causing any future violations of section 15(a) of the Exchange Act or Section 203(a) of the Advisers Act and to pay approximately

USD 196 million, inclusive of disgorgement of approximately USD 82 million, prejudgment interest of approximately USD 64 million, and a civil money penalty in the amount of USD 50 million. Credit Suisse AG also agreed to the appointment of an independent consultant who will review its cross-border compliance policies with respect to the US securities laws and will verify that Credit Suisse AG has exited the US cross-border business.

Note 30 Subsidiary guarantee information

Certain wholly-owned finance subsidiaries of the Group, including Credit Suisse Group (Guernsey) I Limited and Credit Suisse Group (Guernsey) III Limited, each of which is a Guernsey incorporated non-cellular company limited by shares, may issue contingent convertible securities fully and unconditionally guaranteed by the Group. There are various legal and regulatory requirements, including the satisfaction of a solvency test under Guernsey law, applicable to some of the Group's subsidiaries that limit their ability to pay dividends or distributions and make loans and advances to the Group.

On March 26, 2007, the Group and the Bank issued full, unconditional and several guarantees of Credit Suisse (USA), Inc.'s outstanding SEC-registered debt securities. In accordance with the guarantees, if Credit Suisse (USA), Inc. fails to make

any timely payment under the agreements governing such debt securities, the holders of the debt securities may demand payment from either the Group or the Bank, without first proceeding against Credit Suisse (USA), Inc. The guarantee from the Group is subordinated to senior liabilities. Credit Suisse (USA), Inc. is an indirect, wholly owned subsidiary of the Group.

In 4Q13, as part of an announced program to evolve the Group's legal entity structure to meet developing and future regulatory requirements and Fed regulation on establishing Intermediate Holding Companies in the US for non-US banks, several existing legal entities were re-parented as subsidiaries of Credit Suisse (USA), Inc. In the tables below, prior periods have been restated to conform to the current presentation to reflect the impact of these transactions.

Cautionary statement regarding forward-looking information

This report contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market and interest rate fluctuations and interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries in 2014 and beyond;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our strategic objectives, including improved performance, reduced risks, lower costs and more efficient use of capital;
- the ability of counterparties to meet their obligations to us;

- the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices;
- competition in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation and other contingencies;
- the ability to achieve our cost efficiency goals and cost targets; and
- our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in “Risk factors” in I – Information on the company in our Annual Report 2012.

Our 2012 annual publication suite consisting of Annual Report and Corporate Responsibility Report, which also contains the Company Profile 2012, is available on our website www.credit-suisse.com/investors

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F ☒

Form 40-F ☐

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

Note: Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's "home country"), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes ☐

No ☒

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82-.

This report is being filed by Credit Suisse Group AG and Credit Suisse AG and is hereby incorporated by reference into the Registration Statement on Form F-3 (file no. 333-180300) and the Registration Statement on Form S-8 (file no. 333-101259).

Media Release

Proposals for the Annual General Meeting on May 9, 2014

The Board of Directors of Credit Suisse Group AG today published the agenda for the Annual General Meeting on May 9, 2014.

- **Proposal for a cash distribution to shareholders for the 2013 financial year of CHF 0.70**
- **Proposal to increase the conditional capital for the purpose of delivering shares in the context of employee stock option programs from CHF 441,983.92 (equivalent to 11,049,598 registered shares) by CHF 1,200,000 (equivalent to 30,000,000 shares) to a maximum of CHF 1,641,983.92 (equivalent to 41,049,598 registered shares)**
- **Consultative vote on the 2013 Compensation Report**
- **Proposal on the amendments to the Articles of Association to implement the new Ordinance against Excessive Compensation with respect to Listed Stock Corporations**
- **Walter B. Kielholz and Peter Brabeck-Letmathe will be stepping down from the Board of Directors at the General Meeting on May 9, 2014, after 15 years and 17 years of service, respectively**
- **All other members of the Board of Directors will be standing for re-election**
- **The Board proposes Severin Schwan and Sebastian Thrun for election to the Board of Directors as new members**
- **Election of the members of the Compensation Committee**

The proposal for the cash distribution to shareholders for the 2013 financial year was previously announced on February 6, 2014.

The 2013 Annual Report is available online.

Zurich, April 3, 2014 The Board of Directors of Credit Suisse Group AG today announced its proposals for the Annual General Meeting on May 9, 2014, including the proposal to appoint Severin Schwan and Sebastian Thrun to the Board of Directors.

With regard to the appointments of Severin Schwan and Sebastian Thrun, Urs Rohner, Chairman of the Board of Directors, said the following: "Severin Schwan has been the CEO of Roche since 2008. He is an outstanding leader with a wealth of global experience, and with deep roots in Switzerland. Sebastian Thrun is an excellent scientist, teacher and entrepreneur. He is the founder and CEO of Udacity, an online university, as well as a Google Fellow, and the founder and head of the Google X research unit. He has been a research professor in the field of artificial intelligence and robotics at Stanford University since 2003."

Media Release

April 3, 2014

2/4

Urs Rohner added: "We are pursuing ambitious growth targets across our markets globally. Technology is fundamentally changing our clients' needs and the market environment, affording us great opportunities in private banking and investment banking worldwide, and in our home market of Switzerland. With Severin Schwan and Sebastian Thrun, two leaders have been nominated to join the Board of Directors, and their extensive experience will help us drive Credit Suisse's strategy, which is focused on clients and innovation. I look forward to working with them to shape the future of Credit Suisse."

Urs Rohner commented as follows on Walter Kielholz and Peter Brabeck stepping down from the Board of Directors: "As prominent leaders on a strong Board of Directors, Walter Kielholz and Peter Brabeck have greatly influenced the development of Credit Suisse for the last decade and a half. Thanks to their strategic foresight, global networks, and consummate knowledge of the financial industry and the corporate world, they have made a vital contribution to the evolution of Credit Suisse as an integrated bank and to its strategic development since the financial crisis. In an era in which the global economy and the requirements for banks have changed dramatically, Walter Kielholz and Peter Brabeck assumed responsibility for Credit Suisse. The bank has a great deal to thank them for. I personally have always considered it a great privilege to work with Walter Kielholz and Peter Brabeck, and I would like to wish them all the best in their new endeavors."

Distribution against Reserves from Capital Contributions

As previously announced, the Board of Directors proposes a distribution against reserves from capital contributions of CHF 0.70 per registered share in cash for the 2013 financial year.

Increase in Conditional Capital for Employee Shares

The Board of Directors proposes that the existing conditional capital for the purpose of delivering shares in the context of employee stock option programs be increased from CHF 441,983.92 (equivalent to 11,049,598 registered shares) by CHF 1,200,000 (equivalent to 30,000,000 shares) to a maximum of CHF 1,641,983.92 (equivalent to 41,049,598 registered shares).

Consultative Vote on the 2013 Compensation Report

Consistent with the practice in prior years, the 2013 Compensation Report, which is part of Credit Suisse Group AG's Annual Report, will be presented to the Annual General Meeting for a consultative vote.

Amendments to the Articles of Association

To implement the new Ordinance against Excessive Compensation with respect to Listed Stock Corporations issued by the Swiss Federal Council, the Board of Directors proposes amendments to the Articles of Association. These are outlined in the Report of the Board of Directors on the Amendments to the Articles of Association published in addition to the Invitation to the Annual General Meeting of Shareholders.

Elections to the Board of Directors

Walter B. Kielholz and Peter Brabeck-Letmathe will be stepping down from the Board of Directors at this year's Annual General Meeting. Walter Kielholz has been a member of the Board of Directors since 1999, serving as Chairman from 2003 to 2009. Peter Brabeck has been a member of the Board of Directors since 1997, and served as Vice-Chairman between 2000 and 2005, as well as from 2008 onward.

At the Annual General Meeting on May 9, 2014, the Board of Directors of Credit Suisse Group AG proposes the election of Severin

Schwan and Sebastian Thrun to the Board of Directors for a term of

Media Release

April 3, 2014

3/4

office of one year. Chairman Urs Rohner and all other members of the Board of Directors are standing for re-election for a term of office of one year. The proposal of the Board of Directors regarding the individual election of each member of the Board of Directors and its Chairman for a term of office of one year is in line with the requirements of the above-mentioned ordinance.

Elections to the Compensation Committee

In a further move to implement the above-mentioned ordinance, the Annual General Meeting will also elect the members of the Compensation Committee. The Board of Directors proposes the election of Jean Lanier, Andreas Koopmann, Iris Bohnet and Kai Nargolwala to the Compensation Committee.

Invitation to the Annual General Meeting and Publication of Agenda

The invitation and agenda for the Annual General Meeting, the Report of the Board of Directors on the Amendments to the Articles of Association, and a letter to shareholders from the Chairman of the Board of Directors are available on the Credit Suisse website at: www.credit-suisse.com/agm

Credit Suisse AG

Credit Suisse AG is one of the world's leading financial services providers and is part of the Credit Suisse group of companies (referred to here as "Credit Suisse"). As an integrated bank, Credit Suisse offers clients its combined expertise in the areas of private banking, investment banking and asset management. Credit Suisse provides advisory services, comprehensive solutions and innovative products to companies, institutional clients and high net worth private clients globally, as well as to retail clients in Switzerland. Credit Suisse is headquartered in Zurich and operates in over 50 countries worldwide. The Group employs approximately 46,000 people. The registered shares (CSGN) of Credit Suisse's parent company, Credit Suisse Group AG, are listed in Switzerland and, in the form of American Depositary Shares (CS), in New York. Further information about Credit Suisse can be found at www.credit-suisse.com.

Cautionary statement regarding forward-looking information

This press release contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as "believes," "anticipates," "expects," "intends" and "plans" and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws. By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements.

These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market and interest rate fluctuations and interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our

operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries in 2014 and beyond;

- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of sovereign issuers, structured credit products or other credit-related exposures;
- the ability to achieve our strategic objectives, including improved performance, reduced risks, lower costs, and more efficient use of capital;
- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;

Media Release

April 3, 2014

4/4

- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices;
- competition in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation and other contingencies;
- the ability to achieve our cost efficiency goals and cost targets; and
- our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in “Risk factors” in I – Information on the company in our Annual Report 2013.

E – Off-balance sheet arrangements.

For Credit Suisse and the Bank, please see III – Treasury, Risk, Balance sheet and Off-balance sheet – Balance sheet, off-balance sheet and other contractual obligations on pages 149 to 152 of the attached Annual Report 2012. In addition, for Credit Suisse, please see Note 30 – Derivatives and hedging activities, Note 31 – Guarantees and commitments and Note 32 – Transfers of financial assets and variable interest entities in V – Consolidated financial statements – Credit Suisse Group on pages 300 to 326 of the attached Annual Report 2012 and, for the Bank, please see Note 29 – Derivatives and hedging activities, Note 30 – Guarantees and commitments and Note 31 – Transfers of financial assets and variable interest entities in VII – Consolidated financial statements – Credit Suisse (Bank) on pages 455 to 471 of the attached Annual Report 2012.

F – Tabular disclosure of contractual obligations.

For Credit Suisse and the Bank, please see III – Treasury, Risk, Balance sheet and Off-balance sheet – Balance sheet, off-balance sheet and other contractual obligations – Contractual obligations and other commercial commitments on page 152 of the attached Annual Report 2012.

Item 6. Directors, senior management and employees.**A – Directors and senior management.**

For Credit Suisse and the Bank, please see IV – Corporate Governance and Compensation – Corporate Governance – Board of Directors, – Board Committees, – Biographies of the Board Members, – Executive Board and – Biographies of the Executive Board Members on pages 161 to 183 of the attached Annual Report 2012.

B – Compensation.

For Credit Suisse and the Bank, please see IV – Corporate Governance and Compensation – Compensation on pages 187 to 220 of the attached Annual Report 2012. In addition, for Credit Suisse, please see Note 11 – Compensation and benefits in V – Consolidated financial statements – Credit Suisse Group on page 251, Note 27 – Employee deferred compensation in V – Consolidated financial statements – Credit Suisse Group on pages 278 to 286 and Note 29 – Pension and other post-retirement benefits in V – Consolidated financial statements – Credit Suisse Group on pages 290 to 300, and Note 3 – Compensation to members of the Executive Board and the Board of Directors in VI – Parent company financial statements – Credit Suisse Group on pages 387 to 396 of the attached Annual Report 2012 and, for the Bank, please see Note 11 – Compensation and benefits in VII – Consolidated financial statements – Credit Suisse (Bank) on page 419, Note 26 – Employee deferred compensation in VII – Consolidated financial statements – Credit Suisse (Bank) on pages 440 to 444 and Note 28 – Pension and other post-retirement benefits in VII – Consolidated financial statements – Credit Suisse (Bank) on pages 447 to 455 of the attached Annual Report 2012.

C – Board practices.

For Credit Suisse and the Bank, please see IV – Corporate Governance and Compensation – Corporate Governance on pages 154 to 185 of the attached Annual Report 2012.

D – Employees.

For Credit Suisse and the Bank, please see IV – Corporate Governance and Compensation – Corporate Governance – Overview – Employees on page 156. In addition, for both Credit Suisse and the Bank, please see II – Operating and financial review – Core Results on pages 55 to 67 of the attached Annual Report 2012.

E – Share ownership.

For Credit Suisse and the Bank, please see IV – Corporate Governance and Compensation – Compensation on pages 187 to 220 of the attached Annual Report 2012. In addition, for Credit Suisse, please see Note 27 – Employee deferred compensation in V – Consolidated financial statements – Credit Suisse Group on pages 278 to 286, and Note 3 – Compensation to members of the Executive Board and Board of Directors in VI – Parent company financial statements – Credit Suisse Group on pages 387 to 396 of the attached Annual Report 2012. For the Bank, please see Note 26 – Employee deferred compensation in VII – Consolidated financial statements – Credit Suisse (Bank) on pages 440 to 444 of the attached Annual Report 2012.

Item 7. Major shareholders and related party transactions.

A – Major shareholders.

For Credit Suisse, please see IV – Corporate Governance and Compensation – Corporate Governance – Shareholders on pages 157 to 161 of the attached Annual Report 2012. In addition, for Credit Suisse, please see Note 3 – Business developments and subsequent events in V – Consolidated financial statements – Credit Suisse Group on pages 244 to 245, Note 5 – Own shares held by the company and by group companies and Note 6 – Significant shareholders in VI – Parent company financial statements – Credit Suisse Group on page 396 of the attached Annual Report 2012. Credit Suisse's major shareholders do not have different voting rights. The Bank has 43,996,652 shares outstanding and is a wholly-owned subsidiary of Credit Suisse.

B – Related party transactions.

For Credit Suisse and the Bank, please see IV – Corporate Governance and Compensation – Compensation on pages 187 to 220 of the attached Annual Report 2012. In addition, for Credit Suisse, please see Note 28 – Related parties in V – Consolidated financial statements – Credit Suisse Group on pages 286 to 289 and Note 3 – Compensation to members of the Executive Board and the Board of Directors – Board of Directors loans in VI – Parent company financial statements – Credit Suisse Group on pages 387 to 396 of the attached Annual Report 2012 and, for the Bank, please see Note 27 – Related parties in VII – Consolidated financial statements – Credit Suisse (Bank) on pages 445 to 446 of the attached Annual Report 2012.

C – Interests of experts and counsel.

Not applicable because this Form 20-F is filed as an annual report.

Item 8. Financial information.

A – Consolidated statements and other financial information.

Please see Item 18 of this Form 20-F.

For a description of Credit Suisse's legal and arbitration proceedings, please see Note 37 – Litigation in V – Consolidated financial statements – Credit Suisse Group on pages 357 to 363 of the attached Annual Report 2012. For a description of the Bank's legal and arbitration proceedings, please see Note 35 – Litigation in VII – Consolidated financial statements – Credit Suisse (Bank) on page 490 of the attached Annual Report 2012.

For a description of Credit Suisse's policy on dividend distributions, please see III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management – Additional information – Dividends and dividend policy on pages 119 to 120 of the attached Annual Report 2012.

B – Significant changes.

None.

Item 9. The offer and listing.

A – Offer and listing details, C – Markets.

For information regarding the price history of Credit Suisse Group shares and the stock exchanges and other regulated markets on which they are listed or traded, please see IX – Additional information – Other information – Listing details on page 539 of the attached Annual Report 2012. Shares of the Bank are not listed.

B – Plan of distribution, D – Selling shareholders, E – Dilution, F – Expenses of the issue.

Not required because this Form 20-F is filed as an annual report.

Item 10. Additional information.

A – Share capital.

Not required because this Form 20-F is filed as an annual report.

B – Memorandum and Articles of Association.

For Credit Suisse, please see IV – Corporate Governance and Compensation – Corporate Governance – Overview, – Shareholders and – Board of Directors on pages 154 to 177 and – Additional information – Changes of control and defense measures on page 183 and – Liquidation on page 185 of the attached Annual Report 2012. In addition, for Credit Suisse, please see IX – Additional information – Other information – Exchange controls and – American Depositary Shares on page 534 of the attached Annual Report 2012. Shares of the Bank are not listed.

C – Material contracts.

Neither Credit Suisse nor the Bank has any contract that would constitute a material contract for the two years immediately preceding this Form 20-F.

D – Exchange controls.

For Credit Suisse and the Bank, please see IX – Additional information – Other information – Exchange controls on page 534 of the attached Annual Report 2012.

E – Taxation.

For Credit Suisse, please see IX – Additional information – Other information – Taxation on pages 534 to 537 of the attached Annual Report 2012. The Bank does not have any public shareholders.

F – Dividends and paying agents.

Not required because this Form 20-F is filed as an annual report.

G – Statement by experts.

Not required because this Form 20-F is filed as an annual report.

H – Documents on display.

Credit Suisse and the Bank file annual reports on Form 20-F and furnish or file quarterly and other reports on Form 6-K and other information with the SEC pursuant to the requirements of the Securities Exchange Act of 1934, as amended. These materials are available to the public over the Internet at the SEC's website at www.sec.gov and from the SEC's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549 (telephone 1-800-SEC-0330). SEC reports are also available for review at the offices of the New York Stock Exchange, 20 Broad Street, New York, NY 10005. Further, our reports on Form 20-F, Form 6-K and certain other materials are available on the Credit Suisse website at www.credit-suisse.com. Information contained on our website is not incorporated by reference into this Form 20-F.

In addition, Credit Suisse's parent company financial statements, together with the notes thereto, are set forth on pages 381 to 400 of the attached Annual Report 2012 and incorporated by reference herein. The Bank's parent company financial statements, together with the notes thereto, are set forth on pages 495 to 512 of the attached Annual Report 2012 and incorporated by reference herein.

I – Subsidiary information.

Not applicable.

Item 11. Quantitative and qualitative disclosures about market risk.

For Credit Suisse and the Bank, please see III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management on pages 121 to 148 of the attached Annual Report 2012.

Item 12. Description of securities other than equity securities.

A – Debt Securities, B – Warrants and Rights, C – Other Securities.

Not required because this Form 20-F is filed as an annual report.

D – American Depositary Shares.

For Credit Suisse, please see IV – Corporate Governance and Compensation – Corporate Governance – Additional information – American Depositary Share fees on page 185 of the attached Annual Report 2012. Shares of the Bank are not listed.

Part II

Item 13. Defaults, dividend arrearages and delinquencies.

None.

Item 14. Material modifications to the rights of security holders and use of proceeds.

None.

Item 15. Controls and procedures.

For Credit Suisse's management report and the related report from the Group's independent auditors, please see Controls and procedures and Report of the Independent Registered Public Accounting Firm in V – Consolidated financial statements – Credit Suisse Group on pages 379 to 380 of the attached Annual Report 2012. For the Bank's management report and the related report from the Bank's independent auditors, please see Controls and procedures and Report of the Independent Registered Public Accounting Firm in VII – Consolidated financial statements – Credit Suisse (Bank) on pages 493 to 494 of the attached Annual Report 2012.

Item 16A. Audit committee financial expert.

For Credit Suisse and the Bank, please see IV – Corporate Governance and Compensation – Corporate Governance – Board of Directors – Board committees – Audit Committee on pages 165 to 166 of the attached Annual Report 2012.

Item 16B. Code of ethics.

For Credit Suisse and the Bank, please see IV – Corporate Governance and Compensation – Corporate Governance – Overview – Corporate governance framework on page 155 of the attached Annual Report 2012.

Item 16C. Principal accountant fees and services.

For Credit Suisse and the Bank, please see IV – Corporate Governance and Compensation – Corporate Governance – Additional Information – Internal and external auditors on pages 183 to 184 of the attached Annual Report 2012.

Item 16D. Exemptions from the listing standards for audit committee.

None.

Item 16E. Purchases of equity securities by the issuer and affiliated purchasers.

For Credit Suisse, please see III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management – Additional information – Share repurchases on page 119 of the attached Annual Report 2012. The Bank does not have any class of equity securities registered pursuant to Section 12 of the Exchange Act.

Item 16F. Change in registrants' certifying accountant.

None.

Item 16G. Corporate governance.

For Credit Suisse, please see IV – Corporate Governance and Compensation – Corporate Governance – Overview – Complying with rules and regulations on pages 154 to 155 of the attached Annual Report 2012. Shares of the Bank are not listed.

Item 16H. Mine Safety Disclosure.

None.

Part III**Item 17. Financial statements.**

Not applicable.

Item 18. Financial statements.

Credit Suisse's consolidated financial statements, together with the notes thereto and the Report of the Independent Registered Public Accounting Firm thereon, are set forth on pages 221 to 380 of the attached Annual Report 2012 and incorporated by reference herein. The Bank's consolidated financial statements, together with the notes thereto (and any notes or portions thereof in the consolidated financial statements of Credit Suisse Group referred to therein) and the Report of the Independent Registered Public Accounting Firm thereon, are set forth on pages 401 to 494 of the attached Annual Report 2012 and incorporated by reference herein.

Item 19. Exhibits.

- 1.1 Articles of association (Statuten) of Credit Suisse Group AG as of February 6, 2013.
- 1.2 Articles of association (Statuten) of Credit Suisse AG as of May 2, 2011 (incorporated by reference to Exhibit 1.2 of Credit Suisse Group AG's and Credit Suisse AG's annual report on Form 20-F for the year ended December 31, 2011 filed on March 23, 2012).
- 1.3 Organizational Guidelines and Regulations of Credit Suisse Group AG and Credit Suisse AG as of October 24, 2012.
- 2.1 Pursuant to the requirement of this item, we agree to furnish to the SEC upon request a copy of any instrument defining the rights of holders of long-term debt of us or of our subsidiaries for which consolidated or unconsolidated financial statements are required to be filed.
- 4.1 Agreement, dated February 13, 2011, among Compétrol Establishment, Credit Suisse Group (Guernsey) II Limited and Credit Suisse Group AG (incorporated by reference to Exhibit 99.1 of Credit Suisse Group AG's and Credit Suisse AG's current report on Form 6-K filed March 12, 2013).
- 4.2 Agreement, dated February 13, 2011, among Qatar Holding LLC, Credit Suisse Group (Guernsey) II Limited and Credit Suisse Group AG (incorporated by reference to Exhibit 99.2 of Credit Suisse Group AG's and Credit Suisse AG's current report on Form 6-K filed March 12, 2013).
- 4.3 Amendment Agreement, dated July 18, 2012, among Compétrol Establishment, Credit Suisse Group (Guernsey) II Limited, Credit Suisse Group AG and Credit Suisse AG, acting through its Guernsey Branch (incorporated by reference to Exhibit 99.3 of Credit Suisse Group AG's and Credit Suisse AG's current report on Form 6-K filed March 12, 2013).

Exhibit 12.1

I, Brady W. Dougan, certify that:

1. I have reviewed this annual report on Form 20-F of Credit Suisse Group AG and Credit Suisse AG;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrants as of, and for, the periods presented in this report;
4. The registrants' other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrants and we have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrants, including their consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrants' disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrants' internal control over financial reporting that occurred during the period covered by the annual report that has materially affected, or is likely to materially affect, the registrants' internal control over financial reporting; and
5. The registrants' other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrants' auditors and the audit committee of each of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrants' ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrants' internal control over financial reporting.

Message from the Chairman and the Chief Executive Officer

Dear shareholders, clients and colleagues

2012 was a year of transition for the financial services industry, as banks sought to adapt to new regulatory requirements, changing macroeconomic conditions and evolving client needs. Especially following the escalation of the Eurozone debt crisis, there was further debate about the mode and pace of implementation of the Basel III regulatory framework and the Swiss “Too Big to Fail” legislation. In Switzerland, developments in the cross-border wealth management business were driven by the focus on finding a politically acceptable basis for the future of this business and ongoing efforts to resolve legacy tax matters, particularly with other European countries and the US.

In response to this changing industry landscape, we took swift and decisive action during 2012 – building on the strategic steps we have been taking since 2008. In 2012, we substantially strengthened our capital position, lowered our cost base, reduced balance sheet assets both in terms of total assets and risk-weighted assets, and adapted the organizational structure of our businesses. Throughout this transformation, we maintained our strong market share momentum across businesses, continued to invest in key markets and achieved consistent pre-tax income during 2012 on an underlying* basis.

We now have a business model that is focused on those areas of business, where we can create value for clients and shareholders in the new environment. We are confident that the combination of a leading global wealth and asset management business for both private and institutional clients and a focused investment bank, together with our universal bank in our Swiss home market, provides us with a broad-based business structure and balanced income streams.

Significant progress in transforming our bank

We took further significant steps in 2012 to adapt our organization to new regulatory requirements and the changing market environment, as well as to evolving client needs:

- We further reduced our Basel III risk-weighted assets by CHF 55 billion, ending 2012 with Group-wide risk-weighted assets of CHF 284 billion. With that we are close to our target of less than CHF 280 billion in risk-weighted assets by year-end 2013.
- We strengthened our capital position by adding CHF 12.3 billion in pro-forma Look-through Swiss Core Capital** and our capital program is on track to achieve the end-2018 requirement of a 10% Swiss Core Capital ratio by mid-2013.
- We lowered our cost base by CHF 2.0 billion compared to the adjusted* annualized run-rate for the first half of 2011 and we are underway to achieve our CHF 4.4 billion run-rate reduction target by end-2015.
- We adapted the business models and organizational structure of our businesses. We created an integrated Private Banking & Wealth Management division with a strong global footprint that will continue to be a key revenue driver for the bank. We transformed our Investment Banking division to be Basel III compliant and remain focused on our market-leading, high-return businesses.

Throughout this transformation, we generated solid revenues and an underlying* return on equity of 10% for the full year 2012, and we maintained our strong market share momentum.

Developments in our individual businesses

In Private Banking & Wealth Management, we made good progress in adapting our business to the new environment while continuing to achieve strong client momentum and improving profitability. We are confident that the organizational steps that we announced in November 2012 to better manage the alignment of the products, advice and services that we deliver to clients will further increase our productivity and efficiency. The integrated Private Banking & Wealth Management division, which is led by Hans-Ulrich Meister and Robert Shafir, comprises our Wealth Management Clients business and Asset Management business, as well as our Corporate & Institutional Clients business in Switzerland. With its strong global presence, our Wealth Management Clients business is in a good position to operate successfully in the new regulatory environment and to generate attractive returns despite ongoing margin pressure in the industry. Our Asset Management business is focused on liquid, scalable alternative investment products and multi-asset class solutions and on close collaboration with our other businesses. Asset Management has a particularly strong position in our Swiss home market.

In Investment Banking, we have transformed our business model and are one of the first global banks to be Basel III compliant. In 2012, we generated higher revenues and higher returns on significantly less risk-weighted assets and on a substantially reduced expense base. In November 2012, we announced the appointment of Gaël de Boissard, head of Fixed Income, to the Executive Board to lead the Investment Banking division with Eric Varvel, who is continuing to run the Equities and Investment Banking departments within the division. The new organizational structure for Investment Banking reflects the importance of the Equities and Underwriting & Advisory businesses. At the same time, it also recognizes the progress we have made in evolving our Fixed Income business to the new environment and the strength of this business for Credit Suisse. The streamlined organization builds on the strategic steps we have taken since 2008 and helps us to execute our business strategy, including continued market share growth, reallocation of capital toward a better balance between Private Banking & Wealth Management and Investment Banking, and further progress in reducing costs.

We have also adapted our Shared Services functions to the changing business priorities. Shared Services provides support in the areas of finance, operations, human resources, legal and compliance, risk management and IT. In 2012, we created a combined Finance, Operations and IT function that enables the bank to accelerate progress towards a common infrastructure, achieve greater coordination to partner with the business efficiently and improve client access to our industry-

leading products. We also transferred further services to our Centers of Excellence around the globe. We expect the strategic importance of these centers to increase further in future.

Our performance in 2012

For the full year 2012, we delivered underlying* Core pre-tax income of CHF 5,008 million, more than double the CHF 2,371 million in the prior year. Underlying* net income attributable to shareholders was CHF 3,577 million and underlying* return on equity was 10%. After taking account of significant non-operating items, including fair value charges on own debt of CHF 2,939 million due to the improvement of our own credit spreads, our reported Core pre-tax income was CHF 1,879 million, net income attributable to shareholders was CHF 1,349 million and return on equity was 3.9%.

In Private Banking & Wealth Management, net revenues of CHF 13,541 million were stable compared to 2011, despite the adverse impacts of continued low transaction levels and the low interest rate environment. Total operating expenses of CHF 9,584 million decreased 8% compared to the prior year, and 3% excluding the litigation provisions of CHF 478 million in 2011 in connection with the German and US tax matters. The lower expenses reflect the efficiency measures we implemented throughout 2012, including the integration of Clariden Leu. Private Banking & Wealth Management recorded net asset inflows of CHF 40.6 billion for the full year across all regions, particularly from emerging markets and the ultra-high-net-worth client segment. However, these inflows were partly offset by significant items, including an outflow of a single low-margin client mandate in the amount of CHF 14.7 billion in the first quarter of 2012, structural outflows of CHF 6.9 billion in Western Europe and outflows of CHF 7.5 billion relating to the integration of Clariden Leu. As a result, Private Banking & Wealth Management reported net new assets for the full year 2012 amounting to CHF 10.8 billion.

For 2012, Investment Banking net revenues were CHF 12,558 million, up 20% compared to the prior year. This increase was primarily due to higher fixed income revenues, which reflected a more favorable market environment and the strength of our repositioned franchise. Total operating expenses in Investment Banking declined by 4% compared to the prior year, primarily due to the benefits of our efficiency measures. In 2012, Investment Banking reduced risk-weighted assets by USD 55 billion to USD 187 billion compared to 2011 and is continuing to make substantial progress toward its target of reducing risk-weighted assets to below USD 175 billion by end-2013. Investment Banking's normalized* return on Basel III allocated capital improved to 14% in 2012, excluding losses from the wind-down portfolio.

We continued to see the benefits of the integrated bank model in 2012, with 18.6% of Group-wide net revenues generated as a result of collaboration among our businesses.

Creating value for our stakeholders

We want to be a company that is close to our clients and provides them with the best service, generates superior returns for our shareholders, is considered a great employer by the over 47,000 people who work for us around the world and is a contributing member of the communities where we operate. We have adapted decisively to the structural changes in our operating environment and have addressed the needs of our stakeholders. We are confident that the actions we have taken in 2012 and the steps we will implement going forward position us as a strong and reliable partner to our clients, shareholders and employees.

We would like to thank our shareholders and clients for their loyalty to Credit Suisse and for the trust they placed in us in 2012. We particularly wish to thank all our employees for their continued commitment and their valuable contribution to the success of our business.

Yours sincerely,

Urs Rohner
Chairman of the
Board of Directors

Brady W. Dougan
Chief Executive Officer

March 2013

* Underlying, normalized and adjusted results are non-GAAP financial measures. The table below includes a reconciliation of certain of these measures. For further information on the calculation of underlying, normalized and adjusted measures, including reconciliations for historical periods, the cost run rate on an adjusted annualized basis and Investment Banking's normalized return on Basel III allocated capital for ongoing businesses, see the 4Q12 Results Presentation Slides.

** As of January 1, 2013, Basel III was implemented in Switzerland along with the "Too Big to Fail" legislation and regulations thereunder. Our related disclosures are in accordance with the current interpretation of such requirements, including relevant assumptions. Changes in the final implementation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown herein. In addition, we have calculated our 2012 pro forma Look-through Swiss Core Capital assuming the successful completion of the remaining CHF 0.8 billion of capital measures we announced in July 2012.

Credit Suisse at a glance

Credit Suisse

As one of the world's leading financial services providers, we are committed to delivering our combined financial experience and expertise to corporate, institutional and government clients and to high-net-worth individuals worldwide, as well as to private clients in Switzerland. Founded in 1856, today we have a global reach with operations in over 50 countries and 47,400 employees from approximately 100 different nations. Our broad footprint helps us to generate a geographically balanced stream of revenues and net new assets and allows us to capture diverse growth opportunities around the world. We serve our diverse clients through our two divisions, which cooperate closely to provide holistic financial solutions, including innovative products and specially tailored advice.

Private Banking & Wealth Management

Private Banking & Wealth Management offers comprehensive advice and a wide range of financial solutions to private, corporate and institutional clients. The Private Banking & Wealth Management division comprises the Wealth Management Clients, Corporate & Institutional Clients and Asset Management businesses. In Wealth Management Clients we serve ultra-high-net-worth and high-net-worth individuals around the globe and private clients in Switzerland. Our Corporate & Institutional Clients business serves the needs of corporations and institutional clients, mainly in Switzerland. Asset Management offers a wide range of investment products and solutions across diverse asset classes and investment styles, serving governments, institutions, corporations and individuals worldwide.

Investment Banking

Investment Banking provides a broad range of financial products and services, including global securities sales, trading and execution, prime brokerage and capital raising services, corporate advisory and comprehensive investment research, with a focus on businesses that are client-driven, flow-based and capital-efficient. Clients include corporations, governments, institutional investors, including hedge funds, and private individuals around the world. Credit Suisse delivers its investment banking capabilities via regional and local teams based in major global financial centers. Strongly anchored in Credit Suisse's integrated model, Investment Banking works closely with Private Banking & Wealth Management to provide clients with customized financial solutions.

Strategy

An integrated global bank

We offer our clients in Switzerland and around the world a broad range of traditional and customized banking services and products. We believe that our ability to serve clients globally with solutions tailored to their needs gives us a strong advantage in today's rapidly changing and highly competitive marketplace.

We operate as an integrated bank, combining our strengths and expertise in our two global divisions, Private Banking & Wealth Management and Investment Banking. Our divisions are supported by our Shared Services functions, which provide corporate services and business solutions while ensuring a strong compliance culture. Our global structure comprises four regions: Switzerland; Europe, Middle East and Africa; Americas and Asia Pacific. With our local presence and global approach, we are well positioned to respond to changing client needs and our operating environment.

Progress across key strategic pillars

In 2012, we made significant progress in evolving our client-focused, capital-efficient strategy to meet emerging client needs and regulatory trends while delivering attractive returns to shareholders. We undertook considerable efforts to adapt our business portfolio, to optimize and strengthen our capital position and to reduce our cost base. As a result of these actions, we believe that Credit Suisse today is better positioned to perform in a challenging market environment and compete in our chosen businesses and markets around the world.

- ▶ Refer to "Cost savings and strategy implementation" in II – Operating and financial review – Core Results – Information and developments for further information on Group cost efficiencies.
- ▶ Refer to "Capital management" in III – Treasury, Risk, Balance sheet and Off-balance sheet for further information on capital trends.

Organizational alignment

In November 2012, we announced an alignment of our organization to further strengthen our focus and ensure a more comprehensive execution of our strategy. We integrated our former Private Banking and Asset Management divisions into a single, new Private Banking & Wealth Management division,

including the majority of our securities trading and sales business in Switzerland, which was transferred from the Investment Banking division. We evolved certain responsibilities on our Executive Board so that the four heads of our two business divisions are each also responsible for one of our four regions. The modified management structure allows for efficient cross-regional and cross-divisional collaboration to better realize revenue opportunities with more effective alignment between legal entities and their management structure, which also meets regulatory expectations.

Private Banking & Wealth Management

Our Private Banking & Wealth Management division is comprised of our Wealth Management Clients, Corporate & Institutional Clients and Asset Management businesses. In Wealth Management Clients, we continue to focus on our international growth strategy, most notably fast growing and large onshore markets, as well as our ultra-high-net-worth individual client segment (UHNWI), while building on our strong position in the Swiss market and enhancing our efficiency. Further, we have realigned our organization in the Swiss market to balance growth in market share with operating efficiency. In our Corporate & Institutional Clients business, we further strengthened our focus on the specific client needs in our different businesses. In our Asset Management business, we strengthened our focus on liquid, scalable alternative investment products and multi-asset class solutions, while exiting subscale or less capital-efficient businesses and selectively optimizing our footprint.

Investment Banking

In the Investment Banking division, we remain committed to offering our clients a broad spectrum of equities, fixed income, and investment banking advisory products and services. We are focused on businesses where we have a competitive advantage and where we are able to operate profitably and with an attractive return on capital in the new regulatory environment. While the industry still faces substantial restructuring, we have substantially completed our transformation to a business model which is fully compliant with the Basel III regulatory framework. We will continue to redeploy capital to our market-leading, high-returning businesses while continuing to reduce risk weighted assets and our cost base to further improve returns.

Group cost efficiencies

In 2012, we continued to implement cost efficiency initiatives achieving our original cost savings target of CHF 2 billion one year early relative to the annualized first half 2011 expense run rate measured at constant foreign exchange rates and adjusted to exclude business realignment and other significant non-operating expenses and variable compensation expenses. We continue to adjust and optimize our footprint across businesses and regions and adapt Shared Services to changing business priorities.

As a result of the integration of our new Private Banking & Wealth Management division and other measures we are taking, in February 2013 we updated our overall cost savings targets relative to the annualized first half 2011 expense run rate to CHF 3.2 billion in 2013, CHF 3.8 billion by the end of 2014 and CHF 4.4 billion by the end of 2015, adjusted on the same basis as described above. We expect to incur CHF 1.6 billion of business realignment costs associated with these measures during the course of 2013 to 2015.

- ▶ Refer to “Cost savings and strategy implementation” in II – Operating and financial review – Core Results – Information and developments for further information on group cost efficiencies.

Group priorities

We expect our client-focused, capital-efficient strategy to benefit from a more constructive market environment while limiting our risk exposure in down markets. We have increased clarity on our future regulatory environment, and we are well advanced on implementation.

We target an annual after-tax return on equity (ROE) of 15% across market cycles. Building on the momentum we have established, we aim to further focus on our most profitable client businesses, gain market share and strengthen our geographic footprint, including our goal to achieve a 25% revenue contribution from emerging markets by 2014. To achieve our goals, we continue to focus on the following priorities:

Client focus

We put our clients' needs first. We aspire to be a consistent, reliable, flexible and long-term partner focused on clients with complex and multi-product needs, such as UNHWI, large and mid-sized companies, entrepreneurs, institutional clients and hedge funds. By listening attentively to their needs and offering superior solutions, we empower our clients to make better financial decisions. Against the backdrop of significant changes within our industry, we strive to consistently enable our clients to realize their goals and thrive. We continue to strengthen the coverage of our key clients by dedicated teams

of senior executives who can deliver our integrated business model. We have a strong capital position and high levels of client satisfaction and brand recognition, and our strong client momentum is well recognized. We were named “Best Private Bank Globally”, “Best Investment Bank in Switzerland” and “Best Emerging Markets and Western Europe M&A House” in Euromoney's Awards for Excellence in 2012.

Employees

We continue our efforts to attract, develop and retain top talent in order to deliver an outstanding integrated value proposition to our clients. Our candidates go through a rigorous interview process, where we not only look for technical proficiency and intellect, but for people who can thrive in and contribute to our culture. We review our talent and identify the optimal development opportunities based on individual and organizational needs. We strongly promote cross-divisional and cross-regional development, as well as lateral recruiting and mobility. Valuing different perspectives, creating an inclusive environment and showing cross-cultural sensitivity are key to Credit Suisse's workplace culture. Through our business school, we train our leaders, specialists and client advisors in a wide range of subjects. We take a prudent and constructive approach to compensation, designed to reflect the performance of individuals and the firm and closely align the interests of employees with those of shareholders.

Collaboration

We help our clients thrive by delivering the best products and services across our organization and divisions. We have established a dedicated governance structure in order to drive, measure and manage collaboration among our businesses. We target collaboration revenues of 18% to 20% of net revenues, and in 2012 we recorded collaboration revenues of CHF 4.4 billion, representing 19% of net revenues. Since the inception of our collaboration program in 2006, we have built a strong track record of delivering customized value propositions. We believe this is a significant differentiator for Credit Suisse. We have observed increasing momentum in collaboration initiatives, including tailored solutions for entrepreneurs and high-net-worth clients by Investment Banking and managed investment products developed by Private Banking & Wealth Management. As we also benefit from our programs for cross-divisional management development and lateral recruiting, collaboration revenues, including cross-selling and client referrals, have proven to be a resilient source of both revenues and assets.

Capital and risk management

As prudent risk taking aligned with our strategic priorities is fundamental to our business, we maintain a conservative framework to manage liquidity and capital. In July 2012, we announced a number of comprehensive capital measures designed to accelerate the strengthening of our capital position in light of the current regulatory and market environment, including the implementation of the  Basel III framework and the Swiss  "Too Big to Fail" legislation. Our capital measures include, among others, capital raising from key strategic investors and current shareholders, strategic divestments and real estate sales. As of year-end 2012, our Look-through Swiss Core Capital ratio was 9.0%, and our  Basel II.5 tier 1 capital ratio improved to 19.4% from 15.2% in 2011. Our Basel II.5 leverage ratio improved to 5.8% from 4.6% in 2011. We continued to optimize our balance sheet and plan to further reduce it to achieve a 2013 target of below CHF 900 billion on a foreign-exchange neutral basis compared to the end of the third quarter 2012. We continue to deploy capital in a disciplined manner based on our economic capital model, assessing our aggregated risk taking in relation to our client needs and our financial resources.

As of January 1, 2013, the Basel Committee on Banking Supervision (BCBS) Basel III framework (Basel III) was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the final implementation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Our ratio calculations use estimated  risk-weighted assets (RWA) as of December 31, 2012, as if the Basel III framework had been implemented in Switzerland as of such date.

- ▶ Refer to "Capital management" in III – Treasury, Risk, Balance sheet and Off-balance sheet for further information on capital trends.

Efficiency

We continue to strive for top-quartile efficiency levels, while being careful not to compromise on growth or reputation. In 2013 we are targeting a cost/income ratio of below 70%. In line with the announced evolution of our strategy, implemented efficiency measures are generating significant cost savings while helping to build an efficiency culture. We have increased deployment under our Centers of Excellence (CoE) program to over 14,000 roles, increasing efficiency, and have established initiatives to further leverage the service capabilities and talent at our CoE sites.

To track our progress and benchmark our performance we have defined a set of KPIs for growth, efficiency and performance, and capital to be achieved across market cycles, and these indicators were updated at year-end 2012.

- ▶ Refer to "Key performance indicators" in II – Operating and financial review – Core Results – Information and developments for a more detailed description of our businesses and our performance in 2012 against the defined targets.

Industry trends and competition

For the financial services industry, 2012 was a year of transition, with banks seeking to adapt to new regulatory requirements, changing macroeconomic conditions and evolving client needs. There was further debate about the process and timing of implementing the  Basel III regulatory framework and the Swiss  "Too Big to Fail" legislation. In Switzerland, developments in the cross-border wealth management business were driven by the focus on finding a political basis for operating this business in the future and ongoing efforts to resolve legacy tax matters, particularly with European countries and the US.

Corporate responsibility and Code of Conduct

At Credit Suisse, we are convinced that our responsible approach to business is a decisive factor determining our long-term success. We therefore expect all our employees and members of the Board of Directors to observe the professional standards and ethical values set out in our Code of Conduct, including our commitment to complying with all applicable laws, regulations and policies in order to safeguard our reputation for integrity, fair dealing and measured risk-taking. At the same time, we strive to assume our corporate responsibilities in every aspect of our work based on our broad understanding of our role as a financial services provider, member of society and employer. Our approach also reflects our commitment to protecting the environment and the importance we assign to our dialogue with our stakeholders. To ensure that we supply the full breadth of information required by our stakeholders, we publish a Corporate Responsibility Report and additional information, which can be found at www.credit-suisse.com/responsibility. Our Code of Conduct is available on our website at www.credit-suisse.com/code.

Our businesses

Private Banking & Wealth Management

Business profile

Within the Private Banking & Wealth Management division, we offer comprehensive advice and a broad range of financial solutions to private, corporate and institutional clients. Private Banking & Wealth Management comprises the Wealth Management Clients, Corporate & Institutional Clients and Asset Management businesses, and had total assets under management of CHF 1,250.8 billion as of the end of 2012.

Our **Wealth Management Clients** business is one of the largest in the international wealth management industry serving over two million clients, including ◉UHNWI and ◉high-net-worth individual clients around the globe and private clients in Switzerland. We offer our clients a distinct value proposition, combining global reach with a structured advisory process and access to a broad range of sophisticated products and services. As of the end of 2012, our Wealth Management Clients business had assets under management of CHF 798.5 billion. Our global network comprises 3,910 relationship managers in 42 countries with more than 330 offices and 22 ◉booking centers.

Our **Corporate & Institutional Clients** business offers expert advice and high-quality services to a wide range of clients, serving the needs of over 100,000 corporations and institutions, mainly in Switzerland, including large corporate clients, small and medium size enterprises (SME), institutional clients, financial institutions, shipping companies and commodity traders. More than 1,500 employees serve our clients out of 38 locations. While the Swiss home market remains our core focus, we are also building out our capabilities in international growth markets with dedicated teams in Luxembourg, Singapore and Hong Kong. As of the end of 2012, Corporate & Institutional Clients reported CHF 323.1 billion of client assets and CHF 60.6 billion of net loans.

Our **Asset Management** business offers investment solutions and services globally to a wide range of clients, including pension funds, governments, foundations and endowments, corporations and individuals. We invest across a broad range of asset classes with a focus on alternative investment strategies, emerging markets, asset allocation and traditional investment strategies. Our investment professionals deliver access to best-in-class products and holistic client solutions. Asset Management had CHF 371.6 billion of assets under management as of the end of 2012.

| Number of employees | 27,300 | 28,100 | 28,700 |

Industry trends and competition

Notwithstanding the current economic uncertainty, the wealth management industry continues to have positive growth prospects. Assets of ultra- and high-net-worth individuals globally are projected to grow approximately 6% annually over the next five years. Structurally, the industry is undergoing significant change. Wealth creation continues to shift towards emerging markets, with higher growth rates fueled by entrepreneurial activity and comparatively strong economic development. Mature markets, with around two thirds of the world's wealth located in the US, Japan and Western Europe, are experiencing a generational transfer of wealth. New and proposed laws and international treaties, including tax treaties entered into by Switzerland, are leading to increased regulation of cross-border banking activities for certain clients.

Globally, regulatory requirements for investment advisory services are also increasing, including in the areas of suitability, appropriateness of advice, client information and documentation. We believe Credit Suisse will be well adapted for this new environment through application of our structured advisory process, which helps to ensure that our business conduct is compliant with all applicable regulatory standards.

We believe the market for corporate and institutional banking services continues to offer attractive business opportunities. However, the competition between banks is intense and the low-interest rate environment remains challenging, resulting in continuous pressure on margins. This business is also significantly affected by new capital requirements for banks. International financial institutions continue to review their market strategies in light of capital and leverage restrictions.

The asset management industry overall faced significant challenges affecting growth in 2012, with assets under management remaining flat compared to 2007 levels, even while global investable assets have increased. Within the asset management industry, allocations to alternative investments have continued to increase due to projected low returns from fixed-income products and increased volatility in equity markets.

Within alternatives, the hedge fund industry continued to see modest inflows in 2012, with the largest hedge fund managers capturing the majority of asset inflows. Private equity fundraising remained relatively flat in 2012 relative to 2011, remaining far below pre-crisis peaks. The regulatory environment continued to evolve in 2012 and is expected to continue to trend toward simpler, more regulated fund structures in conjunction with investors seeking better transparency and risk management.

For the wealth and asset management industry in general, gross margins remain under pressure due to continued low interest rates as well as clients choosing a more conservative asset mix and reducing their overall investment activity in the face of economic uncertainty and specific events such as the European sovereign debt crisis and the US "fiscal cliff". We expect these challenging conditions to last for some time to come. Competition and cost pressure in the industry remain intense, with many competitors reevaluating their business models. Attracting and retaining the best talent continues to be a key factor for success. As a result of these structural industry trends, we expect industry consolidation and restructuring to continue. We believe Switzerland is well positioned as a financial center to continue its success in this changing marketplace, offering clients a politically stable and economically diversified investment environment combined with a long-standing heritage in wealth and asset management services.

For Swiss institutions, the Swiss franc remains strong historically, even given the actions by the Swiss National Bank (SNB) to maintain a minimum exchange rate against the euro. This strength can adversely affect operating performance for Swiss institutions as revenues are based on assets under management that are often denominated in currencies that have weakened against the Swiss franc but a substantial portion of the related expenses are incurred in Swiss francs.

Strategy

As of November 30, 2012 we integrated our former Private Banking and Asset Management divisions into a single, new Private Banking & Wealth Management division. In addition, the majority of our securities trading and sales business in Switzerland was transferred from the Investment Banking division into the Private Banking & Wealth Management division. This integration created one of the foremost integrated wealth and asset management businesses globally. As a result of the integration and other measures, the Group updated its overall cost savings target by an additional CHF 0.4 billion to be achieved by year-end 2015.

Wealth Management Clients

In 2012 we made significant progress towards our goals. We improved our organizational structure to deliver more dedicated and client centric services, especially in our Swiss home market. In parallel, we increased our profitability through strict cost management and revenue and pricing measures. We also continued our focus on fast growing and large markets, UHNWI clients, and on attracting top talent to the business. With these efforts and even in the challenging economic environment, in 2012 we were able to achieve a pre-tax income margin of 22.6% and a gross margin of 114 basis points. We expect to make additional progress by continuing our long-term strategy along:

- Advice at the core
- Global growth
- Productivity management
- Regulatory transformation
- Integrated bank
- Best people

Advice at the core: We have continued to deliver tailor-made and best-in-class financial solutions to our clients based on our structured advisory process. In addition, particularly in Switzerland, we created a more client centric organizational structure. Furthermore, we established new business units focusing on specific client segments and continued to develop our range of solutions based on client needs with the expertise of our research and investment experts. To ensure the highest standards in our product offerings, our selection of internal and third-party solutions is based on comprehensive due diligence with regard to client appropriateness.

Global growth: Our Swiss home market remains a key area of focus where we continued to expand our already strong market position through new services and special campaigns. This resulted in CHF 2.3 billion of net new assets in Switzerland in 2012. In addition, we successfully continued our expansion in fast growing emerging markets, increasing our footprint in those markets in 2012 by 12% in terms of assets under management. We also significantly invested in our dedicated offerings for UHNWI clients, resulting in strong net new assets inflows of CHF 26.3 billion in 2012 from this client segment. Moreover, we concluded the integration of Hedging-Griffo in Brazil, the largest wealth market in Latin America, as well as the integration of HSBC's wealth management business in Japan. With these successful integrations, we are now among the top wealth managers in both countries.

Productivity management: Key to achieving our productivity enhancements were our efficiency management programs we announced and began implementing in November 2011, our CoE, now including more than 2,800 roles, and the completion of the integration of Clariden Leu. We are continuing our market review with a focus on locations with maximum scale and high cost efficiencies, and are planning to exit markets which do not meet these standards. Through these various efficiency measures we achieved CHF 300 million of pre-tax income improvements in 2012.

