primary beneficiary is the party that has the power to direct the activities that most significantly affect the economics of the VIE and potentially has significant benefits or losses in the VIE. We consolidate all VIEs where we are the primary beneficiary. VIEs may be sponsored by us, unrelated third parties or clients. Application of the accounting requirements for consolidation of VIEs, including ongoing reassessment of VIEs for possible consolidation, may require the exercise of significant management judgment.

Transactions with VIEs are generally executed to facilitate securitization activities or to meet specific client needs, such as providing liquidity or investing opportunities, and, as part of these activities, we may hold interests in the VIEs.

- ▶ Refer to "Note 32 – Transfers of financial assets and variable interest entities" in V – Consolidated financial statements – Credit Suisse Group for further information.

We issue subordinated and senior securities through SPEs that lend the proceeds to the Group.

Contractual obligations and other commercial commitments

In connection with our operating activities, we enter into certain contractual obligations and commitments to fund certain assets. Our contractual obligations and commitments include short and long-term on-balance sheet obligations as well as future contractual interest payments and off-balance sheet obligations. Total obligations decreased CHF 67.7 billion in 2012 to CHF 676.0 billion, primarily reflecting the decrease in trading liabilities of CHF 36.9 billion to CHF 90.8 billion, the decrease in long-term debt of CHF 14.5 billion to CHF 148.1 billion and the decrease in due to banks of CHF 9.1 billion to CHF 31.0 billion.

- ▶ Refer to "Note 24 – Long-term debt" in V – Consolidated financial statements – Credit Suisse Group for further information on long-term debt and the related interest commitments.
- ▶ Refer to "Note 31 – Guarantees and commitments" in V – Consolidated financial statements – Credit Suisse Group for further information on commitments.

Corporate Governance and Compensation

154 Corporate Governance

186 Compensation

Corporate Governance

Overview

Complying with rules and regulations

The Group's corporate governance complies with internationally accepted standards. We are committed to safeguarding the interests of our stakeholders and recognize the importance of good corporate governance. We know that transparent disclosure of our governance helps stakeholders assess the quality of the Group and our management and assists investors in their investment decisions.

We fully adhere to the principles set out in the Swiss Code of Best Practice for Corporate Governance, including its appendix stipulating recommendations on the process for setting compensation for the Board of Directors (Board) and the Executive Board. On March 3, 2013, Swiss citizens approved the so-called "Minder Initiative" intended to strengthen shareholder rights. The initiative requires legislation be passed to impose board and executive compensation-related requirements on Swiss public companies, including requiring a binding (rather than advisory) shareholder vote on total board and total executive management compensation and prohibiting severance payments, salary prepayments and payments related to the acquisition or disposal of companies. The initiative also provides that the board members, the board chairperson and the compensation committee members be directly elected by shareholders annually. Further, the initiative calls for criminal sanctions in case of noncompliance. The Federal Council will have one year to issue a transitional ordinance which will be applicable until the Swiss Parliament passes the new law. Timing for the final implementation of the initiative is currently undetermined. We also continuously monitor and adapt our practices to reflect developments in corporate governance principles and practices in jurisdictions outside Switzerland. As in the past few years, regulators focused their attention on compensation practices at financial institutions in 2012.

► [Refer to "Compensation" for further information.](#)

In connection with our primary listing on the SIX Swiss Exchange (SIX), we are subject to the SIX Directive on Information Relating to Corporate Governance. Our shares are also listed on the New York Stock Exchange (NYSE) in the form of American Depositary Shares (ADS). Since January 2013, the Group has listed certain exchange traded notes on the Nasdaq Stock Market (Nasdaq). As a result, we are subject to certain US rules and regulations. We adhere to the NYSE's and the Nasdaq's corporate governance listing standards

(NYSE and Nasdaq standards), with a few exceptions where the rules are not applicable to foreign private issuers.

The following are the significant differences between our corporate governance standards and the corporate governance standards applicable to US domestic issuers listed on the NYSE and Nasdaq:

- Approval of employee benefit plans: the NYSE and Nasdaq standards require shareholder approval of the establishment of, and material revisions to, certain equity compensation plans. We comply with Swiss law, which requires that shareholders approve the creation of conditional capital used to set aside shares for employee benefit plans and other equity compensation plans, but does not require shareholders to approve the terms of those plans.
- Risk assessment and risk management: the NYSE standards allocate to the Audit Committee responsibility for the discussion of guidelines and policies governing the process by which risk assessment and risk management is undertaken, while at the Group these duties are assumed by the Risk Committee. Whereas our Audit Committee members satisfy the NYSE as well as Nasdaq independence requirements, our Risk Committee may include non-independent members.
- Independence of nominating and corporate governance committee: the NYSE and Nasdaq standards require that all members of the nominating and corporate governance committee be independent. The Group's Chairman's and Governance Committee is currently comprised entirely of independent members, but according to its charter, may include non-independent members.
- Reporting: the NYSE and Nasdaq standards require that certain board committees report specified information directly to shareholders, while under Swiss law only the Board reports directly to the shareholders and the committees submit their reports to the full Board.
- Appointment of the external auditor: the NYSE and Nasdaq standards require the Audit Committee to be directly responsible for the appointment, compensation, retention and oversight of the external auditor unless there is a conflicting requirement under home country law. Under Swiss law, the appointment of the external auditor must be approved by the shareholders at the Annual General Meeting (AGM) based on the proposal of the Board, which receives the advice and recommendation of the Audit Committee.
- Audit Committee charter: the Nasdaq standards require the Audit Committee to review and assess the adequacy of

its charter on an annual basis, while our Audit Committee's charter only requires review and assessment from time to time.

- Executive sessions: the NYSE and Nasdaq standards require that the board of directors meet regularly in executive sessions comprised solely of independent directors. Our Board meets regularly in executive sessions comprised of all directors, including any directors determined to be not independent. If any item is being discussed at the meeting that raises a conflict of interest for any of our directors, however, such director does not participate in the related decision making.
- Quorums: the Nasdaq standards require that the company's by-laws provide for a quorum of at least 33⅓ percent of the outstanding shares of the company's common stock for any meeting of the holders of common stock. The Group's Articles of Association call for a quorum in certain instances, but do not require a quorum of 33⅓ percent or greater of the holders of the outstanding shares of common stock for any meeting of shareholders.

Corporate governance framework

The Board has adopted corporate governance policies and procedures, which are defined in a series of documents and form the basis of a sound corporate governance framework. Our corporate governance documents, all of which are available on our website at www.credit-suisse.com/governance, include:

- Articles of Association (AoA): define the purpose of the business, the capital structure and the basic organizational framework. The AoA of the Group is dated February 6, 2013, and the AoA of the Bank is dated May 2, 2011.
- Code of Conduct: defines the Group's ethical values and professional standards that the Board and all employees are required to follow, including adherence to all relevant laws, regulations, and policies in order to maintain and strengthen our reputation for integrity, fair dealing and measured risk taking. The Code of Conduct also implements requirements stipulated under the US Sarbanes-Oxley Act of 2002 (SOX) by including provisions on ethics for our Chief Executive Officer (CEO) and our principal financial and accounting officers and other persons performing similar functions. No waivers or exceptions are permissible under our Code of Conduct. Our Code of Conduct is available on our website at www.credit-suisse.com/code in nine languages.
- Organizational Guidelines and Regulations (OGR): define the responsibilities and sphere of authority of the Board, its committees and the various senior management bodies

within the Group, as well as the relevant reporting procedures.

- Corporate Governance Guidelines: summarize corporate governance principles promoting the function of the Board and its committees and the effective governance of the Group.
- Board of Directors charter: outlines the organization and responsibilities of the Board.
- Board committee charters: define the organization and responsibilities of the committees.
- Compensation policy: provides a foundation for the development of sound compensation plans and practices.

Company

Credit Suisse Group AG (Group) and Credit Suisse AG (Bank) are registered as Swiss corporations in the Commercial Register of the Canton of Zurich under the registration numbers CH-020.3.906.075-9 (as of March 3, 1982) and CH-020.3.923.549-1 (as of April 27, 1883), respectively, and have their registered and main offices at Paradeplatz 8, 8001 Zurich, Switzerland. The Group and the Bank were incorporated on March 3, 1982 and July 5, 1856, respectively, with unlimited duration. The authorized representative in the US for the Group and the Bank is Credit Suisse (USA), Inc., 11 Madison Avenue, New York, New York, 10010. The business purpose of the Group, as set forth in Article 2 of its AoA, is to hold direct or indirect interests in all types of businesses in Switzerland and abroad, in particular in the areas of banking, finance, asset management and insurance. The business purpose of the Bank, as set forth in Article 2 of its AoA, is to operate as a bank, with all related banking, finance, consultancy, service and trading activities in Switzerland and abroad. The AoA of the Group and the Bank set forth their powers to establish new businesses, acquire a majority or minority interest in existing businesses and provide related financing and to acquire, mortgage and sell real estate properties both in Switzerland and abroad.

Our business consists of two operating divisions: Private Banking & Wealth Management and Investment Banking. The two divisions are complemented by Shared Services and a regional management structure.

- ▶ Refer to "I – Information on the company" for further information on our structure.
- ▶ Refer to "II – Operating and financial review" for a detailed review of our operating results.
- ▶ Refer to "Note 38 – Significant subsidiaries and equity method investments" in V – Consolidated financial statements – Credit Suisse Group for a list of significant subsidiaries and associated entities.

The Group is listed on the SIX (Swiss Security Number 1213853), with a market capitalization of CHF 29,402 million as of December 31, 2012. No Group subsidiaries have shares listed on the SIX or any other stock exchange.

The Swiss Code of Obligations requires directors and members of senior management to safeguard the interests of the corporation and, in connection with this requirement, imposes the duties of care and loyalty on directors and members of senior management. While Swiss law does not have a general provision on conflicts of interest, the duties of care and loyalty are generally understood to disqualify directors and members of senior management from participating in decisions that could directly affect them. Directors and members of senior management are personally liable to the corporation for any breach of these provisions.

Neither Swiss law nor our AoA restrict our power to borrow and raise funds in any way. The decision to borrow funds is passed by or under the direction of our Board, with no shareholders' resolution required.

Number of employees

| end of | 2012 | 2011 | % change |
|--|---------------|---------------|------------|
| Number of employees (full-time equivalents) | | | |
| Private Banking & Wealth Management | 27,300 | 28,100 | (3) |
| Investment Banking | 19,800 | 20,700 | (4) |
| Corporate Center | 300 | 900 | (67) |
| Number of employees | 47,400 | 49,700 | (5) |
| of which Switzerland | 19,400 | 21,200 | (8) |
| of which EMEA | 9,300 | 9,200 | 1 |
| of which Americas | 11,300 | 11,700 | (3) |
| of which Asia Pacific | 7,400 | 7,600 | (3) |

Employees

As of December 31, 2012, we had 47,400 employees worldwide, of which 19,400 were in Switzerland and 28,000 were abroad.

The number of employees decreased by 2,300, or 5%, compared to the end of 2011. This reflected reductions in headcount of 3,200 employees in connection with our cost-efficiency initiatives in Investment Banking and Private Banking & Wealth Management and the sale of Wincasa AG, a provider of real estate services, offset by graduate hiring and contractor employee conversion. Our corporate titles include managing director, director, vice president, assistant vice president and non-officer staff. The majority of our employees do not belong to unions. We have not experienced any significant strikes, work stoppages or labor disputes in recent years. We consider our relations with our employees to be good.

Information policy

We are committed to an open and fair information policy with our shareholders and other stakeholders. Our Investor Relations and Corporate Communications departments are responsible for inquiries.

All Credit Suisse Group AG shareholders registered in our share register receive an invitation to our AGM including an order form to receive the annual report and other reports. Each registered shareholder also receives a quarterly shareholders' letter and may elect to receive the quarterly reports on our financial performance.

All of these reports and other information can be accessed on our website at www.credit-suisse.com/investors.

Articles of Association

The summaries below of the material provisions of our AoA and the Swiss Code of Obligations do not purport to be complete and are qualified in their entirety by reference to the Swiss Code of Obligations and the AoA. The Group's and Bank's AoA are available on our website at www.credit-suisse.com/articles.

- Refer to "Shareholders" and "Additional information" for a summary of the material provisions of our AoA and the Swiss Code of Obligations as they relate to our shares.

Indemnification

Neither our AoA nor Swiss statutory law contains provisions regarding the indemnification of directors and officers. According to general principles of Swiss employment law, an employer may, under certain circumstances, be required to indemnify an employee against losses and expenses incurred by such person in the execution of such person's duties under an employment agreement, unless the losses and expenses arise from the employee's gross negligence or willful misconduct. It is our policy to indemnify current and former directors and/or employees against certain losses and expenses in respect of service as a director or employee of the Group, one of the Group's affiliates or another entity that we have approved, subject to specific conditions or exclusions. We maintain directors' and officers' insurance for our directors and officers.

Shareholders

Capital structure

Our total issued share capital as of December 31, 2012 was CHF 52,833,197 divided into 1,320,829,922 registered shares, with a nominal value of CHF 0.04 per share. Our shares are listed on the SIX and in the form of ADS on the NYSE.

- ▶ Refer to "Note 7 – Share capital, conditional, conversion and authorized capital of Credit Suisse Group" in VI – Parent company financial statements – Credit Suisse Group and our AoA (Articles 26, 26b-c and 27) for information on changes to our capital structure during the year.

Shareholder base

We have a broad shareholder base, with the majority of shares owned directly or indirectly by institutional investors outside Switzerland. Through the use of an external global market intelligence firm, we regularly gather additional information on

the composition of our shareholder base including information on shares that are not registered in the share register. According to this data, our shareholder base as of December 31, 2012 was comprised of 10% private investors, 76% institutional investors and 14% other investors. The geographical break down of our institutional investors is as follows: 18% Switzerland, 9% other continental Europe, 14% the UK and Ireland, 44% the US and 15% the rest of the world.

As of December 31, 2012, 138,649 shareholders were listed in our share register. To the best of our knowledge, there are no agreements in place that could lead to a change in control of the Group. As of December 31, 2012, 50.5 million, or 3.8%, of the issued shares were in the form of ADS. Another 12 million, or 0.9%, of the issued shares were registered in the name of US domiciled shareholders (excluding nominees) as of December 31, 2012.

The information provided in the following tables reflects the distribution of Group shares as registered in our share register.

Distribution of Group shares in the share register

Significant shareholders

Under the Swiss Federal Act of Stock Exchanges and Securities Trading (SESTA), anyone holding shares in a company listed on the SIX is required to notify the company and the SIX if their holding reaches, falls below or exceeds the following thresholds: 3%, 5%, 10%, 15%, 20%, 25%, 33⅓%, 50% or 66⅔% of the voting rights entered into the commercial register, whether or not the voting rights can be exercised (that is, notifications must also include certain derivative holdings such as options or similar instruments). Following receipt of such notification, the company has the obligation to inform the public. In addition, pursuant to the Swiss Code of Obligations, a company must disclose in the notes to their annual consolidated financial statements the identity of any shareholders who own in excess of 5% of their shares. The following provides an overview of the holdings of shares of our significant shareholders, including any rights to purchase or dispose of shares, based on the most recent disclosure notifications. In line with the SESTA requirements, the percentages indicated below were calculated in relation to the share capital reflected in the AoA at the time of the disclosure notification. The full

text of all notifications can be found on our website at www.credit-suisse.com/shareholders. Each share entitles the holder to one vote.

► Refer to "Note 3 – Business developments and subsequent events" in V – Consolidated financial statements – Credit Suisse Group for further information on significant shareholders.

The Group also holds positions in its own shares, which are subject to the same disclosure requirements as significant external shareholders. These positions fluctuate and primarily reflect market making, facilitating customer orders and satisfying the obligations under our employee compensation plans. Shares held by the Group have no voting rights. As of December 31, 2012, our holdings amounted to 7.0% purchase positions (2.9% registered shares and 4.1% share acquisition rights) and 41.9% were sales positions (disposal rights).

Cross shareholdings

The Group has no cross shareholdings in excess of 5% of capital or voting rights with any other company.

Significant shareholders

| Capital Group Companies, Inc. | February 25, 2010 | 35.5 | 3.1 | – |

¹ Consists of 8.1% purchase rights relating to The Olayan Group's holdings of 8,625 tier 1 buffer capital notes, which will be converted into shares only in situations where the Group no longer meets specific regulatory capital requirements, and 2.7% purchase rights relating to the holdings of CHF 569 million mandatory and contingent convertible securities (MACCS), of which CHF 419 million were underwritten by The Olayan Group. The MACCS will convert to 35 million Group shares on March 29, 2013 at the conversion price of CHF 16.29, with settlement and delivery of shares in early April 2013. The remaining 0.1% purchase rights relate to The Olayan Group's holdings of options. ² Relates to the Capital Group Companies, Inc.'s holdings of CHF 201 million MACCS, which will convert to 12.3 million shares on March 29, 2013 at the conversion price of CHF 16.29, with settlement and delivery in early April 2013. ³ Relates to Norges Bank's holdings of CHF 353 million MACCS, which will convert to 21.6 million shares on March 29, 2013 at the conversion price of CHF 16.29, with settlement and delivery in early April 2013. ⁴ In the same notification, Qatar Holding Netherlands B.V. notified of their holdings of 1.25% sales positions (disposal rights) related to a variable forward agreement in respect of 14.8 million Group shares.

Shareholder rights

We are fully committed to the principle of equal treatment of all shareholders and encourage shareholders to participate at our AGM. The following is a summary of shareholder rights at the Group. Refer to our AoA, which is available on our website at www.credit-suisse.com/articles.

Voting rights and transfer of shares

There is no limitation under Swiss law or the AoA on the right to own Group shares.

In principle, each share represents one vote at the AGM. Shares held by the Group have no voting rights. Shares for which a single shareholder or shareholder group can exercise voting rights may not exceed 2% of the total outstanding share capital, unless one of the exemptions discussed below applies. The restrictions on voting rights do not apply to:

- the exercise of voting rights by the Group proxy or by the independent proxy as designated by the Group or by persons acting as proxies for deposited shares;

- shares in respect of which the shareholder confirms to us that the shareholder has acquired the shares in the shareholder's name for the shareholder's own account and in respect of which the disclosure requirements in accordance with the SESTA and the relevant ordinances and regulations have been fulfilled; or
- shares that are registered in the name of a nominee, provided that this nominee is willing to furnish us on request the name, address and shareholding of the person(s) for whose account the nominee holds 0.5% or more of the total share capital and confirms to us that any applicable disclosure requirements under the SESTA have been fulfilled.

In order to execute voting rights, shares need to be registered in the share register directly or in the name of a nominee. In order to be registered in the share register, the purchaser must file a share registration form. The registration of shares in the share register may be requested at any time. Failing

such registration, the purchaser may not vote or participate in shareholders' meetings. However, each shareholder, whether registered in the share register or not, receives dividends or other distributions approved at the AGM. The transfer of shares is executed by a corresponding entry in the custody records of a bank or depository institution following an assignment in writing by the selling shareholder and notification of such assignment to us by the transferor, the bank or the depository institution.

Annual General Meeting

Under Swiss law, the AGM must be held within six months of the end of the fiscal year. Notice of an AGM, including agenda items and proposals submitted by the Board and by shareholders, must be published in the Swiss Official Commercial Gazette at least 20 days prior to the AGM.

Shares only qualify for voting at an AGM if they are entered into the share register with voting rights no later than three days prior to the AGM.

Convocation of shareholder meetings

The AGM is convened by the Board or, if necessary, by the statutory auditors, with 20 days' prior notice. The Board is further required to convene an extraordinary shareholders' meeting (EGM) if so resolved at a shareholders' meeting or if so requested by shareholders holding in aggregate at least 10% of the nominal share capital. The request to call an EGM must be submitted in writing to the Board, and, at the same time, Group shares representing at least 10% of the nominal share capital must be deposited for safekeeping. The shares remain in safekeeping until the day after the EGM.

Request to place an item on the agenda

Shareholders holding shares with an aggregate nominal value of at least CHF 40,000 have the right to request that a specific item be placed on the agenda and voted upon at the AGM. The request to include a particular item on the agenda, together with a relevant proposal, must be submitted in writing to the Board no later than 45 days before the meeting and, at the same time, Group shares with an aggregate nominal value of at least CHF 40,000 must be deposited for safekeeping. The shares remain in safekeeping until the day after the AGM.

Statutory quorums

The AGM may, in principle, pass resolutions without regard to the number of shareholders present at the meeting or represented by proxy. Resolutions and elections generally require the approval of a majority of the votes represented at the meeting, except as otherwise provided by mandatory provisions of law or by the AoA.

Shareholders' resolutions that require a vote by a majority of the votes represented include:

- amendments to the AoA, unless a supermajority is required;
- election of directors and statutory auditors;
- approval of the annual report and the statutory and consolidated accounts;
- discharging of the acts of the members of the Board and Executive Board; and
- determination of the appropriation of retained earnings.

A quorum of at least two thirds of the votes represented is required for resolutions on:

- change of the purpose of the company;
- creation of shares with increased voting powers;
- implementation of transfer restrictions on shares;
- increase in conditional and authorized capital;
- increase of capital by way of conversion of capital surplus or by contribution in kind;
- restriction or suspension of pre-emptive rights;
- change of location of the principal office; and
- dissolution of the company without liquidation.

A quorum of at least half of the total share capital and approval by at least three quarters of the votes represented is required for resolutions on:

- the conversion of registered shares into bearer shares;
- amendments to the AoA relating to registration and voting rights of nominee holders; and
- the dissolution of the company.

A quorum of at least half of the total share capital and the approval of at least seven eighths of the votes cast is required for amendments to provisions of the AoA relating to voting rights.

Say on pay

In accordance with the Swiss Code of Best Practice for Corporate Governance, the Group submits its remuneration report (contained in the Corporate Governance and Compensation section of the annual report) for a consultative vote by shareholders at the AGM.

Pre-emptive rights

Under Swiss law, any share issue, whether for cash or non-cash consideration or no consideration, is subject to the prior approval of the shareholders. Shareholders of a Swiss corporation have certain pre-emptive rights to subscribe for new issues of shares in proportion to the nominal amount of shares held. A resolution adopted at a shareholders' meeting with a supermajority may, however, limit or suspend pre-emptive rights in certain limited circumstances.

Notices

Notices to shareholders are made by publication in the Swiss Official Commercial Gazette. The Board may designate further means of communication for publishing notices to shareholders. Notices required under the listing rules of the SIX will either be published in two Swiss newspapers in German and French and sent to the SIX or otherwise communicated to the SIX in accordance with applicable listing rules. The SIX may disseminate the relevant information.

Board of Directors

Membership and qualifications

The AoA provide that the Board shall consist of a minimum of seven members. The Board currently consists of 15 members. We believe that the size of the Board must be such that the committees can be staffed with qualified members. At the same time, the Board must be small enough to ensure an

effective and rapid decision-making process. The members are elected individually for a period of three years and are eligible for re-election. There is no requirement in the AoA for a staggered board. One year of office is understood to be the period of time from one AGM to the close of the next AGM. Our OGR specify that the members of the Board shall generally retire at the ordinary AGM in the year in which they reach the age of 70 or after having served on the Board for 15 years. The Board may in certain circumstances propose to the shareholders to elect a particular Board member for a further term of a maximum of three years despite the respective Board member having reached the age or term limitation.

The Board has four committees: the Chairman's and Governance Committee, the Audit Committee, the Compensation Committee and the Risk Committee. The committee members are appointed by the Board for a term of one year. An overview of the Board and committee membership is shown in the following table. The composition of the Boards of the Group and the Bank is identical.

Members of Board and Board committees

| | Board member since | Current term end | Independence | Chairman's and Governance Committee | Audit Committee | Compensation Committee | Risk Committee |
|---------------------------------------|--------------------------|------------------------|-----------------|---|--------------------|---------------------------|-------------------|
| December 31, 2012 | | | | | | | |
| Urs Rohner, Chairman | 2009 | 2015 | Independent | Chairman | – | – | – |
| Peter Brabeck-Letmathe, Vice-Chairman | 1997 | 2014 | Independent | Member | – | – | – |
| Jassim Bin Hamad J.J. Al Thani | 2010 | 2013 | Not independent | – | – | – | – |
| Robert H. Benmosche | 2010 | 2013 | Independent | – | – | Member | – |

| Richard E. Thornburgh | 2006 | 2015 | Independent | Member | Member | – | Chairman |
| John Tiner | 2009 | 2015 | Independent | Member | Chairman | – | Member |

The Board proposes the following candidate to be elected to the Board at the AGM on April 26, 2013: Kai S. Nargolwala, the Lead Independent Director of Singapore Telecommunications Ltd. and a former Credit Suisse Executive Board member and CEO of the Asia Pacific Region. The Board also proposes

the re-election of Jassim Bin Hamad J.J. Al Thani and Noreen Doyle to the Board. In view of the age limit under our OGR, Robert H. Benmosche, Aziz R.D. Syriani and David W. Syz will retire from the Board at the AGM in April 2013.

Board composition

The Chairman's and Governance Committee regularly considers the composition of the Board as a whole and in light of staffing requirements for the committees. The Chairman's and Governance Committee recruits and evaluates candidates for Board membership based on criteria it establishes. The Chairman's and Governance Committee may also retain outside consultants with respect to the identification and recruitment of potential new Board members. In assessing candidates, the Chairman's and Governance Committee considers the requisite skills and characteristics of Board members as well as the composition of the Board as a whole. Among other considerations, the Chairman's and Governance Committee takes into

account independence, diversity, age, skills and management experience in the context of the needs of the Board to fulfill its responsibilities. The Chairman's and Governance Committee also considers other activities and commitments of an individual in order to be satisfied that a proposed member of the Board can devote enough time to a Board position at the Group. The background, skills and experience of our Board members are diverse and broad and include holding top management positions at financial services and industrial companies in Switzerland and abroad or having held leading positions in government, academia and international organizations. The Board is composed of individuals with diverse experience, geographical origin and tenure.

Board composition

Industry experience

Geographical origin

Length of tenure

To maintain a high degree of diversity and independence in the future, we have a succession planning process in place to identify potential candidates for the Board at an early stage. With this, we are well prepared when Board members rotate off the Board. Besides more formal criteria consistent with legal and regulatory requirements, we believe that other aspects including team dynamics and personal reputation of Board members play a critical role in ensuring the effective functioning of the Board. This is why we place utmost importance on the right mix of personalities who are also fully committed to making their blend of specific skills and experience available to the Board.

New members

Any newly appointed member participates in an orientation program to become familiar with our organizational structure, strategic plans, significant financial, accounting and risk issues and other important matters. The orientation program is designed to take into account the new Board member's individual background and level of experience in each specific area. Moreover, the program's focus is aligned with any committee memberships of the person concerned. Board members are encouraged to engage in continuing training. The Board and the committees of the Board regularly ask a specialist

within the Group to speak about a specific topic to enhance the Board members' understanding of issues that already are or may become of particular importance to our business.

Meetings

In 2012, the Board held six full-day meetings in person and seven additional meetings. In addition, the Board held a two-day strategy session. From time to time, the Board may also take certain decisions via circular resolution, unless a member asks that the matter be discussed in a meeting and not decided upon by way of written consent.

All members of the Board are expected to spend the necessary time outside these meetings needed to discharge their responsibilities appropriately. The Chairman calls the meeting with sufficient notice and prepares an agenda for each meeting. However, any other Board member has the right to call an extraordinary meeting, if deemed necessary. The Chairman has the discretion to invite members of management or others to attend the meetings. Generally, the members of the Executive Board attend part of the meetings to ensure effective interaction with the Board. The Board also holds separate private sessions without management being present. Minutes are kept of the proceedings and resolutions of the Board.

Meeting attendance

| | Board of Directors | Chairman's and Governance Committee | Audit Committee | Compensation Committee | Risk Committee |
|---|--------------------|-------------------------------------|-----------------|------------------------|----------------|
| in 2012 | | | | | |
| Total number of meetings held | 11 | 12 | 11 | 10 | 6 |
| Number of members who missed no meetings | 11 | 2 | 6 | 4 | 3 |
| Number of members who missed one meeting | 3 | 2 | 0 | 1 | 1 |
| Number of members who missed two or more meetings | 2 | 2 | 0 | 0 | 1 |
| Meeting attendance, in % | 95 | 92 | 100 | 98 | 90 |

Meeting attendance

The members of the Board are encouraged to attend all meetings of the Board and the committees on which they serve. The Chairman and the Vice-Chairman may attend committee meetings as guests without voting power. The meeting attendance statistics for the Board and committee meetings are shown in the "Meeting attendance" table.

Independence

The Board consists solely of directors who have no executive functions within the Group. As of December 31, 2012, 14 members of the Board were determined by the Board to be independent, and one member, Jassim bin Hamad J.J. Al Thani, was determined not to be independent. In its independence determination, the Board takes into account the factors set forth in the Corporate Governance Guidelines, the OGR, the committee charters and applicable laws and listing standards. Our independence standards are also periodically measured against other emerging best practice standards.

The Chairman's and Governance Committee performs an annual assessment of the independence of each Board member and reports its findings to the Board for the final determination of independence of each individual member. Our definition of independence is in line with the Swiss Code of Best Practice for Corporate Governance and the NYSE and Nasdaq definitions. In general, a director is considered independent if the director:

- is not, and has not been for the prior three years, employed as an executive officer of the Group or any of its subsidiaries;
- is not, and has not been for the prior three years, an employee or affiliate of our external auditor; and
- does not maintain a material direct or indirect business relationship with the Group or any of its subsidiaries.

Whether or not a relationship between the Group or any of its subsidiaries and a member of the Board is considered material depends in particular on the following factors:

- the volume and size of any transactions concluded in relation to the financial status and credit standing of the Board member concerned or the organization in which he or she is a partner, significant shareholder or executive officer;
- the terms and conditions applied to such transactions in comparison to those applied to transactions with counterparties of a similar credit standing;
- whether the transactions are subject to the same internal approval processes and procedures as transactions that are concluded with other counterparties;
- whether the transactions are performed in the ordinary course of business; and
- whether the transactions are structured in such a way and on such terms and conditions that the transaction could be concluded with a third party on comparable terms and conditions.

Moreover, a Board member is not considered independent if the Board member is, or has been at any time during the prior three years, part of an interlocking directorate in which a member of the Executive Board serves on the compensation committee of another company that employs the Board member. The length of tenure a Board member has served is not a criterion for independence. Significant shareholder status is also not considered a criterion for independence unless the shareholding exceeds 10% of the Group's share capital. Board members with immediate family members who would not qualify as independent are also not considered independent. In addition to measuring Board members against the independence criteria, the Chairman's and Governance Committee also considers whether other commitments of an individual Board member prevent the person from devoting enough time to his or her Board mandate.

Mr. Al Thani was determined not to be independent due to the scope of various business relationships between the Group and Qatar Investment Authority (QIA), a state-owned company that has close ties to the Al Thani family, and between the Group and the Al Thani family. The Group has determined these various business relationships could constitute a material business relationship. Effective as of the AGM in April 2012, Chairman Urs Rohner was determined to be an independent member of the Board. Urs Rohner, who was elected to the Board at the AGM in April 2009, was previously determined not to be independent due to his former role as a member of the Executive Board. As described above, our independence guidelines require that a Board member not have been employed as an executive officer of the Group or any of its subsidiaries for the prior three years.

Chairman of the Board

The Chairman executes his role on a full-time basis. The Chairman coordinates the work within the Board, works with the committee chairmen to coordinate the tasks of the committees and ensures that the Board members are provided with the information relevant for performing their duties. In particular, the Chairman drives the Board agenda and key Board topics, especially regarding the strategic development of the Group, succession planning, the structure and organization of the Group, as well as compensation and compensation structure, including the performance evaluation and compensation of the CEO and the Executive Board. He chairs the Board, the Chairman's and Governance Committee and the Shareholder Meetings, leads the Group's corporate governance and takes an active role in representing the Group to the key shareholders, investors, regulators and supervisors, industry associations and other stakeholders. The Chairman has no executive function within the Group. With the exception of the Chairman's and Governance Committee, the Chairman is not a member of any of the Board's standing committees. However, he may attend all or part of selected committee meetings as a guest without voting power.

Segregation of duties

In accordance with Swiss banking law, the Group operates under a dual board structure, which strictly segregates the duties of supervision, which are the responsibility of the Board, from the duties of management, which are the responsibility of the Executive Board. The roles of the Chairman and the CEO are separate and carried out by two different people.

Board responsibilities

In accordance with the OGR, the Board delegates certain tasks to Board committees and delegates the management of the company and the preparation and implementation of Board resolutions to certain management bodies or executive officers to the extent permitted by law, in particular Article 716a and 716b of the Swiss Code of Obligations, and the AoA.

With responsibility for the overall direction, supervision and control of the company, the Board regularly assesses our competitive position and approves our strategic and financial plans. At each ordinary meeting, the Board receives a status report on our financial results, capital, funding and liquidity situation. In addition, the Board receives, on a monthly basis, management information packages, which provide detailed information on our performance and financial status, as well as quarterly risk reports outlining recent developments and outlook scenarios. Management also provides the Board members with regular updates on key issues and significant events, as deemed appropriate or requested. In order to appropriately discharge its responsibilities, the members of the Board have access to all information concerning the Group.

The Board also reviews and approves significant changes in our structure and organization and is actively involved in significant projects including acquisitions, divestitures, investments and other major projects. The Board and its committees are entitled, without consulting with management and at the Group's expense, to engage independent legal, financial or other advisors, as they deem appropriate, with respect to any matters within their authority.

Board evaluation

The Board performs a self-assessment once a year, where it reviews its own performance against the responsibilities listed in its charter and the Board's objectives and determines future objectives, including any special focus objectives, and a work plan for the coming year. The Chairman does not participate in the discussion of his own performance. As part of the self-assessment, the Board evaluates its effectiveness with respect to a number of different aspects, including board structure and composition, communication and reporting, agenda setting and continuous improvement. From time to time, the Board may also mandate an external advisor to facilitate the evaluation process.

Board committees

At each Board meeting, the committee chairmen report to the Board about the activities of the respective committees. In addition, the minutes and documentation of the committee meetings are accessible to all Board members.

Chairman's and Governance Committee

The Chairman's and Governance Committee consists of the Chairman, the Vice-Chairman and the chairmen of the committees of the Board and other members appointed by the Board. It may include non-independent Board members. Our Chairman's and Governance Committee consists of six members, all of whom are independent.

The Chairman's and Governance Committee has its own charter, which has been approved by the Board. It generally meets on a monthly basis and the meetings are also attended by the CEO. It is at the Chairman's discretion to ask other members of management or specialists to attend a meeting.

The Chairman's and Governance Committee acts as an advisor to the Chairman and supports him in the preparation of the Board meetings. In addition, the Chairman's and Governance Committee is responsible for the development and review of corporate governance guidelines, which are then recommended to the Board for approval. At least once annually, the Chairman's and Governance Committee evaluates the independence of the Board members and reports its findings to the Board for final determination. The Chairman's and Governance Committee is also responsible for identifying, evaluating, recruiting and nominating new Board members in accordance with the Group's internal criteria, subject to applicable laws and regulations.

In addition, the Chairman's and Governance Committee guides the Board's annual performance assessment of the Chairman, the CEO and the members of the Executive Board. The Chairman's and Governance Committee proposes to the Board the appointment, promotion, dismissal or replacement of members of the Executive Board. The Chairman's and Governance Committee also reviews succession plans for senior executive positions in the Group with the Chairman and the CEO.

The Chairman's and Governance Committee performs a self-assessment once a year, where it reviews its own performance against the responsibilities listed in the charter and the committee's objectives and determines any special focus objectives for the coming year.

Audit Committee

The Audit Committee consists of not fewer than three members, all of whom must be independent. The chairman of the Risk Committee is generally appointed as one of the members of the Audit Committee. Our Audit Committee consists of five members, all of whom are independent.

The Audit Committee has its own charter, which has been approved by the Board. The members of the Audit Committee are subject to independence requirements in addition to those required of other Board members. None of the Audit Committee members may be an affiliated person of the Group or may, directly or indirectly, accept any consulting, advisory or other compensatory fees from us other than their regular compensation as members of the Board and its committees. The Audit Committee charter stipulates that all Audit Committee members must be financially literate. In addition, they may not serve on the Audit Committee of more than two other companies, unless the Board deems that such membership would not impair their ability to serve on our Audit Committee.

In addition, the US Securities and Exchange Commission requires disclosure about whether a member of the Audit Committee is an audit committee financial expert within the meaning of SOX. The Board has determined that John Tiner is an audit committee financial expert.

Pursuant to its charter, the Audit Committee holds meetings at least once each quarter, prior to the publication of our consolidated financial statements. Typically, the Audit Committee convenes for a number of additional meetings and workshops throughout the year. The meetings are attended by management representatives, as appropriate, the Head of Internal Audit and senior representatives of the external auditor. A private session with Internal Audit and the external auditors is regularly scheduled to provide them with an opportunity to discuss issues with the Audit Committee without management being present. The Head of Internal Audit reports directly to the Audit Committee chairman.

The primary function of the Audit Committee is to assist the Board in fulfilling its oversight role by:

- monitoring and assessing the integrity of the consolidated financial statements as well as disclosures of the financial condition, results of operations and cash flows;
- monitoring the adequacy of the financial accounting and reporting processes and the effectiveness of internal controls over financial reporting;
- monitoring processes designed to ensure compliance by the Group in all significant respects with legal and regulatory requirements, including disclosure controls and procedures;
- monitoring the adequacy of the management of operational risks, jointly with the Risk Committee, including

assessing the effectiveness of internal controls that go beyond the area of financial reporting;

- monitoring the adequacy of the management of reputational risks, jointly with the Risk Committee; and
- monitoring the qualifications, independence and performance of the external auditors and of Internal Audit.

The Audit Committee is regularly informed about significant projects aimed at further improving processes and receives regular updates on major litigation matters as well as significant regulatory and compliance matters. The Audit Committee also oversees the work of our external auditor and pre-approves the retention of, and fees paid to, the external auditor for all audit and non-audit services. For this purpose, it has developed and approved a policy that is designed to help ensure that the independence of the external auditor is maintained at all times. The policy limits the scope of services that the external auditor may provide to us or any of our subsidiaries in connection with its audit and stipulates certain permissible types of non-audit services, including audit-related services, tax services and other services that have been pre-approved by the Audit Committee. The Audit Committee pre-approves all other services on a case-by-case basis. The external auditor is required to report periodically to the Audit Committee about the scope of the services it has provided and the fees for the services it has performed to date. Furthermore, the Audit Committee has established procedures for the receipt, retention and treatment of complaints regarding accounting, internal controls or auditing matters, including a whistleblower hotline to provide the option to report complaints on a confidential, anonymous basis. The Audit Committee performs a self-assessment once a year where it critically reviews its own performance and determines objectives, including any special focus objectives, and a work plan for the coming year.

Compensation Committee

The Compensation Committee consists of not fewer than three members, all of whom must be independent. Our Compensation Committee consists of four members, all of whom are independent.

The Compensation Committee has its own charter, which has been approved by the Board. Pursuant to its charter, the Compensation Committee holds at least four meetings per year. Additional meetings may be scheduled at any time. The Compensation Committee's duties and responsibilities include reviewing the Group's compensation policy, newly established compensation plans or amendments to existing plans and recommending them to the Board for approval, as well as reviewing the performance of the businesses and the respective management teams and determining and/or recommending to

the Board for approval the overall variable compensation pools and the compensation payable to the members of the Board, the Executive Board, the head of Internal Audit and certain other members of senior management. The meetings are attended by management representatives, as appropriate.

The Compensation Committee is assisted in its work by external legal counsel Nobel & Hug and an independent global compensation consulting firm, Johnson Associates, Inc. Johnson Associates does not provide other services to the Group other than assisting the Compensation Committee. In 2012, the Compensation Committee retained Fehr Advice & Partners AG, a Swiss-based consulting firm, to advise on the compensation approach for the Executive Board. The Compensation Committee performs a self-assessment once a year where it reviews its own performance against the responsibilities listed in the charter and the committee's objectives and determines any special focus objectives for the coming year.

- [Refer to "Compensation governance" in Compensation for information on our compensation approach, principles and objectives.](#)

Risk Committee

The Risk Committee consists of not fewer than three members. It may include non-independent members. The chairman of the Audit Committee is generally appointed as one of the members of the Risk Committee. Our Risk Committee consists of five members, all of whom are independent.

The Risk Committee has its own charter, which has been approved by the Board, and holds at least four meetings a year. In addition, the Risk Committee usually convenes for additional meetings throughout the year in order to appropriately discharge its responsibilities. The meetings are attended by management representatives, as appropriate.

The Risk Committee's main duties are to assist the Board in reviewing and assessing the integrity and adequacy of the Group's risk management function, in particular as it relates to market, credit, liquidity and funding risks, reviewing the adequacy of the Group's capital and its allocation to the Group's businesses reviewing certain risk limits and making recommendations to the Board, and reviewing and assessing the Group's risk appetite framework. The Risk Committee also reviews and assesses the adequacy of the management of reputational and operational risks, including the adequacy of the internal control system, jointly with the Audit Committee. The Risk Committee performs a self-assessment once a year where it reviews its own performance against the responsibilities listed in the charter and the committee's objectives and determines any special focus objectives for the coming year.

Banking relationships with members of the Board and Executive Board and related party transactions

Banking relationships

The Group is a global financial services provider. Many of the members of the Board and the Executive Board or companies associated with them maintain banking relationships with us. The Group or any of its banking subsidiaries may from time to time enter into financing and other banking agreements with companies in which current members of the Board or the Executive Board have a significant influence as defined by the US Securities and Exchange Commission, such as holding executive and/or board level roles in these companies. With the exception of the transactions described below, relationships with members of the Board or the Executive Board and such companies are in the ordinary course of business and are entered into on an arm's length basis. Also, unless otherwise noted, all loans to members of the Board, members of the Executive Board or companies associated with them were made in the ordinary course of business, were made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons, and did not involve more than the normal risk of collectability or present other unfavorable features. As of December 31, 2012, 2011 and 2010, there was no loan exposure to such related parties that was not made in the ordinary course of business and at prevailing market conditions.

- ▶ Refer to "Executive Board shareholdings and loans" and "Board shareholdings and loans" in Compensation for a listing of the outstanding loans to members of the Executive Board and the Board.

Related party transactions

Exchange of Tier 1 Capital Notes into Tier 1 Buffer Capital Notes

In February 2011, we entered into definitive agreements with entities affiliated with QIA and The Olayan Group (the Investors), each of which has significant holdings of Group shares and other Group financial products, to issue tier 1 buffer capital notes (Tier 1 BCN). Under the agreements, the Investors agreed to purchase USD 3.45 billion Tier 1 BCN and CHF 2.5 billion Tier 1 BCN in exchange for their holdings of USD 3.45 billion 11% tier 1 capital notes and CHF 2.5 billion 10% tier 1 capital notes issued in 2008 (Tier 1 Capital Notes) or, in the event that the Tier 1 Capital Notes have been redeemed in full, for cash. At that time, the purchase or exchange was expected to occur no earlier than October 23, 2013, the first call date of the Tier 1 Capital Notes. In July

2012, we entered into an amendment agreement with the entity affiliated with The Olayan Group for the immediate exchange of USD 1.725 billion of their existing Tier 1 Capital Notes into an equivalent principal amount of Tier 1 BCN, thereby accelerating the exchange initially scheduled for October 2013. The accelerated exchange of some of the outstanding Tier 1 Capital Notes was one of a number of capital strengthening measures that we announced in July 2012.

Under their terms, the Tier 1 BCN will be converted into our ordinary shares if our reported common equity tier 1 (CET1) ratio, as determined under the Basel Committee on Banking Supervision regulations as of the end of any calendar quarter, falls below 7% (or any lower applicable minimum threshold), unless the Swiss Financial Market Supervisory Authority (FINMA), at our request, has agreed on or prior to the publication of our quarterly results that actions, circumstances or events have restored, or will imminently restore, the ratio to above the applicable threshold. The Tier 1 BCN will also be converted if FINMA determines that conversion is necessary, or that we require public sector capital support, to prevent us from becoming insolvent, bankrupt or unable to pay a material amount of our debts, or other similar circumstances. In addition, conversion of the Tier 1 BCN held by The Olayan Group will be triggered if, in the event of a request by FINMA for an interim report prior to the end of any calendar quarter, our reported CET1 ratio, as of the end of any such interim period, falls below 5%. The conversion price will be the higher of a given floor price per share (subject to customary adjustments) or the daily volume weighted average sales price of our ordinary shares over a five day period preceding the notice of conversion. In connection with the July 2012 exchange, the conversion floor price of the Tier 1 BCN delivered in the exchange as well as the remaining Tier 1 BCN scheduled to be delivered in October 2013 was adjusted to match the conversion price of the MACCS described below. The Tier 1 BCN are deeply subordinated, perpetual and callable by us no earlier than 2018 and in certain other circumstances with FINMA approval. Interest is payable on the USD 3.45 billion Tier 1 BCN and CHF 2.5 billion Tier 1 BCN at fixed rates of 9.5% and 9.0%, respectively, and will reset after the first call date. Interest payments will generally be discretionary (unless triggered), subject to suspension in certain circumstances and non-cumulative.

At the time of the original transaction, the Group determined that this was a material transaction and deemed the Investors to be related parties of our Board members Mr. Al Thani and Mr. Syriani, respectively, for purposes of evaluating the terms and corporate governance of the original transaction. At that time, the Board (except for Mr. Al Thani and Mr. Syriani, who abstained from participating in the determination

process) determined that the terms of the original transaction, given its size, the nature of the contingent buffer capital, for which there was no established market, and the terms of the Tier 1 Capital Notes issued in 2008 and held by the Investors, were fair.

Issuance of mandatory and contingent convertible securities

In July 2012, we issued CHF 3.8 billion MACCS that are mandatorily convertible into 233.5 million shares at a conversion price of CHF 16.29 per share on March 29, 2013 (subject to early conversion upon certain contingency and viability events), with settlement and delivery of shares in early April 2013. Strategic and institutional investors purchased CHF 2.0 billion of MACCS and shareholders exercised preferential subscription rights for CHF 1.8 billion of MACCS. The conversion price of CHF 16.29 per share corresponded to 95% of the volume weighted average market price for the two trading days preceding the transaction. Investors in the MACCS included entities affiliated with the Investors, which also have been deemed by the Group to be related parties of our Board members, Mr. Al Thani and Mr. Syriani, respectively. The issuance of the MACCS was one of a number of capital strengthening measures executed by the Group in 2012. In addition to the Investors, a number of other investors of the Group purchased the MACCS, including Norges Bank and the Capital Group Companies, Inc., which like the Investors have significant holdings of Group shares. The terms and conditions for the conversion of the MACCS are equally applicable to all purchasers.

- ▶ Refer to “Capital issuances and redemptions” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management for further information about the Tier 1 BCN and the MACCS.

Plus Bonds

We provided members of the Executive Board who did not participate in the structuring of the instrument the opportunity to invest their own funds in Plus Bond instruments with substantially the same terms as the Plus Bond awards granted to certain employees as deferred variable compensation for 2012. As a result, certain Executive Board members acquired an aggregate of CHF 9 million in Plus Bond instruments in February 2013.

- ▶ Refer to “Plus Bond awards” in Compensation – Group compensation – Compensation design – Deferred variable compensation instruments for further information.

Loan to Arcapita Bank

In February 2012, the Group downgraded to impaired status a loan with an outstanding principal amount of USD 30 million to Arcapita Bank B.S.C. (Arcapita Bank), an international investment firm headquartered in Bahrain. The financing provided to Arcapita Bank was extended in 2007 on arm's length terms and at the time, did not involve more than the normal risk of collectability or present other unfavorable features. Arcapita Bank may be deemed to be a related party entity of the Group because our Board member Mr. Al Thani is also a member of the board of directors of Arcapita Bank. Mr. Al Thani joined the Arcapita Bank board of directors in October 2008 and our Board in 2010, in both cases after the loan was extended. Arcapita Bank filed for Chapter 11 bankruptcy in the US in March 2012, and the Group subsequently sold its USD 30 million credit position to an unrelated third party. As of December 31, 2012, the Group had no credit exposure to Arcapita Bank.

- ▶ Refer to “Note 28 – Related parties” in V – Consolidated financial statements – Credit Suisse Group for further information on related party transactions.