Regulatory transformation: We are dedicated to strict compliance with national and international regulations and proactive development and implementation of new business standards, including in the areas of client advice and anti-money laundering measures.

Integrated bank: The unique value proposition of our integrated bank remains a key strength in our client offerings. Close collaboration with the Investment Banking division and other businesses within Private Banking & Wealth Management enables us to offer customized and innovative solutions to our clients, especially to UHNWI clients, our fastest growing and most profitable segment.

Best people: Attracting, developing and retaining the industry's top talent continues to be a vital cornerstone of our strategy. Therefore, while reducing the overall headcount in 2012 in accordance with our efficiency targets, we continued to hire experienced senior relationship managers, who accounted for 64% of our relationship manager hires. We also continued to build on our extensive training and certification programs through which we enhance our existing talent pool.

Corporate & Institutional Clients

In 2012 we successfully took further steps towards the implementation of our business strategy and achievement of the overall Private Banking & Wealth Management strategy despite a difficult market environment. Our focus on risk and margin management was not only the base for our solid financial results, but was also a key factor in reinforcing our reputation as a proactive partner for our clients. A new client segmentation framework in the SME business, a redesigned sales management process and the integration of key organizational units allowed us to further strengthen our focus on the needs of our different client segments. Through various efficiency measures completed in 2012, we maintained our cost/income-ratio at a highly competitive level, supporting our solid financial results. In 2012 we were recognized with several awards, including "Best Private Bank for Business Jet Finance and Advisory" by *Corporate Jet Investor*, "Best Trade

Finance Bank" in Switzerland by *Global Finance Magazine* and "Best Swiss Global Custodian" by *R&M Surveys*.

Asset Management

We continue to focus on alternative investment strategies, including emerging markets, and core investments, including asset allocation and traditional products.

Strategic divestments: In line with our strategy toward a more liquid alternatives business and given the remaining uncertainty regarding the implementation of the "Volcker Rule", we accelerated the implementation of our strategy in mid-2012 and began the process of selling certain businesses within Asset Management. These comprise certain private equity businesses and investments and our exchange-traded funds (ETF) business. We announced the sale of the ETF business in January 2013 and expect to complete the sale by the end of the second quarter of 2013. During 2012 we completed the sale of our residual stake in Aberdeen Asset Management and the sale of Wincasa AG.

Realignment of businesses: As part of our overall strategy, including the divestments mentioned above, we have realigned our asset management businesses to optimize our re-sized footprint. We will manage our business along the following lines:

- Alternative investment strategies, which includes hedge fund strategies, alternative beta, commodities and credit investments;
- Core investments, which includes multi asset class solutions, equities, fixed income, real estate and index mandates; and
- Legacy, which includes businesses identified for sale and other private equity interests that are not considered part of our scalable, capital-light alternative investment strategies.

Growth in targeted areas: We have made significant progress in new initiatives in our targeted growth areas in 2012. We announced the formation of an asset management joint venture with one of our strategic investors focused on investment strategies in the Middle East, Turkey and other frontier markets. We launched a number of new products during the year, including the largest listed closed-end structured credit trust of its kind in Mexico, two fixed income bond funds in Singapore, a structured products fund, an alternatives fund that offers US investors a mutual fund vehicle providing a fund of hedge funds return profile with daily liquidity, and two fixed income bond funds in Singapore. Further, we successfully closed fundraisings for two significant collateralized loan obligation transactions.

Brazilian operations: We successfully integrated the existing Asset Management businesses in Brazil into one platform within our subsidiary Hedging-Griffo, and expanded our asset management capabilities through our investment in Peninsula Investimentos SA, which sponsors and manages hedge funds with a focus on Brazil macroeconomic funds and private equity funds.

Efficiency measures: We continued to streamline and simplify our business which resulted in reduced total operating expenses and headcount.

Products and services

Wealth Management Clients

In Wealth Management Clients, our service offering is based on our structured advisory process, client segment specific value propositions, comprehensive investment services and our multi-shore platform.

- **Structured advisory process:** We apply a structured approach based on a thorough understanding of our clients' needs, personal circumstances, product knowledge, investment objectives and a comprehensive analysis of their financial situation to define individual client risk profiles. On this basis we define together with our clients an individual investment strategy. This strategy is implemented ensuring that portfolio quality standards are adhered to and that all investment instruments are compliant with suitability and appropriateness standards. Responsible for the implementation are either the portfolio managers, in the case of discretionary mandates, or our relationship managers working together with their clients, in the case of advisory mandates.
- **Client segment specific value propositions:** We offer a wide range of wealth management solutions tailored to specific client segments. Our global market segments are primarily made up of UHNWI and high-net-worth individual clients, and, in Switzerland, private clients. UHNWI and high-net-worth individual clients contributed 41% and 45% of assets under management in Wealth Management Clients at the end of 2012, respectively. For entrepreneurs, we offer solutions for a range of private and corporate wealth management needs, including succession planning, tax advisory, financial planning and investment banking services. Our entrepreneur clients benefit from the advice of Credit Suisse's experienced corporate finance advisors, immediate access to a network of international investors and the professional support in financial transactions. A specialized team, Solutions Partners, offers holistic and tailor-made business and private financial solutions to our UHNWI clients.
- **Comprehensive investment services:** We offer a comprehensive range of investment advice and discretionary asset management services based on the outcome of our structured advisory process and the guidelines of the Credit Suisse Investment Committee. In addition, we base our advice and services on the analysis and recommendations of our global research team, which provides a wide range of global research including macroeconomic, equity, bond and foreign-exchange analysis, as well as research on the Swiss economy. Our investment advice covers a range of services from portfolio consulting to advising on individual investments. We offer our clients effective portfolio and risk management solutions, including managed investment products. These are products actively managed and structured by our specialists or third parties, providing private investors with access to investment opportunities that otherwise would not be available to them. For clients with more complex requirements, we offer investment portfolio structuring and the implementation of individual strategies, including a wide range of structured products and alternative investments. Discretionary asset management services are available to clients who wish to delegate the responsibility for investment decisions to Credit Suisse. We are an industry leader in alternative investments and, in close collaboration with our Asset Management business and Investment Banking, Wealth Management Clients offers innovative products with limited correlation to equities and bonds, such as hedge funds, private equity, commodities and real estate investments.
- **Multi-shore platform:** With global operations comprising 21 international booking centers in addition to our operations in Switzerland, we are able to offer our clients booking capabilities locally as well as through our international hubs. Our multi-shore offering is designed to serve clients who are focused on geographical risk diversification, have multiple domiciles, seek access to global execution services or are interested in a wider range of products than are available to them locally. In 2012, CHF 26.5 billion of net new assets in Wealth Management Clients were booked outside Switzerland, and we expect that international clients will continue to drive our growth in assets under management.

Corporate & Institutional Clients

In Corporate & Institutional Clients, we supply a comprehensive spectrum of financial solutions to companies and institutional clients. Our offering is derived from our clients' needs and delivered through our integrated franchise and growing international presence. With this foundation, we are able to assist our clients in virtually every stage of their business cycle and cover their banking needs in Switzerland and abroad. For corporate clients we provide a wide range of basic banking products such as traditional and structured lending, payment services, foreign-exchange, capital goods and real estate leasing as well as investment solutions. Furthermore, together with the Investment Banking division we offer tailor-made services in the areas of mergers and acquisitions, syndications and structured finance. For corporations with specific needs for global finance and transaction banking we provide services in commodity trade finance, commodity project and export finance as well as trade finance and factoring. For our institutional clients, including pension funds and public sector clients, we offer a wide range of fund solutions and fund-linked services, including fund management and administration, fund design and comprehensive global custody solutions. Our offerings also include ship and aviation finance and a competitive range of services and products for financial institutions such as securities, cash and treasury services.

Asset Management

In Asset Management, we offer institutional and individual clients a range of products, including alternative and traditional products. We reach our clients through our own distribution teams in Private Banking & Wealth Management, the Investment Banking division and through third-party distribution channels.

Our alternative investment offerings include hedge fund strategies, alternative beta, commodities and credit investments. We offer access to various asset classes and markets through strategic alliances and key joint ventures with external managers and have a strong footprint in emerging markets.

In our core investments business, in the area of multi-asset class solutions we provide clients around the world with innovative solutions and comprehensive management across asset classes to optimize client portfolios, with services that range from funds to fully customized solutions. Stressing investment principles such as risk management and asset allocation, we take an active, disciplined approach to investing. Other core investment strategies include a suite of fixed income and equity funds, our real estate business which aims to provide investors with stable and attractive cash flows by applying active portfolio management to reduce volatility, and our indexed solutions business which provides institutions and individual clients access to a wide variety of asset classes in a cost-effective manner.

Products that we now include in our legacy business include our ETF business, the private equity businesses and investments that we have targeted for sale, and other private equity interests that are not considered part of our scalable, capital-light alternative investment strategies.

Investment Banking

Business profile

Investment Banking provides a broad range of financial products and services, focusing on businesses that are client-driven, flow-based and capital-efficient. Our suite of products and services includes global securities sales, trading and execution, prime brokerage and capital raising and advisory services as well as comprehensive investment research. Our clients include corporations, governments, pension funds and institutions around the world. We deliver our global investment banking capabilities via regional and local teams based in major developed and emerging market centers. Our integrated business model enables us to gain a deeper understanding of our clients and deliver creative, high-value, customized solutions based on expertise from across Credit Suisse.

Key data – Investment Banking

| | in / end of | | |
|--|-------------|--------|--------|
| | 2012 | 2011 | 2010 |
| Key data | | | |
| Net revenues (CHF million) | 12,558 | 10,460 | 15,873 |
| Income/(loss) before taxes (CHF million) | 2,002 | (593) | 3,594 |
| Number of employees | 19,800 | 20,700 | 20,500 |

Industry trends and competition

2012 was a challenging year marked by market uncertainty amid continued concerns from the European sovereign debt crisis, global economic slowdown and the late 2012 threat of the US “fiscal cliff”. Investment Banking, in particular, was impacted by a high degree of macroeconomic uncertainties, political tensions and continuing regulatory developments. Similar to many of our global competitors, Credit Suisse’s Investment Banking business was affected by subdued corporate and institutional risk appetite, continued low client activity levels across businesses and high market volatility during the year. In addition, financial institutions across the globe were under significant pressure to adapt their business models as legal requirements became increasingly stringent. The evolving regulatory framework and significant regulatory developments in 2011 and 2012 have fundamentally changed the business and competitive landscape of the industry. One example of significant change affecting the industry is the phasing-in of higher minimum capital requirements under Basel III beginning in 2013 in some countries, including Switzerland. Banks deemed systemically important will be required to hold additional capital by the beginning of 2019 as part of efforts to prevent another financial crisis. Although some of the new regulatory measures require further rule-making and will be

implemented over time, we expect increased capital and liquidity requirements and derivatives regulation to result in reduced risk-taking and increased transparency.

Strategy

Since 2008, Credit Suisse has proactively pursued a client-focused, capital-efficient business model. This strategy, coupled with our conservative funding and liquidity position and strong capitalization, has served us well during a period of market volatility and industry change. In light of persistent headwinds, we announced a refinement to our strategy in November 2011 aimed at adapting our businesses to the new market and regulatory environment. This includes significantly reducing Basel III RWA in fixed income, achieving greater financial flexibility by reducing our cost base, optimizing our portfolio towards synergies with the Private Banking & Wealth Management division and delivering sustainable, attractive returns in areas where we have competitive advantages.

Since this announcement, we have made substantial progress in executing the initiatives of our evolved strategy. We have significantly adapted our business model and have become one of the first global banks to be Basel III compliant. Without these proactive measures, the onset of regulatory changes arising from Basel III would result in a material increase in RWA for Investment Banking, with the vast majority impacting the fixed income business. In 2012, we accelerated our RWA reduction plan and reduced Basel III RWA by USD 55 billion to USD 187 billion. The bulk of these reductions were in our fixed income wind-down businesses, as evidenced by a decrease of USD 35 billion, or 73%, in Basel III RWA during the year. Specifically, we reduced positions and risks across long-dated trades in global rates, credit correlation book, legacy wind-down portfolio and legacy emerging markets portfolio. We also transferred a portion of risk in the wind-down portfolio to the 2011 Partner Asset Facility (PAF2). Looking ahead, we have a Basel III RWA target for Investment Banking of USD 175 billion to be achieved by year-end 2013.

Another component of our evolved strategy is our focus on cost initiatives, which have been ongoing since the second quarter of 2011. We achieved CHF 1.3 billion of direct cost savings in 2012 compared to the annualized 6M11 run-rate, measured at constant foreign exchange rates and adjusted to exclude significant non-operating expenses and variable compensation expenses. Having made substantial progress in 2012, the Group recently announced revised cost savings targets to be achieved by year-end 2015, of which an additional CHF 0.5 billion is expected to come from Investment Banking. Through these initiatives, we are creating significant flexibility in our Investment Banking cost structure, which will permit us

to adapt to the challenging market environment while taking advantage of favorable market opportunities when they arise.

As a result of our proactive efforts to improve operating and capital efficiency, in 2012 we generated higher revenues and returns on significantly less RWA and on a substantially reduced expense base. We have a targeted, client-focused and capital-efficient fixed income business that has delivered more balanced and consistent results, with lower risk and less revenue volatility. We have an industry-leading equities franchise. Our underwriting & advisory businesses have global reach with opportunities to increase returns driven by our planned cost savings. We remain focused on our market-leading, high-return businesses where we have competitive advantages or synergies with Private Banking & Wealth Management, including cash equities, prime services, emerging markets, securitized products and global credit products. We are allocating a majority of our Investment Banking capital base to these businesses.

We believe we have benefitted from an early mover advantage by adapting to the regulatory and operating changes ahead of our peers, and we have seen announcements of similar strategies from our peers throughout 2012. In light of the substantial restructuring we completed in 2012, we have revised our key performance indicator, the cost/income ratio target to 70%, which is an enhancement over the previous pre-tax income margin target of 25% and implied cost/income ratio target of 75%. We believe our transformed portfolio will allow us to generate attractive returns under Basel III and support the overall Group ROE target of 15% or greater across market cycles.

- ▶ Refer to "Regulation and supervision" for further information on regulatory developments.

Significant transactions

We executed a number of noteworthy transactions in 2012, reflecting the breadth and diversity of our Investment Banking franchise:

- **Debt capital markets:** We arranged key financings for a diverse set of clients, including RedPrairie (privately held supply chain, workforce and all-channel commerce software provider), Rank Group (privately owned investment company), Fortescue Metal Group (world's fourth largest iron ore producer based in Australia), Wideopenwest (privately owned cable, Internet and phone company) and Kinetic Concepts Inc. (global medical technology company).
- **Equity capital markets:** We executed a follow-on offering for Cobalt International Energy, Inc. (independent oil focused exploration and production company), a rights issue and offering for UniCredit Group (European banking services organization), a rights offering for Fondiaria SAI (Italian financial services company focusing on insurance) and were an active bookrunner on the initial public offering (IPO) of The Carlyle Group (global alternative asset manager).
- **Mergers and acquisitions:** We advised on a number of key transactions throughout the year, including the Well-Point (managed healthcare company) acquisition of Amerigroup (manager of publicly funded health programs), the acquisition of Southern Union Company (US natural gas company) by Energy Transfer Equity (US diversified energy operator), the sale of Synthes (global manufacturer of orthopedic devices) to Johnson & Johnson (leading manufacturer of health care products), the sale of Goodrich (global supplier of systems and services to aerospace and defense industries) to United Technologies Corporation (provider of high-technology products to aerospace and defense industries), the sale of Amylin (biopharmaceutical company) to Bristol-Myers Squibb (global biopharmaceutical company), the sale of Inhibitex (biopharmaceutical company) to Bristol-Myers Squibb and the first step in a multi-stage plan for Alibaba Group (privately-owned Internet business in China) under which Alibaba's major shareholder Yahoo! will exit its investment.

Market share momentum

- We have advanced to become the second-largest prime broker worldwide, as reported in the 2012 global survey of prime brokerage assets conducted by *Hedge Fund Intelligence*.
- We were recognized for our leading equities program trading and electronic trading capabilities by US and European institutions in recent surveys conducted by *Greenwich Associates*.
- In the 2012 fixed income trading survey for North America by *Greenwich Associates*, we increased our overall rank to top five in 2012 from number seven in 2011, increased or maintained market share in a majority of key businesses and significantly improved our market share in investment grade credit trading.
- We advanced to number four globally and increased our market share to 14.4% in global completed M&As for 2012, compared to 13.8% market share in 2011, according to *Dealogic*. We also finished 2012 at number one in US IPOs according to *Dealogic*.
- We maintained our share of wallet according to *Dealogic* in Asia Pacific (excluding Japan) at first place in 2012 with a 7.4% market share. In the Americas, we maintained our number five ranking and increased our share of wallet to 6.4% in 2012 from 5.9% in 2011, according to *Dealogic*.

Products and services

Our comprehensive portfolio of products and services is aimed at the needs of the most sophisticated clients, and we increasingly use integrated platforms to ensure efficiency and transparency. Our activities are organized around two broad functional areas: investment banking and global securities. In investment banking, we work in industry, product and country groups. The industry groups include energy, financial institutions, financial sponsors, industrial and services, healthcare, media and telecom, real estate, and technology. The product groups include M&A and financing products. In global securities, we engage in a broad range of activities across fixed income, currencies, commodities, derivatives and cash equities markets, including sales, structuring, trading, financing, prime brokerage, syndication and origination, with a focus on client-based and flow-based businesses, in line with growing client demand for less complex and more liquid products and structures.

Investment banking

Equity and debt underwriting

Equity capital markets originates, syndicates and underwrites equity in IPOs, common and convertible stock issues, acquisition financing and other equity issues. Debt capital markets originates, syndicates and underwrites corporate and sovereign debt.

Advisory services

Advisory services advises clients on all aspects of M&A, corporate sales and restructurings, divestitures and takeover defense strategies. The fund-linked products group is responsible for the structuring, risk management and distribution of structured mutual fund and alternative investment products and develops innovative products to meet the needs of its clients through specially tailored solutions.

Global securities

Global securities provides access to a wide range of debt and equity securities, derivative products and financing opportunities across the capital spectrum to corporate, sovereign and institutional clients. Global securities is structured into the following areas

Fixed income

- **Rates:** Global rates products is a global market maker in cash and derivatives markets and a primary dealer in multiple jurisdictions including the US, Europe and Japan. This business covers a full spectrum of government bonds, interest rate swaps and options, as well as providing liability and liquidity management solutions.

- **Foreign exchange:** Foreign exchange provides market making in products such as spot and options for currencies in developed markets. The foreign exchange product suite also includes proprietary market leading technology to provide clients with electronic trading solutions.
- **Credit:** Credit products offers a full range of fixed income products and instruments to clients across investment grade and high yield credits, ranging from standard debt issues and credit research to fund-linked products, derivatives instruments and structured solutions that address specific client needs. We are a leading dealer in flow trading of single-name credit default swap (CDS) on individual credits, credit-linked notes and index swaps. Investment grade trades domestic corporate and sovereign debt, non-convertible preferred stock and short-term securities such as floating rate notes and commercial paper. Leveraged finance provides capital raising and advisory services and core leveraged credit products such as bank loans, bridge loans and high yield debt for non-investment grade corporate and financial sponsor-backed companies.
- **Securitized products:** Securitized products trades, securitizes, syndicates, underwrites and provides research for various forms of securities, primarily residential mortgage-backed securities and asset-backed securities. Both the mortgage- and asset-backed securities are based on underlying pools of assets, and include both government- and agency-backed, as well as private label loans.
- **Emerging markets:** Emerging markets offers a full range of fixed income products and instruments, including sovereign and corporate securities, local currency derivative instruments and tailored emerging market investment products.
- **Commodities:** Commodities trades oil, gas and other energy products as well as base, precious and minor metals. The Commodities product suite also includes benchmark indices developed by Credit Suisse Commodities.

Equity

- **Cash equities** provides a comprehensive suite of offerings as described below:
- **Equity sales** uses research, offerings and other products and services to meet the needs of clients including mutual funds, investment advisors, banks, pension funds, hedge funds, insurance companies and other global financial institutions.
- **Sales trading** links sales and position trading teams. Sales traders are responsible for managing the order flow between our client and the marketplace and provide clients with research, trading ideas and capital commitments and

identify trends in the marketplace in order to obtain the best and most effective execution.

- Trading executes client and proprietary orders and makes markets in listed and over-the-counter (OTC) cash securities, exchange-traded funds and programs, providing liquidity to the market through both capital commitments and risk management.
- Advanced execution services (AES®) is a sophisticated suite of algorithmic trading strategies, tools and analytics operated by Credit Suisse to facilitate global equity trading. By employing algorithms to execute client orders and limit volatility, AES® helps institutions and hedge funds reduce market impact. AES® is a recognized leader in its field and provides access to exchanges in more than 35 countries worldwide via more than 45 leading trading platforms.
- Equity derivatives: Equity derivatives provides a full range of equity-related products, investment options and financing solutions, as well as sophisticated hedging and risk management expertise and comprehensive execution capabilities to financial institutions, hedge funds, asset managers and corporations.
- Convertibles: Convertibles trading involves both secondary trading and market making and the trading of credit default and asset swaps and distributing market information and research. The global convertibles business is a leading originator of new issues throughout the world.

- Prime services: Prime services provides a wide range of services to hedge funds and institutional clients, including prime brokerage, start-up services, capital introductions, securities clearing, hedge fund administration, synthetics and innovative financing solutions.

Arbitrage trading

Our arbitrage trading business focuses on liquidity-providing strategies in the major global equity and fixed income markets.

Other

Other products and activities include lending, certain real estate investments and the distressed asset portfolios. Lending includes senior bank debt in the form of syndicated loans and commitments to extend credit to investment grade and non-investment grade borrowers.

Research and HOLT

Credit Suisse's equity and fixed income businesses are supported by the research and HOLT functions.

Equity research uses in-depth analytical frameworks, proprietary methodologies and data sources to analyze approximately 3,000 companies worldwide and provides macroeconomic insights into this constantly changing environment.

HOLT offers one of the fastest and most advanced corporate performance, valuation and strategic analysis frameworks, tracking more than 20,000 companies in over 60 countries.

Organizational and regional structure

Organizational structure

We operate in two global business divisions and reporting segments – Private Banking & Wealth Management and Investment Banking. Consistent with our client-focused, capital-efficient business strategy, we coordinate activities in four market regions: Switzerland, Europe, Middle East and Africa (EMEA), Americas and Asia Pacific. In addition, Shared Services provides centralized corporate services and business support, as well as effective and independent controls procedures in the following areas:

- The Chief Financial Officer (CFO) area covers many diverse functions, including Corporate Development, Information Technology, Corporate Real Estate & Services, Efficiency Management, Financial Accounting, Group Insurance, Group Finance, Investor Relations, New Business, Global Operations, Product Control, Tax and Treasury.
- The General Counsel area provides legal and compliance support to help protect the reputation of Credit Suisse. It does so by giving legal and regulatory advice and providing employees with the tools and expertise to comply with applicable internal policies and external laws, rules and regulations.
- The Chief Risk Officer (CRO) area comprises strategic risk management, credit risk management, risk analytics and reporting, and operational risk oversight activities, which cooperate closely to maintain a strict risk control environment and to help ensure that our risk capital is deployed wisely.
- The Talent, Branding and Communications area comprises human resources, corporate communications, corporate branding and advertising. Human Resources strives to attract, retain and develop staff, while also creating a stimulating working environment for all employees. Corporate Communications provides support in media relations, crisis management, executive and employee communications, branding and corporate sponsorship.

Other functions providing corporate services include One Bank Collaboration and Public Policy. One Bank Collaboration facilitates cross-divisional collaboration initiatives throughout the Group and measures and controls collaboration revenues. Public Policy promotes and protects the interests of Credit Suisse and its reputation.

The Chief Executive Officers (CEOs) of the divisions and regions report directly to the Group CEO, and, together with

the CFO, CRO, General Counsel and Chief Talent, Branding and Communications Officer, they formed the Executive Board of Credit Suisse in 2012.

Our structure is designed to promote cross-divisional collaboration while leveraging resources and synergies within our four regions. The regions perform a number of essential functions to coordinate and support the global operations of the two divisions. On a strategic level, regions are responsible for corporate development and the establishment of regional business plans, projects and initiatives. They also have an oversight role in monitoring financial performance. Each region is responsible for the regulatory relationships within its boundaries, as well as for regulatory risk management and the resolution of significant issues in the region as a whole or its constituent countries. Other responsibilities include client and people leadership and the coordination of the delivery of Shared Services and business support in the region.

Market regions

Switzerland

Switzerland, our home market, represents a broad business portfolio. We employ 19,400 people in Switzerland. The Private Banking & Wealth Management division comprises our Wealth Management Clients, Corporate & Institutional Clients and Asset Management businesses. In Wealth Management Clients, we offer our clients a distinct value proposition combining a global reach with a structured advisory process and access to a broad range of sophisticated products and services tailored to different client groups, from private clients to UHNWI. In Corporate & Institutional Clients, we provide premium advice and solutions within a broad range of banking services, including lending, cash and liquidity management, trade finance, corporate finance, foreign exchange, investment solutions, ship and aviation finance, global custody and asset and liability management. Clients include SME, global corporations and commodity traders, banks and Swiss pension funds. Our Asset Management business has a market-leading position in the Swiss traditional business, and also offers a broad range of alternative investment products and multi-asset class solutions. The Investment Banking division offers a full range of financial services to its Swiss client base, holding market-leading positions in the Swiss debt and capital markets as well as in mergers and acquisition advisory.

EMEA

We are active in 30 countries across the EMEA region with 9,300 employees working in 75 offices. Our regional headquarters is in the UK, but we have an onshore presence in every major EMEA country. The EMEA region encompasses both developed markets, such as France, Germany, Italy, Spain and the UK, and emerging markets, including Russia, Poland, Turkey and the Middle East. We implemented our client-focused integrated strategy at the country level, serving corporate, government, institutional and private clients. Both divisions are strongly represented in the EMEA region, with the Investment Banking division providing a full spectrum of financial advisory services with strong market shares across many key products and markets.

Americas

We have operations in the US, Canada, the Caribbean and Latin America with 11,300 employees working in 42 cities spanning 14 countries. In the US, our emphasis is on our core client-focused and flow-based businesses in Investment Banking, and on building on the market share gains we have

achieved in a capital-efficient manner. In Private Banking & Wealth Management, we see considerable potential to leverage our cross-divisional capabilities, as we further develop our onshore wealth management platform in the US, Brazil and Mexico. In Latin America, particularly in our key markets of Brazil and Mexico, we continue to focus on providing clients with a full range of cross-divisional services.

Asia Pacific

Credit Suisse is present in 12 Asia Pacific markets with 7,400 employees, giving it one of the broadest footprints among international banks in the region. We have invested substantially in our presence in key major markets, including Australia, China, Hong Kong, Korea, Japan and India, broadened the scope of our offerings in countries where we have built a competitive advantage and continued to grow selected emerging markets franchises. Private Banking & Wealth Management has its principal centers in Singapore and Hong Kong, leveraging our Investment Banking activities to deliver integrated solutions and quality investment performance to clients.

Regulation and supervision

Overview

Our operations are regulated by authorities in each of the jurisdictions in which we have offices, branches and subsidiaries.

Central banks and other bank regulators, financial services agencies, securities agencies and exchanges and self-regulatory organizations are among the regulatory authorities that oversee our businesses. There is coordination among our primary regulators in Switzerland, the US and the UK.

The supervisory and regulatory regimes of the countries in which we operate determine to some degree our ability to expand into new markets, the services and products that we are able to offer in those markets and how we structure specific operations. We are in compliance with our regulatory requirements in all material respects and in compliance with regulatory capital requirements.

In response to the challenging market conditions beginning in 2007, regulators, including our primary regulators, have focused on reforming the regulatory framework for financial services firms. Some of the more significant recently proposed and enacted regulations, together with the principal regulatory structures that apply to our operations, are discussed below.

- ▶ Refer to "Risk factors" for further information on risks that may arise relating to regulation.

Recent regulatory developments and proposals

Governments and regulatory authorities around the world have responded to the financial crisis by proposing and enacting numerous reforms of the regulatory framework for financial services firms such as the Group. In particular, a number of reforms have been proposed and enacted by supranational organizations and in Switzerland, the US, the EU and the UK that could potentially have a material effect on our business. These regulatory developments could result in additional costs or limit or restrict the way we conduct our business. Although we expect regulatory-related costs and capital requirements for all major financial services firms (including the Group) to increase, we cannot predict the likely impact of proposed regulations on our businesses or results. We believe, however, that overall we are well positioned for regulatory reform, as we have reduced risk and maintained strong capital, funding and liquidity.

Basel framework

In an effort to strengthen the resilience of the banking sector, in December 2010, the BCBS issued the Basel III framework, with higher minimum capital requirements and conservation and countercyclical buffers, revised risk-based capital measures, a leverage ratio and liquidity standards. The new capital standards and capital buffers will require banks to hold more capital, mainly in the form of common equity. The new capital standards will be phased in from January 1, 2013 through year-end 2018 for those countries that have adopted Basel III. Prior to its issuance, the proposed BCBS framework was endorsed by the Group of Twenty Finance Ministers and Central Bank Governors (G-20) in November 2010. Each G-20 nation is expected to implement the rules, though any G-20 nation may vary how it implements the framework.

In December 2010, the BCBS issued the Basel III international framework for liquidity risk measurement, standards and monitoring. The Basel III framework includes a liquidity coverage ratio (LCR) and a net stable funding ratio (NSFR). The BCBS has stated that it will continue to review the effect of these liquidity standards on financial markets, credit extension and economic growth to address unintended consequences.

The LCR, which will be phased in beginning January 1, 2015 through January 1, 2019, following an observation period which began in 2011, addresses liquidity risk over a 30-day period. The LCR aims to ensure that banks have a stock of unencumbered high-quality liquid assets available to meet short-term liquidity needs under a severe stress scenario. The LCR is comprised of two components: the value of the stock of high-quality liquid assets in stressed conditions and the total net cash outflows calculated according to specified scenario parameters. The ratio of liquid assets over net cash outflows is subject to an initial minimum requirement of 60%, which will increase by 10% for four years, reaching 100% by January 1, 2019. In January 2013, in addition to introducing this phase-in period, the BCBS expanded certain categories of assets eligible as high quality liquid assets and adjusted the assumptions regarding cash outflows to better reflect actual reactions to stress.

The NSFR, which is expected to be introduced on January 1, 2018 following an observation period which began in 2012, establishes criteria for a minimum amount of stable funding based on the liquidity of a bank's assets and activities over a one-year horizon. The NSFR is a complementary measure to the LCR and is structured to ensure that illiquid assets are funded with an appropriate amount of stable long-term funds. The NSFR is defined as the ratio of available stable funding

over the amount of required stable funding and should always be at least 100%.

Under Basel III, the minimum common equity tier 1 (CET1) ratio will increase from 2% to 4.5% and will be phased in from January 1, 2013 through January 1, 2015. This CET1 ratio will have certain regulatory deductions and other adjustments to common equity that will be phased in from January 1, 2014 through January 1, 2018, including deduction of deferred tax assets for tax-loss carry-forwards, goodwill and intangibles and investments in banking and finance entities. In addition, increases in the tier 1 capital ratio from 4% to 6% will be phased in from January 1, 2013 through January 1, 2015.

Basel III also introduces an additional 2.5% CET1 requirement, known as a capital conservation buffer, to absorb losses in periods of financial and economic stress. Banks that do not maintain this buffer will be limited in their ability to pay dividends or make discretionary bonus payments or other earnings distributions. The capital conservation buffer will be phased in from January 1, 2016 through year-end 2018.

Basel III further provides for a countercyclical buffer that could require banks to hold up to an additional 2.5% of common equity or other capital that would be available to fully absorb losses. This requirement is expected to be imposed by national regulators where credit growth is deemed to be excessive and leading to the build-up of system-wide risk. This countercyclical buffer will be phased in from January 1, 2016 through year-end 2018.

Most capital instruments that do not meet the strict criteria for inclusion in the Basel III CET1 will be excluded beginning January 1, 2013. Capital instruments that would no longer qualify as tier 1 or tier 2 capital will be phased out over a 10-year period beginning January 1, 2013. In addition, instruments with an incentive to redeem prior to their stated maturity, if any, will be phased out at their effective maturity date, generally the date of the first step-up coupon.

The Basel III leverage ratio requirement introduces a non-risk based ratio that is calibrated to supplement the Basel III risk-based capital requirements and constrain the build-up of leverage in the banking sector. Broadly, the leverage ratio is defined as the relative amount of tier 1 capital to non-risk weighted assets and certain off-balance sheet exposures. The BCBS is testing a minimum leverage ratio of 3% during the period from January 1, 2013 to January 1, 2017.

In January 2011, the BCBS issued requirements to ensure that all classes of capital instruments fully absorb losses at the point of non-viability before taxpayers are exposed to loss. In order for a financial instrument issued by a bank to be included in additional tier 1 or tier 2 capital, it must meet the specified minimum requirements.

In November 2011, the BCBS issued final rules for global systemically important banks (G-SIBs) on loss absorbency requirements, which are in addition to Basel III requirements, reflecting the greater risk G-SIBs pose to the financial system. The additional requirements, to be phased in from January 1, 2016 through year-end 2018, are to be met with CET1 requirements ranging from 1% to 2.5%, depending on a bank's systemic importance, with an additional possible surcharge of 1% as a disincentive to a bank becoming even more systemically important. The Financial Stability Board has identified us as a G-SIB.

In February 2013, the BCBS and the International Organization of Securities Commissions (IOSCO) proposed global standards on margin requirements for non-centrally cleared derivatives. Under the proposal, margin requirements would be significantly higher than current market practice and could increase in times of market stress. The proposal would also cause market participants to be exposed to the risk of loss of larger amounts of posted collateral in the event a counterparty defaults. The proposal's margin requirements would be phased in beginning January 1, 2015. Larger market participants would be required to comply with the requirements before smaller participants.

Switzerland

As of January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. Together with the related implementing ordinances, the legislation includes capital, liquidity, leverage and large exposure requirements, and rules for emergency plans designed to maintain systemically relevant functions in the event of threatened insolvency. Certain requirements under the legislation, including those regarding capital, are to be phased in through year-end 2018.

The legislation on capital requirements builds on Basel III, but in respect of systemically relevant banks goes beyond its minimum standards, including requiring that we have common equity of at least 10% of RWA and contingent capital or other qualifying capital of up to 9% of RWA by January 1, 2019.

This new capital regime imposes on us three components of capital: (i) a basic capital requirement in common equity of 4.5% of RWA, (ii) a capital buffer equal to 8.5% of RWA, which would consist of at least 5.5% in the form of common equity and up to 3% in the form of contingent capital, including contingent convertible bonds, with a high trigger, and (iii) a progressive capital component of up to (and initially calibrated at) 6% of RWA, which may consist entirely of contingent capital with a lower trigger. The progressive capital component will increase or decrease based on our market share in

Switzerland and the size of our leverage exposures (which include balance sheet and off-balance sheet exposures). Furthermore, the Swiss Financial Market Supervisory Authority (FINMA) can grant capital rebates, if the overall resolvability of the bank is improved. Based on these parameters, FINMA will determine the progressive capital component requirements on an annual basis. A high trigger means the bonds are required to provide loss absorption through conversion into common equity or be written off in the event the CET1 ratio falls below 7%, and a low trigger means the bonds are required to convert into common equity or be written off in the event the CET1 ratio falls below 5%. These contingent capital instruments must comply with the Basel III minimum requirements for tier 2 capital (subordination, point-of-non-viability loss absorption and minimum tenor).

Also under the “Too Big to Fail” legislation, Swiss systemically relevant banks are required to provide a Recovery and Resolution Plan (RRP) to FINMA for approval, and must update the report at least annually. The “recovery” part of the RRP must outline recovery options available to a bank in various severe stress events, including those caused by idiosyncratic, systemic, capital or liquidity stress scenarios. The recovery plan’s purpose is to prepare for the survival of the bank in such stress scenarios. As part of the plan, a governance framework must be defined with clear escalation and decision points and may be based on existing capital and liquidity plans. The “resolution” part of the RRP is prepared by FINMA and describes how the bank can be unwound in an orderly fashion while ensuring the continuation of systemically relevant functions in Switzerland (including payment services and access to savings deposits) in the event of the bank’s impending insolvency.

In June 2012, the Swiss Federal Council adopted implementing ordinances under the “Too Big to Fail” legislation. Effective upon adoption, the ordinances imposed a supplemental countercyclical buffer of up to 2.5% of RWA that can be activated during periods of excess credit growth and subsequently deactivated by the Federal Council upon request of the SNB after consultation with FINMA. Also effective upon adoption were increased lending standards for new residential mortgages. The remaining June ordinance requirements became effective January 1, 2013, with some being phased in through the end of 2018.

In September 2012, the Swiss Parliament approved the portions of the ordinances specific to systemically relevant banks, including requirements regarding capital, leverage, large exposure and RRP. These requirements became effective January 1, 2013.

Under these ordinances, we must comply with an additional leverage ratio, applicable to Swiss systemically relevant

banks. This leverage ratio has to be at least 24% of the percentage points of each of the minimum, buffer and progressive capital requirements. Since the ratio is defined by reference to capital requirements subject to transitional arrangements, the new leverage ratio will be phased in from 2013 to 2018. The ratio is calculated as Swiss Core Capital plus high and low-trigger contingent capital divided by total exposure. Total exposure consists of balance sheet assets plus exposure additions including cash collateral netting reversals and off-balance sheet derivative exposures, guarantees and commitments.

In November 2012, the Swiss Federal Council adopted the liquidity ordinance (Liquidity Ordinance) that implements Basel III liquidity requirements into Swiss law. The Liquidity Ordinance requires appropriate management and monitoring of liquidity risks. In particular, banks must carry out stress tests and prepare an emergency concept for liquidity shortages. The requirements apply to all banks, but are tiered according to the type, complexity and degree of risk of a bank’s activities. The Liquidity Ordinance entered into force on January 1, 2013. It contains supplementary requirements for systemically relevant banks, including us, which are generally consistent with our existing June 2010 agreement with FINMA on the holding of liquidity. The supplementary requirements for systemically relevant banks are expected to be approved by the Federal Parliament during 2013. It is expected that the Liquidity Ordinance will be amended in 2014 to include final Basel III LCR rules and any related FINMA-specific requirements.

On February 13, 2013, the Swiss Federal Council decided to activate the countercyclical capital buffer based on the request of the SNB. This activation of the countercyclical buffer will require banks to hold additional capital in the amount of 1% of their RWA pertaining to mortgage loans that finance residential property in Switzerland beginning September 30, 2013.

Credit Suisse believes that it can meet the new requirements within the prescribed time frames by building capital through earnings, issuing contingent capital or other qualifying instruments and by managing its RWA and balance sheet exposures.

- Refer to “Liquidity and funding management” and “Capital management” in III – Treasury, Risk, Balance sheet and Off-balance sheet for further information regarding our current regulatory framework and expected changes to this framework affecting capital and liquidity standards.

In October 2012, FINMA published a new Banking Insolvency Ordinance–FINMA (Banking Insolvency Ordinance) that entered into force on November 1, 2012. The ordinance governs bankruptcy and resolution procedures of Swiss banks and

is based on the previously amended Swiss Federal Law on Banks and Savings Banks of November 8, 1934, as amended (Bank Law), to streamline the procedure for restructuring troubled banks and provide FINMA with significantly increased resolution authority. Instead of prescribing a particular resolution concept, the ordinance provides for various resolution tools from which FINMA may choose in any given case. Under the ordinance, FINMA may open resolution procedures, and if it decides to do so shall appoint a resolution authority (unless it assumes this role itself), and is required to approve a resolution plan for troubled banks. FINMA has discretion to take decisive action in the resolution of a bank, including by taking out existing shareholders, forcing a debt-to-equity swap, reducing a bank's credit claims, and staying or terminating finance contracts. The ordinance, however, requires that FINMA first cancel all equity capital and that all contingent convertible bonds (such as our Buffer Capital Notes) be converted into equity prior to ordering a debt-to-equity conversion or debt reduction. Taking any such measures with respect to debt instruments must be prioritized first to subordinated claims not qualifying as regulatory capital, then to other claims that are not excluded from conversion, and lastly to customer deposits in excess of privileged amounts.

On October 30, 2012, the Swiss Federal Supreme Court issued a decision in a case brought by a client of another bank seeking reimbursement of commissions paid to the client's bank by providers of investment products. The court ruled that such payments ("retrocessions") received in the context of a discretionary asset management mandate from issuers of investment products are owed to the client (including payments from intra-group companies) unless a client waiver is in place. FINMA subsequently issued a notice requiring all banks to inform potentially affected clients. We continue to evaluate the impact, if any, of this decision on our business.

On January 1, 2013, the bilateral tax agreements between Switzerland and each of the UK and Austria entered into force, allowing for the regularization of assets in Switzerland of UK and Austrian residents. Past assets are to be regularized through an anonymous one-off payment deducted by paying agents in Switzerland or by a bank client's voluntary disclosure to Austrian or British authorities, as applicable. Austrian and UK clients have two options to regularize their future investment income and capital gains: they can instruct the Swiss bank to either deduct a withholding tax from relevant income and gains (which will grant client anonymity) or report such income and gains to their home authorities. In December 2012, the bilateral tax agreement between Switzerland and Germany was rejected by the German government.

On December 19, 2012, the Swiss Federal Council adopted an overview of its financial market policy. The policy's

stated aims include combating financial crime by implementing the revised Financial Action Task Force recommendations and ensuring the competitiveness of Switzerland as a financial center. The Federal Council also reiterated its support for entering into withholding tax agreements, administrative and mutual assistance in line with international standards, and additional due diligence requirements for financial intermediaries as effective means to prevent tax abuses.

In its December 19, 2012 financial market policy overview, the Swiss Federal Council reiterated the importance of passing further financial market legislation deemed equivalent to certain EU regulations in order to facilitate access of Swiss financial services providers to the EU market. The Federal Council referenced the regulation on OTC Derivatives, Central Counterparties and Trade Repositories (also known as the European Market Infrastructure Regulation, or EMIR), which in March 2013 began to be phased in. Related Swiss draft legislation is expected by the second quarter of 2013. The Federal Council also referenced the proposed revisions to the existing EU Markets in Financial Instruments Directive (MiFID I) relating to increased investor protection. The proposals consist of a revised directive (MiFID II) and a new related regulation (MiFIR). If adopted as proposed by the European Commission, the MiFID II/MiFIR regime for granting access to EU markets for financial services providers based in third countries would require that Switzerland pass equivalent legislation and that Swiss financial services providers establish an EU branch. However, the impact of MiFID II/MiFIR even on "equivalent" third country financial services providers can only be assessed once MiFID II/MiFIR are finalized.

On February 1, 2013, the Swiss Tax Administrative Assistance Act entered into force. The Act governs administrative assistance in double taxation and other international agreements that Switzerland has entered into which provide for the exchange of information relating to tax matters consistent with Article 26 of the OECD Model Tax Convention. Under the new law, administrative assistance is no longer prohibited for group requests based on a behavioral pattern. However, so-called "fishing expeditions" are expressly prohibited. This new standard is generally applicable for periods beginning February 1, 2013.

On March 3, 2013, Swiss citizens approved the so-called "Minder Initiative" intended to strengthen shareholder rights. The initiative requires legislation be passed to impose board and executive compensation related requirements on Swiss public companies, including requiring a binding (rather than advisory) shareholder vote on total board and total executive management compensation and prohibiting severance payments, salary prepayments and payments related to the acquisition or disposal of companies. The initiative also provides

that the board members, the board chairperson and the compensation committee members be directly elected by shareholders annually. Further, the initiative calls for criminal sanctions in case of noncompliance. The Federal Council will have one year to issue a transitional ordinance which will be applicable until the Swiss Parliament passes the new law. Timing for the final implementation of the initiative is currently undetermined.

US

In July 2010, the US enacted the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act). Although the Dodd-Frank Act provides a broad framework for regulatory changes, implementation will require further detailed rulemaking over several years by different regulators, including the US Department of the Treasury (US Treasury), the US Federal Reserve (Fed), the US Securities and Exchange Commission (SEC), the Office of the Comptroller of the Currency (OCC), the Federal Deposit Insurance Corporation (FDIC), the Commodity Futures Trading Commission (CFTC) and the newly created Financial Stability Oversight Council (FSOC). Implementation of the Dodd-Frank Act and related final regulations could result in additional costs or limit or restrict the way we conduct our business, although uncertainty remains about many of the details, impact and timing of these reforms. These and other current reform proposals could potentially have a material effect on our businesses.

The Dodd-Frank Act will limit the ability of banking entities to sponsor or invest in certain private equity or hedge funds or to engage in certain types of proprietary trading in the US (the so-called "Volcker Rule"). In October 2011 and January 2012, US regulators issued proposed regulations to implement the Volcker Rule. The statutory provisions of the Volcker Rule became effective on July 21, 2012, and financial institutions subject to the Volcker Rule have two years from that date (with possible extensions) to bring their activities and investments into compliance. US regulators have not yet finalized implementing regulations for the Volcker Rule, and we do not know what changes to the proposed regulations they will make in the final rule. We have assessed how the proposed regulations would affect our businesses and have been developing and starting to implement plans to bring affected businesses into compliance with the regulations if issued as proposed. When the final regulations are issued, we will reevaluate the impact of the regulations on our businesses and will adjust our plans for compliance with the regulations to the extent required.

The Dodd-Frank Act also provides regulators with tools to impose greater capital, leverage and liquidity requirements and other prudential standards, particularly for financial institutions that pose significant systemic risk. In December 2012, the

Fed proposed a rule under the Dodd-Frank Act that would create a new framework for regulation of the US operations of foreign banking organizations. The proposal would require Credit Suisse to create a single US intermediate holding company (IHC) to hold all of its US subsidiaries; this would not apply to Credit Suisse AG's New York branch (New York Branch). The IHC would be subject to local risk-based capital and leverage requirements. In addition, both the IHC itself and the combined US operations of Credit Suisse (including the IHC and the New York Branch) would be subjected to other new prudential requirements, including with respect to liquidity risk management, separate liquidity buffers for each of the IHC and the New York Branch, limits on credit exposures to any single counterparty, stress testing, and other prudential standards. The combined US operations of Credit Suisse would also become subject to an early remediation regime which could be triggered by capital, leverage, stress tests, liquidity, risk management and market indicators. Under the proposal, the framework's prudential requirements and early remediation requirements would become effective on July 1, 2015. The Dodd-Frank Act furthermore creates an extensive framework for the regulation of OTC derivatives and requires broader regulation of hedge funds and private equity funds, as well as credit agencies.

The Dodd-Frank Act also establishes an "Orderly Liquidation Authority", a new regime for the orderly liquidation of systemically significant non-bank financial companies. To finance a resolution under this new regime, the FDIC may borrow funds from the US Treasury, which must be repaid from the proceeds of the resolution. If such proceeds are insufficient to repay the US Treasury in full, the FDIC is required to assess other large financial institutions, including those that have USD 50 billion or more in total consolidated assets, in an amount sufficient to repay all of the funds borrowed from the US Treasury in connection with the liquidation under the Orderly Liquidation Authority. In addition, the Fed and the FDIC approved final rules to implement the resolution plan requirement in the Dodd-Frank Act, which requires bank holding companies with total consolidated assets of USD 50 billion or more and certain designated non-bank financial firms to submit annually to the Fed and the FDIC resolution plans describing the strategy for rapid and orderly resolution under the US Bankruptcy Code or other applicable insolvency regimes, though such plans may not rely on the Orderly Liquidation Authority. Our initial resolution plan was submitted on July 1, 2012 and our first annual update will be due on July 1, 2013.

In addition, the Dodd-Frank Act requires issuers with listed securities to establish a claw-back policy to recoup erroneously awarded compensation in the event of an accounting

restatement, although it is currently unclear if this requirement will apply to foreign private issuers, like the Group.

The Dodd-Frank Act also grants the SEC discretionary rule-making authority to impose a new fiduciary standard on brokers, dealers and investment advisers and expands the extraterritorial jurisdiction of US courts over actions brought by the SEC or the US with respect to violations of the antifraud provisions in the Securities Act of 1933, Securities Exchange Act of 1934 and Investment Advisers Act of 1940.

In December 2011, the CFTC finalized rules under the Dodd-Frank Act requiring regulatory and public reporting for a wide range of OTC derivatives. In addition, during 2012 the CFTC finalized many of the rules under the Dodd-Frank Act relating to the regulation of swap dealers and major swap participants. Among other things, these rules require swap dealers and major swap participants to register with and be subject to internal and external business conduct regulation by the CFTC. The rules include both entity-level requirements that apply on a firm-wide basis, which include risk management, swap data repository and large trader reporting and capital requirements, and transaction-level requirements, which cover matters such as mandatory clearing of specified interest rate swaps and credit default swaps, swap processing, margin requirements, documentation, portfolio reconciliation and compression, real-time public reporting, daily trading records and external business conduct standards, and apply on a transaction-by-transaction basis.

On December 31, 2012, Credit Suisse International, the entity through which we conduct a majority of our swap trading business, registered with the CFTC as a swap dealer and became subject to these new rules. As a non-US swap dealer, Credit Suisse International is exempt on an interim basis from certain of these requirements pursuant to an exemptive order issued by the CFTC on December 21, 2012. In addition, the application of these rules to Credit Suisse International is subject to several industry-wide, temporary CFTC no-action letters intended to enable the industry to work through practical or technical challenges and interpretive uncertainties and develop the infrastructure necessary for compliance. If this relief expires prior to the development of that infrastructure by Credit Suisse International, this could cause significant disruptions in the entity's ability to trade OTC derivatives with US persons. Credit Suisse International also expects to apply to the CFTC for substituted compliance, which would allow Credit Suisse International to be deemed in compliance with certain CFTC rules through compliance with comparable European regulations. However, as the CFTC has not yet provided final guidance on how it will assess comparability and because not all of the comparable European regulations have been finalized, it is not yet clear which of these CFTC rules, if any,

would ultimately apply to Credit Suisse International. If substituted compliance is not permitted or is finalized in a manner less favorable than expected or the exemptive order expires without being renewed, Credit Suisse International could be subject to duplicative or conflicting requirements across multiple jurisdictions, which could cause significant disruptions, and cause it to incur additional costs and administrative burdens, in our OTC derivatives business.

While Credit Suisse currently does not intend to register any of its affiliates with the CFTC as a major swap participant, Credit Suisse has established a program for monitoring swap exposures to US persons for purposes of maintaining such exposures below the swap exposure threshold for major swap participant registration.

In addition, we expect the SEC to finalize its rules implementing the derivatives provisions of the Dodd-Frank Act during 2013. While the SEC's proposals have largely paralleled many of the CFTC's rules, significant differences between the final CFTC and SEC rules could materially increase the compliance costs associated with, and hinder the efficiency of, our equity and credit derivatives businesses with US persons. Significant differences between the SEC rules regarding capital, margin and segregation requirements for OTC derivatives and related CFTC rules could also have similar effects. In relation to these SEC and CFTC rules, we are in the process of developing and implementing the extensive technological, operational and compliance infrastructure that will be necessary for compliance with the rules.

The Foreign Account Tax Compliance Act (FATCA) became law in the US on March 18, 2010. The legislation requires Foreign Financial Institutions (FFIs) (such as Credit Suisse) to enter into an FFI agreement and agree to identify and provide the US Internal Revenue Service (IRS) with information on accounts held by US persons and certain US-owned foreign entities, or otherwise face 30% withholding tax on withholdable payments. In addition, FFIs that have entered into an FFI agreement will be required to withhold on such payments made to FFIs that have not entered into an FFI agreement, account holders who fail to provide sufficient information to classify an account as a US or non-US account, and US account holders who do not agree to the FFI reporting their account to the IRS. In 2012, the US Treasury expressed the intent to enter into intergovernmental agreements to implement the reporting and withholding tax provisions of FATCA. Following the issuance of the final US regulations in January 2013, Switzerland and the US signed such an agreement in February 2013 which will enable FFIs in Switzerland to comply with FATCA while remaining in compliance with Swiss law. Under the agreement, US authorities may ask Swiss authorities for administrative assistance in connection with group

requests where consent to provide information regarding potential US accounts is not provided to the FFI. In order for the terms of the agreement to apply to FFIs in Switzerland before FATCA enters into force on January 1, 2014, the agreement must be approved and ratified by the Swiss Parliament by such date. Complying with the required identification, withholding and reporting obligations requires significant investment in an FFI's compliance and reporting framework. We are continuing to follow developments regarding FATCA closely and are coordinating with all relevant authorities.

EU

The EU, the UK and other national European jurisdictions have also proposed and enacted a wide range of prudential, securities and governance regulations to address systemic risk and to further regulate financial institutions, products and markets. These proposals are at various stages of the EU pre-legislative, legislative and rule making processes, and their final form and cumulative impact remain uncertain. The final regulations could result in additional costs, limit or restrict the ways we conduct our businesses, and may potentially have a material effect on our businesses. We are assessing how the proposals would affect our various businesses and have been developing and are implementing plans to bring affected businesses into compliance with the regulations.

In October 2011, the European Commission issued legislative proposals for a new regulation on insider dealing and market manipulation (market abuse) and for a directive on criminal sanctions for insider dealing and market manipulation to update, strengthen and extend the scope of the existing market abuse framework. These proposals are expected to come into effect in late 2014 at the earliest.

In October 2011, the European Commission published its proposed revisions to the existing Markets in Financial Instruments Directive (known as MiFID I), consisting of the revised directive MiFID II and a new related regulation, MiFIR. The proposed revisions are to further strengthen the EU regulatory framework for the provision of investment services and trading in financial instruments. A number of substantial reforms are proposed on transaction reporting, market structure, securities trading and conduct of business rules, including new regulatory equivalence requirements for third country firms (such as Credit Suisse) in order for those firms to provide certain investment services in the EU. The MiFID II/MiFIR proposals are expected to be finalized and agreed by EU legislators by the third quarter of 2013 and to enter into effect in late 2014 at the earliest.

In March 2012, a regulation that bans uncovered sovereign CDS and restricts short selling of stocks and government bonds (known as the Short Selling Regulation) was adopted

by the EU. The regulation came into force on November 1, 2012.

In June 2012, the European Commission published a legislative proposal for a directive establishing a framework for the recovery and resolution of credit institutions and investment firms (known as the Bank Recovery and Resolution Directive). The framework will give national regulators wide-ranging powers to intervene where an entity is likely to fail in order to avoid adverse effects on wider financial stability. The directive also proposes to give regulators certain bank resolution powers, including the authority to sell the business, to transfer assets to a bridge institution, to transfer other assets to an asset management vehicle, and debt write-down (bail-in) solutions. Covered entities will also be required to have recovery plans approved by national regulators. Recovery plans will set out actions to be taken to return their financial condition to normal following a significant deterioration. In addition, national resolution authorities will be established and will prepare resolution plans proposing the manner in which an institution will be resolved in an orderly manner, were it to fail.

In the UK, the Financial Services Authority (FSA) is obliged to draw up rules on recovery and resolution plans under the Financial Services Act 2010. The rules are expected to incorporate the EU recovery and resolution proposals mentioned above. Covered entities will be required to have recovery plans similar to those proposed by the European Commission. In addition, they will be required to submit certain organizational data in order to allow the FSA and the Bank of England to draw up resolution plans. The FSA is expected to publish final rules in the near future. In 2012, Credit Suisse provided relevant information to UK regulatory authorities based on existing guidance.

In August 2012, EMIR entered into force. The regulation requires that certain standardized OTC derivatives contracts be centrally cleared and, where OTC transactions are not subject to central clearing, specified techniques are employed to monitor, measure and mitigate the operational and counterparty risks presented by those transactions. Further, market participants will be required to report any European derivative contract to a central trade repository. The phase-in of the EMIR requirements began in March 2013.

In September 2012, the European Commission published a proposal for a regulation that would empower the European Central Bank (ECB) as a single supervisor for banks in the 17 eurozone countries, a communication explaining its plans to create a European banking union, and a proposal for a regulation that would define the role of the European Banking Authority under the new supervisory arrangements. The Single Supervisory Mechanism designating the ECB as the lead prudential supervisor for certain eurozone banking groups was

agreed to by EU finance ministers in December 2012. The ECB is expected to assume its prudential supervisory duties during 2014.

In the UK, the Independent Commission on Banking (ICB) published a final report setting out certain recommendations designed to improve stability and competition in UK banking. Aspects of the proposals may also apply to UK banks which are subsidiaries of a non-UK bank group. The ICB recommendations include the enhancement of loss absorbing capacity of bank capital, the creation of a "retail ring fence" that would separate the taking of deposits from, and the provision of overdrafts to, individuals and small and medium-sized enterprises from a broad range of investment and other banking activities. The government introduced a banking reform bill to enact certain of the reforms proposed by the ICB report in the 2012-2013 parliamentary session, setting out details of how the ICB reforms will be implemented. The reforms are expected to be implemented in stages, with full implementation by 2019.

As a proposed EU-wide financial transaction tax was unsuccessful, a group of eleven EU member states (FTT-11) are expected to adopt such a tax applicable only for those countries under the EU enhanced cooperation procedure. If approved in the form released on February 14, 2013, the tax would apply to a wide range of financial transactions, including minimum rates of 0.01% for derivative products and 0.1% for other financial instruments. The tax would apply to transactions where either party is resident in one of the eleven participating countries or where a financial instrument is issued in one of those countries. To become effective, the proposed FTT-11 directive will require unanimous agreement of the 11 participating member states. The tax could come into effect as early as January 1, 2014. Where a participating member state already has a financial transaction tax in place, such as France and Italy, the FTT-11 tax would be expected to replace those existing national financial transaction tax regimes.

The Alternative Investment Fund Managers Directive (AIFMD) will enter into effect on July 22, 2013. AIFMD establishes a comprehensive regulatory and supervisory framework for alternative investment fund managers (AIFMs) operating in the EU. The directive increases transparency for investors and regulators and allows AIFMs to market funds to professional investors throughout the EU with the introduction of the "EU passport". Available from July 2013 to EU AIFMs and EU Alternative Investment Funds (AIFs), the EU passport is expected to be extended in 2015 to non-EU AIFMs and non-EU AIFs, which in the meantime will continue to access the EU market via the existing private placement regimes of the individual member states. AIFMD will also impose a new, strict

depository regime affecting how prime brokers may provide custody services to fund managers.

Regulatory framework

Switzerland

Although Credit Suisse Group is not a bank according to the Bank Law, and its Implementing Ordinance of May 17, 1972, as amended (Implementing Ordinance), the Group is required, pursuant to the provisions on consolidated supervision of financial groups and conglomerates of the Bank Law, to comply with certain requirements for banks, including with respect to capital adequacy, solvency and risk concentration on a consolidated basis and reporting obligations. Our banks in Switzerland are regulated by FINMA on a legal entity basis and, if applicable, on a consolidated basis.

Our banks in Switzerland operate under banking licenses granted by FINMA pursuant to the Bank Law and the Implementing Ordinance. In addition, certain of these banks hold securities dealer licenses granted by FINMA pursuant to the Swiss Federal Act of Stock Exchanges and Securities Trading (SESTA).

FINMA is the sole bank supervisory authority in Switzerland and is independent from the SNB. Under the Bank Law, FINMA is responsible for the supervision of the Swiss banking system. The SNB is responsible for implementing the government's monetary policy relating to banks and securities dealers and for ensuring the stability of the financial system. Under the "Too Big to Fail" legislation, the SNB is also responsible for determining which banks in Switzerland are systemically relevant banks and which functions are systemically relevant in Switzerland. The SNB has identified the Group as a systemically relevant bank.

Our banks in Switzerland are subject to close and continuous prudential supervision and direct audits by FINMA. Under the Bank Law, our banks are subject to inspection and supervision by an independent auditing firm recognized by FINMA, which is appointed by the bank's board of directors and required to perform annual audits of the bank's financial statements and to assess whether the bank is in compliance with laws and regulations, including the Bank Law, the Implementing Ordinance and FINMA regulations.

Under the Bank Law, a bank must maintain an adequate ratio between its capital resources and its total risk-weighted assets. This requirement applies to the Group on a consolidated basis. For purposes of complying with Swiss capital requirements, bank regulatory capital is divided into tier 1 and tier 2 capital.

Our regulatory capital is calculated on the basis of accounting principles generally accepted in the US (US GAAP), with certain adjustments required by, or agreed with, FINMA.

The Group became subject to international capital adequacy standards known as [Basel II](#) on January 1, 2008, subject to certain additional requirements for large banks under the then existing Capital Adequacy Ordinance and as set forth by FINMA. In November 2008, we agreed to a decree issued by FINMA requiring that we comply with new capital adequacy ratios, in lieu of those certain additional requirements under the Capital Adequacy Ordinance, and leverage capital requirements by 2013. The capital adequacy target is a range between 50% and 100% above the Pillar I requirements under Basel II. In addition, the decree includes leverage limits that require us to maintain by 2013 a minimum leverage ratio of tier 1 capital to total adjusted average assets (on a non-risk-weighted basis) of 3% at the Group and Bank consolidated level and 4% at the Bank on an unconsolidated basis by 2013. Total assets are adjusted for purposes of calculating the leverage ratio, and adjustments relate to assets from Swiss lending activities and assets excluded in determining regulatory core capital. These requirements were intended to be counter-cyclical, with the expected capital adequacy target level 100% above the Pillar I requirements, and a leverage ratio above the minimum 3% or 4%, during good times. We will remain subject to these various requirements up until higher requirements under the "Too Big to Fail" legislation are phased in. The requirements under "Too Big to Fail" are being phased in beginning January 1, 2013.

Banks are required to maintain a specified liquidity standard pursuant to the new Liquidity Ordinance. These rules continue to be based on the liquidity principles earlier agreed with FINMA and require that we have adequate holdings of liquid, unencumbered, high-quality securities available in a crisis situation for designated periods of time. The crisis scenario assumptions include global market dislocation, large on and off-balance sheet outflows, no access to unsecured wholesale funding markets, a significant withdrawal of deposits, varying access to secured market funding and the impacts from fears of insolvency. The principles aim to ensure we can meet our financial obligations in an extreme scenario for a minimum of 30 days. The principles take into consideration quantitative and qualitative factors and require us to address the possibility of emergency funding costs as we manage our capital and business and call for additional reporting to FINMA. The principles are expected to be modified in the future to reflect the final [Basel III](#) liquidity requirements and specific FINMA requirements.

► Refer to "Liquidity and funding management" and "Capital management" in III – Treasury, Risk, Balance sheet and Off-balance sheet for further information regarding our current regulatory framework and expected changes to this framework affecting capital and liquidity standards.

Under Swiss banking law, banks and securities dealers are required to manage risk concentration within specific limits. Aggregated credit exposure to any single counterparty or a group of related counterparties must bear an adequate relationship to the bank's core tier 1 capital, taking into account counterparty risks and [risk mitigation instruments](#).

Under the Bank Law and SESTA, Swiss banks and securities dealers are obligated to keep confidential the existence and all aspects of their relationships with customers. These customer confidentiality laws do not, however, provide protection with respect to criminal offenses such as insider trading, money laundering, terrorist financing activities, tax fraud or evasion or prevent the disclosure of information to courts and administrative authorities.

Swiss rules and regulations to combat money laundering and terrorist financing are comprehensive and require banks and other financial intermediaries to thoroughly verify and document customer identity before commencing business. In addition, these rules and regulations include obligations to maintain appropriate policies for dealings with politically exposed persons and procedures and controls to detect and prevent money laundering and terrorist financing activities, including reporting suspicious activities to authorities.

Our securities dealer activities in Switzerland are conducted primarily through the Bank and are subject to regulation under SESTA, which regulates all aspects of the securities dealer business in Switzerland, including regulatory capital, risk concentration, sales and trading practices, record-keeping requirements and procedures and periodic reporting procedures. Securities dealers are supervised by FINMA.

Our asset management activities in Switzerland, which include the establishment and administration of mutual funds registered for public distribution, are conducted under the supervision of FINMA.

Since January 1, 2010, compensation design and its implementation and disclosure must comply with standards promulgated by FINMA under its Circular on Remuneration Schemes.

US

Our banking operations are subject to extensive federal and state regulation and supervision in the US. Our direct US offices are composed of our New York Branch and representative offices in California. Each of these offices is licensed

with, and subject to examination and regulation by, the state banking authority in the state in which it is located.

Effective October 3, 2011, the New York State Banking Department and the New York State Insurance Department were abolished and the authority of both former agencies was transferred to a new Department of Financial Services, whose head is the Superintendent of Financial Services (Superintendent). The New York Branch is licensed by the Superintendent, examined by the New York State Department of Financial Services, and subject to laws and regulations applicable to a foreign bank operating a New York branch. Under the New York Banking Law, the New York Branch must maintain eligible assets with banks in the state of New York. The amount of eligible assets required, which is expressed as a percentage of third-party liabilities, would increase if the New York Branch is no longer designated well rated by the Superintendent.

The New York Banking Law authorizes the Superintendent to seize our New York Branch and all of our business and property in New York State (which includes property of the New York Branch, wherever it may be located, and all of our property situated in New York State) under circumstances generally including violations of law, unsafe or unsound practices or insolvency. In liquidating or dealing with the New York Branch's business after taking possession, the Superintendent would only accept for payment the claims of depositors and other creditors (unaffiliated with us) that arose out of transactions with the New York Branch. After the claims of those creditors were paid out of the business and property of the Bank in New York, the Superintendent would turn over the remaining assets, if any, to us or our liquidator or receiver. Under New York Banking Law, the New York Branch is generally subject to single borrower lending limits expressed as a percentage of the worldwide capital of the Bank.

Our operations are also subject to reporting and examination requirements under US federal banking laws. Our US non-banking operations are subject to examination by the Fed in its capacity as our US umbrella supervisor. The New York Branch is also subject to examination by the Fed and is subject to Fed requirements and limitations on the acceptance and maintenance of deposits. Because the New York Branch does not engage in retail deposit taking, it is not a member of, and its deposits are not insured by, the FDIC.

US federal banking laws provide that a state-licensed branch (such as the New York Branch) or agency of a foreign bank may not, as a general matter, engage as principal in any type of activity that is not permissible for a federally licensed branch or agency of a foreign bank unless the Fed has determined that such activity is consistent with sound banking practice. US federal banking laws also subject a state branch or

agency to single borrower lending limits based on the capital of the entire foreign bank. Under the Dodd-Frank Act, lending limits will take into account credit exposure arising from derivative transactions, securities borrowing and lending transactions and repurchase and reverse repurchase agreements with counterparties. The OCC published an interim final lending limit rule implementing the Dodd-Frank Act changes in June 2012. Under the interim rule, banks have until July 1, 2013 to comply with the changes directed by the Dodd-Frank Act, unless the compliance date is extended. In addition, regulations which the FSOC and the Fed may adopt could affect the nature of the activities which the Bank (including the New York Branch) may conduct, and may impose restrictions and limitations on the conduct of such activities.

The Fed may terminate the activities of a US branch or agency of a foreign bank if it finds that the foreign bank: (i) is not subject to comprehensive supervision in its home country; (ii) has violated the law or engaged in an unsafe or unsound banking practice in the US; or (iii) for a foreign bank that presents a risk to the stability of the US financial system, the home country of the foreign bank has not adopted, or made demonstrable progress toward adopting, an appropriate system of financial regulation to mitigate such risk.

A major focus of US policy and regulation relating to financial institutions has been to combat money laundering and terrorist financing. These laws and regulations impose obligations to maintain appropriate policies, procedures and controls to detect, prevent and report money laundering and terrorist financing, verify the identity of customers and comply with economic sanctions. Any failure to maintain and implement adequate programs to combat money laundering and terrorist financing, and violations of such economic sanctions, laws and regulations, could have serious legal and reputational consequences. We take our obligations to prevent money laundering and terrorist financing in the US and globally very seriously, while appropriately respecting and protecting the confidentiality of clients. We have policies, procedures and training intended to ensure that our employees comply with "know your customer" regulations and understand when a client relationship or business should be evaluated as higher risk for us.

Credit Suisse Group and the Bank became financial holding companies for purposes of US federal banking law in 2000 and, as a result, may engage in a broad range of non-banking activities in the US, including insurance, securities, private equity and other financial activities, in each case subject to regulatory requirements and limitations. Credit Suisse Group is still required to obtain the prior approval of the Fed (and potentially other US banking regulators) before acquiring, directly or indirectly, the ownership or control of more than 5% of any class of voting shares of (or otherwise controlling) any

US bank, bank holding company or many other US depository institutions and their holding companies, and as a result of the Dodd-Frank Act, before making certain acquisitions involving large non-bank companies. The New York Branch is also restricted from engaging in certain tying arrangements involving products and services, and in certain transactions with certain of its affiliates. If Credit Suisse Group or the Bank ceases to be well-capitalized or well-managed under applicable Fed rules, or otherwise fails to meet any of the requirements for financial holding company status, it may be required to discontinue certain financial activities or terminate its New York Branch. Credit Suisse Group's ability to undertake acquisitions permitted by financial holding companies could also be adversely affected.

Our US-based broker-dealers are subject to extensive regulation by US regulatory authorities. The SEC is the federal agency primarily responsible for the regulation of broker-dealers, investment advisers and investment companies, while the CFTC is the federal agency primarily responsible for the regulation of futures commission merchants, commodity pool operators and commodity trading advisors. With the effectiveness of the Dodd-Frank Act, these CFTC registration categories have been expanded to include persons engaging in a relevant activity with respect to swaps. In addition, the US Treasury has the authority to promulgate rules relating to US Treasury and government agency securities, the Municipal Securities Rule-making Board (MSRB) has the authority to promulgate rules relating to municipal securities, and the MSRB also promulgates regulations applicable to certain securities credit transactions. In addition, broker-dealers are subject to regulation by securities industry self-regulatory organizations, including the Financial Industry Regulation Authority (FINRA), and by state securities authorities. For futures and swap activities, broker-dealers are subject to futures industry self-regulatory organizations such as the National Futures Association (NFA).

Our US broker-dealers are registered with the SEC and in all 50 states, the District of Columbia, Puerto Rico and the US Virgin Islands, and our US futures commission merchants, commodity pool operators and commodity trading advisors are registered with the CFTC. Our US registered entities are subject to extensive regulatory requirements that apply to all aspects of their securities and futures activities, including: capital requirements; the use and safekeeping of customer funds and securities; the suitability of customer investments; record-keeping and reporting requirements; employee-related matters; limitations on extensions of credit in securities transactions; prevention and detection of money laundering and terrorist financing; procedures relating to research analyst independence; procedures for the clearance and settlement of trades; and communications with the public.

Our US broker-dealers are also subject to the SEC's net capital rule, which requires broker-dealers to maintain a specified level of minimum net capital in relatively liquid form. Compliance with the net capital rule could limit operations that require intensive use of capital, such as underwriting and trading activities and the financing of customer account balances and also could restrict our ability to withdraw capital from our broker-dealers. Our US broker-dealers are also subject to the net capital requirements of FINRA and, in some cases, other self-regulatory organizations.

Certain of our US broker-dealers are also registered as futures commission merchants and subject to the capital and other requirements of the CFTC and the NFA.

Our securities and asset management businesses include legal entities registered and regulated as a broker-dealer and investment adviser by the SEC. The SEC-registered mutual funds that we advise are subject to the Investment Company Act of 1940. For pension fund customers, we are subject to the Employee Retirement Income Security Act of 1974 and similar state statutes. We are subject to the Commodity Exchange Act for investment vehicles we advise that are commodity pools.

Credit Suisse International is registered with the CFTC as a swap dealer as a result of its swap activities with US persons and is therefore subject to reporting, record-keeping, swap confirmation, swap portfolio compression, clearing and certain business conduct requirements under the Dodd-Frank Act, and will become subject to electronic trading, additional business conduct, swap trading relationship documentation, portfolio reconciliation and margin requirements under the Dodd-Frank Act when they go into effect later in 2013.

EU

Since it was announced in 1999, the EU's Financial Services Action Plan has given rise to numerous measures (both directives and regulations) aimed at increasing integration and harmonization in the European market for financial services. While regulations have immediate and direct effect in member states, directives must be implemented through national legislation. As a result, the terms of implementation of directives are not always consistent from country to country. In response to the financial crisis and in order to strengthen European supervisory arrangements, the EU established the European Systemic Risk Board, which has macro-prudential oversight of the financial system. The EU has also established three supervisory authorities responsible for promoting greater harmonization and consistent application of EU legislation by national regulators: the European Banking Authority, the European Securities and Markets Authority and the European Insurance and Occupational Pensions Authority.

The Capital Requirements Directive (CRD), implemented in various EU countries including the UK, applies the Basel II capital framework for banking groups operating in the EU. The CRD has been amended by CRD II, which governs own funds, large exposures, supervisory arrangements, qualitative standards for liquidity risk management and securitization, and which came into force on December 31, 2010, and by CRD III, which governs both the disclosure and content of remuneration policies, effective January 1, 2011, and capital requirements for trading books and re-securitizations and disclosure of securitization exposures, effective December 31, 2011. Further reforms are proposed by CRD IV which, once enacted, will replace the current CRD directive with new measures implementing the Basel III requirements, as well as creating a single harmonized prudential rule book for banks, introducing new corporate governance and a limited number of additional remuneration requirements, including an expected cap on variable remuneration, and enhancing the powers of regulators. CRD IV is expected to come into force some time in 2014.

The existing Markets in Financial Instruments Directive (MiFID I) establishes high-level organizational and business conduct standards that apply to all investment firms. These include standards for managing conflicts of interest, best execution, enhanced investor protection, including client classification, and the requirement to assess suitability and appropriateness in providing investment services to clients. MiFID I sets standards for regulated markets (i.e. exchanges) and multilateral trading facilities, and sets out pre-trade and post-trade price transparency requirements for equity trading. MiFID I also sets standards for the disclosure of fees and other payments received from or paid to third parties in relation to investment advice and services and regulates investment services relating to commodity derivatives. In relation to these and other EU-based investment services and activities, MiFID I introduced a "passport" for investment firms, enabling them to conduct cross-border activities and establish branches throughout the EU on the basis of authorization from their home state regulator.

UK

The UK FSA is the principal statutory regulator of financial services activity in the UK, deriving its powers from the Financial Services and Markets Act 2000 (FSMA). The FSA regulates banking, insurance, investment business and the activities of mortgage intermediaries. The FSA generally adopts a risk-based approach, supervising all aspects of a firm's business, including capital resources, systems and controls and management structures, the conduct of its business, anti-money laundering and staff training. The FSA has wide investigatory and enforcement powers, including the power to

require information and documents from financial services businesses, appoint investigators, apply to the court for injunctions or restitution orders, prosecute criminal offenses, impose financial penalties, issue public statements or censures and vary, cancel or withdraw authorizations it has granted. In June 2010, the UK government announced that the FSA will be replaced by three new agencies: the Prudential Regulation Authority, a subsidiary of the Bank of England, which will be responsible for the micro-prudential regulation of banks and larger investment firms; the Financial Conduct Authority, which will regulate markets, the conduct of business of all financial firms, and the prudential regulation of firms not regulated by the Prudential Regulation Authority; and the Financial Policy Committee of the Bank of England, which will be responsible for macro-prudential regulation. The FSA will officially transition fully to these successor supervisory entities in April 2013.

As a member state of the EU, the UK is required to implement EU directives into national law. The regulatory regime for banks operating in the UK conforms to required EU standards including compliance with capital adequacy standards, customer protection requirements, conduct of business rules and anti-money laundering rules. These standards, requirements and rules are similarly implemented, under the same directives, throughout the other member states of the EU in which we operate.

The London branch of Credit Suisse AG (London Branch), Credit Suisse International and Credit Suisse (UK) Limited are authorized to take deposits. We also have a number of entities authorized to conduct investment business and asset management activities. In deciding whether to grant authorization, the FSA must first determine whether a firm satisfies the threshold conditions for authorization, which includes suitability and the requirement for the firm to be fit and proper. In addition to regulation by the FSA, certain wholesale money markets activities are subject to the Non-Investment Products Code, a voluntary code of conduct published by the Bank of England which FSA-regulated firms are expected to follow when conducting wholesale money market business.

The London Branch will be required to continue to comply principally with Swiss home country regulation. However, as a response to the global financial crisis, the FSA made changes to its prudential supervision rules in its Handbook of Rules and Guidance, applying a principle of "self-sufficiency", such that Credit Suisse International, Credit Suisse Securities (Europe) Limited and Credit Suisse (UK) Limited are required to maintain adequate liquidity resources, under the day-to-day supervision of the entity's senior management, held in a custodian account in the name of the entity, unencumbered and attributed to the entity balance sheet. In addition, the FSA requires Credit Suisse International, Credit Suisse Securities (Europe)

Limited and Credit Suisse (UK) Limited to maintain a minimum capital ratio and to monitor and report large exposures in accordance with the rules implementing the CRD.

Our London bank and broker-dealer subsidiaries and asset management companies are authorized under the FSMA and are subject to regulation by the FSA. In deciding whether to authorize an investment firm in the UK, the FSA will consider the threshold conditions, which includes suitability and the general requirement for a firm to be fit and proper. The FSA is responsible for regulating most aspects of an investment firm's business, including its regulatory capital, sales and trading practices, use and safekeeping of customer funds and securities, record-keeping, margin practices and procedures, registration standards for individuals carrying on certain functions, anti-money laundering systems and periodic reporting and settlement procedures.

On January 1, 2011, the FSA implemented the requirements of CRD III, including requiring certain investment firms not headquartered in the European Economic Area, in respect of their UK operations, to have remuneration policies, procedures and practices that are consistent with and promote sound and effective risk management. CRD IV proposes further changes to banks' remuneration policies, and is expected to be passed into law some time in 2014.

On January 1, 2011, a levy attributable to the UK operations of large banks on certain funding came into effect. During 2012, the levy was 8.8 basis points for short-term liabilities and 4.4 basis points for long-term equity and liabilities. The levy increased on January 1, 2013 to 13 basis points and 6.5 basis points, respectively.

Risk factors

Our businesses are exposed to a variety of risks that could adversely affect our results of operations and financial condition, including, among others, those described below.

Liquidity risk

Liquidity, or ready access to funds, is essential to our businesses, particularly our Investment Banking business. We maintain available liquidity to meet our obligations in a stressed liquidity environment.

- ▶ Refer to “Liquidity and funding management” in III – Treasury, Risk, Balance sheet and Off-balance sheet for information on our liquidity management.

Our liquidity could be impaired if we were unable to access the capital markets or sell our assets, and we expect our liquidity costs to increase

Our ability to borrow on a secured or unsecured basis and the cost of doing so can be affected by increases in interest rates or credit spreads, the availability of credit, regulatory requirements relating to liquidity or the market perceptions of risk relating to us or the banking sector, including our perceived or actual creditworthiness. An inability to obtain financing in the unsecured long-term or short-term debt capital markets, or to access the secured lending markets, could have a substantial adverse effect on our liquidity. In challenging credit markets, our funding costs may increase or we may be unable to raise funds to support or expand our businesses, adversely affecting our results of operations. Following the financial crisis in 2008 and 2009, our costs of liquidity have remained high and we expect to incur additional costs as a result of regulatory requirements for increased liquidity and the challenging economic environment in Europe, the US and elsewhere.

If we are unable to raise needed funds in the capital markets, we may need to liquidate unencumbered assets to meet our liabilities. In a time of reduced liquidity, we may be unable to sell some of our assets, or we may need to sell assets at depressed prices, which in either case could adversely affect our results of operations and financial condition.

Our businesses rely significantly on our deposit base for funding

Our businesses benefit from short-term funding sources, including primarily demand deposits, inter-bank loans, time deposits and cash bonds. Although deposits have been, over time, a stable source of funding, this may not continue. In that case, our liquidity position could be adversely affected and we

might be unable to meet deposit withdrawals on demand or at their contractual maturity, to repay borrowings as they mature or to fund new loans, investments and businesses.

Changes in our ratings may adversely affect our business

Ratings are assigned by rating agencies. They may lower, indicate their intention to lower or withdraw their ratings at any time. The major rating agencies remain focused on the financial services industry, particularly on uncertainties as to whether firms that pose systemic risk would receive government or central bank support in a financial or credit crisis, and on such firms' potential vulnerability to market sentiment and confidence, particularly during periods of severe economic stress. For example, in June 2012, following a review of seventeen of the world's largest banks, Moody's Investor Services lowered its ratings of fifteen of those banks, including lowering Credit Suisse's credit rating by three notches. Further downgrades in our assigned ratings, including in particular our credit ratings, could increase our borrowing costs, limit our access to capital markets, increase our cost of capital and adversely affect the ability of our businesses to sell or market their products, engage in business transactions – particularly longer-term and derivatives transactions – and retain our clients.

Market risk

We may incur significant losses on our trading and investment activities due to market fluctuations and volatility

Although we continued to reduce our balance sheet and accelerated the implementation of our client-focused, capital-efficient strategy in 2012, we continue to maintain large trading and investment positions and hedges in the debt, currency and equity markets, and in private equity, hedge funds, real estate and other assets. These positions could be adversely affected by volatility in financial and other markets, that is, the degree to which prices fluctuate over a particular period in a particular market, regardless of market levels. To the extent that we own assets, or have net long positions, in any of those markets, a downturn in those markets could result in losses from a decline in the value of our net long positions. Conversely, to

the extent that we have sold assets that we do not own or have net short positions in any of those markets, an upturn in those markets could expose us to potentially significant losses as we attempt to cover our net short positions by acquiring assets in a rising market. Market fluctuations, downturns and volatility can adversely affect the fair value of our positions and our results of operations. Adverse market or economic conditions or trends have caused, and in the future may cause, a significant decline in our net revenues and profitability.

Our businesses are subject to the risk of loss from adverse market conditions and unfavorable economic, monetary, political, legal and other developments in the countries we operate in around the world

As a global financial services company, our businesses are materially affected by conditions in the financial markets and economic conditions generally in Europe, the US and elsewhere around the world. The recovery from the economic crisis of 2008 and 2009 continues to be sluggish in several key developed markets. Additionally, the European sovereign debt crisis, as well as concerns over US debt levels and the federal budget process that led to the first downgrade of US sovereign debt in the modern era, have not been permanently resolved. Our financial condition and results of operations could be materially adversely affected if these conditions do not improve, or if they stagnate or worsen. Further, various countries in which we operate or invest have experienced severe economic disruptions particular to that country or region, including extreme currency fluctuations, high inflation, or low or negative growth, among other negative conditions. In 2012, concerns about weaknesses in the economic and fiscal condition of certain European countries, including Greece, Ireland, Italy, Portugal and Spain, continued, especially with regard to how such weaknesses might affect other economies as well as financial institutions (including Credit Suisse) which lent funds to or did business with or in those countries. Continued concern about the European sovereign debt crisis could cause disruptions in market conditions in Europe and around the world. There is always the chance that economic disruption in other countries, even in countries in which we do not currently conduct business or have operations, will adversely affect our businesses and results.

Adverse market and economic conditions continue to create a challenging operating environment for financial services companies. In particular, the impact of interest and foreign currency exchange rates, the risk of geopolitical events, fluctuations in commodity prices, the European sovereign debt crisis and the US federal debt crisis have affected financial markets and the economy. In recent years, movements in interest

rates have affected our net interest income and the value of our trading and non-trading fixed income portfolios. In addition, movements in equity markets, together with lower industry-wide capital issuance levels, have affected the value of our trading and non-trading equity portfolios, while the strength of the Swiss franc has adversely affected our revenues and net income.

Such adverse market or economic conditions may reduce the number and size of investment banking transactions in which we provide underwriting, mergers and acquisitions advice or other services and, therefore, may adversely affect our financial advisory and underwriting fees. Such conditions may adversely affect the types and volumes of securities trades that we execute for customers and may adversely affect the net revenues we receive from commissions and spreads. In addition, several of our businesses engage in transactions with, or trade in obligations of, governmental entities, including super-national, national, state, provincial, municipal and local authorities. These activities can expose us to enhanced sovereign, credit-related, operational and reputational risks, including the risks that a governmental entity may default on or restructure its obligations or may claim that actions taken by government officials were beyond the legal authority of those officials, which could adversely affect our financial condition and results of operations.

Unfavorable market or economic conditions have affected our businesses over the last few years, including the low interest rate environment, continued cautious investor behavior, lower industry-wide capital issuance levels, and subdued mergers and acquisitions activity. These negative factors have been reflected in lower commissions and fees from our client-flow sales and trading and asset management activities, including commissions and fees that are based on the value of our clients' portfolios. Investment performance that is below that of competitors or asset management benchmarks could result in a decline in assets under management and related fees and make it harder to attract new clients. In light of the continued dislocation in the financial and credit markets, there has been a fundamental shift in client demand away from more complex products and significant client deleveraging, and our Private Banking & Wealth Management division's results of operations have been and could continue to be adversely affected as long as this continues.

Adverse market or economic conditions have also negatively affected our private equity investments since, if a private equity investment substantially declines in value, we may not receive any increased share of the income and gains from such investment (to which we are entitled in certain cases when the return on such investment exceeds certain threshold returns), may be obligated to return to investors previously

received excess carried interest payments and may lose our pro rata share of the capital invested. In addition, it could become more difficult to dispose of the investment, as even investments that are performing well may prove difficult to exit in weak IPO markets.

In addition to the macroeconomic factors discussed above, other events beyond our control, including terrorist attacks, military conflicts, economic or political sanctions, disease pandemics, political unrest or natural disasters could have a material adverse effect on economic and market conditions, market volatility and financial activity, with a potential related effect on our businesses and results.

We may incur significant losses in the real estate sector

We finance and acquire principal positions in a number of real estate and real estate-related products, primarily for clients, and originate loans secured by commercial and residential properties. As of December 31, 2012, our real estate loans (as reported to the SNB) totaled approximately CHF 133 billion. We also securitize and trade in commercial and residential real estate and real estate-related whole loans, mortgages, and other real estate and commercial assets and products, including ◉commercial and ◉residential mortgage-backed securities. Our real estate-related businesses and risk exposures could continue to be adversely affected by the downturn in real estate markets, other sectors and the economy as a whole. In particular, the risk of potential price corrections in the real estate market in certain areas of Switzerland could have a material adverse effect on our real estate-related businesses.

Holding large and concentrated positions may expose us to large losses

Concentrations of risk could increase losses, given that we have sizeable loans to, and securities holdings in, certain customers, industries or countries. Decreasing economic growth in any sector in which we make significant commitments, for example, through underwriting, lending or advisory services, could also negatively affect our net revenues.

We have significant risk concentration in the financial services industry as a result of the large volume of transactions we routinely conduct with broker-dealers, banks, funds and other financial institutions, and in the ordinary conduct of our business we may be subject to risk concentration with a particular counterparty. We, like other financial institutions, continue to adapt our practices and operations in consultation with our regulators to better address an evolving understanding of our exposure to, and management of, systemic risk and risk concentration to financial institutions. Regulators continue to focus on these risks, and there are numerous new regulations

and government proposals, and significant ongoing regulatory uncertainty, about how best to address them. There can be no assurance that the changes in our industry, operations, practices and regulation will be effective in managing this risk.

► Refer to “Regulation and supervision” for further information.

Risk concentration may cause us to suffer losses even when economic and market conditions are generally favorable for others in our industry.

Our hedging strategies may not prevent losses

If any of the variety of instruments and strategies we use to hedge our exposure to various types of risk in our businesses is not effective, we may incur losses. We may be unable to purchase hedges or be only partially hedged, or our hedging strategies may not be fully effective in mitigating our risk exposure in all market environments or against all types of risk.

Market risk may increase the other risks that we face

In addition to the potentially adverse effects on our businesses described above, market risk could exacerbate the other risks that we face. For example, if we were to incur substantial trading losses, our need for liquidity could rise sharply while our access to liquidity could be impaired. In conjunction with another market downturn, our customers and counterparties could also incur substantial losses of their own, thereby weakening their financial condition and increasing our credit and counterparty risk exposure to them.

Credit risk

We may suffer significant losses from our credit exposures

Our businesses are subject to the fundamental risk that borrowers and other counterparties will be unable to perform their obligations. Our credit exposures exist across a wide range of transactions that we engage in with a large number of clients and counterparties, including lending relationships, commitments and letters of credit, as well as derivative, foreign exchange and other transactions. Our exposure to credit risk can be exacerbated by adverse economic or market trends, as well as increased volatility in relevant markets or instruments. In addition, disruptions in the liquidity or transparency of the financial markets may result in our inability to sell, syndicate or realize the value of our positions, thereby leading to increased concentrations. Any inability to reduce these positions may not only increase the market and credit risks associated with such positions, but also increase the level of risk-

weighted assets on our balance sheet, thereby increasing our capital requirements, all of which could adversely affect our businesses.

- ▶ Refer to "Credit risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management for information on management of credit risk.

Management's determination of the provision for loan losses is subject to significant judgment. Our banking businesses may need to increase their provisions for loan losses or may record losses in excess of the previously determined provisions if our original estimates of loss prove inadequate, which could have a material adverse effect on our results of operations.

- ▶ Refer to "Credit risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management and "Note 1 – Summary of significant accounting policies", "Note 10 – Provision for credit losses" and "Note 18 – Loans, allowance for loan losses and credit quality" in V – Consolidated financial statements – Credit Suisse Group for information on provisions for loan losses and related risk mitigation.

Our regular review of the creditworthiness of clients and counterparties for credit losses does not depend on the accounting treatment of the asset or commitment. Changes in creditworthiness of loans and loan commitments that are  fair valued are reflected in trading revenues.

We have experienced in the past, and may in the future experience, pressure to assume longer-term credit risk, extend credit against less liquid collateral and price derivative instruments more aggressively based on the credit risks that we take due to competitive factors. We expect our capital and liquidity requirements, and those of the financial services industry, to increase as a result of these risks.

Defaults by a large financial institution could adversely affect financial markets generally and us specifically

Concerns or even rumors about or a default by one institution could lead to significant liquidity problems, losses or defaults by other institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships between institutions. This risk is sometimes referred to as systemic risk. Concerns about defaults by and failures of many financial institutions, particularly those with significant exposure to the eurozone, continued in 2012 and could continue to lead to losses or defaults by financial institutions and financial intermediaries with which we interact on a daily basis, such as clearing agencies, clearing houses, banks, securities firms and exchanges. Our credit risk exposure will also increase if the collateral we hold cannot be realized upon or can only be liqui-

dated at prices insufficient to cover the full amount of exposure.

The information that we use to manage our credit risk may be inaccurate or incomplete

Although we regularly review our credit exposure to specific clients and counterparties and to specific industries, countries and regions that we believe may present credit concerns, default risk may arise from events or circumstances that are difficult to foresee or detect, such as fraud. We may also fail to receive full information with respect to the credit or trading risks of a counterparty.

Risks from estimates and valuations

We make estimates and valuations that affect our reported results, including measuring the  fair value of certain assets and liabilities, establishing provisions for contingencies and losses for loans, litigation and regulatory proceedings, accounting for goodwill and intangible asset impairments, evaluating our ability to realize deferred tax assets, valuing equity-based compensation awards and calculating expenses and liabilities associated with our pension plans. These estimates are based upon judgment and available information, and our actual results may differ materially from these estimates.

- ▶ Refer to "Critical accounting estimates" in II – Operating and financial review and "Note 1 – Summary of significant accounting policies" in V – Consolidated financial statements – Credit Suisse Group for information on these estimates and valuations.

Our estimates and valuations rely on models and processes to predict economic conditions and market or other events that might affect the ability of counterparties to perform their obligations to us or impact the value of assets. To the extent our models and processes become less predictive due to unforeseen market conditions, illiquidity or volatility, our ability to make accurate estimates and valuations could be adversely affected.

Risks relating to off-balance sheet entities

We enter into transactions with special purpose entities (SPEs) in our normal course of business, and certain SPEs with which we transact business are not consolidated and their assets and liabilities are off-balance sheet. The accounting requirements for consolidation, initially and if certain events occur that require us to reassess whether consolidation is required, can require the exercise of significant management

judgment. Accounting standards relating to consolidation, or their interpretation, have changed and may continue to change. If we are required to consolidate an SPE, its assets and liabilities would be recorded on our consolidated balance sheets and we would recognize related gains and losses in our consolidated statements of operations, and this could have an adverse impact on our results of operations and capital and leverage ratios.

- ▶ Refer to "Off-balance sheet" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Balance sheet, off-balance sheet and contractual obligations for information on our transactions with and commitments to SPEs.

Cross-border and foreign exchange risk

Cross-border risks may increase market and credit risks we face

Country, regional and political risks are components of market and credit risk. Financial markets and economic conditions generally have been and may be materially affected by such risks. Economic or political pressures in a country or region, including those arising from local market disruptions, currency crises, monetary controls or other factors, may adversely affect the ability of clients or counterparties located in that country or region to obtain foreign currency or credit and, therefore, to perform their obligations to us, which in turn may have an adverse impact on our results of operations.

We may face significant losses in emerging markets

As a global financial services company doing business in emerging markets, we are exposed to economic instability in emerging market countries. We monitor these risks, seek diversity in the sectors in which we invest and emphasize client-driven business. Our efforts at limiting emerging market risk, however, may not always succeed.

Currency fluctuations may adversely affect our results of operations

We are exposed to risk from fluctuations in exchange rates for currencies, particularly the US dollar. In particular, a substantial portion of our assets and liabilities are denominated in currencies other than the Swiss franc, which is the primary currency of our financial reporting. Our capital is also stated in Swiss francs and we do not fully hedge our capital position against changes in currency exchange rates. Despite the actions of the SNB to maintain a floor for the CHF-EUR exchange rate, the Swiss franc remained strong against the US dollar and euro in 2012. The appreciation of the Swiss franc in particular and exchange rate volatility in general have

had an adverse impact on our results of operations and capital position in recent years and may have such an effect in the future.

Operational risk

We are exposed to a wide variety of operational risks, including information technology risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. In general, although we have business continuity plans, our businesses face a wide variety of operational risks, including technology risk that stems from dependencies on information technology, third-party suppliers and the telecommunications infrastructure. As a global financial services company, we rely heavily on our financial, accounting and other data processing systems, which are varied and complex. Our business depends on our ability to process a large volume of diverse and complex transactions, including derivatives transactions, which have increased in volume and complexity. We are exposed to operational risk arising from errors made in the execution, confirmation or settlement of transactions or in transactions not being properly recorded or accounted for. Regulatory requirements in this area have increased and are expected to increase further.

Information security, data confidentiality and integrity are of critical importance to our businesses. Despite our wide array of security measures to protect the confidentiality, integrity and availability of our systems and information, it is not always possible to anticipate the evolving threat landscape and mitigate all risks to our systems and information. We could also be affected by risks to the systems and information of clients, vendors, service providers, counterparties and other third parties.

If any of our systems do not operate properly or are compromised as a result of cyber-attacks, security breaches, unauthorized access, loss or destruction of data, unavailability of service, computer viruses or other events that could have an adverse security impact, we could be subject to litigation or suffer financial loss not covered by insurance, a disruption of our businesses, liability to our clients, regulatory intervention or reputational damage. Any such event could also require us to expend significant additional resources to modify our protective measures or to investigate and remediate vulnerabilities or other exposures.

We may suffer losses due to employee misconduct

Our businesses are exposed to risk from potential non-compliance with policies, employee misconduct or negligence and

fraud, which could result in regulatory sanctions and serious reputational or financial harm. In recent years, a number of multinational financial institutions have suffered material losses due to the actions of “rogue traders” or other employees. It is not always possible to deter employee misconduct and the precautions we take to prevent and detect this activity may not always be effective.

Risk management

We have risk management procedures and policies designed to manage our risk. These techniques and policies, however, may not always be effective, particularly in highly volatile markets. We continue to adapt our risk management techniques, in particular ◉value-at-risk and economic capital, which rely on historical data, to reflect changes in the financial and credit markets. No risk management procedures can anticipate every market development or event, and our risk management procedures and hedging strategies, and the judgments behind them, may not fully mitigate our risk exposure in all markets or against all types of risk.

- ▶ Refer to “Risk management” in III – Treasury, Risk, Balance sheet and Off-balance sheet for information on our risk management.

Legal and regulatory risks

Our exposure to legal liability is significant

We face significant legal risks in our businesses, and the volume and amount of damages claimed in litigation, regulatory proceedings and other adversarial proceedings against financial services firms are increasing.

We and our subsidiaries are subject to a number of material legal proceedings, regulatory actions and investigations, and an adverse result in one or more of these proceedings could have a material adverse effect on our operating results for any particular period, depending, in part, upon our results for such period.

- ▶ Refer to “Note 37 – Litigation” in V – Consolidated financial statements – Credit Suisse Group for information relating to these and other legal and regulatory proceedings involving our Investment Banking and other businesses.

It is inherently difficult to predict the outcome of many of the legal, regulatory and other adversarial proceedings involving our businesses, particularly those cases in which the matters are brought on behalf of various classes of claimants, seek damages of unspecified or indeterminate amounts or involve

novel legal claims. Management is required to establish, increase or release reserves for losses that are probable and reasonably estimable in connection with these matters.

- ▶ Refer to “Critical accounting estimates” in II – Operating and financial review and “Note 1 – Summary of significant accounting policies” in V – Consolidated financial statements – Credit Suisse Group for more information.

Regulatory changes may adversely affect our business and ability to execute our strategic plans

As a participant in the financial services industry, we are subject to extensive regulation by governmental agencies, supervisory authorities and self-regulatory organizations in Switzerland, the EU, the UK, the US and other jurisdictions in which we operate around the world. Such regulation is increasingly more extensive and complex and, in recent years, costs related to our compliance with these requirements and the penalties and fines sought and imposed on the financial services industry by regulatory authorities have all increased significantly. These regulations often serve to limit our activities, including through the application of increased capital requirements, customer protection and market conduct regulations, and direct or indirect restrictions on the businesses in which we may operate or invest. Such limitations can have a negative effect on our business and our ability to implement strategic initiatives. To the extent we are required to divest certain businesses, we could incur losses, as we may be forced to sell such businesses at a discount, which in certain instances could be substantial, as a result of both the constrained timing of such sales and the possibility that other financial institutions are liquidating similar investments at the same time.

Since 2008, regulators and governments have focused on the reform of the financial services industry, including enhanced capital, leverage and liquidity requirements, changes in compensation practices (including tax levies) and measures to address systemic risk. We are already subject to extensive regulation in many areas of our business and expect to face increased regulation and regulatory scrutiny and enforcement. We expect such increased regulation to continue to increase our costs, including, but not limited to, costs related to compliance, systems and operations, as well as affecting our ability to conduct certain businesses, which could adversely affect our profitability and competitive position. Variations in the details and implementation of such regulations may further negatively affect us, as certain requirements currently are not expected to apply equally to all of our competitors or to be implemented uniformly across jurisdictions.

For example, the additional requirements related to minimum regulatory capital, leverage ratios and liquidity measures imposed by ◉Basel III, together with more stringent require-

ments imposed by the Swiss "Too Big To Fail" legislation and its implementing ordinances, have contributed to our decision to reduce risk weighted assets and the size of our balance sheet, and could potentially impact our access to capital markets and increase our funding costs. In addition, the ongoing implementation in the US of the provisions of the Dodd-Frank Act, including the "Volcker Rule", derivatives regulation, and other regulatory developments described in "Regulation and supervision", have imposed, and will continue to impose, new regulatory burdens on certain of our operations. These requirements have contributed to our decision to exit certain businesses (including a number of our private equity businesses) and may lead us to exit other businesses. Because the scope of the Volcker Rule remains subject to final rule making and its impact on our market-making and risk mitigation activities is unclear, it is still uncertain whether we may be required to curtail or discontinue some of these activities or if our operations may otherwise be adversely affected. Under the Dodd-Frank Act, we also expect to become subject to new CFTC and SEC rules that could materially increase the operating costs, including compliance, information technology and related costs, associated with our derivatives businesses with US persons. Further, in December 2012, the Fed proposed a rule under the Dodd-Frank Act that would create a new framework for regulation of the US operations of foreign banking organizations such as ours. Although the final content and impact of the proposal cannot be predicted at this time, if implemented as proposed, this rule may result in our incurring additional costs and limit or restrict the way we conduct our business in the US.

Similarly, recently enacted and possible future cross-border tax regulation with extraterritorial effect, such as the US Foreign Account Tax Compliance Act, and bilateral tax treaties, such as Switzerland's treaties with the UK and Austria, impose detailed reporting obligations and increased compliance and systems-related costs on our businesses. Finally, implementation of EMIR and the proposed revisions to MiFID II may negatively affect our business activities. If Switzerland does not pass legislation that is deemed equivalent to these EU regulations in a timely manner, Swiss banks, including us, may be limited from participating in businesses regulated by such laws.

Additionally, pursuant to an amendment of the Bank Law in 2012 and the new Banking Insolvency Ordinance that came into effect in late 2012, FINMA has significantly increased authority in case of resolution proceedings involving banks in Switzerland. This resolution authority includes, among other things, the power to cancel outstanding equity, to convert debt instruments and other liabilities of a bank into equity and to cancel such liabilities fully or partially.

We expect the financial services industry, including Credit Suisse, to continue to be affected by the significant uncertainty over the scope and content of regulatory reform in 2013 and beyond. Changes in laws, rules or regulations, or in their interpretation or enforcement, or the implementation of new laws, rules or regulations, may adversely affect our results of operations.

Despite our best efforts to comply with applicable regulations, a number of risks remain, particularly in areas where applicable regulations may be unclear or inconsistent among jurisdictions or where regulators revise their previous guidance or courts overturn previous rulings. Authorities in many jurisdictions have the power to bring administrative or judicial proceedings against us, which could result in, among other things, suspension or revocation of our licenses, cease and desist orders, fines, civil penalties, criminal penalties or other disciplinary action which could materially adversely affect our results of operations and seriously harm our reputation.

- ▶ Refer to "Regulation and supervision" for a description of our regulatory regime and capital requirements and a summary of some of the significant regulatory and government reform proposals affecting the financial services industry.

Changes in monetary policy are beyond our control and difficult to predict

We are affected by the monetary policies adopted by the central banks and regulatory authorities of Switzerland, the US and other countries. The actions of the SNB and other central banking authorities directly impact our cost of funds for lending, capital raising and investment activities and may impact the value of financial instruments we hold and the competitive and operating environment for the financial services industry. Many central banks have implemented significant changes to their monetary policy. We cannot predict whether these changes will have a material adverse effect on us or our operations. In addition, changes in monetary policy may affect the credit quality of our customers. Any changes in monetary policy are beyond our control and difficult to predict.

Legal restrictions on our clients may reduce the demand for our services

We may be materially affected not only by regulations applicable to us as a financial services company, but also by regulations of general application and changes in enforcement practices. Our business could be affected by, among other things, existing and proposed tax legislation, antitrust and competition policies, corporate governance initiatives and other governmental regulations and policies, and changes in the interpretation or enforcement of existing laws and rules that affect business and the financial markets. For example, focus on tax

compliance and changes in enforcement practices could lead to asset outflows (primarily from customers in mature Western European markets) from our Wealth Management Clients business in Switzerland.