Biographies of the Board members

Urs Rohner
Born 1959
Swiss Citizen

Urs Rohner has been the Chairman of the Board and the Chairman's and Governance Committee since the 2011 AGM. He was Vice-Chairman of the Board and a member of the Chairman's and Governance and Risk Committees (2009 to 2011). He was a member of the Executive Boards of Credit Suisse Group and Credit Suisse (2004 to 2009) and served as General Counsel of Credit Suisse Group (2004 to 2009) and as COO and General Counsel of Credit Suisse (2006 to 2009). His term as a Board member expires at the AGM in 2015. The Board has determined him to be independent under the Group's independence standards.

Mr. Rohner served as Chairman of the Executive Board and CEO of ProSieben and ProSiebenSat.1 Media AG (2000 to 2004) and CEO of ProSieben Media AG (2000). He was a partner at Lenz & Staehelin (1992 to 1999) and an attorney with the law firm Sullivan & Cromwell LLP in New York (1988 to 1989) and Lenz & Staehelin in Zurich (1990 to 1992, 1983 to 1988). Mr. Rohner graduated with a degree in law from the University of Zurich, Switzerland, in 1983. He was admitted to the bars of the canton of Zurich in 1986 and the state of New York in 1990.

Mr. Rohner is the chairman of the Board of Trustees of the Credit Suisse Foundation and the Credit Suisse Research Institute. He is a board member of the Institute of International Finance and the Institute International d'Etudes Bancaires, a member of the European Financial Services Round Table and the European Banking Group, the co-chair of the International Advisory Board of the Moscow International Finance Center and serves on the International Business Leaders Advisory Council of the Mayor of Beijing. Mr. Rohner is also a board member of Avenir Suisse, Economiesuisse and the International Institute for Management Development (IMD) Foundation, the chairman of the Advisory Board of the University of Zurich's Department of Economics and a board member of the Zurich Opera House and the Lucerne Festival.

Peter Brabeck-Letmathe
Born 1944
Austrian Citizen

Peter Brabeck-Letmathe has been Vice-Chairman of the Board since 2008, a function he also held from 2000 to 2005. He has been a member of the Board since 1997 and a member of the Chairman's and Governance Committee since 2008. He served on the Compensation Committee (2008 to 2011 and 2000 to 2005) and on the Chairman's and Governance Committee (2003 to 2005). His term as a member of the Board expires at the AGM in 2014. The Board has determined him to be independent under the Group's independence standards.

Mr. Brabeck-Letmathe has been the Chairman of the Board of Directors of Nestlé SA since 2005. He was also the CEO of Nestlé SA (1997 to 2008) and since 1987 has been based at Nestlé SA's headquarters in Vevey. He joined Nestlé SA's sales operations in Austria after graduating in 1968. His career at Nestlé SA has included a variety of assignments in several European countries and in Latin America. Mr. Brabeck-Letmathe studied economics at the University of World Trade, Vienna.

Mr. Brabeck-Letmathe has been Vice-Chairman of the Board of Directors of L'Oréal SA, Paris, since 1997, and has been a board member of Exxon Mobil Corporation and Delta Topco (Formula 1), both since 2010, and assumed the role of Chairman of Delta Topco (Formula 1) in 2012. He is also a member of the Foundation Board of the World Economic Forum and a member of the European Round Table of Industrialists.

**Jassim Bin Hamad J.J.
Al Thani**
Born 1982
Qatari Citizen

Jassim Bin Hamad J.J. Al Thani has been a member of the Board since 2010. His term as a member of the Board expires at the AGM in 2013. The Board has determined him to be not independent under the Group's independence standards. For further information, refer to Independence.

Since April 2005, Mr. Al Thani has been Chairman of the Board of Directors of Qatar Islamic Bank. He is also the Chairman of: QInvest, the first Islamic investment bank founded in Qatar; QIB (UK), an Islamic investment bank founded by the Qatar Islamic Bank in London; Damaan Islamic Insurance Co. (BEEEMA); and Q-RE LLC, an insurance and reinsurance company. He is the CEO of Al Mirqab Capital LLC, Qatar, a family enterprise, and a member of the Board of Directors of Qatar Navigation Company, Qatar Insurance Company and Arcapita Bank, Bahrain. Mr. Al Thani completed his studies in the State of Qatar and graduated as an Officer Cadet from the Royal Military Academy in England.

Robert H. Benmosche
Born 1944
US Citizen

Robert H. Benmosche has been a member of the Board since 2002 and a member of the Compensation Committee since 2003. In August 2009, Mr. Benmosche stepped down as a member of the Board as a result of his appointment as President and CEO of American International Group, Inc. (AIG). Changes in AIG's business made it possible for Mr. Benmosche to rejoin the Board in April 2010. His term as a member of the Board expires at the AGM in 2013. The Board has determined him to be independent under the Group's independence standards.

Mr. Benmosche is the President and CEO of AIG, New York. He was the Chairman of the Board and the CEO of MetLife, Inc., New York, from the demutualization of the company in 2000, and of Metropolitan Life Insurance Company, New York, from 1998 until his retirement in 2006. Before joining MetLife in 1995, Mr. Benmosche was with PaineWebber, New York, for 13 years. He received a BA degree in Mathematics from Alfred University, New York, in 1966.

Iris Bohnet
Born 1966
Swiss Citizen

Iris Bohnet was elected to the Board at the AGM 2012 and has since served as a member of the Compensation Committee. Her term as a member of the Board expires at the AGM in 2015. The Board has determined her to be independent under the Group's independence standards.

Ms. Bohnet has been a Professor of Public Policy at the Harvard Kennedy School, Massachusetts, since 2006, and Academic Dean of the Harvard Kennedy School since 2011. She joined the academic faculty of Harvard University in 1998 as Assistant Professor of Public Policy at the Harvard Kennedy School and was named Associate Professor in 2003. Ms. Bohnet also serves as the Director of the Women and Public Policy Program at the Harvard Kennedy School. She was a visiting scholar at the Haas School of Business at the University of California at Berkeley (1997 to 1998). Ms. Bohnet received a Masters Degree in Economic History, Economics and Political Science from the University of Zurich, Switzerland, in 1992, and a doctorate degree in Economics from the same university in 1997.

Ms. Bohnet is currently a member of the Advisory Board of the Vienna University of Economics and Business Administration, the Global Agenda Council on Women's Empowerment of the World Economic Forum and the World Knowledge Dialogue, Villars-sur-Ollon. She chairs the Kennedy School's executive program for the World Economic Forum's Young Global Leaders.

Noreen Doyle
Born 1949
Irish and US Citizen

Noreen Doyle has been a member of the Board since 2004 and a member of the Risk Committee since 2009. Since 2012, Ms. Doyle also serves as a non-executive director and as of 2013 chairs the boards of Credit Suisse International and Credit Suisse Securities Europe Limited, two of the Group's UK subsidiaries. She served on the Audit Committee (2007 to 2008) and the Risk Committee (2004 to 2007). Her term as a member of the Board expires at the AGM in 2013. The Board has determined her to be independent under the Group's independence standards.

Ms. Doyle was the first Vice President and Head of Banking of the European Bank for Reconstruction and Development (EBRD) from 2001 to 2005. She became Deputy Vice President of Risk Management in 1997, was appointed Chief Credit Officer in 1994 and joined the EBRD in 1992 as Head of Syndications. Prior to joining the EBRD, Ms. Doyle spent 18 years at Bankers Trust Company with assignments in Houston, New York and London. Ms. Doyle received a BA in Mathematics from The College of Mount Saint Vincent, New York, in 1971, and an MBA from Dartmouth College, New Hampshire, in 1974.

Ms. Doyle currently serves on the Boards of Directors of the Newmont Mining Corporation and QinetiQ Group Plc., a UK-based defense technology and security company. She is also a member of the Advisory Board of the Macquarie European Infrastructure Fund and the Macquarie Renaissance Infrastructure Fund. Ms. Doyle was a member of the board of Rexam Plc, a global consumer packaging company (2005 to 2012). Ms. Doyle chairs the Board of Governors of the Marymount International School, London, since 2010, and is also a patron of the Women in Banking and Finance in London.

Jean-Daniel Gerber

Born 1946

Swiss Citizen

Jean-Daniel Gerber was elected to the Board at the AGM 2012 and has since served as a member of the Audit Committee. His term as a member of the Board expires at the AGM in 2015. The Board has determined him to be independent under the Group's independence standards.

Jean-Daniel Gerber was appointed by the Swiss Federal Council to State Secretary in 2004. In this function, he was Head of the State Secretariat for Economic Affairs, a function from which he retired in 2011. Mr. Gerber was Director of the Swiss Federal Office of Migration (1994 to 2004), and served as Executive Director at the World Bank Group in Washington D.C (1993 to 1997). Prior to that, he held the positions of Head of Economic and Financial Affairs at the Swiss Embassy in Washington D.C. and Swiss representative of the World Trade Organization. Mr. Gerber received a degree in Economics from the University of Berne, Switzerland, in 1972, and was awarded an honorary doctorate from the Faculty of Economics and Social Sciences at the same university in 2007.

Since 2011, Mr. Gerber has been a Member of the Board of Directors of the Lonza Group AG and Chairman of the Board of the Swiss Investment Fund for Emerging Markets. Mr. Gerber is also a member of the Swiss Society for Public Good.

Walter B. Kielholz

Born 1951

Swiss Citizen

Walter B. Kielholz has been a member of the Board since 1999, the Compensation Committee since 2009 and of the Chairman's and Governance Committee since 2011. He served as Chairman of the Board and the Chairman's and Governance Committee (2003 to 2009) and as Chairman of the Audit Committee (1999 to 2002). His term as a member of the Board expires at the AGM in 2014. The Board has determined him to be independent under the Group's independence standards.

Since May 2009, he has served as the Chairman of the Board of Directors of Swiss Re, Vice-Chairman in 2007, Executive Vice-Chairman of the Board of Directors of Swiss Re in 2003 and has been a board member since 1998. He was Swiss Re's CEO (1997 to 2002) and became a member of Swiss Re's Executive Board in 1993. Mr. Kielholz joined Swiss Re, Zurich, in 1989. In 1986, he joined Credit Suisse, responsible for client relations with large insurance groups in the Multinational Services department. Mr. Kielholz's career began at the General Reinsurance Corporation, Zurich, in 1976, and he assumed responsibility for the company's European marketing after working in the US, the UK and Italy. Mr. Kielholz received a degree in Business Finance and Accounting from the University of St. Gallen, Switzerland, in 1976.

Mr. Kielholz is a member and Chairman and Vice Chairman of the European Financial Services Roundtable and Vice Chairman of the Institute of International Finance, respectively. He is also a member of the Advisory Board of Corsair Capital Ltd., a member of the Monetary Authority of Singapore and the International Business Leader Advisory Council of the Mayor of Shanghai and the World Economic Forum International Business Council. In addition, Mr. Kielholz is a member and former Chairman of the Supervisory Board of Avenir Suisse and a senior advisor to the Credit Suisse Research Institute. He is a member of the Lucerne Festival Foundation Board and Chairman of the Zürcher Kunstgesellschaft (Zurich Art Society), which runs Zurich's Kunsthaus museum.

**Andreas N. Koopmann**

Born 1951

Swiss Citizen

**Jean Lanier**

Born 1946

French Citizen

Andreas N. Koopmann has been a member of the Board and the Risk Committee since the AGM in 2009. His term as a member of the Board expires at the AGM in 2015. The Board has determined him to be independent under the Group's independence standards.

From 1982 to 2009, Mr. Koopmann held various leading positions at Bobst Group S.A., Lausanne, one of the world's leading suppliers of equipment and services to packaging manufacturers. He was Group CEO (1995 to 2009) and a member of its Board of Directors (1998 to 2002). Mr. Koopmann received a Master's Degree in Mechanical Engineering from the Swiss Federal Institute of Technology, Switzerland, in 1976 and an MBA from International Institute for Management Development (IMD), Switzerland, in 1978.

Mr. Koopmann has been a member of the Board of Directors of Georg Fischer AG since 2010 and assumed the role of President of the Board of Directors in March 2012. He is also a member of the Board of Directors of the CSD Group, an engineering consultancy enterprise in Switzerland. Since 2003, Mr. Koopmann has been a member of the Board of Directors of Nestlé SA, its Vice-Chairman and a member of its Chairman's and Corporate Governance Committee. He was the Chairman of the Board of Directors of Alstom (Suisse) SA (2010 to 2012) and served as the Vice-Chairman of Swissmem (1994 to 2012), the association of Swiss Mechanical and Electrical Engineering Industries. He served as a member of the Credit Suisse's Advisory Board (1999 to 2007) and Board of Directors of Credit Suisse First Boston (1995 to 1999).

Jean Lanier has been a member of the Board and the Audit Committee since 2005. Since 2011, he has also been a member of the Compensation Committee. His term as a member of the Board expires at the AGM in 2014. The Board has determined him to be independent under the Group's independence standards.

Mr. Lanier is the former Chairman of the Managing Board and Group CEO of Euler Hermes, Paris, and chaired the boards of the principal subsidiaries of the group (1998 to 2004). Prior to that, he was the COO and Managing Director of the Euler Group (1996 to 1998) and of SFAC (1990 to 1997), which became Euler Hermes SFAC. He was Managing Director of the Pargesa Group based in Paris and Geneva (1988 to 1990) and held the position of President of Lambert Brussels Capital Corporation in New York (1983 to 1989). Mr. Lanier started his career at the Paribas Group in 1970, where he worked until 1983. He held, among others, the functions of Senior Vice President of the Paribas Group Finance division and Senior Executive for North America of the Paribas Group in New York. He received a Masters of Engineering from the Ecole Centrale des Arts et Manufactures, Paris, in 1969, and a Masters of Sciences in Operations Research and Finance from Cornell University, New York, in 1970.

Mr. Lanier is the Chairman of the Boards of Directors for Swiss RE Europe SA, Swiss RE International SE and Swiss RE Europe Holdings SA and also serves on their respective audit and risk committees. He is a Chevalier de la Légion d'Honneur in France and Chairman of the Board of the Foundation "La Fondation Internationale de l'Arche."

**Anton van Rossum**

Born 1945

Dutch Citizen

Anton van Rossum has been a member of the Board since 2005 and a member of the Risk Committee since 2008. He served on the Compensation Committee (2005 to 2008). His term as a member of the Board expires at the AGM in 2014. The Board has determined him to be independent under the Group's independence standards.

Mr. van Rossum was the CEO of Fortis (2000 to 2004). He was also a member of the Board of Directors of Fortis and chaired the boards of the principal subsidiaries of the group during this time. Prior to that, Mr. van Rossum worked 28 years with McKinsey and Company, where he led a number of top management consulting assignments, with a focus on the banking and insurance sectors. He was elected Principal in 1979 and a Director of the firm in 1986. Mr. van Rossum studied Economics and Business Administration at the Erasmus University, Rotterdam, where he obtained a Bachelor's degree in 1965 and a Master's degree in 1969.

Mr. van Rossum is a member of the Supervisory Board of Munich Re AG, an international re-insurance and primary insurance group, and chairs the Supervisory Board of Royal Vopak NV, Rotterdam, an international oil, chemicals and liquified natural gas storage group. In addition, he is a member of the Board of Directors of Solvay SA, Brussels, an international chemicals and plastics company, and chairs the Supervisory Board of Erasmus University, Rotterdam. He also chairs the Board of Trustees of the Netherlands Economics Institute and sits on the boards of several cultural, philanthropic and educational institutions. Mr. van Rossum was a member of the Supervisory Board of Rodamco Europe NV, Amsterdam, a commercial real estate investment group (2007 to 2011).

**Aziz R.D. Syriani**

Born 1942

Canadian Citizen

Aziz R.D. Syriani has been a member of the Board since 1998 and Chairman of the Compensation Committee since 2004. He has been a member of the Chairman's and Governance Committee since 2003 and served on the Audit Committee (2003 to 2007). His term as a member of the Board expires at the AGM in 2013. The Board has determined him to be independent under the Group's independence standards.

He has served as the CEO since 2002 and the President of The Olayan Group since 1978. The Olayan Group is a private multinational enterprise engaged in distribution, manufacturing and global investment and a significant shareholder of the Group. Mr. Syriani received a degree in law from the University of St. Joseph, Beirut, in 1965, and a Master of Laws degree from Harvard University, Massachusetts, in 1972.

Mr. Syriani has served on the Board of Directors of Occidental Petroleum Corporation, California, since 1983, where he is currently the Lead Independent Director and Chairman of the Audit Committee, and a member of the Executive and the Corporate Governance Committees.

David W. Syz
Born 1944
Swiss Citizen

David W. Syz has been a member of the Board and the Audit Committee since 2004. His term as a member of the Board expires at the AGM in 2013. The Board has determined him to be independent under the Group's independence standards.

Appointed State Secretary in 1999, Mr. Syz took charge of the new State Secretariat for Economic Affairs, a function which he held until his retirement in 2004. In 1996, he was appointed CEO and Managing Director of Schweizerische Industrie-Gesellschaft Holding AG, Neuhausen. In 1985, Mr. Syz was Director and Head of Industries and Electronics of Elektrowatt AG. He was the CEO of Cerberus AG, Männedorf (1982 to 1984). In 1975, he was appointed Head of Finance at Stäfa Control System AG, Stäfa, and became Managing Director after four years. Mr. Syz started his career as assistant to the Director at Union Bank of Switzerland in Zurich and subsequently held the equivalent position at Elektrowatt AG, Zurich. He studied law at the University of Zurich, Switzerland, and received a doctorate from the same university in 1972 and an MBA at INSEAD, Fontainebleau, in 1973.

Mr. Syz has been the Chairman of the Board of Directors of Huber & Suhner AG, Pfäffikon since 2005, Vice-Chairman (2004 to 2005) and the Chairman of the Board of Directors of ecodocs AG, Zollikon since 2004. He has been the Chairman of the Supervisory Board of the Climate Cent Foundation since 2005, an organization mandated with the implementation of the carbon dioxide reduction program according to the Kyoto Protocol.

Richard E. Thornburgh
Born 1952
US Citizen

Richard E. Thornburgh has been a member of the Board and the Risk Committee since 2006 and the Chairman of the Risk Committee and a member of the Chairman's and Governance Committee since 2009 and the Audit Committee since 2011. As of 2013, Mr. Thornburgh also serves as a non-executive director of Credit Suisse International and Credit Suisse Securities Europe Limited, two of the Group's UK subsidiaries. His term as a member of the Board expires at the AGM in 2015. The Board has determined him to be independent under the Group's independence standards.

Mr. Thornburgh has been Vice-Chairman of Corsair Capital, New York, a private equity investment company, since 2006. He was the CRO of Credit Suisse Group (2003 to 2004). In 2004, he was appointed Executive Vice-Chairman of Credit Suisse First Boston. He was CFO of Credit Suisse First Boston (2000 to 2002) and Vice-Chairman of the Executive Board of Credit Suisse First Boston (1999 to 2002). Mr. Thornburgh was the CFO of Credit Suisse Group (1997 to 1999). He was appointed a member of the Group Executive Board (1997 to 2005). In 1995, Mr. Thornburgh was appointed Chief Financial and Administrative Officer and a member of the Executive Board of Credit Suisse First Boston. He began his investment banking career in New York with The First Boston Corporation, the predecessor firm of Credit Suisse First Boston. Mr. Thornburgh received a BBA from the University of Cincinnati, Ohio, in 1974, as well as an honorary doctorate in 2009, and an MBA from the Harvard Business School, Massachusetts, in 1976.

Mr. Thornburgh is a member of the board and audit committee of Reynolds American Inc., Winston-Salem, and a board and audit committee member of The McGraw-Hill Companies, New York, since 2011. Mr. Thornburgh has also been a member of the board and lead director for New Star Financial Inc., Massachusetts, since 2006. Furthermore, he serves on the Executive Committee of the University of Cincinnati Foundation and the Investment Committee of the University of Cincinnati.

John Tiner
 Born 1957
 British Citizen

John Tiner has been a member of the Board and the Audit Committee since the AGM in 2009. Since the AGM in 2011, he has chaired the Audit Committee and has also been a member of the Chairman's and Governance and Risk Committees. His term as member of the Board expires at the AGM in 2015. The Board has determined him to be independent under the Group's independence standards and a financial expert within the meaning of SOX.

From September 2008 until March 2013, Mr. Tiner was the CEO of Resolution Operations LLP, a privately owned advisory firm which provided services to Resolution Ltd., a company listed on the London Stock Exchange. Mr. Tiner was previously CEO of the FSA (2003 to 2007). He joined the FSA in 2001 as Managing Director of the Consumer Insurance and Investment Directorate and was a member of the Managing Board of the Committee of European Insurance and Occupational Pensions Regulators and Chairman of the Committee of European Securities Regulators – Standing Committee on Accounting and Auditing. Before joining the FSA, Mr. Tiner was a Managing Partner at Arthur Andersen, responsible for its worldwide financial services practice.

Mr Tiner is a non-executive member of the board of Lucida plc and Friends Life Group plc, both UK insurance companies, and is a member of the Advisory Board of Corsair Capital, a private equity investment company. He was given an Honorary Doctor of Letters at his former college, Kingston University, London, in 2010, and is a Fellow of the Institute of Chartered Accountants in England and Wales. In recognition of his contribution to the financial services industry, he was awarded the title of Commander of the British Empire in 2008.

Honorary Chairman of Credit Suisse Group

Rainer E. Gut

Born 1932
 Swiss Citizen

Rainer E. Gut was appointed the Honorary Chairman of Credit Suisse Group in 2000, after he retired as Chairman, a position had held since 1986. Mr. Gut was a member of the Board of Directors of Nestlé SA, Vevey, from 1981 to 2005, where he was Vice-Chairman from 1991 to 2000 and Chairman from 2000 to 2005.

As Honorary Chairman, Mr. Gut does not have any function in the governance of the Group and does not attend the meetings of the Board.

Secretaries of the Board

Pierre Schreiber

Joan E. Belzer

Remembering Hans-Ulrich Doerig (1940 – 2012)

In November 2012, Hans-Ulrich Doerig, former Chairman of the Board of Directors of Credit Suisse Group, passed away at the age of 72. Hans-Ulrich Doerig served as Chairman of the Board from 2009 to 2011 and devoted 38 years of his career to our company.

In 1968, after graduating from the University of St. Gallen, Switzerland, with a doctorate in Law and Economics, Hans-Ulrich Doerig embarked on his career at JP Morgan in New York, where he worked first in Research and subsequently in Corporate Finance and Lending. Five years later, he joined Credit Suisse in Zurich and held various management positions in the International Capital Markets business. In 1982, Hans-Ulrich Doerig was appointed to the Executive Board of Credit Suisse, where he was responsible for the multi-national division as well as for securities trading, capital markets and corporate finance.

Hans-Ulrich Doerig was a universal banker, who always served our bank with professionalism, expertise and loyalty. The media occasionally referred to him as a 'Credit Suisse veteran' – a description that evidently pleased him. He was always willing to assume responsibility. In the mid-1990s, Hans-Ulrich Doerig was appointed Vice-Chairman of the Board of Directors. He later returned to various senior executive roles. He was President of the Executive Board of Credit Suisse, CEO of Credit Suisse First Boston, and Vice-Chairman of the Executive Board and CRO of Credit Suisse Group. In 2003, Hans-Ulrich Doerig was once again elected to the Board of Directors, where he served as Vice-Chairman and, from 2009 to 2011, as Chairman.

Hans-Ulrich Doerig's sense of commitment was not limited to banking. As the representative of a large Swiss bank, he also sought to promote the interests of the business community and the economy as a whole, not to mention his support for science, the arts and education. Hans-Ulrich Doerig was a lecturer at the University of Zurich and the Swiss Banking School for over a decade, and he served for many years as a member of the University Council of the University of Zurich, a member of the Board of Directors of the International Red Cross Museum in Geneva, President of the Zurich Association of Friends of the Arts, and a member of the Boards of various charitable foundations, academic bodies and social institutions.

Hans-Ulrich Doerig was a Swiss banker with an international mindset who was committed to preserving traditions while encouraging progress. He made an immense contribution not only to Credit Suisse, but also to the city of Zurich and to Switzerland.

Executive Board

Members of the Executive Board

The Executive Board is responsible for the day-to-day operational management of the Group. It develops and implements the strategic business plans for the Group overall as well as for the principal businesses, subject to approval by the Board. It further reviews and coordinates significant initiatives, projects and business developments in the divisions, regions and in the Shared Services functions and establishes Group-wide policies. The composition of the Executive Board of the Group and the Bank is identical.

Effective April 30, 2012, Karl Landert stepped down from the Executive Board and his position as Chief Information Officer. David Mathers, Chief Financial Officer and a member of the Executive Board, also assumed responsibility for the IT organization and since January 1, 2012, for the Group's global Operations functions.

Effective May 31, 2012, Antonio Quintella was appointed as Chairman of Hedging-Griffo and stepped down from the Executive Board and his position as Chief Executive Officer (CEO) of the Americas region. Robert Shafir assumed the role as CEO of the Americas region in addition to his role at the time as CEO Asset Management.

Effective November 30, 2012, Hans-Ulrich Meister and Robert Shafir were appointed to jointly lead the newly created Private Banking & Wealth Management division. As regional CEO, Hans-Ulrich Meister continues to have responsibility for all businesses and clients in the Swiss region. Robert Shafir continues to serve as the CEO of the Americas region.

Effective November 30, 2012, Eric Varvel and Gaël de Boissard were appointed to jointly lead the Investment Banking division. In addition, Eric Varvel was appointed CEO of the Asia Pacific region and Gaël de Boissard took on responsibility as CEO of the Europe, Middle East and Africa (EMEA) region. Gaël de Boissard joined the Executive Board as of January 1, 2013.

As of November 30, 2012, Osama Abbasi stepped down from the Executive Board and his position as CEO of the Asia Pacific region, Walter Berchtold stepped down from the Executive Board and his position as Chairman Private Banking and Fawzi Kyriakos-Saad stepped down from the Executive Board and his position as CEO of the EMEA region.

The management changes reduced the size of the Executive Board from thirteen members at the end of 2011 to nine members, effective as of January 2013, by combining the divisional and regional CEO roles.

Members of the Executive Board

| | Appointed in | Role |
|--|--------------|----------------------------|
| December 31, 2012 | | |
| Brady W. Dougan, CEO | 2003 | Group CEO |
| Gaël de Boissard, Joint Head of Investment Banking and Regional CEO of EMEA ¹ | 2012 | Divisional & Regional Head |
| Romeo Cerutti, General Counsel | 2009 | Shared Services Head |
| Tobias Guldemann, CRO | 2004 | Shared Services Head |
| David R. Mathers, CFO and Head of IT and Operations | 2010 | Shared Services Head |
| Hans-Ulrich Meister, Joint Head of Private Banking & Wealth Management and Regional CEO of Switzerland | 2008 | Divisional & Regional Head |
| Robert S. Shafir, Joint Head of Private Banking & Wealth Management and Regional CEO of Americas | 2007 | Divisional & Regional Head |
| Pamela A. Thomas-Graham, Chief Talent, Branding and Communications Officer | 2010 | Shared Services Head |
| Eric M. Varvel, Joint Head of Investment Banking and Regional CEO of APAC | 2008 | Divisional & Regional Head |

¹ Appointed on November 20, 2012 as a new Executive Board member effective January 1, 2013.

Biographies of the Executive Board members

Brady W. Dougan

Born 1959

US Citizen

Gaël de Boissard

Born 1967

French Citizen

Brady W. Dougan has held the position of CEO since 2007 and has been a member of the Executive Board since 2003.

Prior to his appointment as CEO of the Group, Mr. Dougan was the CEO of the Investment Banking division and the CEO of the Americas region. After starting his career in the derivatives group at Bankers Trust, he joined Credit Suisse First Boston in 1990. He was the Head of the Equities division for five years before he was appointed the Global Head of the Securities division in 2001. From 2002 to July 2004, he was the Co-President of Institutional Securities at Credit Suisse First Boston, and from 2004 until 2005, he was CEO of Credit Suisse First Boston and, after the merger with Credit Suisse in May 2005, he was the CEO of Investment Banking until 2007.

Mr. Dougan received a BA in Economics in 1981 and an MBA in finance in 1982 from the University of Chicago, Illinois.

Mr. Dougan has been a member of the Board of Directors of Humacyte Inc., a biotechnology company, since 2005. He has also been a member of the Board of Trustees of the University of Chicago since January 2013.

Gaël de Boissard jointly leads the Investment Banking division together with Eric Varvel with responsibility for the Fixed Income business. He is also the CEO of the EMEA region. Gaël de Boissard was appointed as a member of the Executive Board, effective January 1, 2013.

Prior to his appointment to the Executive Board, Mr. de Boissard spent four years as the Co-Head of Global Securities with responsibility for trading and risk management of Fixed Income products and was previously responsible for Global Rates and Foreign Exchange. Mr. de Boissard joined Credit Suisse First Boston in 2001 from JP Morgan, where he worked in a variety of roles in Fixed Income, having started in the Paris office in 1990.

Mr. de Boissard graduated with a degree in Mathematics and Civil Engineering from Ecole Polytechnique in Palaiseau, France, and received a degree in Russian from the University of Volgograd.

Mr. de Boissard currently chairs the Association of Financial Markets in Europe, an industry organization that engages with policymakers on financial regulation.

Romeo Cerutti
Born 1962
Swiss and Italian Citizen

Romeo Cerutti has been the Group General Counsel and a member of the Executive Board since April 2009.

Prior to that, Mr. Cerutti was the General Counsel of the Private Banking division from 2006 to 2009 and the global Co-Head of Compliance of Credit Suisse from 2008 to 2009. Before joining Credit Suisse, Mr. Cerutti was a partner of the Group Holding of Lombard Odier Darier Hentsch & Cie, from 2004 to 2006, and the Head of Corporate Finance at Lombard Odier Darier Hentsch & Cie from 1999 to 2006. Prior to that position, Mr. Cerutti was in private practice as an attorney-at-law with Homburger Rechtsanwälte in Zurich from 1995 to 1999 and with Latham and Watkins in Los Angeles from 1993 to 1995.

Mr. Cerutti studied law at the University of Fribourg and obtained his doctorate in 1990. He was admitted to the bar of the canton of Zurich in 1989 and the bar of the state of California in 1992. Mr. Cerutti also holds a Master of Laws from the University of California, School of Law, Los Angeles.

Mr. Cerutti has been a member of the Board of Trustees of the University of Fribourg since 2006. He also currently represents Credit Suisse on the Board of the Swiss Bankers Association since December 2012.

Tobias Guldemann
Born 1961
Swiss Citizen

Tobias Guldemann has been the CRO of Credit Suisse since 2009 and a member of the Executive Board in the role of Group CRO since 2004.

Mr. Guldemann joined Credit Suisse's Internal Audit Department in 1986 before transferring to Investment Banking in 1990. He later became the Head of Derivatives Sales in 1992, the Head of Treasury Sales in 1993 and the Head of Global Treasury Coordination at Credit Suisse in 1994. In 1997, he became responsible for the management support of the CEO of Credit Suisse First Boston before becoming the Deputy CRO of Credit Suisse Group, a function he held from 1998 to 2004. From 2002 to 2004, he also served as the Head of Strategic Risk Management at Credit Suisse.

Mr. Guldemann studied Economics at the University of Zurich and received a doctorate from the same university in 1989.

Mr. Guldemann has been a member of the International Financial Risk Institute (IFRI) since 2010 and became a Member of the IFRI Executive Committee in 2011. He is also a member of the Board of Trustees of the Winterthur Art Museum.

**David R. Mathers****Born 1965****British Citizen****Hans-Ulrich Meister****Born 1959****Swiss Citizen**

David Mathers has been the CFO of Credit Suisse Group and a member of the Executive Board since October 2010. He is also responsible for the Group's global IT and global Operations functions.

Prior to his appointment as CFO, Mr. Mathers was the Head of Finance and the COO for Investment Banking in New York and London from 2007 to 2010. In this role, he was responsible for Investment Banking Finance, Operations, Expense Management and Strategy. Mr. Mathers started his career as a research analyst at HSBC James Capel in 1987 and became Global Head of Equity Research in 1997. He joined Credit Suisse in 1998, working in a number of senior positions in Credit Suisse's Equity business, including the Director of European Research and the Co-Head of European Equities.

Mr. Mathers holds an MA in Natural Sciences from the University of Cambridge, England. Since 2011, he has also served as a member of the Council of the British-Swiss Chamber of Commerce.

Hans-Ulrich Meister jointly leads the Private Banking & Wealth Management division together with Robert Shafir, with responsibility for the Private Banking business. He is also CEO of the Swiss region. Mr. Meister has been a member of the Executive Board since September 2008.

Between 2011 and 2012, Mr. Meister served as the CEO of Private Banking and from 2008 onward as the CEO of the Swiss region, a role he continues to hold. Before joining Credit Suisse in 2008, Mr. Meister spent 25 years with UBS. Among the roles he had were the Head of Corporate Banking Region Zurich from 1999 to 2002, the Head of Large Corporates and Multinationals from 2003 to 2005 and the Head of Business Banking from 2005 to 2007. From 2002 to 2003, he worked on group projects in the area of Wealth Management, based in New York. From 2004 to 2007, Mr. Meister was a member of UBS's Group Managing Board.

Mr. Meister graduated from the University of Applied Sciences in Zurich, in 1987, majoring in Economics and Business Administration. In addition, he attended Advanced Management programs at the Wharton School, University of Pennsylvania in 2000 and the Harvard Business School in 2002.

Mr. Meister has been a member of the Foundation Board of the Swiss Finance Institute since 2008. He has also been a member of the board of the Zurich Chamber of Commerce since 2010.

Robert S. Shafir

Born 1958

US Citizen

Robert Shafir jointly leads the Private Banking & Wealth Management division together with Hans-Ulrich Meister, with responsibility for Private Banking & Wealth Management Products. He is also the CEO of the Americas region. Mr. Shafir has been a member of the Executive Board since August 2007.

From 2008 until 2012, Mr. Shafir was the CEO of Asset Management and also held the position of the CEO of the Americas region between 2008 and 2010, reappointed to this role in 2012. Mr. Shafir joined Credit Suisse from Lehman Brothers in 2008, where he worked for 17 years, having served as the Head of Equities and a member of their Executive Committee. He also held other senior roles, including the Head of European Equities and the Global Head of Equities Trading, and played a key role in building Lehman's equities business into a global, institutionally focused franchise. Prior to that, he worked at Morgan Stanley in the preferred stock business within the fixed income division.

Mr. Shafir received a BA in Economics from Lafayette College, Pennsylvania, in 1980, and an MBA from Columbia University, Graduate School of Business, New York, in 1984.

Mr. Shafir is a member of the Board of Directors of the Cystic Fibrosis Foundation and the Dwight School Foundation.

Pamela A. Thomas-Graham

Born 1963

US Citizen

Pamela Thomas-Graham has been the Chief Talent, Branding and Communications Officer and a member of the Executive Board since January 2010.

Prior to joining the Group, Ms. Thomas-Graham was a Managing Director in the private equity group of Angelo, Gordon & Co., a New York-based investment management firm, from 2008 to 2010. She previously served as Group President of Liz Claiborne Inc.'s women's wholesale apparel business from 2005 to 2008. Ms. Thomas-Graham was at NBC for six years from 1999 to 2005, where she served as President, CEO and Chairwoman of CNBC television and a Director of CNBC International. She also served as the President and CEO of CNBC.com. Prior to that, she worked at McKinsey & Company for ten years from 1989 to 1999.

Ms. Thomas-Graham obtained a BA in Economics from Harvard University, Massachusetts, in 1985, a JD from Harvard Law School in 1989 and an MBA from Harvard Business School in 1989.

Ms. Thomas-Graham is a member of the Board of Directors of the Clorox Company and a member of the Board of Governors of the Parsons School of Design. She is also a member of the Council on Foreign Relations, the Economic Club of New York, the Trustees Education Committee of the Museum of Modern Art and the Business Committee of the Metropolitan Museum of Art. In addition, she is a member of the board of the New York Philharmonic.

**Eric M. Varvel**

Born 1963

US Citizen

Eric Varvel jointly leads the Investment Banking division together with Gaël de Boissard, with responsibility for the Equities & Investment Banking business. He is also the CEO of Asia Pacific region. Eric Varvel has been a member of the Executive Board since February 2008.

From 2010 until 2012, Mr. Varvel was the CEO of Investment Banking and served as acting CEO from September 2009 until July 2010. From 2008 until 2010, Mr. Varvel was the CEO of the EMEA region. Prior to his appointment to the Executive Board in 2008, he was the Co-Head of the Global Investment Banking department and the Head of the Global Markets Solutions Group in the Investment Banking division of Credit Suisse for over three years, based in New York. Before that, Mr. Varvel spent 15 years in the Asia Pacific region in a variety of senior roles, including the Head of Investment Banking and Emerging Markets Coverage for the Asia Pacific region ex-Japan and the Head of Fixed Income Sales and Corporate Derivative Sales. During that time, Mr. Varvel was based in Tokyo, Jakarta and Singapore. Mr. Varvel joined Credit Suisse in 1990. Previously, he worked as an analyst for Morgan Stanley in its investment banking department in New York and Tokyo.

Mr. Varvel holds a BA in Business Finance from Brigham Young University, Utah.

Since 2010, Mr. Varvel has been a member of the Board of Directors of the Qatar Exchange.

Additional information

Changes in control and defense measures

Duty to make an offer

Swiss law provides that anyone who, directly or indirectly or acting in concert with third parties, acquires 33⅓% or more of the voting rights of a listed Swiss company, whether or not such rights are exercisable, must make an offer to acquire all of the listed equity securities of such company, unless the AoA of the company provides otherwise. Our AoA does not include a contrary provision. This mandatory offer obligation may be waived under certain circumstances by the Swiss Takeover Board or FINMA. If no waiver is granted, the mandatory offer must be made pursuant to procedural rules set forth in the SESTA and the implementing ordinances.

Clauses on changes in control

Subject to certain provisions in the Group's employee compensation plans which allow for the Compensation Committee or Board to determine the treatment of outstanding awards for all employees in the case of a change in control, there are no provisions that require the payment of extraordinary benefits in the case of a change in control in the agreements and plans benefiting members of the Board and the Executive Board or any other members of senior management. Specifically, there are no contractually agreed severance payments in the case of a change in control of the Group.

In the case of a change in control, the treatment of outstanding awards for all employees, including Executive Board members, will be determined by the Compensation Committee or the Board. In the case of a change in control, there are no provisions in the employment contracts of Executive Board members that require the payment of any type of extraordinary benefits, including special severance awards.

Internal and external auditors

Auditing forms an integral part of corporate governance at the Group. Both internal and external auditors have a key role to play by providing an independent assessment of our operations and internal controls.

Internal Audit

Our Internal Audit function comprises a team of around 250 professionals, substantially all of whom are directly involved in auditing activities. Effective November 2012, Martyn Scrivens was appointed as the new Head of Internal Audit and successor to Heinz Leibundgut, who has retired from the Group. As Head of Internal Audit, Martyn Scrivens reports directly to the Audit Committee chairman.

Internal Audit performs an independent and objective assurance and consulting function that is designed to add value to our operations. Using a systematic and disciplined approach, the Internal Audit team evaluates and enhances the effectiveness of our risk management, control and governance processes.

Internal Audit is responsible for carrying out periodic audits in line with the Regulations of Internal Audit approved by the Audit Committee. It regularly and independently assesses the risk exposure of our various business activities, taking into account industry trends, strategic and organizational decisions, best practice and regulatory matters. Based on the results of its assessment, Internal Audit develops detailed annual audit objectives, defining areas of audit concentration and specifying resource requirements for approval by the Audit Committee.

As part of its efforts to achieve best practice, Internal Audit regularly benchmarks its methods and tools against those of its peers. In addition, it submits periodic internal reports and summaries thereof to the management teams as well as the Chairman and the Audit Committee chairman. The Head of Internal Audit reports to the Audit Committee at least quarterly

and more frequently as appropriate. Internal Audit coordinates its operations with the activities of the external auditor for maximum effect.

External auditors

Our statutory auditor is KPMG AG (KPMG), Badenerstrasse 172, 8004 Zurich, Switzerland. The mandate was first given to KPMG for the business year 1989/1990. The lead Group engagement partners are Anthony Anzevino, Global Lead Partner (since 2012); Simon Ryder, Group Engagement Partner (since 2010); and Mirko Liberto, Leading Bank Auditor (since 2012).

In addition, we have mandated BDO AG, Fabrikstrasse 50, 8031 Zurich, Switzerland, as special auditor for the purposes of issuing the legally required report for capital increases in accordance with Article 652f of the Swiss Code of Obligations, mainly relating to the valuation of companies in consideration of the qualified capital increases involving contributions in kind.

The Audit Committee monitors and pre-approves the fees to be paid to KPMG for its services.

Fees paid to external auditors

| | 2012 | 2011 | % change |
|---|------|------|----------|
| Fees paid to external auditors (CHF million) | | | |
| Audit services ¹ | 39.7 | 40.3 | (1) |
| Audit-related services ² | 6.5 | 7.0 | (7) |
| Tax services ³ | 5.6 | 6.9 | (19) |

¹ Audit fees include the integrated audit of the Group's consolidated and statutory financial statements, interim reviews and comfort and consent letters. Additionally it includes all assurance and attestation services related to the regulatory filings of the Group and its subsidiaries. ² Audit-related services are primarily in respect of: (i) reports related to the Group's compliance with provisions of agreements or calculations required by agreements; (ii) accounting advice; (iii) audits of private equity funds and employee benefit plans; and (iv) regulatory advisory services. ³ Tax services are in respect of tax compliance and consultation services, including: (i) preparation and/or review of tax returns of the Group and its subsidiaries; (ii) assistance with tax audits and appeals; and (iii) confirmations relating to the Qualified Intermediary status of Group entities.

KPMG attends all meetings of the Audit Committee. At each meeting, KPMG reports on the findings of its audit and/or interim review work. The Audit Committee reviews on an annual basis KPMG's audit plan and evaluates the performance of KPMG and its senior representatives in fulfilling its responsibilities. Moreover, the Audit Committee recommends to the Board the appointment or replacement of the external auditor, subject to shareholder approval as required by Swiss law.

KPMG provides a report as to its independence to the Audit Committee at least once a year. In addition, our policy on the engagement of public accounting firms, which has been approved by the Audit Committee, strives to further ensure an appropriate degree of independence of our external auditor.

The policy limits the scope of services that the external auditor may provide to us or any of our subsidiaries in connection with its audit and stipulates certain permissible types of non-audit services, including audit-related services, tax services and other services that have been pre-approved by the Audit Committee. The Audit Committee pre-approves all other services on a case-by-case basis. In accordance with this policy and as in prior years, all KPMG non-audit services provided in 2012 were pre-approved. KPMG is required to report to the Audit Committee periodically regarding the extent of services provided by KPMG and the fees for the services performed to date.

American Depositary Share fees

Fees and charges for holders of ADS

In accordance with the terms of the Deposit Agreement, Deutsche Bank Trust Company Americas, as depositary for the ADS (the Depositary), may charge holders of our ADS,

either directly or indirectly, fees or charges up to the amounts described below. In June 2011, after a competitive bid process, the Group signed an engagement letter renewing the term of Deutsche Bank Trust Company Americas as Depositary for an additional five years.

Fees and charges for holders of ADS

Fees

| | |
|--|---|
| USD 5 (or less) per 100 ADS (or portion thereof) | For the issuance of ADS, including issuances resulting from a distribution of shares, share dividends, share splits and other property; for ADS issued upon the exercise of rights; and for the surrender of ADS for cancellation and withdrawal of shares. |
| USD 2 per 100 ADS | For any distribution of cash to ADS registered holders, including upon the sale of rights or other entitlements. |
| Registration or transfer fees | For the transfer and registration of shares on our share register to or from the name of the Depositary or its agent when the holder deposits or withdraws shares. |

Charges

| | |
|--------------------------------------|---|
| Expenses of the Depositary | For cable, telex and facsimile transmissions (when expressly provided in the deposit agreement); and for converting foreign currency to US dollars. |
| Taxes and other governmental charges | Paid, as necessary, to the Depositary or the custodian who pays certain charges on any ADS or share underlying an ADS, for example, stock transfer taxes, stamp duty or applicable interest or penalty thereon. |
| Other charges | Paid, as necessary, to the Depositary or its agents for servicing the deposited shares. |

The Depositary collects its fees for the delivery and surrender of ADS directly from investors depositing shares or surrendering ADS for the purpose of withdrawal or from intermediaries acting for them. The Depositary collects fees for making distributions to holders by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees. The Depositary may generally refuse to provide fee services until its fees for those services are paid.

Amounts paid by the Depositary to the Group

In 2012, the Depositary reimbursed the Group USD 49,179 for NYSE listing fees. Under the Group's new engagement letter, the Depositary has agreed to make certain payments to the Group in 2012 and thereafter. In 2012, these fees amounted to USD 1,200,000 for expenses relating to its American Depositary Receipt program. The Depositary has also contractually agreed to provide certain ADS program-related services free of charge.

Under certain circumstances, including removal of the Depositary or termination of the ADS program by the Group,

the Group is required to repay certain amounts paid to the Group and to compensate the Depositary for payments made or services provided on behalf of the Group.

Liquidation

Under Swiss law and our AoA, we may be dissolved at any time by a shareholders' resolution which must be passed by:

- a supermajority of at least three quarters of the votes cast at the meeting in the event we are to be dissolved by way of liquidation; and
- a supermajority of at least two thirds of the votes represented and an absolute majority of the par value of the shares represented at the meeting in other events.

Dissolution by court order is possible if we become bankrupt. Under Swiss law, any surplus arising out of liquidation (after the settlement of all claims of all creditors) is distributed to shareholders in proportion to the paid-up par value of shares held.

Compensation

Dear shareholders,

We are pleased to present our Compensation Report in respect of the reporting year 2012 to our shareholders and request your support through the advisory vote at the Annual General Meeting. We are committed to a responsible performance culture, which rewards progress towards our aspiration of strengthening Credit Suisse as a leading, integrated financial services provider and balances the interests of employees and shareholders.

During 2012, we focused on a review and revision of our executive compensation structure. To this end, we solicited and carefully reviewed feedback from our shareholders in respect of the structure of compensation at Credit Suisse, focusing on the compensation of senior executives, as well as the general concerns regarding the alignment of pay for performance in our industry. As a result of this analysis, we have restructured the incentive compensation for members of the Executive Board. We decided to:

- introduce individual target levels of compensation for each Executive Board member, based on the philosophy of paying market competitive compensation if challenging performance targets are achieved;
- introduce caps on the amount of compensation that can be awarded to each Executive Board member upon significantly exceeding the performance targets, set at levels to motivate performance while still being within the range of market levels of compensation;
- separate the granting of short and long-term incentive awards, where the short-term incentive awards aim to reward executives for their achievements in the prior year, while also discouraging future negative performance through the use of clawback provisions; and
- introduce new long-term incentive awards, which aim to motivate outstanding performance in the future and are clearly linked to meeting challenging financial goals.

The introduction of new long-term incentive awards reflects our commitment to pay for performance, with an emphasis on a long-term and sustainable creation of shareholder value. Recipients will only earn the full value of deferred awards if explicit and transparent performance conditions, linked to relative total shareholder return and return on equity, are met over the full five-year period. The targets and caps provide that the combined short and long-term incentive compensation granted to any executive stay within the range of what the

Compensation Committee has determined to be an appropriate pay level for that particular executive's role.

Granting a substantial part of variable compensation in deferred share-based awards aligns the interests of employees and shareholders and meets expectations of regulators. The delivery of these awards in new shares has been a core component of our capital plan over the last two years to meet the changed regulatory requirements. However, we are mindful of the potential dilutive impact to shareholders and we expect to revert to our previous practice of buying shares in the market to meet these delivery obligations after our Look-through Swiss Core Capital ratio exceeds 10%.

While we focused on executive compensation in 2012, in 2013 the Compensation Committee will look to review and rebalance the mix of share-linked and cash-linked deferred compensation for the broader employee population, including the performance criteria of our current share awards. At the same time, we will assess the implications of emerging regulations, including the new initiative recently approved by voters in Switzerland with regard to a binding say on the pay for the executive boards and boards of directors as well as the recently proposed EU rules on compensation. Further, we believe in the equitable sharing of the future economic gains of Credit Suisse between its shareholders and its employees, and we will work to achieve a better balanced distribution to this effect going forward.

The Compensation Committee is satisfied that this report reflects the manner in which it has reviewed and set compensation for 2012 and it is in line with the specific remuneration disclosure requirements issued by the Swiss Financial Market Supervisory Authority. The activities of the Compensation Committee were executed in accordance with its mandate under the Credit Suisse Organizational Guidelines and Regulations and the Compensation Committee charter.