Any conversion of our convertible capital instruments will dilute the ownership interests of existing shareholders

Under Swiss regulatory capital rules, we are now required to issue a significant amount of contingent capital instruments which will convert into common equity upon the occurrence of specified triggering events, including our CET1 capital ratio falling below prescribed thresholds, or a determination by FINMA that conversion is necessary, or that we require public sector capital support, to prevent us from becoming insolvent. We have already issued or agreed to issue an aggregate of CHF 8.4 billion in principal amount of such contingent capital, and we expect to issue more such contingent capital in the future. We have also issued a significant volume of the mandatory and contingent convertible securities (MACCS), totaling an aggregate of CHF 3.8 billion, which convert into 233.5 million shares on March 29, 2013 (subject to acceleration in certain circumstances), with settlement and delivery of shares in early April 2013. The conversion of some or all of our contingent capital due to the occurrence of a triggering event will result in the dilution of the ownership interests of our then existing shareholders, which dilution could be substantial. Similarly, the conversion of the MACCS will result in substantial dilution of the ownership interests of existing shareholders who do not hold an equivalent amount of MACCS. Additionally, any conversion, or the anticipation of the possibility of a conversion, could depress the market price of our ordinary shares.

- ▶ Refer to "Banking relationships with members of the Board and Executive Board and related party transactions" in IV – Corporate Governance and Compensation – Corporate Governance for more information on the triggering events related to our contingent capital instruments.

Competition

We face intense competition

We face intense competition in all financial services markets and for the products and services we offer. Consolidation through mergers, acquisitions, alliances and cooperation, including as a result of financial distress, has increased competitive pressures. Competition is based on many factors, including the products and services offered, pricing, distribution systems, customer service, brand recognition, perceived financial strength and the willingness to use capital to serve

client needs. Consolidation has created a number of firms that, like us, have the ability to offer a wide range of products, from loans and deposit-taking to brokerage, investment banking and asset management services. Some of these firms may be able to offer a broader range of products than we do, or offer such products at more competitive prices. Current market conditions have resulted in significant changes in the competitive landscape in our industry as many institutions have merged, altered the scope of their business, declared bankruptcy, received government assistance or changed their regulatory status, which will affect how they conduct their business. In addition, current market conditions have had a fundamental impact on client demand for products and services. Although we expect the increasing consolidation and changes in our industry to offer opportunities, we can give no assurance that our results of operations will not be adversely affected.

Our competitive position could be harmed if our reputation is damaged

In the highly competitive environment arising from globalization and convergence in the financial services industry, a reputation for financial strength and integrity is critical to our performance, including our ability to attract and maintain clients and employees. Our reputation could be harmed if our comprehensive procedures and controls fail, or appear to fail, to address conflicts of interest, prevent employee misconduct, produce materially accurate and complete financial and other information or prevent adverse legal or regulatory actions.

- ▶ Refer to "Reputational risk" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management for more information.

We must recruit and retain highly skilled employees

Our performance is largely dependent on the talents and efforts of highly skilled individuals. Competition for qualified employees is intense. We have devoted considerable resources to recruiting, training and compensating employees. Our continued ability to compete effectively in our businesses depends on our ability to attract new employees and to retain and motivate our existing employees. The continued public focus on compensation practices in the financial services industry, and related regulatory changes, may have an adverse impact on our ability to attract and retain highly skilled employees.

We face competition from new trading technologies

Our businesses face competitive challenges from new trading technologies, which may adversely affect our commission and trading revenues, exclude our businesses from certain trans-

action flows, reduce our participation in the trading markets and the associated access to market information and lead to the creation of new and stronger competitors. We have made, and may continue to be required to make, significant additional expenditures to develop and support new trading systems or otherwise invest in technology to maintain our competitive position.

Risks relating to our strategy

We may not achieve all of the expected benefits of our strategic initiatives

In light of increasing regulatory and capital requirements and continued challenging market and economic conditions, to optimize our use of capital and improve our cost structure we have continued to adapt our client-focused, capital-efficient strategy and have implemented new efficiency measures. Actions taken to adapt our strategy, some of which are ongoing, include strengthening our capital position, reducing our cost base, decreasing the size of our balance sheet, reducing our risk-weighted assets, focusing on chosen businesses and markets in Investment Banking, and integrating our Private Banking and Asset Management divisions into a new, single division. Factors beyond our control, including but not limited to the market and economic conditions and other challenges

discussed in this report, could limit our ability to achieve some or all of the expected benefits of these initiatives.

In addition, acquisitions and other similar transactions we undertake as part of our strategy subject us to certain risks. Even though we review the records of companies we plan to acquire, it is generally not feasible for us to review all such records in detail. Even an in-depth review of records may not reveal existing or potential problems or permit us to become familiar enough with a business to assess fully its capabilities and deficiencies. As a result, we may assume unanticipated liabilities (including legal and compliance issues), or an acquired business may not perform as well as expected. We also face the risk that we will not be able to integrate acquisitions into our existing operations effectively as a result of, among other things, differing procedures, business practices and technology systems, as well as difficulties in adapting an acquired company into our organizational structure. We face the risk that the returns on acquisitions will not support the expenditures or indebtedness incurred to acquire such businesses or the capital expenditures needed to develop such businesses.

In recent years, we have also undertaken a number of new joint ventures and strategic alliances. Although we endeavor to identify appropriate partners, our joint venture efforts may prove unsuccessful or may not justify our investment and other commitments.

Operating environment

The global economy faced significant challenges in 2012, and concerns regarding eurozone sovereign debt significantly impacted markets. With major central banks maintaining low interest rates and increased risk appetite in the second half of the year, equity markets ended the year higher. The US dollar weakened against most currencies except the Japanese yen. The Swiss National Bank continued to defend the previously announced floor of CHF 1.20 per euro.

Economic environment

Global gross domestic product growth reported in 2012 remained relatively weak, reflecting low consumer confidence and weak business sentiment, continued high unemployment rates and uncertainty related to the eurozone sovereign debt crisis. Towards the end of the year, leading indicators, including the global manufacturing purchasing managers index, rose modestly. While US and Chinese growth was relatively robust in the second half of 2012, economic activity in the eurozone continued to shrink. In Switzerland, economic growth was comparatively strong, and unemployment was low. Inflation remained subdued in most developed countries, but was higher in emerging markets.

Central banks across the globe remained concerned about the growth outlook, and generally further eased monetary pol-

icy in 2012. The US Federal Reserve (Fed) reacted to the slow improvement in the US labor market by extending its pledge to keep short-term interest rates unchanged, noting that monetary policy would remain highly accommodative even after the recovery strengthens. The Fed also continued to shift its short-term US Treasury holdings towards longer-term securities and announced it would purchase significant amounts of mortgage-backed securities until there is substantial labor market improvement. The European Central Bank (ECB) announced that it would stand ready, under certain conditions, to buy unlimited amounts of short-dated eurozone sovereign bonds in order to lower governments' borrowing costs. This announcement resulted in a marked drop in the bond yields of troubled eurozone sovereigns. The Bank of Japan (BoJ) announced an official inflation target and expanded its asset purchase program further.

Yield curves

Near term interest rates generally declined further in 2012.

The eurozone sovereign debt crisis was a key theme, especially in the first half of the year. Eurozone member states increased the combined lending power of the European Financial Stability Facility and the European Stability Mechanism (ESM). European leaders agreed on a single banking supervisory mechanism to be run by the ECB and authorized the ESM to inject funds into banks directly once the supervisory mechanism is operative. Increased liquidity caused a sharp fall in short-term interest rates, with three-month London inter-bank offered rate (LIBOR) dropping below the ECB's target rate.

Credit spreads

Credit spreads tightened in 2012 due to monetary stimulus from major central banks and reduced political uncertainty.

Source: Bloomberg, Credit Suisse

After a good start at the beginning of the year, eurozone sovereign debt issues weighed on equity markets until May. The measures announced by the ECB supported stock markets mid-year, with equity markets posting strong gains following US elections in early November. With increased risk appetite and low bond yields at the end of the year, global equity prices finished the year higher. Equity market volatility, as indicated by the Chicago Board Options Exchange Market Volatility Index (VIX), increased temporarily in the first half of the year when the eurozone debt crisis was in focus, and again at the end of the year relating to the US "fiscal cliff" debate (refer to the charts "Equity markets"). The Dow Jones Credit Suisse Hedge Fund Index gained 8% in 2012. According to Hedge Fund Research, steady inflows combined with performance-based gains pushed total industry assets to a record high of USD 2.25 trillion.

Increased monetary stimulus from major central banks and reduced political uncertainties in the second half of the year led to a significant compression of credit spreads. Both corporate high yield and emerging markets bonds delivered total returns in the high teens in 2012. European sovereign debt concerns dominated market action beginning in 2Q12, sending Spanish yields to record highs and Italian credit spreads above 5% in the 10-year segment. However, expectations of increased ECB and US Fed stimulus and further ECB announcements sparked credit spread tightening which lasted through the year-end (refer to the charts "Credit spreads").

Tension in the eurozone sovereign debt market was a key foreign exchange market driver in 2012. Major currencies, including the euro, weakened against the US dollar in the first half of the year. However, ECB and Fed measures caused the

US dollar to weaken against the euro in the second half of the year as eurozone sovereign debt concerns eased and the Fed announced a further round of Treasury securities purchases. The Japanese yen declined against the US dollar and most other major currencies as BoJ monetary policies became further expansionary. The Swiss franc remained slightly above the minimum exchange rate of CHF 1.20 per euro previously declared by the Swiss National Bank, which intervened in currency markets in 2012 to defend the floor. Emerging market currencies generally benefitted from stable global growth prospects and capital inflows.

Commodity markets ended 2012 largely unchanged from 2011 levels, though experienced significant price volatility during the year. Commodity prices reached a peak towards the end of 1Q12 but adjusted significantly downward when global economic growth slowed. Prices increased during 3Q12 and 4Q12 amid signs of growth and growing confidence that the eurozone sovereign debt crisis was increasingly contained. Oil prices saw divergent developments, with US benchmark oil West Texas Intermediate ending the year slightly lower, affected by increased shale oil production in the US, and European Brent ending the year 4% higher due to restricted global production. Gold prices were higher, partly reflecting low real interest rates, ending the year above USD 1,650.

Sector environment

The banking sector benefitted from central bank measures while the sector continued to transition to new regulatory requirements. Global banks took significant steps to restructure businesses and decrease costs while also taking measures to increase capital and liquidity ratios. European and North American bank stocks outperformed global equity indices. After European bank stocks declined 10% in the first half of 2012, they finished the year 23% higher. North American bank stocks ended the year with a positive return of 16% (refer to the charts “Equity markets”).

Private banking clients remained cautious. Due to prevailing market uncertainty, clients' cash deposits remained high despite record low interest rates. Strong inflows in bond and money market funds continued towards the end of the year, and exchange-traded funds (ETFs) posted net inflows. In Switzerland, concerns about the real estate market overheating in certain areas remained pronounced. The wealth management sector continued to adapt to further industry-specific regulatory changes.

In investment banking, equity trading volume decreased significantly compared to 2011. Activity from mergers and acquisitions (M&As) also decreased, most markedly in Europe. However, global debt underwriting improved by 33% compared to the previous year. In the second half of the year, hedge funds were able to capitalize on improved liquidity conditions, relatively increased risk appetite and generally favorable volatility.

Credit Suisse

In 2012, we recorded net income attributable to shareholders of CHF 1,349 million. Diluted earnings per share were CHF 0.81. Return on equity attributable to shareholders was 3.9%.

Credit Suisse reporting structure and Core Results

Credit Suisse results include revenues and expenses from the consolidation of certain private equity funds and other entities in which we have noncontrolling interests without significant economic interest (SEI) in such revenues and expenses. Core Results include the results of our two segments and the Corporate Center and discontinued operations, but do not include noncontrolling interests without SEI.

Differences between Group and Bank

Except where noted, the business of the Bank is substantially the same as the business of Credit Suisse Group, and substantially all of the Bank's operations are conducted through the Private Banking & Wealth Management and Investment Banking segments. These segment results are included in Core Results. Certain other assets, liabilities and results of operations are managed as part of the activities of the two segments. However, since they are legally owned by the Group, they are not included in the Bank's financial statements. These related principally to the activities of Neue Aar-

gauer Bank and BANK-now, which are managed as part of Private Banking & Wealth Management, and hedging activities relating to share-based compensation awards. Core Results also includes certain Corporate Center activities of the Group that are not applicable to the Bank.

These operations and activities vary from period to period and give rise to differences between the Bank's assets, liabilities, revenues and expenses, including pensions and taxes, and those of the Group.

- Refer to "Note 39 – Subsidiary guarantee information" in V – Consolidated financial statements – Credit Suisse Group for further information on the Bank.

Differences between Group and Bank businesses

| Entity | Principal business activity |
|---------------------------------|---|
| Neue Aargauer Bank | Banking (in the Swiss canton of Aargau) |
| BANK-now | Private credit and car leasing (in Switzerland) |
| Financing vehicles of the Group | Special purpose vehicles for various funding activities of the Group, including for purposes of raising capital |

Credit Suisse AG merged with Clariden Leu on April 2, 2012, assuming all of its rights and obligations.

|-------------------------------|-------------------|------|
| Per share issued (CHF) | | |
| Dividend ^{1,2} | 0.23 ³ | 0.23 |

Registered shares of CHF 100.00 nominal value each. As of December 31, 2012 and 2011, total share capital consisted of 43,996,652 registered shares.

¹ Dividends are determined in accordance with Swiss law and the Bank's articles of incorporation. ² In 2010, 2009 and 2008, dividends per share issued were CHF 0.23, CHF 68.19 and CHF 0.23, respectively. ³ Proposal of the Board of Directors to the annual general meeting of the Bank.

Core Results

For 2012, net income attributable to shareholders was CHF 1,349 million. Net revenues were CHF 23,606 million and total operating expenses were CHF 21,557 million. Results included fair value losses before tax from movements in own credit spreads of CHF 2,939 million, compared to fair value gains of CHF 1,616 million in 2011. Our results also reflected realignment costs of CHF 680 million, gains of CHF 533 million before tax from the sale of real estate and gains of CHF 384 million before tax from the sale of our remaining ownership interest in Aberdeen Asset Management. Our Basel II.5 tier 1 ratio was 19.4% and we made substantial progress in reducing Basel III risk-weighted assets in Investment Banking and for the Group. We attracted CHF 10.8 billion of net new assets.

Core Results include the results of our two segments, the Corporate Center and discontinued operations. Core Results exclude revenues and expenses in respect of noncontrolling interests in which we do not have SEI.

As of November 30, 2012 we integrated our former Private Banking and Asset Management divisions into a single, new Private Banking & Wealth Management division. In addition, the majority of our securities trading and sales business in Switzerland was transferred from the Investment Banking division into the Private Banking & Wealth Management division.

Certain reclassifications have been made to prior periods to conform to the current presentation.

► Refer to "Format of presentation and changes in reporting" in Information and developments for further information.

A significant portion of our business requires inter-regional coordination in order to facilitate the needs of our clients. The methodology for allocating our results by region is dependent on management judgment. For Wealth Management Clients and Corporate & Institutional Clients, results are allocated based on the management reporting structure of our relationship managers and the region where the transaction is recorded. For Asset Management, results are allocated based on the location of the investment advisors and sales teams. For Investment Banking, trading results are allocated based on where the risk is primarily managed and fee-based results are allocated where the client is domiciled.

Results overview

2012 versus 2011

In 2012, we recorded net income attributable to shareholders of CHF 1,349 million, down 31% compared to 2011. Net revenues were CHF 23,606 million, down 7%, and total operating expenses were CHF 21,557 million, down 4%, compared to 2011, mainly due to lower compensation and benefits. Our 2012 results included negative impacts of CHF 3.8 billion consisting of fair value losses before tax from movements in own credit spreads of CHF 2.9 billion, realignment costs of CHF 680 million from cost efficiency measures and additional litigation provisions of CHF 227 million before tax from the settlement of National Century Financial Enterprises, Inc. (NCFE)-related litigation. Also included were gains of CHF 533 million before tax from the sale of real estate and gains of CHF 384 million before tax from the sale of our remaining ownership interest in Aberdeen Asset Management (Aberdeen).

In **Private Banking & Wealth Management**, net revenues of CHF 13,541 million were stable compared to 2011, with lower recurring commissions and fees offset by higher other revenues. Transaction- and performance-based revenues and net interest income were stable. Lower recurring commissions and fees mainly reflected lower investment product management fees and lower discretionary mandate man-

agement fees. Other revenues of CHF 448 million were higher compared to 2011, mainly reflecting a gain of CHF 384 million on the sale of our remaining ownership interest in Aberdeen in 2012, partially offset by lower investment-related gains and impairments related to Asset Management Finance LLC (AMF).

In **Investment Banking**, net revenues were CHF 12,558 million, compared to net revenues of CHF 10,460 million in 2011. We delivered strong results in 2012 despite challenging market conditions and subdued levels of client activity in many of our businesses. Relative to 2011, our net revenues increased 20% on materially lower Basel III risk-weighted assets. In addition, we made substantial progress in reducing our cost base during the year. Our results demonstrated our strong franchise momentum and successful execution of our refined strategy to increase operating and capital efficiency. Fixed income sales and trading revenues were substantially higher compared to a weak 2011, reflecting significantly higher revenues from securitized products and global credit products in 2012, due to improved market conditions. Substantial inventory reductions in these businesses also resulted in lower revenue volatility in 2012. Revenues from emerging markets, corporate lending and foreign exchange were also higher. We incurred losses of CHF 589 million from businesses we are exiting in 2012 compared to losses of CHF 387 million in 2011.

¹ Core Results include the results of our integrated banking business, excluding revenues and expenses in respect of noncontrolling interests without SEI. ² Includes diversification benefit. ³ Calculated using a return excluding interest costs for allocated goodwill. ⁴ Under the central treasury model, Group financing results in intra-Group balances between the segments. The elimination of these assets and liabilities occurs in the Corporate Center.

Equity sales and trading revenues were up modestly as stronger revenues in convertibles, derivatives and prime services were partially offset by declines in cash equities due to lower industry-wide trading volumes compared to 2011. Underwriting and advisory results were higher compared to 2011, due to strong debt underwriting revenues, particularly in leveraged finance, partially offset by lower equity underwriting revenues. Additionally, M&A fees increased as market share gains in completed M&A transactions more than offset lower industry-wide completed M&A activity.

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. In addition, the Corporate Center includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses. In 2012, losses before taxes were CHF 3,898 million compared to income before taxes of CHF 381 million in 2011, primarily reflecting fair value losses on our long-term vanilla debt of CHF 1,663 million, ◉ debit valuation adjustments (DVA) losses on certain structured notes liabilities of CHF 958 million and fair value losses on stand-alone derivatives of CHF 318 million.

The fair value losses reflected the narrowing of credit spreads on senior and subordinated debt across most currencies. Additionally, the 2012 losses included business realignment costs of CHF 680 million, consisting primarily of severance and other compensation expenses relating to the Group-wide cost efficiency initiatives, additional litigation provisions of CHF 227 million before tax from the settlement of NCFE-related litigation and gains from the sale of real estate of CHF 533 million before tax.

Provision for credit losses reflected net provisions of CHF 170 million, with net provisions of CHF 182 million in

Private Banking & Wealth Management and releases of CHF 12 million in Investment Banking.

Total operating expenses were CHF 21,557 million, down 4%, mainly reflecting a 5% decrease in compensation and benefits due to lower discretionary performance-related compensation expense and lower salary expense, reflecting lower headcount, partly offset by an expense of CHF 500 million from cost efficiency measures. General and administrative expenses were stable, mainly reflecting a decrease in professional services, partly offset by an increase in occupancy expenses. General and administrative expenses also included costs of CHF 180 million in connection with our cost efficiency initiatives.

The **Core Results effective tax rate** was 26.4% in 2012, compared to 24.4% in 2011. The effective tax rate for full-year 2012 was mainly impacted by the geographical mix of results, an increase and a re-assessment in deferred tax balances in Switzerland and the release of tax contingency accruals. The effective tax rate also reflected re-assessments in valuation allowances against deferred tax assets in the US, the UK and Asia. In addition, the tax charge was negatively influenced by the impact of the change in UK corporation tax from 25% to 23%. Overall, net deferred tax assets decreased CHF 1,538 million to CHF 6,972 million during 2012.

- ▶ Refer to "Note 26 – Tax" in V – Consolidated financial statements – Credit Suisse Group for further information.

Assets under management of CHF 1,250.8 billion were CHF 65.6 billion higher compared to the end of 2011, driven primarily by positive market movements and by net new assets

of CHF 10.8 billion, partially offset by adverse foreign exchange-related movements. Wealth Management Clients contributed net new assets of CHF 19.0 billion with inflows particularly from emerging markets and from the ultra-high-net-worth individual (UHNWI) client segment, partially offset by outflows in Western Europe and outflows relating to the integration of Clariden Leu. Corporate & Institutional Clients reported net new assets of CHF 1.5 billion. Asset Management reported net asset outflows of CHF 9.0 billion primarily from multi-asset class solutions which included redemptions of CHF 14.7 billion from a single fixed income mandate, partially offset by inflows in index strategies and credit products. Assets under management continued to reflect a risk-averse asset mix, with investments in less complex, lower-margin products and a significant portion of assets in cash and money market products.

Impact from movements in own credit spreads

Our Core Results revenues are impacted by changes in credit spreads on fair-valued Credit Suisse long-term vanilla debt and DVA relating to certain structured notes liabilities carried at fair value. For segment reporting purposes through the end of 2011, the cumulative fair value gains of CHF 1.5 billion on Credit Suisse long-term vanilla debt as of the opening first quarter 2010 balance sheet was charged to the segments on a straight-line amortization basis, and the difference between this amortization and the fair valuation on this Credit Suisse debt from changes in credit spreads was included in the Corporate Center.

Beginning in the first quarter of 2012, we fully reflect the fair value impact from movements in credit spreads on our long-term vanilla debt and DVA on certain structured notes liabilities in the Corporate Center and discontinued the amortization in the segments of the past fair value gains on long-term

vanilla debt. DVA on certain structured notes liabilities was previously recorded in the Investment Banking segment and is now recorded in the Corporate Center in order to aggregate all credit-spread impacts on our funding instruments and to reflect that these impacts are driven by the creditworthiness of the Group rather than our Investment Banking segment or the issuer. Prior periods have been reclassified to conform to the current presentation and such reclassifications had no impact on the Group's net income/(loss) or total shareholders' equity.

Our Core Results are also impacted by fair valuation gains/(losses) on stand-alone derivatives relating to certain of our funding liabilities. These fair valuation gains/(losses) on the stand-alone derivatives are recorded in the Corporate Center, reflect the volatility of cross-currency swaps and yield curve volatility and, over the life of the derivatives, will result in no net gains/(losses).

| in | 2012 | 2011 | 2010 |
|--|--------------|--------------|--------------|
| Net income/(loss) attributable to shareholders, excluding impact from movements in credit spreads (CHF million) | 3,610 | 802 | 4,929 |
| Fair value gains/(losses) from movements in own credit spreads | (2,939) | 1,616 | 269 |
| Fair value gains/(losses) on own long-term vanilla debt | (1,663) | 1,210 | 341 |
| Fair value gains/(losses) on debit valuation adjustments on structured notes | (958) | 697 | (73) |
| Fair value gains/(losses) on stand-alone derivatives | (318) | (291) | 1 |
| Tax expense/(benefit) | (678) | 465 | 100 |
| Net income attributable to shareholders | 1,349 | 1,953 | 5,098 |

Regulatory capital excludes cumulative fair value gains/(losses) related to own long-term vanilla debt and structured notes, net of tax. Refer to "Capital management" in III – Treasury, risk, balance sheet and off-balance sheet for further information.

2011 versus 2010

In 2011, we recorded net income attributable to shareholders of CHF 1,953 million, down 62% compared to 2010. Net revenues were CHF 25,429 million, down 17%, and total operating expenses were CHF 22,493 million, down 6%, compared to 2010, mainly due to lower compensation and benefits. Our 2011 results included negative impacts of CHF 1.8 billion consisting of realignment costs of CHF 847 million from cost efficiency measures and CHF 974 million (CHF 547 million of negative revenues and CHF 427 million of associated costs) from businesses we are exiting and the reduction of risk-weighted assets in our Investment Banking fixed income business. Also included were litigation provisions of CHF 478 million in connection with German and US tax matters. We had fair value gains of CHF 1,210 million on Credit Suisse long-term vanilla debt, DVA gains of CHF 697 million on certain structured notes liabilities and fair value losses of CHF 291 million on stand-alone derivatives. Revenues were adversely impacted and expenses were favorably impacted by the strengthening of the Swiss franc against major currencies. Compared to 2010, the adverse impact on net revenues and income before taxes was CHF 3,092 million and CHF 909 million, respectively.

In **Private Banking & Wealth Management**, net revenues of CHF 13,447 million decreased 8% compared to 2010. The adverse impact of the lower average exchange rate of major currencies against the Swiss franc on net revenues and income before taxes was CHF 1,071 million and CHF 597 million, respectively. Excluding this adverse foreign exchange impact, revenues were stable compared to 2010. Recurring commissions and fees in 2011 compared to 2010 were down 7% as average assets under management decreased slightly, mainly due to the adverse foreign exchange translation impact. In an ongoing low interest rate environment net interest income decreased 6%. Transaction- and performance-based revenues decreased 8%, reflecting lower client activity and lower transaction-based volumes. Other revenues were down 35%, reflecting gains in 2010 on the sale of securities purchased from our money market funds and lower investment-related gains in 2011.

In **Investment Banking**, net revenues were CHF 10,460 million, compared to CHF 15,873 million in 2010. Results in many of our businesses in 2011 were negatively impacted by significantly lower levels of client activity and a volatile trading environment compared to 2010. In light of increasing regulatory and capital requirements and continued challenging market and economic conditions, we announced a refinement of our Investment Banking strategy in November 2011, including an accelerated risk-weighted asset reduction plan. In 2011, we reduced our Basel III risk-weighted assets by USD 80 bil-

lion, or 25%, to USD 242 billion. Fixed income sales and trading revenues were significantly lower in 2011, reflecting challenging trading conditions, subdued client activity levels across most businesses and the execution of our risk reduction strategy. We incurred losses of CHF 512 million from businesses we are exiting and from the reduction of risk-weighted assets in 2011. Our equity sales and trading results declined primarily due to lower levels of client activity in cash equities. Prime services revenues declined, reflecting the foreign exchange translation impact. In US dollars, we had record prime services results due to higher client activity and higher client balances. We also had weak results in derivatives, reflecting reduced customer flow. In 2011, we maintained our market share and leading market share rankings in cash equities and prime services. Underwriting and advisory results were lower in 2011, reflecting a decline in industry-wide capital issuance levels and a decrease in our completed M&A market share from 2010, respectively.

Corporate Center reported income before taxes of CHF 381 million in 2011, compared to losses before taxes of CHF 936 million in 2010, primarily reflecting fair value gains on our long-term vanilla debt of CHF 1,210 million, DVA gains on certain structured notes liabilities of CHF 697 million and fair value losses on stand-alone derivatives of CHF 291 million, resulting in overall gains on such items of CHF 1,616 million. The fair value gains reflected the widening of credit spreads across all currencies, including senior and subordinated debt. Additionally, the 2011 result included CHF 847 million of costs consisting primarily of severance and other compensation expenses relating to the accelerated Group-wide cost efficiency initiatives.

Provision for credit losses reflected net provisions of CHF 187 million, with net provisions of CHF 111 million and CHF 76 million in Private Banking & Wealth Management and Investment Banking, respectively.

Total operating expenses were CHF 22,493 million, down 6%, mainly reflecting a 10% decrease in compensation and benefits due to lower discretionary performance-related compensation expense and the favorable foreign exchange translation impact, partly offset by CHF 715 million from cost efficiency measures. General and administrative expenses increased 2%, reflecting an increase in litigation provisions, IT investment costs and costs of CHF 132 million in connection with our cost efficiency initiatives, partially offset by lower professional fees and the favorable foreign exchange translation impact. Litigation provisions included CHF 478 million in connection with German and US tax matters.

The **Core Results effective tax rate** was 24.4% in 2011, compared to 22.8% in 2010. The effective tax rate for full-year 2011 was mainly impacted by the geographical mix of

results, an increase in deferred tax balances in Switzerland and the US and the release of tax contingency accruals. The effective tax rate also reflected an increase in valuation allowances against deferred tax assets in the UK and Asia and a write-down of deferred tax assets reflecting legislation in the UK and Japan that decreased the corporate income tax rate. Overall, net deferred tax assets decreased CHF 495 million to CHF 8,510 million during 2011.

- Refer to "Note 26 – Tax" in V – Consolidated financial statements – Credit Suisse Group for further information.

Assets under management as of the end of 2011 were CHF 1,185.2 billion, 1.7% lower compared to the end of 2010, as strong net new assets of CHF 46.6 billion were mainly offset by adverse market movements. Wealth Management Clients contributed net new assets of CHF 37.4 billion with strong contributions from emerging markets and from the UHNWI client segment. Corporate & Institutional Clients reported net new assets of CHF 5.3 billion. Asset Management reported net new assets of CHF 5.2 billion, primarily from inflows in real estate, commodities, multi-asset class solutions and ETFs, partially offset by net outflows from emerging markets, and from outflows from discontinued businesses and investment sales. Average assets under management in 2011 decreased slightly, as net new assets were more than offset by adverse market movements and foreign exchange-related movements.

Information and developments

Format of presentation and changes in reporting

In managing the business, revenues are evaluated in the aggregate, including an assessment of trading gains and losses and the related interest income and expense from financing and hedging positions. For this reason, individual revenue categories may not be indicative of performance.

Beginning in the first quarter of 2012, we fully reflect the fair value impact from movements in credit spreads on our long-term vanilla debt and DVA on certain structured notes liabilities in the Corporate Center.

- Refer to "Impact from movements in own credit spreads" for further information.

In the second quarter 2012, we made a number of changes to the presentation of our results, mainly related to the legal merger of Clariden Leu into the Bank, and the integration of our Private Banking and Investment Banking operations into a

single function. We also performed a review of our policies regarding the measurement of assets under management and net new assets. As a result of this review we adopted a more restrictive definition of these metrics, leading to a decrease in assets under management of CHF 45 billion for the Group at the end of the second quarter 2012.

In the third quarter 2012, we began recording gains on the sale of real estate made in connection with our July 2012 capital measures in the Corporate Center.

In the fourth quarter 2012, we integrated our previously reported Private Banking and Asset Management divisions into a single, new Private Banking & Wealth Management division and transferred the majority of our securities trading and sales business in Switzerland from Investment Banking into Private Banking & Wealth Management. This reorganization was effective November 30, 2012. The new presentation of Private Banking & Wealth Management results includes a presentation of the combined results of its three operating businesses: Wealth Management Clients, Corporate & Institutional Clients and Asset Management. The results of the transferred securities trading and sales business in Switzerland are allocated among the three operating businesses.

Prior periods have been restated to conform to the current presentation.

As of January 1, 2013, the Basel Committee on Banking Supervision Basel III framework (Basel III) was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the final implementation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Our ratio calculations use estimated risk-weighted assets as of December 31, 2012, as if the Basel III framework had been implemented in Switzerland as of such date.

Subsequent event

On March 13, 2013, we entered into agreements with bond investors of affiliates of NCFE to end all bond investor litigation against Credit Suisse. As a result of this settlement, we increased existing NCFE-related litigation provisions by CHF 227 million, resulting in an after tax charge of CHF 134 million in respect of our previously reported 2012 financial results.

- Refer to "Note 37 – Litigation" in V – Consolidated financial statements – Credit Suisse Group for further information.

Key performance indicators

Our KPIs are targets to be achieved over a three to five year period across market cycles. Our KPIs are assessed annually as part of our normal planning process.

| in / end of | Target | 2012 | 2011 | 2010 |
|--|---|------|--------|--------|
| Growth (%) | | | | |
| Collaboration revenues ¹ | 18–20% of net revenues | 18.6 | 16.8 | 14.4 |
| Net new asset growth | Above 6% | 0.9 | 3.9 | 5.3 |
| Efficiency and performance (%) | | | | |
| Total shareholder return (Credit Suisse) ² | Superior return vs peer group | 4.8 | (39.4) | (23.3) |
| Total shareholder return of peer group ^{2, 3} | – | 49.2 | (35.0) | (1.7) |
| Return on equity attributable to shareholders | Above 15% | 3.9 | 6.0 | 14.4 |
| Core Results pre-tax income margin | Pre-tax income margin above 28% | 8.0 | 10.8 | 22.2 |
| Capital (%) | | | | |
| Tier 1 ratio (Basel II.5) | Compliance with Swiss "Too Big to Fail" and Basel III | 19.4 | 15.2 | 14.2 |

¹ Includes revenues recognized when more than one of the Group's divisions participates in a particular transaction. ² Source: Bloomberg. Total shareholder return is calculated as equal to the appreciation or depreciation of a particular share, plus any dividends, over a given period, expressed as a percentage of the share's value as of the beginning of the period. ³ The peer group for this comparison comprises Bank of America, Barclays, BNP Paribas, Citigroup, Deutsche Bank, HSBC, JPMorgan Chase, Société Générale and UBS. The total shareholder return of this peer group is calculated as a simple, unweighted average of the return reported by Bloomberg for each of the members of the peer group.

Key performance indicators

Our historical key performance indicators (KPIs) are provided in the table above. We assessed our KPIs as part of our normal planning process. Beginning in the first quarter of 2013, we have adjusted our KPIs for the Group and for our Private Banking & Wealth Management and Investment Banking divisions to reflect our strategic plan, the regulatory environment and the market cycle. Income statement based KPIs will be measured on underlying results, which are non-GAAP financial measures that exclude valuation impacts from movements in own credit spreads and certain other significant items for which a reconciliation to reported results will be provided.

For the Group, we have replaced the Core Results pre-tax income margin KPI with an underlying Core Results cost/income ratio target of below 70%. In addition, we are targeting an underlying return on equity attributable to shareholders above 15%. Our capital measures going forward will continue to be based on compliance with Swiss "Too Big to Fail" and Basel III capital standards and are targeting a Look-through Swiss Core Capital ratio above 10%. Our KPIs for collaboration revenues and total shareholder return remain unchanged at present and the KPI for net new asset growth will now be measured at the Wealth Management Clients and Asset Management business levels instead of at the Group level.

In our Private Banking & Wealth Management division, we will target net new asset growth of 6% for both the Wealth Management Clients and the Asset Management businesses.

We will also target an underlying divisional cost/income ratio of 65%.

In our Investment Banking division, we will replace the pre-tax income margin KPI with an underlying cost/income ratio target of 70%.

Collaboration revenues

Collaboration revenues are calculated as the percentage of the Group's net revenues represented by the aggregate collaboration revenues arising when more than one of the Group's divisions participates in a transaction. Collaboration revenues are measured by a dedicated governance structure and implemented through an internal revenue sharing structure. Only the net revenues generated by a transaction are considered. Position risk related to trading revenues, private equity and other investment-related gains, valuation adjustments and centrally managed treasury revenues are not included in collaboration revenues. Collaboration revenues are currently reported on the basis of the organizational structure prior to the establishment of the single Private Banking & Wealth Management division.

Capital trends and capital distribution proposal

Our consolidated Bank for International Settlements tier 1 ratio under Basel II.5 was strong at 19.4% as of the end of 2012, compared to 15.2% as of the end of 2011. The increase reflected decreased risk-weighted assets and increased tier 1 capital.

At the Annual General Meeting (AGM) on April 26, 2013, the Board of Directors will propose for the financial year 2012 a distribution of CHF 0.10 per share in cash out of reserves from capital contributions. In addition, the Board of Directors will propose the distribution of new shares (stock dividend). The new shares for the stock dividend will be paid in at the par value of CHF 0.04 per share out of reserves from capital contributions. The distribution out of reserves from capital contributions (cash and stock) will be free of Swiss withholding tax and will not be subject to income tax for Swiss resident individuals holding the shares as a private investment. The ex-dividend date has been set to April 30, 2013 (for cash distribution and stock dividend).

The stock dividend will be distributed to all shareholders as follows: for every share that they own, shareholders will receive a non-tradable right to the receipt of a given number of new shares for free. Following distribution, the rights will automatically be exchanged for new shares at the ratio determined by the Board of Directors immediately prior to the AGM. The Board of Directors will set the subscription ratio in such a way that the theoretical value of each right will be approximately CHF 0.65.

- ▶ Refer to "Capital management" in III – Treasury, Risk, Balance sheet and Off-balance sheet for further information on capital trends.

Cost savings and strategy implementation

We continued to adapt our client-focused, capital-efficient strategy to optimize our use of capital and improve the cost structure. In 2011, we began implementing a number of cost efficiency initiatives with a goal of achieving a total of CHF 3.0 billion of expense reductions in 2013, CHF 3.5 billion in 2014 and CHF 4.0 billion in 2015. These targets have been measured against our annualized 6M11 expense run rate measured at constant foreign exchange rates and adjusted to exclude business realignment and other significant non-operating expenses and variable compensation expenses. The majority of the expected future savings will be realized from shared infrastructure and support services across the Group, mainly through the consolidation of fragmented and duplicate functions globally and the continued consolidation of IT applications and functions. We have also targeted further savings within our two operating divisions. Within Investment Banking, we expect to deliver cost benefits from initiatives already completed in 2012 and from continuing to rationalize businesses in certain geographies. Within Private Banking & Wealth Management, we expect to deliver cost benefits from the integration of Clariden Leu completed in 2012, streamlining of front office support functions and the offshore affluent client coverage model and simplification of our operating platform.

As a result of the integration of our former reported Private Banking and Asset Management divisions into the new Private Banking & Wealth Management division and other measures, we are updating our overall cost savings targets to CHF 3.2 billion in 2013, CHF 3.8 billion by the end of 2014 and CHF 4.4 billion by the end of 2015, adjusted on the same basis as described above. We expect to incur approximately CHF 1.6 billion of business realignment costs associated with these measures during the course of 2013 to 2015.

We incurred CHF 680 million of business realignment costs associated with these measures in 2012.

In October 2012, we announced a balance sheet reduction of CHF 130 billion for the Group by year-end 2013 to under CHF 900 billion on a foreign exchange neutral basis compared to the end of the third quarter of 2012. As of the end of 2012, total assets were CHF 924 billion, down CHF 125 billion, or 12%, from 2011.

- ▶ Refer to "Strategy" in I – Information on the company for further information.

Share Issuances

In April 2012, the AGM approved a distribution against reserves from capital contributions instead of a dividend paid from net income for the year 2011 in the form of shares (scrip dividend) or cash. In May, shareholders made their election and, as a result, 24.2 million new Group shares were issued out of authorized capital, representing approximately 2% of our share capital upon issuance.

In the second quarter 2012, we issued 37.9 million new Group shares in connection with the settlement of vested share-based compensation awards, representing approximately 3.0% of our share capital upon issuance.

In the third quarter 2012, we issued 33.5 million new Group shares to cover the second quarter 2012 purchase of the residual stake in Credit Suisse Hedging-Griffo Investimentos S.A. (Hedging-Griffo), representing approximately 2.5% of our share capital upon issuance.

Risk trends

The prudent taking of risk in line with our strategic priorities is fundamental to our business as a leading global bank and remained a critical focus throughout 2012. Over the course of 2012, we took significant steps to adapt our businesses and our organization to the new regulatory requirements, which predominantly impacted the risk profile of Investment Banking. During 2012, we reduced our Group risk profile and shifted our portfolio toward less capital intense businesses. We continued to invest significantly in our IT infrastructure and further refined our risk appetite framework to ensure an appropriate balance of return and assumed risk, stability of earnings

and capital levels we seek to maintain. In 2012, overall position risk decreased 1%, utilized economic capital decreased 8% and average risk management VaR in US dollars for our trading books decreased 31%.

- ▶ Refer to "Risk management" in III – Treasury, Risk, Balance sheet and Off-balance sheet for further information on risk trends.

Board of Directors and management changes

At our AGM in April 2012, shareholders approved the election of Iris Bohnet and Jean-Daniel Gerber as new members to the Board of Directors, and the re-election of Walter B. Kielholz, Andreas N. Koopmann, Urs Rohner, Richard E. Thornburgh and John Tiner. Peter F. Weibel stepped down from the Board of Directors, having reached the internal age limit. The Board proposes that at the AGM on April 26, 2013, Kai S. Nargolwala, Lead Independent Director of Singapore Telecommunications Ltd., be elected to the Board and that the following members be re-elected to the Board: Jassim Bin Hamad J.J. Al Thani and Noreen Doyle. Robert H. Benmosche, Aziz R.D. Syriani and David W. Syz will retire from the Board of Directors at the AGM 2013.

Effective April 30, 2012, Karl Landert stepped down from the Executive Board and his position as Chief Information Officer. David Mathers, Chief Financial Officer and a member of the Executive Board, also assumed responsibility for the IT organization and since January 1, 2012, for the Group's global Operations functions.

Effective May 31, 2012, Antonio Quintella was appointed as Chairman of Hedging-Griffo and stepped down from the Executive Board and his position as Chief Executive Officer (CEO) Americas. Robert Shafir assumed the role as CEO Americas in addition to his role at the time as CEO Asset Management.

Effective November 30, 2012, Hans-Ulrich Meister and Robert Shafir were appointed to jointly lead the newly created Private Banking & Wealth Management division. As regional CEO, Hans-Ulrich Meister continues to have responsibility for all businesses and clients in the Swiss region. Robert Shafir continues to serve as the CEO of the Americas region.

Effective November 30, 2012, Eric Varvel and Gaël de Boissard were appointed to jointly lead the Investment Banking division. In addition, Eric Varvel was appointed CEO of the Asia Pacific region and Gaël de Boissard took on responsibility as CEO of the Europe, Middle East and Africa (EMEA) region. Gaël de Boissard joined the Executive Board as of January 1, 2013.

As of November 30, 2012, Osama Abbasi stepped down from the Executive Board and his position as CEO of the Asia

Pacific region, Walter Berchtold stepped down from the Executive Board and his position as Chairman Private Banking and Fawzi Kyriakos-Saad stepped down from the Executive Board and his position as CEO of the EMEA region.

Regulatory developments and proposals

Government leaders and regulators continued to focus on reform of the financial services industry, including capital, leverage and liquidity requirements, changes in compensation practices and systemic risk.

- ▶ Refer to "Regulation and supervision" in I – Information on the company for further information on regulatory developments and proposals.

Compensation and benefits

Compensation and benefits for a given year reflect the strength and breadth of the business results and staffing levels and include fixed components, such as salaries, benefits and the amortization of share-based and other deferred compensation from prior-year awards, and a discretionary variable component. The variable component reflects the performance-based variable compensation for the current year. The portion of the performance-based compensation for the current year deferred through share-based and other awards is expensed in future periods and is subject to vesting and other conditions.

Our shareholders' equity reflects the effect of share-based compensation. Share-based compensation expense (which is generally based on fair value at the time of grant) reduces equity, however, the recognition of the obligation to deliver the shares increases equity by a corresponding amount. Equity is generally unaffected by the granting and vesting of share-based awards, including through the issuance of shares from approved conditional capital. The Group issues shares from conditional capital to meet its obligations to deliver share-based compensation awards. If Credit Suisse purchases shares from the market to meet its obligation to employees, these purchased treasury shares reduce equity by the amount of the purchase price. Shareholders' equity also includes, as additional paid-in capital, the excess tax benefits/charges that arise at settlement of share-based awards.

- ▶ Refer to "Compensation" in IV – Corporate Governance and Compensation for further information.
- ▶ Refer to "Consolidated statements of changes in equity" and "Note 27 – Employee deferred compensation" in V – Consolidated financial statements – Credit Suisse Group for further information.
- ▶ Refer to "Tax benefits associated with share-based compensation" in Note 26 – Tax in V – Consolidated financial statements – Credit Suisse Group for further information.

Allocations and funding

Revenue sharing and cost allocation

Responsibility for each product is allocated to a segment, which records all related revenues and expenses. Revenue-sharing and service level agreements govern the compensation received by one segment for generating revenue or providing services on behalf of another. These agreements are negotiated periodically by the relevant segments on a product-by-product basis.

The aim of revenue-sharing and service level agreements is to reflect the pricing structure of unrelated third-party transactions.

Corporate services and business support in finance, operations, including human resources, legal and compliance, risk management and IT are provided by the Shared Services area. Shared Services costs are allocated to the segments and Corporate Center based on their requirements and other relevant measures.

Funding

We centrally manage our funding activities. New securities for funding and capital purposes are issued primarily by the Bank. The Bank lends funds to our operating subsidiaries and affiliates on both a senior and subordinated basis, as needed, the latter typically to meet capital requirements, or as desired by management to capitalize on opportunities. Capital is distributed to the segments considering factors such as regulatory capital requirements, utilized economic capital and the historic and future potential return on capital.

Transfer pricing, using market rates, is used to record net revenues and expenses in each of the segments for this capital and funding. Our funds transfer pricing system is designed to allocate to our businesses funding costs in a way that incentivizes their efficient use of funding. Our funds transfer pricing system is an essential tool that allocates to the businesses the short-term and long-term costs of funding their balance sheet and the costs associated with funding liquidity and balance sheet items, such as goodwill, which are beyond the control of individual businesses. This is of greater importance in a stressed capital markets environment where raising funds is more challenging and expensive. Under this system, our businesses are also credited to the extent they provide long-term stable funding.

Fair valuations

◉ Fair value can be a relevant measurement for financial instruments when it aligns the accounting for these instruments with how we manage our business. The levels of the fair value hierarchy as defined by the relevant accounting guidance are not a measurement of economic risk, but rather an indication of the observability of prices or valuation inputs.

► Refer to "Note 1 – Summary of significant accounting policies" and "Note 33 – Financial instruments" in V – Consolidated financial statements – Credit Suisse Group for further information.

Based on the Group's regular review of observable parameters used in its pricing models, in 2012 the Group extended the adoption of overnight indexed swap discounting, instead of other reference rates such as ◉ LIBOR, to those businesses in fixed income where the adoption had not occurred and to certain equity derivatives, which resulted in a loss of CHF 57 million.

The fair value of the majority of the Group's financial instruments is based on quoted prices in active markets (level 1) or observable inputs (level 2). These instruments include government and agency securities, certain ◉ commercial paper, most investment grade corporate debt, certain high yield debt securities, exchange-traded and certain ◉ over-the-counter (OTC) derivative instruments and most listed equity securities.

In addition, the Group holds financial instruments for which no prices are available and which have little or no observable inputs (level 3). For these instruments, the determination of fair value requires subjective assessment and judgment depending on liquidity, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. In such circumstances, valuation is determined based on management's own judgments about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These instruments include certain OTC derivatives, including equity and credit derivatives, certain corporate equity-linked securities, mortgage-related and ◉ collateralized debt obligation (CDO) securities, private equity investments, certain loans and credit products, including leveraged finance, certain syndicated loans and certain high yield bonds, and life finance instruments.

Models were used to value these products. Models are developed internally and are reviewed by functions independent of the front office to ensure they are appropriate for current market conditions. The models require subjective assessment and varying degrees of judgment depending on liquidity, concentration, pricing assumptions and risks affecting the specific instrument. The models consider observable and unobservable parameters in calculating the value of these products, including certain indices relating to these products. Consideration of these indices is more significant in periods of lower market activity.

As of the end of 2012, 51% and 38% of our total assets and total liabilities, respectively, were measured at fair value.

While the majority of our level 3 assets are recorded in Investment Banking, some are recorded in Private Banking & Wealth Management's Asset Management business, specifically certain private equity investments. Total assets recorded as level 3 declined by CHF 11.5 billion during 2012, primarily reflecting decreases in trading assets, loans held-for-sale and central bank funds sold, securities purchased under resale agreements and securities borrowing transactions. The decrease in trading assets primarily reflected net transfers out of level 3 due to improved observability of pricing data and net settlements. The decreases in loans held-for-sale and central bank funds sold, securities purchased under resale agreements and securities borrowing transactions were primarily due to net settlements.

Our level 3 assets, excluding noncontrolling interests and assets of consolidated VIEs that are not risk-weighted assets under the Basel framework, were CHF 29.7 billion, compared to CHF 39.3 billion as of the end of 2011. As of the end of 2012, these assets comprised 3% of total assets and 7% of total assets measured at fair value, both adjusted on the same basis, compared to 4% and 8% as of the end of 2011, respectively.

We believe that the range of any valuation uncertainty, in the aggregate, would not be material to our financial condition, however, it may be material to our operating results for any particular period, depending, in part, upon the operating results for such period.

Personnel

Headcount at the end of 2012 was 47,400, down 2,300 from the end of 2011. This reflected reductions in headcount of 3,200 employees in connection with our cost efficiency initiatives in Investment Banking and Private Banking & Wealth Management and the sale of Wincasa AG, a real estate services group, offset by graduate hiring and contractor employee conversion. Compared to year-end 2010, headcount decreased 2,700.

- [Refer to "Overview" in IV – Corporate Governance and Compensation – Corporate Governance for additional information on personnel.](#)

Private Banking & Wealth Management

In 2012, we reported income before taxes of CHF 3,775 million and net revenues of CHF 13,541 million with an improved pre-tax margin of 27.9% compared to 2011. We attracted net new assets of CHF 10.8 billion, mainly from emerging markets and our ultra-high-net-worth individual client segment.

Results overview

For 2012, income before taxes was CHF 3,775 million, up 27% compared to 2011. Net revenues of CHF 13,541 million were stable compared to 2011, with lower recurring commissions and fees offset by higher other revenues. Transaction- and performance-based revenues and net interest income were stable. Lower recurring commissions and fees mainly reflected lower investment product management fees and lower discretionary mandate management fees. Other revenues of CHF 448 million were higher compared to 2011, mainly reflecting a gain of CHF 384 million on the sale of our remaining ownership interest in Aberdeen in 2012, partially offset by lower investment-related gains and impairments related to AMF.

Provision for credit losses in 2012 was CHF 182 million compared to CHF 111 million in 2011 on a net loan portfolio

of CHF 208 billion, including higher new provisions and lower releases in 2012 compared to 2011.

Total operating expenses were CHF 9,584 million, down 8% compared to 2011. Excluding litigation provisions of CHF 478 million in connection with the German and US tax matters in 2011, total operating expenses decreased by CHF 313 million, or 3%, reflecting lower compensation and benefits, driven by lower headcount, and lower general and administrative expenses, reflecting our efficiency measures.

Assets under management of CHF 1,250.8 billion were CHF 65.6 billion higher compared to the end of 2011, driven primarily by positive market movements and by net new assets of CHF 10.8 billion, partially offset by adverse foreign exchange-related movements. Wealth Management Clients contributed net new assets of CHF 19.0 billion with inflows particularly from emerging markets and from our UHNWI client segment, partially offset by outflows in Western Europe

and outflows relating to the integration of Clariden Leu. Corporate & Institutional Clients reported net new assets of CHF 1.5 billion. Asset Management reported net asset outflows of CHF 9.0 billion primarily from multi-asset class solutions which included redemptions of CHF 14.7 billion from a single fixed income mandate, partially offset by inflows in index strategies and credit products. Assets under management continued to reflect a risk-averse asset mix, with investments in less complex, lower-margin products and a significant portion of assets in cash and money market products.

For 2011, we reported income before taxes of CHF 2,961 million, down 29% compared to 2010. Net revenues of CHF 13,447 million decreased 8% compared to 2010. The adverse impact of the lower average exchange rate of major currencies against the Swiss franc on net revenues and income before taxes was CHF 1,071 million and CHF 597 million, respectively. Excluding this adverse foreign exchange impact, revenues were stable compared to 2010.

Recurring commissions and fees in 2011 compared to 2010 were down 7% as average assets under management decreased slightly, mainly due to the adverse foreign exchange translation impact. In an ongoing low interest rate environment net interest income decreased 6%. Transaction- and performance-based revenues decreased 8%, reflecting lower client activity and lower transaction-based volumes. Other revenues were down 35%, reflecting gains in 2010 on the sale of securities purchased from our money market funds and lower investment-related gains in 2011.

Provision for credit losses in 2011 was CHF 111 million compared to CHF 17 million in 2010, mainly driven by lower releases in 2011 compared to 2010.

Total operating expenses of CHF 10,375 million in 2011 were stable compared to 2010. Excluding 2011 litigation provisions in connection with the German and US tax matters, operating expenses decreased 5%. Compensation and benefits decreased 5%, reflecting a favorable foreign exchange translation impact and lower discretionary performance-related compensation expense.

Assets under management as of the end of 2011 were CHF 1,185.2 billion, 1.7% lower compared to the end of 2010, as strong net new assets of CHF 46.6 billion were mainly offset by adverse market movements. Wealth Management Clients contributed net new assets of CHF 37.4 billion with strong contributions from emerging markets and from our UHNWI client segment. Corporate & Institutional Clients reported net new assets of CHF 5.3 billion. Asset Management reported net new assets of CHF 5.2 billion, primarily from inflows in real estate, commodities, multi-asset class solutions and ETFs, partially offset by net outflows from emerging markets and from outflows from discontinued businesses and investment sales. Average assets under management in 2011 decreased slightly, as net new assets were more than offset by adverse market movements and foreign exchange-related movements.

¹ Assets managed by Asset Management for Wealth Management Clients and Corporate & Institutional Clients.

Pre-tax income margin (KPI)

Results detail

In connection with the integration relating to Private Banking & Wealth Management, we reviewed and adjusted our KPI targets.

- Refer to “Key performance indicators” in Core Results – Information and developments for further information.

The following provides a comparison of our 2012 results versus 2011 and 2011 results versus 2010.

Net revenues

Net interest income includes a term spread credit on stable deposit funding and a term spread charge on loans. Recurring commissions and fees includes investment product management, discretionary mandate and other asset management-related fees and fees for general banking products and services. Transaction- and performance-based revenues arise primarily from brokerage and product issuing fees, foreign exchange fees from client transactions, performance-based fees related to assets under management and custody assets, trading and sales income, placement fees, equity participations income and other transaction-based income. Other revenues include investment-related gains and losses and equity participations and other gains and losses.

2012 vs 2011: Stable at CHF 13,541 million

Net revenues were stable, with lower recurring commissions and fees offset by higher other revenues. Transaction- and performance-based revenues and net interest income were stable. Lower recurring commissions and fees mainly reflected lower investment product management fees, driven by lower fund management fees, and lower discretionary mandate management fees. Other revenues of CHF 448 million mainly reflected a CHF 384 million gain from the sales of our remain-

ing ownership interest in Aberdeen, a CHF 45 million gain from the sale of Wincasa and a CHF 41 million gain related to the sale of a non-core business, partially offset by lower investment-related gains, which included losses of CHF 82 million in connection with the planned sale of certain private equity investments, impairment charges of CHF 61 million related to AMF and impairments of a joint venture investment. Transaction- and performance-based revenues were stable with higher performance fees from our Hedging-Griffo subsidiary, single manager hedge funds and credit strategies, higher revenues from integrated solutions and gains related to a change in life insurance accounting, offset by lower brokerage and product issuing fees and lower equity participations income. Net interest income was stable, as the impact of lower deposit margins, reflecting the continued low interest rate environment, and stable loan margins were offset by higher average deposit and loan volumes.

2011 vs 2010: Down 8% from CHF 14,580 million to CHF 13,447 million

The decrease was driven by lower revenues across all revenue categories and an adverse foreign translation impact of CHF 1,071 million. Recurring commissions and fees declined due to lower revenues across most categories, mainly reflecting the adverse foreign exchange translation impact, including the impact on average assets under management. Net interest income decreased due to lower deposit margins on lower average volumes and lower loan margins on slightly higher average volumes. Lower deposit margins reflected the low interest environment with a relatively flat interest curve. Transaction- and performance-based revenues were lower, mainly due to significantly lower brokerage and product issuing fees, particularly from equities and bonds, and lower trading and sales income, both reflecting lower client activity and lower transaction-based volumes. Lower other revenues reflected gains in 2010 on the sale of securities purchased from our money market funds, and lower investment-related gains in 2011, partially offset by lower equity participations losses and a decrease in fair value losses on the Clock Finance transactions.

Provision for credit losses

The Wealth Management Clients loan portfolio is substantially comprised of residential mortgages in Switzerland and loans collateralized by securities. Our Corporate & Institutional Clients loan portfolio has relatively low concentrations and is mainly secured by mortgages, securities and other financial collateral.

2012 vs 2011: Up 64% from CHF 111 million to CHF 182 million

Provision for credit losses of CHF 182 million was up CHF 71 million compared to 2011, including 14% higher new provisions and 19% lower releases of provisions compared to

2011. Provisions for credit losses reflected net provisions of CHF 110 million in Wealth Management Clients and CHF 72 million in Corporate & Institutional Clients.

2011 vs 2010: Up from CHF 17 million to CHF 111 million

Provision for credit losses of CHF 111 million was up CHF 94 million compared to 2010, driven by 39% lower releases of provisions compared to 2010. New provisions were 4% lower. Provisions for credit losses reflected net provisions of CHF 78 million in Wealth Management Clients and CHF 33 million in Corporate & Institutional Clients.

Operating expenses

Compensation and benefits

2012 vs 2011: Down 3% from CHF 5,729 million to CHF 5,561 million

Compensation and benefits decreased slightly, driven by lower salary expense, reflecting lower headcount, and lower discretionary performance-related compensation.

2011 vs 2010: Down 5% from CHF 6,041 million to CHF 5,729 million

The decrease reflected a favorable foreign exchange translation impact and lower discretionary performance-related compensation expense.

General and administrative expenses

2012 vs 2011: Down 16% from CHF 3,818 million to CHF 3,219 million

The decrease primarily reflected 2011 litigation provisions of CHF 478 million in connection with the German and US tax matters. Excluding these litigation provisions, general and administrative expenses decreased CHF 121 million, reflecting our cost efficiency measures, including lower marketing and travel and entertainment expenses.

2011 vs 2010: Up 9% from CHF 3,502 million to CHF 3,818 million

The increase primarily reflected the litigation provisions in 2011. 2010 included CHF 44 million of provisions related to auction rate securities. Excluding these litigation provisions, general and administrative expenses decreased slightly.

¹ Reflects gains related to the sale of a non-core business in 2012. ² Net revenues divided by average assets under management.

Wealth Management Clients

Net revenues

Net interest income

2012 vs 2011: Stable at CHF 3,344 million

Stable net interest income reflected lower deposit margins and stable loan margins on higher average volumes.

2011 vs 2010: Down 8% from CHF 3,631 million to CHF 3,327 million

The decrease primarily reflected lower deposit margins on lower average volumes, and lower loan margins on slightly higher average volumes.

Recurring commissions and fees

2012 vs 2011: Down 6% from CHF 3,309 million to CHF 3,106 million

The decrease reflected lower revenues across all major revenue categories, primarily lower investment product management fees, driven by lower fund management fees, and lower discretionary mandate management fees.

2011 vs 2010: Down 7% from CHF 3,540 million to CHF 3,309 million

The decrease reflected lower revenues in investment product management fees, discretionary mandate management fees and banking services fees, partially offset by higher investment account and services fees. Overall the decrease was driven by lower average assets under management, mainly due to adverse market movements and the strengthening of the average exchange rate of the Swiss franc against major currencies compared to 2010.

Transaction- and performance-based revenues

2012 vs 2011: Stable at CHF 2,461 million

Stable transaction- and performance-based revenues reflected lower brokerage and product issuing fees, primarily in equities and mutual funds, and lower foreign exchange fees from client transactions, offset by gains of CHF 35 million in 2012 related to a change in life insurance accounting, higher performance fees from Hedging-Griffo and higher revenues from integrated solutions.

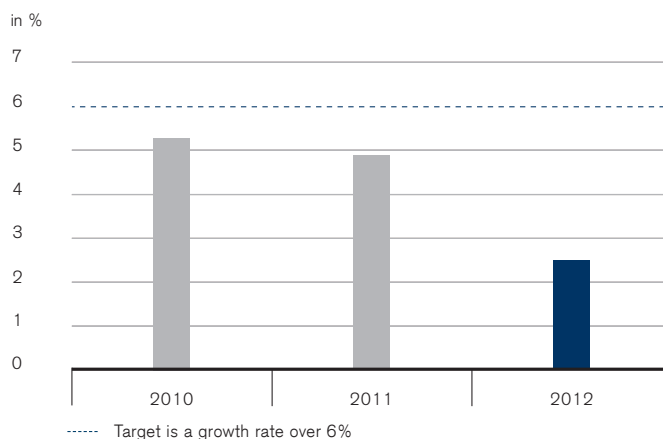

2011 vs 2010: Down 15% from CHF 2,868 million to CHF 2,449 million

The decline was driven by substantially lower brokerage and product issuing fees, primarily in equities and bonds, and lower trading and sales income, both reflecting significantly lower client activity and lower transaction-based volumes.

Gross margin

Our gross margin was 114 basis points in 2012, eight basis points lower compared to 2011 and 16 basis points lower than 2010. Compared to 2011, the net interest income margin decreased three basis points, reflecting stable net interest income and 4.8% higher average assets under management. The recurring commissions and fees margin decreased four basis points in 2012, as recurring commissions and fees decreased 6% while average assets under management increased. The transaction- and performance-based margin decreased two basis points, reflecting stable transaction- and performance-based revenues and the increase in average assets under management.

Corporate & Institutional Clients

Net revenues

Net interest income

2012 vs 2011: Up 2% from CHF 1,185 million to CHF 1,207 million

The slight increase reflected lower deposit margins and slightly lower loan margins on higher average volumes.

2011 vs 2010: Stable at CHF 1,185 million

Stable net interest income reflected slightly higher deposit margins on higher average volumes and lower loan margins on slightly higher average volumes.

Recurring commissions and fees

2012 vs 2011: Up 7% from CHF 421 million to CHF 450 million

The increase was driven by higher banking services fees and higher investment account and services fees, primarily from custody services, partially offset by lower investment product management fees, mainly from lower fund management fees.

2011 vs 2010: Down 6% from CHF 446 million to CHF 421 million

The decline was mainly driven by lower investment account and services fees and lower banking services fees.

Transaction- and performance-based revenues

2012 vs 2011: Stable at CHF 479 million

Stable transaction- and performance-based revenues reflected higher trading and sales income and higher revenues from integrated solutions, primarily offset by lower brokerage and product issuing fees, mainly from interest rate swaps.

2011 vs 2010: Up 7% from CHF 445 million to CHF 476 million

The increase was driven by higher foreign exchange fees from client transactions, higher brokerage and product issuing fees and higher revenues from integrated solutions, partially offset by lower trading and sales income.

¹ Includes allocated funding costs. ² Fee-based revenues divided by average assets under management.

Asset Management

Net revenues

Fee-based revenues

2012 vs 2011: Up 1% from CHF 1,957 million to CHF 1,981 million

The increase primarily reflected higher performance fees offset by lower carried interest on private equity gains and lower equity participations income. Higher performance fees were recognized from Hedging-Griffo, credit strategies, single-manager hedge funds and from the management of the 2008 Partner Asset Facility (PAF). Carried interest from realized private equity gains in 2012 was lower than a strong 2011, which included the sale of a portfolio company in the health-care sector. Equity participations income was lower due to the sale of our ownership interest in Aberdeen and from lower revenues in single-manager hedge funds. The decrease in placement, transaction and other fees mainly reflected lower private

equity placement fees. Asset management fees decreased slightly as a result of lower average assets under management in traditional products and hedge fund of funds and from the closure and restructuring of certain product lines and private equity investment sales in 2011, partially offset by higher fees from a new secondary private equity fund and from asset inflows into index products.

2011 vs 2010: Down 1% from CHF 1,985 million to CHF 1,957 million

The decrease primarily reflected a decrease in asset management fees and performance fees offset by higher carried interest on realized private equity gains, private equity placement fees and equity participations income. The decrease in asset management fees resulted from the adverse foreign exchange translation impact, the spin-off of our real estate private equity fund and our credit hedge fund in 2010, the end of our agreement to service Aberdeen assets on a transitional basis and lower fees in traditional products and hedge fund of funds.

These were partially offset by higher fees from index products, emerging markets strategies and credit strategies. Within performance fees and carried interest, we recognized higher carried interest from realized private equity gains, partially offset by lower performance fees from Hedging-Griffo, single manager hedge funds and the management of the PAF. The increase in equity participations income was mainly due to higher income in single manager hedge funds.

Investment-related gains/(losses)

2012 vs 2011: Down 49% from CHF 305 million to CHF 155 million

In 2012, the gains of CHF 155 million reflected gains in hedge fund investments and gains in private equity investments mainly in the energy, healthcare and transportation sectors, partially offset by losses in private equity investments in the technology sector, and losses of CHF 82 million in connection with the planned sale of certain private equity investments. In 2011, the gains of CHF 305 million reflected gains in private equity investments mainly in the healthcare, industrial, commodities and transportation sectors, partially offset by losses in the technology sector.

2011 vs 2010: Down 29% from CHF 432 million to CHF 305 million

In 2011, the gains of CHF 305 million reflected gains in private equity investments mainly in the healthcare, industrial, commodities and transportation sectors, partially offset by losses in the technology sector. In 2010, the gains of CHF 432 million reflected gains in private equity investments mainly in the energy, industrial and commodities sectors, and in credit-related investments.

Equity participations and other gains/(losses)

2012 vs 2011: Up from CHF 3 million to CHF 361 million

In 2012, we recognized a gain of CHF 384 million from the sales of our remaining 19.8% ownership interest in Aberdeen and a gain of CHF 45 million from the sale of Wincasa, partially offset by impairment charges of CHF 61 million related to AMF and impairments of a joint venture investment. The gain in 2011 reflected the partial sale of our ownership interest in Aberdeen, reducing our interest in Aberdeen to 19.8% from 21.0%, partially offset by an impairment of the same joint venture investment.

2011 vs 2010: Up from CHF (105) million to CHF 3 million

The gain in 2011 reflected the partial sale of our ownership interest in Aberdeen partially offset by the impairment of the joint venture investment. The losses in 2010 resulted from impairments related to AMF and a reduction in our ownership interest in Aberdeen due to an issuance of shares by Aberdeen.

¹ Excludes our portion of assets under management from our equity participation in Aberdeen. ² Includes outflows for private equity assets reflecting realizations at cost and unfunded commitments on which a fee is no longer earned. ³ Includes an adjustment to present private equity assets under management at cost for invested assets and unfunded commitments only where a fee was earned. Periods prior to 3Q11 have not been restated. ⁴ Primarily private equity investments.

Investment Banking

For 2012, we reported income before taxes of CHF 2,002 million and net revenues of CHF 12,558 million. We delivered strong results in 2012, with revenues increasing 20% from 2011, despite challenging market conditions and subdued levels of client activity in many of our businesses. In addition, we made substantial progress in executing our refined strategy, including lowering our cost base and reducing our Basel III risk-weighted assets from USD 242 billion at the end of 2011 to USD 187 billion at the end of 2012.

¹ As part of the ongoing review to improve risk management approaches and methodologies, the average one-day risk management VaR measure was revised in the second quarter of 2011. Refer to "Market risk" in III – Treasury, Risk, Balance sheet and off-balance sheet – Risk management for further information on VaR and changes in VaR methodology. ² As of January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. Our calculations of Basel III risk-weighted assets are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the final implementation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. We use estimated risk-weighted assets as of December 31, 2012, as if the Basel III framework had been implemented in Switzerland as of such date.

Results overview

In 2012, we reported income before taxes of CHF 2,002 million and net revenues of CHF 12,558 million, compared to a loss before taxes of CHF 593 million and net revenues of CHF 10,460 million in 2011. We delivered strong results in 2012 despite challenging market conditions and subdued levels of client activity in many of our businesses. Relative to 2011, our net revenues increased 20% on materially lower  Basel III  risk-weighted assets. In addition, we made substantial progress in reducing our cost base during the year. Our results demonstrated our strong franchise momentum and successful execution of our refined strategy to increase operating and capital efficiency.

- Refer to "Progress across key strategic pillars" in I – Information on the company – Strategy and "Investment Banking" in I – Information on the company – Our businesses for further information.

Fixed income sales and trading revenues were substantially higher compared to a weak 2011, reflecting significantly higher revenues from securitized products and global credit products in 2012, due to improved market conditions. Substantial inventory reductions in these businesses also resulted in lower revenue volatility in 2012. Revenues from emerging markets, corporate lending and foreign exchange were also higher. We incurred losses of CHF 589 million from businesses we are exiting in 2012 compared to losses of CHF 387 million in 2011.

Equity sales and trading revenues were up modestly as stronger revenues in convertibles, derivatives and prime services were partially offset by declines in cash equities due to lower industry-wide trading volumes compared to 2011.

Underwriting and advisory results were higher compared to 2011, due to strong debt underwriting revenues, particularly in leveraged finance, partially offset by lower equity underwriting revenues. Additionally, M&A fees increased as market share

gains in completed M&A transactions more than offset lower industry-wide completed M&A activity.

We had net releases of provision for credit losses of CHF 12 million in 2012 compared to provision for credit losses of CHF 76 million in 2011, driven by significantly lower provisions and higher releases in 2012.

Total operating expenses were CHF 10,568 million, down 4%, primarily driven by a 6% decrease in compensation and benefits. The decrease in compensation and benefits was due to lower deferred compensation expense from prior-year awards, lower salaries and other employee benefits, reflecting lower headcount, and lower discretionary performance-related compensation expense. Total other operating expenses were flat as a decline in commission expenses was offset by a 5% increase in general and administrative expenses, primarily from higher litigation provisions compared to 2011.

Results in 2012 were impacted by the strengthening of the average rate of the US dollar against the Swiss franc, compared to 2011, which favorably impacted revenues and adversely impacted expenses. In Swiss francs, net revenues increased 20% and total operating expenses declined 4%. In US dollars, net revenues increased 15% and total operating expenses declined 9% from 2011.

For 2011, we reported a loss before taxes of CHF 593 million, compared to income before taxes of CHF 3,594 million in 2010. Net revenues were CHF 10,460 million, compared to CHF 15,873 million in 2010. Results in many of our businesses in 2011 were negatively impacted by significantly lower levels of client activity and a volatile trading environment compared to 2010. In light of increasing regulatory and capital requirements and continued challenging market and economic conditions, we announced a refinement of our Investment Banking strategy in November 2011, including an accelerated risk-weighted asset reduction plan. In 2011, we reduced our Basel III risk-weighted assets by USD 80 billion, or 25%, to USD 242 billion.

Fixed income sales and trading revenues were significantly lower in 2011, reflecting challenging trading conditions, subdued client activity levels across most businesses and the execution of our risk reduction strategy. We incurred losses of CHF 512 million from businesses we are exiting and from the reduction of risk-weighted assets in 2011.

Our equity sales and trading results declined primarily due to lower levels of client activity in cash equities. Prime services revenues declined, reflecting the foreign exchange translation impact. In US dollars, we had record prime services results due to higher client activity and higher client balances. We also had weak results in derivatives, reflecting reduced customer flow. In 2011, we maintained our market share and leading market share rankings in cash equities and prime services.

Underwriting and advisory results were lower in 2011, reflecting a decline in industry-wide capital issuance levels and a decrease in our completed M&A market share from 2010, respectively.

We had provision for credit losses of CHF 76 million in 2011 compared to net releases of provision of CHF 96 million in 2010.

Total operating expenses were CHF 10,977 million, down 11%, reflecting a 17% decrease in compensation and benefits.

The weakening of the average rate of the US dollar against the Swiss franc in 2011 adversely impacted revenues and favorably impacted expenses. In US dollars, net revenues were 23% lower and total operating expenses were up 4% compared to 2010.

Pre-tax income margin (KPI)

Results detail

As part of our normal planning process, we reviewed and adjusted our KPI targets.

- Refer to "Key performance indicators" in Core Results – Information and developments for further information.

The following provides a comparison of our 2012 results versus 2011 and 2011 results versus 2010.

Net revenues

Debt underwriting

2012 vs 2011: Up 15% from CHF 1,404 million to CHF 1,617 million

The increase was primarily due to higher results in leveraged finance, reflecting significantly higher industry-wide high yield issuance volumes. We also had higher investment grade revenues, driven by higher industry-wide issuance volumes that more than offset a modest decline in market share.

2011 vs 2010: Down 28% from CHF 1,960 million to CHF 1,404 million

The decrease was primarily due to weaker results in leveraged finance, reflecting reduced industry-wide high yield issuance volumes. We also had lower results in investment grade issuance, driven by slightly lower market share.

Equity underwriting

2012 vs 2011: Down 23% from CHF 713 million to CHF 552 million

The decrease was due to lower revenues from follow-on offerings as lower market share more than offset higher industry-wide issuance volumes. We also had lower revenues from initial public offerings (IPOs), reflecting lower industry-wide issuance volumes compared to 2011.

2011 vs 2010: Down 20% from CHF 894 million to CHF 713 million

The decrease was primarily driven by lower revenues from IPOs, reflecting lower industry-wide issuance volumes compared to 2010. We also had lower results from convertibles and follow-on offerings.

Advisory and other fees

2012 vs 2011: Up 22% from CHF 856 million to CHF 1,042 million

The increase reflected substantially higher M&A fees and other advisory fees, driven by higher completed M&A market share, more than offsetting lower completed M&A industry-wide activity. We also had higher private placement fees, reflecting a large Private Investment in Public Equity transaction in the energy sector in 3Q12.

2011 vs 2010: Down 21% from CHF 1,089 million to CHF 856 million

The decrease reflected lower M&A fees and other advisory fees, driven by a slight decline in completed M&A market share.

Fixed income sales and trading

2012 vs 2011: Up 60% from CHF 3,341 million to CHF 5,349 million

The increase was primarily due to significantly improved results in securitized products compared to a weak performance in 2011. The weak 2011 results reflected valuation reductions on client inventory, including commercial mortgage-backed securities (CMBS) and residential mortgage-backed securities (RMBS), losses on sales of client inventory as we reduced risk-weighted assets, and subdued client flow. In 2012, we had higher revenues in global credit products due to improved market conditions and increased client appetite for high-yielding products. Substantial inventory reductions in securitized products and global credit products in late 2011 and early 2012 resulted in lower revenue volatility in 2012. In addition, we had higher results in emerging markets, reflecting strong performance in Latin America. Revenues from corporate lending and foreign exchange also increased. These increases were offset by lower revenues in global rates due to subdued client activity. In addition, we incurred losses of CHF 589 million from businesses we are exiting in 2012 compared to losses of CHF 387 million in 2011. At the end of 2012, fixed income Basel III risk-weighted assets totaled USD 122 billion, a reduction of USD 54 billion, or 31% from a year ago, while revenues increased significantly.

2011 vs 2010: Down 48% from CHF 6,401 million to CHF 3,341 million

The decrease was primarily due to significantly weaker results in securitized products, reflecting valuation reductions on client inventory, including CMBS and RMBS, losses on sales of client inventory as we reduced risk-weighted assets, and subdued client flow. We also had weaker results in our credit business, including leveraged finance and investment grade trading, primarily reflecting mark-to-market losses on client inventory. Revenues were lower across all other fixed income businesses as well, including global rates, foreign exchange, emerging markets, corporate lending, and commodities, reflecting difficult trading conditions. In addition, we incurred losses of CHF 512 million from businesses we are exiting and from the reduction of risk-weighted assets. At the end of 2011, fixed income Basel III risk-weighted assets totaled USD 176 billion, a reduction of USD 93 billion, or 35% from 2010.

Equity sales and trading

2012 vs 2011: Up 1% from CHF 4,279 million to CHF 4,330 million

The increase was due to significantly higher revenues in convertibles driven by improved market conditions. We also had improved derivatives results compared to weak performance in 2011. We had resilient results in prime services with increased market share ranking and higher client balances that more than offset lower hedge fund activity and leverage levels. These revenue increases were offset by lower results in cash equities due to muted client activity and lower trading volumes compared to 2011.

2011 vs 2010: Down 25% from CHF 5,683 million to CHF 4,279 million

The decrease was due to lower cash equities results, driven by reduced client trading activity. Prime services revenues declined, reflecting the foreign exchange translation impact. In US dollars, we had record prime services results due to higher client activity and higher client balances. We also had weak results in derivatives, reflecting reduced customer flow. In 2011, we maintained our market share and leading market share rankings in cash equities and prime services.

Provision for credit losses

2012 vs 2011: From CHF 76 million to CHF (12) million

The change reflected significantly higher provisions in 2011 from a guarantee provided to a third-party bank, and higher releases in 2012.

2011 vs 2010: From CHF (96) million to CHF 76 million

The change reflected higher provisions, mainly against a guarantee provided in a prior year to a third-party bank, and lower releases and recoveries.

Operating expenses

Compensation and benefits

2012 vs 2011: Down 6% from CHF 6,471 million to CHF 6,070 million

The decrease was primarily driven by lower deferred compensation expense from prior-year awards, lower salaries and other employee benefits, reflecting lower headcount, and lower discretionary performance-related compensation expense.

2011 vs 2010: Down 17% from CHF 7,811 million to CHF 6,471 million

The decrease was primarily driven by lower deferred compensation expense from prior-year awards, lower discretionary performance-related compensation expense, reflecting the lower results, and lower salary expense.

General and administrative expenses

2012 vs 2011: Up 5% from CHF 3,388 million to CHF 3,551 million

The increase reflected the foreign exchange translation impact. In US dollars, expenses decreased 1%, reflecting lower professional service fees and other expenses, primarily offset by higher litigation provisions incurred during the year.

2011 vs 2010: Stable from CHF 3,369 million to CHF 3,388 million

General and administrative expenses reflected the foreign exchange translation impact. In US dollars, expenses increased 18%. The increase reflected an accrual for the UK bank levy of CHF 115 million, increases in IT investments, higher litigation provisions and an increase in risk management costs.

Corporate Center

In 2012, we recorded a loss from continuing operations before taxes of CHF 3,898 million, primarily reflecting fair value losses from movements in own credit spreads and severance and other compensation expenses relating to the Group-wide cost efficiency initiatives, partly offset by gains from the sale of real estate.

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses and revenues that have not been allocated to the segments. In addition, Corporate Center includes consolidation and elimination adjustments required to eliminate intercompany revenues and expenses.

Beginning in the first quarter 2012, we fully reflect the fair value impact from movements in credit spreads on our long-term vanilla debt and DVA on certain structured notes liabilities in the Corporate Center and discontinued the amortization in the segments of the past fair value gains on long-term vanilla debt. Prior periods have been reclassified to conform to the current presentation.

- Refer to "Impact from movements in own credit spreads" in Core Results for further information.

The following provides a comparison of our 2012 results versus 2011 and 2011 results versus 2010.

Income/(loss) from continuing operations before taxes

2012 vs 2011: From CHF 381 million to CHF (3,898) million

The decrease from a gain to a loss primarily reflected fair value losses on our long-term vanilla debt of CHF 1,663 million, DVA losses on certain structured notes liabilities of CHF 958 million and fair value losses on stand-alone derivatives of

CHF 318 million, resulting in overall losses on such items of CHF 2,939 million. The fair value losses reflected the narrowing of credit spreads on senior and subordinated debt across most currencies. In 2011, results included fair value gains from movements in own credit spreads of CHF 1,616 million. The 2012 losses also included business realignment costs of CHF 680 million, consisting primarily of severance and other compensation expenses relating to the Group-wide cost efficiency initiatives, additional litigation provisions of CHF 227 million from the settlement of NCFE-related litigation and gains from the sale of real estate of CHF 533 million.

2011 vs 2010: From CHF (936) million to CHF 381 million

The increased income primarily reflected fair value gains on our long-term vanilla debt of CHF 1,210 million, DVA gains on certain structured notes liabilities of CHF 697 million and fair value losses on stand-alone derivatives of CHF 291 million, resulting in overall gains on such items of CHF 1,616 million. The fair value gains reflected the widening of credit spreads across all currencies, including senior and subordinated debt. In 2010, results included fair value gains from movements in own credit spreads of CHF 269 million. The 2011 result also included CHF 847 million of costs consisting primarily of severance and other compensation expenses relating to the accelerated Group-wide cost efficiency initiatives.

Assets under management

As of December 31, 2012, assets under management were CHF 1,250.8 billion, up 5.5% compared to December 31, 2011, primarily reflecting positive market movements and net new assets of CHF 10.8 billion, partly offset by adverse foreign exchange-related movements.

Assets under management

Assets under management reflect the changes in reporting as discussed in "Core Results – Information and developments – Format of presentation and changes in reporting".

Assets under management comprise assets that are placed with us for investment purposes and include discretionary and advisory counterparty assets.

Discretionary assets are assets for which the client fully transfers the discretionary power to a Credit Suisse entity with a management mandate. Discretionary assets are reported in the business in which the advice is provided as well as in the business in which the investment decisions take place. Assets managed by Asset Management for Wealth Management Clients and Corporate & Institutional Clients are reported in each applicable business and eliminated at the divisional level.

Advisory assets include assets placed with us where the client is provided access to investment advice but retains discretion over investment decisions.

Assets under management and net new assets include assets managed by consolidated entities, joint ventures and strategic participations. Assets from joint ventures and participations are counted in proportion to our share in the respective entity.

In 2012, assets under management of CHF 1250.8 billion, increased by CHF 65.6 billion, or 5.5%, compared to 2011, reflecting positive market movements and net new assets, partly offset by adverse foreign exchange-related movements. In Wealth Management Clients, assets under management of CHF 798.5 billion increased 6.4% compared to the end of 2011, as positive market movements and net new assets of CHF 19.0 billion were partially offset by adverse foreign exchange-related movements. In Asset Management, assets under management were CHF 371.6 billion, an increase of CHF 6.4 billion, or 1.8%, compared to the end of 2011, reflecting positive market performance, partially offset by net asset outflows of CHF 9.0 billion and negative foreign exchange-related movements.

¹ Includes outflows for private equity assets reflecting realizations at cost and unfunded commitments on which a fee is no longer earned. ² Assets managed by Asset Management for Wealth Management Clients and Corporate & Institutional Clients. ³ Includes an adjustment to present private equity assets under management at cost for invested assets and unfunded commitments only where a fee was earned. Periods prior to 3Q11 have not been restated.

- Refer to "Private Banking & Wealth Management" and "Note 36 – Assets under management" in V – Consolidated financial statements – Credit Suisse Group for further information on assets under management.

Client assets

Client assets is a broader measure than assets under management as it includes transactional and custody accounts (assets held solely for transaction-related or safekeeping/custody purposes) and assets of corporate clients and public institutions used primarily for cash management or transaction-related purposes.

Net new assets

Net new assets include individual cash payments, security deliveries and cash flows resulting from loan increases or repayments. Interest and dividend income credited to clients, commissions, interest and fees charged for banking services are not included as they do not reflect success in acquiring assets under management.

Furthermore, changes due to foreign exchange-related and market movements as well as asset inflows and outflows due to the acquisition or divestiture of businesses are not part of net new assets.

Wealth Management Clients contributed net new assets of CHF 19.0 billion, with inflows particularly from emerging markets and from the  UHNWI client segment, partially offset by outflows in Western Europe and outflows relating to the integration of Clariden Leu. Corporate & Institutional Clients reported net new assets of CHF 1.5 billion. Asset Management recorded net asset outflows of CHF 9.0 billion, primarily from multi-asset class solutions which included redemptions of CHF 14.7 billion from a single fixed income mandate, partially offset by inflows in index strategies and credit products.

Critical accounting estimates

In order to prepare the consolidated financial statements in accordance with accounting principles generally accepted in the US (US GAAP), management is required to make certain accounting estimates to ascertain the value of assets and liabilities. These estimates are based upon judgment and the information available at the time, and actual results may differ materially from these estimates. Management believes that the estimates and assumptions used in the preparation of the consolidated financial statements are prudent, reasonable and consistently applied.

We believe that the critical accounting estimates discussed below involve the most complex judgments and assessments.

- ▶ Refer to “Note 1 – Summary of significant accounting policies” and “Note 2 – Recently issued accounting standards” in V – Consolidated financial statements – Credit Suisse Group for further information on significant accounting policies and new accounting pronouncements. For financial information relating to the Bank, refer to the corresponding notes in the consolidated financial statements of the Bank.

Fair value

A significant portion of our assets and liabilities are carried at **fair value**. The fair value of the majority of these financial instruments is based on quoted prices in active markets or observable inputs.

In addition, we hold financial instruments for which no prices are available and which have little or no observable inputs. For these instruments, the determination of fair value requires subjective assessment and judgment depending on liquidity, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. In such circumstances, valuation is determined based on management's own judgments about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These instruments include certain **OTC** derivatives including equity and credit derivatives, certain corporate equity-linked securities, mortgage-related and **CDO** securities, private equity investments, certain loans and credit products (including leveraged finance, certain syndicated loans and certain high yield bonds) and life finance instruments.

We have availed ourselves of the simplification in accounting offered under the fair value option guidance in Accounting Standards Codification (ASC) Topic 825 – Financial Instruments, primarily in Investment Banking and in Private Banking

& Wealth Management's Asset Management business. This has been accomplished generally by electing the fair value option, both at initial adoption and for subsequent transactions, on items impacted by the hedge accounting requirements of US GAAP. For instruments for which there was an inability to achieve hedge accounting and for which we are economically hedged, we have elected the fair value option. Where we manage an activity on a fair value basis but previously have been unable to achieve fair value accounting, we have utilized the fair value option to align our financial accounting to our risk management reporting.

Control processes are applied to ensure that the fair values of the financial instruments reported in the consolidated financial statements, including those derived from pricing models, are appropriate and determined on a reasonable basis.

These control processes include the review and approval of new instruments, review of profit and loss at regular intervals, risk monitoring and review, price verification procedures and reviews of models used to estimate the fair value of financial instruments by senior management and personnel with relevant expertise who are independent of the trading and investment functions.

- ▶ Refer to “Note 2 – Recently issued accounting standards” and “Note 33 – Financial instruments” in V – Consolidated financial statements – Credit Suisse Group for further information on fair value.

Variable interest entities

As a normal part of our business, we engage in various transactions that include entities which are considered variable interest entities (VIEs). VIEs are special purpose entities that typically lack sufficient equity to finance their activities without additional subordinated financial support or are structured such that the holders of the voting rights do not substantively participate in the gains and losses of the entity. Such entities are required to be assessed for consolidation under US GAAP, compelling the primary beneficiary to consolidate the VIE. The primary beneficiary is the party that has the power to direct the activities that most significantly affect the economics of the VIE and potentially has significant benefits or losses in the VIE. We consolidate all VIEs where we are the primary beneficiary. VIEs may be sponsored by us, unrelated third parties or clients. Application of the accounting requirements for consolidation of VIEs, including ongoing reassessment of VIEs for

possible consolidation, may require the exercise of significant management judgment.

- ▶ Refer to "Note 1 – Summary of significant accounting policies" and "Note 32 – Transfers of financial assets and variable interest entities" in V – Consolidated financial statements – Credit Suisse Group for further information on VIEs.

Contingencies and loss provisions

A contingency is an existing condition that involves a degree of uncertainty that will ultimately be resolved upon the occurrence or non-occurrence of future events.

Litigation contingencies

We are involved in a variety of judicial, regulatory and arbitration matters in connection with the conduct of our businesses. It is inherently difficult to predict the outcome of many of these matters, particularly those cases in which the matters are brought on behalf of various classes of claimants, seek damages of unspecified or indeterminate amounts or involve novel legal claims. In presenting our consolidated financial statements, management makes estimates regarding the outcome of judicial, regulatory and arbitration matters and takes a charge to income when losses with respect to such matters are probable and can be reasonably estimated. Charges, other than those taken for costs of defense, are not established for matters when losses cannot be reasonably estimated. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but not limited to, the type and nature of the proceeding, the progress of the matter, the advice of counsel, our defenses and experience in similar matters, as well as our assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings.

- ▶ Refer to "Note 37 – Litigation" in V – Consolidated financial statements – Credit Suisse Group for further information on legal proceedings.

Allowance and provision for credit losses

As a normal part of our business, we are exposed to credit risk through our lending relationships, commitments and letters of credit as well as counterparty risk on derivatives, foreign exchange and other transactions. Credit risk is the possibility of a loss being incurred as a result of a borrower or counterparty failing to meet its financial obligations or as a result of deterioration in the credit quality of the borrower or counterparty. In the event of a default, we generally incur a loss equal to the amount owed by the debtor, less any recoveries resulting from foreclosure, liquidation of collateral or the

restructuring of the debtor company. The allowance for loan losses is considered a reasonable estimate of credit losses existing at the dates of the consolidated balance sheets. This allowance is for probable credit losses inherent in existing exposures and credit exposures specifically identified as impaired.

- ▶ Refer to "Note 1 – Summary of significant accounting policies" and "Note 18 – Loans, allowance for loan losses and credit quality" in V – Consolidated financial statements – Credit Suisse Group for further information on allowance for loan losses.

Inherent loan loss allowance

The inherent loan loss allowance is for all credit exposures not specifically identified as impaired and that, on a portfolio basis, are considered to contain probable inherent loss. The estimate of this component of the allowance for the consumer loans portfolio involves applying historical and current default probabilities, historical recovery experience and related current assumptions to homogenous loans based on internal risk rating and product type. To estimate this component of the allowance for the corporate & institutional loans portfolio, the Group segregates loans by risk, industry or country rating. The methodology for Investment Banking adjusts the rating-specific default probabilities to incorporate not only historic third-party data but also those implied from current quoted credit spreads.

Many factors are evaluated in estimating probable credit losses inherent in existing exposures. These factors include: the volatility of default probabilities; rating changes; the magnitude of the potential loss; internal risk ratings; geographic, industry and other economic factors; and imprecision in the methodologies and models used to estimate credit risk. Overall credit risk indicators are also considered, such as trends in internal risk-rated exposures, classified exposures, cash-basis loans, recent loss experience and forecasted write-offs, as well as industry and geographic concentrations and current developments within those segments or locations. Our current business strategy and credit process, including credit approvals and limits, underwriting criteria and workout procedures, are also important factors.

Significant judgment is exercised in the evaluation of these factors. For example, estimating the amount of potential loss requires an assessment of the period of the underlying data. Data that does not capture a complete credit cycle may compromise the accuracy of loss estimates. Determining which external data relating to default probabilities should be used and when it should be used also requires judgment. The use of market indices and ratings that do not sufficiently correlate to our specific exposure characteristics could also affect the accuracy of loss estimates. Evaluating the impact of uncer-

tainties regarding macroeconomic and political conditions, currency devaluations on cross-border exposures, changes in underwriting criteria, unexpected correlations among exposures and other factors all require significant judgment. Changes in our estimates of probable loan losses inherent in the portfolio could have an impact on the provision and result in a change in the allowance.

Specific loan loss allowances

We make provisions for specific loan losses on impaired loans based on regular and detailed analysis of each loan in the portfolio. This analysis includes an estimate of the realizable value of any collateral, the costs associated with obtaining repayment and realization of any such collateral, the counterparty's overall financial condition, resources and payment record, the extent of our other commitments to the same counterparty and prospects for support from any financially responsible guarantors.

The methodology for calculating specific allowances involves judgments at many levels. First, it involves the early identification of deteriorating credit. Extensive judgment is required in order to properly evaluate the various indicators of financial condition of a counterparty and likelihood of repayment. The failure to identify certain indicators or give them proper weight could lead to a different conclusion about the credit risk. The assessment of credit risk is subject to inherent limitations with respect to the completeness and accuracy of relevant information (for example, relating to the counterparty, collateral or guarantee) that is available at the time of the assessment. Significant judgment is exercised in determining the amount of the allowance. Whenever possible, independent, verifiable data or our own historical loss experience is used in models for estimating loan losses. However, a significant degree of uncertainty remains when applying such valuation techniques. Under our loan policy, the classification of loan status also has a significant impact on the subsequent accounting for interest accruals.

- Refer to "Risk Management" in III – Treasury, Risk, Balance sheet and Off-balance sheet and "Note 18 – Loans, allowance for loan losses and credit quality" in V – Consolidated financial statements – Credit Suisse Group for loan portfolio disclosures, valuation adjustment disclosures and certain other information relevant to the evaluation of credit risk and credit risk management.

Goodwill impairment

Under US GAAP, goodwill is not amortized, but is reviewed for potential impairment on an annual basis as of December 31 and at any other time that events or circumstances indicate that the carrying value of goodwill may not be recoverable.

For the purpose of testing goodwill for impairment, each reporting unit is assessed individually. A reporting unit is an operating segment or one level below an operating segment, also referred to as a component. A component of an operating segment is deemed to be a reporting unit if the component constitutes a business for which discrete financial information is available and management regularly reviews the operating results of that component. In Private Banking & Wealth Management, Wealth Management Clients, Corporate & Institutional Clients and Asset Management are considered to be reporting units. Investment Banking is considered to be one reporting unit.

With the adoption of Accounting Standards Update 2011-08, "Testing Goodwill for Impairment" (ASU 2011-08), on January 1, 2012 a qualitative assessment is permitted to evaluate whether a reporting unit's fair value is less than its carrying value. If on the basis of the qualitative assessment it is more likely than not that the reporting unit's fair value is higher than its carrying value, no quantitative goodwill impairment test is required. If on the basis of the qualitative assessment it is more likely than not that the reporting unit's fair value is lower than its carrying value, the first step of the quantitative goodwill impairment test must be performed, by calculating the fair value of the reporting unit and comparing that amount to its carrying value. If the fair value of a reporting unit exceeds its carrying value, there is no goodwill impairment. If the carrying value exceeds the fair value, the second step of the quantitative goodwill impairment test, measuring the amount of an impairment loss, if any, has to be performed.

The qualitative assessment is intended to be a simplification of the annual impairment test and can be bypassed for any reporting unit and any period to proceed directly to performing the first step of the quantitative goodwill impairment test. When bypassing the qualitative assessment in any period as per the current practice of the Group, the preparation of a qualitative assessment can be resumed in any subsequent period.

Circumstances that could trigger an initial qualitative assessment or the first step of the goodwill impairment test include, but are not limited to: (i) macroeconomic conditions such as a deterioration in general economic conditions or other developments in equity and credit markets; (ii) industry and market considerations such as a deterioration in the environment in which the entity operates, an increased competitive

environment, a decline in market-dependent multiples or metrics (considered in both absolute terms and relative to peers), and regulatory or political developments; (iii) other relevant entity-specific events such as changes in management, key personnel or strategy; (iv) a more-likely-than-not expectation of selling or disposing all, or a portion, of a reporting unit; (v) results of testing for recoverability of a significant asset group within a reporting unit; (vi) recognition of a goodwill impairment in the financial statements of a subsidiary that is a component of a reporting unit; and (vii) a sustained decrease in share price (considered in both absolute terms and relative to peers).

The carrying value of each reporting unit for purposes of the goodwill impairment test is determined on the basis of the reporting units' allocated economic capital, a consistent and comprehensive tool for risk management, capital management and performance measurement. Any residual equity, after considering the total economic capital, is allocated to the reporting units on a pro-rata basis. As of December 31, 2012, such residual equity was equal to CHF 5,302 million.

Projected economic capital allocations to each reporting unit are integrated within our three-year financial planning process and are approved by the Board on an annual basis. The carrying values of the reporting units are also presented to the Audit Committee on an annual basis.

Factors considered in determining the fair value of reporting units include, among other things: an evaluation of recent acquisitions of similar entities in the market place; current share values in the market place for similar publicly traded entities, including price multiples; recent trends in our share price and those of competitors; estimates of our future earnings potential based on our three-year strategic business plan; and the level of interest rates.

Estimates of our future earnings potential, and that of the reporting units, involve considerable judgment, including management's view on future changes in market cycles, the regulatory environment, the anticipated result of the implementation of business strategies, competitive factors and assumptions concerning the retention of key employees. Adverse changes in the estimates and assumptions used to determine the fair value of the Group's reporting units may result in a goodwill impairment in the future.

An estimated balance sheet for each reporting unit is prepared on a quarterly basis. If the second step of the goodwill impairment test is required, the implied fair value of the relevant reporting unit's goodwill is compared with the carrying value of that goodwill. If the carrying value exceeds the implied fair value of the goodwill, an impairment loss is recognized in an amount equal to that excess. The loss recognized as a goodwill impairment cannot exceed the carrying value of that

goodwill. The implied fair value of goodwill is calculated in the same manner as the amount of goodwill recognized in a business combination and, as such, the current fair value of a reporting unit is assigned to all of the assets and liabilities of that unit (including any unrecognized intangible assets, but excluding goodwill) as if the reporting unit had been acquired in a business combination. An independent valuation expert would likely be engaged to assist in the valuation of the reporting unit's unrecognized intangible assets.

Based on our goodwill impairment analysis performed as of December 31, 2012, we concluded that the estimated fair value for the three reporting units in Private Banking & Wealth Management substantially exceeded the related carrying value and no impairment was necessary as of December 31, 2012.

There was also no impairment necessary for our Investment Banking reporting unit as the estimated fair value exceeded its carrying value by 10%. The goodwill allocated to this reporting unit has become more exposed to a future impairment as the valuation of the reporting unit is highly correlated with economic and financial market conditions, client trading and investing activity and the regulatory environment in which it operates. We engaged the services of an independent valuation specialist to assist in the valuation of the reporting unit as of December 31, 2012 using a combination of the market approach and income approach. Under the market approach, consideration is given to price to projected earnings multiples or price to book value multiples for similarly traded companies and prices paid in recent transactions that have occurred in its industry or in related industries. Under the income approach, a discount rate was applied that reflects the risk and uncertainty related to the reporting unit's projected cash flows.

The results of the impairment evaluation of the Investment Banking reporting unit's goodwill would be significantly impacted by adverse changes in the underlying parameters used in the valuation process. If actual outcomes adversely differ by a sufficient margin from our best estimates of the key economic assumptions and associated cash flows applied in the valuation of the reporting unit, we could potentially incur material impairment charges in the future with respect to the CHF 5,980 million of goodwill recorded in Investment Banking.

► Refer to "Note 20 – Goodwill" in V – Consolidated financial statements – Credit Suisse Group for further information on goodwill.

Taxes

Uncertainty of income tax positions

The Group follows the guidance in ASC Topic 740 – Income Taxes, which sets out a consistent framework to determine the appropriate level of tax reserves to maintain for uncertain income tax positions.

Significant judgment is required in determining whether it is more likely than not that an income tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Further judgment is required to determine the amount of benefit eligible for recognition in the consolidated financial statements.

- ▶ Refer to “Note 26 – Tax” in V – Consolidated financial statements – Credit Suisse Group for further information on income tax positions.

Deferred tax valuation allowances

Deferred tax assets and liabilities are recognized for the estimated future tax effects of operating loss carry-forwards and temporary differences between the carrying values of existing assets and liabilities and their respective tax bases at the dates of the consolidated balance sheets.

The realization of deferred tax assets on temporary differences is dependent upon the generation of taxable income during the periods in which those temporary differences become deductible. The realization of such deferred tax assets on net operating losses is dependent upon the generation of taxable income during the periods prior to their expiration, if applicable. Management regularly evaluates whether deferred tax assets will be realized. If management considers it more likely than not that all or a portion of a deferred tax asset will not be realized, a corresponding valuation allowance is established. In evaluating whether deferred tax assets will be realized, management considers both positive and negative evidence, including projected future taxable income, the reversal of deferred tax liabilities which can be scheduled and tax planning strategies.

This evaluation requires significant management judgment, primarily with respect to projected taxable income. Future taxable income can never be predicted with certainty. It is derived from budgets and strategic business plans but is dependent on numerous factors, some of which are beyond management's control. Substantial variance of actual results from estimated future taxable profits, or changes in our estimate of future taxable profits and potential restructurings, could lead to changes in deferred tax assets being realizable, or considered realizable, and would require a corresponding adjustment to the valuation allowance.

As part of its normal practice, management has conducted a detailed evaluation of its expected future results. This evaluation has taken into account the Group's commitment to the integrated banking model and the importance of the Investment Banking segment within the integrated bank, as well as the changes announced in 2012 and the reduction in risk since 2008. This evaluation has indicated the expected future results that are likely to be earned in jurisdictions where the Group has significant deferred tax assets, such as the US, the UK and Switzerland. Management then compared those expected future results with the applicable law governing utilization of deferred tax assets. US tax law allows for a 20-year carry-forward period for net operating losses, UK tax law allows for an unlimited carry-forward period for net operating losses and Swiss tax law allows for a seven-year carry-forward period for net operating losses.

- ▶ Refer to “Note 26 – Tax” in V – Consolidated financial statements – Credit Suisse Group for further information on deferred tax assets.

Pension plans

The Group

The Group covers pension requirements, in both Swiss and non-Swiss locations, through various defined benefit pension plans and defined contribution pension plans.

Our funding policy with respect to the non-Swiss pension plans is consistent with local government and tax requirements.

The calculation of the expense and liability associated with the defined benefit pension plans requires an extensive use of assumptions, which include the discount rate, expected return on plan assets and rate of future compensation increases as determined by us. Management determines these assumptions based upon currently available market and industry data and historical performance of the plans. Management also consults with an independent actuarial firm to assist in selecting appropriate assumptions and valuing its related liabilities. The actuarial assumptions used by us may differ materially from actual results due to changing market and economic conditions, higher or lower withdrawal rates or longer or shorter life spans of the participants. Any such differences could have a significant impact on the amount of pension expense recorded in future years.

The funded status of our defined benefit pension and other post-retirement defined benefit plans are recorded in the consolidated balance sheets. The impacts from re-measuring the funded status (reflected in actuarial gains or losses) and from amending the plan (reflected in prior service cost or credits)

are recognized in equity as a component of accumulated other comprehensive income/(loss) (AOCI).

The projected benefit obligation (PBO) of our total defined benefit pension plans as of December 31, 2012 included an amount related to our assumption for future salary increases of CHF 534 million, compared to CHF 568 million as of December 31, 2011. The accumulated benefit obligation (ABO) is defined as the PBO less the amount related to estimated future salary increases. The difference between the fair value of plan assets and the ABO was an overfunding of CHF 698 million for 2012, compared to an overfunding of CHF 139 million for 2011.

We are required to estimate the expected long-term rate of return on plan assets, which is then used to compute pension cost recorded in the consolidated statements of operations. Estimating future returns on plan assets is particularly subjective, as the estimate requires an assessment of possible future market returns based on the plan asset mix. In calculating pension expense and in determining the expected long-term rate of return, we use the market-related value of assets. The assumptions used to determine the benefit obligation as of the measurement date are also used to calculate the net periodic pension cost for the 12-month period following this date.

The expected weighted-average long-term rate of return used to determine the expected return on plan assets as a component of the net periodic pension costs in 2012 and 2011 was 4.3% and 4.8%, respectively, for the Swiss plans and 6.4% and 7.3%, respectively, for the international plans. In 2012, if the expected long-term rate of return had been increased/decreased one percentage point, net pension expense for the Swiss plans would have decreased/increased CHF 145 million and net pension expense for the international plans would have decreased/increased CHF 25 million.