Aziz R.D. Syriani
Chairman of the Compensation Committee
Member of the Board of Directors
March 2013

Compensation Report 2012 – Overview

This compensation report explains our compensation approach and provides our compensation disclosure for 2012. It is composed of the following sections:

- Compensation governance;
- Executive Board compensation;
- Board of Directors compensation; and
- Group compensation.

The Group is committed to fair, balanced and performance-based compensation practices that align long-term employee and shareholder interests.

As in recent years, shareholder interest in the structure and pay levels for bank executives remained high in 2012. In consideration of shareholder input and emerging practices for executive compensation in the industry, the Group implemented significant changes to the compensation approach for the Executive Board. Key changes include the introduction of individual targets and caps for the determination of compensation for Executive Board members and a new structure for their incentive award plans (incentive compensation), which now consists of an unrestricted cash payment and a short-term incentive (STI) award, with vesting over a three year period, and a new separate long-term incentive (LTI) award, with vesting over a five year period. The STI awards are deferred share-based awards subject to clawback in the event of negative business performance. The LTI awards are deferred cash-based awards subject to pre-defined, challenging performance vesting conditions linked to Group relative total shareholder return (RTSR) and underlying return on equity (ROE). As in prior years, Executive Board members remain subject to minimum Group shareholding requirements

and their contracts contain no provisions that provide for special payments or other benefits upon termination.

For employees who are not members of the Executive Board, the 2012 structure is similar to that of 2011. Consistent with past practice and in line with the expectations of regulators, we granted a substantial portion of deferred discretionary variable incentive awards (variable compensation) for 2012 as share-based awards. The share awards granted for 2012 are the same as those granted for 2011. All share awards vest over three years and a portion of the share awards granted to managing directors and certain other groups of employees are subject to clawback in the event of negative performance. Other deferred variable compensation was awarded in the form of Plus Bonds, a new plan granted principally to managing directors and directors in Investment Banking. Plus Bonds, which are linked to a portfolio of asset-backed securities that originated in and continues to be managed by Investment Banking should also be viewed within the context of the Group's capital strategy and applicable regulatory capital requirements as they constitute a risk transfer from the Group to the Plus Bond holders and thus contribute to the reduction of the Group's risk-weighted assets. Managing directors and directors in Investment Banking received the cash portion of their variable compensation in the form of Restricted Cash Awards, which are cash payments that are subject to repayment under certain termination conditions.

For the Group overall, total compensation and benefits expense for 2012 was CHF 12.5 billion, down 5% compared to 2011, which includes the impact of lower salaries, reflecting lower headcount in 2012. Variable compensation awarded for 2012 (including incentive compensation granted to members of the Executive Board) was CHF 3.4 billion, which was awarded in aggregate as 35% unrestricted cash and 65% deferred awards.

2012 revised compensation approach for the Executive Board

Responsible

- Introduction of individual targets and caps
- Targets/caps expressed as multiples of base salary and per incentive award plan
- Overall pool capped at 2.5% of Group underlying net income

Long-term orientation

- Separate short-term and long-term incentive award plans
- New long-term incentive award plan vesting over five years after grant, payable starting three years after grant, subject to explicit performance vesting conditions

Performance-linked

- Individual awards subject to weighted performance assessments, based on Group, divisional and individual performance
- Short-term incentive awards subject to clawback for negative business performance
- Vesting of long-term incentive awards linked to relative total shareholder return and underlying return on equity

The variable compensation awards for 2012 reflect the improved underlying results of the Group compared to 2011. Group underlying pre-tax income increased 111% to CHF 5.0 billion in 2012 from CHF 2.4 billion in 2011 and underlying ROE was 10% for 2012, up from 5.5% in 2011. The Group's underlying results are non-GAAP financial measures that exclude valuation impacts from movements in own credit spreads and certain other significant items included in our reported results. Without excluding these significant non-operating items, the largest of which is fair value losses on own debt of CHF 2.9 billion due to the improvement of our own credit spreads, our reported Core pre-tax income for 2012 was CHF 1.9 billion, compared to CHF 2.7 billion in 2011, while reported ROE was 3.9% compared to 6.0% in 2011. The Compensation Committee regards the underlying results to be a more accurate reflection of the Group's operating performance than reported results, in particular because the largest component, fair value gains/(losses) on our own debt, is inversely related to movements in our own credit spreads, generating gains when credit spreads widen and losses when credit spreads narrow.

- ▶ Refer to "Reconciliation of underlying results" in Executive Board compensation – Performance evaluation for 2012 for the a reconciliation of underlying results to the most directly comparable US-GAAP measures and other related disclosures.

Incentive compensation awarded to members of the Executive Board for 2012 comprised CHF 13.6 million in the form of unrestricted cash, CHF 21.0 million as STI awards and a further CHF 15.4 million as LTI awards. The average incentive compensation awarded to members of the Executive Board for 2012 was CHF 1.1 million in unrestricted cash, CHF 1.7 million as STI awards and CHF 1.3 million as LTI awards. Incentive compensation awarded to the Chief Executive Officer (CEO) for 2012 was CHF 0.5 million in unrestricted cash, CHF 2.5 million as an STI award and CHF 2.0 million as an LTI award. The level of the incentive compensation was granted to members of the Executive Board and the CEO for 2012 in consideration of the Group's improved underlying results, the substantial strengthening of the Group's capital position achieved in 2012 and the significant progress made to adapt the business and organization to the new regulatory requirements, changing client demands and the current market environment.

Compensation governance

Compensation objectives

The Group's ability to implement a comprehensive human capital strategy and to attract, retain, reward and motivate talented individuals is fundamental to the Group's long-term success. Compensation is a key component of this strategy and aims to align employee and shareholder interests. The Group is committed to responsible compensation practices and plans that balance the need to reward our employees fairly and competitively based on performance while promoting principled behavior and actions. The Group's objectives are to maintain a compensation policy that:

- supports a performance culture that is based on merit and differentiates and rewards excellent performance, both in the short and long term, and recognizes our company values;
- enables the Group to attract and retain employees and motivate them to achieve results with integrity and fairness;
- balances the mix of fixed compensation and variable compensation to appropriately reflect the value and responsibility of the role the employees perform day to day and to influence appropriate behaviors and actions;
- is consistent with and promotes effective risk management practices and the Group's compliance and control culture;
- fosters teamwork and collaboration across the Group;
- takes into account the capital position and long-term performance of the Group in order to create sustainable value for our shareholders; and
- is reviewed regularly and endorsed by an independent Compensation Committee.

Consistent with these objectives, the Group applies a total compensation approach based on fixed compensation and variable compensation. Fixed compensation includes base salary, which reflects seniority, experience, skills and market practice. Variable compensation is awarded annually at the discretion of the Group and varies depending on Group, divisional and individual performance. The percentage mix between fixed and variable compensation varies according to the employee's seniority, business and location and is an important consideration in determining total compensation, in particular for the Group's most senior employees.

Compensation Committee

The Compensation Committee of the Board of Directors (Board) is the supervisory and governing body for compensation policy, practices and plans within the Group and is responsible for determining, reviewing and proposing compensation for approval by the Board. The Compensation Committee consists of not fewer than three independent members of the Board. The members of the Compensation Committee are Aziz

R.D. Syriani (chairman), Robert H. Benmosche, Iris Bohnet, Walter B. Kielholz and Jean Lanier. Based on the criteria for determining independence under the Swiss Code of Best Practice for Corporate Governance and the rules of the New York Stock Exchange and the Nasdaq Stock Market, the Board has determined all five members of the Compensation Committee to be independent.

- Refer to “Independence” in Corporate Governance – Board of Directors for more information on how the Group determines the independence of its Board members.

The Compensation Committee has appointed Johnson Associates, Inc., a global compensation consulting firm, to assist it in ensuring that the Group's compensation program remains competitive and is responsive to regulatory developments and in line with its compensation approach. Johnson Associates, Inc. is independent from the Group's management and does not provide any services to the Group other than supporting the Compensation Committee. The Compensation Committee has appointed Nobel & Hug as external legal counsel. In 2012, the Compensation Committee retained Fehr Advice & Partners AG, a Swiss-based consulting firm, to advise on the redesign of the compensation approach for the Executive Board.

The Compensation Committee is required to meet at least four times per year, but in practice meets more often. During 2012, the Compensation Committee held ten meetings. The Compensation Committee chairman decides on the attendance of management, the compensation consultants and external legal counsel at the committee meetings. The committee meets each January for the primary purpose of reviewing the performance of the businesses and the respective management teams for the previous year and recommending to the Board for approval the overall compensation pools for the divisions and the compensation payable to the members

of the Board, the CEO and the head of Internal Audit. The Compensation Committee also reviews the performance of and determines compensation for members of the Executive Board and certain other members of senior management. During its performance review, the Compensation Committee considers input from the Group's internal control functions, including Risk Management, Legal and Compliance and Internal Audit, regarding control and compliance issues, including any breaches of relevant rules and regulations or the Group's Code of Conduct. The Audit Committee provides input to the Compensation Committee for its performance review with respect to control and compliance matters. Specifically, the Audit Committee reviews the impact on the recommended amount of variable compensation of individuals who have been subject to the Group's disciplinary process. In line with the process established in 2011 and in response to specific regulatory guidelines regarding compensation for employees engaged in risk-taking activities, the Compensation Committee also reviews and approves the compensation for Group employees identified as ◉ material risk takers and controllers (MRTC), who are employees whose activities are considered to have a potentially material impact on the Group's risk profile. The Risk Committee is involved in the review process for MRTC and also provides input to the Compensation Committee with respect to risk considerations in the compensation process. The chairmen of the Risk Committee and the Audit Committee attend the Compensation Committee meeting in January.

The following table sets forth the approval authority for determining compensation policy and setting compensation for different groups of employees, as stipulated within the Group's Organizational Guidelines and Regulations (OGR) and the Compensation Committee charter (available on our website at www.credit-suisse.com/governance).

Approval authority

| Approval grid | Authority |
|---|--|
| Establishment or amendment of the Group's compensation policy | Board upon recommendation by the Compensation Committee |
| Establishment or amendment of compensation plans | Board upon recommendation by the Compensation Committee |
| Setting variable compensation pools for the Group and the divisions | Board upon recommendation by the Compensation Committee |
| Board compensation (including the Chairman's compensation) ¹ | Board upon recommendation by the Compensation Committee |
| Compensation of the CEO | Board upon recommendation by the Compensation Committee |
| Compensation of other Executive Board members | Compensation Committee with information to the Board |
| Compensation for the Head of Internal Audit | Compensation Committee upon consultation of the Audit Committee Chairman |
| Compensation for MRTC | Compensation Committee |
| Compensation for other selected members of management | Compensation Committee |

¹ In the case of the Chairman's compensation and the additional fees for the committee chairmen, the Board member concerned does not participate in the decision involving his or her own compensation. In the case of other Board members, compensation consists of a base fee plus a fee that may differ from committee to committee. The Compensation Committee recommends the base fee and committee fee amounts to the full Board for approval.

During 2012, the Board, upon recommendation of the Compensation Committee, approved a new approach for compensation of the Executive Board and endorsed other modifications to our compensation policy to ensure our plans remain in line with peers and permit compliance with evolving regulations. The Compensation Committee's main focus areas during 2012 were:

- developing and approving a new compensation approach for the Executive Board for 2012 and beyond, aimed at addressing key issues raised by shareholders and emerging best practice among peer companies;
- maintaining an active dialogue and consulting with our principal regulators about our compensation plans, as well as monitoring global regulatory and market trends with respect to compensation at financial institutions;
- continuing to engage with shareholders and shareholder groups regarding our compensation governance and plans;
- further enhancing the compensation process for covered employees in line with regulatory guidance; and
- increasing the transparency of our compensation disclosure, in particular with respect to compensation for members of the Executive Board.

Compensation policy

The Group maintains a comprehensive compensation policy, which formalizes our compensation principles and related processes and provides the foundation for sound compensation practices that support the Group's long-term strategic objectives. The compensation policy is approved by the Board. The compensation policy adheres to the compensation principles set out by our regulator in Switzerland, the Swiss Financial Market Supervisory Authority (FINMA), and our other main regulators and applies to all employees and compensation plans of the Group. The compensation policy is periodically updated and all revisions are approved by the Board. In 2012, to address the request of regulators, in particular the US Federal Reserve (Fed), we expanded the policy regarding MRTC and certain other US employees with more clear and documented procedures for granting variable compensation to these employees. These revisions provide guidelines for setting risk-adjusted compensation and require training for all managers of covered employees with responsibility for compensation recommendations. The revisions also provide guidelines on malus provisions that can lead to the clawback of compensation. The Group's compensation policy is available on our website at www.credit-suisse.com/compensation.

The compensation policy also includes implementation standards, which provide managers and employees with a detailed description of our principles, programs and the defined standards and processes relating to the development, management, implementation and governance of compensation. The implementation standards and the guidelines related to covered employees are published internally and accessible to all employees.

Impact of regulation on compensation

Many regulators across the world relevant to the Group, including FINMA, continue to focus on compensation. The requirements of FINMA apply to the Group on a global basis, while the requirements of other regulators generally only apply in respect of operations of the Group in a specific location. Several regulators, such as regulators in the US, the EU and the UK, impose provisions that diverge from the principles set forth in the Circular on Remuneration Schemes, which was issued by FINMA and which our plans comply with on a global basis. To the extent jurisdictional requirements diverge, we adapt our local plans in order to comply with local requirements, which generally results in additional terms, conditions and processes being implemented in the relevant locations.

The Group continuously monitors regulatory and legislative developments in all applicable jurisdictions, as well as industry best practices in compensation and guidance issued by various bodies including the Financial Stability Board, the Committee of European Banking Supervisors, the Group of Twenty Financial Ministers and Central Bank Governors and the Basel Committee on Banking Supervision.

On March 3, 2013, Swiss citizens approved the so-called "Minder Initiative", intended to strengthen shareholder rights. The initiative requires legislation be passed to impose board and executive compensation-related requirements on Swiss public companies, including requiring a binding (rather than advisory) shareholder vote on total board and total executive management compensation and prohibiting severance payments, salary prepayments and payments related to the acquisition or disposal of companies. The initiative also provides that the board members, the board chairperson and the compensation committee members be directly elected by shareholders annually. Further, the initiative calls for criminal sanctions in case of noncompliance. The Federal Council will have one year to issue a transitional ordinance which will be applicable until the Swiss Parliament passes the new law. Timing for the final implementation of the initiative is currently undetermined.

Executive Board compensation

The new approach for Executive Board compensation that was introduced during 2012 was designed to ensure that the Group is in line with best practice among peer companies and to address requirements of regulators and shareholder feedback, while motivating outstanding performance from our executives.

The key features of the new approach to Executive Board compensation are:

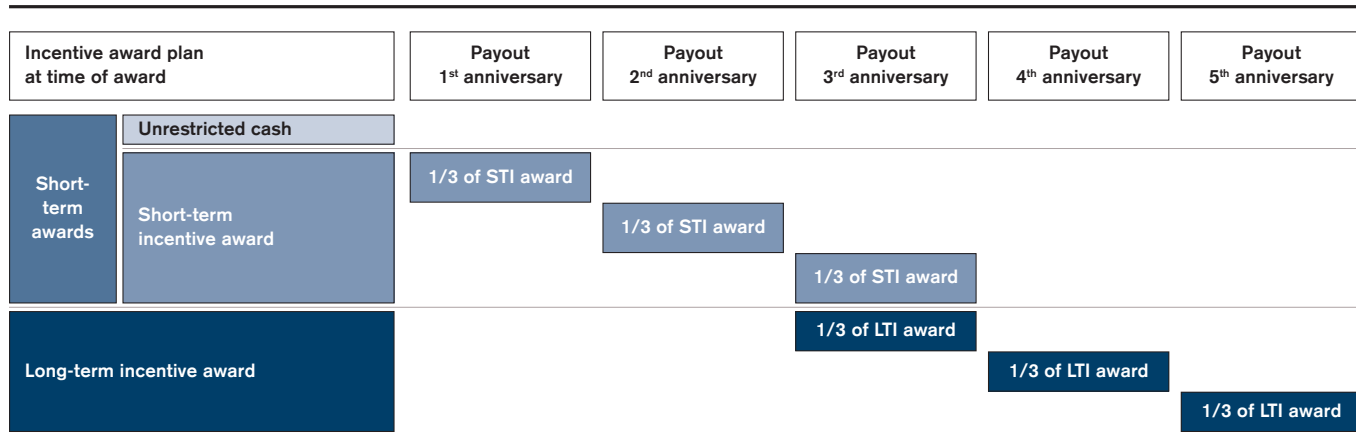

- A new structure for incentive compensation consisting of short-term awards and a separate long-term incentive award;
- Short-term awards in the form of unrestricted cash and a deferred STI award, with vesting over a three-year period,

subject to clawback in the event of negative business performance;

- A new deferred LTI award, which vests over a five-year period, payable starting on the third anniversary of the grant date and subject to predefined and challenging performance vesting conditions linked to the subsequent economic and market performance of the Group; and
- The introduction of clear compensation target levels and caps for each Executive Board member, linked to predefined performance criteria, expressed as multiples of base salary and for each incentive award plan.

An overview of the vesting timeline for the Executive Board short-term and long-term award plans is shown below.

Executive Board incentive award plan vesting timeline

Unrestricted cash

Unrestricted cash awards are short-term incentive awards, payable in cash after grant, which are intended to recognize the Executive Board members' performance for the most recent prior year.

Short-term incentive (STI) award

STI awards are granted in the form of performance share awards, which are deferred over three years and subject to clawback. The clawback results in a negative adjustment to the outstanding awards depending on the performance of the most recent prior year in the following circumstances:

- If the Group reports a negative underlying ROE, the number of outstanding awards is reduced by the same percentage as the negative underlying ROE;
- For the heads of the divisions reporting a pre-tax loss, the awards are reduced by 15% per CHF 1 billion of loss and the calculation of the reduction is performed on a pro-rata basis, based on the actual loss amount;

- In the case of both a negative underlying ROE and a divisional pre-tax loss, the negative adjustment is the greater of the negative underlying ROE and 15% per CHF 1 billion of loss adjustments;
- For the CEO and Executive Board members heading a Shared Services function, the clawback for negative performance will affect outstanding awards only if the Group has a negative underlying ROE; and
- If the general malus provision is triggered, the Group may cancel outstanding awards. In the case of Executive Board members, the general malus provision can be applied in a wide range of situations, including in the event of adverse individual, divisional or firm-wide factors, such as (but not limited to) any activity that is materially detrimental to the Group, that causes or could cause the Group or any of its divisions or regions to suffer reputational risk or a significant downturn in financial performance or capital base, or a significant failure of risk management.

The final number of STI awards delivered to Executive Board members will be the original number of awards granted or, if a clawback is triggered prior to vesting, a lower number. There are no circumstances under which the outstanding STI awards are increased. The value of the STI awards at delivery is solely dependent on the Group share price.

- ▶ Refer to "Potential downward adjustments of performance share awards and STI" in Group compensation – Compensation design – Deferred variable compensation instruments – Performance share awards for specific downward adjustments to be applied.

Long-term incentive (LTI) award

LTI awards are granted in the form of cash awards, which are deferred over a period of five years and vest in three tranches, one on each of the third, fourth and fifth anniversaries of the date of grant, subject to pre-defined performance vesting conditions. The amount due at vesting is determined based on the following performance criteria and conditions, which are measured on a tranche by tranche basis over the three calendar years preceding the year in which vesting occurs:

- Average of the RTSR achieved during each of the three years prior to vesting, calculated by reference to the average total shareholder return achieved by a group of peer firms, is the primary performance metric; and
- Average underlying ROE achieved during the three years prior to vesting compared to the ROE targets set for the respective years acts as a further adjustment, increasing or decreasing the amount payable by up to 25%.
- The amount payable at vesting of each tranche is subject to a cap of 200% of the initial LTI award value for that tranche.

RTSR is our total shareholder return compared to the average total shareholder return of our peers. Total shareholder return is calculated as equal to the appreciation or depreciation of a particular share, plus any dividends, over a given period, expressed as a percentage of the share's value at the beginning of the three-year measurement period. The peer group used for the RTSR calculation is the same group of twelve peer firms defined below. The RTSR achievement level can increase or decrease the amount due on a sliding scale basis and is subject to a cap as follows:

- Achievement of average RTSR of 150% (where the Group RTSR is 50% greater than that of the peer group) or greater results in a maximum upward adjustment of 100% (cap);
- Achievement of average RTSR of 100% (where the Group RTSR is the same as that of the peer group) results in an LTI payout that equals the grant value (no upward or downward adjustment);

- Achievement of RTSR of 50% (where the Group RTSR falls 50% below that of the peer group) or below results in the forfeiture of the respective LTI awards (downward adjustment of 100%); and
- Achievement of average RTSR between 50% and 150% of that of the peer group results in an upward or downward adjustment between negative 100% and positive 100%, applied on a sliding scale basis.

Following the RTSR calculation above, the amount payable is subject to a further upward or downward adjustment of up to 25%, depending on the average underlying ROE achieved during the three years prior to vesting compared to the underlying ROE targets approved for the corresponding years. The maximum upward adjustment of 25% applies if the average underlying ROE achieved is 200% of the target. The ROE adjustment, however, cannot increase the amount payable beyond two times the initial award.

The LTI is a deferred cash award. However, the Group retains the right to settle the LTI awards in shares at its discretion. In such a case, the amount of shares delivered in the year of vesting is based on the Group share price at the time of settlement.

Targets and caps for Executive Board members

Under the new structure, the Compensation Committee establishes individual targets and caps for each Executive Board member. An award at the target level is conditional upon the achievement of challenging performance goals, measured in terms of pre-defined performance criteria. If performance goals are exceeded, an amount above the target level can be awarded, but it may not exceed the cap. If performance goals are not met, awards will be below target and can be reduced to zero. The targets are determined by reference to estimated market levels of compensation for each individual role when matched against a group of peers, so that the individual target levels are aligned with competitive pay levels for comparable roles in the market. The caps are set at a premium over the target, again matched against peers, in order to provide suitable motivation for outstanding performance. The market data on executive compensation levels is provided to the Compensation Committee by its independent compensation advisor Johnson & Associates. The targets and caps for incentive compensation awards are expressed as multiples of base salary for each Executive Board member and in terms of the different incentive award plans (unrestricted cash, STI awards and LTI awards). Depending on the performance achieved, an Executive Board member can be awarded an amount of incentive compensation that is between zero and his or her cap for each incentive award plan. If the performance achieved is fully

in line with the member's objectives, the member will be awarded the target amount of incentive compensation for each incentive award plan. Based on the overall assessment of the Group's performance by the Compensation Committee, and in consideration of individual contributions, the Compensation Committee retains discretion in determining the final amounts awarded to the Executive Board for individual members and in aggregate. Nonetheless, the sum of all the incentive compensation awards for the Executive Board remains subject to an overall cap of 2.5% of Group underlying net income, irrespective of individual performance.

2012 targets, caps and performance criteria

For 2012, the Compensation Committee approved individual target and cap levels for the CEO and the Executive Board members as of the end of 2012 (eight individuals), as summarized in the table below. The annual 2012 base salary was CHF 2.5 million for the CEO and CHF 1.5 million or the US dollar equivalent for other Executive Board members, which remained unchanged from the prior year respectively. For 2012, the incentive compensation was granted in the proportion of 10%/50%/40% for the unrestricted cash, STI award and LTI award, respectively. This corresponds to a deferral rate of 90% for Executive Board members, which is the maximum deferral rate applied to employees Group wide. No Executive Board member was awarded his or her cap level for 2012.

2012 targets and caps for Executive Board members

| | Target levels | | Cap levels | |
|-----------------------------------|-------------------------------------|-----|-------------------------------------|-----|
| | Average for Executive Board members | CEO | Average for Executive Board members | CEO |
| Multiples of base salaries | | | | |
| Short-term awards | | | | |
| Unrestricted cash | 0.3 | 0.3 | 0.4 | 0.5 |
| Short-term incentive award | 1.6 | 1.4 | 2.2 | 2.2 |
| Long-term incentive award | 1.3 | 1.2 | 1.8 | 1.8 |

2012 performance criteria

The Compensation Committee approved criteria to measure the performance of Executive Board members in 2012 in terms of the performance of the Group and the respective business division or Shared Services function for which the individual was responsible. The performance criteria and their weightings for 2012 were as follows:

Group performance (40%):

- Group performance was evaluated on the basis of pre-tax income and ROE, both measured on an underlying basis at year-end compared to the 2012 targets, which were defined in the Group's 2012 financial plan and approved by the Board.

Divisional and individual performance (40%):

- Divisional financial performance: financial performance of the divisions was evaluated primarily on the basis of divisional pre-tax income and pre-tax income margin, reviewed on both a reported and an underlying basis for each division at year-end compared to the targets that

were defined in the Group's 2012 financial plan and approved by the Board. The divisional financial performance criteria were applicable only to the Executive board members heading a division. For these individuals, the 40% weighting was split between the divisional financial performance and the individual qualitative assessment;

- Individual qualitative assessment: the qualitative assessment was performed on the basis of individual scorecards for each Executive Board member, based on the achievement of pre-defined non-financial objectives established for each division and Shared Services function. The objectives are set in each of the scorecard categories for the year, covering business and strategy, clients, people, collaboration and the control environment. For Executive Board members heading a Shared Services function, the 40% weighting was based on the qualitative assessment.

Compensation Committee assessment (20%):

- The Compensation Committee performed an overall quantitative and qualitative assessment of the Group's performance, including its capital and risk positions, the control

environment, and its relative performance against peers. In reaching its decisions, the Compensation Committee also considered the overall operating environment and the position of the Group and its businesses. In addition, it also considered individual roles and achievements of the Executive Board members.

For the evaluation of relative performance against peers, the Group has identified a group of twelve peer firms, based on the comparable scope and complexity of the business platform, business mix and geographical footprint: Bank of America, Barclays, BNP Paribas, Citigroup, Deutsche Bank, Goldman Sachs, HSBC, JP Morgan Chase, Morgan Stanley, Nomura, Société Générale and UBS.

2013 targets, caps and performance criteria

In early 2013, the Compensation Committee approved the targets and caps and the performance criteria to be applied for the 2013 performance review and incentive compensation process for individuals serving on the Executive Board as of the beginning of 2013. The Compensation Committee decided to place more emphasis on the long-term incentive award and therefore approved individual target levels for 2013 to be granted in the proportion of 10%/40%/50% for the unrestricted cash, STI award and LTI award, respectively (the 2012 proportion was 10%/50%/40%). The 2013 targets and caps are shown in the table below.

2013 targets and caps for Executive Board members

| | Target levels | | Cap levels | |
|-----------------------------------|-----------------------------------|-----|-----------------------------------|-----|
| | Range for Executive Board members | CEO | Range for Executive Board members | CEO |
| Multiples of base salaries | | | | |
| Short-term awards | | | | |
| Unrestricted cash | 0.2 – 0.4 | 0.3 | 0.3 – 0.7 | 0.4 |
| Short-term incentive award | 0.6 – 1.7 | 1.1 | 1.2 – 2.9 | 1.6 |
| Long-term incentive award | 0.8 – 2.1 | 1.3 | 1.5 – 3.5 | 2.0 |

In addition, the aggregate value of the unrestricted cash, STI and LTI awards may be subject to a further upward or downward adjustment of up to 20% at the discretion of the Compensation Committee.

2013 performance criteria for the Executive Board

| Performance criteria | Weightings | | | Description and performance objectives |
|-----------------------------------|------------|-----------------|----------------------|---|
| | CEO | Divisional Head | Shared Services Head | |
| Group performance | | | | |
| Underlying ¹ ROE | 33% | 33% | 40% | Group performance is evaluated on the basis of ROE, measured on an underlying basis at year end compared to target; targets are set on an annual basis in the Group's financial plan and approved by the Board. Performance objectives: 11% underlying ¹ ROE to reach target; 16% underlying ¹ ROE to reach cap |
| Divisional performance | | | | |
| Group cost/income ratio | 33% | – | 10% | For the CEO and the Heads of the Shared Services functions, divisional performance is evaluated on the basis of the Group's cost/income ratio. Performance objectives: 70% underlying ¹ cost/income ratio to reach target; 65% underlying ¹ cost/income ratio to reach cap |
| Divisional performance | – | 33% | 10% | Divisional performance is evaluated on the basis of the following performance metrics for the divisional and Shared Services Heads: – Private Banking & Wealth Management Heads: Performance objectives: 70% underlying ¹ cost/income ratio to reach target; 65% underlying ¹ cost/income ratio to reach cap – Investment Banking Heads: Performance objectives: 11% pre-tax return on average utilized economic capital to reach target; 15% pre-tax return on average utilized economic capital to reach cap (allocated capital based on risk-weighted assets and total balance sheet usage) – Shared Services Heads: Performance objectives: performance against approved 2013 budget to reach target; 5% below budgeted cost to reach cap |
| Individual qualitative assessment | | | | |
| Scorecard assessment | 33% | 33% | 40% | The Compensation Committee performs a qualitative assessment on the basis of individual scorecards established for the CEO and the other Executive Board members, based on the achievement of pre-defined non-financial objectives set out in each of the following scorecard categories for the year: CEO scorecard: i) capital strength; ii) human capital management (including succession planning); iii) strategy execution; and iv) management of control, operational and reputational risks. Executive Board member scorecard: i) capital strength; ii) human capital management (including succession planning); iii) management of control, operational and reputation risks; iv) involvement in client activities; and v) partnership and firm focused behavior. For the Executive Board members with regional responsibilities, these factors are also considered in respect of each of the regions for which they are responsible. |

¹Underlying results are non-GAAP financial measures that exclude valuation impacts from movements in own credit spreads and certain other significant items.

Performance evaluation for 2012

In January 2013, the Compensation Committee completed its performance evaluation for 2012 for the Group and the individual assessments of Executive Board members.

Group performance evaluation

For 2012, the Compensation Committee concluded that the Group performance targets were met. The Group delivered a performance largely in line with annual targets in the financial plan for 2012. In 2012, underlying pre-tax income significantly improved to CHF 5.0 billion from CHF 2.4 billion in 2011 and underlying ROE significantly improved to 10.0% from 5.5% in

2011. Reported Core pre-tax income was CHF 1.9 billion, compared to CHF 2.7 billion in 2011, while reported ROE was 3.9%, compared to 6.0% in 2011. The primary difference between the Group's reported and underlying results for 2012 arose from fair value losses on our own debt before tax of CHF 2.9 billion, which resulted from improvements in our credit spreads, a trend closely aligned to market recognition of the strengthening of the Group's capital and competitive position in 2012. The table "Reconciliation of underlying results" below provides a reconciliation of the Group's underlying results to the most directly comparable US GAAP measures. For the purposes of evaluating the Executive Board's

contribution to the achievement of satisfactory financial results for the Group, the Compensation Committee considers the underlying results to be a more accurate reflection of our operating results and therefore a more appropriate basis for the purposes of establishing compensation.

Underlying performance

Underlying results are non-GAAP financial measures. The numbers listed in the following table are included in the operating and financial review of the businesses.

- Refer to “Core Results”, “Private Banking & Wealth Management” and “Investment Banking” in II – Operating and financial review for discussions of the individual line items.

Reconciliation of underlying results

| | Core pre-tax income | | Net income attributable to shareholders | | Return on equity (%) | |
|---|---------------------|------------------|---|------------------|----------------------|------------|
| in | 2012 | 2011 | 2012 | 2011 | 2012 | 2011 |
| Overview of significant items (CHF million) | | | | | | |
| Reported results | 1,879 | 2,749 | 1,349 | 1,953 | 3.9 | 6.0 |
| Fair value losses/(gains) from movement in own credit spreads | 2,939 | (1,616) | 2,261 | (1,151) | – | – |
| Realignment costs | 680 | 847 | 477 | 640 | – | – |
| Gain on sale of stake in Aberdeen Asset Management | (384) | (15) | (326) | (13) | – | – |
| Gain on sale of non-core business (Clariden Leu integration) | (41) | – | (37) | – | – | – |
| Impairment of Asset Management Finance LLC and other losses | 68 | – | 41 | – | – | – |
| Gain on sale of real estate | (533) | (72) | (445) | (60) | – | – |
| Gain on sale of Wincasa | (45) | – | (45) | – | – | – |
| Losses on planned sale of certain private equity investments | 82 | – | 72 | – | – | – |
| Litigation provisions | 363 ¹ | 478 ² | 230 ¹ | 428 ² | – | – |
| Underlying results | 5,008 | 2,371 | 3,577 | 1,797 | 10.0 | 5.5 |

¹ Includes CHF 136 million (CHF 96 million after tax) related to significant Investment Banking litigation provisions in the third quarter of 2012 and CHF 227 million (CHF 134 million after tax) NCFE-related litigation provisions in the fourth quarter of 2012. ² Related to litigation provisions in connection with German and US tax matters.

Divisional and individual performance evaluation

For 2012, the Compensation Committee concluded that divisional and individual performance targets were met.

In Private Banking & Wealth Management, the Compensation Committee acknowledged the improvement of the financial indicators. Pre-tax income and pre-tax income margin improved for the former Private Banking and Asset Management divisions. Results were consistent with the Group's financial plan for 2012. With regard to the qualitative assessment, the Compensation Committee acknowledged the continued strong asset gathering momentum for net new assets in targeted markets, particularly in emerging markets and the ultra-high-net-worth client business which were partially offset by outflows in Western Europe and relating to the integration of Clariden Leu. It also acknowledged the successful repositioning of the Asset Management business, and further reflects our continued focus on alternative investment strategies, including emerging markets, and core investments, including asset allocation and traditional products.

In Investment Banking, the Compensation Committee acknowledged the improvement of financial indicators. The improvements of pre-tax income and the pre-tax income mar-

gin were consistent with the Group's financial plan for 2012. With regard to the qualitative assessment, the Compensation Committee also acknowledged the reduced volatility and improved consistency of results, reflecting the successful alignment of the business model to new market and regulatory requirements. Investment Banking risk-weighted assets under Basel III were reduced from USD 242 billion at year-end 2011 to USD 187 billion at year-end 2012, reflecting substantial progress towards the target level of below USD 175 billion by year-end 2013.

For Shared Services, the Compensation Committee acknowledged the robust control and support environment combined with cost discipline and efficiency gains that helped to improve results in 2012 while transitioning the business to new regulatory requirements. In the aggregate, the Group achieved expense savings of CHF 2 billion in 2012 compared to our annualized six month 2011 expense run rate measured at constant foreign exchange rates and adjusted to exclude business realignment and other significant non-operating expenses and variable compensation expenses.

Compensation Committee discretionary assessment

As a result of its discretionary assessment, the Compensation Committee concluded that the Executive Board made good progress in a number of areas relevant to the long term positioning of the Group. In particular, the Compensation Committee acknowledged the progress during 2012 towards meeting new regulatory requirements. With improved earnings and the successful implementation of the capital measures announced in July 2012, the Group achieved an improvement of its regulatory capital base. As of year-end 2012, our Look-through Swiss Core Capital ratio was 9.0%, compared to 10% that will be required by FINMA by year-end 2018. Our Basel II.5 tier 1 ratio improved to 19.4% from 15.2% in 2011. We reduced our total assets by CHF 99 billion during the fourth quarter of 2012, making significant progress toward the goal of reducing our balance sheet to below CHF 900 billion on a foreign exchange neutral basis by year-end 2013.

- ▶ Refer to "Capital management" and "Balance sheet, off-balance sheet and other contractual obligations" in III Treasury, Risk, Balance sheet and Off-balance sheet for further discussion on capital ratios and the reduction of our balance sheet.

Compensation decisions

Based on the evaluation of the Group, divisional and individual performance, the Compensation Committee concluded that the Executive Board members had largely achieved their challenging performance targets for 2012. On that basis, the Executive Board members in the aggregate were awarded an amount of CHF 13.6 million as unrestricted cash and CHF 21.0 million as STI awards, representing, on average, 95% and 97% of the individual target amounts, respectively. Further, Executive Board members were awarded CHF 15.4 million as LTI awards, representing, on average, 94% of the individual LTI target amounts. The incentive compensation decisions for 2012 also reflected an adjustment of our executive compensation to market levels for comparable roles within the global banking industry.

¹ Other benefits consist of housing allowances, lump sum expenses, child allowances and carried interest. ² Share awards carry the right to an annual payment equal to the dividend payable on each Group share. The dividend equivalents were paid in respect of awards granted in prior years. ³ During 2012, there were no payments made to Executive Board members for contractual agreements. ⁴ Does not include CHF 3.9 million of charitable contributions made by the Group for which the CEO and a former Executive Board member are able to make recommendations. ⁵ Of the 13 members, 5 left the Executive Board during 2012: Karl Landert and Antonio Quintella stepped down from the Executive Board effective April 30, 2012 and May 31, 2012, respectively, and Osama Abbasi, Walter Berchtold and Fawzi Kyriakos-Saad left the Executive Board effective November 30, 2012. The base salary and incentive compensation for these individuals has been pro rated accordingly. These individuals were paid incentive compensation in the form of unrestricted cash and STI awards for their performance in their respective roles on the Executive Board in 2012. ⁶ Includes pro rated unrestricted cash of CHF 10.2 million paid to the five individuals who left the Executive Board during 2012. ⁷ All short-term incentive awards for 2012 were granted as performance shares. The applicable Group share price for the performance share awards was CHF 24.62. ⁸ Long-term incentive awards vest over a five year period, payable on the third, fourth and fifth anniversaries of the grant date. The final value at vesting depends on the achievement of pre-defined performance criteria linked to the average relative total shareholder return and average return on equity. ⁹ CHF 1.87 million of this amount was granted as carried interest in 2012 (see below). In addition, in connection with his role at the time as CEO of the Asset Management division, in 2008 Mr. Shafir received a carried interest award in certain alternative investment funds. The value realized over time depends on the investment performance of the funds over their lifetime up to fifteen years. The initial value of the award is determined by making assumptions about the return that will be realized on the funds. The aggregate theoretical value of these awards was approximately USD 10 million assuming an estimated 9 percent return on all fund investments over their projected lifetime, and reducing this estimated return by 25 percent to reflect potential underperformance in some of the funds.

2012 total compensation of the CEO and highest paid Executive Board member

For CEO Brady Dougan, the Compensation Committee evaluated the performance of the Group as well as the performance of the Executive Board. In recommending the incentive compensation to the Board for Mr. Dougan, the Compensation Committee considered the improved financial position of the Group in 2012, reflected in an underlying pre-tax income of CHF 5.0 billion, more than double the CHF 2.4 billion in the prior year. In addition, the Compensation Committee considered the achievement of targets and the significant progress made in transitioning the business to the new regulatory and market environment and to meeting challenging new capital requirements, that came into effect in January 2013 with the implementation of Basel III in Switzerland. In particular, the Compensation Committee acknowledged that by year-end 2012 as compared to 2011, the Group reduced Basel III risk-weighted assets by CHF 55 billion to CHF 285 billion, reduced its balance sheet by CHF 125 billion, achieved a 9.0% Look-through Swiss Core Capital ratio and improved its leverage ratio (up to 5.8% from 4.6%). The Compensation Committee also recognized the steady progress made towards meeting the Group's challenging CHF 4.4 billion run-rate cost reduction target by year-end 2015, and the successful transformation of the Group's businesses, including the creation of an integrated Private Banking & Wealth Management division and the changes and realignment measures implemented within the Investment Banking business. Given the strong performance of Mr. Dougan during 2012 and his achievements in positioning the firm for the future, the Board decided upon the recommendation by the Compensation Committee to award Mr. Dougan unrestricted cash of CHF 0.5 million, an STI award of CHF 2.5 million and an LTI award of CHF 2.0 million, which were regarded as appropriate award levels in the current environment.

The highest paid member of the Executive Board in 2012 was Robert Shafir. For 2012, Mr. Shafir was awarded unrestricted cash of CHF 0.7 million, an STI award of CHF 3.5 million and an LTI award of CHF 2.8 million. Mr. Shafir's incentive compensation in 2012 was awarded in consideration of his continued strong performance. The Compensation Committee noted that, in particular, Mr. Shafir had successfully repositioned the former Asset Management division while improving financial results through higher net revenues and lower total operating expenses. He also assumed the role of CEO for the Americas, in addition to his role as Head of the

Asset Management division, after Mr. Antonio Quintella left the Executive Board in May 2012. In addition, for 2012 Mr. Shafir was granted a carried interest in certain alternative investment funds in the Asset Management business with a value of CHF 1.87 million. This award was granted to align Mr. Shafir with the overall special capital program where he is required to restructure the Asset Management business. Carried interest is a participation in the investment performance of a private equity or hedge fund portfolio, the value of which will vary significantly depending on the performance of the underlying portfolio.

Other aspects of Executive Board compensation

Charitable contributions

As in the prior three years, a portion of the Executive Board incentive compensation pool for 2012 was approved by the Compensation Committee to fund charitable contributions by the Group. The total amount approved for charitable contributions was CHF 3.9 million for 2012. The contributions will benefit eligible registered charities. The CEO and a former Executive Board member are able to make recommendations in respect of the allocation of the 2012 contributions to various specific charities.

Minimum share ownership requirements

The Group applies minimum share ownership requirements for members of the Executive Board and members of the divisional and regional management committees as follows:

- CEO: 350,000 shares;
- Other Executive Board members: 150,000 shares;
- Executives responsible for Private Banking & Wealth Management and Investment Banking: 50,000 shares; and
- Executives responsible for Shared Services functions: 20,000 shares.

The thresholds include all Group shares held by or on behalf of these executive employees, including unvested share awards. All affected executive employees are restricted from selling shares (including vested share awards) until they meet the minimum share ownership requirements. The Group prohibits all employees from entering into transactions to hedge the value of unvested share awards. Pledging of unvested share awards by Executive Board members is also not permitted unless expressly approved by the Compensation Committee.

Executive Board compensation for 2011

¹ Other benefits consist of housing allowances, lump sum expenses and child allowances. ² Share awards carry the right to an annual payment equal to the dividend of one Group share. The dividend equivalents were paid in respect of awards granted in prior years. ³ During 2011, there were no payments made to Executive Board members for contractual agreements. ⁴ Does not include CHF 13 million of charitable contributions made by the Group for which certain Executive Board members, including the CEO, were able to make recommendations. ⁵ As of December 31, 2011, no members of the Executive Board received unrestricted cash. ⁶ Includes CHF 22.8 million of performance share awards; the applicable Group share price was CHF 21.90. ⁷ The value of the 2011 Partner Asset Facility was the fair value as of the grant date of March 1, 2012.

Contract lengths, change in control and termination provisions

All members of the Executive Board have employment contracts with the Group. The contracts do not specify a contract length and are valid until terminated. Members of the Executive Board are required by contract to give six months' notice of termination of employment. The Group must also give members of the Executive Board six months' notice of termination of employment. There are no other contracts, agreements or arrangements with the members of the Executive Board that provide for payments or benefits in connection with termination of employment that are not generally available to other employees of the Group. For example, in the event of a termination of employment, pre-defined conditions apply to the balances of outstanding compensation awards, depending on whether the termination of employment was voluntary, involuntary or the result of a change in control.

In the case of a change in control, the treatment of outstanding awards for all employees, including Executive Board members, will be determined by the Compensation Committee or the Board. In the case of a change in control, there are no provisions in the employment contracts of Executive Board members that require the payment of any type of extraordinary benefits, including special severance awards.

In the event of the termination of the employment of an Executive Board member without cause, there are no pre-arranged contractual rights to a severance payment. Nonetheless, the amount and terms of a severance payment may be agreed between the Group and the respective Executive Board member.

Former Executive Board members

During 2012, five individuals left the Executive Board. As of December 31, 2012, all five individuals continued to be employed by the Group. Agreements were entered into with four of the individuals to terminate their employment during 2013.

Generally, former members of our most senior executive body who no longer provide services to the Group upon their request are still eligible to receive office infrastructure and secretarial support. These services are based on existing resources and are not used on a regular basis. No additional fees, severance payments or other forms of compensation were paid to former members of the Executive Board who no longer provide services to the Group or related parties during 2012.

Executive Board shareholdings and loans

Executive Board shareholdings

The shareholdings as disclosed in the table below include the holdings of the respective members of the Executive Board, their immediate family members and companies where they have a controlling interest. The unvested share-based awards do not include awards granted after December 31, 2012. The increase in the number of unvested share awards at the end of 2012 compared to 2011 was due to the decision by all the Executive Board members to convert into share-based awards all of their unvested cash-based Adjustable Performance Plan awards from 2010 and 2009, and the share-based awards granted in 2012 for 2011. The voluntary conversion option was offered to all employees holding cash Adjustable Perform-

ance Plan awards in the context of the capital strengthening measures announced in July 2012.

The value of share-based compensation awards granted to members of the Executive Board in prior years, but not yet fully vested, varies depending on the Group share price and other factors influencing the fair value of the award. The table "Executive Board holdings and values of deferred share-based awards by individual" shows the value of the unvested share-based compensation awards held by members of the Executive Board as of December 31, 2012. The aggregate cumulative value of these unvested share-based awards as of December 31, 2012 was 6% higher compared to the value of the awards as of their respective grant dates.

As a result of the conversion of the Adjustable Performance Plan cash awards to share awards during 2012, the remaining cash-based deferred compensation awards granted to certain Executive Board members in prior years are the 2008 Partner Asset Facility (PAF) and the 2011 Partner Asset Facility (PAF2) awards. The aggregate value of such cash-based awards at their grant dates was CHF 12.2 million compared to a value CHF 20.1 million as of December 31, 2012. The value of these awards varies depending upon the value of the underlying portfolios linked to the PAF and PAF2 awards and the length of the remaining deferral period.

¹ Includes shares that were initially granted as deferred compensation and have vested. ² Consists of options with an expiration date of January 22, 2013 and an exercise price of CHF 30.60. ³ In addition to the number of owned shares shown, the following Executive Board members held an aggregate number of 2,320 mandatory and contingent convertible securities (MACCS): Brady Dougan (1,336), Romeo Cerutti (60), Hans-Ulrich Meister (262), Robert Shafir (571), Eric Varvel (91); these securities are convertible into an aggregate number of 143,033 shares on March 29, 2013 at a conversion price of CHF 16.29, with settlement and delivery of shares in early April 2013. ⁴ Consists of 1,095 options with an expiration date of January 22, 2013 and an exercise price of CHF 30.60 and 13,865 options with an expiration date of December 3, 2012 and an exercise price of CHF 34.10.

Executive Board loans

A large majority of loans outstanding to members of the Executive Board are mortgages or loans against securities. Such loans are made on the same terms available to employees pursuant to widely available employee benefit plans. As of December 31, 2012, 2011 and 2010, outstanding loans to the members of the Executive Board amounted to CHF 8 million, CHF 22 million and CHF 18 million, respectively. The number of individuals with outstanding loans at the beginning and the end of 2012 was six and three, respectively, and the highest loan outstanding was CHF 4 million to Eric Varvel.

All mortgage loans to members of the Executive Board are granted either with variable or fixed interest rates over a certain period. Typically, fixed-rate mortgages are granted for periods of up to ten years. Interest rates applied are based on refinancing costs plus a margin and interest rates and other terms are consistent with those applicable to other employees. Loans against securities are granted at interest rates and on terms applicable to such loans granted to other employees. When granting a loan to these individuals, the same credit approval and risk assessment procedures apply as for loans to other employees. Unless otherwise noted, all loans to Executive Board members were made in the ordinary course of business and substantially on the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons and in consideration of the terms which apply to all Group employees, and did not involve more than the normal risk of collectability or present other unfavorable features.

- Refer to "Banking relationships with members of the Board and Executive Board and related party transactions" in Corporate Governance for further information.

Board of Directors compensation

Compensation to members of the Board is set in accordance with the Articles of Association, OGR and the Compensation Committee Charter. The annual compensation paid to members of the Board is set by the Board based on the recommendation of the Compensation Committee. All members of the Board receive a base board fee plus a committee fee or an additional fee that reflects the respective Board member's role, time commitment and scope of responsibility on the Board. The full-time Chairman, the Vice-Chairman and the three committee chairmen assume the greatest responsibility and dedicate the most time in fulfilling their board duties. As such, these individuals receive a higher annual base board fee than other board members and may receive additional fees which vary according to their specific role. The base and com-

mittee fee amounts are set by the Board upon recommendation of the Compensation Committee for the 12-month period from the current Annual General Meeting (AGM) to the following year's AGM. Fees paid to Board members are in the form of cash and Group shares, which are blocked from being sold for a period of four years. By compensating Board members to a significant degree in the form of blocked Group shares, we ensure alignment of their interests with the interests of our shareholders.

Members of the Board without designated leadership responsibilities (ten individuals) each received an annual base board fee for 2012 of CHF 250,000 and an annual committee fee for serving on the Audit, Risk or Compensation Committees. The committee fees were CHF 150,000 for the Audit Committee, CHF 100,000 for the Risk Committee and CHF 100,000 for the Compensation Committee. Members of the Chairman's and Governance Committee do not receive a committee fee.

Compensation of the Chairman

The Chairman of the Board is paid a base board fee plus an additional fee, which is proposed by the Compensation Committee and approved by the Board. The additional fee awarded to the Chairman can vary from year to year, depending on Group and individual performance. The base board and the additional fee awarded to the Chairman reflect his full-time status and active role taken in shaping the Group's strategy, governing the Group's affairs and representing the Group vis-à-vis shareholders. The Chairman coordinates the work within the Board, works with the committee chairmen to coordinate the tasks of the committees and ensures that Board members are provided with sufficient information for performing their duties. In particular, the Chairman drives the Board agenda and key Board topics, especially regarding the strategic development of the Group, succession planning, structure and organization of the Group, as well as compensation and compensation structure, including the performance evaluation and compensation of the CEO and the Executive Board. He chairs the Board, the Chairman's and Governance Committee and the shareholder meetings, leads the Group's corporate governance and takes an active role in representing the Group to the key shareholders, investors, regulators and supervisors, industry associations and other stakeholders.

For 2012, Chairman Urs Rohner received total compensation of CHF 5.2 million, of which CHF 2.5 million was the base board fee, CHF 2.5 million was additional fees and CHF 0.2 million was other compensation, consisting mainly of pension-related benefits. Of the CHF 5.2 million, CHF 4.0 million was awarded in cash and CHF 1.2 million was awarded in Group shares, blocked for a period of four years. For the

prior year, Urs Rohner received total compensation of CHF 4.3 million, for his successive roles as Vice-Chairman and Chairman, which he assumed at the AGM in April of 2011. The total compensation awarded to the Chairman for 2012 reflects the improved financial position of the Group and Urs Rohner's performance under difficult circumstances as evaluated by the Compensation Committee. In particular, it is in recognition of Mr. Rohner's leadership of the Board, his impact in closely steering and monitoring the strategic development of the Group, including the alignment of business structure and organization to the new regulatory requirements, as well as his active engagement with key stakeholders and regulators and representation of the Group in a variety of industry associations.

Compensation of the Vice-Chairman and the committee chairmen

Peter Brabeck-Letmathe, in the role of Vice-Chairman, received an annual base board fee of CHF 400,000 but no committee or additional fees. Aziz R.D. Syriani, Richard E. Thornburgh and John Tiner, each in the role of committee chairman, received an annual base board fee plus an additional fee, which reflects the greater responsibility and time commitment required to perform

the role of a committee chairman. The annual base board fee for the chairmen of the Audit and Risk Committees for 2012 was CHF 400,000 and the annual base board fee for the chairman of the Compensation Committee was CHF 350,000. The base board fees for the committee chairmen are set by the Compensation Committee for the 12-month period from the current AGM to the following year's AGM. The additional fees awarded to the three committee chairmen may vary from year to year, according to their overall time commitment, and are determined and paid for the current year, in alignment with the annual variable compensation cycle. The additional fees paid to the Audit and Risk Committee chairmen, who also serve on other committees as regular members, reflect the additional time commitment required to serve as regular members on such committees, which they do not chair.

Former members of the Board

Three former members of the Board are eligible to receive office infrastructure and secretarial support. These services are based on existing resources and are not used on a regular basis. No additional fees, severance payments or other forms of compensation were paid to current or former members of the Board or related parties during 2012.

¹ Includes the additional fees for the full-time Chairman and the three committee chairmen as well as the additional fees paid to Noreen Doyle in 2012 as a non-executive director of two of the Group's UK subsidiaries, Credit Suisse International and Credit Suisse Securities Europe Limited. The additional fees of CHF 182,600 for Noreen Doyle corresponded to the annual fees of GBP 125,000 which Noreen Doyle received in 2012 as a non-executive director (annual fee of GBP 100,000) and audit committee chair (additional fee of GBP 25,000) of Credit Suisse International and Credit Suisse Securities Europe Limited. ² Other compensation for the Chairman included lump sum expenses, child and health care allowances and pension benefits. ³ The value of the Group shares is included in total compensation. Group shares are subject to a four-year blocking period. ⁴ The Chairman and the three committee chairmen received an annual base board fee paid in cash. They also received additional fees paid in cash and/or share awards as determined by the Board in the course of the regular compensation process. The additional fees awarded to these four individuals for 2012 were paid in Group shares (50%) and cash (50%). The applicable Group share price was CHF 24.62. ⁵ Except for the Chairman and the three committee chairmen, members of the Board were paid an annual base board fee and a committee fee for their respective committee membership in advance for the period from one AGM to the other, i.e., from April 26, 2012 to April 27, 2013. The annual committee fees are CHF 150,000 for the Audit Committee and CHF 100,000 for each of the Risk and Compensation Committees. For 2012, these total combined fees were paid in Group shares (50%) and cash (50%). The applicable Group share price as of the 2012 annual general meeting was CHF 22.16.

¹ Other compensation included lump sum expenses, child and health care allowances and pension benefits. ² The value of the Group shares is included in total compensation. Group shares are subject to a four-year blocking period. ³ Hans-Ulrich Doerig and Urs Rohner served in the roles of full-time Chairman and full-time Vice Chairman, respectively, from January 2011 until the AGM in April 2011. As of the 2011 AGM, Urs Rohner succeeded Hans-Ulrich Doerig in the role of full-time Chairman. ⁴ Members of the Board with functional duties received an annual base board fee paid in cash. In addition, they received variable compensation paid in cash and/or share awards as determined by the Board in the course of the regular management compensation process. Generally, variable compensation awarded for 2011 was paid in Group shares (50%) and cash (50%). The applicable Group share price was CHF 21.90. ⁵ Members of the Board without functional duties were paid an annual base board fee and a committee fee for their respective committee membership in advance for the period from one AGM to the other, i.e., from April 29, 2011 to April 27, 2012. The annual committee fees are CHF 150,000 for the Audit Committee and CHF 100,000 for the Risk and Compensation Committees. For 2011, these total combined fees were paid in Group shares (50%) and cash (50%). The applicable Group share price as of the 2011 AGM was CHF 39.31. ⁶ In July 2011, Noreen Doyle was appointed as a non-executive director and audit committee chair of the Group's UK subsidiaries Credit Suisse International and Credit Suisse Securities Europe Limited and was paid a total of GBP 50,000 in fees. ⁷ Peter F. Weibel was the Chairman of the Audit Committee until the 2011 annual general meeting, at which time John Tiner took over the role.

Board shareholdings and loans

Board shareholdings

The shareholdings as disclosed in the following table include the holdings of the respective members of the Board, their immediate family members and companies in which they have a controlling interest. As of December 31, 2012, there were no Board members with outstanding options.

Board shareholdings by individual

| in | 2012 | 2011 |
|--|-------------------------------|-------------------------------|
| December 31 (shares) ¹ | | |
| Urs Rohner | 244,422 | 221,056 |
| Peter Brabeck-Letmathe | 120,999 | 108,820 |
| Jassim Bin Hamad J.J. Al Thani | 11,790 | 5,696 |
| Robert H. Benmosche | 30,872 | 23,304 |
| Iris Bohnet | 7,898 | – |
| Noreen Doyle | 41,324 | 31,837 |
| Jean-Daniel Gerber | 9,826 | – |
| Walter B. Kielholz | 292,424 | 281,891 |
| Andreas N. Koopmann | 30,469 | 21,400 |
| Jean Lanier | 43,881 | 30,912 |
| Anton van Rossum | 48,598 | 38,831 |
| Aziz R.D. Syriani | 76,774 | 66,385 |
| David W. Syz | 92,745 | 81,193 |
| Richard E. Thornburgh | 218,456 | 283,600 |
| John Tiner | 24,799 | 8,625 |
| Total | 1,295,277 ² | 1,203,550 ³ |

¹ Includes Group shares that are subject to a blocking period of up to four years. ² In addition to the shareholdings shown, the following Board members held an aggregate number of 1,519 mandatory and contingent convertible securities (MACCS): Urs Rohner (395), Peter Brabeck-Letmathe (175), Jassim Bin Hamad J.J. Al Thani (17), Iris Bohnet (11), Walter Kielholz (431), Andreas Koopmann (44), Aziz Syriani (113), Richard Thornburgh (297) and John Tiner (36); these securities are convertible into an aggregate number of 93,247 shares on March 29, 2013 at a conversion price of CHF 16.29, with settlement and delivery of shares in early April 2013. ³ Excludes 72,232 shares held by Peter Weibel as of December 31, 2011, who stepped down from the Board as of April 27, 2011.

Board loans

A large majority of loans outstanding to members of the Board are mortgages or loans against securities. Such loans are made to Board members on the same terms available to third-party clients. As of December 31, 2012, 2011 and 2010, outstanding loans to the members of the Board amounted to CHF 40 million, CHF 34 million and CHF 35 million, respectively.

Members of the Board with loans do not benefit from employee conditions, but are subject to conditions applied to clients with a comparable credit standing. Members of the Board who were previously employees of the Group may still have outstanding loans, which were extended to them at the time that employee conditions applied to them. Unless otherwise noted, all loans to members of the Board were made in the ordinary course of business and substantially on the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons, and did not involve more than the normal risk of collectability or present other unfavorable features. In addition to the loans listed below, the Group or any of its banking subsidiaries may enter into financing and other banking agreements with companies in which current members of the Board have a significant influence as defined by the US Securities and Exchange Commission, such as holding executive and/or board level roles in these companies. Unless otherwise noted, loans extended by the Group to such companies are also made in the ordinary course of business and at prevailing market conditions. As of December 31, 2012, 2011 and 2010, there was no loan exposure to such related party companies that was not made in the ordinary course of business and at prevailing market conditions.

► Refer to “Banking relationships with members of the Board and Executive Board and related party transactions” in Corporate Governance for further information.

Board loans by individual

| in | 2012 | 2011 |
|---------------------------|-------------------|--------------------------------|
| December 31 (CHF) | | |
| Urs Rohner | 5,034,157 | 5,090,650 |
| Peter Brabeck-Letmathe | 27,520,527 | 15,833,928 |
| Walter B. Kielholz | 4,200,000 | 5,050,000 |

| David W. Syz | 1,500,000 | 1,500,000 |
| Richard E. Thornburgh | 0 | 14,266 |
| Total ¹ | 41,029,684 | 30,263,844 ² |

¹ Includes loans to immediate family members. ² Excludes a loan of CHF 3,950,000 held by Peter Weibel as of December 31, 2011, who stepped down from the Board as of April 27, 2011.

Group compensation

For all Group employees other than members of the Executive Board, the 2012 compensation design remained similar to the prior year. The key features of the 2012 compensation design are:

- The divisional variable compensation pools were determined based on the 2012 financial performance of each division and adjusted by a uniform capital charge.
- The threshold at which variable compensation becomes subject to deferral remained unchanged at total compensation of CHF/USD 250,000 (or local currency equivalent). The deferral rates applied for 2012 also remained largely unchanged compared to the prior year.
- As in previous years, all deferred awards for 2012 contained a general malus provision, which enables the Group to cancel any unsettled awards granted to any individual or individuals in the event that they engage in any activity that results in, or has the potential to result in, material financial, reputational or other material harm to the Group.
- The majority of deferred variable compensation for 2012 was granted to employees in the form of share awards, with vesting over three years.
- For managing directors and all employees categorized as MRTC, at least 50% of their deferred variable compensation for 2012 was awarded in the form of performance share awards that are subject to clawback provisions, which provide that the number of unvested shares will be adjusted downward in the event of a divisional loss or a negative underlying ROE. There will be no upward adjustment on unvested award balances.
- For managing directors and directors in the Investment Banking division, a portion of their deferred variable compensation for 2012 was awarded in the form of Plus Bonds, a new award plan. Plus Bonds are deferred cash-based awards that are notionally referenced to a portfolio of assets linked to asset-backed securities (ABS) and transfer risk from the Group to employees.
- Managing directors and directors in the Investment Banking division received the cash component of their variable compensation in the form of Restricted Cash Awards, which are cash payments that are subject to a pro-rata repayment in the event of voluntary resignation or termination for cause within three years of the grant.

Determination of divisional variable compensation pools

Determination of the performance-based variable compensation pools is an annual process. Appropriate accruals for the divisional and Group-wide variable compensation pools are made by the Group throughout the year. The Board regularly

reviews the accruals and related financial information and makes adjustments at its discretion to ensure that the overall size of the pools is consistent with the Group's compensation objectives. An accrual, at the Group or any other level, however, does not create legal rights or entitlements for employees to receive variable compensation.

For the business divisions, the primary measure for determining the variable compensation pool is the division's income before taxes and before the variable compensation accrual, reduced by a charge for capital usage. In order to better align the calculation methodology of the pools across all businesses, we standardized the calculation basis of our capital charge in 2012 so that a uniform capital charge was applied to our divisions. The capital charge is calculated as the economic cost of allocated capital. Allocated capital is defined as 10% of average ◯Basel III ◯risk-weighted assets. The methodology to determine the divisional variable compensation pools, however, is not purely formula driven, but instead takes into account divisional key performance indicators and non-financial criteria including risk considerations and relative performance compared to peers. For 2012, the divisional variable compensation pools were determined according to the former divisional structure (Private Banking, Investment Banking and Asset Management), which was in place for most of 2012.

For Shared Services functions, a deduction is applied to the pool of each division to fund a variable compensation pool for these employees, the total amount of which is based on the Group-wide performance and qualitative measurements rather than the performance of any particular division they support.

The determination of the pools for the business divisions and Shared Services functions also takes into account Group-wide performance, ethics, risk, compliance and control as well as the market and regulatory environment. The final variable compensation pools are reviewed and recommended by the Compensation Committee and approved by the Board.

Once the variable compensation pools have been set at the Group and divisional levels, each division allocates its pool to the various business areas, based on the same or similar factors used to determine the divisional pool. Capital usage continues to be factored into the pools as they are allocated within business areas. Through this process, business area managers recognize that capital usage is a significant factor in the determination of the variable compensation pool for the business area under their responsibility. The pools are then allocated further to line managers and employees. Line managers award variable compensation to employees based on individual and business area performance, subject to the constraints of the pool available.

Competitive benchmarking

The assessment of the economic and competitive environment is another important element of our compensation process as we strive for market-informed, competitive compensation levels for comparable roles, experience and geographical location of employees. We use internal expertise and the services provided by compensation consulting firms to benchmark our compensation levels against relevant competitors. We adopt a differentiated approach, looking at pay levels and competitive market players in the various geographical regions where we do business.

For key personnel of the Group and the divisions, we compete for talent primarily with major banks globally. To benchmark our compensation levels and as a key input for setting the variable compensation pools at the Group and divisional levels, we measure ourselves against a set of peer groups, including European and US banks. These peer groups and rel-

evant metrics are reviewed annually in April by the Compensation Committee and tracked throughout the year. The relevant peer group for 2012 for the Group is the same twelve peers used for by the Compensation Committee in the context of assessing the Group's relative performance for the purposes of determining compensation for the Executive Board: Bank of America, Barclays, BNP Paribas, Citigroup, Deutsche Bank, Goldman Sachs, HSBC, JPMorgan Chase, Morgan Stanley, Nomura, Société Générale and UBS. Most of these peer companies explicitly mention Credit Suisse as one of their peers.

The peer groups for 2012 for the Group and the divisions are shown in the following table, followed by specific performance criteria that the Compensation Committee reviews for assessing the relative performance against peers as part of the process to determine the divisional variable compensation pools.

2012 peer groups and performance criteria¹

Credit Suisse Group

| | |
|------------------------------|---|
| Peer group | Bank of America, Barclays, BNP Paribas, Citigroup, Deutsche Bank, Goldman Sachs, HSBC, JPMorgan Chase, Morgan Stanley, Nomura, Société Générale and UBS |
| Performance criteria | |
| Profitability and efficiency | Return on equity, pre-tax income margin and compensation/revenue ratio |
| Growth | Earnings per share growth, net revenue growth, net new assets growth and total assets under management growth |
| Capital and risk | Tier 1 ratio, core tier 1 ratio, leverage ratio, Value-at-Risk and risk-weighted assets development |
| Shareholder satisfaction | Total shareholder return over one year, total shareholder return over two years and book value per share growth |

Private Banking

| | |
|------------------------------|---|
| Peer group | Barclays, Deutsche Bank, HSBC, Julius Bär Group, JPMorgan Chase and UBS |
| Performance criteria | |
| Profitability and efficiency | Pre-tax income margin, pre-tax income on assets under management and gross margin |
| Growth | Net revenue growth, pre-tax income growth and net new assets growth |

Investment Banking

| | |
|------------------------------|--|
| Peer group | Bank of America, Barclays, Citigroup, Deutsche Bank, Goldman Sachs, JPMorgan Chase, Morgan Stanley and UBS |
| Performance criteria | |
| Profitability and efficiency | Pre-tax return on economic risk capital, pre-tax income margin and compensation/revenue ratio |
| Growth | Net revenue growth and pre-tax income growth |
| Capital and risk | Net revenue/Value-at-Risk |

Asset Management

| | |
|------------------------------|--|
| Peer group | Allianz, BlackRock, Deutsche Bank, Goldman Sachs, JPMorgan Chase, Morgan Stanley and UBS |
| Performance criteria | |
| Profitability and efficiency | Pre-tax income margin and gross margin on assets under management |
| Growth | Pre-tax income growth, net revenue growth and net new assets growth |

¹ For the 2012 compensation process, the peer groups and performance criteria were approved by the Compensation Committee in April 2012 and were defined according to the former divisional structure.

Risk and control considerations within the compensation process

Risk and control considerations are integrated throughout the performance assessment and compensation processes in order to ensure that our approach to compensation discourages excessive risk taking and that significant attention is given to risk and internal control matters. During 2012, we continued to refine our processes and governance regarding risk and compensation, in particular those impacting MRTC.

Compensation process for MRTC

During 2012, the Group enhanced its processes for reviewing the performance, compliance and variable compensation recommendations for MRTC and certain other groups of employees. MRTC include employees who, either individually or as a part of a group, are considered to have a potentially material impact on the Group's risk profile. Regulators, in particular, have placed increased emphasis and requirements on the identification and management of employees who have the potential to take or manage risk at firms. The criteria for classifying individuals as MRTC for the Group are approved by the Board upon recommendation by the Compensation and Risk Committees.

Employees meeting one or more of the following criteria are identified as MRTC:

- members of the Executive Board;
- employees who report directly to a member of the Executive Board, typically employees who are responsible for managing significant lines of business of the Group and are members of divisional management committees;
- senior control function personnel, which are senior employees in the Shared Services functions of Finance, Risk Management, Legal and Compliance and Talent, Branding and Communications who have responsibility for monitoring individuals or groups of individuals who manage material amounts of risk for the Group;
- employees, either individually or as part of a group, with the ability to put material amounts of the Group's capital at risk, such as traders, and others who are authorized to manage, supervise or approve risk exposure that could have a material or significant effect on our financial results;
- the top 150 paid employees across the Group (based on total compensation), regardless of seniority or function;
- UK Financial Services Authority Code Staff, which are determined based on the significance of the employees' functions in the UK and the potential impact of their risk-taking activities on the UK entities; and
- other individuals, whose role, individually or as part of a group, has been identified as having a potential impact on market, reputational or operational risk.

All managing directors and MRTC received at least 50% of their deferred variable compensation as performance share awards.

In response to requirement of the Fed, the Group has also identified two groups of US-based employees in addition to the MRTC, which are subject to the enhanced compensation processes for MRTC. The broader group is collectively known as covered employees, which are comprised of:

- MRTC;
- as all US-based revenue producers in Investment Banking; and
- all branch managers of our US Wealth Management Clients business within the Private Banking & Wealth Management division.

The 2012 enhancements to the compensation process apply to all covered employees and included the introduction of policies and procedures to ensure that managers who make performance assessments and variable compensation recommendations in respect of covered employees apply due consideration to risk taken by those employees. This included mandatory training for all managers of covered employees. Policies were also introduced for malus triggers and the compensation impact of different trigger events, based on the severity of such events. To ensure that the new guidelines are being applied, validation and monitoring processes have been created, which include a review of covered employee compensation decisions.

► [Refer to the table "Approval authority" for further information on the review and approval process for variable compensation.](#)

Role of control functions in the compensation process

In addition to the annual performance assessment conducted by their line managers, covered employees are subject to a separate review process by the Group's control functions, which can impact decisions about individual variable compensation awards. The control functions include Legal and Compliance, Risk Management, Finance and Internal Audit, which are independent of the businesses. Reports of infractions of employees are presented to regional disciplinary review committees, which assess such infractions and make recommendations on disciplinary measures. Such measures can include the reduction or elimination of the employee's variable compensation award for the given year and, in the case of MRTC, deferred awards from prior years. The Board's Audit and Risk Committees are periodically provided with information on the

disciplinary cases and may give directional input regarding the appropriateness of disciplinary outcomes. The results of the disciplinary review committees' assessment and any disciplinary measures are communicated to the Compensation Committee, together with details of any impacts on variable compensation. In the case of MRTC, the proposed variable compensation amounts are subject to final review and approval by the Compensation Committee.

Clawback and risk-based adjustments for deferred awards

All deferred awards contain clawback provisions. Specifically, the performance share awards and Adjustable Performance Plan awards (granted in 2010 and 2009) contain provisions that result in the unvested amount of the deferred awards to be adjusted downwards or cancelled in the event of future negative business performance according to specific pre-defined performance criteria and other conditions. Given the positive performance of the Group and all divisions in 2012, no such downward adjustments were made to existing performance share awards or Adjustable Performance Plan awards for calendar year 2012.

All deferred awards also contain general malus provisions. The Group can reduce or cancel the amount of the unsettled awards of any employee whose individual behavior has a materially detrimental impact on the Group. Additionally, for all covered employees, a further general malus provision applies, which can be triggered not only for cases of materially detrimental individual behavior, but also in cases where the behavior or performance of the individual causes, or could cause the Group or any division or region to suffer a material downturn in its financial performance or regulatory capital base, a material failure of risk management or reputational harm or other similar events, or a combination thereof, as determined by the Group in its sole discretion.

- Refer to the table "Potential downward adjustments of performance share awards and STI" for specific downward adjustments to be applied.

In addition to the downward adjustments that may be made as a result of explicit clawback provisions, deferred awards are subject to implicit or fair value adjustments due to changing market conditions. Normal market fluctuations in the Group share price, for example, will give rise to implicit upward or downward adjustments in the value of the deferred share awards.

- Refer to the table "Fair value of outstanding deferred compensation awards" for a quantitative disclosure of the explicit and implicit risk adjustments made in 2012 on the outstanding deferred awards.

Compensation design

In line with the Group's total compensation approach, all Group employees received fixed compensation in the form of salaries and were eligible to receive variable compensation for 2012. Variable compensation for 2012 was awarded to employees in the form of cash, Restricted Cash Awards, share-based awards and, in certain cases, Plus Bond awards, subject to the eligibility and other terms and conditions of the specific award plans as shown below.

Base salaries

All employees are paid a base salary. The level of base salary paid to an individual employee is based on the role and experience of the individual, his or her individual sustained long-term performance and market positioning. The Group regularly reviews benchmarking data on base salary levels with respect to different functions and geographical regions to ensure that employees are paid fairly and competitively in reference to comparable roles in the market.

Variable compensation and deferral rates

For 2012, 42,482 employees received some amount of variable compensation, of which 7,592, or 18%, received some portion of deferred variable compensation. This is consistent with the 7,719 employees who received deferred variable compensation for 2011. The number of employees, including members of the Executive Board, managing directors and other MRTC, who received performance share awards subject to performance-related clawback provisions was 1,715. Variable compensation was paid in cash unless total compensation granted for 2012 was CHF/USD 250,000 (or local currency equivalent) or more, in which case a portion was paid in cash and the balance was deferred. The portion that was deferred was determined by reference to a pre-established deferral table, which increases the deferred portion for higher levels of total compensation. Compared to 2011, the deferral rates for 2012 were adjusted slightly. The initial deferral rate was increased from 15% to 17.5%. The largest change was for the maximum deferral rate, which was set at 90% for 2012 compared to 80% for 2011. The amount of variable compensation paid as cash for 2012 was subject to a cap of CHF/USD 2 million (or local currency equivalent).

Employee categories and components of total compensation for 2012

| | | Total compensation | | | | | |
|-------------------|---|--------------------|------------------------------------|------------------------|--------|--------------------|-----------|
| | | Fixed compensation | Variable compensation | | | | |
| | | | Deferred compensation ¹ | | | | |

| | Employees with total compensation below CHF/USD 250,000 | | | | | | |

IB – Investment Banking

¹ Deferred compensation is applicable to employees with total compensation of CHF/USD 250,000 or higher.

Unrestricted cash

Generally employees were paid the cash portion of their variable compensation as unrestricted cash.

Deferred variable compensation instruments

Share awards

Our share awards align the interests of our employees with those of our shareholders and the performance of the Group and comply with the expectations of regulators to grant a substantial portion of variable compensation in the form of share awards. A total of 7,592 employees received share awards for 2012. Each share award granted entitles the holder of the award to receive one Group share and does not contain a leverage component or multiplier effect. The share award vests over three years, such that one third of the share award vests on each of the three anniversaries of the grant date, and will be expensed over the vesting period. The number of share awards was determined by dividing the deferred component of variable compensation being granted as shares by the average price of a Group share over the twelve business days ended

January 16, 2013. The final value of these share awards is solely dependent on the Group share price at the time of delivery.

In order to comply with regulatory requirements, the Group awarded an alternative form of share awards to senior employees in a number of EU countries instead of unrestricted cash. For 2012, these employees received 50% of the amount they otherwise would have received in cash in the form of blocked shares. The shares remain blocked for a period of time, which ranges from six months to three years depending on location, after which they are no longer subject to restrictions.

The Group prohibits employees from entering into transactions to hedge the value of outstanding share awards. Employee pledging of unvested share awards is not allowed except with express approval of the Compensation Committee. The Group continues to apply minimum share ownership requirements for members of the divisional and regional management committees and the Executive Board.

► Refer to “Minimum share ownership requirements” in Executive Board compensation for further information.

Performance share awards

Members of the Executive Board, managing directors and all other MRTC (1,715 employees) received at least 50% of their deferred variable compensation in the form of performance share awards, which are subject to explicit performance-related clawback provisions. Each performance share award granted entitles the holder of the award to receive one Group share. Performance share awards also vest over three years, such that one third of the share awards vest on each of the three anniversaries of the grant date and will be expensed over the vesting period. Unlike the share awards described above, however, the outstanding performance share awards are subject to a negative adjustment in the event of a divisional loss or a negative underlying ROE of the Group. Outstanding performance shares are subject to a negative adjustment in the event of a divisional loss, unless there is a negative underlying ROE of the Group that would call for a negative adjustment greater than the divisional adjustment for the year, in which case the negative adjustment is based on such negative underlying ROE. For employees in Shared Services, the negative adjustment only applies in the event of a negative underlying ROE of the Group and is not linked to the performance of the divisions. Performance shares awarded prior to 2012 were based on reported ROE, unlike performance share awards for 2012, which were based on underlying ROE.

The amount of potential negative adjustment for loss at the divisional level, which is applicable to all outstanding performance share awards (including STI awards of Executive Board members heading a business division), is shown in the following chart.

Potential downward adjustments of performance share and STI awards

| Downward adjustment if division incurs a loss | |
|---|---|
| Division pre-tax loss (in CHF billion) | Percentage adjustment on award balance |
| (1.00) | (15%) |
| (2.00) | (30%) |
| (3.00) | (45%) |
| (4.00) | (60%) |
| (5.00) | (75%) |
| (6.00) | (90%) |
| (6.67) | (100%) |

Plus Bond awards

Managing directors and directors in the Investment Banking division received approximately 17% of their variable compensation in the form of Plus Bond awards. The Plus Bond award is essentially a fixed income instrument, denominated in US dollars, which provides a coupon payment that is commensurate with market-based pricing. Plus Bond award holders are entitled to receive semi-annual cash payments on their adjusted award amounts at the rate of $\text{London Interbank Offered Rate} + 7.875\%$ per annum until settlement. The Plus Bond will settle in the summer of 2016 based on the amount of the initial award less portfolio losses, if any, in excess of a first loss portion retained by the Group of approximately USD 600 million. The value of the Plus Bond awards is based on the performance of a portfolio of unrated and sub-investment-grade ABS that are held in inventory by various trading desks of the Investment Banking division. While the Plus Bond award is a cash-based instrument, the Group reserves the right to settle the award in Group shares based on the share price at the time of final distribution. In addition, subject to oversight procedures, the Group retains the right to prepay all or a portion of the Plus Bond award in cash at any time and, in the event of certain regulatory developments or changes on capital treatment, exchange the award into Group shares. Similar to the PAF2 awards, the Plus Bond award plan contributes to a reduction of the Group's $\text{risk-weighted assets}$ and constitutes a risk transfer from the Group to the Plus Bond award holders.

The Plus Bonds provided to 2,274 employees in Investment Banking had a notional value of CHF 187 million and were fully vested and expensed as of the grant date of December 31, 2012.

Managing directors and directors outside of the Investment Banking division were given the opportunity in early 2013 to voluntarily reallocate a portion of the share award component of their deferred awards into the Plus Bond awards. The Plus Bonds provided to 769 employees outside the Investment Banking division through the voluntary reallocation offer had a notional value of CHF 38 million as of the grant date, will vest on the third anniversary of the grant date in 2016 and will be expensed over the vesting period.

In addition, members of the Executive Board who did not participate in the structuring of the instrument were given the opportunity to invest their own funds in Plus Bond instruments that have substantially the same terms as the Plus Bond awards granted to employees. As a result, certain Executive Board members acquired an aggregate of CHF 9 million in Plus Bond instruments in February 2013.

- Refer to "Banking relationships with members of the Board and Executive Board and related party transactions" in Corporate Governance – Board of Directors for further information.

Restricted Cash Awards

Managing directors and directors in the Investment Banking division received the cash component of their variable compensation in the form of Restricted Cash Awards. These awards are cash payments made on the grant date, but are subject to a pro-rata repayment by the employee in the event of voluntary resignation or termination for cause within three years of the grant. The Restricted Cash Award is reported as part of the deferred compensation award for the Group even though the award was paid as of the grant date. The expense recognition will occur over the three-year vesting period, subject to service conditions.

Other awards

In addition, we may, from time to time, employ other long-term incentive compensation plans or programs to assist in hiring at competitive levels and to support the retention of talent. These variations from our standard approach to compensation

are generally applied to small populations of employees within the Group where the specific circumstances warrant such compensation arrangements. For 2012, such compensation arrangements were applied to approximately 328 employees, including employees engaged in arbitrage trading in the Investment Banking division, alternative investments in the Private Banking & Wealth Management division and certain employees in our Credit Suisse Hedging-Griffo Investimentos S.A. subsidiary. Generally, compensation for employees at Group subsidiaries follows the standard compensation design described above, with few exceptions. Any and all variations from our standard approach must be approved by the Compensation Committee.

We may pay commissions to employees operating in specific areas of the business where such compensation practices are warranted and in line with market practice. The value of commissions paid is determined by formulas, which are reviewed regularly to ensure that they remain competitive.

Total compensation awarded

The following table shows the value of total compensation awarded to employees for 2012 and 2011, including awards granted to employees as variable incentive compensation for 2012 and 2011 granted in January 2013 and 2012, respec-

tively. The deferred awards are subject to future service, performance, market and clawback criteria that will determine the final payout to employees upon settlement and/or may be forfeited or reduced if such criteria are not achieved.

¹ Includes pension and other post-retirement expense of CHF 532 million and CHF 610 million in 2012 and 2011, respectively. ² Includes the notional value of CHF 38 million of share awards that was reallocated to Plus Bond awards as a part of the voluntary employee reallocation offer that took place subsequent to the grant date. ³ Represents the fair value of the 2011 Partner Asset Facility awards as of the grant date. The notional value was CHF 751 million. ⁴ Includes CHF 215 million and CHF 182 million relating to cash severance awards for terminations effective as of December 31, 2012 and 2011, respectively. ⁵ Awarded to 205 and 332 employees in 2012 and 2011, respectively. Guaranteed bonuses may be awarded as variable incentive compensation or sign-on awards.

All variable compensation was approved by the Board, based on the Compensation Committee's recommendation and the thorough assessment of the Group's performance in 2012. In addition, other factors were taken into consideration, such as the overall economic and competitive environment, the capital and risk position of the Group and returns to shareholders. Total compensation awarded for 2012, which reflected the solid performance of the Group in 2012 in a challenging market environment, was CHF 11.6 billion, down 1% compared

to 2011, and up 3% on an average basis per person, reflecting the net decline of 2,300 employees throughout the year. The overall variable incentive compensation awarded for 2012 was CHF 3.4 billion, up 15% compared to 2011. Of the total variable incentive compensation awarded across the Group for 2012, 65% was deferred and subject to future performance, market and clawback criteria. A total of 42,482 employees received some form of variable incentive compensation for 2012, of which 523 were classified as MRTC.

¹ Excludes individuals who may have been classified as material risk takers and controllers according to regulatory requirements of jurisdictions outside of Switzerland, particularly US-based revenue producers in Investment Banking and branch managers of the US Wealth Management Clients business within the Private Banking & Wealth Management division, who were classified as covered employees by the US Federal Reserve, and other UK employees. ² Excludes individuals who may have been classified as material risk takers and controllers according to regulatory requirements of jurisdictions outside of Switzerland (e.g., US, UK). ³ Includes employees who received cash severance awards for terminations of employment as of December 31, 2012 and 2011.

Compensation awarded to MRTC

The 523 employees classified as MRTC were awarded total compensation of CHF 1,282 million for 2012 and variable incentive compensation of CHF 993 million for 2012, of which

CHF 914 million, or 92%, was deferred. MRTC received 50% of their deferred compensation for 2012 in the form of performance share awards, which are subject to clawback provisions.

Group compensation and benefits expense

Compensation and benefits expense recognized for a given year in the consolidated statement of operations includes salaries, variable compensation, the amortization of share-based and other awards that were granted as deferred variable compensation in prior years, benefits and employer taxes on compensation. Variable compensation mainly reflects the unrestricted performance-based compensation for the current year and deferred variable compensation, as well as severance, sign-on and commission payments. Deferred variable compensation granted for the current year is expensed in future periods and subject to restrictive features such as continued employment with the Group, vesting, forfeiture, clawback and blocking rules.

Compensation expense for share-based and other awards that were granted as deferred variable compensation in prior years is recognized in accordance with the specific terms and conditions of each respective award and is primarily recognized over the future requisite service and vesting period,

which is determined by the individual respective plan, retirement eligibility of employees, moratorium periods and certain other terms. Compensation expense for share-based and other awards that were granted as deferred variable compensation in prior years also includes the current estimated outcome of applicable performance criteria, estimated future forfeitures and mark-to-market adjustments for certain awards that are still outstanding.

In 2012, there was a 5% decrease in compensation and benefits expense primarily due to lower variable compensation expense and lower salaries, reflecting lower headcount, partly offset by severance and other compensation expense associated with our cost efficiency measures.

The amounts shown below for severance payments in 2012 and 2011 were paid to 3,065 and 1,699 individuals, respectively, and the amounts awarded for sign-on payments in 2012 and 2011 were awarded to 196 and 44 individuals, respectively.

¹ Represents the Group's portion of employees' mandatory social security. ² Includes pension and other post-retirement expense of CHF 532 million and CHF 610 million in 2012 and 2011, respectively. ³ Includes CHF 32 million and CHF 43 million of expenses associated with other share awards granted in 2012 and 2011, respectively. ⁴ The Plus Bond awards granted to Investment Banking employees were fully vested and expensed on December 31, 2012. Changes in the underlying fair value of the instruments may have an impact on deferred compensation expense in future periods. ⁵ Includes the change in the underlying fair value of the indexed assets during the period. ⁶ Includes severance and other compensation expense relating to headcount reductions of CHF 456 million and CHF 715 million in 2012 and 2011, respectively.

Group estimated unrecognized compensation expense

The following table shows the estimated unrecognized compensation expense for deferred compensation awards granted for 2012 and prior years outstanding as of December 31, 2012 and comparative information for 2011. These estimates

were based on the fair value of each award on the grant date taking into account the current estimated outcome of relevant performance criteria and estimated future forfeitures. No estimate has been included for future mark-to-market adjustments.

Group estimated unrecognized compensation expense

¹ Includes CHF 47 million and CHF 93 million of estimated unrecognized compensation expense associated with other share awards which were granted to new employees in 2012 and 2011, respectively. ² Represents the notional value of share awards reallocated to Plus Bond awards through the employee voluntary reallocation offer, with vesting in 2016, after consideration of estimated future forfeitures. ³ Includes CHF 16 million of estimated unrecognized compensation expense associated with special Adjustable Performance Plan cash awards.

- ▶ Refer to “Note 27 – Employee deferred compensation” in V – Consolidated financial statements – Credit Suisse Group for information about the fair value assumptions used to estimate the unrecognized compensation expense of unvested awards.
- ▶ Refer to “Note 7 – Share capital, conditional, conversion and authorized capital of Credit Suisse Group” in VI – Parent company financial statements – Credit Suisse Group for more information.

Impact of share-based compensation on shareholders' equity

Our shareholders' equity reflects the effect of share-based compensation. Share-based compensation expense, which is generally based on fair value at the time of grant, reduces equity; however, the recognition of the obligation to deliver shares increases equity by a corresponding amount. Equity is generally unaffected by the granting and vesting of share-based awards, including through the issuance of shares from approved conditional capital. If Credit Suisse purchases shares from the market to meet its obligation to employees, these purchased treasury shares reduce equity by the amount of the purchase price. Shareholders' equity also includes, as addi-

tional paid-in capital, the excess tax benefits/charges that arise at settlement of share-based awards.

Settlement of share delivery obligation

Granting a substantial part of variable compensation in deferred share-based awards aligns the interests of employees and shareholders and meets the expectations of regulators. To avoid shareholder dilution, the Group in the past has covered its share delivery obligations by buying shares in the market. This practice has been temporarily suspended, as the Group seeks to meet the increased regulatory capital requirements under the ☉Basel III framework and the Swiss ☉“Too Big to Fail” legislation and regulations thereunder. Consequently, in 2011, we decided to start settling outstanding share-based awards primarily through the issuance of new shares from conditional capital. We intend to resume our previous practice of buying shares in the market after the Group achieves its Look-through Swiss Core Capital ratio target of 10%, which is expected by mid-2013.

- ▶ Refer to Look-through Swiss Core Capital and Total Capital ratios” in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital Management – Ratios based on new capital frameworks for more information.

Awards outstanding

Our share-based awards generally vest and settle over three years, subject to service and/or performance conditions. As of the end of 2012, we had the following types of awards outstanding:

- Performance share awards: 23 million awards are subject to explicit performance-related clawback provisions in relation to divisional performance or reported ROE;
- Other share-based awards; includes 56 million share awards and a population of other awards relating to prior years that are no longer part of our current compensation plans, consisting of 10 million Scaled Incentive Share Units and 3 million Incentive Share Units, as well as 5 million share options that we expect to settle without value; and
- Converted Adjustable Performance Plan awards: 31 million awards were converted from cash-based to share-based awards. In July 2012, as part of the announced capital strengthening measures, we have launched a voluntary exchange offer under which employees could elect to convert any future payments from deferred cash compensation awards under the Adjustable Performance Plan into Adjustable Performance Plan share awards at the same price as the conversion price under MACCS that

were also issued in July. Adjustable Performance Plan awards were granted for performance in 2010 and 2009, with ratable vesting over four and three years, respectively. These awards are linked to reported ROE and divisional performance criteria.

The number of shares issued as of the end of 2012 was 1,321 million. In April 2013, we expect to issue 200 million shares as a result of the conversion of our MACCS. Additionally, we have 550 million shares available to support contingent conversion instruments (CoCos) that increase loss absorbing regulatory capital without diluting shareholders at the time of their issuance, including 499 million shares relating to buffer capital notes we placed in 2012 and 2011. In the following table, we show the number of outstanding awards as a percentage of shares issued as of year-end 2012 and in the context of our capital strategy. Excluding the converted Adjustable Performance Plan share awards, we had 97 million share-based awards outstanding, equivalent to 6.4% of shares issued, including shares subject to issuance pursuant to the terms of the MACCS. If we also consider the shares available for CoCos within the total number of shares to be issued, the number of outstanding share-based awards represents 4.7% of shares issued as of year-end 2012.

Outstanding share awards in the context of our capital strategy

| | Awards outstanding (CHF million) | Awards outstanding in relation to shares issued, including MACCS (%) ¹ | Awards outstanding in relation to shares issued, including MACCS and CoCos (%) ^{1,2} |
|---|-------------------------------------|--|---|
| end of 2012 | | | |
| Outstanding awards in the context of our capital strategy ³ | | | |
| Performance share awards | 23 | 1.5 | 1.1 |
| Other share-based awards ⁴ | 74 | 4.9 | 3.6 |
| Converted Adjustable Performance Plan awards ⁵ | 31 | 2.0 | 1.5 |

¹ Mandatory and contingent convertible securities were issued as part of our capital measures, which were announced in July 2012. Upon their conversion, 200 million shares will be issued in April 2013. ² For CoCos, 550 million shares are available as a contingency. ³ Does not include Plus Bond awards and 2011 Partner Asset Facility awards which may be settled in cash or shares at the Group's discretion. ⁴ Includes share awards, Scaled Incentive Share Units, Incentive Share Units and share options. ⁵ Former cash-based awards that were converted into share awards as part of our capital measures announced in July 2012.

Subsequent activity and share issuance

For performance in 2012, we granted 26 million new performance share awards and 38 million new share awards in early 2013. In the same period, we settled 38 million deferred awards from prior years, consisting of 5 million performance share awards, 22 million other share-based awards and 11 million converted Adjustable Performance Plan share awards.

To meet our obligations, we issued 19 million shares in early 2013, 39 million shares in 2012 and 22 million shares in 2011, all from conditional capital. We currently have a remaining authorization to issue 3 million new shares from conditional capital.

In connection with our obligation from the converted Adjustable Performance Plan awards and consistent with our capital-efficient strategy of issuing new shares from conditional capital, the Board will propose to the AGM in April 2013 an increase of the currently available conditional capital to 30 million shares. This increase of 27 million shares represents 2.1% of shares issued as of the end of 2012, or 1.3% including MACCS and CoCos. Any further new share issuance will need AGM approval and it is not our current intention to seek this under our capital strategy.

- Refer to “Capital strategy and framework” in III – Treasury, Risk, Balance sheet and Off-Balance sheet – Treasury measurement – Capital management for more information.

Value changes of outstanding deferred awards

Employees experience changes to the values of their deferred compensation awards during the vesting period due to both implicit and explicit value changes. Implicit value changes primarily reflect market driven effects, such as changes in the

Group share price, changes in the value of the underlying PAF, PAF2 and Plus Bond assets or foreign exchange rates. Explicit value changes reflect risk adjustments triggered by clawback provisions related to negative performance in the performance share awards (applies to managing directors and MRTC), positive or negative performance for the Adjustable Performance Plan share awards or the general malus provisions in all deferred awards (applies to all employees). The final value of an award will only be determined at settlement.

The following table provides a comparison of the fair values of outstanding deferred compensation awards as of the beginning and the end of 2012, indicating the value of changes due to implicit and explicit adjustments. For 2012, the change in fair value for all outstanding deferred compensation awards was primarily due to implicit adjustments driven by the changes in the Group share price, changes in the value of the underlying PAF and PAF2 assets and the foreign exchange rate movements during the period.

Fair value of outstanding deferred compensation awards

| in / end | Change in value | | | 2012 |
|--|-------------------|----------|----------|------|
| | 2011 | Implicit | Explicit | |
| Share-based awards (CHF per unit) | | | | |
| Incentive Share Units granted for 2009 | 22.1 | 0.2 | 0.0 | 22.3 |
| Scaled Incentive Share Units granted for 2009 | 22.1 | 0.2 | 0.0 | 22.3 |
| Share awards granted for 2010 ¹ | 22.1 | 0.2 | 0.0 | 22.3 |
| Share awards granted for 2011 ² | 21.9 | 0.4 | 0.0 | 22.3 |
| Performance share awards granted for 2011 ³ | 21.9 | 0.4 | 0.0 | 22.3 |
| Adjustable Performance Plan share awards converted in 2012 | 16.3 ³ | 6.0 | 1.0 | 23.3 |
| Cash-based awards (CHF per unit) | | | | |
| 2008 Partner Asset Facility awards (PAF) | 1.55 | 0.25 | 0.00 | 1.80 |
| Adjustable Performance Plan cash awards granted for 2009 | 1.18 | (0.03) | 0.04 | 1.19 |
| Adjustable Performance Plan cash awards granted for 2010 | 1.05 | (0.03) | 0.04 | 1.06 |
| 2011 Partner Asset Facility awards (PAF2) ⁴ | 0.65 | 0.25 | 0.00 | 0.90 |
| Plus Bond awards granted for 2012 ⁵ | – | – | – | 1.00 |

¹ Represents awards granted in January 2011 for 2010. ² Represents awards granted in January 2012 for 2011. ³ Represents the value of the Adjustable Performance Plan share awards that were converted in August 2012 from Adjustable Performance Plan cash awards granted in 2011 for 2010 and granted in 2010 for 2009. ⁴ Represents the fair value of the 2011 Partner Asset Facility awards that were granted in the first quarter of 2012. ⁵ Represents the fair value of the Plus Bond awards that were granted to certain employees in the Investment Banking division and were fully vested in December 2012.

Discontinued compensation plans

While we believe that the evolution of our compensation instruments over recent years provides a track record of innovation and responsiveness, we also acknowledge that the complexity of our compensation instruments gave internal and external stakeholders concerns with regard to excess potential

leverage and transparency. These issues were taken into account as we have discontinued compensation instruments with leverage components and have provided more comprehensive disclosure on our compensation practices and plans in recent years.

A summary of the principal forms of awards granted in prior years, which have since been discontinued but are still vesting, is shown in the following overview.

Principal outstanding compensation plans

2011 Partner Asset Facility (PAF2)

Basis Cash-based, deferred variable compensation

Vesting start 2012

Vesting end March 31, 2012

Applied to

Performance in year 2011, which included managing directors and directors and certain members of the Executive Board.

General award conditions

The contractual term of a PAF award is four years, but it may be extended to nine years at the election of either the Group or the holders acting collectively. PAF2 units are essentially fixed income structured notes that are exposed to a portion of the credit risk that arises in the Group's derivative activities. The value of the award (for both the interest accrual and the final redemption) will be reduced if the amount of realized credit losses from a specific reference portfolio exceeds a pre-defined threshold. The Group will bear the first USD 500 million of such losses and the PAF2 holders will bear any losses in excess of USD 500 million, up to the full amount of the deferred compensation awarded.

Other award conditions or restrictions

PAF2 holders will receive a semi-annual cash interest payment equivalent to an annual return of 5% (CHF-denominated awards) or 6.5% (USD-denominated awards) applied to the then current balance of the units. The Group can settle the PAF2 units in cash or an equivalent value in shares at its discretion. PAF2 holders are subject to a non-compete/non-solicit provision.

Program objective/rationale

PAF awards provided employees with a fixed income strategy while transferring risk from the Group to employees thereby contributing to risk reduction and capital efficiency.

Adjustable Performance Plan awards

Basis Cash and share-based, deferred variable compensation

Vesting start 2010-2011

Vesting end 2013-2015

Applied to

Performance in 2009-2010, which included the Executive Board, managing directors and directors.

General award conditions

Adjustable Performance Plan awards link awards to future performance through positive and negative adjustments. Vesting ratably over a three-year period for 2009 awards and a four-year period for 2010 awards.

Other award conditions or restrictions

For revenue-generating employees in the divisions, Adjustable Performance Plan awards are linked to the financial performance of the specific business areas in which the employees work and the Group ROE. For employees in Shared Services and other support functions and all Executive Board members, the awards are linked to the Group's adjusted profit or loss and the Group ROE.