The discount rate used in determining the benefit obligation is based either upon high-quality corporate bond rates or government bond rates plus a premium in order to approximate high-quality corporate bond rates. In estimating the discount rate, we take into consideration the relationship between the corporate bonds and the timing and amount of the future cash outflows from benefit payments. The discount rate used for Swiss plans decreased 0.6 percentage point from 2.8% as of December 31, 2011, to 2.2% as of December 31, 2012, mainly due to a decrease in Swiss bond market rates. The average discount rate used for international plans decreased 0.3 percentage point from 4.8% as of December 31, 2011, to 4.5% as of December 31, 2012, mainly due to a decrease in bond market rates in the EU, the UK and the US. The discount rate affects both the pension expense and the PBO. For the year ended December 31, 2012, a one percentage point decline in the discount rate for the Swiss plans would have

resulted in an increase in the PBO of CHF 1,796 million and an increase in pension expense of CHF 134 million, and a one percentage point increase in the discount rate would have resulted in a decrease in the PBO of CHF 1,581 million and a decrease in the pension expense of CHF 127 million. A one percentage point decline in the discount rate for the international plans as of December 31, 2012 would have resulted in an increase in the PBO of CHF 578 million and an increase in pension expense of CHF 53 million, and a one percentage point increase in the discount rate would have resulted in a decrease in the PBO of CHF 468 million and a decrease in the pension expense of CHF 46 million.

Actuarial losses and prior service cost are amortized over the average remaining service period of active employees expected to receive benefits under the plan, which, as of December 31, 2012, was approximately nine years for the Swiss plans and four to 26 years for the international plans. The pre-tax expense associated with the amortization of net actuarial losses and prior service cost for defined benefit pension plans for the years ended December 31, 2012, 2011 and 2010 was CHF 165 million, CHF 152 million and CHF 140 million, respectively. The amortization of recognized actuarial losses and prior service cost for defined benefit pension plans for the year ending December 31, 2013, which is assessed at the beginning of the year, is expected to be CHF 175 million, net of tax. The impact from deviations between our actuarial assumptions and the actual developments of such parameters observed for our pension plans further impacts the amount of net actuarial losses or gains recognized in equity, resulting in a higher or lower amount of amortization expense in periods after 2013.

- Refer to "Note 29 – Pension and other post-retirement benefits" in V – Consolidated financial statements – Credit Suisse Group for further information on pension benefits.

The Bank

The Bank covers pension requirements for its employees in Switzerland through participation in a defined benefit pension plan sponsored by the Group (Group plan). Various legal entities within the Group participate in the Group plan, which is set up as an independent trust domiciled in Zurich. The Group accounts for the Group plan as a single-employer defined benefit pension plan and uses the projected unit credit actuarial method to determine the net periodic pension expense, PBO, ABO and the related amounts recognized in the consolidated balance sheets. The funded status of the Group plan is recorded in the consolidated balance sheets. The actuarial gains and losses and prior service costs or credits are recognized in equity as a component of AOCI.

The Bank accounts for the Group plan on a defined contribution basis whereby it only recognizes the amounts required to be contributed to the Group plan during the period as net periodic pension expense and only recognizes a liability for any contributions due and unpaid. No other expense or balance sheet amounts related to the Group plan are recognized by the Bank.

The Bank covers pension requirements for its employees in international locations through participation in various pension plans, which are accounted for as single-employer defined benefit pension plans or defined contribution pension plans.

In 2012, if the Bank had accounted for the Group plan as a defined benefit plan, the expected long-term rate of return used to determine the expected return on plan assets as a component of the net periodic pension costs would have been 4.3%. In 2012, the weighted-average expected long-term rate of return used to calculate the expected return on plan assets as a component of the net periodic pension cost for the international single-employer defined benefit pension plans was 6.4%.

The discount rate used in determining the benefit obligation is based either upon high-quality corporate bond rates or government bond rates plus a premium in order to approximate high-quality corporate bond rates. For the year ended December 31, 2012, if the Bank had accounted for the Group plan as a defined benefit plan, the discount rate used in the measurement of the benefit obligation and net periodic pension cost

would have been 2.2% and 2.8%, respectively. For the year ended December 31, 2012, the weighted-average discount rates used in the measurement of the benefit obligation and the net periodic pension costs for the international single-employer defined benefit pension plans were 4.5% and 4.8%, respectively. A one percentage point decline in the discount rate for the international single-employer plans would have resulted in an increase in PBO of CHF 578 million and an increase in pension expense of CHF 53 million, and a one percentage point increase in the discount rate would have resulted in a decrease in PBO of CHF 468 million and a decrease in pension expense by CHF 46 million.

The Bank does not recognize any amortization of actuarial losses and prior service cost for the Group pension plan. Actuarial losses and prior service cost related to the international single-employer defined benefit pension plans are amortized over the average remaining service period of active employees expected to receive benefits under the plan. The pre-tax expense associated with the amortization of recognized net actuarial losses and prior service cost for the years ended December 31, 2012, 2011 and 2010 was CHF 73 million, CHF 51 million and CHF 37 million, respectively. The amortization of recognized actuarial losses and prior service cost for the year ending December 31, 2013, which is assessed at the beginning of the year, is expected to be CHF 47 million, net of tax.

Treasury, Risk, Balance sheet and Off-balance sheet

96 Liquidity and funding management

102 Capital management

121 Risk management

**149 Balance sheet, off-balance sheet
and other contractual obligations**

Liquidity and funding management

During 2012, we maintained a strong liquidity and funding position. The majority of our unsecured funding was generated from core customer deposits and long-term debt.

Overview

Our liquidity and funding strategy is approved by the Capital Allocation and Risk Management Committee (CARMC) and overseen by the Board of Directors. The implementation and execution of the funding and liquidity strategy is managed by Treasury. Treasury ensures adherence to our funding policy and the efficient coordination of the secured funding desks. This approach enhances our ability to manage potential liquidity and funding risks and to promptly adjust our liquidity and funding levels to meet stress situations. Our liquidity and funding profile is regularly reported to CARMC and the Board of Directors, who define our risk tolerance and set parameters for the balance sheet usage of our businesses. The Board of Directors is responsible for defining our overall tolerance for risk in the form of a risk appetite statement.

Our liquidity and funding profile reflects our strategy and risk appetite and is driven by business activity levels and the overall operating environment. We have adapted our liquidity and funding profile to reflect lessons learned from the financial crisis, the subsequent change in our business strategy and regulatory developments. We have been an active participant in regulatory and industry forums to promote best practice standards on quantitative and qualitative liquidity management. Our internal liquidity risk management framework is subject to review and monitoring by the [Swiss Financial Market Supervisory Authority \(FINMA\)](#), other regulators and rating agencies.

Regulatory framework

In April 2010 and March 2011, we implemented revised liquidity principles agreed with [FINMA](#), following its consultation with the Swiss National Bank (SNB), to ensure that the Group and the Bank have adequate holdings on a consolidated basis of liquid, unencumbered, high-quality securities available in a crisis situation for designated periods of time.

In December 2010, the [Basel Committee on Banking Supervision \(BCBS\)](#) issued the [Basel III international framework for liquidity risk measurement, standards and monitoring](#).

The Basel III framework includes a [liquidity coverage ratio \(LCR\)](#) and a [net stable funding ratio \(NSFR\)](#). The BCBS has stated that it will continue to review the effect of these liquidity standards on financial markets, credit extension and economic growth to address unintended consequences.

The LCR, which will be phased in beginning January 1, 2015 through January 1, 2019, following an observation period which began in 2011, addresses liquidity risk over a 30-day period. The LCR aims to ensure that banks have a stock of unencumbered high-quality liquid assets available to meet short-term liquidity needs under a severe stress scenario. The LCR is comprised of two components, the value of the stock of high-quality liquid assets in stressed conditions and the total net cash outflows calculated according to specified scenario parameters. The ratio of liquid assets over net cash outflows is subject to an initial minimum requirement of 60%, which will increase by 10% for four years, reaching 100% by January 1, 2019.

The NSFR, which is expected to be introduced on January 1, 2018 following an observation period which began in 2012, establishes criteria for a minimum amount of stable funding based on the liquidity of a bank's assets and activities over a one-year horizon. The NSFR is a complementary measure to the LCR and is structured to ensure that illiquid assets are funded with an appropriate amount of stable long-term funds. The NSFR is defined as the ratio of available stable funding over the amount of required stable funding and should always be at least 100%.

In November 2012, the Swiss Federal Council adopted a liquidity ordinance that implements Basel III liquidity requirements into Swiss law subject, in part, to further rule-making in Switzerland. Both quantitative and qualitative requirements generally are consistent with our existing agreement with FINMA on liquidity principles.

Our revised liquidity principles and our liquidity risk management framework as agreed with FINMA are in line with the Basel III liquidity framework.

► [Refer to "Basel framework" in I – Information on the company – Regulation and supervision – Recent regulatory developments and proposals for further information.](#)

Liquidity risk management framework

Our approach to liquidity risk management

Our liquidity and funding policy is designed to ensure that funding is available to meet all obligations in times of stress, whether caused by market events or issues specific to Credit Suisse. We achieve this through a conservative asset/liability management strategy aimed at maintaining long-term funding, including stable deposits, well in excess of illiquid assets. To address short-term liquidity stress, we maintain a liquidity pool, described below, that covers unexpected outflows in the event of severe market and idiosyncratic stress. Our liquidity risk parameters reflect various liquidity stress assumptions that we believe are conservative. We manage our liquidity profile at a sufficient level such that, in the event we are unable to access unsecured funding, we will have sufficient liquidity to sustain operations for an extended period of time in excess of our minimum target.

Although the NSFR is not expected to be introduced until 2018 and is still subject to adjustment by the BCBS and FINMA, we began using the NSFR in 2012 as the primary tool to monitor our structural liquidity position, plan funding and as the basis for our funds transfer pricing policy. Pursuant to our plans announced in October 2012 to reduce our balance sheet by the end of 2013 to below CHF 900 billion on a foreign exchange neutral basis compared to the end of the third quarter of 2012, we further strengthened our long-term funding profile to accelerate the increase of our NSFR. We estimate that our NSFR under the current FINMA framework was in excess of 100% as of the end of 2012. Where requirements are unclear or left to be determined by the BCBS and FINMA, we have made our own interpretation and assumptions.

In parallel with the NSFR, we continue to use our internal liquidity barometer to manage liquidity to internal targets and as a basis to model both Credit Suisse-specific and systemic market stress scenarios and their impact on funding and liquidity. Our internal barometer framework supports the management of our funding structure. It allows us to manage the time horizon over which the adjusted market value of unencumbered assets (including cash) exceeds the aggregate value of contractual outflows of unsecured liabilities plus a conservative forecast of anticipated contingent commitments. This barometer framework allows us to manage liquidity to a desired profile under stress in order to be able to continue to pursue activities for an extended period of time (also known as a liquidity horizon) without changing business plans during times of Credit Suisse-specific or market-specific stress. Under this framework, we also have short-term targets based

on additional stress scenarios to ensure uninterrupted liquidity for short time frames.

Our liquidity management framework allows us to run stress analyses on our balance sheet and off-balance sheet positions, which include, but are not limited to, the following:

- A multiple-notch downgrade in the Bank's long-term debt credit ratings, which would require additional funding as a result of certain contingent off-balance sheet obligations;
- Significant withdrawals from private banking client deposits;
- Potential cash outflows associated with the prime brokerage business;
- Availability of secured funding is subject to significant over-collateralization;
- Capital markets, certificates of deposit and commercial paper (CP) markets will not be available;
- Other money market access will be significantly reduced;
- A loss in funding value of unencumbered assets;
- The inaccessibility of assets held by subsidiaries due to regulatory, operational and other constraints;
- The possibility of providing non-contractual liquidity support in times of market stress, including purchasing our unsecured debt;
- Monitoring the concentration in sources of wholesale funding and thus encourage funding diversification;
- Monitoring the composition and analysis of the unencumbered assets;
- Restricted availability of foreign currency swap markets; and
- Other scenarios as deemed necessary from time to time.

Governance

Funding, liquidity, capital and our foreign exchange exposures in the banking book are managed centrally by Treasury. Oversight of these activities is provided by the CARMC, a committee that includes the chief executive officers (CEOs) of the Group and the divisions, the Chief Financial Officer, the Chief Risk Officer (CRO) and the Treasurer.

It is CARMC's responsibility to review the capital position, balance sheet development, current and prospective funding, interest rate risk and foreign exchange exposure and to define and monitor adherence to internal risk limits. CARMC regularly reviews the methodology and assumptions of our liquidity risk management framework and determines the liquidity horizon to be maintained.

All liquidity stress tests are coordinated and overseen by the CRO to ensure a consistent and coordinated approach across all risk disciplines.

Contingency planning

In the event of a liquidity crisis, our liquidity contingency plan provides for specific actions to be taken depending on the nature of the crisis. Our Treasurer activates the contingency plan upon receipt of various reports that contain trigger levels. Pre-defined further escalation ensures the involvement of senior management and CARMC, the delivery of information to regulators and the meeting of the funding execution committee, which establishes a specific action plan and coordinates business and funding activities. In all cases, the plan's priorities are to strengthen liquidity (immediate), reduce funding needs (medium term) and assess recovery options (longer term).

Liquidity pool

Treasury manages a sizeable portfolio of liquid assets, comprised of cash, high grade bonds, major market equity securities and other liquid securities, which serves as a liquidity pool. A portion of the liquidity pool is generated through ◉reverse repurchase agreements with top-rated counterparties. Most of these liquid assets qualify as eligible assets under the BCBS liquidity standards. We are mindful of potential credit risk and therefore focus our liquidity holdings strategy on cash at central banks and short-term reverse repurchase agreements relating to highly rated government bonds. The bonds are eligible as collateral for liquidity facilities with various central banks including the SNB, the US Federal Reserve (Fed), the European Central Bank (ECB) and the Bank of England. Our direct exposure on these bonds is limited to highly liquid, top-rated sovereign entities or fully guaranteed agencies of sovereign entities. These securities may also serve to meet liquidity requirements for our local businesses.

All securities, including those obtained from reverse repurchase agreements, are subject to a stress level ◉haircut that

we apply for stress scenarios to reflect the risk that emergency funding may not be available at market value.

We centrally manage the liquidity pool and hold it at our main operating entities. Holding securities in these entities ensures that we can make liquidity and funding available to local entities in need without delay.

As of December 31, 2012, our liquidity pool based on our internal model was CHF 127 billion, net of the stress level haircut. The liquidity pool consisted of CHF 47 billion of cash held by major central banks, primarily the SNB, the Fed and the ECB, CHF 57 billion of securities issued by governments and government agencies, primarily of the US, Germany, France and the UK, and CHF 23 billion of other highly liquid assets including equity securities that form part of major indices.

Funding sources and uses

We primarily fund our balance sheet through core customer deposits, long-term debt and shareholders' equity. We monitor the funding sources, including their concentrations, according to their currency and geography and whether they are secured or unsecured. A substantial portion of our balance sheet is ◉match funded and requires no unsecured funding. Match funded balance sheet items consist of assets and liabilities with close to equal liquidity durations and values so that the liquidity and funding generated or required by the positions are substantially equivalent. Cash and due from banks and ◉reverse repurchase agreements are highly liquid. A significant part of our assets, principally unencumbered trading assets that support the securities business, is comprised of securities inventories and collateralized receivables that fluctuate and are generally liquid. These liquid assets are available to settle short-term liabilities.

Balance sheet funding structure

as of December 31, 2012 (CHF billion)

| | | | | |
|---|-----|---------------|------------------------------------|---|
| Reverse repurchase agreements | 143 | Match funded | 163 | Repurchase agreements |
| Encumbered trading assets | 71 | | 51 | Short positions |
| Funding-neutral assets ¹ | 123 | | 123 | Funding-neutral liabilities ¹ |
| Cash & due from banks | 64 | 120% coverage | 39 | Other short-term liabilities ² |
| Unencumbered liquid assets ³ | 151 | | 54 | Due to banks |
| | | | 19 | Short-term borrowings |
| Loans ⁴ | 237 | | 285 | Deposits ⁵ |
| | | | time | 61 |
| | | | demand | 133 |
| | | | savings | 60 |
| | | | fiduciary | 31 |
| Other illiquid assets | 135 | | 148 | Long-term debt |
| | | | 42 | Total equity |
| Assets: 924 | | | Liabilities and Equity: 924 | |

¹ Primarily includes brokerage receivables/payables, positive/negative replacement values and cash collateral. ² Primarily includes excess of funding neutral liabilities (brokerage payables) over corresponding assets. ³ Primarily includes unencumbered trading assets, unencumbered investment securities and excess reverse repurchase agreements, after haircuts. ⁴ Excludes loans with banks. ⁵ Excludes due to banks and certificates of deposit.

These assets include our liquidity pool, which amounted to CHF 127 billion as of the end of 2012 that can be monetized in a time frame consistent with our short-term stress assumptions. As a consequence of our strategy to reduce our balance sheet, we reduced our short-term liabilities by 27% to CHF 112 billion as of the end of 2012 compared to the end of 2011. This allowed us to reduce an equivalent amount of liquid assets and decrease our liquidity pool by 28% compared to the end of 2011, without a material impact on our liquidity risk.

Loans, which comprise the largest component of our illiquid assets, are funded by our core customer deposits, with an excess coverage of 20% as of the end of 2012, down from 22% as of the end of 2011, reflecting a higher increase in loans than the increase in core customer deposits. We fund other illiquid assets, including real estate, private equity and other long-term investments and a haircut for the illiquid portion of securities, with long-term debt and equity, where we try to maintain a substantial funding buffer.

Our core customer deposits totaled CHF 285 billion as of the end of 2012, an increase of 3% compared to CHF 278 billion as of the end of 2011, as a result of a growth in the customer deposit base in Private Banking & Wealth Management. Core customer deposits are from clients with whom we have a broad and longstanding relationship. Core customer deposits exclude deposits from banks and certificates of deposit. We place a priority on maintaining and growing customer deposits, as they have proved to be a stable and resilient source of funding even in difficult market conditions.

Treasury is responsible for the development, execution and regular updating of our funding plan. The plan reflects projected business growth, development of the balance sheet, future funding needs and maturity profiles as well as the effects of changing market conditions.

Interest expense on long-term debt, excluding structured notes, is monitored and managed relative to certain indices, such as the London Interbank Offered Rate, that are relevant to the financial services industry. This approach to term funding best reflects the sensitivity of both our liabilities and our assets to changes in interest rates. Our average funding cost, which is allocated to the divisions, remained largely unchanged compared to the end of 2011.

We continually manage the impact of funding spreads through careful management of our liability maturity mix and opportunistic issuance of debt. The effect of funding spreads on interest expense depends on many factors, including the absolute level of the indices on which our funding is based.

We diversify our funding sources by issuing structured notes, which are debt securities on which the return is linked to commodities, stocks, indices or currencies or other assets. We generally hedge structured notes with positions in the underlying assets or derivatives. Our liquidity planning includes settlement of structured notes. We had CHF 36.6 billion of structured notes outstanding as of the end of 2012 compared to CHF 35.7 billion as of the end of 2011.

We also use collateralized financings, including repurchase agreements and securities lending agreements. The level of our repurchase agreements fluctuates, reflecting market opportunities, client needs for highly liquid collateral, such as US treasuries and agency securities, and the impact of bal-

ance sheet and risk-weighted asset (RWA) limits. In addition, matched book trades, under which securities are purchased under agreements to resell and are simultaneously sold under agreements to repurchase with comparable maturities, earn spreads, are relatively risk-free and are generally related to client activity.

Our primary source of liquidity is funding through consolidated entities. The funding through non-consolidated special purpose entities (SPEs) and asset securitization activity is immaterial.

Securities for funding and capital purposes are issued primarily by the Bank, our principal operating subsidiary and a US registrant. The Bank lends funds to its operating subsidiaries and affiliates on both a senior and subordinated basis, as needed; the latter typically to meet capital requirements, or as desired by management to support business initiatives.

Debt issuances and redemptions

Our capital markets debt includes senior and subordinated debt issued in US-registered offerings and medium-term note programs, euro market medium-term note programs, Australian dollar domestic medium-term note programs, a Samurai shelf registration statement in Japan and covered bond programs. As a global bank, we have access to multiple markets worldwide and our major funding centers are Zurich, New York, London and Tokyo.

We use a wide range of products and currencies to ensure that our funding is efficient and well diversified across markets and investor types. Substantially all of our unsecured senior debt is issued without financial covenants, such as adverse changes in our credit ratings, cash flows, results of operations or financial ratios, which could trigger an increase in our cost of financing or accelerate the maturity of the debt. Our covered bond funding is in the form of mortgage-backed loans funded by domestic covered bonds issued through Pfandbriefbank Schweizerischer Hypothekarinstitute, one of two institutions established by a 1930 act of the Swiss parliament to centralize the issuance of covered bonds, or from our own international covered bond program.

In 2012, we issued CHF 1.4 billion of domestic covered bonds, CHF 3.3 billion of international covered bonds and

CHF 0.4 billion of senior debt, while CHF 1.1 billion of domestic covered bonds and CHF 10.8 billion of senior debt matured or were redeemed. In connection with our tender offer in July 2012, we repurchased CHF 1.7 billion of senior debt. As of December 31, 2012, we had CHF 15.2 billion of domestic and international covered bonds outstanding.

As of December 31, 2012, the weighted average maturity of long-term debt was 6.1 years (including certificates of deposit with a maturity of one year or longer, but excluding structured notes, and assuming callable securities are redeemed at final maturity or in 2030 for instruments without a stated final maturity).

► Refer to "Note 24 – Long-term debt" in V – Consolidated financial statements – Credit Suisse Group for further information.

Short-term borrowings decreased 29% to CHF 18.6 billion as of the end of 2012. The percentage of unsecured funding from long-term debt, excluding non-recourse debt associated with the consolidation of VIEs was 25% as of the end of 2012, a decrease from 26% as of the end of 2011.

► Refer to "Capital issuances and redemptions" in Capital management for further information on capital issuances, including buffer capital notes and our tender offers.

Funds transfer pricing

We maintain an internal funds transfer pricing system based on market rates. Our funds transfer pricing system is designed to allocate to our businesses all funding costs in a way that incentivizes their efficient use of funding. Our funds transfer pricing system is an essential tool that allocates to the businesses the short-term and long-term costs of funding their balance sheet usages and off-balance sheet contingencies and the costs associated with funding liquidity and balance sheet items, such as goodwill, which are beyond the control of individual businesses. This is of greater importance in a stressed capital markets environment where raising funds is more challenging and expensive. Under this system, our businesses are also credited to the extent they provide long-term stable funding.

Cash flows from operating, investing and financing activities

As a global financial institution, our cash flows are complex and interrelated and bear little relation to our net earnings and net assets. Consequently, we believe that traditional cash flow analysis is less meaningful in evaluating our liquidity position than the funding and liquidity policies described above. Cash flow analysis may, however, be helpful in highlighting certain macro trends in our business.

For the year ended December 31, 2012, net cash used in operating activities of continuing operations was CHF 12.7 billion, primarily reflecting a decrease in trading assets and liabilities, a decrease in other liabilities, an increase in other assets and the 2012 income from continuing operations. Our operating assets and liabilities vary significantly in the normal course of business due to the amount and timing of cash flows. Management believes cash flows from operations, available cash balances and short-term and long-term borrowings will be sufficient to fund our operating liquidity needs.

Our investing activities primarily include originating loans to be held to maturity, other receivables and the investment securities portfolio. For the year ended December 31, 2012, net cash of CHF 43.0 billion was provided by investing activities from continuing operations, primarily due to a decrease in central bank funds sold, securities purchased under resale agreements and securities borrowing transactions and an increase in loans.

Our financing activities primarily include the issuance of debt and receipt of customer deposits. We pay annual dividends on our common shares. In 2012, net cash used in financing activities of continuing operations was CHF 77.9 billion, mainly reflecting repayments of long-term debt and a decrease in central bank funds purchased, securities sold under repurchase agreements and securities lending transactions, partly offset by the issuances of long-term debt.

Credit ratings

Our access to the debt capital markets and our borrowing costs depend significantly on our credit ratings. Rating agencies take many factors into consideration in determining a company's rating, including such factors as earnings performance, business mix, market position, ownership, financial strategy, level of capital, risk management policies and practices, management team and the broader outlook for the financial services industry. The rating agencies may raise, lower or withdraw their ratings, or publicly announce an intention to raise or lower their ratings, at any time.

Although retail and private bank deposits are generally less sensitive to changes in a bank's credit ratings, the cost and availability of other sources of unsecured external funding is generally a function of credit ratings. Credit ratings are especially important to us when competing in certain markets and when seeking to engage in longer-term transactions, including over-the-counter (OTC) derivative instruments.

A downgrade in credit ratings could reduce our access to capital markets, increase our borrowing costs, require us to post additional collateral or allow counterparties to terminate transactions under certain of our trading and collateralized financing and derivative contracts. This, in turn, could reduce our liquidity and negatively impact our operating results and financial position. Our liquidity barometer takes into consideration contingent events associated with a two-notch downgrade in our credit ratings. The maximum impact of a simultaneous one, two or three-notch downgrade by all three major rating agencies in the Bank's long-term debt ratings would result in additional collateral requirements or assumed termination payments under certain derivative instruments of CHF 0.7 billion, CHF 2.4 billion and CHF 3.5 billion, respectively, as of December 31, 2012, and would not be material to our liquidity and funding planning. If the downgrade does not involve all three rating agencies, the impact may be smaller. The Moody's ratings downgrade announced in June 2012 had an impact of less than CHF 100 million on our collateral requirement.

As of the end of 2012, we were compliant with the requirements related to maintaining a specific credit rating under these derivative instruments.

- Refer to "Investor information" in the Appendix for further information on Group and Bank credit ratings.

Capital management

Our capital position remained strong with a BIS tier 1 ratio under Basel II.5 of 19.4% as of the end of 2012 reflecting a 7% decrease in risk-weighted assets and an increase of CHF 6.7 billion in tier 1 capital.

Capital strategy and framework

Credit Suisse considers a strong and efficient capital position to be a priority. Through our capital strategy, we continue to strengthen our capital position and optimize the use of **▫**RWA, particularly in light of emerging regulatory capital requirements.

The overall capital needs of Credit Suisse reflect management's regulatory and credit rating objectives as well as our underlying risks. Our framework considers the capital needed to absorb losses, both realized and unrealized, while remaining a strongly capitalized institution. Multi-year projections and capital plans are prepared for the Group and its major subsidiaries and reviewed throughout the year with its regulators. These plans are subjected to various stress tests, reflecting both macroeconomic and specific risk scenarios. Capital contingency plans are developed in connection with these stress tests to ensure that possible mitigating actions are consistent with both the amount of capital at risk and the market conditions for accessing additional capital.

Our capital management framework relies on economic capital, which is a comprehensive tool that is also used for risk management and performance measurement. Economic capital measures risks in terms of economic realities rather than regulatory or accounting rules and is the estimated capital needed to remain solvent and in business, even under extreme market, business and operational conditions, given our target financial strength as reflected in our long-term credit rating.

- Refer to "Economic capital and position risk" in Risk Management for further information on economic capital.

The improvement of our regulatory capital position over the last few years has left us well positioned to meet the stricter capital requirements under the **▫**Basel III framework and the Swiss **▫**"Too Big to Fail" legislation. In July 2012, we announced a number of measures to accelerate the strengthening of our capital position in light of the current regulatory and market environment.

- Refer to "July 2012 capital measures" below for a detailed description of our capital measures announced in July 2012.

Regulatory capital framework

Overview

There continue to be substantial changes to the regulatory environment under which Credit Suisse operates, bringing ever more conservative standards of measurement and increases in mandatory capital ratios.

Since 2008, we operated under the international capital adequacy standards known as **▫**Basel II set forth by the **▫**BCBS as implemented by **▫**FINMA, with some additional requirements for large Swiss banks known as "Swiss Finish". Basel II provides the framework for measuring capital adequacy and the minimum standards to be applied by local regulators, affecting the measurement of both **▫**RWA and total eligible capital. Beginning in January 2011, as required by FINMA, Credit Suisse implemented BCBS's "Revisions to the Basel II market risk framework" (**▫**Basel II.5) for FINMA regulatory capital purposes, with some additional requirements for large Swiss banks known as "Swiss Finish", which was applicable until December 31, 2012.

The Basel framework is based on three pillars, which are viewed as mutually reinforcing:

- Pillar 1: Minimum Capital Requirements – requires an institution to hold sufficient capital to cover its credit, market and operational risks.
- Pillar 2: Supervisory Review Process – discusses the role of supervisors in ensuring that institutions have in place a proper process for assessing and maintaining their capital ratios above the minimum requirements.
- Pillar 3: Market Discipline – sets out disclosure requirements, especially for those institutions seeking approval to use their own internal models to calculate their capital requirements. Information required under Pillar 3 relating to capital adequacy is available at www.credit-suisse.com/pillar3.

The Basel framework describes a range of options for determining capital requirements in order to provide banks and supervisors the ability to select approaches that are most appropriate for their operations and their financial market infrastructure. In general, Credit Suisse has adopted the most advanced approaches, which align with the way that risk is internally managed and provide the greatest risk sensitivity.

For measuring credit risk, we received approval from FINMA to use the ◉advanced internal ratings-based approach (A-IRB). Under the A-IRB for measuring credit risk, risk weights are determined by using internal risk parameters for ◉probability of default (PD), ◉loss given default (LGD) and transactional maturity. The exposure at default is either derived from balance sheet values or by using models.

For calculating the capital requirements for market risk, the ◉internal models approach, the standardized measurement method and the standardized approach are used.

Non-counterparty risk arises from holdings of premises and equipment, real estate and investments in real estate entities.

Under the Basel framework, operational risk is included in RWA and we received approval from FINMA to use the ◉advanced measurement approach (AMA). Under the AMA for measuring operational risk, we identified key scenarios that describe our major operational risks using an event model.

Effective January 1, 2013, the Basel II.5 framework under which we operated in 2012 was replaced by the ◉Basel III framework. In 2010, the BCBS issued the Basel III framework, with higher minimum capital requirements and conservation and countercyclical buffers, revised risk-based capital measures, a leverage ratio and liquidity standards.

As of January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss ◉“Too Big to Fail” legislation and regulations thereunder. Our related disclosures are in accordance with our current interpretation of such requirements, including relevant assumptions. Changes in the final implementation of these requirements in Switzerland or in any of our assumptions or estimates could result in different numbers from those shown in this report. Our ratio calculations below use estimated RWA as of December 31, 2012, as if the Basel III framework had been implemented in Switzerland as of such date.

- Refer to “New capital framework in 2013” and “Regulation and supervision” in I – Information on the company for further information on the Basel III framework and the Swiss “Too Big to Fail” legislation.

Risk measurement models

Within the Basel II.5 framework for FINMA regulatory capital purposes, we implemented new risk measurement models, including an ◉incremental risk charge and ◉stressed Value-at-Risk (VaR). The incremental risk charge is a regulatory capital charge for default and migration risk on positions in the trading books and is intended to complement additional standards being applied to the ◉VaR modeling framework, including stressed VaR. Stressed VaR replicates a VaR calculation on the Group’s current portfolio taking into account a one-year observation period relating to significant financial stress and helps reduce the pro-cyclicality of the minimum capital requirements for market risk.

FINMA, in line with Bank for International Settlements (BIS) requirements, uses a multiplier to impose an increase in market risk capital for every ◉regulatory VaR ◉backtesting exception over four in the prior rolling 12-month period. For the purposes of this measurement, backtesting exceptions are calculated using a subset of actual daily trading revenues that includes only the impact of daily movements in financial market variables such as interest rates, equity prices and foreign exchange rates on the previous night’s positions. In 2012, our market risk capital multiplier remained at FINMA and BIS minimum levels and we did not experience an increase in market risk capital.

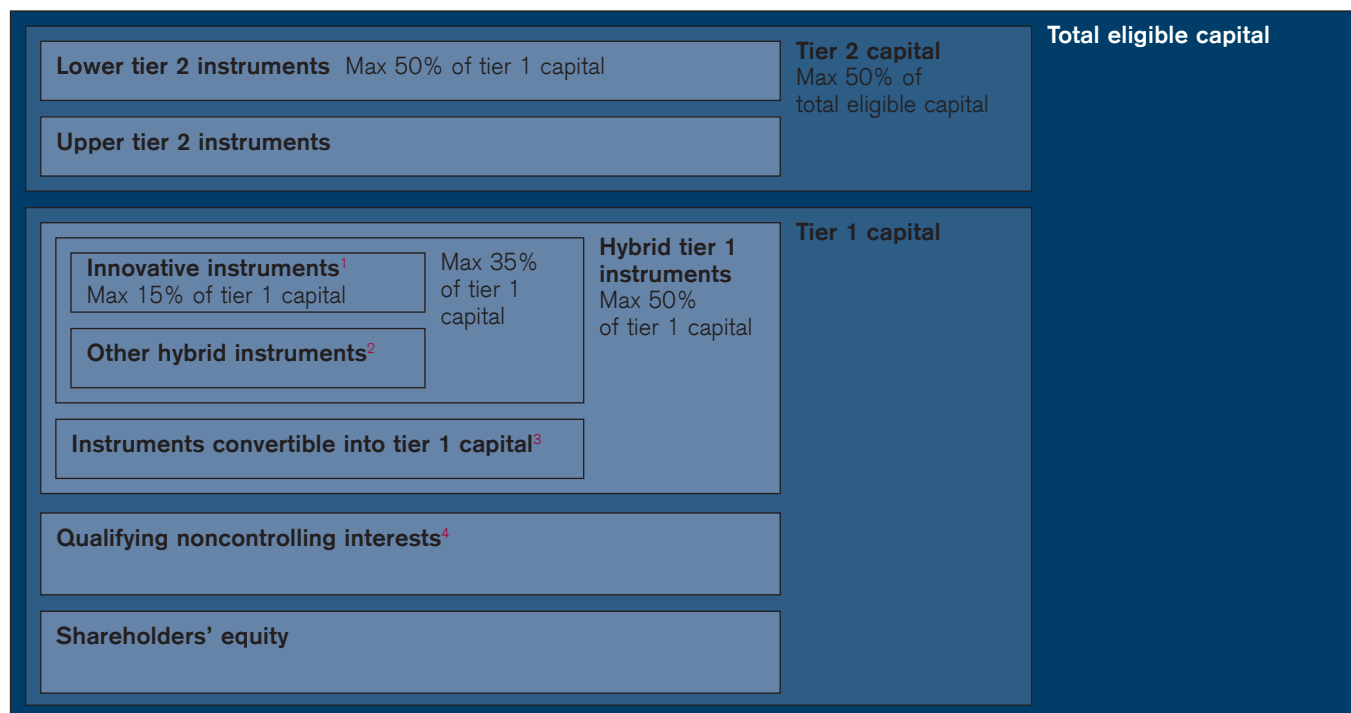

With FINMA approval, we have implemented a Comprehensive Risk Measure framework to calculate a capital charge covering all price risks (default, spread and correlation risk) within the credit correlation products within our trading book portfolio.

- Refer to “Market risk” in Risk management for further information on Credit Suisse’s risk measurement models and backtesting exceptions.

Capital structure

Total eligible capital as defined under Basel II.5 as implemented by FINMA is outlined in the following table and text.

Capital structure – Basel II.5 “Swiss Finish”

Percentages refer to tier 1 and total eligible capital before capital deductions.

¹ Hybrid instruments in the form of non-cumulative perpetual preferred securities and capital notes that either have a fixed maturity or an incentive to repay, such as a step-up in the coupon if the instrument is not redeemed when callable. ² Hybrid instruments in the form of non-cumulative perpetual preferred securities and capital notes that have no fixed maturity and no incentive for repayment. ³ Hybrid instruments with a pre-defined mechanism that converts them into tier 1 capital, such as mandatory convertible bonds convertible into common shares. ⁴ Qualifying noncontrolling interests including common shares in majority owned and consolidated banking and finance subsidiaries and tier 1 capital securities securing deeply subordinated notes issued by special purpose entities.

Tier 1 capital

BIS tier 1 capital consists of total shareholders’ equity, qualifying noncontrolling interests and hybrid tier 1 capital instruments.

Qualifying noncontrolling interests include common shares in majority-owned and consolidated banking and finance subsidiaries held by third parties as well as participation securities of the Bank issued to a third-party SPE (tier 1 capital securities). The third-party SPE issued perpetual, non-cumulative notes secured by the tier 1 capital securities of the Bank and preferred securities issued by a subsidiary of the Group that are guaranteed on a subordinated basis by the Bank. Payments of dividends on the tier 1 capital securities and preferred securities are subject to adequacy of distributable profits, no regulatory prohibition on payments on the tier 1 capital securities or the preferred securities and compliance with capital adequacy and liquidity requirements. The redemption of the tier 1 capital securities or the preferred securities is subject to capital adequacy, solvency requirements and prior approval of FINMA.

Hybrid tier 1 capital instruments include preferred securities, which are issued by SPEs, and capital notes issued directly by the Bank. These hybrid tier 1 instruments are unsecured, perpetual, non-cumulative, deeply subordinated instruments senior only to common shares and qualifying noncontrolling interests. We are obligated to pay interest or dividends on hybrid tier 1 instruments only if we pay dividends on common shares and qualifying noncontrolling interests. These hybrid tier 1 instruments are risk-bearing on a comparable basis with common shares and qualifying noncontrolling interests and can, up to a 15% limit, have step-ups in the coupon in conjunction with call options only after a minimum of five years from the issue date. Payment of interest or dividends on these instruments is subject to adequacy of distributable profits, compliance with capital adequacy requirements and solvency. The redemption of these instruments is subject to capital adequacy, solvency requirements and prior approval of FINMA.

Hybrid tier 1 instruments are subject to a limit of 50% of tier 1 capital. The following categories and maximum values

determine the extent to which these hybrid tier 1 instruments can be attributed to tier 1 capital:

- A maximum of 15% of tier 1 capital can be in the form of “innovative instruments” that either have a fixed maturity or an incentive to repay, such as a step-up in the coupon if the instrument is not redeemed when callable.
- A maximum of 35% of tier 1 capital, less the instruments subject to the 15% limit, can be in the form of other hybrid tier 1 instruments that have no fixed maturity and no incentive for repayment.
- A maximum of 50% of tier 1 capital, less the instruments subject to the 15% and 35% limits, can be in the form of instruments that include a predefined mechanism that converts them into tier 1 capital, such as mandatory convertible bonds convertible into common shares.

To derive tier 1 capital, certain deductions are made from total shareholders' equity as follows:

- goodwill and other intangible assets;
- participations in insurance entities, investments in certain bank and finance entities, and certain securitization exposures (equally deducted from tier 1 and tier 2 capital); and
- other adjustments, including cumulative fair value adjustments on Credit Suisse debt, net of tax, anticipated but not yet declared dividends, the net long position in own treasury shares in the trading book and an adjustment for the accounting treatment of pension plans.

Tier 2 capital

Tier 2 capital consists of upper and lower tier 2 instruments. Upper tier 2 instruments are unsecured, perpetual, subordinated instruments that are senior only to tier 1 instruments. Interest payments are deferrable, but we are obligated to pay interest (including deferred interest) on these upper tier 2 instruments if we pay dividends on tier 1 capital or on redemption. These upper tier 2 instruments can have moderate step-ups in conjunction with call options only after a minimum of five years from the issue date. The redemption of these instruments is subject to solvency. Upper tier 2 capital also includes any excess in eligible provisions over expected losses (up to a maximum amount of 0.6% of the risk-weighted positions) for exposures subject to the credit risk A-IRB.

Lower tier 2 instruments are unsecured, subordinated instruments that are senior only to tier 1 instruments and upper tier 2 instruments and have a maturity on issuance of at least five years. Lower tier 2 capital eligibility is subject to regulatory amortization over the five years prior to redemption.

Capital issuances and redemptions

In February 2011, we entered into definitive agreements with entities affiliated with Qatar Investment Authority (QIA) and The Olayan Group (the Investors) to issue tier 1 buffer capital notes (Tier 1 BCN). Under the agreements, the Investors agreed to purchase USD 3.45 billion Tier 1 BCN and CHF 2.5 billion Tier 1 BCN in exchange for their holdings of USD 3.45 billion 11% tier 1 capital notes and CHF 2.5 billion 10% tier 1 capital notes issued in 2008 (Tier 1 Capital Notes) or, in the event that the Tier 1 Capital Notes have been redeemed in full, for cash. The purchase or exchange was originally expected to occur by October 23, 2013, the first call date of the Tier 1 Capital Notes. As part of the July 2012 capital measures, we entered into an agreement to accelerate the exchange of USD 1.725 billion of the Tier 1 Capital Notes for Tier 1 BCN. The remainder of the Tier 1 Capital Notes is expected to be purchased or exchanged in October 2013.

In March 2012, pursuant to a tender offer, we repurchased for CHF 4.7 billion outstanding hybrid tier 1 instruments and tier 2 instruments, which will no longer qualify for regulatory capital treatment under the Basel III framework. In July 2012, in connection with a second tender offer and additional repurchase transactions, we repurchased tier 1 securities of CHF 0.5 billion and tier 2 securities of CHF 2.2 billion.

In March 2012, we completed an issuance of CHF 750 million 7.125% tier 2 buffer capital notes (Tier 2 BCN) due in 2022. The Tier 2 BCN were convertible into ordinary Group shares if, prior to Basel III, our core tier 1 ratio fell below 7% or under Basel III will be converted into ordinary Group shares if our CET1 ratio falls below 7%. The Tier 2 BCN may be redeemed by the issuer in March 2017.

As part of the July 2012 capital measures, we issued CHF 3.8 billion of mandatory and contingent convertible securities (MACCS) that are mandatorily convertible into 233.5 million shares at a conversion price of CHF 16.29 per share on March 29, 2013 (subject to early conversion upon certain contingency and viability events), with settlement and delivery of shares in early April 2013.

In January 2013, we redeemed perpetual bonds of EUR 77 million of lower tier 2 notes with a maturity date of January 23, 2018. In February 2013, we announced the redemption of our outstanding USD 1.525 billion 7.9% Tier 1 Capital Notes on March 28, 2013.

- ▶ Refer to “July 2012 capital measures” for further information.
- ▶ Refer to “Related party transactions” in IV – Corporate Governance and Compensation – Corporate Governance – Banking relationships with members of the Board and Executive Board and related party transactions for further information on Tier 1 BCN and MACCS.

Capital metrics under Basel II.5

Regulatory capital – Group

Our tier 1 ratio was 19.4% as of the end of 2012, compared to 15.2% as of the end of 2011, reflecting higher tier 1 capital and lower RWA. Our core tier 1 ratio was 15.5% as of the end of 2012, compared to 10.7% as of the end of 2011, reflecting higher core tier 1 capital and lower RWA. Our total capital ratio was 22.3% as of the end of 2012 compared to 20.1% as of the end of 2011.

Tier 1 capital was CHF 43.5 billion as of the end of 2012 compared to CHF 36.8 billion as of the end of 2011. The increase was primarily driven by net income (excluding the impact of fair value gains/(losses) on Credit Suisse debt, net of tax), the issuance of MACCS and the effect of share-based compensation including the Adjustable Performance Plan awards conversion. These increases were partially offset by the buyback of hybrid tier 1 instruments in connection with two debt tender offers in combination with certain other repurchase transactions and an adverse foreign exchange translation impact.

Tier 2 capital was CHF 6.4 billion as of the end of 2012 compared to CHF 11.8 billion as of the end of 2011. The decrease was primarily driven by the buyback of tier 2 capital instruments in connection with the tender offers and an adverse foreign exchange translation impact, partially offset by the issuance of Tier 2 BCN in March 2012. Total eligible capital as of the end of 2012 was CHF 49.9 billion compared to CHF 48.7 billion as of the end of 2011.

RWA decreased CHF 17.5 billion to CHF 224.3 billion as of the end of 2012, reflecting a material decrease in credit risk and market risk, together with a beneficial impact from foreign exchange translation and a decrease in non-counterparty risk, partially offset by an increase in operational risk.

Excluding the foreign exchange translation impact, credit risk in Investment Banking decreased due to reductions in

counterparty-related derivative risk resulting from the 2011 Partner Asset Facility transaction, other reductions in derivative and lending exposures and parameter updates primarily related to LGD. Within Private Banking & Wealth Management, credit risk decreased resulting from enhancements to the processing of LGD data, a net decrease in fund investments and parameter updates on residential mortgages, partially offset by increased credit exposures.

Market risk decreased over the period driven by a number of factors including lower exposures across Investment Banking that reduced incremental risk charges, VaR and stressed VaR. There were reductions in the incremental risk charge resulting from incorporating sovereign risk that was previously a fixed regulatory add on into the risk model. Increases resulting from the inclusion of risks not covered by our VaR model were partially offset by a corresponding reduction in the regulatory multipliers. In addition, there were minor decreases following our implementation of a Comprehensive Risk Measure framework covering the credit correlation products within our trading book portfolio.

The decrease in non-counterparty risk was driven by real estate sales.

Operational risk increased to reflect anticipated changes to our model. The increase has been agreed with FINMA for capital purposes and represents a 20% regulatory uplift on operational risk RWA. In addition, there were marginal increases in operational risk due to minor updates to loss parameters and maturity haircuts applied to insurance policies.

- ▶ Refer to the table "BIS statistics – Basel II.5" for further information regarding market risk and the VaR methodology.
- ▶ Refer to https://www.credit-suisse.com/investment_banking/financial_regulatory/en/subsidiaries_pillar_3.jsp for further information on capital ratios of certain significant subsidiaries.

¹ Includes mandatory and contingent convertible securities net of fees and interest of CHF 3.6 billion, an adjustment of CHF 2.7 billion for the accounting treatment of pension plans, cumulative fair value adjustments of CHF (0.1) billion on own vanilla debt and structured notes, net of tax and the 2012 dividend accrual on Group shares of CHF (0.2) billion (representing a distribution of CHF 0.10 per share in cash out of reserves from capital contributions and a distribution of new shares by way of allocation of non-tradable rights with a theoretical value of approximately CHF 0.65 per right). ² Non-cumulative perpetual preferred securities and capital notes. FINMA has advised that the Group and the Bank may continue to include as tier 1 capital CHF 33 million and CHF 1.6 billion, respectively, in 2012 (2011: CHF 0.6 billion and CHF 3.2 billion, respectively) of equity from special purpose entities that are deconsolidated under US GAAP. ³ FINMA has advised that a maximum of 35% of tier 1 capital can be in the form of hybrid capital instruments, which will be phased out under Basel III. Hybrid tier 1 capital represented 19.5% and 21.4% of the Group's and the Bank's adjusted tier 1 capital, respectively, as of the end of 2012.

As of the end of 2012, we had CHF 3.2 billion of qualifying noncontrolling interests, all of which were core tier 1 capital securities secured by participation securities issued by the Bank. In addition, we had CHF 8.8 billion of hybrid tier 1 instruments, of which CHF 0.3 billion were innovative instruments. The hybrid tier 1 instruments currently include USD 1.7 billion 11% Tier 1 Capital Notes and CHF 2.5 billion

10% Tier 1 Capital Notes that are expected to be exchanged for Tier 1 BCN on October 23, 2013, the first call date of the Tier 1 Capital Notes. USD 1.725 billion 11% Tier 1 Capital Notes were exchanged for Tier 1 BCN in July 2012.

| Risk-weighted assets | 224,296 | 241,753 | (7) |

For management purposes, the Group allocates to the divisions risk-weighted asset equivalents related to regulatory capital and certain intangible asset deductions from Group tier 1 capital.

Risk-weighted assets – Basel II.5

as of December 31, 2012 (CHF billion)

¹ Includes primarily trading assets, investment securities and other investments. ² Includes central bank funds sold, securities purchased under resale agreements and central bank funds purchased, securities sold under repurchase agreements and securities lending transactions.

Risk-weighted assets

Our balance sheet positions and off-balance sheet exposures translate into RWA that are categorized as market, credit, operational and non-counterparty-risk RWA. Market risk RWA reflect the capital requirements of potential changes in the fair values of financial instruments in response to market movements inherent in both the balance sheet and the off-balance sheet items. Credit risk RWA reflect the capital requirements for the possibility of a loss being incurred as the result of a borrower or counterparty failing to meet its financial obligations or as a result of a deterioration in the credit quality of the borrower or counterparty. Operational risk RWA reflect the capital requirements for the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Non-counterparty-risk RWA primarily reflect the capital requirements for our premises and equipment. It is

not the nominal size, but the nature (including risk mitigation such as collateral or hedges) of the balance sheet positions or off-balance sheet exposures that determines the RWA.

Regulatory capital – Bank

The Bank's tier 1 ratio was 18.4% as of the end of 2012, an increase from 15.1% as of the end of 2011. The increase in the tier 1 ratio reflected an increase in tier 1 capital and a decrease in RWA. The Bank's core tier 1 ratio was 14.4% as of the end of 2012, compared to 10.4% as of the end of 2011. The Bank's total capital ratio was 22.2% as of the end of 2012, compared to 20.8% as of the end of 2011, reflecting the increase in tier 1 capital and the decrease in RWA.

The Bank's total eligible capital decreased to CHF 47.8 billion as of the end of 2012 from CHF 48.4 billion as of the end of 2011.

RWA decreased CHF 17.5 billion to CHF 215.1 billion as of the end of 2012 and the Bank's tier 1 capital increased to CHF 39.7 billion as of the end of 2012 from CHF 35.1 billion as of the end of 2011.

The business of the Bank is substantially the same as the business of the Group. The trends for the Bank are consistent with those for the Group.

Leverage ratios

The capital levels of the Group and the Bank are subject to qualitative judgments by regulators, including FINMA, about the components of capital, risk weightings and other factors. In November 2008, FINMA issued a decree that defined capital adequacy and leverage ratio requirements, with compliance phased in by 2013. The capital adequacy target included in

this decree is a range between 50% and 100% above the Pillar 1 requirements under the Basel framework. In addition, the decree includes leverage limits that require us to maintain a minimum leverage ratio of tier 1 capital to total adjusted average assets (on a non-risk-weighted basis) of 3% at the Group and Bank consolidated level and 4% at the Bank on an unconsolidated basis by 2013.

Total assets are adjusted for purposes of calculating this leverage ratio. The adjustments include assets from Swiss lending activities (excluding Swiss interbank lending), cash and balances with central banks, certain Swiss franc reverse repurchase agreements and certain other assets, such as goodwill and intangible assets that are excluded in determining regulatory tier 1 capital.

Leverage ratios – Basel II.5

| | Group | | | Bank | | |
|---|-------------|-------------|----------|-------------|-------------|----------|
| end of | 2012 | 2011 | % change | 2012 | 2011 | % change |
| Tier 1 capital (CHF billion) | | | | | | |
| Tier 1 capital | 43.5 | 36.8 | 18 | 39.7 | 35.1 | 13 |
| Adjusted average assets (CHF billion) ¹ | | | | | | |
| Average assets | 973 | 1,038 | (6) | 957 | 1,024 | (7) |
| Adjustments: | | | | | | |
| Assets from Swiss lending activities ² | (150) | (145) | 3 | (128) | (123) | 4 |
| Cash and balances with central banks | (59) | (81) | (27) | (58) | (81) | (28) |
| Other | (13) | (15) | (13) | (12) | (14) | (14) |
| Adjusted average assets | 751 | 797 | (6) | 759 | 806 | (6) |
| Leverage ratio (%) | | | | | | |
| Leverage ratio | 5.8 | 4.6 | – | 5.2 | 4.4 | – |

¹ Calculated as the average of the month-end values for the previous three calendar months. ² Excludes Swiss interbank lending.

The leverage ratios for the Group and Bank as of the end of 2012 were 5.8% and 5.2%, respectively, compared to 4.6% and 4.4% as of the end of 2011, calculated using Basel II.5 tier 1 capital. The increase in the Basel II.5 leverage ratios reflected substantially higher tier 1 capital and lower adjusted average assets. The 6% lower adjusted average assets reflected measures taken in connection with our balance sheet

reduction initiative announced in October 2012, particularly relating to Investment Banking assets, and the foreign exchange translational impact.

► Refer to "FINMA Basel III Leverage Ratio" in Ratios based on new capital frameworks and Regulation and Supervision in I – Information on the company for further information.