Program objective/rationale

Promoting retention of Executive Board members, managing directors and directors.

Scaled Incentive Share Unit (SISU)

Basis Share-based, deferred variable compensation

Vesting start 2010

Vesting end 2014

Applied to

Performance in 2009, which included half of the variable compensation awarded to all managing directors and directors across all divisions.

General award conditions

Vesting ratably over a four-year period.

Other award conditions or restrictions

An SISU is similar to other share-based awards, but offers additional upside depending on the development of the Group share price and the Group reported ROE.

Program objective/rationale

Promoting retention of managing directors and directors.

Incentive Share Unit (ISU)

Basis Share-based, deferred variable compensation

Vesting start 2010

Vesting end 2013

Applied to

Performance in 2009 for all employees.

General award conditions

Vesting ratably over a three-year period.

Other award conditions or restrictions

An ISU is similar to other share-based awards, but offers additional upside depending on the development of the Group share price.

Program objective/rationale

An ISU links employee performance awards to the long-term performance of the Group, with an additional incentive to increase Group share value for the benefit of employees and shareholders.

2008 Partner Asset Facility (PAF)

Basis Cash-based, deferred variable compensation

Vesting start 2008. 66.7% vested upon grant

Vesting end 33.3% vested in March 2009

Applied to

Performance in year 2008, which included all managing directors and directors in Investment Banking.

General award conditions

The contractual term of a PAF award is eight years. PAF awards are indexed to, and represent a first-loss interest in, a specified pool of illiquid assets (Asset Pool) that originated in Investment Banking. The notional value of the Asset Pool was based on the fair market value of the assets within the Asset Pool as of December 31, 2008, and those assets cannot be substituted throughout the contractual term of the award or until liquidated.

Other award conditions or restrictions

PAF holders will receive a semi-annual cash interest payment of the London Interbank Offered Rate plus 250 basis points applied to the notional value of the PAF award granted throughout the contractual term of the award. They will participate in the potential gains on the Asset Pool if the assets within the pool are liquidated at prices above the initial fair market value. If the assets within the Asset Pool are liquidated at prices below the initial fair market value, the PAF holders will bear the first loss on the Asset Pool.

Program objective/rationale

PAF awards were designed to incentivize senior managers in Investment Banking to effectively manage assets which were a direct result of risk taking in Investment Banking during this period. As a result of the PAF program, a significant portion of risk positions associated with the Asset Pool has been transferred to the employees and removed from the Group's risk-weighted assets, resulting in a reduction in capital usage.

Report of the Independent Registered Public Accounting Firm

Credit Suisse Group AG, Zurich

We have audited the accompanying consolidated balance sheets of Credit Suisse Group AG and subsidiaries (the “Group”) as of December 31, 2012 and 2011, and the related consolidated statements of operations, changes in equity, comprehensive income and cash flows, and notes thereto, for each of the years in the three-year period ended December 31, 2012. These consolidated financial statements are the responsibility of the Group's management and the Board of Directors. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States) and Swiss Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Group as of December 31, 2012 and 2011, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Group's internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 22, 2013 expressed an unqualified opinion on the effectiveness of the Group's internal control over financial reporting.

¹ Distributions to owners in funds include the return of original capital invested and any related dividends. ² Transactions with and without ownership changes related to fund activity are all displayed under "not changing ownership". ³ Net income attributable to noncontrolling interests excludes CHF 11 million due to redeemable noncontrolling interests. ⁴ Includes a net tax benefit of CHF 41 million from the excess fair value of shares delivered over recognized compensation expense. ⁵ The Group had purchased certain call options on its own shares to economically hedge share-based compensation awards. In accordance with US GAAP, these call options were designated as equity instruments and, as such, were initially recognized in shareholders' equity at their fair values and not subsequently remeasured. ⁶ Paid out of reserves from capital contributions. ⁷ Represents the accrued portion of the redemption value of redeemable noncontrolling interests in Credit Suisse Hedging-Griffo Investimentos S.A. Refer to "Other commitments" in Note 31 – Guarantees and commitments for further information.

Notes to the consolidated financial statements

1 Summary of significant accounting policies

The accompanying consolidated financial statements of Credit Suisse Group AG (the Group) are prepared in accordance with accounting principles generally accepted in the US (US GAAP) and are stated in Swiss francs (CHF). The financial year for the Group ends on December 31. Certain reclassifications have been made to the prior year's consolidated financial statements to conform to the current year's presentation and had no impact on net income/(loss) or total shareholders' equity.

In preparing the consolidated financial statements, management is required to make estimates and assumptions including, but not limited to, the fair value measurements of certain financial assets and liabilities, the allowance for loan losses, the evaluation of variable interest entities (VIEs), the impairment of assets other than loans, recognition of deferred tax assets, tax uncertainties, pension liabilities, as well as various contingencies. These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the dates of the consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. While management evaluates its estimates and assumptions on an ongoing basis, actual results could differ materially from management's estimates. Market conditions may increase the risk and complexity of the judgments applied in these estimates.

Principles of consolidation

The consolidated financial statements include the financial statements of the Group and its subsidiaries. The Group's subsidiaries are entities in which it holds, directly or indirectly, more than 50% of the voting rights or where it exercises control. The Group consolidates limited partnerships in cases where it is the general partner or is a limited partner with substantive rights to kick out the general partner or dissolve the partnership and participate in significant decisions made in the ordinary course of business. The Group also consolidates VIEs where the Group is the primary beneficiary in accordance with Accounting Standards Codification (ASC) Topic 810 – Consolidation. The effects of material intercompany transactions and balances have been eliminated.

Where a Group subsidiary is a separate legal entity and determined to be an investment company as defined by ASC Topic 946 – Financial Services – Investment Companies, interests in other entities held by this Group subsidiary are not consolidated and are carried at fair value.

Group entities that qualify as broker-dealer entities as defined by ASC Topic 940 – Financial Services – Broker and Dealers do not consolidate investments in voting interest entities that would otherwise qualify for consolidation when the investment is held on a temporary basis for trading purposes. In addition, subsidiaries that are strategic components of a broker-dealers' operations are consolidated regardless of holding intent.

Foreign currency translation

Transactions denominated in currencies other than the functional currency of the related entity are recorded by remeasuring them in the functional currency of the related entity using the foreign exchange rate on the date of the transaction. As of the dates of the consolidated balance sheets, monetary assets and liabilities, such as receivables and payables, are reported using the year-end spot foreign exchange rates. Foreign exchange rate differences are recorded in the consolidated statements of operations. Non-monetary assets and liabilities are recorded using the historic exchange rate.

For the purpose of consolidation, the assets and liabilities of Group companies with functional currencies other than Swiss francs are translated into Swiss franc equivalents using year-end spot foreign exchange rates, whereas revenues and expenses are translated using the weighted average foreign exchange rate for the year. Translation adjustments arising from consolidation are included in accumulated other comprehensive income/(loss) (AOCI) within total shareholders' equity.

Fair value measurement and option

The fair value measurement guidance establishes a single authoritative definition of fair value and sets out a framework for measuring fair value. The fair value option creates an alternative measurement treatment for certain financial assets and financial liabilities. The fair value option can be elected at initial acquisition of the eligible item or at the date when the Group enters into an agreement which gives rise to an eligible item (e.g., a firm commitment or a written loan commitment). If not elected at initial recognition, the fair value option can be applied to an item upon certain triggering events that give rise to a new basis of accounting for that item. The application of the fair value option to a financial asset or a financial liability does not change its classification on the face of the balance sheet and the election is irrevocable. Changes in fair value resulting from the election are recorded in trading revenues.

► Refer to "Fair value option" in Note 33 – Financial instruments for further information.

Cash and due from banks

Cash and due from banks consists of currency on hand, demand deposits with banks or other financial institutions and cash equivalents. Cash equivalents are defined as short-term, highly liquid instruments with original maturities of three months or less, which are held for cash management purposes.

Reverse repurchase and repurchase agreements

Purchases of securities under resale agreements (reverse repurchase agreements) and securities sold under agreements to repurchase substantially identical securities (repurchase agreements) do not constitute economic sales and are therefore treated as collateralized financing transactions and are carried in the consolidated balance sheet at the amount of cash disbursed or received, respectively. Reverse repurchase agreements are recorded as collateralized assets while repurchase agreements are recorded as liabilities, with the underlying securities sold continuing to be recognized in trading assets or investment securities. The fair value of securities to be repurchased and resold is monitored on a daily basis, and additional collateral is obtained as needed to protect against credit exposure.

Assets and liabilities recorded under these agreements are accounted for on one of two bases, the accrual basis or the fair value basis. Under the accrual basis, interest earned on reverse repurchase agreements and interest incurred on repurchase agreements are reported in interest and dividend income and interest expense, respectively. The fair value basis of accounting may be elected pursuant to ASC Topic 825 – Financial Instruments, and any resulting change in fair value is reported in trading revenues. Accrued interest income and expense are recorded in the same manner as under the accrual method. The Group has elected the fair value basis of accounting on some of its agreements.

Reverse repurchase and repurchase agreements are netted if they are with the same counterparty, have the same maturity date, settle through the same clearing institution and are subject to the same master netting agreement.

Securities lending and borrowing transactions

Securities borrowed and securities loaned that are cash-collateralized are included in the consolidated balance sheets at amounts equal to the cash advanced or received. If securities received in a securities lending and borrowing transaction as collateral may be sold or repledged, they are recorded as securities received as collateral in the consolidated balance sheet and a corresponding liability to return the security is recorded. Securities lending transactions against non-cash collateral in which the Group has the right to resell or repledge

the collateral received are recorded at the fair value of the collateral initially received. For securities lending transactions, the Group receives cash or securities collateral in an amount generally in excess of the market value of securities lent. The Group monitors the fair value of securities borrowed and loaned on a daily basis with additional collateral obtained as necessary.

Fees and interest received or paid are recorded in interest and dividend income and interest expense, respectively, on an accrual basis. In the case where the fair value basis of accounting is elected, any resulting change in fair value is reported in trading revenues. Accrued interest income and expense are recorded in the same manner as under the accrual method.

Transfers of financial assets

The Group transfers various financial assets, which may result in the sale of these assets to special purpose entities (SPEs), which in turn issue securities to investors. The Group values its beneficial interests at fair value using quoted market prices, if such positions are traded on an active exchange or financial models that incorporate observable and unobservable inputs.

- ▶ Refer to “Note 32 – Transfers of financial assets and variable interest entities” for further information on the Group's transfer activities.

Trading assets and liabilities

Trading assets and liabilities include debt and equity securities, derivative instruments, certain loans held in broker-dealer entities, commodities and precious metals. Items included in the trading portfolio are carried at fair value and classified as held for trading purposes based on management's intent. Regular-way security transactions are recorded on a trade-date basis. Unrealized and realized gains and losses on trading positions are recorded in trading revenues.

Derivatives

Freestanding derivative contracts are carried at fair value in the consolidated balance sheets regardless of whether these instruments are held for trading or risk management purposes. Commitments to originate mortgage loans that will be held for sale are considered derivatives for accounting purposes. When derivative features embedded in certain contracts that meet the definition of a derivative are not considered clearly and closely related to the host contract, either the embedded feature is accounted for separately at fair value or the entire contract, including the embedded feature, is accounted for at fair value. In both cases, changes in fair value are recorded in the consolidated statements of operations. If separated for measurement purposes, the derivative is recorded in the same

line item in the consolidated balance sheets as the host contract.

Derivatives classified as trading assets and liabilities include those held for trading purposes and those used for risk management purposes that do not qualify for hedge accounting. Derivatives held for trading purposes arise from proprietary trading activity and from customer-based activity. Realized gains and losses, changes in unrealized gains and losses and interest flows are included in trading revenues. Derivative contracts designated and qualifying as fair value hedges, cash flow hedges or net investment hedges are reported as other assets or other liabilities.

The fair value of exchange-traded derivatives is typically derived from observable market prices and/or observable market parameters. Fair values for over-the-counter (OTC) derivatives are determined on the basis of proprietary models using various input parameters. Derivative contracts are recorded on a net basis per counterparty, where an enforceable master netting agreement exists. Where no such agreement exists, fair values are recorded on a gross basis.

Where hedge accounting is applied, the Group formally documents all relationships between hedging instruments and hedged items, including the risk management objectives and strategy for undertaking hedge transactions. At inception of a hedge and on an ongoing basis, the hedge relationship is formally assessed to determine whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items attributable to the hedged risk. The Group discontinues hedge accounting prospectively in the following circumstances:

- (i) the derivative is no longer effective in offsetting changes in the fair value or cash flows of a hedged item (including forecasted transactions);
- (ii) the derivative expires or is sold, terminated or exercised;
- (iii) the derivative is no longer designated as a hedging instrument because it is unlikely that the forecasted transaction will occur; or
- (iv) the designation of the derivative as a hedging instrument is otherwise no longer appropriate.

For derivatives that are designated and qualify as fair value hedges, the carrying value of the underlying hedged items is adjusted to fair value for the risk being hedged. Changes in the fair value of these derivatives are recorded in the same line item of the consolidated statements of operations as the change in fair value of the risk being hedged for the hedged assets or liabilities to the extent the hedge is effective. The change in fair value representing hedge ineffectiveness is recorded separately in trading revenues.

When the Group discontinues fair value hedge accounting because it determines that the derivative no longer qualifies as an effective fair value hedge, the derivative will continue to be carried in the consolidated balance sheets at its fair value, and the hedged asset or liability will no longer be adjusted for changes in fair value attributable to the hedged risk. Interest-related fair value adjustments made to the underlying hedged items will be amortized to the consolidated statements of operations over the remaining life of the hedged item. Any unamortized interest-related fair value adjustment is recorded in the consolidated statements of operations upon sale or extinguishment of the hedged asset or liability, respectively. Any other fair value hedge adjustments remain part of the carrying amount of the hedged asset or liability and are recognized in the consolidated statements of operations upon disposition of the hedged item as part of the gain or loss on disposition.

For hedges of the variability of cash flows from forecasted transactions and floating rate assets or liabilities, the effective portion of the change in the fair value of a designated derivative is recorded in AOCI. These amounts are reclassified into the line item in the consolidated statements of operations in which the hedged item is recorded when the variable cash flow from the hedged item impacts earnings (for example, when periodic settlements on a variable rate asset or liability are recorded in the consolidated statements of operations or when the hedged item is disposed of). The change in fair value representing hedge ineffectiveness is recorded separately in trading revenues.

When hedge accounting is discontinued on a cash flow hedge, the net gain or loss will remain in AOCI and be reclassified into the consolidated statements of operations in the same period or periods during which the formerly hedged transaction is reported in the consolidated statements of operations. When the Group discontinues hedge accounting because it is probable that a forecasted transaction will not occur within the specified date or period plus two months, the derivative will continue to be carried in the consolidated balance sheets at its fair value, and gains and losses that were previously recorded in AOCI will be recognized immediately in the consolidated statements of operations.

For hedges of a net investment in a foreign operation, the change in the fair value of the hedging derivative is recorded in AOCI to the extent the hedge is effective. The change in fair value representing hedge ineffectiveness is recorded in trading revenues. The Group uses the forward method of determining effectiveness for net investment hedges, which results in the time value portion of a foreign currency forward being reported in AOCI to the extent the hedge is effective.

Investment securities

Investment securities include debt securities classified as held-to-maturity and debt and marketable equity securities classified as available-for-sale. Regular-way security transactions are recorded on a trade-date basis.

Debt securities where the Group has the positive intent and ability to hold such securities to maturity are classified as such and are carried at amortized cost, net of any unamortized premium or discount.

Debt and equity securities classified as available-for-sale are carried at fair value. Unrealized gains and losses, which represent the difference between fair value and amortized cost, are recorded in AOCI. Amounts reported in AOCI are net of income taxes.

Amortization of premiums or discounts is recorded in interest and dividend income using the effective yield method through the maturity date of the security.

Recognition of an impairment on debt securities is recorded in the consolidated statements of operations if a decline in fair value below amortized cost is considered other-than-temporary, that is, amounts due according to the contractual terms of the security are not considered collectible, typically due to deterioration in the creditworthiness of the issuer. No impairment is recorded in connection with declines resulting from changes in interest rates to the extent the Group does not intend to sell the investments, nor is it more likely than not that the Group will be required to sell the investments before the recovery of their amortized cost bases, which may be maturity.

Recognition of an impairment on equity securities is recorded in the consolidated statements of operations if a decline in fair value below the cost basis of an investment is considered other-than-temporary. The Group generally considers unrealized losses on equity securities to be other-than-temporary if the fair value has been below cost for more than six months or by more than 20%.

Recognition of an impairment for debt or equity securities establishes a new cost basis, which is not adjusted for subsequent recoveries.

Unrealized losses on available-for-sale securities are recognized in the consolidated statements of operations when a decision has been made to sell a security.

Other investments

Other investments include equity method investments and non-marketable equity securities such as private equity, hedge funds, and restricted stock investments, certain investments in non-marketable mutual funds for which the Group has neither significant influence nor control over the investee, and real estate held for investment.

Equity method investments are investments where the Group has the ability to significantly influence the operating and financial policies of an investee. Significant influence is typically characterized by ownership of 20% to 50% of the voting stock or in-substance common stock of a corporation or 5% or more of limited partnership interests. Equity method investments are accounted for under the equity method of accounting or the fair value option. Under the equity method of accounting, the Group's share of the profit or loss, as well as any impairment on the investee, if applicable, are reported in other revenues. Under the fair value option, changes in fair value are reported in other revenues. The Group has elected the fair value basis of accounting on some of its equity method investments.

The Group's other non-marketable equity securities are carried at cost less other-than-temporary impairment or at fair value if elected under the fair value option. Non-marketable equity securities held by the Group's subsidiaries that are determined to be investment companies as defined by ASC Topic 946 – Financial Services – Investment Companies are carried at fair value, with changes in fair value recorded in other revenues.

Equity method investments and non-marketable equity securities held by broker-dealer entities as defined by ASC Topic 940 – Financial Services – Broker and Dealers are measured at fair value and reported in trading assets when the intent of the broker-dealer entity is to hold the asset temporarily for trading purposes. Changes in fair value are reported in trading revenues.

Real estate held for investment purposes is carried at cost less accumulated depreciation and is depreciated over its estimated useful life, generally 40 to 67 years. Land is carried at historical cost and is not depreciated. These assets are tested for impairment annually, or more frequently, if events or changes in circumstances indicate that the carrying amount may not be recoverable. Recognition of an impairment on such assets establishes a new cost base, which is not adjusted for subsequent recoveries in value.

In connection with the life finance business, the Group invests in single premium immediate annuities (SPIA), which are carried at fair value with the related fair value changes reported in trading revenues. The life finance business also invests in life settlement contracts.

Loans

Loans held-to-maturity

Loans which the Group intends to hold until maturity are carried at outstanding principal balances plus accrued interest, net of the following items: unamortized premiums, discounts on purchased loans, deferred loan origination fees and direct

loan origination costs on originated loans. Interest income is accrued on the unpaid principal balance and net deferred premiums/discounts and fees/costs are amortized as an adjustment to the loan yield over the term of the related loans.

Loans are divided in two portfolio segments, “consumer” and “corporate & institutional”. Consumer loans are disaggregated into the classes of mortgages, loans collateralized by securities and consumer finance. Corporate & institutional loans are disaggregated into the classes of real estate, commercial and industrial loans, financial institutions and governments and public institutions.

Lease financing transactions where the Group is the lessor are classified as loans. Unearned income is amortized to interest and dividend income over the lease term using the effective interest method.

In accordance with Group policies, impaired loans include non-performing loans, non-interest-earning loans, restructured loans and potential problem loans.

- Refer to “Note 18 – Loans, allowance for loan losses and credit quality” for further information.

Allowance for loan losses on loans held-to-maturity

The allowance for loan losses is comprised of the following components: probable credit losses inherent in the portfolio and those losses specifically identified. Changes in the allowance for loan losses are recorded in the consolidated statements of operations in provision for credit losses and in interest income (for provisions on past due interest).

The Group evaluates many factors when estimating the allowance for loan losses, including volatility of default probabilities, rating changes, the magnitude of potential loss, internal risk ratings, and geographic, industry and other economic factors. The component of the allowance representing probable losses inherent in the portfolio is for loans not specifically identified as impaired and that, on a portfolio basis, are considered to contain probable inherent loss. The estimate of this component of the allowance for the consumer loans portfolio involves applying historical and current default probabilities and historical recovery experience and related current assumptions to homogenous loans based on internal risk rating and product type. To estimate this component of the allowance for the corporate & institutional loans portfolio, the Group segregates loans by risk, industry or country rating. Excluded from this estimate process are consumer and corporate & institutional loans that have been specifically identified as impaired or are held at fair value. For lending-related commitments, a provision for losses is estimated based on historical loss and recovery experience and recorded in other liabilities. Changes in the estimate of losses for lending-related commitments are

recorded in the consolidated statements of operations in provision for credit losses.

The estimate of the component of the allowance for specifically identified credit losses on impaired loans is based on a regular and detailed analysis of each loan in the portfolio considering collateral and counterparty risk. The Group considers a loan impaired when, based on current information and events, it is probable that the Group will be unable to collect the amounts due according to the contractual terms of the loan agreement. For certain non-collateral-dependent impaired loans, an impairment is measured using the present value of estimated future cash flows, except that as a practical expedient an impairment may be measured based on a loan’s observable market price. For collateral-dependent impaired loans, an impairment is measured using the fair value of the collateral.

A loan is classified as non-performing no later than when the contractual payments of principal and/or interest are more than 90 days past due except for subprime residential loans which are classified as non-performing no later than when the contractual payments of principal and/or interest are more than 120 days past due. The additional 30 days ensure that these loans are not incorrectly assessed as non-performing during the time when servicing of them typically is being transferred. However, management may determine that a loan should be classified as non-performing notwithstanding that contractual payments of principal and/or interest are less than 90 days past due or, in the case of subprime residential loans, 120 days past due. For non-performing loans, a provision is recorded in an amount equal to any accrued but unpaid interest at the date the loan is classified as non-performing, resulting in a charge to the consolidated statements of operations. In addition, the Group continues to add accrued interest receivable to the loans balance for collection purposes; however, a provision is recorded resulting in no interest income recognition. Thereafter, the outstanding principal balance is evaluated at least annually for collectibility and a provision is established as necessary.

A loan can be further downgraded to non-interest-earning when the collection of interest is considered so doubtful that further accrual of interest is deemed inappropriate. At that time, and on at least a quarterly basis thereafter depending on various risk factors, the outstanding principal balance, net of provisions previously recorded, is evaluated for collectibility and additional provisions are established as required.

Generally, non-performing loans and non-interest-earning loans may be restored to performing status only when delinquent principal and interest are brought up to date in accordance with the terms of the loan agreement and when certain performance criteria are met.

Interest collected on non-performing loans and non-interest-earning loans is accounted for using the cash basis or the cost recovery method or a combination of both.

Loans that are not already classified as non-performing or non-interest-earning but were modified in a troubled debt restructuring are reported as restructured loans. Generally, a restructured loan would have been considered impaired and an associated allowance for loan losses would have been established prior to the restructuring. Loans modified in a troubled debt restructuring are reported as restructured loans to the end of the reporting year in which the loan was modified or for as long as an allowance for loan losses based on the terms specified by the restructuring agreement is associated with the restructured loan or an interest concession made at the time of the restructuring exists. In making the determination of whether an interest rate concession has been made, market interest rates for loans with comparable risk to borrowers of the same credit quality are considered. Loans that have been restructured in a troubled debt restructuring and are performing according to the new terms continue to accrue interest. Loan restructurings may include the receipt of assets in satisfaction of the loan, the modification of loan terms (e.g., reduction of interest rates, extension of maturity dates at a stated interest rate lower than the current market rate for new loans with similar risk, or reduction in principal amounts and/or accrued interest balances) or a combination of both.

Potential problem loans are impaired loans not already classified as non-performing, non-interest earning or restructured loans where contractual payments have been received according to schedule, but where doubt exists as to the collection of future contractual payments. Potential problem loans are evaluated for impairment on an individual basis and an allowance for loan losses is established as necessary. Potential problem loans continue to accrue interest.

The amortization of net loan fees or costs on impaired loans is generally discontinued during the periods in which matured and unpaid interest or principal is outstanding. On settlement of a loan, if the loan balance is not collected in full, an allowance is established for the uncollected amount, if necessary, and the loan is then written off, net of any deferred loan fees and costs.

Write-off of a loan occurs when it is considered certain that there is no possibility of recovering the outstanding principal. Recoveries of loans previously written off are recorded based on the cash or estimated fair value of other amounts received.

- [Refer to "Impaired loans" in Note 18 – Loans, allowance for loan losses and credit quality for further information on the write-off of a loan and related accounting policies.](#)

Loans held-for-sale

Loans, which the Group has the intent to sell in the foreseeable future, are considered held-for-sale and are carried at the lower of amortized cost or market value determined on either an individual method basis, or in the aggregate for pools of similar loans if sold or securitized as a pool. Loans held-for-sale are included in other assets. Gains and losses on loans held-for-sale are recorded in other revenues.

Purchased impaired loans

Purchased loans for which it is probable at acquisition that all contractually required payments will not be received are recorded at their net purchase price and no allowances are carried over. The excess of the estimated cash flows to be collected over the amount paid is accreted into interest income over the estimated recovery period when reasonable estimates can be made about the timing and amount of recovery. The Group does not consider such loans to be impaired at the time of acquisition. Such loans are deemed impaired only if the Group's estimate of cash to be received decreases below the estimate at the time of acquisition. Increases in the estimated expected recovery is recorded as a reversal of allowances, if any, and then recognized as an adjustment of the effective yield of the loan.

Loans held at fair value under the fair value option

Loans and loan commitments for which the fair value option is elected are reported at fair value with changes in fair value reported in trading revenues. The application of the fair value option does not change the loan's classification. Loan commitments carried at fair value are recorded in other assets or other liabilities, respectively.

Premises and equipment

Premises are carried at cost less accumulated depreciation and are depreciated on a straight-line basis over their estimated useful lives, generally 40 to 67 years. Land is carried at historical cost and is not depreciated. Alterations and improvements to rented premises are depreciated on a straight-line basis over the shorter of the lease term or estimated useful life, which is not to exceed ten years. Other tangible fixed assets such as computers, machinery, furnishings, vehicles, other equipment and building improvements are depreciated using the straight-line method over their estimated useful lives, generally three to ten years.

The Group capitalizes costs relating to the acquisition, installation and development of software with a measurable economic benefit, but only if such costs are identifiable and can be reliably measured. The Group depreciates capitalized software costs on a straight-line basis over the estimated use-

ful life of the software, generally not exceeding three years, taking into consideration the effects of obsolescence, technology, competition and other economic factors.

The Group reflects finance leasing activities for which it is the lessee by recording an asset in premises and equipment and a corresponding liability in other liabilities at an amount equal to the smaller of the present value of the minimum lease payments or fair value, and the leased asset is depreciated over the shorter of the asset's estimated useful life or the lease term.

Goodwill and other intangible assets

Goodwill arises on the acquisition of subsidiaries and equity method investments. It is measured as the excess of the fair value of the consideration transferred, the fair value of any noncontrolling interest in the acquiree and the fair value of any previously held equity interest in the acquired subsidiary, over the net of the acquisition-date fair values of the identifiable assets acquired and the liabilities assumed. Goodwill is not amortized, rather it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that goodwill may be impaired. Goodwill is allocated to the Group's reporting units for the purposes of the impairment test.

Other intangible assets may be acquired individually or as part of a group of assets assumed in a business combination. Other intangible assets include but are not limited to: patents, licenses, copyrights, trademarks, branch networks, mortgage servicing rights, customer base and deposit relationships. Acquired intangible assets are initially measured at the amount of cash disbursed or the fair value of other assets distributed. Other intangible assets that have a finite useful life are amortized over that period. Other intangible assets acquired after January 1, 2002, that are determined to have an indefinite useful life, are not amortized; rather they are tested for impairment annually, or more frequently if events or changes in circumstances indicate that the indefinite intangible asset may be impaired. Mortgage servicing rights are included in non-amortizing other intangible assets and are carried at fair value, with changes in fair value recognized through earnings in the period in which they occur. Mortgage servicing rights represent the right to perform specified mortgage servicing activities on behalf of third parties. Mortgage servicing rights are either purchased from third parties or retained upon sale of acquired or originated loans.

Recognition of an impairment on tangible fixed assets and finite intangible assets

The Group evaluates premises and equipment and finite intangible assets for impairment at least annually and whenever events or changes in circumstances indicate that the carrying

amount may not be recoverable. If the asset is considered not to be recoverable, an impairment is recorded in general and administrative expenses to the extent the fair value of the asset is less than its carrying amount. Recognition of an impairment on such assets establishes a new cost base, which is not adjusted for subsequent recoveries in value.

Income taxes

Deferred tax assets and liabilities are recorded for the expected future tax consequences of temporary differences between the carrying amounts of assets and liabilities at the dates of the consolidated balance sheets and their respective tax bases. Deferred tax assets and liabilities are computed using currently enacted tax rates and are recorded in other assets and other liabilities, respectively. Income tax expense or benefit is recorded in income tax expense/(benefit), except to the extent the tax effect relates to transactions recorded directly in total shareholders' equity. Deferred tax assets are reduced by a valuation allowance, if necessary, to the amount that management believes will more likely than not be realized. Deferred tax assets and liabilities are adjusted for the effect of changes in tax laws and rates in the period in which changes are approved by the relevant authority. Deferred tax assets and liabilities are presented on a net basis for the same tax-paying component within the same tax jurisdiction.

The Group follows the guidance in ASC Topic 740 – Income Taxes, which sets out a consistent framework to determine the appropriate level of tax reserves to maintain for uncertain tax positions. The Group determines whether it is more likely than not that an income tax position will be sustained upon examination based on the technical merits of the position. Sustainable income tax positions are then measured to determine the amount of benefit eligible for recognition in the consolidated financial statements. Each such sustainable income tax position is measured at the largest amount of benefit that is more likely than not to be realized upon ultimate settlement.

Life settlement contracts

Life settlement contracts are initially recognized at the transaction price and subsequently carried at fair value unless the Group elects to apply the investment method. The contracts that are not accounted for under the investment method are carried at fair value and are recorded in trading assets.

Under the investment method, the contracts are initially recognized at the transaction price plus any directly related external costs and are recorded in other investments. Subsequently, all continuing premium payments made are capitalized unless the aggregated carrying value exceeds fair value in

which case an impairment allowance is established so that the carrying value does not exceed fair value.

Brokerage receivables and brokerage payables

The Group recognizes receivables and payables from transactions in financial instruments purchased from and sold to customers, banks, and broker-dealers. The Group is exposed to risk of loss resulting from the inability of counterparties to pay for or deliver financial instruments purchased or sold, in which case the Group would have to sell or purchase, respectively, these financial instruments at prevailing market prices. To the extent an exchange or clearing organization acts as counterparty to a transaction, credit risk is generally considered to be limited. The Group establishes credit limits for each customer and requires them to maintain margin collateral in compliance with applicable regulatory and internal guidelines. In order to conduct trades with an exchange or a third-party bank, the Group is required to maintain a margin. This is usually in the form of cash and deposited in a separate margin account with the exchange or broker. If available information indicates that it is probable that a brokerage receivable is impaired, an allowance is established. Write-offs of brokerage receivables occur if the outstanding amounts are considered uncollectible.

Other assets

Derivative instruments used for hedging

Derivative instruments are carried at fair value. The fair values of derivative instruments held for hedging are included as other assets or other liabilities in the consolidated balance sheets. The accounting treatment used for changes in fair value of hedging derivatives depends on the designation of the derivative as either a fair value hedge, cash flow hedge or hedge of a net investment in a foreign operation. Changes in fair value representing hedge ineffectiveness are reported in trading revenues.

Long-term debt

Total long-term debt is comprised of debt issuances which do not contain derivative features (vanilla debt), as well as hybrid debt instruments with embedded derivatives, which are issued as part of the Group's structured product activities. Long-term debt includes both Swiss franc and foreign currency denominated fixed and variable rate bonds.

The Group actively manages the interest rate risk on vanilla debt through the use of derivative contracts, primarily interest rate and currency swaps, in particular, fixed rate debt is hedged with receive-fixed, pay-floating interest rate swaps. The Group elected to fair value this fixed rate debt upon implementation of the fair value option on January 1, 2007, with changes in fair value recognized as a component of trading

revenues. The Group did not elect to apply the fair value option to fixed-rate debt issued by the Group since January 1, 2008 and instead applies hedge accounting per the guidance of ASC Topic 815 – Derivatives and Hedging.

The Group's long-term debt also includes various equity-linked and other indexed instruments with embedded derivative features, whose payments and redemption values are linked to commodities, stocks, indices, currencies or other assets. The Group elected to account for substantially all of these instruments at fair value. Changes in the fair value of these instruments are recognized as a component of trading revenues.

Other liabilities

Guarantees

In cases where the Group acts as a guarantor, the Group recognizes in other liabilities, at the inception of a guarantee, a liability for the fair value of the obligations undertaken in issuing such a guarantee, including its ongoing obligation to perform over the term of the guarantee in the event that certain events or conditions occur.

Pensions and other post-retirement benefits

The Group uses the projected unit credit actuarial method to determine the present value of its projected benefit obligations (PBO) and the current and past service costs or credits related to its defined benefit and other post-retirement benefit plans. The measurement date used to perform the actuarial valuation is December 31.

Certain key assumptions are used in performing the actuarial valuations. These assumptions must be made concerning the future events that will determine the amount and timing of the benefit payments and thus require significant judgment and estimates by Group management. Among others, assumptions have to be made with regard to discount rates, expected return on plan assets and salary increases.

The assumed discount rates reflect the rates at which the pension benefits could be effectively settled. These rates are determined based on yields of high-quality corporate bonds currently available and are expected to be available during the period to maturity of the pension benefits. In countries where no deep market in high-quality corporate bonds exists, the estimate is based on governmental bonds adjusted to include a risk premium reflecting the additional risk for corporate bonds.

The expected long-term rate of return on plan assets is determined on a plan-by-plan basis, taking into account asset allocation, historical rate of return, benchmark indices for similar-type pension plan assets, long-term expectations of future returns and investment strategy.

Health care cost trend rates are determined by reviewing external data and the Group's own historical trends for health

care costs. Salary increases are determined by reviewing external data and considering internal projections.

The funded status of the Group's defined benefit postretirement and pension plans is recognized in the consolidated balance sheets.

Actuarial gains and losses in excess of 10% of the greater of the PBO or the market value of plan assets and unrecognized prior service costs or credits are amortized to net periodic pension and other post-retirement cost on a straight-line basis over the average remaining service life of active employees expected to receive benefits.

The Group records pension expense for defined contribution plans when the employee renders service to the company, essentially coinciding with the cash contributions to the plans.

Share-based compensation

For all share-based awards granted to employees and existing awards modified on or after January 1, 2005, compensation expense is measured at grant date or modification date based on the fair value of the number of awards for which the requisite service is expected to be rendered and is recognized in the consolidated statements of operations over the required service period on a straight-line basis. For all outstanding unvested share-based awards as of January 1, 2005, compensation expense is measured based on the original grant date fair value of the award and is recognized over the remaining requisite service period of each award on a straight-line basis.

The Group uses the tax law ordering approach to determine the portion of the total tax expense that relates to windfall tax benefits that are to be recorded in additional paid-in capital. In addition, it elected to use the practical transition option in determining the amount of windfall tax benefits recorded in additional paid-in capital arising on awards that were fully vested prior to January 1, 2005.

Compensation expense for share-based awards that vest in annual installments (graded vesting), which only contain a service condition that affects vesting, is recognized on a straight-line basis over the service period for the entire award. However, if such awards contain a performance condition, then each installment is expensed as if it were a separate award ("front-loaded" expense recognition). Furthermore, recognition of compensation expense is accelerated to the date an employee becomes eligible for retirement. For awards granted to employees eligible for retirement prior to January 1, 2005, the Group's policy is to record compensation expense over the requisite service period.

Certain share-based awards also contain a performance condition, where the number of shares the employee is to receive is dependent on the performance (e.g., net income or

return on equity (ROE)) of the Group or a division of the Group. If the employee is also required to provide the service stipulated in the award terms, the amount of compensation expense attributed to the incremental additional units expected to be received at vesting due to this performance condition is estimated on the grant date and subsequent changes in this estimate are recorded in the consolidated statements of operations over the remaining service period.

When awards contain market conditions, where the number of shares the employee receives varies based on changes in the Group share price, the incremental amount of extra shares the employee is expected to receive due to the market condition is estimated on the grant date and the total compensation expense is not adjusted thereafter for changes in the Group share price.

Certain employees own non-substantive equity interests in the form of carried interests in private equity funds managed by the Group. Expenses recognized under these ownership interests are reflected in the consolidated statements of operations in compensation and benefits.

The Group has certain option plans outstanding, primarily related to 1999 and prior years, which include a cash settlement feature. For those plans, liability award accounting is applied until settlement of the awards.

Own shares, own bonds and financial instruments on own shares

The Group may buy and sell own shares, own bonds and financial instruments on own shares within its normal trading and market-making activities. In addition, the Group may hold its own shares to satisfy commitments arising from employee share-based compensation awards. Own shares are recorded at cost and reported as treasury shares, resulting in a reduction to total shareholders' equity. Financial instruments on own shares are recorded as assets or liabilities or as equity when the criteria for equity classification are met. Dividends received by subsidiaries on own shares and unrealized and realized gains and losses on own shares classified in total shareholders' equity are excluded from the consolidated statements of operations.

Any holdings of bonds issued by any Group entity are eliminated in the consolidated financial statements.

Net interest income

Interest income and interest expense arising from interest-bearing assets and liabilities other than those carried at fair value or the lower of cost or market are accrued, and any related net deferred premiums, discounts, origination fees or costs are amortized as an adjustment to the yield over the life of the related asset and liability. Interest from debt securities and divi-

dends on equity securities carried as trading assets and trading liabilities are recorded in interest and dividend income.

► [Refer to Loans for further information on interest on loans.](#)

Commissions and fees

Fee revenue is recognized when all of the following criteria have been met: persuasive evidence of an arrangement exists, services have been rendered, the price is fixed or determinable and collectibility is reasonably assured. Fee income can be divided into two broad categories: income earned from services that are provided over a certain period of time, for which customers are generally billed on an annual or semi-annual basis, and income earned from providing transaction-type services. Fees earned from services that are provided over a certain period of time are recognized ratably over the service period. Fees earned from providing transaction-type services are recognized when the service has been completed. Performance-linked fees or fee components are recognized at any contractual measurement date when the contractually agreed thresholds are met.

Revenues from underwriting and fees from mergers and acquisitions (M&A) and other corporate finance advisory services are recorded at the time the underlying transactions are substantially completed and there are no other contingencies associated with the fees.

Transaction-related expenses are deferred until the related revenue is recognized, assuming they are deemed direct and incremental; otherwise, they are expensed as incurred. Underwriting fees are reported net of related expenses. Expenses associated with financial advisory services are recorded in operating expenses unless reimbursed by the client.

In circumstances where the Group contracts to provide multiple products, services or rights to a counterparty, an evaluation is made as to whether separate revenue recognition events have occurred. This evaluation considers the stand-alone value of items already delivered and if there is a right of return or warranties on delivered items and services, and the probability of delivery of remaining undelivered items or services. This evaluation is made on a transaction by transaction basis.

If the criteria noted are met, then the transaction is considered a multiple-deliverable arrangement where revenue recognition is determined separately for each deliverable. The consideration received on the total arrangement is allocated to the multiple deliverables based on the selling price of each deliverable. The selling price used for each deliverable will be based on vendor-specific objective evidence if available, third-party evidence if vendor-specific objective evidence is not available, or estimated selling price if neither vendor-specific objective evidence or third-party evidence is available.

Taxes collected from customers and remitted to governmental authorities are accounted for on a net basis.

2 Recently issued accounting standards

Recently adopted accounting standards

ASC Topic 220 – Comprehensive Income

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-12, "Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05" (ASU 2011-12), an update to ASC Topic 220 – Comprehensive Income. The amendment delays the effective date of those changes in ASU 2011-05 that relate to the presentation of reclassification adjustments. ASU 2011-12 was effective upon issuance and its adoption did not impact the Group's financial position, results of operations or cash flows.

In June 2011, the FASB issued ASU 2011-05, "Presentation of Comprehensive Income" (ASU 2011-05), an update to ASC Topic 220 – Comprehensive Income. ASU 2011-05 provides an entity with the option to present total comprehensive income either in a single continuous statement or in two separate but consecutive statements. The adoption of ASU

2011-05 on January 1, 2012 did not impact the Group's financial position, results of operations or cash flows.

ASC Topic 350 – Intangibles – Goodwill and Other

In September 2011, the FASB issued ASU 2011-08, "Testing Goodwill for Impairment" (ASU 2011-08), an update to ASC Topic 350 – Intangibles – Goodwill and Other. The amendments in ASU 2011-08 permit an entity to qualitatively assess whether the fair value of the reporting unit is less than the carrying amount. Based on the qualitative assessment, if an entity determines that it is more likely than not that the fair value of the reporting unit is less than the carrying amount, then the entity must perform step one of the goodwill impairment test by calculating the fair value of the reporting unit and comparing the fair value to the carrying amount of the reporting unit. If the carrying amount of the reporting unit exceeds its fair value, then the entity is required to perform the second step of the goodwill impairment test to measure the amount of the impairment loss, if any. The adoption of ASU 2011-08 on Jan-

uary 1, 2012 did not have a material impact on the Group's financial position, results of operations or cash flows.

ASC Topic 360 – Property, Plant and Equipment

In December 2011, the FASB issued ASU 2011-10, "Derecognition of in Substance Real Estate – a Scope Clarification, a consensus of the FASB Emerging Issues Task Force" (ASU 2011-10), an update to ASC Topic 360 – Property, Plant and Equipment. The ASU specifies that the guidance in ASC Subtopic 360-20, Property, Plant and Equipment – Real Estate Sales, would apply to an entity that ceases to have a controlling financial interest in a subsidiary that is in substance real estate as a result of default on the subsidiary's non-recourse debt. The adoption of ASU 2011-10 on July 1, 2012 did not have a material impact on the Group's financial position, results of operations or cash flows.

ASC Topic 820 – Fair Value Measurement

In May 2011, the FASB issued ASU 2011-04, "Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs" (ASU 2011-04), an update to ASC Topic 820 – Fair Value Measurement. The amendments in ASU 2011-04 include clarifications about the application of existing fair value measurement requirements and changes to principles for measuring fair value. ASU 2011-04 also requires additional disclosures about fair value measurements. The adoption of ASU 2011-04 on January 1, 2012 did not have a material impact on the Group's financial position, results of operations or cash flows.

- Refer to "Note 33 – Financial instruments" for further information.

ASC Topic 860 – Transfers and Servicing

In April 2011, the FASB issued ASU 2011-03, "Reconsideration of Effective Control for Repurchase Agreements" (ASU 2011-03), an update to ASC Topic 860 – Transfers and Servicing. Current guidance prescribes when an entity may or may not recognize a sale upon the transfer of financial assets subject to repurchase agreements. That determination is based, in part, on whether the entity has maintained effective control over the transferred financial assets. ASU 2011-03 removes from the assessment of effective control the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets. The adoption of ASU 2011-03 on January 1, 2012 did not have a material impact on the Group's financial position, results of operations or cash flows.

Standards to be adopted in future periods

ASC Topic 210 – Balance Sheet

In January 2013, the FASB issued ASU 2013-01, "Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities" (ASU 2013-01), an update to ASC Topic 210 – Balance Sheet. ASU 2013-01 clarifies the scope of ASU 2011-11 and is effective for interim and annual reporting periods beginning on or after January 1, 2013. The adoption of ASU 2013-01 on January 1, 2013 did not have an impact on the Group's financial position, results of operations or cash flows.

In December 2011, the FASB issued ASU 2011-11, "Disclosures about Offsetting Assets and Liabilities" (ASU 2011-11), an update to ASC Topic 210 – Balance Sheet. ASU 2011-11 is effective for interim and annual reporting periods beginning on or after January 1, 2013. An entity is required to provide the disclosures retrospectively for all comparative periods presented. The adoption of ASU 2011-11 on January 1, 2013 did not have an impact on the Group's financial position, results of operations or cash flows.

ASC Topic 220 – Comprehensive Income

In February 2013, the FASB issued ASU 2013-02, "Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income" (ASU 2013-02), an update to ASC Topic 220 – Comprehensive Income. The amendments require an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. ASU 2013-02 is effective for interim and annual reporting periods beginning on or after January 1, 2013. The adoption of ASU 2013-02 on January 1, 2013 did not have an impact on the Group's financial position, results of operations or cash flows.

ASC Topic 830 – Foreign Currency Matters

In March 2013, the FASB issued ASU 2013-05, "Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity" (ASU 2013-05), an update to ASC Topic 830 – Foreign Currency Matters. The amendments provide guidance for the treatment of the cumulative translation adjustment when an entity ceases to hold a controlling financial interest in a subsidiary or group of assets within a foreign entity. ASU 2013-05 is effective for interim and annual reporting periods beginning after December 15, 2013. The Group is currently evaluating the impact of adoption of ASU 2013-05 on the Group's financial position, results of operations or cash flows.

3 Business developments and subsequent events

The Group's significant divestitures and acquisitions for the years ended December 31, 2012, 2011 and 2010, respectively, as well as the Group's significant shareholders are discussed below.

Divestitures

On January 10, 2013, Credit Suisse announced that it signed an agreement to sell its ETF business, with assets under management of CHF 16.1 billion as of December 31, 2012, to BlackRock, Inc. The transaction is expected to be completed by the end of the second quarter of 2013, subject to regulatory approvals.

In July 2012, the Group sold its remaining holding in Aberdeen Asset Management (Aberdeen), resulting in a total gain of CHF 384 million that was recognized in 2012.

Mergers and acquisitions

The Group acquired the remaining equity interests in Credit Suisse Hedging-Griffo Investimentos S.A. (Hedging-Griffo) as contemplated under existing option arrangements. The costs associated with the acquisition were covered by the issuance of mandatory convertible securities as announced on July 18, 2012.

In June 2012, the Group announced the completion of its acquisition of HSBC's private banking business in Japan, which includes expanded coverage through additional offices in Osaka and Nagoya.

Credit Suisse AG merged with Clariden Leu AG on April 2, 2012, assuming all of its rights and obligations.

On April 30, 2011, the Group completed the acquisition of ABN AMRO Bank's (formerly Fortis Bank Nederland) PFS hedge fund administration business, a global leader in hedge fund administration services.

On March 24, 2011, Credit Suisse Group AG owned 100% of the share capital of Neue Aargauer Bank AG after the cancellation of remaining shares pursuant to Art. 33 of the Swiss Federal Act on Stock Exchanges and Securities Trading entered into force.

In 2010, the Group acquired a significant noncontrolling interest of York Capital Management (York), a global hedge fund manager, based in New York. Under the terms of the transaction, the Group paid an initial USD 425 million (CHF 419 million) for its interest in York. The transaction also provides for earn-out payments based on 5-year financial performance by York as well as non-compete arrangements for the chief executive officer (CEO), chief investment officer and other senior York principals.

Joint ventures

On November 6, 2012, Credit Suisse AG and Qatar Holding LLC announced that they signed an agreement to form an asset management joint venture, Aventicum Capital Management (Aventicum). Aventicum will operate out of two hubs including a Doha-based business, focused on investment strategies in the Middle East, Turkey and other frontier markets and an international business, based outside of the region. The Doha-based business will launch in early 2013, with the launch of the international business following later in the year.

Capital measures

In July 2012, the Group raised CHF 3.8 billion mandatory and contingent convertible securities (MACCS) that are mandatorily convertible into 233.5 million shares at a conversion price of CHF 16.29 per share on March 29, 2013 (subject to early conversion upon certain contingency and viability events), with settlement and delivery of shares in early April 2013. Strategic and institutional investors purchased CHF 2.0 billion of MACCS and shareholders exercised preferential subscription rights for CHF 1.8 billion of MACCS. The MACCS will be accounted for as debt until conversion into equity, utilizing authorized capital.

In July 2012, the Group exchanged a portion of US dollar-denominated existing tier 1 capital notes issued in 2008 (hybrids) into high trigger tier 1 buffer capital notes (BCN), thereby accelerating an exchange initially scheduled for October 2013. The conversion floor price of the BCN delivered in the exchange (as well as the remaining BCN scheduled to be delivered in 2013) has been adjusted to the conversion price of the MACCS described above. This acceleration did not have any impact on reported balance sheet balances as BCN have been recognized on the balance sheet since the BCN commitment agreement in February 2011.

In July 2012, a voluntary exchange offer was completed, under which certain employees elected to convert any future cash payments from deferred compensation awards under the Adjustable Performance Plan awards for shares at the same price as the conversion price under the MACCS.

Subsequent event

On March 13, 2013, certain Group entities entered into agreements with bond investors of affiliates of National Century Financial Enterprises, Inc. (NCFE) to end all bond investor litigation against Credit Suisse. As a result of this settlement, the Group increased existing NCFE-related litigation provisions

by CHF 227 million, resulting in an after tax charge of CHF 134 million in respect of its previously reported 2012 financial results.

- ▶ Refer to “Note 37 – Litigation” for further information on the NCFE-related litigation.

Significant shareholders

In a disclosure notification that the Group published on July 24, 2012, the Group was notified that as of July 18, 2012, The Olayan Group, through its registered entity Crescent Holding GmbH, held 78.4 million, or 6.1%, of the registered

Group shares issued as of the date of the notified transaction. No further disclosure notification was received from The Olayan Group relating to holdings of registered Group shares in 2012.

In a disclosure notification that the Group published on April 30, 2011, the Group was notified that as of April 21, 2011, Qatar Holding LLC held 73.2 million shares, or 6.2%, of the registered Group shares issued as of the date of the notified transaction. No disclosure notifications were received from Qatar Holding LLC relating to holdings of registered Group shares in 2012.

4 Discontinued operations

On December 31, 2008, the Group signed an agreement to sell part of its traditional investments business in Asset Management to Aberdeen. The transaction was completed with the final closing on July 1, 2009. As part of the sale of the business, the Group purchased certain assets in the amount of CHF 114 million in the first quarter of 2010 in accordance with contractual obligations and recognized losses of CHF 19 million that were included in discontinued operations in 2010. The remaining balance of the assets purchased in the first quarter of 2010 was sold, or matured in the first quarter of 2011.

The results of operations of the business sold have been reflected in income/(loss) from discontinued operations in the consolidated statements of operations for the relevant periods presented. The assets and liabilities of the business sold were presented as assets of discontinued operations held-for-sale and liabilities of discontinued operations held-for-sale, respectively, in the consolidated balance sheet beginning in the fourth quarter of 2008. Assets and liabilities are reclassified as held-for-sale in the period in which the disposal determination is made, and prior periods are not reclassified.

5 Segment information

The Group is a global financial services company domiciled in Switzerland. The Group's business consists of two segments: Private Banking & Wealth Management and Investment Banking. The Group's results reflect the integration of its previously reported Private Banking and Asset Management divisions into a single, new Private Banking & Wealth Management division and the transfer of the majority of its securities trading and sales business in Switzerland from Investment Banking into Private Banking & Wealth Management. This reorganization was effective November 30, 2012. Prior periods have been restated to conform to the current presentation. The two segments are complemented by Shared Services, which provides support in the areas of finance, operations, human resources, legal and compliance, risk management and IT.

The segment information reflects the Group's reportable segments as follows:

- Private Banking & Wealth Management offers comprehensive advice and a wide range of financial solutions to private, corporate and institutional clients. The Private Banking & Wealth Management division comprises the Wealth Management Clients, Corporate & Institutional Clients and Asset Management businesses. Wealth Management Clients serves ultra-high-net-worth and high-net-worth individuals around the globe and private clients in Switzerland. Corporate & Institutional Clients serves the needs of corporations and institutional clients, mainly in Switzerland. Asset Management offers a wide range of investment products and solutions across asset classes and for all investment styles, serving governments, institutions, corporations and individuals worldwide.
- Investment Banking offers investment banking and securities products and services to corporate, institutional and government clients around the world. Its products and

services include debt and equity underwriting, sales and trading, M&A advice, divestitures, corporate sales, restructuring and investment research.

Corporate Center includes parent company operations such as Group financing, expenses for projects sponsored by the Group and certain expenses that have not been allocated to the segments. In addition, Corporate Center includes consolidation and elimination adjustments required to eliminate inter-company revenues and expenses.

Noncontrolling interest-related revenues and expenses resulting from the consolidation of certain private equity funds and other entities in which the Group does not have a significant economic interest (SEI) in such revenues and expenses are reported as noncontrolling interests without SEI. The consolidation of these entities does not affect net income attributable to shareholders as the amounts recorded in net revenues and total operating expenses are offset by corresponding amounts reported as noncontrolling interests. In addition, the Group's tax expense is not affected by these revenues and expenses.

Revenue sharing and cost allocation

Responsibility for each product is allocated to a segment, which records all related revenues and expenses. Revenue-sharing and service level agreements govern the compensation received by one segment for generating revenue or providing services on behalf of another. These agreements are negotiated periodically by the relevant segments on a product-by-product basis.

The aim of revenue-sharing and cost allocation agreements is to reflect the pricing structure of unrelated third-party transactions.

Corporate services and business support in finance, operations, human resources, legal and compliance, risk manage-

ment and IT are provided by the Shared Services area. Shared Services costs are allocated to the segments and Corporate Center based on their requirements and other relevant measures.

Funding

The Group centrally manages its funding activities. New securities for funding and capital purposes are issued primarily by Credit Suisse AG, the Swiss bank subsidiary of the Group (the Bank). The Bank lends funds to its operating subsidiaries and affiliates on both a senior and subordinated basis, as needed, the latter typically to meet capital requirements, or as desired by management to capitalize on opportunities. Capital is distributed to the segments considering factors such as regulatory capital requirements, utilized economic capital and the historic and future potential return on capital.

Transfer pricing, using market rates, is used to record net revenues and expense in each of the segments for this capital and funding. The Group's funds transfer pricing system is designed to allocate to its businesses funding costs in a way that incentivizes their efficient use of funding. The Group's funds transfer pricing system is an essential tool that allocates to the businesses the short-term and long-term costs of funding their balance sheet and the costs associated with funding liquidity and balance sheet items, such as goodwill, which are beyond the control of individual businesses. This is of greater importance in a stressed capital markets environment where raising funds is more challenging and expensive. Under this system, the Group's businesses are also credited to the extent they provide long-term stable funding.

Taxes

The Group's segments are managed and reported on a pre-tax basis.

Net revenues and income/(loss) from continuing operations before taxes

| in | 2012 | 2011 | 2010 |
|--|---------------|---------------|---------------|
| Net revenues (CHF million) | | | |
| Private Banking & Wealth Management | 13,541 | 13,447 | 14,580 |
| Investment Banking | 12,558 | 10,460 | 15,873 |
| Corporate Center | (2,493) | 1,522 | 172 |
| Noncontrolling interests without SEI | 360 | 796 | 761 |
| Net revenues | 23,966 | 26,225 | 31,386 |
| Income/(loss) from continuing operations before taxes (CHF million) | | | |
| Private Banking & Wealth Management | 3,775 | 2,961 | 4,142 |
| Investment Banking | 2,002 | (593) | 3,594 |
| Corporate Center | (3,898) | 381 | (936) |
| Noncontrolling interests without SEI | 302 | 712 | 687 |
| Income from continuing operations before taxes | 2,181 | 3,461 | 7,487 |

Total assets

| end of | 2012 | 2011 |
|--------------------------------------|----------------|------------------|
| Total assets (CHF million) | | |
| Private Banking & Wealth Management | 407,329 | 392,201 |
| Investment Banking | 658,622 | 790,167 |
| Corporate Center ¹ | (145,777) | (137,952) |
| Noncontrolling interests without SEI | 4,106 | 4,749 |
| Total assets | 924,280 | 1,049,165 |

¹ Under the central treasury model, Group financing results in intra-Group balances between the segments. The elimination of these assets and liabilities occurs in the Corporate Center.

Net revenues and income/(loss) from continuing operations before taxes by geographic location

| in | 2012 | 2011 | 2010 |
|--|---------------|---------------|---------------|
| Net revenues (CHF million) | | | |
| Switzerland | 8,818 | 8,584 | 9,185 |
| EMEA | 3,297 | 6,490 | 7,411 |
| Americas | 10,015 | 9,417 | 12,844 |
| Asia Pacific | 1,836 | 1,734 | 1,946 |
| Net revenues | 23,966 | 26,225 | 31,386 |
| Income/(loss) from continuing operations before taxes (CHF million) | | | |
| Switzerland | 1,680 | 455 | 1,734 |
| EMEA | (1,635) | 1,313 | 1,519 |
| Americas | 2,960 | 2,613 | 5,036 |
| Asia Pacific | (824) | (920) | (802) |
| Income from continuing operations before taxes | 2,181 | 3,461 | 7,487 |

The designation of net revenues and income/(loss) from continuing operations before taxes is based on the location of the office recording the transactions. This presentation does not reflect the way the Group is managed.

Total assets by geographic location

| end of | 2012 | 2011 |
|-----------------------------------|----------------|------------------|
| Total assets (CHF million) | | |
| Switzerland | 199,595 | 214,552 |
| EMEA | 222,483 | 277,783 |

8 Trading revenues

| in | 2012 | 2011 | 2010 |
|---|--------------|--------------|--------------|
| Trading revenues (CHF million) | | | |
| Interest rate products | 2,707 | 6,794 | 5,866 |
| Foreign exchange products | 559 | (4,433) | 2,258 |
| Equity/index-related products | 139 | 1,644 | 2,211 |
| Credit products | (3,306) | 522 | (1,644) |
| Commodity, emission and energy products | 198 | 361 | 323 |
| Other products | 898 | 132 | 324 |
| Trading revenues | 1,195 | 5,020 | 9,338 |

Represents revenues on a product basis which are not representative of business results within segments, as segment results utilize financial instruments across various product types.

Trading revenues includes revenues from trading financial assets and liabilities as follows:

- Equities;
- Commodities;
- Listed and OTC derivatives;
- Derivatives linked to funds of hedge funds and providing financing facilities to funds of hedge funds;
- Market making in the government bond and associated OTC derivative swap markets;
- Domestic, corporate and sovereign debt, convertible and non-convertible preferred stock and short-term securities such as floating rate notes and commercial paper (CP);
- Market making and positioning in foreign exchange products;
- Credit derivatives on investment grade and high yield credits;
- Trading and securitizing all forms of securities that are based on underlying pools of assets; and
- Life settlement contracts.

Trading revenues also includes changes in the fair value of financial assets and liabilities elected to fair value under US GAAP. The main components include certain instruments from the following categories:

- Central bank funds purchased/sold;
- Securities purchased/sold under resale/repurchase agreements;
- Securities borrowing/lending transactions;
- Loans and loan commitments; and
- Customer deposits, short-term borrowings and long-term debt.

Managing the risks

As a result of the Group's broad involvement in financial products and markets, its trading strategies are correspondingly diverse and exposures are generally spread across a diversified range of risk factors and locations. The Group uses an economic capital limit structure to limit overall risk taking. The level of risk incurred by its divisions is further restricted by a variety of specific limits, including consolidated controls over trading exposures. Also, as part of its overall risk management, the Group holds a portfolio of economic hedges. Hedges are impacted by market movements, similar to trading securities, and may result in gains or losses on the hedges which offset losses or gains on the portfolios they were designed to economically hedge. The Group manages its trading risk with regard to both market and credit risk. For market risk, it uses tools capable of calculating comparable exposures across its many activities, as well as focused tools that can specifically model unique characteristics of certain instruments or portfolios.

The principal measurement methodology for trading assets, as well as most instruments for which the fair value option was elected, is value-at-risk. The Group holds securities as collateral and enters into credit default swaps (CDS) to mitigate the credit risk on these products.

9 Other revenues

| in | 2012 | 2011 | 2010 |
|--------------------------------------|--------------|--------------|--------------|
| Other revenues (CHF million) | | | |
| Noncontrolling interests without SEI | 336 | 701 | 737 |
| Loans held-for-sale | (37) | (4) | (84) |
| Long-lived assets held-for-sale | 458 | (40) | (176) |
| Equity method investments | 150 | 141 | 209 |
| Other investments | 749 | 457 | 170 |
| Other | 892 | 565 | 573 |
| Other revenues | 2,548 | 1,820 | 1,429 |

10 Provision for credit losses

| in | 2012 | 2011 | 2010 |
|---|------------|------------|-------------|
| Provision for credit losses (CHF million) | | | |
| Provision for loan losses | 159 | 141 | (93) |
| Provision for lending-related and other exposures | 11 | 46 | 14 |
| Provision for credit losses | 170 | 187 | (79) |

11 Compensation and benefits

| in | 2012 | 2011 | 2010 |
|--|---------------|---------------|---------------|
| Compensation and benefits (CHF million) | | | |
| Salaries and variable compensation | 10,924 | 11,474 | 12,481 |
| Social security | 769 | 865 | 928 |
| Other ¹ | 837 | 874 | 1,190 |
| Compensation and benefits² | 12,530 | 13,213 | 14,599 |

¹ Includes pension and other post-retirement expense of CHF 532 million, CHF 610 million, CHF 483 million in 2012, 2011 and 2010, respectively, and the UK levy on variable compensation of CHF 404 million in 2010. ² Includes severance and other compensation expense relating to headcount reductions of CHF 456 million and CHF 715 million in 2012 and 2011, respectively.

Plus Bond

As part of the 2012 annual compensation, the Group awarded a portion of variable compensation to managing directors and directors in Investment Banking for services performed in 2012 in the form of Plus Bond awards.

Plus Bond units are cash-based awards linked to a portfolio of asset-backed securities originated and managed in Investment Banking. These awards provide recipients with semi-annual payments and a final settlement in 2016 in cash or shares at the Group's discretion, based on the initial award value less portfolio losses after a first loss retained by the

Group. The Plus Bond unit constitutes a transfer of risk from the Group to these employees.

As of the December 31, 2012 grant date, the Plus Bond awards granted to managing directors and directors in Investment Banking had a fair value of CHF 187 million and were fully vested and expensed. Compensation expense will be updated at each reporting period date to reflect any change in the underlying fair value of the Plus Bond units until the awards are settled.

► Refer to "Note 27 – Employee deferred compensation" for further information on Plus Bond awards.

12 General and administrative expenses

| in | 2012 | 2011 | 2010 |
|--|--------------|--------------|--------------|

¹ Reflects MACCS issued in July 2012 that are mandatorily convertible into shares on March 29, 2013 with settlement and delivery of shares in early April 2013. ² Reflects changes in the fair value of the PAF2 units which are reflected in the net profit of the Group until the awards are finally settled. Fair value of the PAF2 units which are reflected in the net profit of the Group are not adjusted for 2012, as the effect would be antidilutive. ³ Reflects weighted-average shares outstanding on PAF2 units. Weighted-average shares on PAF2 units for 2012 were excluded from the diluted earnings per share calculation, as the effect would be antidilutive. ⁴ Weighted-average potential common shares relating to instruments that were not dilutive for the respective periods (and therefore not included in the diluted earnings per share calculation above) but could potentially dilute earnings per share in the future were 50.3 million, 37.3 million and 50.2 million for 2012, 2011 and 2010, respectively.

14 Securities borrowed, lent and subject to repurchase agreements

| end of | 2012 | 2011 |
|--|----------------|----------------|
| Securities borrowed or purchased under agreements to resell (CHF million) | | |
| Central bank funds sold and securities purchased under resale agreements | 121,242 | 172,184 |
| Deposits paid for securities borrowed | 62,213 | 64,779 |

| Securities lent or sold under agreements to repurchase (CHF million) | | |
| Central bank funds purchased and securities sold under repurchase agreements | 120,164 | 161,220 |
| Deposits received for securities lent | 12,557 | 15,339 |
| Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions | 132,721 | 176,559 |

Repurchase and reverse repurchase agreements represent collateralized financing transactions used to earn net interest income, increase liquidity or facilitate trading activity. These instruments are collateralized principally by government securities, money market instruments and corporate bonds and have terms ranging from overnight to a longer or unspecified period of time.

In the event of counterparty default, the reverse repurchase agreement or securities lending agreement provides the Group with the right to liquidate the collateral held. In the Group's normal course of business, substantially all of the collateral received that may be sold or repledged has been sold or repledged as of December 31, 2012 and 2011.

Gross unrealized losses on investment securities and the related fair value

| end of | Less than 12 months | | 12 months or more | | Total | |
|---|---------------------|-------------------------------|-------------------|-------------------------------|---------------|-------------------------------|
| | Fair value | Gross unrealized losses | Fair value | Gross unrealized losses | Fair value | Gross unrealized losses |
| 2011 (CHF million) | | | | | | |
| Debt securities issued by foreign governments | 100 | 2 | 40 | 10 | 140 | 12 |
| Corporate debt securities | 81 | 2 | 17 | 3 | 98 | 5 |
| Debt securities available-for-sale | 181 | 4 | 57 | 13 | 238 | 17 |

Management determined that the unrealized losses on debt securities are primarily attributable to general market interest rate, credit spread or exchange rate movements. There were no unrealized losses on investment securities in 2012. No significant impairment charges were recorded as the Group does

not intend to sell the investments, nor is it more likely than not that the Group will be required to sell the investments before the recovery of their amortized cost bases, which may be maturity.

17 Other investments

| end of | 2012 | 2011 |
|---|---------------|---------------|
| Other investments (CHF million) | | |
| Equity method investments | 2,167 | 2,542 |
| Non-marketable equity securities ¹ | 7,296 | 7,879 |
| Real estate held for investment | 687 | 783 |
| Life finance instruments ² | 1,872 | 2,022 |
| Total other investments | 12,022 | 13,226 |

¹ Includes private equity, hedge funds and restricted stock investments as well as certain investments in non-marketable mutual funds for which the Group has neither significant influence nor control over the investee. ² Includes life settlement contracts at investment method and SPIA contracts.

Non-marketable equity securities held by subsidiaries that are considered investment companies are held by separate legal entities that are within the scope of ASC Topic 946 – Financial Services – Investment Companies. In addition, non-marketable equity securities held by subsidiaries that are considered broker-dealer entities are held by separate legal entities that are within the scope of ASC Topic 940 – Financial Services – Broker and Dealers. Non-marketable equity securities include investments in entities that regularly calculate net asset value (NAV) per share or its equivalent.

- Refer to “Note 33 – Financial instruments” for further information on such investments.

Substantially all non-marketable equity securities are carried at fair value. There were no non-marketable equity securities not carried at fair value that have been in a continuous unrealized loss position.

The Group performs a regular impairment analysis of real estate portfolios. The carrying values of the impaired properties were written down to their respective fair values, establishing new cost bases. For these properties, the fair values were measured based on either discounted cash flow analyses or external market appraisals. Impairments of CHF 13 million and CHF 3 million were recorded in 2012 and 2011, respectively. No impairments were recorded in 2010.

The accumulated depreciation related to real estate held for investment amounted to CHF 330 million, CHF 327 million and CHF 321 million for 2012, 2011 and 2010, respectively.

18 Loans, allowance for loan losses and credit quality

Loans are divided in two portfolio segments, "consumer" and "corporate & institutional". Consumer loans are disaggregated into the classes of mortgages, loans collateralized by securities and consumer finance. Corporate & institutional loans are disaggregated into the classes of real estate, commercial and industrial loans, financial institutions and governments and public institutions.

The determination of the loan classes is primarily driven by the customer segmentation in the two business divisions, Private Banking & Wealth Management and Investment Banking, both of which are engaged in credit activities.

The Group assigns both counterparty and transaction ratings to its credit exposures. The counterparty rating reflects the probability of default (PD) of the counterparty. The transaction rating reflects the expected loss, considering collateral, on a given transaction if the counterparty defaults. Credit risk is assessed and monitored on the single obligor and single obligation level as well as on the credit portfolio level as represented by the classes of loans. Credit limits are used to manage counterparty credit risk.

Credit quality of loans held at amortized cost

Management monitors the credit quality of loans through its credit risk management processes, which are structured to assess, quantify, measure, monitor and manage risk on a consistent basis. This process requires careful consideration of proposed extensions of credit, the setting of specific limits, monitoring during the life of the exposure, active use of credit mitigation tools and a disciplined approach to recognizing credit impairment.

Management evaluates many factors when assessing the credit quality of loans. These factors include the volatility of default probabilities, rating changes, the magnitude of potential loss, internal risk ratings, and geographic, industry and other economic factors. For the purpose of credit quality disclosures, the Group uses internal risk ratings as credit quality indicators.

The Group employs a set of credit ratings for the purpose of internally rating counterparties. Credit ratings are intended to reflect the risk of default of each obligor or counterparty. Ratings are assigned based on internally developed rating models and processes, which are subject to governance and internally independent validation procedures.

Internal ratings are assigned to all loans reflecting the Group's internal view of the credit quality of the obligor. Internal ratings may differ from a counterparty's external ratings, if one is available. Internal ratings are reviewed at least annually. For the calculation of internal risk estimates and risk-weighted assets, a PD is assigned to each loan. For corporate & institutional loans excluding corporates managed on the Swiss platform, the PD is determined by the internal credit rat-

ing. The PD for each rating is calibrated based on historic default experience, using external data from Standard & Poor's, and backtested to ensure consistency with internal experience. For corporates managed on the Swiss platform and consumer loans, the PD is calculated directly by proprietary statistical rating models, which are based on internally compiled data comprising both quantitative factors (primarily loan-to-value ratio and the borrower's income level for mortgage lending and balance sheet information for corporates) and qualitative factors (e.g., credit histories from credit reporting bureaus). In this case, an equivalent rating is assigned for reporting purposes, based on the PD band associated with each rating.

Reverse repurchase agreements are fully collateralized and in the event of counterparty default the reverse repurchase agreement provides the Group the right to liquidate the collateral held. The Group risk manages these instruments on the basis of the value of the underlying collateral, as opposed to loans, which are risk managed on the ability of the counterparty to repay. Therefore the underlying collateral coverage is the most appropriate credit quality indicator for reverse repurchase agreements. Also, the Group has elected the fair value option for the majority of its reverse repurchase agreements. As such, reverse repurchase agreements have not been included in the following tables.

The following tables present the Group's recorded investment in loans held at amortized cost by internal counterparty credit ratings that are used as credit quality indicators for the purpose of this disclosure, and a related aging analysis.

¹ Includes the value of collateral up to the amount of the outstanding related loans. For mortgages, collateral values are generally values at the time of granting the loan.

Value of collateral

In Private Banking & Wealth Management, all collateral values for loans are regularly reviewed according to our risk management policies and directives, with maximum review periods determined by market liquidity, market transparency and appraisal costs. For example, traded securities are revalued on a daily basis and property values are appraised over a period of more than one year considering the characteristics of the borrower, current developments in the relevant real estate market and the current level of credit exposure to the borrower. If the credit exposure to a borrower has changed significantly, in volatile markets or in times of increasing general market risk, collateral values may be appraised more frequently. Management judgment is applied in assessing

whether markets are volatile or general market risk has increased to a degree that warrants a more frequent update of collateral values. Movements in monitored risk metrics that are statistically different compared to historical experience are considered in addition to analysis of externally-provided forecasts, scenario techniques and macro-economic research. For impaired loans, the fair value of collateral is determined within 90 days of the date the impairment was identified and thereafter regularly revalued by Group credit risk management (CRM) within the impairment review process.

In Investment Banking, few loans are collateral dependent. The collateral values for these loans are appraised on at least an annual basis, or when a loan-relevant event occurs.

Impaired loans

Categories of impaired loans

In accordance with Group policies, impaired loans include non-performing loans, non-interest-earning loans, restructured loans and potential problem loans.

- Refer to "Loans" in Note 1 – Summary of significant accounting policies for further information on categories of impaired loans.

As of December 31, 2012 and 2011, loans held-to-maturity carried at amortized cost did not include any subprime residential

mortgages. Accordingly, impaired loans did not include any subprime residential mortgages.

In 2012 and 2011, the number of troubled debt restructurings and related financial effects and the number of defaults and related carrying values of loans, which had been restructured within the previous 12 months, were not material. As of December 31, 2012 and 2011, the Group did not have any material commitments to lend additional funds to debtors whose loan terms had been modified in troubled debt restructurings.

Write-off and recovery of loans

Write-off of a loan occurs when it is considered certain that there is no possibility of recovering the outstanding principal. In Investment Banking, a loan is written down to its net book value once the loan provision is greater than 80% of the loan notional amount, unless repayment of the loan is anticipated to occur within the next two quarters. In Private Banking & Wealth Management, write-offs are made, based on an individual counterparty assessment performed by Group CRM, if it is certain that parts of a loan will not be recoverable. For collateralized loans, the collateral is assessed and the unsecured exposure is written-off. Write-offs on uncollateralized loans are based on the borrower's ability to pay back the outstanding loan out of free cash flow. The Group evaluates the recoverability of the loans granted, if a borrower is expected

to default wholly or partly on its payment obligations or to meet these only with third-party support. Adjustments are made to reflect the estimated realizable value of the loan or any collateral. Triggers to assess the creditworthiness of a borrower to absorb the adverse developments include for example i) a default on interest or principal payments by more than 90 days, ii) a waiver of interest or principal by the Group, iii) a downgrade of the loan to non-interest-earning, iv) the collection of the debt through seizure order, bankruptcy proceedings or realization of collateral, or v) the insolvency of the borrower. Based on such assessment, Group CRM evaluates the need for write-offs individually and on an ongoing basis.

Recoveries of loans previously written off are recorded based on the cash or estimated fair value of other amounts received.

Allowance for specifically identified credit losses on impaired loans

The Group considers a loan impaired when, based on current information and events, it is probable that the Group will be unable to collect the amounts due according to the contractual terms of the loan agreement. The Group performs an in-depth review and analysis of impaired loans, considering factors such as recovery and exit options as well as considering collateral and counterparty risk. In general, all impaired loans are individually assessed. For consumer loans, the trigger to detect an impaired loan is non-payment of interest. Corporate & institutional loans are reviewed at least annually based on the borrower's financial statements and any indications of difficulties they may experience. Loans that are not impaired, but which are of special concern due to changes in covenants, downgrades, negative financial news and other adverse developments, are included on a watch list. All loans on the watch list are reviewed at least quarterly to determine whether they

should be moved to Group recovery management at which point they are reviewed quarterly for impairment. If an individual loan specifically identified for evaluation is considered impaired, the allowance is determined as a reasonable estimate of credit losses existing as of the end of the reporting period. Thereafter, the allowance is revalued by Group credit risk management at least annually or more frequently depending on the risk profile of the borrower or credit relevant events. For certain non-collateral-dependent impaired loans, an impairment is measured using the present value of estimated future cash flows, except that as a practical expedient an impairment may be measured based on a loan's observable market price. If the present value of estimated future cash flows is used, the impaired loan and related allowance are revalued at least quarterly to reflect passage of time. For collateral-dependent impaired loans, an impairment is measured using the fair value of the collateral.

| Impairment | 17 | 87 | 16 |

In 2011, the estimated useful lives for leasehold and building improvements in Switzerland were increased from five to ten years, based on a change in estimate. The cumulative effect

of adopting this change in estimate on January 1, 2011 was a decrease in depreciation expense of CHF 64 million (CHF 56 million after tax).

¹ Includes tax benefit adjustments arising from the amortization of tax goodwill in connection with the purchase of the residual minority stake in Hedging-Griffo in 2012.

In accordance with US GAAP, the Group continually assesses whether or not there has been a triggering event. As of December 31, 2012 and 2011, the Group's market capitalization was below book value.

In estimating the fair value of its reporting units the Group generally applied a market approach where consideration is given to price to projected earning multiples or price to book value multiples for similarly traded companies and prices paid in recent transactions that have occurred in its industry or in related industries.

In determining the estimated fair value, the Group relied upon its three-year strategic business plan which included significant management assumptions and estimates based on its view of current and future economic conditions and regulatory changes.

Based on its goodwill impairment analysis performed as of December 31, 2012, the Group concluded that the estimated fair value for the three reporting units within its Private Banking & Wealth Management segment substantially exceeded their related carrying values and no impairment was necessary as of December 31, 2012.

There was also no impairment necessary for the Group's Investment Banking reporting unit as the estimated fair value exceeded its carrying value by 10%. The goodwill allocated to this reporting unit has become more sensitive to an impairment as the valuation of the reporting unit is highly correlated with economic and financial market conditions, client trading and investing activity and the regulatory environment in which it operates. The Group engaged the services of an independent valuation specialist to assist in the valuation of the reporting

unit as of December 31, 2012 using a combination of the market approach and income approach. Under the market approach, consideration is given to price to projected earnings multiples or price to book value multiples for similarly traded companies and prices paid in recent transactions that have occurred in its industry or in related industries. Under the income approach, a discount rate was applied that reflects the risk and uncertainty related to the reporting unit's projected cash flows.

The results of the impairment evaluation of the Investment Banking reporting unit's goodwill would be significantly impacted by adverse changes in the underlying parameters used in the valuation process. If actual outcomes adversely differ by a sufficient margin from its best estimates of the key economic assumptions and associated cash flows applied in the valuation of the reporting unit, the Group could potentially incur material impairment charges in the future with respect to the CHF 5,980 million of goodwill recorded in Investment Banking.

As a result of acquisitions, the Group has recorded goodwill as an asset in its consolidated balance sheets, the most significant component of which arose from the acquisition of Donaldson, Lufkin & Jenrette Inc. in 2000. During 2012, the Group completed the acquisition of HSBC's private banking business in Japan that generated goodwill upon consolidation. During 2011, there were no acquisitions that generated goodwill upon consolidation.

Goodwill was negatively impacted by foreign exchange fluctuations in goodwill denominated in US dollars in 2012.

| Equity | 23,761 |
| Fixed income | 6,559 |
| Emerging markets ¹ | 3,304 |
| Credit | 1,893 |
| Other | 1,120 |
| Total structured notes | 36,637 |

¹ Transactions where the return is based on a referenced underlying or counterparty specific to emerging markets.

Total long-term debt is comprised of debt issuances managed by Treasury which do not contain derivative features (vanilla debt), as well as hybrid debt instruments with embedded derivatives, which are issued as part of the Group's struc-

tured product activities. Long-term debt includes both Swiss franc and foreign exchange denominated fixed and variable rate bonds.

The interest rate ranges presented in the table below are based on the contractual terms of the Group's vanilla debt. Interest rate ranges for future coupon payments on structured products for which fair value has been elected are not included in the table below as these coupons are dependent

upon the embedded derivative and prevailing market conditions at the time each coupon is paid. In addition, the effects of derivatives used for hedging are not included in the interest rate ranges on the associated debt.

¹ Excludes structured notes for which fair value has been elected as the related coupons are dependent upon the embedded derivatives and prevailing market conditions at the time each coupon is paid.

The Group and the Bank maintain a shelf registration statement with the US Securities and Exchange Commission (SEC), which allows them to issue, from time to time, senior and subordinated debt securities, warrants and related guarantees. The shelf registration statement also allows certain subsidiaries of the Group to issue exchangeable or convertible debt securities which are guaranteed by the Group and are exchangeable or convertible into ordinary shares of the Group.

- Refer to “Note 39 – Subsidiary guarantee information” for further information on the subsidiary guarantees.

The Group maintains a euro medium-term note program that allows it, certain finance subsidiaries (guaranteed by the Group) and the Bank to issue senior debt securities notes.

Credit Suisse Group Finance (Guernsey) Limited, a finance subsidiary of the Group, maintains a JPY 500 billion Samurai shelf registration statement that allows it to issue, from time to time, senior and subordinated debt securities, guaranteed by the Group.

| Income tax expense | 496 | 671 | 1,548 |

Foreign tax rate differential

2012 included a foreign tax expense of CHF 275 million in respect of profits earned in higher tax jurisdictions, mainly Brazil and the US, partially offset by foreign tax rate differential related to profits earned in lower tax jurisdictions, mainly Guernsey and Bahamas. The total foreign tax expense of CHF 479 million is not only impacted by the foreign tax expense based on statutory tax rates but also by tax impacts related to additional reconciling items explained below.

2011 included a foreign tax rate benefit of CHF 40 million in respect of profits earned in lower tax jurisdictions, mainly Guernsey and Bahamas, partially offset by foreign tax rate differential related to profits earned in higher tax jurisdictions, mainly Brazil and the US. The foreign tax rate benefit in relation to foreign tax expense of CHF 809 million is more than offset by tax impacts related to reconciling items explained below.

Other non-deductible expenses

2012 and 2011 included non-deductible interest expenses of CHF 259 million and CHF 240 million, respectively, non-taxable offshore expenses of CHF 8 million and CHF 80 million, respectively, non-deductible bank levy costs and other non-deductible compensation expenses of CHF 57 million and CHF 49 million, respectively, and other various smaller non-deductible expenses.

Lower taxed income

2012 and 2011 included a tax benefit of CHF 29 million and CHF 52 million, respectively, related to exempt offshore income, CHF 40 million and CHF 47 million, respectively, in respect to non-taxable dividend income and CHF 11 million and CHF 47 million, respectively, related to non-taxable foreign exchange gains. In addition, 2012 and 2011 included tax benefits of CHF 100 million and CHF 42 million, respectively, related to tax credits and CHF 48 million and CHF 40 million, respectively, related to non-taxable life insurance income. 2012 also included a CHF 114 million Swiss income tax benefit as a result of foreign branch earnings beneficially impacting the earnings mix. The remaining balance included various smaller items, amongst others related to permanent tax benefits from tax deductible goodwill amortization and tax holidays.

2011 and 2010 included a tax benefit of CHF 116 million and CHF 130 million, respectively, in respect of the reversal of the deferred tax liability recorded to cover estimated recapture of loss deductions arising from foreign branches of the Bank.

2010 included a tax benefit of CHF 380 million in respect of a legal entity merger that reflected regulatory concerns about complex holding structures.

Changes in tax law and rates

2012 and 2011 included a tax expense of CHF 182 million and CHF 172 million, respectively, caused by the reduction of deferred tax assets mainly due to the impact of the change in UK corporation tax.

Changes in deferred tax valuation allowance

2012 included an increase to the valuation allowance of CHF 834 million in respect of five of the Group's operating entities, three in Europe and two in Asia, mainly relating to deferred tax assets on current year tax losses and pre-existing loss carry-forwards. 2011 included an increase to the valuation allowance of CHF 428 million in respect of three of the Group's operating entities, two in the UK and one in Asia, mainly relating to deferred tax assets on tax loss carry-forwards. 2010 included an increase to the valuation allowance of CHF 193 million in respect of one of the Group's operating entities in the UK relating to deferred tax assets on tax loss carry-forwards.

2012, 2011 and 2010 also included a tax benefit of CHF 820 million, CHF 7 million and CHF 199 million, respectively, resulting from the release of valuation allowances on deferred tax assets for one of the Group's operating entities in the US.

Other

2012 included a tax benefit of CHF 48 million relating to the re-assessment of deferred tax assets in Switzerland reflecting changes in forecasted future profitability related to such pre-existing deferred tax assets. 2012 also included a benefit of CHF 70 million relating to return to accrual adjustments following the close of a tax audit cycle and the impact of the closure of an advanced pricing agreement.

2011 included a tax benefit of CHF 261 million relating to the increase of deferred tax assets in two of the Group's operating entities, one in Switzerland (CHF 129 million) and one in the US (CHF 132 million). The increase is related to the re-measurement of existing deferred tax assets on net operating losses due to changes in the mix of the sources of income and related tax rates that these net operating losses are expected to be applied to.

2012, 2011 and 2010 included an amount of CHF 40 million, CHF 123 million and CHF 301 million, respectively, relating to the release of tax contingency accruals following the favorable resolution of tax matters.

As of December 31, 2012, the Group had accumulated undistributed earnings from foreign subsidiaries of CHF 7.3 billion. No deferred tax liability was recorded in respect of those amounts as these earnings are considered indefinitely rein-

vested. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

Details of the tax effect of temporary differences

| end of | 2012 | 2011 |
|---|----------------|----------------|
| Tax effect of temporary differences (CHF million) | | |
| Compensation and benefits | 2,295 | 2,262 |
| Loans | 441 | 392 |
| Investment securities | 1,805 | 1,489 |
| Provisions | 1,760 | 1,943 |
| Business combinations | 0 | 101 |
| Derivatives | 355 | 395 |
| Real estate | 243 | 212 |
| Net operating loss carry-forwards | 5,181 | 7,294 |
| Other | 207 | 178 |
| Gross deferred tax assets before valuation allowance | 12,287 | 14,266 |
| Less valuation allowance | (2,554) | (2,690) |
| Gross deferred tax assets net of valuation allowance | 9,733 | 11,576 |
| Compensation and benefits | (174) | (129) |
| Loans | (162) | (147) |
| Investment securities | (1,373) | (1,356) |
| Provisions | (402) | (379) |
| Business combinations | (20) | (227) |
| Derivatives | (295) | (392) |
| Leasing | (40) | (58) |
| Real estate | (78) | (82) |
| Other | (217) | (296) |
| Gross deferred tax liabilities | (2,761) | (3,066) |
| Net deferred tax assets | 6,972 | 8,510 |

The decrease in net deferred tax assets from 2011 to 2012 of CHF 1,538 million was primarily due to the recognition of a valuation allowance against deferred tax assets, mainly in the UK and Asia, of CHF 215 million, and taxable gains on transfers of assets within the consolidated Group for which associated tax charges of CHF 1,511 million have been deferred as other assets in accordance with ASC 810-10-45-8 (Consolidation – other presentation matters, formerly Accounting Research Bulletin 51). The deferral will be amortized over a period of up to 15 years in line with ASC 810-10-45-8 principles and will be matched by future tax deductions. In addition, the decrease reflected a write-down of deferred tax assets of CHF 182 million as a result of changes to corporation tax rates in the UK and Japan and foreign exchange translation losses of CHF 211 million, which are included within the currency translation adjustments recorded in AOCI. These

decreases were partially offset by an increase in net deferred tax asset balances following a re-measurement of deferred tax balances in Switzerland and the US of CHF 529 million. The remaining movement, an increase of net deferred tax assets of CHF 52 million, mainly represents the impact of temporary differences and taxable income in 2012.

The most significant net deferred tax assets arise in the US and UK and these decreased from CHF 7,766 million, net of a valuation allowance of CHF 1,643 million as of the end of 2011 to CHF 6,007 million, net of a valuation allowance of CHF 1,454 million as of the end of 2012.

Due to uncertainty concerning its ability to generate the necessary amount and mix of taxable income in future periods, the Group recorded a valuation allowance against deferred tax assets in the amount of CHF 2.6 billion as of December 31, 2012 compared to CHF 2.7 billion as of December 31, 2011.

Amounts and expiration dates of net operating loss carry-forwards

| end of 2012 | Total |
|--|---------------|
| Net operating loss carry-forwards (CHF million) | |
| Due to expire within 1 year | 29 |
| Due to expire within 2 to 5 years | 10,637 |
| Due to expire within 6 to 10 years | 1,996 |
| Due to expire within 11 to 20 years | 2,759 |
| Amount due to expire | 15,421 |
| Amount not due to expire | 11,797 |
| Total net operating loss carry-forwards | 27,218 |

Movements in the valuation allowance

| in | 2012 | 2011 | 2010 |
|---|--------------|--------------|--------------|
| Movements in the valuation allowance (CHF million) | | | |
| Balance at beginning of period | 2,690 | 2,264 | 2,799 |
| Net changes | (136) | 426 | (535) |
| Balance at end of period | 2,554 | 2,690 | 2,264 |

As part of its normal practice, the Group has conducted a detailed evaluation of its expected future results. This evaluation is dependent on management estimates and assumptions in developing the expected future results, which are based on a strategic business planning process influenced by current economic conditions and assumptions of future economic conditions that are subject to change. This evaluation took into account both positive and negative evidence related to expected future taxable income, the Group's commitment to the integrated bank model and the importance of the Investment Banking segment within the integrated bank, as well as

the changes announced in 2012 and the reduction in risk since 2008. This evaluation has indicated the expected future results that are likely to be earned in jurisdictions where the Group has significant net deferred tax assets, such as the US, the UK and Switzerland. The Group has then compared those expected future results with the applicable law governing utilization of deferred tax assets. US tax law allows for a 20-year carry-forward period for net operating losses, UK tax law allows for an unlimited carry-forward period for net operating losses and Swiss tax law allows for a seven-year carry-forward period for net operating losses.

Tax benefits associated with share-based compensation

| in | 2012 | 2011 | 2010 |
|--|------|-------|------|
| Tax benefits associated with share-based compensation (CHF million) | | | |
| Tax benefits recorded in the consolidated statements of operations | 597 | 466 | 539 |
| Windfall tax benefits/(shortfall tax charges) recorded in additional paid-in capital | 41 | (280) | 615 |
| Tax benefits in respect of tax on dividend equivalent payments | 12 | 2 | 26 |

- Refer to "Note 27 – Employee deferred compensation" for further information on share-based compensation.

If, upon settlement of share-based compensation, the tax deduction exceeds the cumulative compensation cost that the Group had recognized in the consolidated financial statements, the utilized tax benefit associated with any excess deduction

is considered a "windfall" and recognized in shareholders' equity as additional paid-in capital and reflected as a financing cash inflow in the consolidated statements of cash flows. If, upon settlement the tax deduction is lower than the cumulative compensation cost that the Group had recognized in the consolidated financial statements, the tax charge associated with the lower deduction is considered a "shortfall". Tax charges

arising on shortfalls are recognized in shareholders' equity to the extent that any shortfalls are lower than the cumulative windfalls, otherwise the tax charge is recognized in the consolidated statements of operations. However, windfall deductions and dividend equivalents aggregating CHF 0.9 billion and CHF 1.1 billion for 2012 and 2011, respectively, did not result in a reduction of income taxes payable because certain entities were in a net operating loss position. When the income tax benefit of these deductions is realized, an estimated CHF 192 million tax benefit will be recorded in additional paid-in capital.

Uncertain tax positions

US GAAP requires a two-step process in evaluating uncertain income tax positions. In the first step, an enterprise determines whether it is more likely than not that an income tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Income tax positions meeting the more-likely-than-not recognition threshold are then measured to determine the amount of benefit eligible for recognition in the consolidated financial statements. Each income tax position is measured at the largest amount of tax benefit that is more likely than not to be realized upon ultimate settlement.

Reconciliation of the beginning and ending amount of gross unrecognized tax benefits

| | 2012 | 2011 | 2010 |
|---|------------|------------|------------|
| Movements in gross unrecognized tax benefits (CHF million) | | | |
| Balance at beginning of period | 373 | 578 | 964 |
| Increases in unrecognized tax benefits as a result of tax positions taken during a prior period | 33 | 54 | 53 |
| Decreases in unrecognized tax benefits as a result of tax positions taken during a prior period | (58) | (177) | (286) |
| Increases in unrecognized tax benefits as a result of tax positions taken during the current period | 39 | 30 | 39 |
| Decreases in unrecognized tax benefits relating to settlements with tax authorities | (4) | (65) | (31) |
| Reductions to unrecognized tax benefits as a result of a lapse of the applicable statute of limitations | (43) | (19) | (91) |
| Other (including foreign currency translation) | 80 | (28) | (70) |
| Balance at end of period | 420 | 373 | 578 |
| of which, if recognized, would affect the effective tax rate | 414 | 366 | 554 |

Interest and penalties

| in | 2012 | 2011 | 2010 |
|--|------|------|------|
| Interest and penalties (CHF million) | | | |
| Interest and penalties recognized in the consolidated statements of operations | (13) | (19) | (43) |
| Interest and penalties recognized in the consolidated balance sheets | 69 | 86 | 209 |

Interest and penalties are reported as tax expense. The Group is currently subject to ongoing tax audits and inquiries with the tax authorities in a number of jurisdictions, including the US, the UK and Switzerland. Although the timing of the completion of these audits is uncertain, it is reasonably possible that some of these audits and inquiries will be resolved within 12 months of the reporting date.

It is reasonably possible that there will be a decrease of between zero and CHF 4 million in unrecognized tax benefits within 12 months of the reporting date.

The Group remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Switzerland – 2009; the UK – 2006; the US – 2006; Japan – 2005; and the Netherlands – 2005.

27 Employee deferred compensation

Payment of deferred compensation to employees is determined by the nature of the business, role, location and performance of the employee. Unless there is a contractual obligation, granting deferred compensation is solely at the discretion of senior management. Special deferred compensation granted as part of a contractual obligation is typically used to compensate new senior employees in a single year for forfeited awards from previous employers upon joining the Group. It is the Group's policy not to make multi-year guarantees.

Compensation expense recognized in the consolidated statement of operations for share-based and other awards that were granted as deferred compensation is recognized in accordance with the specific terms and conditions of each respective award and is primarily recognized over the future requisite service and vesting period, which is determined by the plan, retirement eligibility of employees, two-year moratorium periods on early retirement and certain other terms. Compensation expense for share-based and other awards that were granted as deferred compensation also includes the current estimated outcome of applicable performance criteria,

estimated future forfeitures and mark-to-market adjustments for certain cash awards that are still outstanding.

The following tables show the compensation expense for deferred compensation awards granted in 2012 and prior years that was recognized in the consolidated statements of operations during 2012, 2011, and 2010, the total shares delivered, the estimated unrecognized compensation expense for deferred compensation awards granted in 2012 and prior years outstanding as of December 31, 2012 and the remaining requisite service period over which the estimated unrecognized compensation expense will be recognized. The estimated unrecognized compensation expense was based on the fair value of each award on the grant date and included the current estimated outcome of relevant performance criteria and estimated future forfeitures but no estimate for future mark-to-market adjustments. The recognition of compensation expense for the deferred compensation awards granted in January 2013 began in 2013 and thus had no impact on the 2012 consolidated financial statements.

Deferred compensation expense

| in | 2012 | 2011 | 2010 |
|---|--------------|--------------|--------------|
| Deferred compensation expense (CHF million) | | | |
| Share awards | 786 | 767 | 294 |
| Performance share awards | 366 | 0 | 0 |
| 2011 Partner Asset Facility awards ¹ | 677 | 0 | 0 |
| Adjustable Performance Plan share awards | 74 | 0 | 0 |
| Adjustable Performance Plan cash awards | 286 | 1,106 | 963 |
| Restricted Cash Awards | 165 | 253 | 0 |
| Scaled Incentive Share Units | 97 | 415 | 561 |
| Incentive Share Units | 62 | 174 | 723 |
| Cash Retention Awards | 0 | 0 | 578 |
| Performance Incentive Plans (PIP I and PIP II) ² | 0 | 0 | (1) |
| 2008 Partner Asset Facility awards ¹ | 173 | 3 | 45 |
| Other cash awards | 362 | 334 | 422 |
| Total deferred compensation expense | 3,048 | 3,052 | 3,585 |
| Total shares delivered (million) | | | |
| Total shares delivered | 31.6 | 24.2 | 47.3 |

¹ Compensation expense includes the change in the underlying fair value of the indexed assets during the period. ² Includes clawbacks.

| Aggregate remaining weighted-average requisite service period | 1.5 |

Does not include the estimated unrecognized compensation expense relating to grants made in 2013 for 2012.

Share awards

Share awards granted in January 2013 are similar to those granted in January 2012 and are awarded to employees with total compensation above CHF/USD 250,000 or the local currency equivalent. Each share award granted entitles the holder of the award to receive one Group share, does not contain a leverage component or a multiplier effect and is subject to service conditions as it vests over three years, such that the share awards vest equally on each of the three anniversaries of the grant date. Share awards granted in January 2011 vest over a four-year period. The value of the share awards is solely dependent on the Group share price at the time of delivery.

The Group's share awards include other awards, such as blocked shares and special awards, which may be granted to new employees. Other share awards entitle the holder to receive one Group share, are subject to continued employment with the Group, contain restrictive covenants and cancellation provisions and generally vest between zero and five years.

On January 17, 2013, the Group granted 37.9 million share awards with a total value of CHF 950 million. The number of share awards was determined by dividing the deferred component of variable compensation being granted as shares by the average price of a Group share over the twelve business days ended January 16, 2013. The fair value of each share award was CHF 26.44, equivalent to the Group's closing share price on the grant date. The estimated unrecognized compensation expense of CHF 935 million was determined

based on the fair value of the award on the grant date, including the current estimate of future forfeitures, but excluding the share awards that have been reallocated to Plus Bond awards after the grant date, and will be recognized over the three-year vesting period, subject to early retirement rules. On January 19, 2012 and January 20, 2011, the Group granted 20.0 million and 34.5 million share awards with a total value of CHF 438 million and CHF 1,430 million, and a fair value of each share award granted of CHF 23.90 and CHF 42.51, respectively, equivalent to the Group's closing share price on the grant date.