Total shareholders' equity**Group**

Our total shareholders' equity was CHF 35.5 billion as of the end of 2012 compared to CHF 33.7 billion as of the end of 2011. Total shareholders' equity was impacted by the issuance of common shares primarily used to settle share-based compensation and the share component of the scrip dividend distributed in 2012, net income in 2012, the effect of share-based compensation, including the Adjustable Performance Plan awards conversion described below, and the effect of pension adjustments, partially offset by the dividend payment in cash and shares, the impact of foreign exchange-related movements on cumulative translation adjustments and treasury share purchases and sales.

- ▶ Refer to the "Consolidated statements of changes in equity" in V – Consolidated financial statements – Credit Suisse Group for further information on the Group's total shareholders' equity.

Bank

The Bank's total shareholder's equity was CHF 34.8 billion as of the end of 2012 compared to CHF 29.4 billion as of the end of 2011. Total shareholder's equity was impacted by a capital contribution from the Group following the issuance of MACCS, net income in 2012, the effect of share-based compensation, including the Adjustable Performance Plan awards conversion, and the purchase of subsidiary shares from non-controlling interests, partially offset by the impact of foreign exchange-related movements on cumulative translation adjustments and cash dividends paid in 2012.

- ▶ Refer to the "Consolidated statements of changes in equity" in VII – Consolidated financial statements – Credit Suisse (Bank) for further information on the Bank's total shareholder's equity.

| Tangible book value per share¹ | 20.77 | 20.32 | 2 | 613.95 | 486.89 | 26 |

¹ Management believes that tangible shareholders' equity and tangible book value per share, both non-GAAP financial measures, are meaningful as they are measures used and relied upon by industry analysts and investors to assess valuations and capital adequacy.

July 2012 capital measures

In July 2012, we announced a number of measures, described below, designed to accelerate the strengthening of our capital position in light of the current regulatory and market environment, including the implementation of the Basel III framework and the Swiss “Too Big to Fail” legislation.

During the second half of 2012, we substantially completed the July 2012 capital measures, the effects of which were influenced by an adverse foreign exchange translation impact and the decrease in Basel III RWA. We have reached a Look-through Swiss Core Capital ratio of 9.0% as of the end of 2012 by adding CHF 11.5 billion of Swiss Core Capital and decreasing our Basel III RWA by CHF 20 billion over the last two quarters. We expect to add CHF 0.8 billion of capital in the near term through the completion of the remaining capital measures announced in July 2012, primarily related to strategic divestments and other measures, which would result in a pro forma Look-through Swiss Core Capital ratio of 9.3%.

As discussed below, the majority of the measures have a capital benefit for common equity tier 1 (CET1) capital. Certain measures only impact Swiss Core Capital. In aggregate, all of the measures impact Swiss Total Capital. Capital benefits consist of changes in equity, gains on sales, reduced deductions and RWA relief. The definitions of regulatory capital and capital ratios mentioned below refer to the Swiss “Too Big to Fail” legislation as determined by FINMA.

- Refer to “New capital framework in 2013” for further information.

We also believe that these actions, together with the comprehensive periodic disclosures we have made regarding these capital measures and our regulatory capital metrics beginning with our 2Q12 Financial Report, have fully addressed the two key recommendations raised in the SNB’s June 2012 Financial Stability Report. In that report, the SNB recommended that we expand our loss-absorbing capital base beginning in 2012 so that, when evaluated under the new Basel III regulatory framework as implemented in Switzerland, we would rank among the best capitalized banks in the world. Their second recommendation was that the large banks in Switzerland (including us) increase transparency by making regular disclosures of key metrics under the new regulatory capital framework, in particular loss-absorbing capital and risk-weighted assets under Basel III once fully implemented.

Mandatory and contingent convertible securities

In July 2012, we issued CHF 3.8 billion MACCS that are mandatorily convertible into 233.5 million shares at a conversion price of CHF 16.29 per share on March 29, 2013 (subject to early conversion upon certain contingency and viability events), with settlement and delivery of shares in early April 2013. Among the shares to be delivered upon conversion are 33.5 million treasury shares in respect of our 2012 purchase of the residual minority stake in Credit Suisse Hedging-Griffo Investimentos S.A.

Strategic and institutional investors purchased CHF 2.0 billion of MACCS and shareholders exercised preferential subscription rights for CHF 1.8 billion of MACCS, resulting in a CET1 capital benefit of CHF 3.6 billion, net of fees and interest.

Adjustable Performance Plan awards exchange

In the third quarter of 2012, we completed a voluntary exchange offer under which certain employees elected to convert any future cash payments from deferred compensation awards under the Adjustable Performance Plan awards for shares at the same price as the conversion price under the MACCS. Delivery of the shares will be consistent with the Adjustable Performance Plan awards deferred payment schedule, which provides for payments from 2013 to 2015. The Adjustable Performance Plan was initially a cash-based deferred compensation plan awarded in respect of 2009 and 2010, where the award value was linked to the financial performance of the employees’ business areas and the Group’s return on equity. The exchange resulted in a CET1 capital benefit of CHF 0.5 billion. This represented a conversion rate of approximately 50%.

Tender offer

In the third quarter of 2012, we completed a tender offer to repurchase certain outstanding public capital and senior funding instruments. The offer targeted 11 capital instruments denominated in US dollars, euros and British pounds and five additional senior bonds denominated in US dollars. The offers allowed the Group’s bond investors to sell holdings in capital and senior funding securities. Through the tender offer, in combination with certain additional repurchase transactions, we repurchased for CHF 4.8 billion outstanding tier 1 and tier 2 instruments and senior debt, resulting in a CET1 capital benefit of CHF 0.4 billion.

Real estate sales

During the second half of 2012, we completed real estate sales, including a significant sale-and-lease-back transaction in the fourth quarter of 2012, that resulted in a CET1 capital benefit of CHF 0.7 billion.

Sale of residual stake in Aberdeen Asset Management

We completed the sale of our residual stake in Aberdeen Asset Management in July 2012 for a CET1 capital benefit of CHF 0.2 billion.

Strategic divestments

In line with the accelerated implementation of our strategy toward a more liquid alternatives business in the Asset Management business and given the remaining uncertainty regarding the implementation of the "Volcker Rule", we intend to sell certain private equity businesses and investments and, as announced in January 2013, our ETF business, the sale of which is expected to close by the end of 2Q13. We made progress on these measures in 2012, adding a CET1 capital benefit of CHF 0.6 billion, primarily related to our redemptions of investments in funds and the sale of Wincasa.

Earnings-related effects/lower capital deductions

Positive earnings during the second half of 2012 and lower capital deductions also during the second half of 2012 including decreased deductions from lower deferred tax assets on net operating losses, together with the capital effect of share-based compensation awards, added a CET1 capital benefit of CHF 3.0 billion.

- ▶ Refer to "Note 26 – Tax" in – V – Consolidated financial statements – Credit Suisse Group for further information on deferred tax assets.

Tier 1 participation securities recognition

In 2008 and 2010, the Bank issued tier 1 participation securities to "Claudius", a third-party SPE which, in turn, issued perpetual, non-cumulative, secured notes to investors of which USD 1.5 billion bear interest at 8.25% and the other USD 1.5 billion bear interest at 7.875%. ◉FINMA has ruled that, under the Swiss "Too Big to Fail" legislation, the existing USD 3.0 billion in tier 1 participation securities (with a ◉haircut of 20%) will qualify as part of the Swiss equity requirement in excess of the 8.5% ◉Basel III Global Systemically Important Bank (G-SIB) CET1 ratio. This resulted in a Swiss Core Capital benefit of CHF 2.5 billion until the earlier of redemption or 2018 on a non-reducing basis.

Accelerated exchange of Tier 1 Capital Notes

In July 2012, we entered into an agreement to accelerate the exchange of USD 1.725 billion of our existing Tier 1 Capital Notes into high trigger Tier 1 BCN, which was initially scheduled for October 2013. The conversion floor price of the BCN delivered in the exchange (as well as the remaining BCN scheduled to be delivered in 2013) has been adjusted to the conversion price of the MACCS described above. The BCN qualify for a Swiss Total Capital benefit of CHF 1.5 billion, based on the US dollar exchange rate as of the end of 2012, net of fees.

New capital framework in 2013

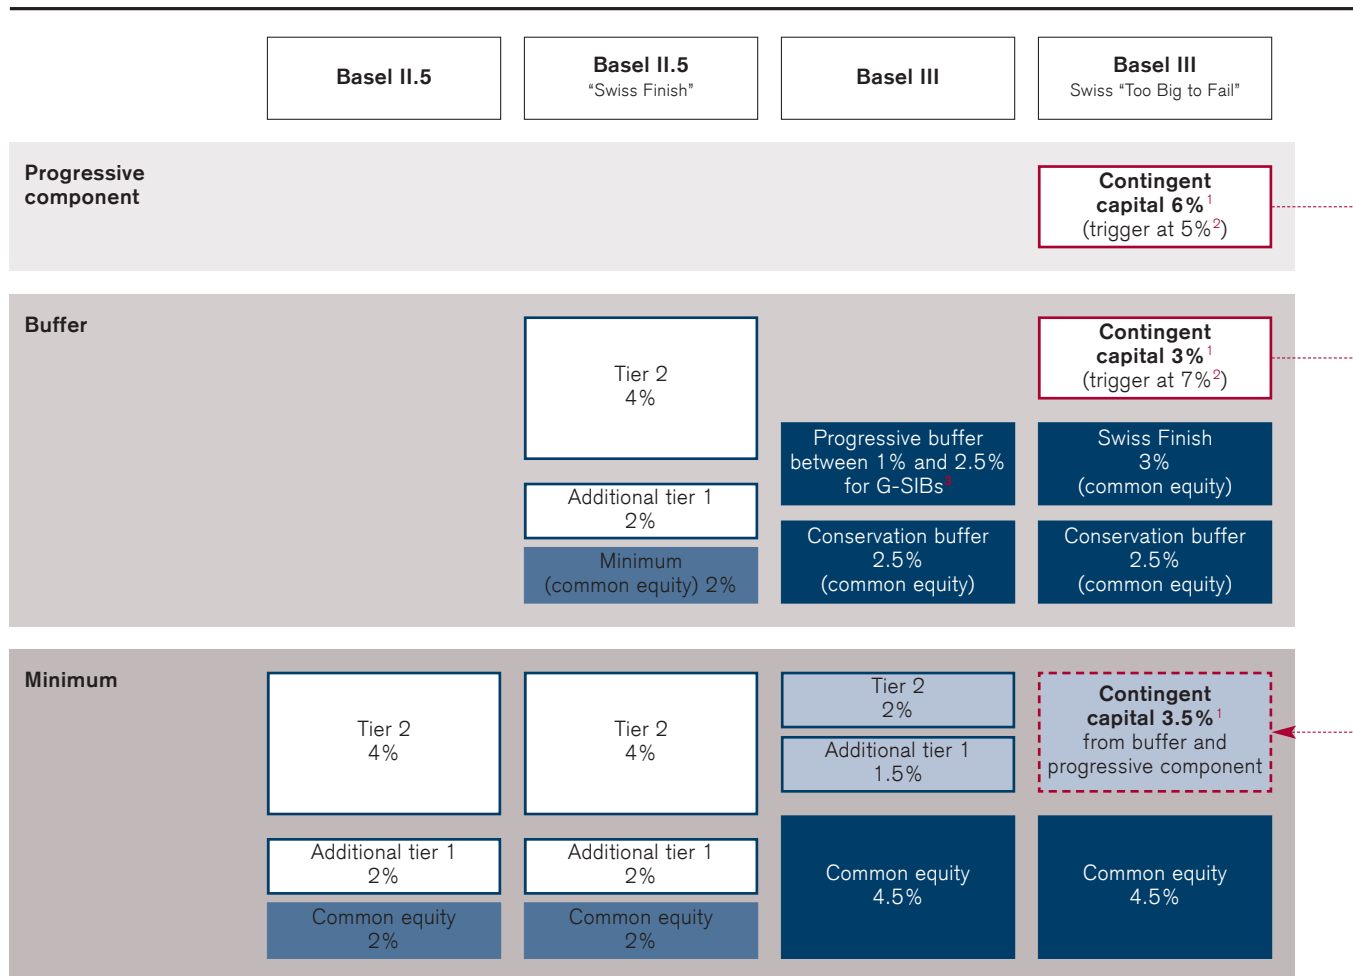

Basel III

The ◉BCBS issued the ◉Basel III framework, with higher minimum capital requirements and conservation and counter-cyclical buffers, revised risk-based capital measures, a leverage ratio and liquidity standards. The framework was designed to strengthen the resilience of the banking sector. The new capital standards and capital buffers will require banks to hold more capital, mainly in the form of common equity. The new capital standards will be phased in from January 1, 2013 through year-end 2018 for those countries that have adopted Basel III.

Under Basel III, the minimum CET1 ratio will increase from 2% to 4.5% and will be phased in from January 1, 2013 through January 1, 2015. This CET1 ratio will have certain regulatory deductions and other adjustments to common equity that will be phased in from January 1, 2014 through January 1, 2018, including deduction of deferred tax assets for tax-loss carry-forwards, goodwill and intangibles and investments in banking and finance entities. In addition, increases in the tier 1 capital ratio from 4% to 6% will be phased in from January 1, 2013 through January 1, 2015.

Basel III also introduces an additional 2.5% CET1 requirement, known as a capital conservation buffer, to absorb losses in periods of financial and economic stress. Banks that do not maintain this buffer will be limited in their ability to pay dividends or make discretionary bonus payments or other earnings distributions. The capital conservation buffer will be phased in from January 1, 2016 through year-end 2018.

Comparison of capital requirement frameworks

■ Common equity with lower quality. ■ Common equity with higher quality.

¹ Counts towards Basel III minimum requirements as tier 1 or tier 2 depending on the underlying instruments. The size of the progressive component is dependent on the company's size and market share of domestic systematically relevant business. ² Trigger at 5% or 7% of common equity tier 1 under Basel III. ³ The Group has assumed that its progressive buffer is 1.5%.

Basel III further provides for a countercyclical buffer that could require banks to hold up to an additional 2.5% of common equity or other capital that would be available to fully absorb losses. This requirement is expected to be imposed by national regulators where credit growth is deemed to be excessive and leading to the build-up of system-wide risk. This countercyclical buffer will be phased in from January 1, 2016 through year-end 2018.

Most capital instruments that do not meet the strict criteria for inclusion in the Basel III CET1 will be excluded beginning January 1, 2013. Capital instruments that would no longer qualify as tier 1 or tier 2 capital will be phased out over a 10-year period beginning January 1, 2013. In addition, instru-

ments with an incentive to redeem prior to their stated maturity, if any, will be phased out at their effective maturity date, generally the date of the first step-up coupon.

In November 2011, the BCBS issued final rules for global systemically important banks (G-SIBs), outlining a methodology for assessing whether a banking institution should be regarded as a G-SIB and determining additional capital requirements between 1% and 2.5% (with a possible additional 1%) of CET1. The additional requirements for G-SIBs will be phased in from January 1, 2016 through year-end 2018. The Financial Stability Board has identified us as a G-SIB.

Swiss regulations relating to Basel III

As of January 1, 2013, the Basel III framework was implemented in Switzerland along with the Swiss "Too Big to Fail" legislation and regulations thereunder. Together with the related implementing ordinances, the legislation includes capital, liquidity, leverage and large exposure requirements, and rules for emergency plans designed to maintain systemically relevant functions in the event of threatened insolvency. Certain requirements under the legislation, including those regarding capital, are to be phased in through year-end 2018. The legislation on capital requirements builds on Basel III, but in respect of systemically relevant banks goes beyond its minimum standards, including requiring that we have common equity of at least 10% of RWA and contingent capital or other qualifying capital of up to 9% of RWA by January 1, 2019.

In June 2012, the Swiss Federal Council adopted implementing ordinances under the Swiss "Too Big to Fail" legislation. Certain of the ordinance requirements became effective January 1, 2013, with some phased in through the end of 2018. Already effective upon adoption of the ordinances were increased lending standards for new residential mortgages and a supplemental countercyclical buffer of up to 2.5% of RWA that can be activated during periods of excess credit growth

and subsequently deactivated by the Federal Council upon request of the SNB after consultation with FINMA. On February 13, 2013, the Swiss Federal Council decided to activate the countercyclical capital buffer based on the request of the SNB. This activation of the countercyclical buffer will require banks to hold additional capital in the amount of 1% of their RWA pertaining to mortgage loans that finance residential property in Switzerland beginning in September 30, 2013.

In September 2012, the Swiss Parliament approved the portions of the ordinances related to the Swiss "Too Big to Fail" legislation that are specific to systemically relevant banks, including requirements regarding capital, leverage, large exposure and Recovery and Resolution Plans. These requirements became effective January 1, 2013. Under these ordinances, we must comply with an additional leverage ratio, applicable to Swiss systemically relevant banks (FINMA Basel III Leverage Ratio). This leverage ratio has to be at least 24% of the percentage points of each of the minimum, buffer and progressive capital requirements. Since the ratio is defined by reference to capital requirements subject to transitional arrangements, the new leverage ratio will be phased in from 2013 to 2018.

Transitional Swiss phase-in capital and leverage ratio requirements

■ Swiss Core Capital ■ High-trigger contingent capital ■ Low-trigger contingent capital¹

¹ Credit Suisse's progressive (low-trigger) 2019 capital requirement is 4.92%. The capital requirement, which is applicable for 2013, has been communicated to us by FINMA and is based on our 2011 year-end financial data (total exposure, market share in Switzerland and a potential capital rebate). Using 2012 year-end financial data, we estimate that the 2019 progressive capital requirement will be reduced to 4.56% in 2014.

Ratios based on new capital frameworks

Basel III CET1 ratio

We have updated our Basel III CET1 ratio to reflect recent developments. Our Basel III RWA as of the end of 2012 were CHF 293 billion, which reflect current foreign exchange rates.

Our Basel III CET1 ratio as of the end of 2012 was 14.2%, up from the 12.9% in our 2011 simulation for 2012, primarily reflecting the July 2012 capital measures. The following presentation is consistent with the phase-in/phase-out requirements of Basel III.

Basel III CET1 ratio

| end of | 2012 |
|--|-------------|
| Capital development (CHF billion) | |
| Total shareholders' equity | 35.5 |
| Mandatory and contingent convertible securities ¹ | 3.6 |
| Regulatory adjustments ² | 2.4 |
| CET1 capital | 41.5 |
| Risk-weighted assets development (CHF billion) | |
| Risk-weighted assets (Basel II.5) | 224 |
| Estimated Basel III changes | 60 |
| Subtotal (Look-through risk-weighted assets) | 284 |
| Transitional adjustments ³ | 9 |
| Risk-weighted assets (Basel III) | 293 |
| Capital ratio (%) | |
| CET1 ratio | 14.2 |

Rounding differences may occur.

¹ Consists of CHF 3.8 billion of mandatory and contingent convertible securities, net of fees and interest, which are mandatorily convertible into 233.5 million shares on March 29, 2013, with settlement and delivery of shares in early April 2013. ² Includes an adjustment of CHF 2.7 billion for the accounting treatment of pension plans, pursuant to phase-out requirements, and other regulatory adjustments. ³ Represents Basel III adjustments pursuant to phase-out requirements.

Look-through Basel III CET1 ratio

For the years 2014 – 2018, there will be a five-year (20% per annum) phase in of goodwill and intangible assets and other Basel III capital deductions (e.g., deferred tax assets and participations in financial institutions). Assuming a fully phased in CHF 8.6 billion of goodwill and intangible assets and CHF 7.9 billion of other regulatory adjustments, we estimate that our CET1 ratio as of December 31, 2012 would be 8.0%, calculated based on Look-through Basel III RWA of CHF 284 billion.

Swiss Core and Total Capital ratios

Swiss Core Capital consists of the Basel III CET1 capital and existing tier 1 participation securities. Swiss Total Capital also includes high and low-trigger contingent capital, including our BCN. As of the end of 2012, our Swiss Core Capital and Swiss Total Capital ratios were 15.0% and 16.4%, respectively, compared to 6.0% and 8.2%, respectively, required of us by FINMA.

Swiss Core and Total Capital ratios

| end of | 2012 |
|---|-------------|
| Capital development (CHF billion) | |
| CET1 capital | 41.5 |
| Swiss regulatory adjustments ¹ | 2.5 |
| Swiss Core Capital | 44.0 |
| High-trigger Buffer Capital Notes | 4.1 |
| Swiss Total Capital | 48.1 |
| Risk-weighted assets (CHF billion) | |
| Risk-weighted assets (Basel III) | 293 |
| Swiss regulatory adjustments ² | 1 |
| Swiss risk-weighted assets (Basel III) | 294 |
| Capital ratios (%) | |
| Swiss Core Capital ratio | 15.0 |
| Swiss Total Capital ratio | 16.4 |

Rounding differences may occur.

¹ Consists of existing tier 1 participation securities of CHF 2.5 billion and other Swiss regulatory adjustments. ² Reflects increased regulatory thresholds resulting from additional Swiss Core Capital.

Look-through Swiss Core and Total Capital ratios

The Look-through Swiss Core Capital assumes fully phased-in goodwill and intangible assets and other regulatory adjustments. We have calculated the pro forma Look-through Swiss Core Capital assuming the successful completion of the

remaining CHF 0.8 billion of capital measures announced in July 2012. As of the end of 2012, our pro forma Look-through Swiss Core Capital ratio was 9.3% compared to the 10.0% that will be required by FINMA by year-end 2018.

Look-through Swiss Core and Total Capital ratios

■ Look-through Swiss Core Capital ■ High-trigger Buffer Capital Notes

Note: Pro forma calculation assumes successful completion of the remaining capital measures announced in July 2012. Actual results may differ. Rounding differences may occur.

¹ Consists of existing tier 1 participation securities of CHF 2.5 billion and other Swiss regulatory adjustments. ² Consists of CHF 3.8 billion of mandatory and contingent convertible securities, net of fees and interest, with settlement and delivery of shares in early April 2013. ³ Consists of CHF 0.7 billion of strategic divestments and CHF 0.1 billion of other measures. ⁴ Reflects increased regulatory thresholds resulting from the remaining capital measures.

FINMA Basel III Leverage Ratio

The FINMA Basel III Leverage Ratio is calculated as Swiss Core Capital plus high and low-trigger contingent capital divided by total exposure. Total exposure consists of balance sheet assets plus exposure add-ons including cash collateral

netting reversals and off-balance sheet derivative exposures, guarantees and commitments. As of the end of 2012, our total exposure for FINMA Basel III Leverage Ratio purposes was CHF 1,276 billion. By the end of 2013, we are targeting a reduction in our total exposure to under CHF 1,170 billion.

Additional information

Share repurchases

The Swiss Code of Obligations limits a corporation's ability to hold or repurchase its own shares. We may only repurchase shares if we have sufficient free reserves to pay the purchase price, and if the aggregate nominal value of the repurchased shares does not exceed 10% of our nominal share capital. Furthermore, we must create a special reserve in our parent company financial statements in the amount of the purchase price of the acquired shares. In our consolidated financial statements, own shares are recorded at cost and reported as treasury shares, resulting in a reduction in total shareholders' equity. Shares repurchased by us do not carry any voting rights at shareholders' meetings.

We purchased 423.7 million treasury shares and sold or re-issued 394.7 million treasury shares in 2012, predominantly for market-making purposes and facilitating customer orders. As of December 31, 2012, the Group held 27.0 million treasury shares.

- ▶ Refer to "Impact of share-based compensation on shareholders' equity" in IV – Corporate Governance and Compensation – Compensation for further information.

Purchases and sales of treasury shares

| In million, except where indicated | Number of shares | Average price per share in CHF |
|--|------------------|--------------------------------|
| 2012 | | |

| September | 44.4 | 20.74 |
| October | 25.6 | 21.27 |
| November | 29.1 | 20.93 |
| December | 54.1 | 22.58 |
| Total purchase of treasury shares | 423.7 | – |
| Total sale of treasury shares | 394.7 | – |

Dividends and dividend policy

Under the Swiss Code of Obligations, dividends may be paid out only if and to the extent the corporation has distributable profits from previous business years, or if the free reserves of the corporation are sufficient to allow distribution of a dividend. In addition, at least 5% of the annual net profits must be retained and booked as general legal reserves for so long as these reserves amount to less than 20% of the paid-in share capital. Our reserves currently exceed this 20% threshold. Furthermore, dividends may be paid out only after shareholder approval at the AGM. The Board of Directors may propose that a dividend be paid out, but cannot itself set the dividend. In Switzerland, the auditors have to confirm whether the appropriation of retained earnings is in accordance with Swiss law and articles of incorporation. In practice, the shareholders usually approve the dividend proposal of the Board of Directors. Dividends are usually due and payable after the shareholders' resolution relating to the allocation of profits has been passed. Under the Swiss Code of Obligations, the statute of limitations in respect of claiming the payment of dividends that have been declared is five years.

Our dividend payment policy seeks to provide investors with a stable and efficient form of capital distribution relative to earnings. Dividend payments made in 2012, for 2011, were comprised of a distribution of CHF 0.75 per share payable against reserves from capital contributions in cash or upon shareholder election and subject to legal restrictions, in new Group shares or a combination thereof.

Our Board of Directors will propose for the financial year 2012 a distribution of CHF 0.10 per share in cash out of reserves from capital contributions to the shareholders at the AGM on April 26, 2013. In addition, the Board of Directors will propose the distribution of new shares (stock dividend). The new shares for the stock dividend will be paid in at the par value of CHF 0.04 per share out of reserves from capital contributions. The distribution out of reserves from capital contributions (cash and stock) will be free of Swiss withholding tax and will not be subject to income tax for Swiss resident individuals holding the shares as a private investment. The ex-dividend date has been set to April 30, 2013 (for cash distribution and stock dividend).

The stock dividend will be distributed to all shareholders as follows: for every share that they own, shareholders will receive a non-tradable right to the receipt of a given number of new shares for free. Following distribution, the rights will automatically be exchanged for new shares at the ratio determined by the Board of Directors immediately prior to the Annual General Meeting. The Board of Directors will set the subscription ratio in such a way that the theoretical value of

each right will be approximately CHF 0.65. The distribution is subject to shareholder approval at the AGM.

Reflecting our holding company structure, the Group is not an operating company and holds investments in subsidiaries. It is therefore reliant on the dividends of its subsidiaries to pay shareholder dividends and service its long-term debt. The subsidiaries of the Group are generally subject to legal restrictions on the amount of dividends they can pay. The amount of dividends paid by operating subsidiaries is determined after consideration of the expectations for future results and growth of the operating businesses.

- Refer to “Proposed distribution against reserves from capital contributions” in VI – Parent company financial statements – Credit Suisse Group – Proposed appropriation of retained earnings and capital distributions for further information on dividends.

Foreign exchange exposure and interest rate management

Foreign exchange risk associated with investments in branches, subsidiaries and affiliates is managed within defined parameters that create a balance between the interests of stability of capital adequacy ratios and the preservation of Swiss franc shareholders' equity. The decisions regarding these parameters are taken by CARMC and are regularly reviewed.

Foreign exchange risk associated with the nonfunctional currency net assets of branches and subsidiaries is managed through a combination of forward and backward looking hedging activity, which is aimed at reducing the foreign exchange rate induced volatility of reported earnings.

Interest rate risk inherent in banking book activities, such as lending and deposit taking, is transferred from the divisions to Treasury, which centrally manages the interest rate exposures. Treasury also develops and maintains the models needed to determine interest rate risks of products that do not have a defined maturity, such as demand and savings accounts. For this purpose, a replicating methodology is applied in close coordination with Risk Management to maximize stability and sustainability of spread revenues at the divisions. Further, Treasury manages the interest exposure of the Bank's equity to targets agreed with senior management.

Risk management

The prudent taking of risk in line with our strategic priorities is fundamental to our business as a leading global bank and remained a critical focus throughout 2012. Over the course of 2012, we took significant steps to adapt our businesses and our organization to the new regulatory requirements, which predominantly impacted the risk profile of Investment Banking. In 2012, overall position risk decreased 1%, utilized economic capital decreased 8%, average risk management VaR in US dollars for our trading books decreased 31% and our impaired loans were stable at CHF 1.7 billion.

Key risk developments in 2012

2012 was a year marked by uncertainty amid continued concerns from the European sovereign debt crisis, global economic slowdown, the threat of the US "fiscal cliff" in late 2012 and new and proposed regulatory requirements affecting the financial services industry.

During 2012, we reduced our Group risk profile and shifted our portfolio toward less capital intense businesses. We continued to invest significantly in our IT infrastructure and further refined our risk appetite framework to ensure an appropriate balance of return and assumed risk, stability of earnings and capital levels we seek to maintain.

- ▶ Refer to "Regulation and supervision" in I – Information on the company for information on other regulatory developments and proposals.
- ▶ Refer to "New capital framework in 2013" in Capital management for further information on our current regulatory framework on capital, leverage and liquidity, including certain expected changes to this framework.

In Investment Banking, we reduced our risk profile during 2012, consistent with our announced strategy. Investment Banking achieved this through a combination of exiting businesses, asset sales and repositioning its portfolio into more capital-efficient inventory in support of client franchises. Investment Banking's shift of capital resources included exiting the ◉commercial mortgage-backed securities (CMBS) origination and ◉collateralized debt obligations (CDOs) businesses. As we continue to execute on our Investment Banking strategy in 2013, efficiency in the use of capital remains a focus.

Private Banking & Wealth Management's risk profile increased slightly in 2012, with key contributing factors continuing to be largely related to stricter rules on investor protection as well as increased transparency for cross-border activities that continued to affect risk. The integration of the Private Banking and Asset Management businesses to form

Private Banking & Wealth Management is not expected to result in changes to the combined division's risk profile.

For the Group, we expect our ongoing adaptation to the changed regulatory environment will result in increased costs and resource requirements related to the risk management function.

Reputational risk continued as a major focus during 2012. We have continued to develop our procedures and awareness of staff as well as to adapt our business approach with respect to certain countries and industries with higher reputational risk and transactions with politically exposed persons.

- ▶ Refer to "Reputational risk" for further information on reputational risk issues.

Risk management oversight

Risk governance

Fundamental to our business is the prudent taking of risk in line with our strategic priorities. The primary objectives of risk management are to protect our financial strength and reputation, while ensuring that capital is well deployed to support business activities and grow shareholder value. Our risk management framework is based on transparency, management accountability and independent oversight. Risk management is an integral part of our business planning process with strong involvement of senior management and the Board of Directors (Board).

To meet the challenges of a volatile market environment and changing regulatory frameworks, we work to continuously strengthen our risk function, which is independent of, but closely interacts with the front office functions to ensure the appropriate flow of information and strong controls. In 2012, we continued to invest significantly in our risk infrastructure and processes with regard to the implementation of ◉Basel III. We have comprehensive risk management processes and sophisticated control systems, and we work to limit the impact of negative developments by carefully managing concentrations of risks.

Risk organization

We manage risk in our internal control environment, however, risks arise in all of our business activities and cannot be eliminated completely. Our risk management organization reflects the specific nature of the various risks to ensure that risks are managed within limits set in a transparent and timely manner. At the level of the Board, including through its committees, this includes the following responsibilities:

- Board: responsible to shareholders for the strategic direction, supervision and control of the Group and for defining our overall tolerance for risk in the form of a risk appetite statement and overall risk limits;
- Risk Committee: responsible for assisting the Board in fulfilling its oversight responsibilities by providing guidance regarding risk governance and the development of the risk profile and capital adequacy, including the regular review of major risk exposures and overall risk limits; and
- Audit Committee: responsible for assisting the Board in fulfilling its oversight responsibilities by monitoring management's approach with respect to financial reporting, internal controls, accounting and legal and regulatory compliance. Additionally, the Audit Committee is responsible for monitoring the independence and the performance of the internal and external auditors.

Overall risk limits are set by the Board in consultation with its Risk Committee. On a monthly basis, senior management through CARMC reviews risk exposures, concentration risks and risk-related activities. CARMC is responsible for supervising and directing our risk profile on a consolidated basis, recommending risk limits to the Risk Committee of the Board and the Board, and for establishing and allocating risk limits among the various businesses. CARMC meetings focus on the following three areas on a rotating basis: asset and liability management/liquidity, market and credit risk and operational risk/legal and compliance.

Committees have been established at a senior management level to further support the risk management function. The Risk Processes & Standards Committee is responsible for establishing and approving standards regarding risk management and risk measurement, including methodology and parameters. The Credit Portfolio & Provisions Review Committee reviews the quality of the credit portfolio with a focus on the development of impaired assets and the assessment of related provisions and valuation allowances. The Reputational Risk & Sustainability Committee sets policies, and reviews processes and significant cases relating to reputational risks and sustainability issues. There are also divisional risk management committees.

¹ Asset and Liability Management ² Legal and Compliance Department ³ Business Continuity Management ⁴ Risk Management Committee

The risk committees are further supported by Treasury, which is responsible for the management of our balance sheet, capital management, liquidity and related hedging policies.

The risk management function reports to the CRO, who is independent of the business and is a member of the Executive Board. In 2012, the function covered:

- Strategic Risk Management (SRM);
- Risk Analytics and Reporting (RAR);
- Credit Risk Management (CRM);
- Bank Operational Risk Oversight (BORO);
- Business Continuity Management (BCM);
- Technology Risk Management (TRM); and
- Reputational Risk Management.

The risk management function is responsible for providing risk management oversight and establishing an organizational basis to manage all risk management matters through four primary risk functions: SRM assesses the Group's overall risk profile on a strategic basis, recommending corrective action where necessary, and is also responsible for market risk management including measurement and limits; RAR is responsible for risk analytics, reporting, systems implementation and policies; CRM is responsible for approving credit limits, monitoring and managing individual exposures, and assessing and managing the quality of credit portfolios and allowances; BORO acts as the central hub for the divisional operational risk functions; BCM assesses and manages potential impacts that threaten the organization in case of operational disruption, crisis or disaster; and TRM oversees the information technology-related risk aspects.

Risk types

Within our risk framework, we have defined the following types of risk:

Management risks:

- Strategy risk: outcome of strategic decisions or developments; and
- Reputational risk: damage to our standing in the market.

Chosen risks:

- Market risk: changes in market factors such as prices, volatilities and correlations;
- Credit risk: changes in the creditworthiness of other entities; and
- Expense risk: difference between expenses and revenues in a severe market event.

Consequential risks:

- Operational risk: inadequate or failed internal processes, people and systems (including cyber risk), or external events; and
- Liquidity risk: inability to fund assets or meet obligations at a reasonable price.

Management risks are difficult to quantify. While management of strategy risk is addressed at the Board and Executive Board level, a process has been implemented to globally capture and manage reputational risk. Chosen risks are, in general, highly quantifiable, but are challenging in complexity and scale, especially when aggregated across all positions and types of financial instruments. For operational risk management, we have primarily set up processes on Group, divisional and regional levels. Liquidity management is centralized with Treasury.

Information required under Pillar 3 of the Basel framework related to risk is available on our website at www.credit-suisse.com/pillar3.

Risk appetite and risk limits

We have a risk appetite framework that establishes key principles for managing our risks to ensure an appropriate balance of return and assumed risk, stability of earnings and capital levels we seek to maintain. The key aspect of our risk appetite framework is a sound system of integrated risk limits to control overall risk taking capacity and serve as an essential decision making tool for senior management. Our risk appetite framework is guided by the following general principles:

- Managing the business to a target credit rating;
- Meeting regulatory requirements and expectations;
- Ensuring capital adequacy;
- Maintaining low exposure to stress events;
- Maintaining stability of earnings; and
- Ensuring sound management of liquidity and funding risk.

Risk appetite is annually reviewed and determined by the Board, taking into account strategic and business planning, and enforced by a detailed framework of portfolio and position limits at both Group and business division levels. In 2012, group-wide limits for Basel III risk-weighted assets and balance sheet size, and divisional operational risk tolerance levels were added to the risk appetite framework. These enhancements to the framework were effective beginning 2013. The following chart gives an overview of the Group's risk appetite framework reflecting selected Group-wide and division-specific quantitative limits and qualitative restrictions.

Risk appetite framework

| | Group-wide | Division-specific | |
|--|--|--|--------------------|
| | | Private Banking & Wealth Management | Investment Banking |
| Selected quantitative limits | <ul style="list-style-type: none"> – Economic capital limits – Liquidity ratios – Leverage ratios – Scenario loss limits – Risk-weighted assets – Balance sheet size | <ul style="list-style-type: none"> – Economic capital limits – Market risk limits – Credit risk limits – Operational risk tolerance levels | |
| Selected qualitative restrictions | <ul style="list-style-type: none"> – Compliance with international and local laws – Reputational risk | <ul style="list-style-type: none"> – Avoidance of concentration risks – Adherence to suitability & appropriateness requirements – Compliance with industry guidelines and internal policies | |

A sound system of risk limits is fundamental to effective risk management. The limits define our maximum balance sheet and off-balance sheet exposure given the market environment, business strategy and financial resources available to absorb losses.

We use an economic capital limit structure to manage overall risk taking. The overall risk limits for the Group are set by the Board in consultation with its Risk Committee and are binding. Any excess of these limits will result in immediate notification to the Chairman of the Board's Risk Committee and the CEO of the Group, and written notification to the full Board at its next meeting. Following notification, the CRO can approve positions that exceed the Board limits by no more than an approved percentage with any such approval being reported to the full Board. Positions that exceed the Board limits by more than such approved percentage can only be approved by the CRO and the full Board acting jointly. In 2012 and 2011, no Board limits were exceeded.

In the context of the overall risk appetite of the Group, as defined by the limits set by the Board, CARMC is responsible for setting divisional risk limits and more specific limits deemed necessary to control the concentration of risk within individual lines of business. For this purpose, CARMC uses a detailed framework of more than 100 individual risk limits designed to control risk taking at a granular level by individual businesses and in the aggregate. Limit measures used include •VaR, economic capital, risk exposure, risk sensitivity and scenario

analysis. The framework encompasses specific limits on a large number of different product and risk type concentrations. For example, there are consolidated controls over trading exposures, the mismatch of interest-earning assets and interest-bearing liabilities, private equity and seed money and emerging market country exposures. Risk limits allocated to lower organizational levels within the businesses also include a system of individual counterparty credit limits. CARMC limits are binding and generally set at a tight level to ensure that any meaningful increase in risk exposures is promptly escalated. The head of SRM for the relevant division or certain other members of senior management have the authority to temporarily increase the CARMC limits by an approved percentage for a period not to exceed 90 days. Any CARMC limit excess is subject to a formal escalation procedure and must be remediated or expressly approved by senior management. Senior management approval is valid for a standard period of ten days (or fewer than ten days for certain limit types) and approval has to be renewed for additional standard periods if an excess is not remediated within the initial standard period. The majority of these limits are monitored on a daily basis. Limits for which the inherent calculation time is longer are monitored on a weekly basis. A smaller sub-set of limits relating to exposures for which the risk profile changes more infrequently (for example, those relating to illiquid investments) is monitored on a monthly basis. In 2012, all CARMC limit excesses were resolved within the approved standard period.

Economic capital and position risk

Overview

Economic capital is used as a consistent and comprehensive tool for risk management, capital management and performance measurement. It is our core Group-wide risk management tool for measuring and reporting all quantifiable risks. Economic capital measures risks in terms of economic realities rather than regulatory or accounting rules and is the estimated capital needed to remain solvent and in business, even under extreme market, business and operational conditions, given our target financial strength (our long-term credit rating). It also provides a common terminology for risk across the Group, which increases risk transparency and improves knowledge sharing. The development and use of economic capital methodologies and models have evolved over time without a standardized approach within the industry, therefore comparisons across firms may not be meaningful.

Under Pillar 2 of the Basel framework (also referred to as the Supervisory Review Process), banks are required to implement a robust and comprehensive framework for assessing capital adequacy, defining internal capital targets and ensuring that these capital targets are consistent with their overall risk profile and the current operating environment. Our economic capital framework has an important role under Pillar 2, as it represents our internal view of the amount of capital required to support our business activities.

Economic capital is calculated separately for ◉ position risk, operational risk and other risks. These three risks are used to determine our utilized economic capital and are defined as follows:

- Position risk: the level of unexpected loss in economic value on our portfolio of positions over a one-year horizon which is exceeded with a given small probability (1% for risk management purposes; 0.03% for capital management purposes). Position risk is used to assess, monitor and report risk exposures throughout the Group;
- Operational risk: the level of loss resulting from inadequate or failed internal processes, people and systems or from external events over a one-year horizon which is exceeded with a given small probability (0.03%). Estimating this type of economic capital is inherently more subjective and reflects quantitative tools and senior management judgment; and
- Other risks: the risks not captured by the above, which primarily includes expense risk, pension risk, foreign exchange risk between economic capital resources and utilized economic capital and risk on real estate held for own use. Expense risk is defined as the difference between expenses and revenues in a severe market event,

exclusive of the elements captured by position risk and operational risk. Pension risk is defined as the potential under-funding of our pension obligations in an extreme event.

We regularly review our economic capital methodology in order to ensure that the model remains relevant as markets and business strategies evolve. In 2012, we made a number of enhancements to the position risk methodology for risk management purposes, including:

- For international lending & counterparty exposures, we enhanced the manner in which we capture ratings for high yield senior secured loans and aligned certain credit risk parameters with an updated ◉FINMA-approved regulatory capital model;
- For equity trading & investments, we recalibrated the modeling of private equity exposures, including refinements to shock calculation and market data;
- For real estate & structured assets, we refined model shocks used for asset finance products;
- For fixed income trading, we removed the impact of the seasonal effects from the historical data used for energy products; and
- For emerging markets country event risk, we refined the allocation methodology to the divisions.

Prior-period balances have been restated for methodology changes in order to show meaningful trends. The total impact of 2012 methodology changes on position risk for the Group as of December 31, 2011 was a decrease of CHF 653 million, or 6%.

For utilized economic capital used for capital management purposes, in addition to adopting the above position risk methodology changes, operational risk capital has been increased to reflect anticipated changes to our model. In 2012, following discussions with FINMA, we initiated a project to enhance our economic capital/◉AMA methodology to reflect recent developments regarding operational risk measurement methodology and associated regulatory guidance. For the duration of this project, which is scheduled to conclude in 2013, operational risk capital required for regulatory and economic capital purposes has been increased by 20% to reflect anticipated changes to our models. Prior period balances have been restated for 2012 methodology changes in order to show meaningful trends. The total impact of methodology changes on utilized economic capital for the Group as of December 31, 2011 was a decrease of CHF 793 million, or 2%.

In response to the 2008 financial crisis, regulators have introduced changes to the regulatory capital framework through the implementation of ◉Basel II.5 and ◉Basel III.

Often, in response to economic realities, we modify our economic capital model in advance of regulatory changes. For example, requirements such as capital charges equivalent to an ◉ incremental risk charge (IRC) and ◉ credit valuation

adjustments have been an integral part of our economic capital model for several years. We continually review our model so that it reflects risks measured in terms of potential loss of economic value.

Group position risk

| | end of | | | % change | |

| Position risk (99% confidence level for risk management purposes) | 11,377 | 11,537 | 11,515 | (1) | 0 |

Prior-period balances have been restated for methodology changes in order to show meaningful trends.

¹ This category comprises fixed income trading, foreign exchange and commodity exposures. ² This category comprises commercial and residential real estate (including RMBS and CMBS), ABS exposure, real estate acquired at auction and real estate fund investments. ³ Reflects the net difference between the sum of the position risk categories and the position risk on the total portfolio.

Key position risk trends

Compared to the end of 2011, position risk for risk management purposes decreased 1%. Excluding the US dollar translation impact, position risk increased 1%, mainly due to reduced hedges and new loans in Investment Banking in international lending & counterparty exposures, higher emerging markets country event risk primarily due to increased exposures in Asia and Eastern Europe and increased risk in loans collateralized by securities and commercial loans in private banking corporate & retail lending. These increases were par-

tially offset by sales of private equity and illiquid hedge fund exposures in equity trading & investments and lower ◉CMBS and ◉RMBS exposures in real estate & structured assets.

As part of our overall risk management, we hold a portfolio of hedges. Hedges are impacted by market movements, similar to other trading securities, and may result in gains or losses which offset losses or gains on the portfolios they were designated to hedge. Due to the varying nature and structure of hedges, these gains or losses may not wholly offset the losses or gains on the portfolios.

Economic capital

| Average utilized economic capital – Group ⁴ | 31,218 | 30,782 | 1 |
| Average utilized economic capital – Bank ³ | 28,214 | 28,417 | (1) |

Prior-period balances have been restated for methodology changes in order to show meaningful trends.

¹ Includes primarily expense risk, diversification benefits from the divisions and foreign exchange risk between economic capital resources and utilized economic capital. ² Includes a diversification benefit of CHF 17 million and CHF 21 million as of December 31, 2012 and 2011, respectively. ³ The major difference between economic capital of the Group and the Bank relates to the risks within Neue Aargauer Bank AG, BANK-now AG and Corporate Center. These risks include position and other risks. ⁴ Includes a diversification benefit of CHF 22 million and CHF 13 million as of December 31, 2012 and 2011, respectively.

Utilized economic capital trends

Over the course of 2012, our utilized economic capital decreased 8%. Excluding the US dollar translation impact, utilized economic capital decreased 6%, mainly due to decreased expense risk within other risks and lower position risk primarily in equity trading & investments and fixed income trading, partially offset by increased position risk in international lending & counterparty exposure and emerging markets country event risks.

For Private Banking & Wealth Management, utilized economic capital decreased 4%, mainly due to lower position risk in equity trading & investments and decreased deferred shared-based compensation awards in other risks, partially offset by higher position risk in private banking corporate & retail lending.

For Investment Banking, utilized economic capital decreased 9%. Excluding the US dollar translation impact, utilized economic capital decreased 6%, largely due to decreased expense risk within other risks and lower position

risk in fixed income trading. The decreases were partially offset by higher position risk in international lending & counterparty exposures and emerging markets country event risk.

Corporate Center utilized economic capital decreased 9% due to lower expense risk within other risks.

Market risk

Market risk is the risk of loss arising from adverse changes in interest rates, foreign exchange rates, equity prices, commodity prices and other relevant parameters, such as market volatility. We define our market risk as potential changes in the fair value of financial instruments in response to market movements. A typical transaction may be exposed to a number of different market risks.

We devote considerable resources to ensure that market risk is comprehensively captured, accurately modeled and reported, and effectively managed. Trading and non-trading portfolios are managed at various organizational levels, from the overall risk positions at the Group level down to specific portfolios. We use market risk measurement and management methods designed to meet or exceed industry standards. These include general tools capable of calculating comparable exposures across our many activities and focused tools that can specifically model unique characteristics of certain instruments or portfolios. The tools are used for internal market risk management, internal market risk reporting and external disclosure purposes. Our principal market risk measurement methodologies are ◉VaR and scenario analysis. Additionally, our market risk exposures are reflected in our economic capital calculations. The risk management techniques and policies are regularly reviewed to ensure they remain appropriate.

To meet the requirements of the ◉Basel II.5 market risk framework for ◉FINMA regulatory capital purposes, effective January 1, 2011 we implemented additional risk measurement models, including ◉IRC and ◉stressed VaR. IRC is a regulatory capital charge for default and migration risk on positions in the trading books and intended to complement additional standards being applied to the VaR modeling framework, including stressed VaR. Stressed VaR replicates a VaR calculation on the Group's current portfolio taking into account a one-year observation period relating to significant financial stress and helps reduce the pro-cyclicality of the minimum capital requirements for market risk.

VaR

VaR measures the potential loss in fair value of financial instruments due to adverse market movements over a defined time horizon at a specified confidence level. VaR as a concept is applicable for all financial risk types with valid regular price histories. Positions are aggregated by risk type rather than by product. For example, interest rate risk includes risk arising from interest rate, foreign exchange, equity and commodity options, money market and swap transactions and bonds. The use of VaR allows the comparison of risk in different businesses, such as fixed income and equity, and also provides a means of aggregating and netting a variety of positions within a portfolio to reflect actual correlations and offsets between different assets.

Historical financial market rates, prices and volatilities serve as the basis for the statistical VaR model underlying the potential loss estimation. We use a one-day holding period and a confidence level of 98% to model the risk in our trading portfolios for internal risk management purposes and a ten-day holding period and a confidence level of 99% for regulatory capital purposes. These assumptions are compliant with the standards published by the BCBS and other related international standards for market risk management. For some purposes, such as ◉backtesting, disclosure and benchmarking with competitors, the resulting VaR figures are calculated based on a one-day holding period level or scaled down from a longer holding period.

We use a historical simulation model for the majority of risk types and businesses within our trading portfolios. The model is based on the profit and loss distribution resulting from historical changes in market rates, prices and volatilities applied to evaluate the portfolio.

We use the same VaR model for risk management and regulatory capital purposes, except for the confidence level and holding period used. We regularly review our VaR model to ensure that it remains appropriate given evolving market conditions and the composition of our trading portfolio. As part of the ongoing review to improve risk management approaches and methodologies, we implemented a significantly revised VaR methodology for both ◉risk management VaR and ◉regulatory VaR in the second quarter of 2011. We believe these changes made VaR a more useful risk management tool and improved the responsiveness of the model to market volatility. We received approval from FINMA to use this revised VaR methodology for both risk management and regulatory capital purposes. We have restated risk management VaR for periods prior to implementation to show meaningful trends. The methodology changes were implemented in June 2011 and fully reflected in risk management VaR. For regulatory VaR,

these methodology changes have been reflected from implementation only.

- ▶ Refer to “VaR” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Risk management – Market risk in the Credit Suisse Annual Report 2011 for information on VaR methodology changes implemented in June 2011.

In the second quarter of 2012 we made asset-class methodology changes to better capture complex risks for exotic rate products.

We have approval from FINMA, as well as from certain other regulators of our subsidiaries, to use our regulatory VaR model in the calculation of trading book market risk capital requirements. We continue to receive regulatory approval for ongoing enhancements to the methodology, and the model is subject to regular reviews by regulators.

For risk management VaR, we use a one-day holding period and a 98% confidence level. This means there is a 1-in-50 chance of incurring a daily mark-to-market trading loss at least as large as the reported VaR. For regulatory VaR, we present one-day, 99% VaR, which is a ten-day VaR adjusted to a one-day holding period. In order to show the aggregate market risk in our trading books, the chart entitled “Daily risk management VaR” shows the trading-related market risk on a consolidated basis.

The VaR model uses assumptions and estimates that we believe are reasonable, but VaR only quantifies the potential loss on a portfolio under normal market conditions. Other risk measures, such as scenario analysis, are used to estimate losses associated with unusually severe market movements. The main assumptions and limitations of VaR as a risk measure are:

- VaR relies on historical data to estimate future changes in market conditions, which may not capture all potential future outcomes, particularly where there are significant changes in market conditions, such as increases in volatilities;
- Although VaR captures the relationships between risk factors, these relationships may be affected by stressed market conditions;
- VaR provides an estimate of losses at a 98% confidence level for internal risk management and 99% confidence level for regulatory capital purposes, which means that it does not provide any information on the size of losses that could occur beyond that confidence level;
- VaR is based on either a one-day (for internal risk management, backtesting and disclosure purposes) or a ten-day (for regulatory capital purposes) holding period. This assumes that risks can be either sold or hedged over the holding period, which may not be possible for all types of

exposure, particularly during periods of market illiquidity or turbulence; and

- VaR is calculated using positions held at the end of each business day and does not include intra-day exposures.

Scenario analysis

Stress testing complements other risk measures by capturing the Group's exposure to unlikely but plausible events, which can be expressed through a range of significant moves across multiple financial markets. Key scenarios include significant movements in credit spreads, interest rates, equity and commodity prices and foreign exchange rates, as well as adverse changes in counterparty default and recovery rates. The majority of scenario analysis calculations performed are specifically tailored toward the risk profile within particular businesses, and limits are established if they are considered the most appropriate control. In addition, to identify areas of risk concentration and potential vulnerability to stress events at Group level, we use a set of scenarios, which are consistently applied across all businesses and assess the impact of significant, simultaneous movements across a broad range of markets and asset classes.

Stress testing is a fundamental element of the Group risk control framework. Stress testing results are monitored against limits, used in risk appetite discussions and strategic business planning, and support our internal capital adequacy assessment. Stress test scenarios are conducted on a regular basis and the results, trend information and supporting analysis are reported on to the Board, senior management and the business divisions.

The Group's stress testing framework is comprehensive and governed through a dedicated steering committee. Scenarios can be defined with reference to historic events or based on forward looking, hypothetical events that could impact the Group's positions, capital, or profitability. The scenarios are reviewed and updated regularly as markets and business strategies evolve, and new scenarios are designed by the risk management function in collaboration with our business divisions.

Trading portfolios

Risk measurement and management

We assume market risk in our trading portfolios primarily through the trading activities of the Investment Banking division. Our other divisions also engage in trading activities, but to a much lesser extent.

For the purposes of this disclosure, VaR is used to quantify market risk in the trading portfolio, which includes those financial instruments treated as part of the trading book for regulatory capital purposes. This classification of assets as trading

is done for purposes of analyzing our market risk exposure, not for financial statement purposes.

We are active in most of the principal trading markets of the world, using the majority of common trading and hedging products, including derivatives such as swaps, futures, options and structured products (some of which are customized transactions using combinations of derivatives and executed to meet specific client or proprietary needs). As a

result of our broad participation in products and markets, our trading strategies are correspondingly diverse and exposures are generally spread across a range of risks and locations.

Risks associated with the embedded derivative elements of our structured products are actively monitored and managed on a portfolio basis as part of our overall trading portfolio and are reflected in our VaR measures.

One-day, 98% risk management VaR and one-day, 99% regulatory VaR (CHF)

| | | | | | | Risk management VaR (98%) | Regulatory VaR (99%) |
|--------------------|-------------------------------------|---------------------|-----------|--------|---------------------------------|------------------------------|-------------------------|
| in / end of | Interest rate & credit spread | Foreign exchange | Commodity | Equity | Diversi- fication benefit | Total | Total |

| End of period | 78 | 18 | 16 | 22 | (54) | 80 | 132 |

Excludes risks associated with counterparty and own credit exposures. In June 2011, we made significant changes to our VaR methodology. Risk management VaR for periods prior to implementation has been restated in order to show meaningful trends. For regulatory VaR, these methodology changes have been reflected from implementation only.

¹ As the maximum and minimum occur on different days for different risk types, it is not meaningful to calculate a portfolio diversification benefit.

Development of trading portfolio risks

The tables entitled “One-day, 98% risk management VaR and one-day, 99% regulatory VaR” show our trading-related market risk exposure, as measured by one-day, 98% risk management VaR and 99% regulatory VaR. VaR has been calculated using a two-year historical dataset. As we measure trading book VaR for internal risk management purposes using the US dollar as the base currency, the VaR figures were translated into Swiss francs using daily foreign exchange translation rates. VaR estimates are computed separately for each risk type and for the whole portfolio using the historical simulation methodology. The diversification benefit reflects the net difference between the sum of the 98th percentile loss for risk management VaR and the 99th percentile loss for regulatory VaR, respectively, for each individual risk type and for the total portfolio.

We manage VaR in US dollars, as substantially all market risk relates to Investment Banking.

Average risk management VaR in 2012 decreased 31% from 2011 to USD 59 million. The decrease reflected risk reductions across fixed income, particularly from sales of client inventory across global credit and securitized products, reduced interest rate exposures, mainly in US and European rates products, and lower market volatility.

Period-end risk management VaR as of December 31, 2012 decreased 44% to USD 44 million compared to December 31, 2011. The decrease mainly reflected lower market volatility and reduced interest rate, credit spread and equity exposures.

Various techniques are used to assess the accuracy of the regulatory VaR model used for trading portfolios, including backtesting. We conduct such backtesting using actual daily trading revenues. Actual daily trading revenues are compared with a regulatory 99% VaR calculated using a one-day holding period. A backtesting exception occurs when a trading loss exceeds the daily VaR estimate. We had no such backtesting exceptions in the 12-month periods ending December 31, 2012, 2011 and 2010. Since there were fewer than five backtesting exceptions in the rolling 12-month periods ending December 31, 2012, 2011 and 2010, in line with BIS industry guidelines, the VaR model is deemed to be statistically valid.

For capital purposes, FINMA, in line with BIS requirements, uses a multiplier to impose an increase in market risk capital for every regulatory VaR exception over four in the prior rolling 12-month period calculated using a subset of actual daily trading revenues.

- Refer to "Regulatory capital framework" in Capital management for further information on the use of our regulatory VaR model in the calculation of trading book market risk capital requirements.

The histogram entitled "Actual daily trading revenues" compares the actual daily trading revenues for 2012 with those for 2011 and 2010. The dispersion of trading revenues indicates the day-to-day volatility in our trading activities. In 2012, we had four days of trading losses with one trading loss exceeding CHF 25 million, compared to 34 days of trading losses in 2011 with six trading losses exceeding CHF 25 million.

Daily risk management VaR

CHF million

Excludes risks associated with counterparty and own credit exposures

Actual daily trading revenues

Excludes Neue Aargauer Bank. Periods prior to the integration of Clariden Leu in the second quarter of 2012 also exclude Clariden Leu.

Trading revenues do not include valuation adjustments associated with counterparty and own credit exposures.

Banking portfolios

Risk measurement and management

The market risks associated with our non-trading portfolios primarily relate to asset and liability mismatch exposures, equity instrument participations and investments in bonds and money market instruments. All of our businesses and the Corporate Center have non-trading portfolios that carry some market risks.

The market risks associated with the non-trading portfolios are measured, monitored and limited using several tools, including economic capital, scenario analysis, sensitivity analysis and VaR. For the purpose of this disclosure, the aggregated market risks associated with our non-trading portfolios are measured using sensitivity analysis. The sensitivity analysis for the non-trading activities measures the amount of potential change in economic value resulting from specified hypothetical shocks to market factors. It is not a measure for the potential impact on reported earnings in the current period, since the non-trading activities generally are not marked to market through earnings.

Development of non-trading portfolio risks

We assume non-trading interest rate risks through interest rate-sensitive positions originated by Private Banking & Wealth

Management and risk-transferred to Treasury, money market and funding activities by Treasury, and the deployment of our consolidated equity as well as other activities, including market making and trading activities involving banking book positions at the divisions, primarily Investment Banking. Savings accounts and many other retail banking products have no contractual maturity date or direct market-linked interest rate and are risk-transferred from Private Banking & Wealth Management to Treasury on a pooled basis using replicating portfolios (approximating the re-pricing behavior of the underlying product). Treasury and certain other areas of the Group running interest rate risk positions actively manage the positions within approved limits. This risk is monitored on a daily basis.

The impact of a one basis point parallel increase in yield curves on the fair value of interest rate-sensitive non-trading book positions would have been an increase of CHF 9.4 million as of December 31, 2012, compared to an increase of CHF 6.6 million as of December 31, 2011. The increase from 2011 was mainly due to the issuance of new tier 2 buffer capital notes in the first quarter of 2012, market movements in the value of capital instruments and an increase in shareholders' equity. Additional increases were related to the banking books of Treasury and Private Banking & Wealth Management.

One basis point parallel increase in yield curves by currency – non-trading positions

| end of | CHF | USD | EUR | GBP | Other | Total |
|--|-------|-----|-----|-----|-------|-------|
| 2012 (CHF million) | | | | | | |
| Fair value impact of a one basis point parallel increase in yield curves | (1.9) | 9.0 | 1.8 | 0.0 | 0.5 | 9.4 |
| 2011 (CHF million) | | | | | | |
| Fair value impact of a one basis point parallel increase in yield curves | 0.4 | 4.8 | 1.1 | 0.1 | 0.2 | 6.6 |

Non-trading interest rate risk is also assessed using other measures including the potential value change resulting from a significant change in yield curves. The following table shows the impact of immediate 100 basis point and 200 basis point

moves in the yield curves (as interest rates are currently very low, the downward changes are capped to ensure that the resulting interest rates remain non-negative).

Interest rate sensitivity – non-trading positions

| end of | CHF | USD | EUR | GBP | Other | Total |
|---|-------|---------|-------|-------|-------|-------|

| 2011 (CHF million) | | | | | | |
| Increase(+)/decrease(–) in interest rates | | | | | | |
| +200 basis points | 98 | 948 | 194 | 15 | 47 | 1,302 |
| +100 basis points | 44 | 477 | 101 | 7 | 25 | 654 |
| –100 basis points | (1) | (487) | (110) | (6) | (23) | (627) |
| –200 basis points | 31 | (813) | (137) | (3) | (45) | (967) |

As of December 31, 2012, the fair value impact of an adverse 200 basis point move in yield curves was a loss of CHF 0.8 billion compared to a loss of CHF 1.0 billion as of December 31, 2011. The monthly analysis of the potential impact resulting from a significant change in yield curves indicated that as of the end of 2012 and 2011, the fair value impact of an adverse 200 basis point move in yield curves and adverse interest rate moves, calibrated to a one-year holding period with a 99% confidence level in relation to the total eligible regulatory capital, was significantly below the 20% threshold used by regulators to identify banks that potentially run excessive levels of non-trading interest rate risk.

Our non-trading equity portfolio includes positions in private equity, hedge funds, strategic investments and other instruments managed by Investment Banking. These positions may not be strongly correlated with general equity markets. Equity risk on non-trading positions is measured using sensitivity analysis that estimates the potential change in value resulting from a 10% decline in the equity markets of developed nations and a 20% decline in the equity markets of emerging market nations. The estimated impact of this scenario would be a decrease of CHF 681 million in the value of

the non-trading portfolio as of December 31, 2012, compared to a decrease of CHF 626 million in the value of the non-trading portfolio as of December 31, 2011.

Commodity risk on non-trading positions is measured using sensitivity analysis that estimates the potential change in value resulting from a 20% weakening in commodity prices. The estimated impact of this scenario would be a decrease of CHF 1 million in the value of the non-trading portfolio as of December 31, 2012, compared to a decrease of CHF 4 million as of December 31, 2011.

Credit and debit valuation adjustments

VaR excludes the impact of changes in both counterparty and our own credit spreads on derivative products. As of December 31, 2012, the estimated sensitivity implies that a one basis point increase in credit spreads, both counterparty and our own, would result in a CHF 3.7 million gain on the overall derivatives position (including hedges) in Investment Banking. In addition, a one basis point increase in our own credit spread on our fair valued structured notes portfolio (including the impact of hedges) would result in a CHF 8.1 million gain as of December 31, 2012.

Credit risk

Credit risk is the possibility of a loss being incurred by us as the result of a borrower or counterparty failing to meet its financial obligations or as a result of deterioration in the credit quality of the borrower or counterparty. In the event of a customer default, a bank generally incurs a loss equal to the amount owed by the debtor, less any recoveries from foreclosure, liquidation of collateral, or the restructuring of the debtor company. A change in the credit quality of a counterparty has an impact on the valuation of assets eligible for fair value measurement, with valuation changes recorded in the consolidated statements of operations.

Selected European credit risk exposures

The scope of our disclosure of European credit risk exposure includes all countries of the EU which are rated below AA or its equivalent by at least one of the three major rating agencies and where our gross exposure exceeds our quantitative threshold of EUR 0.5 billion. We believe this external rating is a useful measure in determining the financial ability of countries to meet their financial obligations, including giving an indication of vulnerability to adverse business, financial and economic conditions.

Monitoring of selected European credit risk exposures

Our credit risk exposure to these European countries is managed as part of our risk management process. The Group makes use of country limits and performs scenario analyses on a regular basis, which include analyses on our indirect sovereign credit risk exposures from our exposures to selected European financial institutions. This assessment of indirect sovereign credit risk exposures includes analysis of publicly available disclosures of counterparties' exposures to the European countries within the defined scope of our disclosure. We monitor the concentration of collateral underpinning our OTC derivative and reverse repurchase agreement exposures through monthly reporting. We also monitor the impact of sovereign rating downgrades on collateral eligibility. Strict limits

on sovereign collateral from G-7 and non-G-7 countries are monitored monthly. Similar disclosure is part of our regular risk reporting to regulators.

As part of our global scenario framework, the counterparty credit risk stress testing framework measures counterparty exposure under scenarios calibrated to the 99th percentile for the worst one month and one year moves observed in the available history. The scenario results are aggregated at the counterparty level for all our counterparties, including all European countries to which we have exposure. Furthermore, counterparty default scenarios are run where specific entities are set to default. In one of these scenarios, a European sovereign default is investigated. This scenario determines the maximum exposure we have against this country in case of its default and serves to identify those counterparties where exposure will rise substantially as a result of the modeled country defaulting.

The scenario framework also considers a range of other severe scenarios, including a specific eurozone crisis scenario which assumes the default of selected European countries, currently modeled to include Greece, Ireland, Italy, Portugal and Spain. It is assumed that the sovereigns, financial institutions and corporates within these countries default, with a 100% loss of sovereign and financial institutions exposures and a 0% to 100% loss of corporates depending on their credit ratings. As part of this scenario, we additionally assume a severe market sell-off involving an equity market crash, widening credit spreads, a rally in the price of gold and a devaluation of the euro as a currency. In addition, the eurozone crisis scenario assumes the default of a small number of our market counterparties that we believe would be severely affected by a default across the selected European countries. These counterparties are assumed to default as we believe that they would be the most affected institutions because of their direct presence in the relevant countries and their direct exposures. Through these processes, revaluation and redenomination risks on our exposures are considered on a regular basis by our risk management function.

Presentation of selected European credit risk exposures

The basis for the presentation of the country exposure is our internal risk domicile view. The risk domicile view is based on the domicile of the legal counterparty, i.e., it may include exposure to a legal entity domiciled in the reported country where its parent is located outside of the country.

The credit risk exposure in the table is presented on a risk-based view. We present our credit risk exposure and related risk mitigation for the following distinct categories:

- *Gross credit risk exposure* includes the principal amount of loans drawn, letters of credit issued and undrawn portions of committed facilities, the positive replacement value (PRV) of derivative instruments after consideration of legally enforceable netting agreements, the notional value of investments in money market funds and the market values of securities financing transactions and the debt cash trading portfolio (short-term securities) netted at issuer level.
- *Risk mitigation* includes credit default swaps (CDS) and other hedges, at their net notional amount, guarantees, insurance and collateral (primarily cash, securities and, to a lesser extent, real estate, mainly for Private Banking & Wealth Management exposure to corporates & other). Collateral values applied for the calculation of the net exposure are determined in accordance with our risk management policies and reflect applicable margining considerations.
- *Net credit risk exposure* represents gross credit risk exposure net of risk mitigation.
- *Inventory* represents the long inventory positions in trading and non-trading physical debt and synthetic positions,

each at market value, all netted at issuer level. Physical debt is non-derivative debt positions (e.g., bonds), and synthetic positions are created through OTC contracts (e.g., CDS purchased and/or sold and total return swaps).

CDS presented in the risk mitigation column are purchased as a direct hedge to our OTC exposure and the risk mitigation impact is considered to be the notional amount of the contract for risk purposes, with the mark-to-market fair value of CDS risk-managed against the protection provider. Net notional amounts of CDS reflect the notional amount of CDS protection purchased less the notional amount of CDS protection sold and are based on the origin of the CDS reference credit, rather than that of the CDS counterparty. CDS included in the inventory column represent contracts recorded in our trading books that are hedging the credit risk of the instruments included in the inventory column and are disclosed on the same basis as the value of the fixed income instrument they are hedging.

We do not have any tranching CDS positions on these European countries and only an insignificant amount of indexed credit derivatives is included in inventory.

The credit risk of CDS contracts themselves, i.e., the risk that the CDS counterparty will not perform in the event of a default, is managed separately from the credit risk of the reference credit. To mitigate such credit risk, all CDS contracts are collateralized and executed with counterparties with whom we have an enforceable ISDA master agreement that provides for daily margining.

Selected European credit risk exposures

¹ Includes other hedges (derivative instruments), guarantees, insurance and collateral. ² Represents long inventory positions netted at issuer level. ³ Substantially all of which results from CDS; represents long positions net of short positions.

On a gross basis, before taking into account risk mitigation, our risk-based sovereign credit risk exposure to Greece, Ireland, Italy, Portugal and Spain as of December 31, 2012 was EUR 4.3 billion, up from EUR 3.8 billion as of December 31, 2011. Our net exposure to these sovereigns was stable at EUR 0.6 billion, compared to December 31, 2011. Our non-sovereign risk-based credit risk exposure in these countries as of December 31, 2012 included net exposure to financial insti-

tutions of EUR 2.0 billion and to corporates and other counterparties of EUR 3.4 billion, compared to EUR 2.3 billion and EUR 2.5 billion, respectively, as of December 31, 2011. A significant majority of the purchased credit protection is transacted with banks outside of the disclosed countries. For credit protection purchased from banks in the disclosed countries, such credit risk is reflected in the gross and net exposure to each relevant country.

Sovereign debt rating developments

During 2012 and the first two months of 2013, the sovereign debt rating of the countries listed in the table were affected as follows: Standard & Poor's lowered the long-term rating for Italy to BBB+ from A, for Portugal to BB from BBB- and for Spain to BBB- from AA-, and increased Greece's rating to B- from C in February 2012 after several changes, including downgrades to RD (restricted default) in March 2012 and SD (selective default) at the beginning of December 2012. Fitch lowered Italy's rating to A- from A+, Spain's rating to BBB from AA-, and Greece's rating to CCC from B-. Moody's downgraded Italy to Baa2 from A2, Portugal to Ba3 from Ba2, Spain to Baa3 from A1 and Greece to C from Ca. The rating changes did not have a significant impact on the Group's financial position, result of operations, liquidity or capital resources.

Sources of credit risk

The majority of our credit risk is concentrated in the Wealth Management Clients and Corporate & Institutional Clients businesses within the Private Banking & Wealth Management division and in the Investment Banking division. Credit risk exists within lending products, commitments and letters of credit, and results from counterparty exposure arising from derivatives, foreign exchange and other transactions.

Credit risk management approach

Effective credit risk management is a structured process to assess, quantify, measure, monitor and manage risk on a consistent basis. This requires careful consideration of proposed extensions of credit, the setting of specific limits, monitoring during the life of the exposure, active use of credit mitigation tools and a disciplined approach to recognizing credit impairment.

Our credit risk management framework covers virtually all of the Group's credit exposure and includes the following core components:

- individual counterparty rating systems;
- transaction rating systems;
- a counterparty credit limit system;
- country concentration limits;
- risk-based pricing methodologies;
- active credit portfolio management; and
- a credit risk provisioning methodology.

We employ a set of credit ratings for the purpose of internally rating counterparties to whom we are exposed to credit risk as the contractual party, including with respect to loans, loan

commitments, securities financings or OTC derivative contracts. Credit ratings are intended to reflect the risk of default of each counterparty. Ratings are assigned based on internally developed rating models and processes, which are subject to governance and internally independent validation procedures.

Our internal ratings may differ from a counterparty's external ratings, if one is available. Internal ratings are reviewed at least annually. For the calculation of internal risk estimates and risk-weighted assets, a PD is assigned to each facility. For corporate & institutional counterparties excluding corporates managed on the Swiss platform, the PD is determined by the internal credit rating. For these client segments, internal ratings are based on the analysis and evaluation of both quantitative and qualitative factors. The specific factors analyzed are dependent on the type of counterparty. The analysis emphasizes a forward-looking approach, concentrating on economic trends and financial fundamentals. Credit officers make use of peer analysis, industry comparisons, external ratings and research, and the judgment of credit experts. The PD for each rating is calibrated based on historic default experience, using external data from Standard & Poor's, and backtested to ensure consistency with internal experience. For corporates managed on the Swiss platform and consumer loans, the PD is calculated directly by proprietary statistical rating models, which are based on internally compiled data comprising both quantitative factors (primarily loan-to-value (LTV) ratio and the borrower's income level for mortgage lending and balance sheet information for corporates) and qualitative factors (e.g., credit histories from credit reporting bureaus). In this case, an equivalent rating is assigned for reporting purposes, based on the PD band associated with each rating.

We assign an estimate of expected loss in the event of a counterparty default based on the structure of each transaction. The counterparty credit rating is used in combination with credit (or credit equivalent) exposure and the LGD assumption to estimate the potential credit loss. LGD represents the expected loss on a transaction should default occur and takes into account structure, collateral, seniority of the claim and, in certain areas, the type of counterparty. We use credit risk estimates consistently for the purposes of approval, establishment and monitoring of credit limits and credit portfolio management, credit policy, management reporting, risk-adjusted performance measurement, economic capital measurement and allocation and financial accounting. This approach also allows us to price transactions involving credit risk more accurately, based on risk/return estimates. The overall internal credit rating system has been approved by FINMA for application of the A-IRB approach under the Basel framework.

Credit limits are used to manage individual counterparty credit risk. A system of limits is also established to address concentration risk in the portfolio, including a comprehensive set of country limits and limits for certain products. In addition, credit risk concentration is regularly supervised by credit and risk management committees, taking current market conditions and trend analysis into consideration. A rigorous credit quality review process provides an early identification of possible changes in the creditworthiness of clients and includes regular asset and collateral quality reviews, business and financial statement analysis, and relevant economic and industry studies. Regularly updated watch lists and review meetings are used for the identification of counterparties that could be subject to adverse changes in creditworthiness.

Our regular review of the credit quality of clients and counterparties does not depend on the accounting treatment of the asset or commitment. We regularly review the appropriateness of allowances for credit losses. Changes in the credit quality of counterparties of loans held at fair value are reflected in valuation changes recorded directly in revenues, and therefore are not part of the impaired loans balance. Impaired transactions are further classified as potential problem exposure, non-performing exposure or non-interest-earning exposure, and the exposures are generally managed within credit recovery units. The Credit Portfolio and Provisions Review Committee regularly determines the adequacy of allowances.

Risk mitigation

We actively manage our credit exposure utilizing credit hedges, collateral and guarantees. Collateral is security in the form of an asset, such as cash and marketable securities, which serves to mitigate the inherent risk of credit loss and to improve recoveries in the event of a default.

The policies and processes for collateral valuation and management are driven by:

- legal documentation that is agreed with our counterparties; and
- an internally independent collateral management function.

For our trading portfolio, the valuation of the collateral portfolio is performed as per the availability of independent market data, generally daily for traded products. Exceptions are governed by the calculation frequency described in the legal documentation. The management of collateral is standardized and centralized to ensure complete coverage of traded products.

Credit risk overview

All transactions that are exposed to potential losses due to a counterparty failing to meet an obligation are subject to credit risk exposure measurement and management. The following table represents credit risk from loans, loan commitments and certain other contingent liabilities, loans held-for-sale, traded loans and derivative instruments before consideration of risk mitigation such as cash collateral and marketable securities or credit hedges.

Credit risk

| end of | 2012 | 2011 | % change |
|---|----------------|----------------|------------|
| Credit risk (CHF million) | | | |
| Balance sheet | | | |
| Gross loans | 243,204 | 234,357 | 4 |
| of which reported at fair value | 20,000 | 20,694 | (3) |
| Loans held-for-sale | 19,894 | 20,457 | (3) |
| Traded loans | 4,282 | 3,581 | 20 |
| Derivative instruments ¹ | 37,138 | 56,254 | (34) |
| Total balance sheet | 304,518 | 314,649 | (3) |
| Off-balance sheet | | | |
| Loan commitments ² | 237,110 | 220,560 | 8 |
| Credit guarantees and similar instruments | 12,833 | 7,348 | 75 |
| Irrevocable commitments under documentary credits | 6,258 | 5,687 | 10 |
| Total off-balance sheet | 256,201 | 233,595 | 10 |
| Total credit risk | 560,719 | 548,244 | 2 |

Before risk mitigation, for example, collateral, credit hedges.

¹ Positive replacement value after netting agreements. ² Includes CHF 139,709 million and CHF 138,051 million of unused credit limits as of December 31, 2012 and 2011, respectively, which were revocable at our sole discretion upon notice to the client.

As of December 31, 2012 and 2011, loans held-for-sale included CHF 554 million and CHF 830 million, respectively, of US subprime residential mortgages from consolidated variable interest entities. Traded loans included US subprime residential mortgages of CHF 383 million and CHF 330 million as of December 31, 2012 and 2011, respectively.

Loans and loan commitments

Loans which we have the intention and ability to hold to maturity are valued at amortized cost less any allowance for loan losses. Loan commitments include irrevocable credit facilities for both divisions and, in Private Banking & Wealth Management, unused credit limits that can be revoked at our sole discretion upon notice to the client. Loans and loan commitments for which the fair value option is elected are reported at fair value with changes in fair value reported in trading revenues.

Loans and loan commitments

| end of | 2012 | 2011 | % change |
|---|----------------|----------------|----------|
| Loans and loan commitments (CHF million) | | | |
| Gross loans | 243,204 | 234,357 | 4 |
| of which Private Banking & Wealth Management | 208,526 | 197,017 | 6 |
| of which Investment Banking | 34,658 | 37,329 | (7) |
| Loan commitments | 237,110 | 220,560 | 8 |
| Total loans and loan commitments | 480,314 | 454,917 | 6 |
| of which Private Banking & Wealth Management | 354,595 | 343,721 | 3 |
| of which Investment Banking | 125,701 | 111,069 | 13 |

The Private Banking & Wealth Management portfolio consists primarily of mortgages and loans collateralized by marketable securities that can be readily liquidated. In Investment Banking, we manage credit exposures primarily with credit hedges and monetizable collateral. Credit hedges represent the notional exposure

that has been transferred to other market counterparties, generally through the use of CDS and credit insurance contracts.

The following tables illustrate the effects of risk mitigation through cash collateral, marketable securities and credit hedges on a combined exposure of loans and loan commitments.

Loans and loan commitments – Private Banking & Wealth Management

| end of | 2012 | | | 2011 | | |
|---|----------------|---|-----------------------------|----------------|---|-----------------------------|
| | Gross exposure | Cash collateral and marketable securities | Net exposure | Gross exposure | Cash collateral and marketable securities | Net exposure |
| Internal ratings | | | | | | |
| Risk mitigation (CHF million) | | | | | | |
| AAA | 2,324 | (60) | 2,264 | 2,515 | (79) | 2,436 |
| AA | 7,538 | (1,014) | 6,524 | 7,465 | (521) | 6,944 |
| A | 24,987 | (2,923) | 22,064 | 21,279 | (1,022) | 20,257 |
| BBB | 240,855 | (129,900) | 110,955 | 234,578 | (133,475) | 101,103 |
| BB | 71,776 | (9,179) | 62,597 | 71,345 | (7,716) | 63,629 |

Includes undrawn irrevocable credit facilities.

Loss given default

The Private Banking & Wealth Management LGD measurement takes into account collateral pledged against the exposure and guarantees received, with the exposure adjusted for risk mitigation. The concentration in BBB and BB rated counterparties with low LGD exposure largely reflects the Private Banking & Wealth Management residential mortgage business, which is highly collateralized. In Investment Banking, the LGD measurement is primarily determined by the seniority

ranking of the exposure, with the exposure adjusted for risk mitigation and guarantees received. The LGD measurement system is validated by an internally independent function on a regular basis and has been approved by the regulatory authorities for application in the A-IRB approach under the Basel framework. The tables below present our loans, net of risk mitigation, across LGD buckets for Private Banking & Wealth Management and Investment Banking.

Loans – Private Banking & Wealth Management

| end of 2012 | Loss given default buckets | | | | | | | |
|---|----------------------------|---------------------|---------------|---------------|---------------|---------------|--------------|--------------|
| Internal ratings | Funded gross exposure | Funded net exposure | 0–10% | 11–20% | 21–40% | 41–60% | 61–80% | 81–100% |
| Loss given default (CHF million) | | | | | | | | |

As of December 31, 2012, 96% of the aggregate Swiss residential mortgage loan portfolio of CHF 93.2 billion had an LTV ratio below 80%. As of December 31, 2011, 95% of the corresponding loan portfolio of CHF 89.1 billion had an LTV ratio

below 80%. For the Swiss residential mortgage loans originated in 2012 and 2011, the average LTV ratio was below 80% at origination. Our LTV ratios are based on the most recent appraised value of the collateral.

Loans

Compared to the end of 2011, gross loans increased 4% to CHF 243.2 billion. In Private Banking & Wealth Management, gross loans increased 6% to CHF 208.5 billion, primarily due to higher commercial and industrial loans, an increase in residential mortgages and higher loans to the real estate sector, partially offset by the US dollar translation impact. In Investment Banking, gross loans decreased 7% to CHF 34.7 billion, primarily due to lower commercial and industrial loans, decreased loans to financial institutions and the US dollar translation impact.

- ▶ Refer to “Note 18 – Loans, allowance for loan losses and credit quality” in V – Consolidated financial statements – Credit Suisse Group.

Impaired loans

Gross impaired loans were stable at CHF 1.7 billion in 2012, as increases in non-performing loans in Investment Banking of CHF 99 million and higher non-interest-earning loans in

Private Banking & Wealth Management of CHF 79 million were substantially offset by a decrease of CHF 153 million in potential problem loans across the Group.

- ▶ Refer to “Impaired loans” in V – Consolidated financial statements – Credit Suisse Group – Note 18 – Loans, allowance for loan losses and credit quality for information on categories of impaired loans.

Allowance for loan losses

We maintain valuation allowances on loans valued at amortized cost, which we consider a reasonable estimate of losses inherent in the existing credit portfolio. We provide for loan losses based on a regular and detailed analysis of all counterparties, taking collateral value into consideration. If uncertainty exists as to the repayment of either principal or interest, a valuation allowance is either created or adjusted accordingly. The allowance for loan losses is revalued by Group credit risk management at least annually or more frequently depending on the risk profile of the borrower or credit relevant events.

¹ Includes Corporate Center, in addition to Private Banking & Wealth Management and Investment Banking. ² Includes loans secured by financial collateral and mortgages. The value of financial collateral and mortgages, considered up to the amount of the related loans, was CHF 64,536 million and CHF 62,036 million as of December 31, 2012 and 2011, respectively. ³ Impaired loans and allowance for loan losses are only based on loans which are not carried at fair value. ⁴ Excludes loans carried at fair value.

Allowance for inherent loan losses

In accordance with accounting principles generally accepted in the US (US GAAP), an inherent loss allowance is estimated for all loans not specifically identified as impaired and that, on a portfolio basis, are considered to contain inherent losses. Inherent losses in the Private Banking & Wealth Management lending portfolio are determined based on current internal risk ratings, collateral and exposure structure, applying historical default and loss experience in the ratings and loss parameters. In Investment Banking, loans are segregated by risk, industry or country rating in order to estimate inherent losses. Inherent losses on loans are estimated based on historical loss and recovery experience and recorded in allowance for loan losses. A provision for inherent losses on off-balance sheet lending-related exposure, such as contingent liabilities and irrevocable commitments, is also determined, using a methodology similar to that used for the loan portfolio.

Provision for credit losses

Net provision for credit losses charged to the consolidated statements of operations in 2012 was CHF 170 million, compared to a net provision of CHF 187 million in 2011. In Private Banking & Wealth Management, the net provision for credit losses in 2012 was CHF 182 million, compared to CHF 111 million in 2011, reflecting higher new provisions and lower releases of provisions. In Investment Banking, the net release of provision for credit losses in 2012 was CHF 12 million, compared to a net new provision of CHF 76 million in 2011. In Investment Banking the change reflected significantly higher provisions in 2011 from a guarantee provided to a third-party bank, and higher releases and recoveries in 2012.

Derivative instruments

We enter into derivative contracts in the normal course of business for market making, positioning and arbitrage purposes, as well as for our own risk management needs, including mitigation of interest rate, foreign exchange and credit risk.

Derivatives are either privately negotiated OTC contracts or standard contracts transacted through regulated exchanges. The most frequently used derivative products include interest rate, cross-currency swaps and CDS, interest rate and foreign exchange options, foreign exchange forward contracts, and foreign exchange and interest rate futures.

The replacement values of derivative instruments correspond to their fair values at the dates of the consolidated balance sheets and arise from transactions for the account of customers and for our own account. Positive replacement values (PRV) constitute an asset, while negative replacement values (NRV) constitute a liability. Fair value does not indicate future gains or losses, but rather premiums paid or received for a derivative instrument at

inception, if applicable, and unrealized gains and losses from marking to market all derivatives at a particular point in time. The fair values of derivatives are determined using various methodologies, primarily observable market prices where available and, in their absence, observable market parameters for instruments with similar characteristics and maturities, net present value analysis or other pricing models as appropriate.

Forwards and futures

We enter into forward purchase and sale contracts for mortgage-backed securities, foreign currencies and commitments to buy or sell commercial and residential mortgages. In addition, we enter into futures contracts on equity-based indices and other financial instruments, as well as options on futures contracts. These contracts are typically entered into to meet the needs of customers, for trading and for hedging purposes.

On forward contracts, we are exposed to counterparty credit risk. To mitigate this credit risk, we limit transactions by counterparty, regularly review credit limits and adhere to internally established credit extension policies.

For futures contracts and options on futures contracts, the change in the market value is settled with a clearing broker in cash each day. As a result, our credit risk with the clearing broker is limited to the net positive change in the market value for a single day.

Swaps

Our swap agreements consist primarily of interest rate swaps, CDS, currency and equity swaps. We enter into swap agreements for trading and risk management purposes. Interest rate swaps are contractual agreements to exchange interest rate payments based on agreed upon notional amounts and maturities. CDS are contractual agreements in which the buyer of the swap pays a periodic fee in return for a contingent payment by the seller of the swap following a credit event of a reference entity. A credit event is commonly defined as bankruptcy, insolvency, receivership, material adverse restructuring of debt, or failure to meet payment obligations when due. Currency swaps are contractual agreements to exchange payments in different currencies based on agreed notional amounts and currency pairs. Equity swaps are contractual agreements to receive the appreciation or depreciation in value based on a specific strike price on an equity instrument in exchange for paying another rate, which is usually based on an index or interest rate movements.

Options

We write options specifically designed to meet the needs of customers and for trading purposes. These written options do not expose us to the credit risk of the customer because, if

exercised, we and not our counterparty are obligated to perform. At the beginning of the contract period, we receive a cash premium. During the contract period, we bear the risk of unfavorable changes in the value of the financial instruments underlying the options. To manage this market risk, we purchase or sell cash or derivative financial instruments. Such purchases and sales may include debt and equity securities, forward and futures contracts, swaps and options.

We also purchase options to meet customer needs, for trading purposes and for hedging purposes. For purchased options, we obtain the right to buy or sell the underlying instrument at a fixed price on or before a specified date. During the contract period, our risk is limited to the premium paid. The underlying instruments for these options typically include fixed income and equity securities, foreign currencies and interest

rate instruments or indices. Counterparties to these option contracts are regularly reviewed in order to assess creditworthiness.

The table below illustrates how credit risk on derivatives receivables is reduced by the use of legally enforceable netting agreements and collateral agreements. Netting agreements allow us to net balances from derivative assets and liabilities transacted with the same counterparty when the netting agreements are legally enforceable. Replacement values are disclosed net of such agreements in the consolidated balance sheets. Collateral agreements are entered into with certain counterparties based upon the nature of the counterparty and/or the transaction and require the placement of cash or securities with us.

¹ Taking into account legally enforceable netting agreements.

Derivative instruments by maturity and by counterparty credit rating for the Bank are not materially different, neither in absolute amounts nor in terms of movements, from the information for the Group presented above.

Derivative instruments are categorized as exposures from trading activities (trading) and those qualifying for hedge accounting (hedging). Trading includes activities relating to market making, positioning and arbitrage. It also includes economic hedges where the Group enters into derivative contracts for its own risk management purposes, but where the contracts do not qualify for hedge accounting under US GAAP. Hedging includes contracts that qualify for hedge accounting under US GAAP, such as fair value hedges, cash flow hedges and net investment hedges.

- ▶ Refer to "Note 30 – Derivatives and hedging activities" in V – Consolidated financial statements – Credit Suisse Group for further information on derivatives, including an overview of derivatives by products categorized for trading and hedging purposes.

Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people or systems or from external events. Our primary aim is the early identification, recording, assessment, monitoring, prevention and mitigation of operational risks, as well as timely and meaningful management reporting. Where appropriate, we transfer operational risk to third-party insurance companies.

Operational risk is inherent in most aspects of our activities and is comprised of a large number of disparate risks. While

market and credit risk are often chosen for the prospect of gain, operational risk is normally accepted as a necessary consequence of doing business. In comparison to market or credit risk, the sources of operational risk are difficult to identify comprehensively and the amount of risk is also inherently difficult to measure. We believe that effective management of operational risk requires a common firm-wide framework with ownership of these risks residing with the management responsible for the relevant business process.

Operational risk management

The central BORO team within the risk management function is responsible for the overall operational risk management framework design and methodology. It ensures cohesiveness of policies, tools and practices throughout the firm for operational risk management, specifically with regard to identification, evaluation, mitigation, monitoring and reporting of relevant operational risks.

Each individual business area takes responsibility for its operational risks and the provision of adequate resources and procedures for the management of those risks. Businesses are supported by designated operational risk teams at the divisional and Group levels who are responsible for the implementation of the operational risk management framework, methodologies, tools and reporting within their areas as well as working with management on any operational risk issues that arise.

Operational risk issues, metrics and exposures are discussed at the quarterly CARMC meetings covering operational risk and at divisional risk management committees, which have senior staff representatives from all the relevant functions. We

utilize a number of firm-wide tools for the management and reporting of operational risk. These include risk and control self-assessments, scenario analysis, key risk indicator reporting and the collection, reporting and analysis of internal and external loss data. Knowledge and experience are shared throughout the Group to maintain a coordinated approach.

We are continuously enhancing our operational risk management practices. In 2012, qualitative and quantitative operational risk tolerance levels were added in all divisions as a new element of the operational risk framework. These tolerance levels are monitored and reported to the divisional risk management committees and CARMC which in turn monitor management adherence and oversee remediation and resolution of breaches. Effective in 2013, operational risk tolerance levels were added to the overall risk appetite framework.

Operational risk measurement

The RAR operational risk modeling team is responsible for the operational risk measurement methodology and associated capital calculations. We have approval from FINMA to use an internal model for the calculation of operational risk capital, which is aligned with the requirements of the AMA methodology under the Basel framework. We use a similar methodology to measure operational risk for economic capital purposes. The economic capital/AMA methodology is based upon the identification of a number of key risk scenarios that describe the major operational risks that we face. Groups of senior staff review each scenario and discuss the likelihood of occurrence and the potential severity of loss. Internal and external loss data, along with certain business environment and internal control factors, such as self-assessment results and key risk indicators, are considered as part of this process. Based on the output from these meetings, we enter the scenario parameters into an operational risk model that generates a loss distribution from which the level of capital required to cover operational risk is determined. Insurance mitigation is included in the capital assessment where appropriate, by considering the level of insurance coverage for each scenario and incorporating haircuts as appropriate.

In 2012, following discussions with FINMA, we initiated a project to enhance our economic capital/AMA methodology to reflect recent developments regarding operational risk meas-

urement methodology and associated regulatory guidance. For the duration of this project, which is scheduled to conclude in 2013, operational risk capital for regulatory and economic capital purposes has been increased to reflect anticipated changes to our models. The increase has been agreed with FINMA for capital purposes and represents a 20% regulatory uplift on operational risk risk-weighted assets.

Reputational risk

Our policy is to avoid any transaction or service that brings with it the risk of a potentially unacceptable level of damage to our reputation.

Reputational risk may arise from a variety of sources, including the nature or purpose of a proposed transaction or service, the identity or activity of a controversial potential client, the regulatory or political climate in which the business will be transacted, and the potentially controversial environmental or social impacts of a transaction or significant public attention surrounding the transaction itself. Where the presence of these or other factors gives rise to potential reputational risk, the relevant business proposal or service is required to be submitted through the globally standardized reputational risk review process. This involves a submission by an originator (any employee), endorsement by a business area head or designee, and its subsequent referral to one of the regional reputational risk approvers, each of whom is an experienced and high-ranked senior manager, independent of the business segments, who has authority to approve, reject, or impose conditions on our participation on the transaction or service. In order to inform our stakeholders about how we manage some of the environmental and social risks inherent to the banking business, we publish our Corporate Responsibility Report, in which we also describe our efforts to conduct our operations in a manner that is environmentally and socially responsible and broadly contributes to society. The governing bodies responsible for the oversight and active discussion of reputational risk and sustainability issues are the Reputational Risk & Sustainability Committee of the Executive Board on a global level and the regional reputational risk councils on a regional level.

Disclosure pursuant to Section 13(r) of the Securities Exchange Act of 1934

In 2005 and earlier, Credit Suisse AG, through a business line operating in Switzerland, entered into export finance credit facilities involving Iranian parties, through bilateral contracts and as a member of lending syndicates. Credit Suisse AG loaned funds under these facilities for project finance activities in Iran that did not support or facilitate Iran's nuclear weapons proliferation efforts, its acquisition of other military items, or its support of terrorism. Our participation in these credit facilities was legal under applicable law. The Iranian parties involved in certain credit facilities entered into between 2001 and 2005 subsequently were designated Specially Designated Nationals or Blocked Persons pursuant to an Executive Order of the President of the United States, or fall within the US government's definition of the government of Iran (which includes government-controlled entities). Default on these facilities is subject to export financing insurance provided by European governmental export credit agencies. Credit Suisse AG does not generally calculate gross revenues or net profits from individual export finance credit facilities of this type; however, Credit Suisse AG estimates that it recognized approximately CHF 1.3 million in interest income in 2012 on these facilities, and believes that it has not earned any related net profit in 2012 and over the life of these facilities. While Credit Suisse AG ceased providing funds to any Iranian parties pursuant to any of these credit facilities several years ago, it has

continued, where possible, to receive repayment of funds owed to it by such parties, including during the reporting period. As of December 31, 2012, approximately CHF 5.4 million was owed to Credit Suisse AG under these credit facilities which is not covered by the European governmental export credit agency guarantees, out of a total amount of approximately CHF 117.2 million outstanding. Credit Suisse AG will continue to seek repayment of funds it is owed under these facilities pursuant to its contractual rights and applicable law, and is cooperating with the European governmental export credit agencies.

During 2012, Credit Suisse AG processed a small number of de minimis payments related to the operation of Iranian diplomatic missions in Switzerland and to fees for ministerial government functions such as issuing passports and visas. Processing these payments is permitted under Swiss law and is performed with the consent of Swiss authorities, and Credit Suisse AG intends to continue processing such payments. Revenues and profits from these activities are not calculated but would be negligible.

Credit Suisse AG also holds funds from two wire transfers to non-Iranian customers which were blocked pursuant to Swiss sanctions because Iranian government-owned entities have an interest in such transfers. Such funds are maintained in blocked accounts opened in accordance with Swiss sanctions requirements. Credit Suisse AG derives no revenues or profits from maintenance of these blocked accounts.

Balance sheet, off-balance sheet and other contractual obligations

During 2012, we decreased our balance sheet by 12%, reflecting measures taken in connection with our balance sheet reduction initiative announced in October 2012 and the foreign exchange translation impact. As of the end of 2012, total assets were CHF 924.3 billion, total liabilities were CHF 882.0 billion and total equity was CHF 42.3 billion.

The majority of our transactions are recorded on our balance sheet, however, we also enter into transactions that give rise to both on and off-balance sheet exposure.

Balance sheet

Total assets were CHF 924.3 billion as of the end of 2012, down CHF 124.9 billion, or 12%, from the end of 2011. Excluding the foreign exchange translation impact, total assets decreased CHF 101.0 billion.

In Swiss francs, a decrease of CHF 53.5 billion, or 23%, in central bank funds sold, securities purchased under resale agreements and securities borrowing transactions, reflected a decrease in reverse repurchase transactions. Cash and due from banks decreased CHF 48.8 billion, or 44%, driven by decreases in central bank holdings. Trading assets decreased CHF 23.2 billion, or 8%, due to decreases in derivative instruments, primarily reflecting decreases in interest rate products and credit products, and debt securities, partly offset by an increase in equity securities. Net loans increased CHF 8.8 billion, or 4%, primarily due to higher commercial and industrial loans, an increase in residential mortgages and higher loans to the real estate sector in Private Banking & Wealth Management, partially offset by decreases in commercial and industrial loans and loans to financial institutions in Investment Banking, and the US dollar translation impact. Brokerage receivables increased CHF 2.3 billion, or 5%, reflecting client-flow business. All other assets decreased CHF 10.5 billion, or 7%, including decreases of CHF 5.4 billion, or 7%, in other assets, CHF 1.7 billion, or 32%, in investment securities, CHF 1.6 billion, or 22%, in premises and equipment and CHF 1.2 billion, or 9%, in other investments.

Total liabilities were CHF 882.0 billion as of the end of 2012, down CHF 126.1 billion, or 13%, from the end of 2011. Excluding the foreign exchange translation impact, total liabilities decreased CHF 103.6 billion.

In Swiss francs, a decrease of CHF 43.8 billion, or 25%, in Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions mainly reflected decreases in **•**repurchase agreements in the US and Europe. Trading liabilities decreased CHF 36.9 billion, or 29%, reflecting decreases in derivative instruments and short trading positions. Long-term debt decreased CHF 14.5 billion, or 9%, primarily reflecting the maturing of senior and subordinated debt, offset by issuances of senior and subordinated debt. Due to banks decreased CHF 9.1 billion, or 23%, primarily due to decreases in demand and time deposits from commercial banks. Customer deposits decreased CHF 5.1 billion, or 2%, primarily due to the foreign exchange translation impact and a decrease in certificates of deposit. Brokerage payables decreased CHF 3.4 bil-

lion, or 5%, mainly reflecting the foreign exchange translation impact and a decrease in prime brokerage. All other liabilities decreased CHF 13.2 billion, or 11%, including a decrease of CHF 7.5 billion, or 29%, in short-term borrowings and CHF 5.6 billion, or 9% in other liabilities.

- Refer to "Liquidity and funding management" and "Capital management" for more information, including our funding of the balance sheet and the leverage ratio.

Off-balance sheet

We enter into off-balance sheet arrangements in the normal course of business. Off-balance sheet arrangements are transactions or other contractual arrangements with, or for the benefit of, an entity that is not consolidated. These transactions include derivative instruments, guarantees and similar arrangements, retained or contingent interests in assets transferred to an unconsolidated entity in connection with our involvement with SPEs, and obligations and liabilities (including contingent obligations and liabilities) under variable interests in unconsolidated entities that provide financing, liquidity, credit and other support.

Derivative instruments

We enter into derivative contracts in the normal course of business for market making, positioning and arbitrage purposes, as well as for our own risk management needs, including mitigation of interest rate, foreign exchange and credit risk.

◉Derivatives are either privately negotiated ◉OTC contracts or standard contracts transacted through regulated exchanges. The most frequently used derivative products include interest rate, cross-currency swaps and ◉CDS, interest rate and foreign exchange options, foreign exchange forward contracts, and foreign exchange and interest rate futures.

The replacement values of derivative instruments correspond to their fair values at the dates of the consolidated balance sheets and arise from transactions for the account of customers and for our own account. ◉PRV constitute an asset, while ◉NRV constitute a liability. Fair value does not indicate future gains or losses, but rather premiums paid or received for a derivative instrument at inception, if applicable, and unrealized gains and losses from marking to market all derivatives at a particular point in time. The fair values of derivatives are determined using various methodologies, primarily observable market prices where available and, in their absence, observable market parameters for instruments with similar characteristics and maturities, net present value analysis or other pricing models as appropriate.

- ▶ Refer to “Derivative instruments” in Risk management – Credit risk for further information.
- ▶ Refer to “Note 30 – Derivatives and hedging activities” in V – Consolidated financial statements – Credit Suisse Group for further information.

Guarantees and similar arrangements

In the ordinary course of business, guarantees and indemnifications are provided that contingently obligate us to make payments to a guaranteed or indemnified party based on changes in an asset, liability or equity security of the guaranteed or indemnified party. We may be contingently obligated to make payments to a guaranteed party based on another entity's failure to perform, or we may have an indirect guarantee of the indebtedness of others. Guarantees provided include, but are not limited to, customary indemnifications to purchasers in connection with the sale of assets or businesses; to investors in private equity funds sponsored by us regarding potential obligations of their employees to return amounts previously paid as carried interest; to investors in our securities and other arrangements to provide gross-up payments if there is a withholding or deduction because of a tax assessment or other governmental charge; and to counterparties in connection with securities lending arrangements.

In connection with the sale of assets or businesses, we sometimes provide the acquirer with certain indemnification provisions. These indemnification provisions vary by counterparty in scope and duration and depend upon the type of assets or businesses sold. They are designed to transfer the potential risk of certain unquantifiable and unknowable loss contingencies, such as litigation, tax and intellectual property matters, from the acquirer to the seller. We closely monitor all such contractual agreements in order to ensure that indemnification provisions are adequately provided for in our consolidated financial statements.

US GAAP requires disclosure of our maximum potential payment obligations under certain guarantees to the extent that it is possible to estimate them and requires recognition of a liability for the fair value of obligations undertaken for guarantees issued or amended after December 31, 2002.

- ▶ Refer to “Note 31 – Guarantees and commitments” in V – Consolidated financial statements – Credit Suisse Group for disclosure of our estimated maximum payment obligations under certain guarantees and related information.

Representations and warranties on residential mortgage loans sold

In connection with Investment Banking's sale of US residential mortgage loans, we have provided certain representations and warranties relating to the loans sold. We have provided these

representations and warranties relating to sales of loans to: the US government-sponsored enterprises Fannie Mae and Freddie Mac; institutional investors, primarily banks; and non-agency, or private label, securitizations. The loans sold are primarily loans that we have purchased from other parties. The scope of representations and warranties, if any, depends on the transaction, but can include: ownership of the mortgage loans and legal capacity to sell the loans; loan-to-value ratios and other characteristics of the property, the borrower and the loan; validity of the liens securing the loans and absence of delinquent taxes or related liens; conformity to underwriting standards and completeness of documentation; and origination in compliance with law. If it is determined that representations and warranties were breached, we may be required to repurchase the related loans or indemnify the investors to make them whole for losses. Whether we will incur a loss in connection with repurchases and make whole payments depends on: the extent to which claims are made; the validity of such claims (including the likelihood and ability to enforce claims); whether we can successfully claim against parties that sold loans to us and made representations and warranties to us; the residential real estate market, including the number of defaults; and whether the obligations of the securitization vehicles were guaranteed or insured by third parties.

- ▶ Refer to “Representations and warranties on residential mortgage loans sold” in Note 31 – Guarantees and commitments in V – Consolidated financial statements – Credit Suisse Group for further information.

Involvement with special purpose entities

In the normal course of business, we enter into transactions with, and make use of, SPEs. An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it and is generally structured to isolate the SPE's assets from creditors of other entities, including the Group. The principal uses of SPEs are to assist us and our clients in securitizing financial assets and creating investment products. We also use SPEs for other client-driven activity, such as to facilitate financings, and Group tax or regulatory purposes.

As a normal part of our business, we engage in various transactions that include entities that are considered VIEs and are grouped into three primary categories: CDO, CP conduits and financial intermediation. VIEs are SPEs that typically either lack sufficient equity to finance their activities without additional subordinated financial support or are structured such that the holders of the voting rights do not substantively participate in the gains and losses of the entity. Such entities are required to be assessed for consolidation under US GAAP, compelling the primary beneficiary to consolidate the VIE. The