In order to comply with regulatory requirements, the Group awarded an alternative form of share awards as a component of unrestricted cash to senior employees in a number of EU countries. For 2012, 2011 and 2010, these employees received 50% of the amount they otherwise would have received in cash in the form of blocked shares. The shares remain blocked for a period of time, which ranges from six months to three years, depending on the location, after which they are no longer subject to restrictions. On January 17, 2013, the Group granted 0.2 million blocked shares with a total value of CHF 6 million that vested immediately upon grant, have no future service requirements and were attributed to services performed in 2012. On January 19, 2012 and January 20, 2011, the Group granted 0.5 million and 0.8 million blocked shares with a total value of CHF 11 million and CHF 35 million, respectively.

Performance share awards

Members of the Executive Board, managing directors and all material risk takers and controllers (employees whose activities are considered to have a potentially material impact on the Group's risk profile) received a portion of their deferred variable compensation in the form of performance share awards, which are subject to explicit performance-related clawback provisions. Each performance share award granted entitles the holder of the award to receive one Group share. Performance share awards also vest over three years, such that the performance share awards vest equally on each of the three anniversaries of the grant date. Unlike the share awards, however, the outstanding performance share awards are subject to a negative adjustment in the event of a divisional loss or a negative ROE of the Group. Outstanding performance shares are subject to a negative adjustment in the event of a divisional loss, unless there is a negative ROE that would call for a negative adjustment greater than the divisional adjustment for the year, in which case the negative adjustment is based on a negative ROE. For employees in Shared Services, the negative adjustment only applies in the event of a negative ROE and is not linked to the performance of the divisions.

The performance share awards granted in 2013 are identical to those granted in 2012 with the exception of the performance criteria which, in 2012, were based on the reported ROE, compared to the performance share awards granted in 2013, which will be based upon a disclosed underlying ROE.

On January 17, 2013, the Group granted 26.4 million performance share awards with a total value of CHF 660 million. The number of performance share awards granted to employees was determined by dividing the deferred component of variable compensation being granted as performance shares by the average price of a Group share over the twelve business days ended January 16, 2013. The fair value of each performance share award was CHF 26.44, equivalent to the Group's closing share price on the grant date. The estimated unrecognized compensation expense of CHF 677 million was determined based on the fair value of the award on the grant date, including the current estimated outcome of the relevant performance criteria and estimated future forfeitures, and will be recognized over the three-year vesting period. On January 19, 2012, the Group granted 23.5 million performance share awards with a total value of CHF 516 million. The fair value of each performance share award was CHF 23.90, equivalent to the Group's closing share price on the grant date.

Plus Bond awards

Managing directors and directors in the Investment Banking division received a portion of their deferred variable compensation in the form of Plus Bond awards. The Plus Bond award is essentially a fixed income instrument, denominated in US dollars, which provides a coupon payment that is commensurate with market-based pricing. Plus Bond award holders are entitled to receive semi-annual cash payments on their adjusted award amounts at the rate of ☉London Interbank Offered Rate (LIBOR) plus 7.875% per annum until settlement. The Plus Bond will settle in the summer of 2016 based on the amount of the initial award less portfolio losses, if any, in excess of a first loss portion retained by the Group of USD 600 million. The value of the Plus Bond awards is based on the performance of a portfolio of unrated and sub-investment-grade asset-backed securities that are held in inventory by various trading desks of the Investment Banking division. While the Plus Bond award is a cash-based instrument, the Group reserves the right to settle the award in Group shares based on the share price at the time of final distribution. In addition, subject to oversight procedures, the Group retains the right to prepay all or a portion of the Plus Bond award in cash at any time and, in the event of certain regulatory developments or changes on capital treatment, exchange the award into Group shares. The Plus Bond award plan contributes to a reduction of the Group's ☉risk-weighted assets and constitutes a risk transfer from the Group to the Plus Bond award holders.

The Plus Bonds provided to Investment Banking employees had a fair value of CHF 187 million and were fully vested and expensed on the grant date of December 31, 2012.

Managing directors and directors outside of the Investment Banking division were given the opportunity in early 2013 to voluntarily reallocate a portion of the share award component

of their deferred awards into the Plus Bond award. The Plus Bond awards resulting from the voluntary reallocation offer had a notional value of CHF 38 million, will vest on the third anniversary of the grant date in January 17, 2016 and will be expensed over the vesting period.

Restricted Cash Awards

Managing directors and directors in the Investment Banking division received the cash component of their variable compensation in the form of Restricted Cash Awards. These awards are cash payments made on the grant date, but are subject to a pro-rata repayment by the employee in the event of voluntary resignation or termination for cause within three years of the award grant. The Restricted Cash Award is reported as part of the deferred compensation award for the Group even though the award is fully settled at grant date. The expense recognition will occur over the three-year vesting period, subject to service conditions.

On January 17, 2013, the Group granted Restricted Cash Awards with a total value of CHF 299 million. The unrecognized compensation expense of CHF 299 million was determined based on the fair value of the award on the grant date and will be recognized over the three-year vesting period. On January 20, 2011, the Group granted Restricted Cash Awards with a total value of CHF 465 million.

2011 Partner Asset Facility

As part of the 2011 annual compensation process, the Group awarded a portion of their deferred variable compensation for senior employees in the form of 2011 Partner Asset Facility (PAF2) units. PAF2 units are essentially fixed income structured notes that are exposed to a portion of the credit risk that arises in the Group's ☉derivative activities, including both current and possible future swaps and other derivative transac-

tions. The value of the award (for both the interest accrual and the final redemption) will be reduced if the amount of realized credit losses from a specific reference portfolio exceeds a pre-defined threshold. The Group will bear the first USD 500 million of such losses and the PAF2 holders will bear any losses in excess of USD 500 million, up to the full amount of the deferred compensation awarded. As a result, the PAF2 plan is a transfer of risk from the Group to employees.

Employees at the managing director and director levels, including certain members of the Executive Board, received PAF2 awards. The PAF2 awards vested in the first quarter of 2012. All PAF awards are subject to non-compete and non-solicit provisions that expire equally on each of the first three anniversaries of the grant date.

The PAF2 units have a stated maturity of four years, but may be extended to nine years at the election of either the Group or the holders acting collectively. This election will not be made later than the end of the third year following the grant date. PAF2 units are denominated in Swiss francs and US dollars. Holders will receive a semi-annual cash interest payment equivalent to an annual return of 5% (CHF-denominated awards) or 6.5% (USD-denominated awards) applied to the then current balance of the PAF2 units. At maturity, PAF2 holders will receive a final settlement in an amount equal to the original award value less any losses. The Group can settle the PAF2 units in cash or an equivalent value in shares at its discretion.

In January 2012, the Group awarded PAF2 units with a fair value of CHF 499 million and the associated compensation expenses were fully expensed in the first quarter of 2012, as the awards were fully vested as of March 31, 2012. Compensation expense will continue to be updated at each reporting period date to reflect any change in the underlying fair value of the PAF2 awards until the awards are finally settled.

Adjustable Performance Plan awards

The Adjustable Performance Plan is a deferred compensation plan for the Executive Board, managing directors and directors. The Group introduced and granted Adjustable Performance Plan cash awards as part of deferred compensation for 2009 (2009 Adjustable Performance Plan) and 2010 (2010 Adjustable Performance Plan).

The 2009 Adjustable Performance Plan cash awards are fully vested and were fully expensed as of December 31, 2012 and will be delivered in the first half of 2013.

The 2010 Adjustable Performance Plan cash awards vest over a four-year period, with the final payout value subject to an upward or downward adjustment, depending on the financial performance of the specific business areas and the Group ROE. The adjustments are determined on an annual basis, increasing or decreasing the outstanding balances by a percentage equal to the reported ROE, unless the division that granted the awards incurs a pre-tax loss. In this case, outstanding awards in that division will be subject to a negative adjustment of 15% for every CHF 1 billion of loss, unless a negative ROE applies for that year and is greater than the divisional adjustment. For employees in Shared Services and other support functions, as well as for all Executive Board members, all outstanding 2010 Adjustable Performance Plan cash awards are linked to the Group's adjusted profit or loss and the Group ROE, but are not dependent upon the adjusted profit or loss of the business areas that they support.

On January 20, 2011, the Group granted Adjustable Performance Plan cash awards with a total value of CHF 1,102 million.

In July 2012, the Group executed a voluntary exchange offer, under which employees had the right to voluntarily convert all or a portion of their respective unvested Adjustable Performance Plan cash awards into Adjustable Performance Plan share awards at a conversion price of CHF 16.29. Adjustable Performance Plan holders elected to convert CHF 498 million of their Adjustable Performance Plan cash awards into the new Adjustable Performance Plan share awards during the election period, which represented an approximate conversion rate of 50%. Each Adjustable Performance Plan share award had a grant-date fair value of CHF 16.79 and contains the same contractual term, vesting period, performance criteria and other terms and conditions as the original Adjustable Performance Plan cash award.

Upon conversion, CHF 453 million of the liability related to Adjustable Performance Plan cash awards that were converted into the Adjustable Performance Plan share awards was reclassified to total shareholders' equity.

Scaled Incentive Share Unit

The Scaled Incentive Share Unit (SISU) plan is a share-based, long-term incentive plan for managing directors and directors. SISUs were granted in January 2010 as part of the 2009 deferred compensation. SISUs are similar to Incentive Share Units (ISUs) (refer to Incentive Share Unit below) except with a four-year vesting period, subject to early retirement rules, and the leverage component contains an additional performance condition which could increase or decrease the number of any additional shares. The SISU base unit vests equally on each of the four anniversaries of the grant date, whereas the SISU leverage unit will only vest on the fourth anniversary of the grant date. The new performance condition links the final delivery of additional shares to an average of the reported ROE. If the average ROE over the four-year vesting period is higher than a pre-set target established as of the grant date, the number of additional shares calculated by reference to the

average Group share price increase will be adjusted positively, and if it is below the target, the number of additional shares will be adjusted negatively, but not below zero. The final number of additional shares to be delivered at the end of the four-year vesting period will be determined first on the basis of the Group share price development (share price multiplier) and then on the basis of the average ROE development (ROE multiplier). Group shares are delivered shortly after the SISU base component and SISU leverage component vest.

On January 21, 2010, the Group granted 21.1 million SISUs. The fair value of the 2010 SISU base unit was CHF 50.30 and the fair value of the 2010 SISU leverage units was CHF 13.44. The number of additional shares per SISU was capped at a maximum of three times the grant date value, with a delivery of no more than three shares, prior to the application of the scaling factor, which can be as high as up to 2.5.

Incentive Share Unit

ISUs were the main form of share-based deferred compensation for all employees from 2006 to 2009. For 2009, ISUs were used for the deferred compensation awards granted to employees up to and including vice presidents. An ISU is similar to a share, but offers additional upside depending on the development of the Group share price, compared to predefined targets set on the grant date. For each ISU granted, the employee will receive at least one Group share (ISU base unit) over a three-year vesting period and could receive additional shares (ISU leverage unit) at the end of the three-year vesting period. The number of ISU leverage units to be converted to additional shares is calculated by multiplying the total number of ISU base units granted, less forfeitures, by a share price multiplier. The share price multiplier is determined based on the actual increase in the weighted-average monthly share price during the contractual term of the award versus the share price on the grant date. The ISU base unit vests

equally on each of the three anniversaries of the grant date, whereas the ISU leverage unit will only vest on the third anniversary of the grant date. Group shares are delivered shortly after the ISU base units and the ISU leverage units vest.

On January 21, 2010, the Group granted 6.0 million ISUs. The fair value of the 2010 ISU base units was CHF 50.30 and the fair value of the 2010 ISU leverage units was CHF 13.45. For the ISUs granted in January 2010, the number of additional shares per ISU was capped at a maximum of three times the grant value, with a delivery of no more than five shares.

In 2012, the ISU leverage units granted in 2009 were settled with a value for each outstanding leverage unit equivalent to 0.986 Group shares. In 2011, the ISU leverage units granted in 2008 were settled but did not have a value at settlement as the Group share price performance was below the minimum predefined target of CHF 58.45.

¹ Includes ISUs granted in January and throughout the year.

Cash Retention Awards

For 2008, managing directors across all divisions, all directors in Investment Banking and, to the extent the cash component of compensation exceeded CHF 300,000, directors in Private Banking, Asset Management and Shared Services received deferred compensation in the form of Cash Retention Awards. These Cash Retention Awards payments, which were made in the first quarter of 2009, were subject to vesting ratably over a two-year period and other conditions, and any unvested Cash Retention Awards would have had to be repaid if a claw-back event, such as voluntary termination of employment, occurs. These awards were fully vested in January 2011.

2008 Partner Asset Facility

As part of the 2008 annual compensation process, the Group granted employees in Investment Banking with a corporate title of managing director or director the majority of the deferred compensation in the form of 2008 Partner Asset Facility (PAF)

awards, denominated in US dollars. The PAF awards are indexed to, and represent a first-loss interest in, a specified pool of illiquid assets (Asset Pool) that originated in Investment Banking.

The notional value of the Asset Pool was based on the fair market value of the assets within the Asset Pool on December 31, 2008, and those assets will remain static throughout the contractual term of the award or until liquidated. The PAF holders will participate in the potential gains on the Asset Pool if the assets within the pool are liquidated at prices above the initial fair market value. If the assets within the Asset Pool are liquidated at prices below the initial fair market value, the PAF holders will bear the first loss on the Asset Pool. As a result, a significant portion of risk positions associated with the Asset Pool has been transferred to the employees and removed from the Group's risk-weighted assets, resulting in a reduction in capital usage.

The PAF awards, which have a contractual term of eight years, are fully vested. All PAF awards remain subject to non-

compete and non-solicit provisions that expire equally on each of the first three anniversaries of the grant date. Each PAF holder will receive a semi-annual cash interest payment of LIBOR plus 250 basis points applied to the notional value of the PAF award granted throughout the contractual term of the award. Beginning in the fifth year after the grant date, the PAF holders will receive an annual cash payment equal to 20% of the notional value of the PAF awards if the fair market value of the Asset Pool in that year has not declined below the initial fair market value of the Asset Pool. In the final year of the contractual term, the PAF holders will receive a final settlement in cash equal to the notional value, less all previous cash payments made to the PAF holder, plus any related gains or less any related losses on the liquidation of the Asset Pool.

In June 2012 and December 2011, existing PAF holders were given a voluntary election to make a value-for-value exchange of their existing PAF awards for a new PAF award linked to an expanded portfolio of reference assets. The new PAF awards are subject to the same contractual term, vesting period, performance criteria, settlement and other terms and conditions as the original PAF awards and constitute an additional risk transfer to employees on the expanded portfolio of assets that was removed from the Group's risk-weighted assets, resulting in a reduction in capital usage. As of the June 2012 and December 2011 election dates, approximately 41% and 35%, respectively, of employees holding PAF awards elected to exchange their existing PAF awards for the new PAF awards. Compensation expense for the new PAF awards will be updated at each reporting period date to reflect any change in the underlying fair value of the expanded portfolio of reference assets in

addition to the original portfolio of PAF assets until the awards are finally settled. There was no impact on compensation expense on the exchange dates.

Other cash awards

Other cash awards consist of voluntary deferred compensation, proprietary trading and employee investment plans. The compensation expense related to these awards was primarily driven by mark to market and performance adjustments, as the majority of the awards are fully vested.

Share options

Options were a substantial component of the Group's share-based program prior to 2004. The Group discontinued the practice of issuing options and all of the original grants have vested. Share options were granted with an exercise price equal to the market price of Group shares on the grant date and expire after ten years.

There were no options granted during 2012, 2011 and 2010. As of December 31, 2012, there was no aggregate intrinsic value of options outstanding or exercisable, no total intrinsic value of options exercised and the weighted-average remaining contractual term was 0.2 years. As of the exercise date, the total intrinsic value of options exercised during 2011 and 2010 was CHF 1 million and CHF 8 million, respectively. There was no cash received from option exercises in 2012. Cash received from option exercises during 2011 and 2010 was CHF 2 million and CHF 32 million, respectively. In January 2013, 4.8 million options expired.

Fair value assumptions for share-based compensation

The Group's current share-based awards do not require fair value modeling, as they are either based on market information or Group performance, which is linked to ROE and divisional pre-tax income.

In estimating the fair value of other share-based compensation awards, where an observable independent quoted market price is not available, the fair value is calculated on the grant date based on valuation techniques and/or option-pricing models that most accurately reflect the substantive characteristics of the instrument being valued. The underlying assumptions used in the models are determined based on management's assessment of the current market and historical information available on the grant date that marketplace participants would likely use in determining an exchange price for the instruments.

The inputs for expected volatility used in estimating fair values were based upon the implied market volatility of traded

options on Group shares, the historical volatility of the Group shares and other relevant factors that indicate how the future is expected to differ from the past. The expected dividend cash flows were based on a future dividend cash flow assumption which was based on market expectations. The expected risk-free interest rate was based on the current LIBOR rate on the grant date that corresponds with the expected term of the award. LIBOR rates were used as a proxy for risk-free interest rates because zero-coupon government issues do not exist in Switzerland. The expected term represents the period of time that the awards were expected to be outstanding and was generally based on the contractual term of each instrument.

The following table illustrates the significant assumptions used to estimate the fair value of SISUs and ISUs granted in 2010, based on the annual deferred compensation process.

Significant fair value assumptions

| in | 2010 | |
|---|-------|-------|
| | SISU | ISU |
| Significant fair value assumptions | | |
| Expected volatility, in % | 33.42 | 33.52 |

| 2010 | 1.45 | 1.45 |
| 2011 | 1.55 | 1.55 |
| 2012 | 1.65 | 1.65 |
| 2013 | 1.75 | – |
| Expected risk-free interest rate, in % | 1.26 | 1.00 |
| Expected term, in years | 4 | 3 |

Delivered shares

In the past, the Group typically met its obligations to deliver share awards under its compensation programs by purchasing treasury shares in the market and by entering into third-party

hedge instruments. During 2012 and 2011, the Group settled outstanding share-based compensation awards primarily through the issuance of new shares from conditional capital.

Executive Board and Board of Directors loans

A large majority of loans outstanding to members of the Executive Board and the Board of Directors are mortgages or loans against securities. Such loans are made to Executive Board and Board of Directors members on the same terms available to third-party clients or, in the case of loans to members of the Executive Board, pursuant to widely available employee benefit plans. The highest loan outstanding was CHF 4 million to Eric Varvel as of December 31, 2012.

All mortgage loans to members of the Executive Board are granted either with variable or fixed interest rates over a certain period. Typically, fixed-rate mortgages are granted for periods of up to ten years. Interest rates applied are based on refinancing costs plus a margin and interest rates and other terms are consistent with those applicable to other employees. Loans against securities are granted at interest rates and on terms applicable to such loans granted to other employees. When granting a loan to these individuals, the same credit approval and risk assessment procedures apply as for loans to other employees. Unless otherwise noted, all loans to Executive Board members were made in the ordinary course of business and substantially on the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons and in consideration of the terms which apply to all Group employees, and did not involve more than the normal risk of collectability or present other unfavorable features.

Members of the Board of Directors with loans do not benefit from employee conditions, but are subject to conditions applied to clients with a comparable credit standing. Members of the Board of Directors who were previously employees of the Group may still have outstanding loans, which were extended to them at the time that employee conditions applied

to them. Unless otherwise noted, all loans to members of the Board of Directors were made in the ordinary course of business and substantially on the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons, and did not involve more than the normal risk of collectability or present other unfavorable features. In addition to the loans included in the "Executive Board and Board of Directors loans" table, the Group or any of its banking subsidiaries may enter into financing and other banking agreements with companies in which current members of the Board of Directors have a significant influence as defined by the SEC, such as holding executive and/or board level roles in these companies. Unless otherwise noted, loans extended by the Group to such companies are also made in the ordinary course of business and at prevailing market conditions.

Banking relationships

The Group is a global financial services provider. Many of the members of the Executive Board and the Board of Directors or companies associated with them maintain banking relationships with the Group. The Group or any of its banking subsidiaries may from time to time enter into financing and other banking agreements with companies in which current members of the Executive Board or the Board of Directors have a significant influence as defined by the SEC, such as holding executive and/or board level roles in these companies. With the exception of the transactions described below, relationships with members of the Executive Board and the Board of Directors and such companies are in the ordinary course of business and are entered into on an arm's length basis. Also, unless otherwise noted, all loans to members of the Executive Board, members of the Board of Directors or companies asso-

ciated with them were made in the ordinary course of business, were made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons, and did not involve more than the normal risk of collectability or present other unfavorable features. As of December 31, 2012, 2011 and 2010, there was no loan exposure to such related parties that was not made in the ordinary course of business and at prevailing market conditions.

Related party transactions

Exchange of Tier 1 Capital Notes into Tier 1 Buffer Capital Notes

In February 2011, the Group entered into definitive agreements with entities affiliated with Qatar Investment Authority (QIA) and The Olayan Group (the Investors), each of which has significant holdings of Group shares and other Group financial products, to issue tier 1 buffer capital notes (Tier 1 BCN). Under the agreements, the Investors agreed to purchase USD 3.45 billion Tier 1 BCN and CHF 2.5 billion Tier 1 BCN in exchange for their holdings of USD 3.5 billion 11% tier 1 capital notes and CHF 2.5 billion 10% tier 1 capital notes issued in 2008 (Tier 1 Capital Notes), or in the event that the Tier 1 Capital Notes have been redeemed in full, for cash. At that time, the purchase or exchange was expected to occur no earlier than October 23, 2013, the first call date of the Tier 1 Capital Notes. In July 2012, we entered into an amendment agreement with an entity affiliated with The Olayan Group for the immediate exchange of USD 1.725 billion of their existing Tier 1 Capital Notes into an equivalent principal amount of Tier 1 BCN, thereby accelerating the exchange initially scheduled for October 2013. The accelerated exchange of some of the outstanding Tier 1 Capital Notes was one of a number of capital strengthening measures that the Group announced in July 2012.

Under their terms, the Tier 1 BCN will be converted into Group ordinary shares if the Group's reported common equity tier 1 (CET1) ratio, as determined under the [Basel Committee on Banking Supervision \(BCBS\)](#) regulations as of the end of any calendar quarter, falls below 7% (or any lower applicable minimum threshold), unless the [Swiss Financial Market Supervisory Authority \(FINMA\)](#), at the Group's request, has agreed on or prior to the publication of the Group's quarterly results that actions, circumstances or events have restored, or will imminently restore, the ratio to above the applicable threshold. The Tier 1 BCN will also be converted if FINMA determines that conversion is necessary, or that we require public sector capital support, to prevent the Group from becoming insolvent, bankrupt or unable to pay a material amount of the Group's debts, or other similar circumstances.

In addition, conversion of the Tier 1 BCN held by The Olayan Group will be triggered if, in the event of a request by FINMA for an interim report prior to the end of any calendar quarter, the Group's reported CET1 ratio, as of the end of any such interim period, falls below 5%. The conversion price will be the higher of a given floor price per share (subject to customary adjustments) or the daily volume weighted average sales price of the Group's ordinary shares over a five-day period preceding the notice of conversion. In connection with the July 2012 exchange, the conversion floor price of the Tier 1 BCN delivered in the exchange as well as the remaining Tier 1 BCN scheduled to be delivered in October 2013 was adjusted to match the conversion price of the MACCS described below. The Tier 1 BCN are deeply subordinated, perpetual and callable by the Group no earlier than 2018 and in certain other circumstances with FINMA approval. Interest is payable on the USD 3.45 billion Tier 1 BCN and CHF 2.5 billion Tier 1 BCN at fixed rates of 9.5% and 9.0%, respectively, and will reset after the first call date. Interest payments will generally be discretionary (unless triggered), subject to suspension in certain circumstances and non-cumulative.

At the time of the original transaction, the Group determined that this was a material transaction and deemed the Investors to be related parties of the Group's Board of Directors members Mr. Al Thani and Mr. Syriani, respectively, for purposes of evaluating the terms and corporate governance of the original transaction. At that time, the Board of Directors (except for Mr. Al Thani and Mr. Syriani, who abstained from participating in the determination process) determined that the terms of the original transaction, given its size, the nature of the contingent buffer capital, for which there was no established market, and the terms of the Tier 1 Capital Notes issued in 2008 and held by the Investors, were fair.

Issuance of mandatory and contingent convertible securities

In July 2012, the Group issued CHF 3.8 billion MACCS that are mandatorily convertible into 233.5 million shares at a conversion price of CHF 16.29 per share on March 29, 2013 (subject to early conversion upon certain contingency and viability events), with settlement and delivery of shares in early April 2013. Strategic and institutional investors purchased CHF 2.0 billion of MACCS and shareholders exercised preferential subscription rights for CHF 1.8 billion of MACCS. The conversion price of CHF 16.29 per share corresponded to 95% of the volume weighted average market price for the two trading days preceding the transaction. Investors in the MACCS included entities affiliated with the Investors, which also have been deemed by the Group to be related parties of the Group's Board of Directors' members, Mr. Al Thani and

Mr. Syriani, respectively. The issuance of the MACCS was one of a number of capital strengthening measures executed by the Group in 2012. In addition to the Investors, a number of other investors of the Group purchased the MACCS, including Norges Bank and the Capital Group Companies, Inc., which, like the Investors, have significant holdings of Group shares. The terms and conditions for the conversion of the MACCS are equally applicable to all purchasers.

Plus Bonds

The Group provided members of the Executive Board who did not participate in the structuring of the instrument the opportunity to invest their own funds in Plus Bond instruments with substantially the same terms as the Plus Bond awards granted to certain employees as deferred variable compensation for 2012. As a result, certain Executive Board members acquired an aggregate of CHF 9 million in Plus Bond instruments in February 2013.

Loan to Arcapita Bank

In February 2012, the Group downgraded to impaired status a loan with an outstanding principal amount of USD 30 million to Arcapita Bank B.S.C. (Arcapita Bank), an international investment firm headquartered in Bahrain. The financing provided to Arcapita Bank was extended in 2007 on arm's length terms and, at the time, did not involve more than the normal risk of collectability or present other unfavorable features.

Arcapita Bank may be deemed to be a related party entity of the Group because its Board of Directors' member Mr. Al Thani is also a member of the board of directors of Arcapita Bank. Mr. Al Thani joined the Arcapita Bank board of directors in October 2008 and the Group's Board of Directors in 2010, in both cases after the loan was extended. Arcapita Bank filed for Chapter 11 bankruptcy in the US in March 2012, and the Group subsequently sold its USD 30 million credit position to an unrelated third party. As of December 31, 2012, the Group had no credit exposure to Arcapita Bank.

Liabilities due to own pension funds

Liabilities due to the Group's own defined benefit pension funds as of December 31, 2012 and 2011 of CHF 3,232 million and CHF 2,790 million, respectively, are reflected in various liability accounts in the Group's consolidated balance sheets. In December 2011, the Group's Swiss pension fund invested CHF 350 million into mandatory convertible securities issued by Credit Suisse Group Finance (Guernsey) Limited, an unconsolidated SPE wholly owned by the Group. The mandatory convertible securities contained a 2% coupon and converted into 16.5 million Group shares at maturity in December 2012. In addition, other unconsolidated SPEs wholly owned by the Group had liabilities to the pension funds of the Group with notional values of CHF 78 million and CHF 26 million as of December 31, 2012 and 2011, respectively.

Loans outstanding made by the Group or any subsidiaries to equity method investees

| in | 2012 | 2011 | 2010 |
|---|-----------|-----------|-----------|
| Loans outstanding made by the Group or any subsidiaries to equity method investees (CHF million) | | | |
| Balance at beginning of period | 13 | 45 | 83 |

| Balance at end of period | 12 | 13 | 45 |

29 Pension and other post-retirement benefits

Pension plans

The Group has defined benefit pension plans, defined contribution pension plans and other post-retirement defined benefit plans. The Group's principal plans are located in Switzerland, the US and the UK.

Defined benefit pension plans are pension plans that define specific benefits for an employee upon that employee's retirement. These benefits are determined by taking into account the employee's salary, years of service and age of retirement. A defined benefit pension plan does not provide participants with an individual account and generally pay the benefits as an annuity. Retirees neither bear the actuarial risk (that is, the risk that the PBO will be higher than expected and/or that the retiree may outlive their retirement income), or bear the investment risk (that is, that assets invested and associated returns will be insufficient to meet the expected benefits due to low or negative returns on contributions).

Defined contribution plans provide each participant with an individual account. The benefits to be provided to a participant are solely based on the contributions made to that employee's account and are affected by income, expenses and gains and losses allocated to the account. As such, there are no stipulations of a defined annuity benefit at retirement and the participants bear the full actuarial as well as investment risk. In Switzerland, due to a minimum guaranteed rate of return defined by law, the employer continues to bear a financial risk and as a result such plans are treated as defined benefit plans under US GAAP.

Swiss pension plans

The Group's Swiss pension plans cover its employees in Switzerland and are set up as trusts domiciled in Zurich. On January 1, 2010, in addition to the annuity section (defined benefit), a new savings section (defined contribution) was introduced in the Swiss main plan and a partial changeover from the annuity section to the savings section has been processed. Furthermore, on December 20, 2011, the Group announced the complete changeover to the savings section of the plan and the discontinuance of the annuity section, effective as of January 1, 2013. For accounting purposes, both the annuity section and the savings section of the Swiss pension plan are treated as defined benefit plans under US GAAP. The

plan provides benefits in the event of retirement, death and disability and meets or exceeds the minimum benefits required under Swiss law. As of December 31, 2012 and 2011, the Group's pension plan in Switzerland comprised 80% and 81%, respectively, of all the Group's employees participating in defined benefit plans and 83% and 84%, respectively, of the fair value of plan assets and 83% of the pension benefit obligation of the Group's defined benefit plans.

In the annuity section of the plan, employee contributions were calculated as a percentage of the employees' salary level varying between 9.0% and 12.5% depending on the employees' age and funding level. The Group's contributions were at least 200% of the employees' contributions for the Group's main pension plan.

In the savings section of the plan, employee contributions depend on their age and are determined as a percentage of the pensionable salary. The employees can select between three different levels of contributions which vary between 5% and 14% depending on their age. The Group's contribution varies between 7.5% and 25% of the pensionable salary depending on the employees' age.

International pension plans

Various pension plans, including both defined benefit and defined contribution pension plans, cover the Group's employees in non-Swiss locations. These plans provide benefits in the event of retirement, death, disability or employment termination. Retirement benefits under the plans depend on age, contributions and salary. The Group's funding policy with respect to these plans is consistent with local government and tax requirements. The assumptions used are based on local economic conditions.

Other post-retirement defined benefit plans

In the US, the Group's plans provide post-retirement benefits other than pension benefits that primarily focus on health and welfare benefits for certain retired employees. In exchange for the current services provided by the employee, the Group promises to provide health and welfare benefits after the employee retires. The Group's obligation for that compensation is incurred as employees render the services necessary to earn their post-retirement benefits.

Pension costs

The net periodic pension cost for defined benefit pension and other post-retirement defined benefit plans is the cost of the respective plan for a period during which an employee renders services. The actual amount to be recognized is determined

using an actuarial formula which considers, among other factors, current service cost, interest cost, expected return on plan assets and the amortization of both prior service cost/(credit) and actuarial losses/(gains) recognized in AOCI.

Components of total pension costs

| | Defined benefit pension plans | | | Other post-retirement defined benefit plans | | |
|--|-------------------------------|------------|------------|---|-----------|-----------|
| | Switzerland | | | International | | |
| in | 2012 | 2011 | 2010 | 2012 | 2011 | 2010 |
| Total pension costs (CHF million) | | | | | | |
| Service costs on benefit obligation | 347 | 319 | 269 | 30 | 33 | 30 |
| Interest costs on benefit obligation | 378 | 416 | 453 | 127 | 123 | 134 |
| Expected return on plan assets | (617) | (668) | (637) | (164) | (160) | (163) |
| Amortization of recognized prior service cost/(credit) | (52) | 17 | 17 | (1) | 0 | 1 |
| Amortization of recognized actuarial losses/(gains) | 144 | 84 | 86 | 74 | 51 | 36 |
| Net periodic pension costs | 200 | 168 | 188 | 66 | 47 | 38 |
| Settlement losses/(gains) | 90 | 0 | 1 | 0 | 0 | (2) |
| Curtailment losses/(gains) | (35) | 1 | 0 | 0 | 0 | 0 |
| Special termination benefits | 19 | 10 | 2 | 0 | 0 | 0 |
| Total pension costs | 274 | 179 | 191 | 66 | 47 | 36 |

Total pension costs reflected in compensation and benefits – other for 2012, 2011 and 2010 were CHF 360 million, CHF 240 million and CHF 241 million, respectively.

Since the second quarter of 2011, as part of its strategic plan, the Group launched a number of cost efficiency measures including headcount reduction. This resulted in a curtailment gain of CHF 35 million and a curtailment loss of CHF 1 million in 2012 and 2011, respectively, reflecting the immediate recognition of a credit relating to the years of service no longer expected to be rendered, and in additional costs of CHF 90 million in 2012 in relation to the settlement of the pension obligation for employees in Switzerland who have been effectively terminated. Special termination benefit costs of CHF 19 million and CHF 10 million have been recognized in 2012 and 2011, respectively, relating to early retirements in Switzerland in the context of the cost efficiency measures. The previous headcount reduction announced in December 2008, resulted in special termination benefits of CHF 2 million

in 2010 related to the Swiss pension plans and settlement costs of CHF 1 million in 2010 in connection with our Swiss pension plan. The discontinuance of a Japanese plan in 2009 resulted in a gain of CHF 2 million in 2010 from the related settlement of the obligation.

Benefit obligation

The benefit obligation is expressed as either accumulated benefit obligation (ABO) or PBO. While the ABO refers to the actuarial present value based on employee services rendered prior to that date and takes into account current and past compensation levels, the PBO also applies an assumption as to future compensation levels.

The following table shows the changes in the PBO, the fair value of plan assets and the amounts recognized in the consolidated balance sheets for the defined benefit pension and other post-retirement defined benefit plans as well as the ABO for the defined benefit pension plans.

Obligations and funded status of the plans

¹ Including estimated future salary increases. ² Exclusive of estimated future salary increases.

US GAAP requires an employer to recognize the funded status of the defined benefit pension and other post-retirement defined benefit plans on the balance sheet. The funded status of these plans is determined as the difference between the fair value of plan assets and the PBO and may vary from year to year following any changes in the fair value of plan assets and variations of the PBO following changes in the underlying assumptions and census data. In 2012 and 2011, the curtail-

ments, settlements and special termination benefits in Switzerland, which impacted the PBO, related to the headcount reduction in the context of the cost efficiency measures. In addition, two plan amendments occurred in the Swiss pension plan over the last two years: the changeover from the annuity section to the savings section as announced on December 20, 2011, which resulted in a reduction in the PBO of CHF 515 million, and the upcoming reduction in the conversion rate,

used to determine the pension annuity, as announced on December 17, 2012, which resulted in a reduction in the PBO of CHF 402 million. In 2011, it was also decided to merge the two pension plans in Switzerland, the main plan and the supplementary plan, which resulted in a prior service cost of CHF 32 million.

The total net amount recognized in other assets – other and other liabilities – other in the consolidated balance sheets as of December 31, 2012 and 2011 was an underfunding of CHF 16 million and CHF 603 million, respectively.

In the fourth quarter of 2011, the Group made a special contribution of CHF 203 million to the Swiss pension plan. In

2013, the Group expects to contribute CHF 463 million to the Swiss and international defined benefit pension plans and CHF 8 million to other post-retirement defined benefit plans.

PBO or ABO in excess of plan assets

The following table discloses the aggregate PBO and ABO, as well as the aggregate fair value of plan assets for those plans with PBO in excess of plan assets and those plans with ABO in excess of plan assets as of December 31, 2012 and 2011, respectively.

Defined benefit pension plans in which PBO or ABO were in excess of plan assets

| | PBO exceeds fair value of plan assets ¹ | | | | ABO exceeds fair value of plan assets ¹ | | | |
|---------------------------|--|--------|---------------|-------|--|------|---------------|-------|

Assumptions

The measurement of both the net periodic pension cost as well as the benefit obligation is determined using explicit assumptions, each of which individually represents the best

estimate of a particular future event. Where applicable, they should be in line with the expected market averages and benchmarks, the trend in the market and with historical rates.

Weighted-average assumptions used to determine net periodic pension cost and benefit obligation

| | Defined benefit pension plans | | | | | | Other post-retirement defined benefit plans | | |
|--|-------------------------------|------|------|---------------|------|------|---|------|------|
| | Switzerland | | | International | | | International | | |

| Salary increases | 1.2 | 1.4 | 2.0 | 4.0 | 4.0 | 4.2 | – | – | – |

Net periodic pension cost and benefit obligation assumptions

The assumptions used to determine the benefit obligation as of the measurement date are also used to calculate the net periodic pension cost for the 12-month period following this date. The discount rate is one of the factors used to determine the present value as of the measurement date of the future cash outflows currently expected to be required to satisfy the benefit obligations when due. The assumption pertaining to salary increases is used to calculate the PBO, which is measured using an assumption as to future compensation levels.

The expected long-term rate of return on plan assets, which is used to calculate the expected return on plan assets as a component of the net periodic pension cost, reflects the average rate of earnings expected on the funds invested or to be invested to provide for the benefits included in the PBO. In estimating that rate, appropriate consideration is given to the returns being earned by the plan assets and the rates of return expected to be available for reinvestment.

The expected long-term rate of return on plan assets is based on total return forecasts and volatility and correlation estimates. Where possible, similar, if not related, approaches are followed to forecast returns for the various asset classes. For most asset classes, clearly specified multi-linear regression models to forecast returns are used or reliance is put on traditional models such as dividend discount and fair value models.

The expected long-term rate of return on debt securities reflects both accruing interest and price returns. The probable long-term relationship between the total return and certain exogenous variables pre-defined by economic model is explicitly used, which directly links the debt securities total return forecasts to the macro-forecasts.

The expected long-term rate of return on equity securities is based on a two-stage dividend discount model, which considers analyst consensus earnings to compute a market-implied equity risk premium. Dividends are estimated using market consensus earnings and the historical payout ratio. A subsequent scenario analysis was used to stress test the level of the return.

The expected long-term rate of return on real estate is based on error correction models. The underlying economic models reflect both the rental and the capital market side of the direct real estate market. This allows for a replicable and robust forecasting methodology for expected returns on real estate equity, fund and direct market indices.

The expected long-term rate of return on private equity and hedge funds is estimated by using private equity and hedge fund benchmarks and indices. In both private equity and hedge funds, a set of factors drives or explains returns. To capture these, multiple linear regression models with lagged returns are utilized. This methodology also lends itself to the fact that these alternative investments tended to be positively correlated with current and lagged equity securities returns.

Health care cost assumptions

The health care cost trend is used to determine the appropriate other post-retirement defined benefit costs. In determining those costs, an annual weighted-average rate of 9.00% for 2012 and 2011 and 9.75% for 2010 was assumed in the cost of covered health care benefits. As of December 31, 2012, the rate is assumed to decrease gradually to 5% by 2020 and remain at that level thereafter. As of December 31, 2012, 2011 and 2010, a 1% increase in the health care cost trend rate assumption would have resulted in an increase in post-retirement expenses of CHF 1.4 million, CHF 1.3 million and CHF 1.5 million, and an increase in accumulated post-retire-

ment defined benefit obligation of CHF 27 million, CHF 23 million and CHF 26 million, respectively. A 1% decrease in the health care cost trend assumption would result in a decrease in post-retirement expenses of CHF 1.1 million, CHF 1.1 million and CHF 1.2 million, and a decrease in post-retirement defined benefit obligation of CHF 22 million, CHF 19 million and CHF 21 million as of December 31, 2012, 2011 and 2010.

Plan assets and investment strategy

Plan assets, which are assets that have been segregated and restricted to provide for plan benefits, are measured at their fair value as of the measurement date.

The Group's defined benefit pension plans employ a total return investment approach, whereby a diversified mix of debt and equity securities and alternative investments, specifically hedge funds and private equity, are used to maximize the long-term return of plan assets while incurring a prudent level of risk. The intent of this strategy is to outperform plan liabilities over the long-term in order to minimize plan expenses. Risk tolerance is established through careful consideration of plan liabilities, plan funded status and corporate financial condition. Furthermore, equity securities are diversified across Swiss and non-Swiss stocks as well as among growth, value and small and large capitalization stocks. Real estate and alternative investments, such as private equity and hedge funds, are used to enhance long-term returns while improving portfolio diversification. ◉ Derivatives may be used to hedge or increase market exposure, but are not used to leverage the portfolio beyond the market value of the underlying investments. Investment risk is measured and monitored on an ongoing basis through periodic asset/liability studies and quarterly investment portfolio reviews. To limit investment risk, the Group pension plans follow defined strategic asset allocation guidelines. Depending on the market conditions, these guidelines are even more limited on a short-term basis.

As of December 31, 2012 and 2011, the total fair value of Group debt securities included in plan assets of the Group's defined benefit pension plans was CHF 256 million and CHF 598 million, respectively, and the total fair value of Group equity securities and options was CHF 109 million and CHF 33 million, respectively.

Fair value hierarchy of plan assets

- Refer to "Fair value hierarchy" in Note 33 – Financial instruments for discussion of the fair value hierarchy.

Qualitative disclosures of valuation techniques used to measure fair value

Cash and cash equivalents

Cash and cash equivalents includes money market instruments such as bankers' acceptances, certificates of deposit, ◉ CP, book claims, treasury bills, other rights and commingled funds. Valuations of money market instruments and commingled funds are generally based on observable inputs.

Debt securities

Debt securities include government and corporate bonds which are generally quoted in active markets. Debt securities for which market prices are not available, are valued based on yields reflecting the perceived risk of the issuer and the maturity of the security, recent disposals in the market or other modeling techniques, which may involve judgment.

Equity securities

Equity securities held include common equity shares, convertible bonds and shares in investment companies and units in mutual funds. The common equity shares are generally traded on public stock exchanges for which quoted prices are regularly available. Convertible bonds are generally valued using observable pricing sources. Shares in investment companies and units in mutual funds, which are not directly quoted on a public stock exchange and/or for which a fair value is not readily determinable, are measured at fair value using NAV.

Derivatives

Derivatives include both ◉ OTC and exchange-traded derivatives. The fair value of OTC derivatives is determined on the basis of inputs that include those characteristics of the derivative that have a bearing on the economics of the instrument. The determination of the fair value of many derivatives involves only a limited degree of subjectivity since the required inputs are generally observable in the marketplace. Other more complex derivatives may use unobservable inputs. Such inputs include long-dated volatility assumptions on OTC option transactions and recovery rate assumptions for credit derivative transactions. The fair value of exchange-traded derivatives is typically derived from the observable exchange prices and/or observable inputs.

Real estate

Real estate includes direct real estate as well as investments in real estate investment companies, trusts or mutual funds. Direct real estate is initially measured at its transaction price, which is the best estimate of fair value. Thereafter, direct real estate is individually measured at fair value based on a number of factors that include any recent rounds of financing involving

third-party investors, comparable company transactions, multiple analyses of cash flows or book values, or discounted cash flow analyses. The availability of information used in these modeling techniques is often limited and involves significant judgment in evaluating these different factors over time. Real estate investment companies, trusts and mutual funds, which are not directly quoted on a public stock exchange and/or for which a fair value is not readily determinable, are measured at fair value using NAV.

Alternative investments

Private equity includes direct investments, investments in partnerships that make private equity and related investments in various portfolio companies and funds and fund of funds partnerships. Private equity consists of both publicly traded securities and private securities. Publicly traded investments that are restricted or that are not quoted in active markets are val-

ued based on publicly available quotes with appropriate adjustments for liquidity or trading restrictions made. Private equity is valued taking into account a number of factors, such as the most recent round of financing involving unrelated new investors, earnings multiple analyses using comparable companies or discounted cash flow analyses. Private equity for which a fair value is not readily determinable is measured at fair value using NAV provided by the general partner.

Hedge funds that are not directly quoted on a public stock exchange and/or for which a fair value is not readily determinable, is measured at fair value using NAV provided by the fund administrator.

Fair value of plan assets

The following tables present the plan assets measured at fair value on a recurring basis as of December 31, 2012 and 2011, for the Group's defined benefit pension plans.

Plan assets measured at fair value on a recurring basis

| 2013 | 942 | 8 |
| 2014 | 933 | 9 |
| 2015 | 927 | 9 |
| 2016 | 909 | 10 |
| 2017 | 888 | 11 |
| For five years thereafter | 4,709 | 57 |

Defined contribution pension plans

The Group contributes to various defined contribution pension plans primarily in the US and the UK as well as other countries throughout the world. During 2012, 2011 and 2010, the

Group contributed to these plans and recognized as expense CHF 221 million, CHF 246 million and CHF 263 million, respectively.

30 Derivatives and hedging activities

Derivatives are generally either privately negotiated OTC contracts or standard contracts transacted through regulated exchanges. The Group's most frequently used freestanding derivative products, entered into for trading and risk management purposes, include interest rate, credit default and cross-currency swaps, interest rate and foreign exchange options, foreign exchange forward contracts and foreign exchange and interest rate futures.

The Group also enters into contracts that are not considered derivatives in their entirety but include embedded derivative features. Such transactions primarily include issued and purchased structured debt instruments where the return may be calculated by reference to an equity security, index or third-party credit risk, or that have non-standard interest or foreign exchange terms.

On the date a derivative contract is entered into, the Group designates it as belonging to one of the following categories:

- trading activities;
- a risk management transaction that does not qualify as a hedge under accounting standards (referred to as an economic hedge);
- a hedge of the fair value of a recognized asset or liability;
- a hedge of the variability of cash flows to be received or paid relating to a recognized asset or liability or a forecasted transaction; or

- a hedge of a net investment in a foreign operation.

Trading activities

The Group is active in most of the principal trading markets and transacts in many popular trading and hedging products. As noted above, this includes the use of swaps, futures, options and structured products, such as custom transactions using combinations of derivatives, in connection with its sales and trading activities. Trading activities include market making, positioning and arbitrage activities. The majority of the Group's derivatives were used for trading activities.

Economic hedges

Economic hedges arise when the Group enters into derivative contracts for its own risk management purposes, but the contracts entered into do not qualify for hedge accounting under US GAAP. These economic hedges include the following types:

- interest rate derivatives to manage net interest rate risk on certain core banking business assets and liabilities;
- foreign exchange derivatives to manage foreign exchange risk on certain core banking business revenue and expense items, as well as on core banking business assets and liabilities;
- credit derivatives to manage credit risk on certain loan portfolios; and

- futures to manage risk on equity positions including convertible bonds.

Derivatives used in economic hedges are included as trading assets or trading liabilities in the consolidated balance sheets.

Hedge accounting

Fair value hedges

The Group designates fair value hedges as part of an overall interest rate risk management strategy that incorporates the use of derivative instruments to minimize fluctuations in earnings that are caused by interest rate volatility. In addition to hedging changes in fair value due to interest rate risk associated with fixed rate loans, repurchase agreements and long-term debt instruments, the Group uses:

- cross-currency swaps to convert foreign-currency-denominated fixed rate assets or liabilities to floating rate functional currency assets or liabilities; and
- foreign exchange forward contracts to hedge the foreign exchange risk associated with available-for-sale securities.

Cash flow hedges

The Group designates cash flow hedges as part of its strategy to mitigate its risk to variability of cash flows on loans, deposits and other debt obligations by using interest rate swaps to convert variable rate assets or liabilities to fixed rates. The Group also uses cross-currency swaps to convert foreign-currency-denominated fixed and floating rate assets or liabilities to fixed rate assets or liabilities based on the currency profile to which the Group elects to be exposed. This includes, but is not limited to, Swiss francs and US dollars. Further, the Group uses derivatives to hedge its cash flows associated with forecasted transactions. As of the end of 2012, the maximum length of time over which the Group hedged its exposure to the variability in future cash flows for forecasted transactions, excluding those forecasted transac-

tions related to the payment of variable interest on existing financial instruments, was eight months.

Net investment hedges

The Group designates net investment hedges as part of its strategy to hedge selected net investments in foreign operations against adverse movements in foreign exchange rates, typically using forward foreign exchange contracts.

Hedge effectiveness assessment

The Group assesses the effectiveness of hedging relationships both prospectively and retrospectively. The prospective assessment is made both at the inception of a hedging relationship and on an ongoing basis, and requires the Group to justify its expectation that the relationship will be highly effective over future periods. The retrospective assessment is also performed on an ongoing basis and requires the Group to determine whether or not the hedging relationship has actually been effective. If the Group concludes, through a retrospective evaluation, that hedge accounting is appropriate for the current period, then it measures the amount of hedge ineffectiveness to be recognized in earnings.

Fair value of derivative instruments

The tables below present gross derivative replacement values by type of contract and balance sheet location and whether the derivative is used for trading purposes or in a qualifying hedging relationship. Notional amounts have also been provided as an indication of the volume of derivative activity within the Group.

Information on bifurcated embedded derivatives has not been included in this table. Under US GAAP, the Group elected to account for substantially all financial instruments with an embedded derivative that is not considered clearly and closely related to the host contract at fair value.

- Refer to "Note 33 – Financial instruments" for further information.

Represents gains/(losses) on effective portion.

¹ Included in other revenues.

The Group includes all derivative instruments not included in hedge accounting relationships in its trading activities.

► Refer to "Note 8 – Trading revenues" for gains and losses on trading activities by product type.

Disclosures relating to contingent credit risk

Certain of the Group's derivative instruments contain provisions that require it to maintain a specified credit rating from each of the major credit rating agencies. If the ratings fall below the amount specified in the contract, the counterparties to the agreements could request payment of additional collateral on those derivative instruments that are in a net liability position. Certain of the derivative contracts also provide for termination of the contract, generally upon a downgrade of either the Group or the counterparty, at the existing mark-to-market replacement value of the derivative contract.

The following table provides the Group's current net exposure from contingent credit risk relating to derivative contracts with bilateral counterparties and SPEs that include credit sup-

port agreements, the related collateral posted and the additional collateral required in a one-notch and a two-notch downgrade event, respectively. The table also includes derivative contracts with contingent credit risk features without credit support agreements that have accelerated termination event conditions. The current net exposure for derivative contracts with bilateral counterparties and contracts with accelerated termination event conditions is the aggregate fair value of derivative instruments that were in a net liability position. For SPEs, the current net exposure is the contractual amount that is used to determine the collateral payable in the event of a downgrade. The contractual amount could include both the NRV and a percentage of the notional value of the derivative.

Contingent credit risk

| end of | Bilateral counterparties | Special purpose entities | Accelerated terminations | Total |
|---|--------------------------|--------------------------|--------------------------|-------------|
| 2012 (CHF billion) | | | | |
| Current net exposure | 15.3 | 1.4 | 0.6 | 17.3 |
| Collateral posted | 13.4 | 1.4 | – | 14.8 |
| Additional collateral required in a one-notch downgrade event | 0.2 | 0.5 | 0.0 | 0.7 |
| Additional collateral required in a two-notch downgrade event | 0.4 | 1.5 | 0.5 | 2.4 |
| 2011 (CHF billion) | | | | |
| Current net exposure | 17.0 | 2.0 | 0.7 | 19.7 |
| Collateral posted | 14.8 | 1.8 | – | 16.6 |
| Additional collateral required in a one-notch downgrade event | 0.2 | 1.6 | 0.0 | 1.8 |
| Additional collateral required in a two-notch downgrade event | 0.4 | 3.0 | 0.5 | 3.9 |

Credit derivatives

Credit derivatives are contractual agreements in which the buyer generally pays a fee in exchange for a contingent payment by the seller if there is a credit event on the underlying referenced entity or asset. They are generally privately negotiated OTC contracts, with numerous settlement and payment terms, and most are structured so that they specify the occurrence of an identifiable credit event, which can include bankruptcy, insolvency, receivership, material adverse restructuring of debt or failure to meet obligations when due.

The Group enters into credit derivative contracts in the normal course of business, buying and selling protection to facilitate client transactions and as a market maker. This includes providing structured credit products for its clients to enable them to hedge their credit risk. The referenced instruments of these structured credit products are both investment grade and non-investment grade and could include corporate bonds, sovereign debt, asset-backed securities (ABS) and loans.

These instruments can be formed as single items (single-named instruments) or combined on a portfolio basis (multi-named instruments). The Group purchases protection to economically hedge various forms of credit exposure, for example, the economic hedging of loan portfolios or other cash positions. Finally, the Group also takes proprietary positions which can take the form of either purchased or sold protection.

The credit derivatives most commonly transacted by the Group are ◉CDS and credit swaptions. CDSs are contractual agreements in which the buyer of the swap pays an upfront and/or a periodic fee in return for a contingent payment by the seller of the swap following a credit event of the referenced entity or asset. Credit swaptions are options with a specified maturity to buy or sell protection under a CDS on a specific referenced credit event.

In addition, to reduce its credit risk, the Group enters into legally enforceable ◉netting agreements with its derivative counterparties. Collateral on these derivative contracts is usu-

ally posted on a net counterparty basis and cannot be allocated to a particular derivative contract.

Credit protection sold

Credit protection sold is the maximum potential payout, which is based on the notional value of derivatives and represents the amount of future payments that the Group would be required to make as a result of credit risk-related events. The Group believes that the maximum potential payout is not representative of the actual loss exposure based on historical experience. This amount has not been reduced by the Group's rights to the underlying assets and the related cash flows. In accordance with most credit derivative contracts, should a credit event (or settlement trigger) occur, the Group is usually liable for the difference between the credit protection sold and the recourse it holds in the value of the underlying assets. The maximum potential amount of future payments has not been reduced for any cash collateral paid to a given counterparty as such payments would be calculated after netting all derivative exposures, including any credit derivatives with that counterparty in accordance with a related master netting agreement. Due to such netting processes, determining the amount of collateral that corresponds to credit derivative exposures only is not possible.

To reflect the quality of the payment risk on credit protection sold, the Group assigns an internally generated rating to those instruments referenced in the contracts. Internal ratings are assigned by experienced credit analysts based on expert judgment that incorporates analysis and evaluation of both quantitative and qualitative factors. The specific factors analyzed, and their relative importance, are dependent on the type of counterparty. The analysis emphasizes a forward-looking approach, concentrating on economic trends and financial fundamentals, and making use of peer analysis, industry comparisons and other quantitative tools. External ratings and market information are also used in the analysis process where available.

Credit protection purchased

Credit protection purchased represents those instruments where the underlying reference instrument is identical to the reference instrument of the credit protection sold. The maximum potential payout amount of credit protection purchased for each individual identical underlying reference instrument

may be greater or lower than the notional amount of protection sold.

The Group also considers estimated recoveries that they would receive if the specified credit event occurred, including both the anticipated value of the underlying referenced asset that would, in most instances, be transferred to the Group and the impact of any purchased protection with an identical reference instrument and product type.

Other protection purchased

In the normal course of business, the Group purchases protection to offset the risk of credit protection sold that may have similar, but not identical, reference instruments, and may use similar, but not identical, products, which reduces the total credit derivative exposure. Other protection purchased is based on the notional value of the instruments.

The Group purchases its protection from banks and broker dealers, other financial institutions and other counterparties.

Fair value of credit protection sold

The fair values of the credit protection sold give an indication of the amount of payment risk, as the negative fair values increase when the potential payment under the derivative contracts becomes more probable.

Credit protection sold/purchased

The following tables do not include all credit derivatives and differ from the credit derivatives in the "Fair value of derivative instruments" table. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative as a derivative instrument (a) in which one or more of its underlyings are related to the credit risk of a specified entity (or a group of entities) or an index based on the credit risk of a group of entities and (b) that exposes the seller to potential loss from credit risk-related events specified in the contract.

Certain cash  collateralized debt obligations (CDOs) and other instruments were excluded as they do not fall within the scope of US GAAP rules.  Total return swaps (TRS) of CHF 6.0 billion and CHF 4.8 billion as of 2012 and 2011, respectively, were also excluded because a TRS does not expose the seller to potential loss from credit risk-related events specified in the contract. A TRS only provides protection against a loss in asset value and not against additional amounts as a result of specific credit events.

31 Guarantees and commitments

Guarantees

In the ordinary course of business, guarantees are provided that contingently obligate Credit Suisse to make payments to third parties if the counterparty fails to fulfill its obligation under a borrowing or other contractual arrangement. The total

gross amount disclosed within the Guarantees table reflects the maximum potential payment under the guarantees. The carrying value represents the Group's current best estimate of payments that will be required under existing guarantee arrangements.

Guarantees

¹ Total net amount is computed as the gross amount less any participations. ² Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Group had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments. ³ Collateral for derivatives accounted for as guarantees is not considered significant.

Credit guarantees and similar instruments

Credit guarantees and similar instruments are contracts that require the Group to make payments should a third party fail to do so under a specified existing credit obligation. The position includes standby letters of credit, commercial and residential mortgage guarantees and other guarantees associated with VIEs.

Standby letters of credit are made in connection with the corporate lending business and other corporate activities, where the Group provides guarantees to counterparties in the form of standby letters of credit, which represent obligations to make payments to third parties if the counterparties fail to fulfill their obligations under a borrowing arrangement or other contractual obligation.

Commercial and residential mortgage guarantees are made in connection with the Group's commercial mortgage activities in the US, where the Group sells certain commercial and residential mortgages to the Federal National Mortgage Association

(FNMA) and agrees to bear a percentage of the losses triggered by the borrowers failing to perform on the mortgage. The Group also issues guarantees that require it to reimburse FNMA for losses on certain whole loans underlying mortgage-backed securities issued by FNMA, which are triggered by borrowers failing to perform on the underlying mortgages.

The Group also provides guarantees to VIEs and other counterparties under which it may be required to buy assets from such entities upon the occurrence of certain triggering events such as rating downgrades and/or substantial decreases in fair value of those assets.

Performance guarantees and similar instruments

Performance guarantees and similar instruments are arrangements that require contingent payments to be made when certain performance-related targets or covenants are not met. Such covenants may include a customer's obligation to deliver certain products and services or to perform under a construc-

tion contract. Performance guarantees are frequently executed as part of project finance transactions. The position includes private equity fund guarantees and guarantees related to residential mortgage securitization activities.

For private equity fund guarantees, the Group has provided investors in private equity funds sponsored by a Group entity guarantees on potential obligations of certain general partners to return amounts previously paid as carried interest to those general partners if the performance of the remaining investments declines. To manage its exposure, the Group generally withholds a portion of carried interest distributions to cover any repayment obligations. In addition, pursuant to certain contractual arrangements, the Group is obligated to make cash payments to certain investors in certain private equity funds if specified performance thresholds are not met.

Further, as part of the Group's residential mortgage securitization activities in the US, the Group may guarantee the collection by the servicer and remittance to the securitization trust of prepayment penalties. The Group will have to perform under these guarantees in the event the servicer fails to remit the prepayment penalties.

Securities lending indemnifications

Securities lending indemnifications include arrangements in which the Group agreed to indemnify securities lending customers against losses incurred in the event that security borrowers do not return securities subject to the lending agreement and the collateral held is insufficient to cover the market value of the securities borrowed. As indicated in the Guarantees table, the Group was fully collateralized in respect of securities lending indemnifications.

Derivatives

Derivatives are issued in the ordinary course of business, generally in the form of written put options. Disclosures about derivative contracts are not required under US GAAP if such contracts may be cash settled and the Group has no basis to conclude it is probable that the counterparties held, at inception, the underlying instruments related to the derivative contracts. The Group has concluded that these conditions were met for certain active commercial and investment banks and certain other counterparties, and accordingly, the Group has not included such contracts as guarantees.

The Group manages its exposure to these derivatives by engaging in various hedging strategies to reduce its exposure. For some contracts, such as written interest rate caps or foreign exchange options, the maximum payout is not determinable as interest rates or exchange rates could theoretically rise without limit. For these contracts, notional amounts were disclosed in the table above in order to provide an indication

of the underlying exposure. In addition, the Group carries all derivatives at fair value in the consolidated balance sheets and has considered the performance triggers and probabilities of payment when determining those fair values. It is more likely than not that written put options that are in-the-money to the counterparty will be exercised, for which the Group's exposure was limited to the carrying value reflected in the table.

Other guarantees

Other guarantees include bankers' acceptances, residual value guarantees, deposit insurance, contingent considerations in business combinations, the minimum value of an investment in mutual funds or private equity funds and all other guarantees that were not allocated to one of the categories above.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guarantee an amount of up to CHF 6 billion. Upon occurrence of a payout event triggered by a specified restriction of business imposed by FINMA or by the compulsory liquidation of another deposit-taking bank, the Group's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA's estimate for the Group's banking subsidiaries in Switzerland, the Group's share in the deposit insurance guarantee program for the period July 1, 2012 to June 30, 2013 is CHF 0.7 billion. These deposit insurance guarantees were reflected in other guarantees.

PAF2 transaction

The Group's results are impacted by the risk of counterparty defaults and the potential for changes in counterparty credit spreads related to derivative trading activities of the Group. In the first quarter of 2012, the Group entered into the PAF2 transaction to hedge the counterparty credit risk of a referenced portfolio of derivatives and their credit spread volatility. The hedge covers the approximately USD 12 billion notional amount of expected positive exposure from counterparties of the Group, and is addressed in three layers: (i) first loss (USD 0.5 billion), (ii) mezzanine (USD 0.8 billion) and (iii) senior (USD 11 billion). The first loss element is retained by the Group and actively managed through normal credit procedures. The mezzanine layer was hedged by transferring the risk of default and counterparty credit spread movements to eligible employees in the form of PAF2 awards, as part of their deferred compensation granted in the annual compensation process.

The model used to value the PAF2 awards is the standard Gaussian copula valuation model used for synthetic CDO

trades with adjustments necessary to incorporate the specific nature of the PAF2 transaction. The key model inputs are notional value, correlation assumption, credit spreads, liquidity and recovery rates of the portfolio, the Group's own credit spread and the maturity of the trade. In the model, the credit spreads of the counterparties determine the respective probability of default. Such probability is used to compute the expected value of the cash flows contingent on survival and on default of the counterparties in the reference portfolio. The credit spreads are sourced using observable data from CDS on the specific reference entity. Where a specific reference entity curve does not exist for a reference name in the portfolio, a proxy curve is used. The expected value of the counterparty exposure on default determines the equivalent notional value for the given name. This is computed from the effective positive exposure which is the weighted average over time of the expected exposure used by the Group for counterparty risk management. As of December 31, 2012, the carrying value of the PAF2 awards was CHF 627 million. The amount of the PAF2 awards compensation expense for the year ended December 31, 2012 was CHF 647 million and is included in the amount reflected in the "Deferred compensation expense" table in Note 27 – Employee deferred compensation, which includes deferred compensation expense for a smaller plan unrelated to the hedging aspects of this transaction.

The Group has purchased protection on the senior layer to hedge against the potential for future counterparty credit spread volatility. This was executed through a CDS, accounted for at fair value, with a third-party entity. The value of the senior layer is calculated using the same model as for the PAF2 awards. As of December 31, 2012, the CDS had a positive replacement value of CHF 8 million and was reflected in credit derivatives in the "Fair value of derivative instruments" table in Note 30 – Derivatives and hedging activities. The Group also has a credit support facility with this entity that allows the Group to provide credit support in connection with other assets that are commonly financed through the issuance of commercial paper (CP) and, in connection with the CDS, to provide immediately available funding to this entity in certain circumstances. Among others, such circumstances include: (i) a disruption of the CP market such that the entity cannot issue or roll a CP to fund the CDS payment or repay a maturing CP; (ii) the interest payable on the CP exceeds certain thresholds and the Group instructed the entity to draw on the facility instead of issuing a CP; (iii) a CP was issued by the entity to fund a CDS payment and subsequently the short-term rating of the facility provider is downgraded; or (iv) to repay any outstanding CP at the maturity date of the facility. Any funded amount may be settled by the assignment of the rights and obligations of the CDS to the Group. The credit support facility is accounted for on an accrual basis and is

reflected in credit guarantees and similar instruments in the "Guarantees" table. As of December 31, 2012, the carrying value of the credit support facility included in this table was CHF 7 million. The transaction overall is a four-year transaction, but can be extended to nine years. The Group has the right to terminate the third-party transaction for certain reasons, including certain regulatory developments.

In December 2012, the BCBS published updated regulatory guidance that makes the PAF2 transaction as currently structured ineligible for counterparty credit spread hedging under the Basel III framework. As a result of this new guidance, the Group now has the right to exercise the regulatory call to restructure or terminate the CDS and the credit support facility layer at par and terminate the mezzanine layer at fair value. The Group is evaluating restructuring the transaction in order for the PAF2 transaction as a whole to remain an eligible counterparty credit spread hedge under Basel III, or alternatively, the Group may decide to terminate the transaction in its entirety.

Representations and warranties on residential mortgage loans sold

In connection with Investment Banking's sale of US residential mortgage loans, the Group has provided certain representations and warranties relating to the loans sold. The Group has provided these representations and warranties relating to sales of loans to: the US government-sponsored enterprises Fannie Mae and Freddie Mac (GSEs); institutional investors, primarily banks; and non-agency, or private label, securitizations. The loans sold are primarily loans that the Group has purchased from other parties. The scope of representations and warranties, if any, depends on the transaction, but can include: ownership of the mortgage loans and legal capacity to sell the loans; loan-to-value ratios and other characteristics of the property, the borrower and the loan; validity of the liens securing the loans and absence of delinquent taxes or related liens; conformity to underwriting standards and completeness of documentation; and origination in compliance with law. If it is determined that representations and warranties were breached, the Group may be required to repurchase the related loans or indemnify the investors to make them whole for losses. Whether the Group will incur a loss in connection with repurchases and make whole payments depends on: the extent to which claims are made; the validity of such claims (including the likelihood and ability to enforce claims); whether the Group can successfully claim against parties that sold loans to the Group and made representations and warranties to the Group; the residential real estate market, including the number of defaults; and whether the obligations of the securitization vehicles were guaranteed or insured by third parties.

With respect to its outstanding repurchase claims balance for GSEs, private investors and non-agency securitizations, the Group is unable to estimate reasonably possible losses in excess of the amounts accrued because the Group has limited reliable information about the status of such loans following their sale. With respect to outstanding repurchase claims from private investors and non-agency securitizations, the Group is unable to estimate reasonably possible losses in excess of the

amounts accrued due to the Group's limited history of resolving such repurchase claims.

The following tables present the total amount of residential mortgage loans sold during the period from January 1, 2004 to December 31, 2012 by counterparty type and the development of outstanding repurchase claims and provisions for outstanding repurchase claims during the period from January 1, 2012 to December 31, 2012, including realized losses from the repurchase of residential mortgage loans sold.

Residential mortgage loans sold

Residential mortgage loans sold from January 1, 2004 to December 31, 2012 (USD billion)

| | |
|----------------------------------|--------------------|
| Government-sponsored enterprises | 8.2 |
| Private investors ¹ | 22.6 |
| Non-agency securitizations | 130.1 ² |
| Total | 160.9 |

¹ Primarily banks. ² The outstanding balance of residential mortgage loans sold was USD 27.6 billion as of December 31, 2012. The difference of the total balance of mortgage loans sold and the outstanding balance as of December 31, 2012 was attributable to borrower payments of USD 85.4 billion and losses of USD 17.1 billion due to loan defaults.

Residential mortgage loans sold – outstanding repurchase claims

| Claims rescinded | (37) | (18) | 0 | (55) | (13) | (64) | (28) | (105) |
| Transfers to/from arbitration and litigation, net ⁴ | 0 | 0 | (841) | (841) | 0 | 0 | (1,966) | (1,966) |
| Balance at end of period | 67 | 464 | 1,395 | 1,926 | 68 | 432 | 243 | 743 |

¹ All related to period July 1, 2011 to December 31, 2011. ² Settled at a repurchase price of USD 15 million and USD 5 million in 2012 and 2011, respectively. ³ Settled at USD 41 million and USD 9 million in 2012 and 2011, respectively. ⁴ Refer to "Note 37 – Litigation" for repurchase claims that are in arbitration or litigation.

Provisions for outstanding repurchase claims

| | 2012 | 2011 |
|---|-----------------------|-----------------------|
| Provisions for outstanding repurchase claims (USD million)¹ | | |
| Balance at beginning of period | 59 | 29 |
| Increase/(decrease) in provisions, net | 52 | 47 |
| Realized losses ² | (56) ³ | (17) ⁴ |
| Balance at end of period | 55⁵ | 59⁵ |

¹ Excludes provisions for repurchase claims related to residential mortgage loans sold that are in arbitration or litigation. Refer to "Note 37 – Litigation" for further information. ² Includes indemnifications paid to resolve loan repurchase claims. ³ Primarily related to government-sponsored enterprises and non-agency securitizations. ⁴ Primarily related to government-sponsored enterprises. ⁵ Substantially all related to government-sponsored enterprises.

Representations and warranties relating to residential mortgage loans sold to non-agency securitization vehicles are more limited in scope than those relating to residential mortgage loans sold to GSEs, and it can be more difficult to establish causation and standing in making a repurchase claim for breach of representations and warranties on residential mortgage loans sold in non-agency securitizations. The Group is involved in litigation relating to representations and warranties on residential mortgage loans sold.

► Refer to “Note 37 – Litigation” for further information.

Repurchase claims on residential mortgage loans sold that are subject to arbitration or litigation proceedings, or become so during the reporting period, are not included in the Guarantees and commitments disclosure of repurchase claims and related loss contingencies and provisions but are addressed in litigation and related loss contingencies and provisions.

Repurchase claims relating to residential mortgage loans sold may increase in the future based on the large number of defaults in residential mortgages, including those sold or securitized by the Group.

Disposal-related contingencies and other indemnifications

The Group has certain guarantees for which its maximum contingent liability cannot be quantified. These guarantees are not reflected in the “Guarantees” table and are discussed below.

Disposal-related contingencies

In connection with the sale of assets or businesses, the Group sometimes provides the acquirer with certain indemnification provisions. These indemnification provisions vary by counterparty in scope and duration and depend upon the type of assets or businesses sold. They are designed to transfer the

potential risk of certain unquantifiable and unknowable loss contingencies, such as litigation, tax and intellectual property matters, from the acquirer to the seller. The Group closely monitors all such contractual agreements in order to ensure that indemnification provisions are adequately provided for in the Group’s consolidated financial statements.

Other indemnifications

The Group provides indemnifications to certain counterparties in connection with its normal operating activities, for which it is not possible to estimate the maximum amount that it could be obligated to pay. As a normal part of issuing its own securities, the Group typically agrees to reimburse holders for additional tax withholding charges or assessments resulting from changes in applicable tax laws or the interpretation of those laws. Securities that include these agreements to pay additional amounts generally also include a related redemption or call provision if the obligation to pay the additional amounts results from a change in law or its interpretation and the obligation cannot be avoided by the issuer taking reasonable steps to avoid the payment of additional amounts. Since such potential obligations are dependent on future changes in tax laws, the related liabilities the Group may incur as a result of such changes cannot be reasonably estimated. In light of the related call provisions typically included, the Group does not expect any potential liabilities in respect of tax gross-ups to be material.

The Group is a member of numerous securities exchanges and clearing houses and may, as a result of its membership arrangements, be required to perform if another member defaults. The Group has determined that it is not possible to estimate the maximum amount of these obligations and believes that any potential requirement to make payments under these arrangements is remote.

Lease commitments

Lease commitments (CHF million)

| | |
|---|--------------|
| 2013 | 677 |
| 2014 | 593 |
| 2015 | 515 |
| 2016 | 464 |
| 2017 | 411 |
| Thereafter | 3,503 |
| Future operating lease commitments | 6,163 |
| Less minimum non-cancellable sublease rentals | 355 |
| Total net future minimum lease commitments | 5,808 |

Rental expense for operating leases

| in | 2012 | 2011 | 2010 |
|--|------------|------------|------------|
| Rental expense for operating leases (CHF million) | | | |
| Minimum rental expense | 631 | 554 | 625 |
| Sublease rental income | (98) | (97) | (123) |
| Total net expenses for operating leases | 533 | 457 | 502 |

Operating lease commitments

The Group has contractual commitments under operating lease arrangements for certain premises and equipment. Under operating leases, the leased property is not reported on the balance sheet of the lessee. Lease payments required by the contract are generally expensed on a straight-line basis over the term of the lease. The related commitments for future rental expenses under operating leases are included in the table "Lease commitments".

From time to time, the Group may enter into sale-leaseback transactions, in which an asset is sold and immediately leased back. If specific criteria are met, such asset is derecognized from the balance sheet and an operating lease is recognized. If the present value of the lease payments is equal to or higher than 10% of the fair value of the property sold, any resulting gains up to an amount equal to the present value of the lease payments are deferred and recognized in the statement of operations over the term of the lease as a reduction of rental expense. Gains on sale-leaseback transactions for which the lease payments are lower than 10% of the fair value of the property sold or gains in excess of the fair value of the lease payments are recognized in the statements of operations upon completion of the sale.

Sale-leaseback transactions in 2012

In the first quarter of 2012, the Group sold the office complex of its European headquarters at One Cabot Street in London to OCS Investment S.à.r.l. and leased back this property under an operating lease arrangement for 22 years, with two options to extend the lease by five years each. OCS Investment S.à.r.l. is a company wholly-owned by the Qatar Investment Authority, which is a minority shareholder of the Group.

In the fourth quarter of 2012, the Group sold the Uetlihof office complex in Zurich, the Group's principal office building worldwide, to Norges Bank Investment Management and leased back this property under an operating lease arrangement for 25 years, with the option to extend the lease by up to 15 years. Norges Bank Investment Management was acting as the buyer on behalf of the Norwegian Government Pension Fund Global, which is a minority shareholder of the Group.

During 2012, the Group entered into several smaller sale-leaseback transactions in respect of own property, which were all recognized as operating lease arrangements with lease terms of between five and ten years. Total contractual rental expenses under these leases will amount to CHF 41 million.

Other commitments

| end of | Maturity less than 1 year | Maturity between 1 to 3 years | Maturity between 3 to 5 years | Maturity greater than 5 years | Total gross amount | Total net amount ¹ | Collateral received |

| Total other commitments | 193,687 | 20,396 | 36,667 | 7,990 | 258,740 | 253,043 | 175,568 |

¹ Total net amount is computed as the gross amount less any participations. ² Included CHF 139,709 million and CHF 138,051 million of unused credit limits as of December 31, 2012 and 2011, respectively, which were revocable at the Group's sole discretion upon notice to the client.

Irrevocable commitments under documentary credits

Irrevocable commitments under documentary credits include exposures from trade finance related to commercial letters of credit under which the Group guarantees payments to exporters against presentation of shipping and other documents.

Loan commitments

Loan commitments include unused credit facilities that can be revoked at our sole discretion upon notice to the client. A small portion of total loan commitments is related to the leveraged finance business. Commitments to originate mortgage loans that will be held for sale are considered derivatives for accounting purposes and are not included in this disclosure. Such commitments are reflected as derivatives in the consolidated balance sheets.

Forward reverse repurchase agreements

Forward reverse repurchase agreements represent transactions in which the initial cash exchange of the reverse repurchase transactions takes place on specified future dates.

Other commitments

Other commitments include private equity commitments, firm commitments in underwriting securities, commitments arising from deferred payment letters of credit and from acceptances in circulation and liabilities for call and put options on shares and other equity instruments.

In November 2007, Banco de Investimentos Credit Suisse (Brasil) S.A., a wholly owned subsidiary of Credit Suisse AG, acquired a majority interest (50% plus one share) in Hedging-Griffo and entered into option arrangements in respect of the remaining equity interests in Hedging-Griffo. In the second quarter of 2012, the Group acquired the remaining equity interests in Hedging-Griffo as contemplated under the existing option arrangements at a final purchase price of BRL 1,248 million (CHF 584 million), gaining full control and ownership of Hedging-Griffo.

- Refer to "Note 3 – Business developments and subsequent events" for further information.

32 Transfers of financial assets and variable interest entities

In the normal course of business, the Group enters into transactions with, and makes use of, SPEs. An SPE is an entity in the form of a trust or other legal structure designed to fulfill a specific limited need of the company that organized it and is generally structured to isolate the SPE's assets from creditors of other entities, including the Group. The principal uses of SPEs are to assist the Group and its clients in securitizing financial assets and creating investment products. The Group also uses SPEs for other client-driven activity, such as to facilitate financings, and Group tax or regulatory purposes.

Transfers of financial assets

Securitizations

The majority of the Group's securitization activities involve mortgages and mortgage-related securities and are predominantly transacted using SPEs. In a typical securitization, the SPE purchases assets financed by proceeds received from the SPE's issuance of debt and equity instruments, certificates, commercial paper (CP) and other notes of indebtedness. These assets and liabilities are recorded on the balance sheet of the SPE and not reflected on the Group's consolidated balance sheet, unless either the Group sold the assets to the entity and the accounting requirements for sale were not met or the Group consolidates the SPE.

The Group purchases commercial and residential mortgages for the purpose of securitization and sells these mortgage loans to SPEs. These SPEs issue commercial mortgage-backed securities (CMBS), residential mortgage-backed securities (RMBS) and ABS that are collateralized by the assets transferred to the SPE and that pay a return based on the returns on those assets. Investors in these mortgage-backed securities or ABS typically have recourse to the assets in the SPEs, unless a third-party guarantee has been received to further enhance the creditworthiness of the assets. The investors and the SPEs have no recourse to the Group's assets. The Group is typically an underwriter of, and makes a market in, these securities.

The Group also transacts in re-securitizations of previously issued RMBS securities. Typically, certificates issued out of an existing securitization vehicle are sold into a newly created and separate securitization vehicle. Often, these re-securitizations

are initiated in order to repackage an existing security to give the investor a higher rated tranche.

The Group also uses SPEs for other asset-backed financings relating to client-driven activity and for Group tax or regulatory purposes. Types of structures included in this category include CDOs, leveraged finance, repack and other types of transactions, including life insurance structures, emerging market structures set up for financing, loan participation or loan origination purposes, and other alternative structures created for the purpose of investing in venture capital-like investments. CDOs are collateralized by the assets transferred to the CDO vehicle and pay a return based on the returns on those assets. Leveraged finance structures are used to assist in the syndication of certain loans held by the Group, while repack structures are designed to give a client collateralized exposure to specific cash flows or credit risk backed by collateral purchased from the Group. In these asset-backed financing structures investors typically only have recourse to the collateral of the SPE and do not have recourse to the Group's assets.

When the Group transfers assets into an SPE, it must assess whether that transfer is accounted for as a sale of the assets. Transfers of assets may not meet sale requirements if the assets have not been legally isolated from the Group and/or if the Group's continuing involvement is deemed to give it effective control over the assets. If the transfer is not deemed a sale, it is instead accounted for as a secured borrowing, with the transferred assets as collateral.

Gains and losses on securitization transactions depend, in part, on the carrying values of mortgages and CDOs involved in the transfer and are allocated between the assets sold and any beneficial interests retained according to the relative fair values at the date of sale.

The Group does not retain material servicing responsibilities from securitization activities.

The following table provides the gains or losses and proceeds from the transfer of assets relating to 2012, 2011 and 2010 securitizations of financial assets that qualify for sale accounting and subsequent derecognition, along with the cash flows between the Group and the SPEs used in any securitizations in which the Group still has continuing involvement, regardless of when the securitization occurred.

Securitizations

| in | 2012 | 2011 | 2010 |
|--|--------|--------|---------|
| Gains and cash flows (CHF million) | | | |
| CMBS | | | |
| Net gain ¹ | 56 | 6 | 13 |
| Proceeds from transfer of assets | 6,156 | 974 | 523 |
| Servicing fees | 0 | 1 | 1 |
| Cash received on interests that continue to be held | 57 | 205 | 150 |
| RMBS | | | |
| Net gain ¹ | 3 | 65 | 214 |
| Proceeds from transfer of assets | 15,143 | 30,695 | 52,308 |
| Purchases of previously transferred financial assets or their underlying collateral | (25) | (4) | 0 |
| Servicing fees | 3 | 3 | 6 |
| Cash received on interests that continue to be held | 554 | 382 | 488 |
| Other asset-backed financings | | | |
| Net gain ¹ | 83 | 24 | 85 |
| Proceeds from transfer of assets | 591 | 1,268 | 4,376 |
| Purchases of previously transferred financial assets or their underlying collateral ² | (621) | (256) | (2,519) |
| Servicing fees | 0 | 1 | 0 |
| Cash received on interests that continue to be held | 1,350 | 701 | 1,539 |

¹ Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the SPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization. The gains or losses on the sale of the collateral are the difference between the fair value on the day prior to the securitization pricing date and the sale price of the loans. ² Represents market making activity and voluntary repurchases at fair value where no repurchase obligations were present.

Continuing involvement in transferred financial assets

The Group may have continuing involvement in the financial assets that are transferred to an SPE, which may take several forms, including, but not limited to, servicing, recourse and guarantee arrangements, agreements to purchase or redeem transferred assets, derivative instruments, pledges of collateral and beneficial interests in the transferred assets. Beneficial interests, which are valued at fair value, include rights to receive all or portions of specified cash inflows received by an SPE, including, but not limited to, senior and subordinated shares of interest, principal, or other cash inflows to be “passed through” or “paid through”, premiums due to guarantors, CP obligations, and residual interests, whether in the form of debt or equity.

The Group’s exposure resulting from continuing involvement in transferred financial assets is generally limited to beneficial interests typically held by the Group in the form of instruments issued by SPEs that are senior, subordinated or residual tranches. These instruments are held by the Group typically in connection with underwriting or market-making

activities and are included in trading assets in the consolidated balance sheets. Any changes in the fair value of these beneficial interests are recognized in the consolidated statements of operations.

Investors usually have recourse to the assets in the SPE and often benefit from other credit enhancements, such as collateral accounts, or from liquidity facilities, such as lines of credit or liquidity put option of asset purchase agreements. The SPE may also enter into a derivative contract in order to convert the yield or currency of the underlying assets to match the needs of the SPE investors, or to limit or change the credit risk of the SPE. The Group may be the provider of certain credit enhancements as well as the counterparty to any related derivative contract.

The following table provides the outstanding principal balance of assets to which the Group continued to be exposed after the transfer of the financial assets to any SPE and the total assets of the SPE as of the end of 2012 and 2011, regardless of when the transfer of assets occurred.

Principal amounts outstanding and total assets of SPEs resulting from continuing involvement

| end of | 2012 | 2011 |
|--|--------|--------|
| CHF million | | |
| CMBS | | |
| Principal amount outstanding | 30,050 | 35,487 |
| Total assets of SPE | 45,407 | 52,536 |
| RMBS | | |
| Principal amount outstanding | 58,112 | 91,242 |
| Total assets of SPE | 60,469 | 95,297 |
| Other asset-backed financing activities | | |
| Principal amount outstanding | 32,805 | 35,233 |
| Total assets of SPE | 32,805 | 35,307 |

Principal amounts outstanding relate to assets transferred from the Group and do not include principal amounts for assets transferred from third parties.

Fair value of beneficial interests

The fair value measurement of the beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the

assets or liabilities that result from any continuing involvement does not include any benefits from financial instruments that the Group may utilize to hedge the inherent risks.

Key economic assumptions at the time of transfer

► Refer to “Fair value measurement” in Note 33 – Financial instruments for further information on fair value hierarchy.

Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

| | 2012 | | 2011 | |
|---|----------------|----------|----------------|----------|

| Weighted-average life, in years | 8.4 | 5.0 | 7.2 | 5.4 |
| Prepayment speed assumption (rate per annum), in % ¹ | – ² | 0.1–34.9 | – ² | 9.0–34.9 |
| Cash flow discount rate (rate per annum), in % ³ | 0.8–10.7 | 0.1–25.7 | 2.9–10.6 | 0.5–71.2 |
| Expected credit losses (rate per annum), in % | 0.5–9.0 | 0.0–25.1 | 1.2–9.3 | 0.3–71.0 |

Transfers of assets in which the Group does not have beneficial interests are not included in this table.

¹ Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR. ² To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances. ³ The rate was based on the weighted-average yield on the beneficial interests.

Key economic assumptions as of the reporting date

The following table provides the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of the end of 2012 and 2011.

Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

| end of | 2012 | | | 2011 | | |
|---|-------------------|----------|--|-------------------|----------|--|

| Impact on fair value from 10% adverse change | (14.4) | (55.9) | (0.8) | (29.8) | (83.6) | (6.8) |
| Impact on fair value from 20% adverse change | (19.2) | (80.3) | (1.6) | (34.8) | (131.5) | (13.2) |

¹ To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances. ² CDOs within this category are generally structured to be protected from prepayment risk. ³ Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR. ⁴ The rate is based on the weighted-average yield on the beneficial interests.

These sensitivities are hypothetical and do not reflect economic hedging activities. Changes in fair value based on a 10% or 20% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the beneficial interests is calculated without changing any other assumption. In practice, changes in one assumption may result in changes in other assumptions (for example, increases in market interest rates may result in lower prepay-

ments and increased credit losses), which might magnify or counteract the sensitivities.

Secured borrowings

The following table provides the carrying amounts of transferred financial assets and the related liabilities where sale treatment was not achieved as of the end of 2012 and 2011.

► Refer to "Note 34 – Asset pledged and collateral" for further information.

| Liability to SPE, included in Other liabilities | (2,084) | (3,326) |

Variable interest entities

As a normal part of its business, the Group engages in various transactions that include entities that are considered VIEs and are grouped into three primary categories: CDOs, CP conduits and financial intermediation. VIEs are SPEs that typically either lack sufficient equity to finance their activities without additional subordinated financial support or are structured such that the holders of the voting rights do not substantively participate in the gains and losses of the entity. VIEs may be sponsored by the Group, unrelated third parties or clients. Such entities are required to be assessed for consolidation, compelling the primary beneficiary to consolidate the VIE. The consolidation assessment requires an entity to determine whether it has the power to direct the activities that most significantly affect the economics of the VIE as well as whether the reporting entity has potentially significant benefits or losses in the VIE. The primary beneficiary assessment must be re-evaluated on an ongoing basis.

Application of the requirements for consolidation of VIEs may require the exercise of significant management judgment. In the event consolidation of a VIE is required, the exposure to the Group is limited to that portion of the VIE's assets attributable to any variable interest held by the Group prior to any risk management activities to hedge the Group's net exposure. Any interests held in the VIE by third parties, even though consolidated by the Group, will not typically impact its results of operations.

Transactions with VIEs are generally executed to facilitate securitization activities or to meet specific client needs, such as providing liquidity or investing opportunities, and, as part of these activities, the Group may hold interests in the VIEs. Securitization-related transactions with VIEs involve selling or purchasing assets as well as possibly entering into related derivatives with those VIEs, providing liquidity, credit or other

support. Other transactions with VIEs include derivative transactions in the Group's capacity as the prime broker. The Group also enters into lending arrangements with VIEs for the purpose of financing projects or the acquisition of assets. Typically, the VIE's assets are restricted in nature in that they are held primarily to satisfy the obligations of the entity. Further, the Group is involved with VIEs which were formed for the purpose of offering alternative investment solutions to clients. Such VIEs relate primarily to private equity investments, fund-linked vehicles or funds of funds, where the Group acts as structurer, manager, distributor, broker, market maker or liquidity provider.

As a consequence of these activities, the Group holds variable interests in VIEs. Such variable interests consist of financial instruments issued by VIEs and which are held by the Group, certain derivatives with VIEs or loans to VIEs. Guarantees issued by the Group to or on behalf of VIEs may also qualify as variable interests. For such guarantees, including derivatives that act as guarantees, the notional amount of the respective guarantees are presented to represent the exposure. In general, investors in consolidated VIEs do not have recourse to the Group in the event of a default, except where a guarantee was provided to the investors or where the Group is the counterparty to a derivative transaction involving VIEs.

Total assets of consolidated and non-consolidated VIEs for which the Group has involvement represent the total assets of the VIEs even though the Group's involvement may be significantly less due to interests held by third-party investors. The asset balances for non-consolidated VIEs where the Group has significant involvement represent the most current information available to the Group regarding the remaining principal balance of assets owned. In most cases, the asset balances represent an amortized cost basis without regards to impair-

ments in fair value, unless fair value information is readily available.

The Group's maximum exposure to loss is different from the carrying value of the assets of the VIE. This maximum exposure to loss consists of the carrying value of the Group variable interests held as trading assets, derivatives and loans and the notional amount of guarantees to VIEs, rather than the amount of total assets of the VIEs. The maximum exposure to loss does not reflect the Group's risk management activities, including effects from financial instruments that the Group may utilize to economically hedge the risks inherent in these VIEs. The economic risks associated with VIE exposures held by the Group, together with all relevant risk mitigation initiatives, are included in the Group's risk management framework.

The Group has not provided financial or other support to consolidated or non-consolidated VIEs that it was not contractually required to provide.

Collateralized debt obligations

The Group engages in CDO transactions to meet client and investor needs, earn fees and sell financial assets. The Group may act as underwriter, placement agent or asset manager and may warehouse assets prior to the closing of a transaction. As part of its structured finance business, the Group purchases loans and other debt obligations from and on behalf of clients for the purpose of securitization. The loans and other debt obligations are sold to VIEs, which in turn issue CDOs to fund the purchase of assets such as investment grade and high yield corporate debt instruments.

Typically, the collateral manager in a managed CDO is deemed to be the entity that has the power to direct the activities that most affect the economics of the entity. In a static CDO this "power" role is more difficult to analyze and may be the sponsor of the entity or the CDS counterparty.

CDOs provide credit risk exposure to a portfolio of ABS (cash CDOs) or a reference portfolio of securities (synthetic CDOs). Cash CDO transactions hold actual securities whereas synthetic CDO transactions use CDS to exchange the underlying credit risk instead of using cash assets. The Group may also act as a derivative counterparty to the VIEs, which are typically not variable interests, and may invest in portions of the notes or equity issued by the VIEs. The CDO entities may have actively managed portfolios or static portfolios.

The securities issued by these VIEs are payable solely from the cash flows of the related collateral, and third-party creditors of these VIEs do not have recourse to the Group in the event of default.

The Group's exposure in CDO transactions is typically limited to interests retained in connection with its underwriting or

market-making activities. Unless the Group has been deemed to have "power" over the entity and these interests are potentially significant, the Group is not the primary beneficiary of the vehicle and does not consolidate the entity. The Group's maximum exposure to loss does not include any effects from financial instruments used to economically hedge the risks of the VIEs.

Commercial paper conduit

The Group continues to act as the administrator and provider of liquidity and credit enhancement facilities for one asset-backed CP conduit, Alpine, a client-focused multi-seller conduit vehicle. Alpine publishes portfolio and asset data and submits its portfolio to a rating agency for public ratings based on the cash flows of the portfolio taken as a whole. This CP conduit purchases assets, primarily loans and receivables, from clients and finances such purchases through the issuance of CP backed by these assets. For an asset to qualify for acquisition by the CP conduit, it must be rated at least investment grade after giving effect to the related asset-specific credit enhancement primarily provided by the client seller of the asset. The clients provide credit support to investors of the CP conduit in the form of over-collateralization and other asset-specific enhancements. Further, an unaffiliated investor retains a limited first-loss position in Alpine's entire portfolio. Alpine is a separate legal entity that is wholly owned by the Group. However, its assets are available to satisfy only the claims of its creditors. In addition, the Group, as administrator and liquidity and credit enhancement facilities provider, has significant exposure to and power over the activities of Alpine. Alpine is considered a VIE for accounting purposes and the Group is deemed the primary beneficiary and consolidates this entity.

The overall average maturity of the conduit's outstanding CP was approximately 27 days and 18 days as of December 31, 2012 and 2011, respectively. As of December 31, 2012 and 2011, Alpine had the highest short-term ratings from Moody's and Dominion Bond Rating Service and was rated A-1 by Standard & Poor's and F-1 by Fitch. The majority of Alpine's purchased assets were highly rated loans or receivables in the consumer sector, including auto and equipment loans or leases, student loans, advance financing receivables and credit card receivables. As of December 31, 2012 and 2011, those assets had an average rating of AA, based on the lowest of each asset's external or internal rating, and an average maturity of 2.9 years and 2.5 years as of December 31, 2012 and 2011, respectively.

The Group's commitment to this CP conduit consists of obligations under liquidity agreements and a program-wide credit enhancement agreement. The liquidity agreements are

asset-specific arrangements, which require the Group to purchase assets from the CP conduit in certain circumstances, including a lack of liquidity in the CP market such that the CP conduit cannot refinance its obligations or, in some cases, a default of an underlying asset. The Group may, at its discretion, purchase assets that fall below investment grade in order to support the CP conduit. In both circumstances, the asset-specific credit enhancements provided by the client seller of the assets and the first-loss investor's respective exposures to those assets remain unchanged. In entering into such agreements, the Group reviews the credit risk associated with these transactions on the same basis that would apply to other extensions of credit. The program-wide credit enhancement agreement with the CP conduit would absorb potential defaults of the assets, but is senior to the credit protection provided by the client seller of assets and the first-loss investor.

The Group believes that the likelihood of incurring a loss equal to the maximum exposure is remote because the assets held by the CP conduit, after giving effect to related asset-specific credit enhancement primarily provided by the clients, are classified as investment grade. The Group's economic risks associated with the purchased assets of the CP conduit are included in the Group's risk management framework including counterparty, economic capital and scenario analysis.

Financial intermediation

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients.

The Group considers the likelihood of incurring a loss equal to the maximum exposure to be remote because of the Group's risk mitigation efforts, including, but not limited to, economic hedging strategies and collateral arrangements. The Group's economic risks associated with consolidated and non-consolidated VIE exposures arising from financial intermediation, together with all relevant risk mitigation initiatives, are included in the Group's risk management framework.

Financial intermediation consists of securitizations, funds, loans, and other vehicles.

Securitizations

Securitizations are primarily ◉CMBS, ◉RMBS and ABS vehicles. The Group acts as an underwriter, market maker, liquidity provider, derivative counterparty and/or provider of credit enhancements to VIEs related to certain securitization transactions.

The maximum exposure to loss is the carrying value of the loan securities and derivative positions that are variable interests, if any, plus the exposure arising from any credit

enhancements the Group provided. The Group's maximum exposure to loss does not include any effects from financial instruments used to economically hedge the risks of the VIEs.

The activities that have the most significant impact on the securitization vehicle are the decisions relating to defaulted loans, which are controlled by the servicer. The party that controls the servicing has the ability to make decisions that significantly affect the result of the activities of the securitization vehicle. If a securitization vehicle has multiple parties that control servicing over specific assets, the Group determines it has power when it has control over the servicing of greater than 50% of the assets in the securitization vehicle. When a servicer or its related party also has an economic interest that has the potential to absorb a significant portion of the gains and/or losses, it will be deemed the primary beneficiary and consolidate the vehicle. If the Group determines that it controls the relevant servicing, it then determines if it has the obligation to absorb losses from or the right to receive benefits of the securitization vehicle that could potentially be significant to the vehicle, primarily by evaluating the amount and nature of securities issued by the vehicle that it holds. Factors considered in this analysis include the level of subordination of the securities held as well as the size of the position, based on the percentage of the class of securities and the total deal classes of securities issued. The more subordinated the level of securities held, the more likely it is that the Group will be the primary beneficiary. This consolidation analysis is performed each reporting period based on changes in inventory and the levels of assets remaining in the securitization. The Group typically consolidates securitization vehicles when it is the servicer and has holdings stemming from its role as underwriter. Short-term market making holdings in vehicles are not typically considered to be potentially significant for the purposes of this assessment.

In the case of re-securitizations of previously issued RMBS securities, the re-securitization vehicles are passive in nature and do not have any significant ongoing activities that require management, and decisions relating to the design of the securitization transaction at its inception is the key power relating to the vehicle. Activities at inception include selecting the assets and determination of the capital structure. The power over a re-securitization vehicle is typically shared between the Group and the investor(s) involved in the design and creation of the vehicle. The Group concludes that it is the primary beneficiary of a re-securitization vehicle when it owns substantially all of the bonds issued from the vehicle.

Funds

Funds include investment structures such as mutual funds, funds of funds, private equity funds and fund-linked products

where the investors' interest is typically in the form of debt rather than equity, thereby making them VIEs. The Group may have various relationships with such VIEs in the form of structurer, investment advisor, investment manager, administrator, custodian, underwriter, placement agent, market maker and/or as prime broker. These activities include the use of VIEs in structuring fund-linked products, hedge funds of funds or private equity investments to provide clients with investment opportunities in alternative investments. In such transactions, a VIE holds underlying investments and issues securities that provide the investors with a return based on the performance of those investments.

The maximum exposure to loss consists of the fair value of instruments issued by such structures that are held by the Group as a result of underwriting or market-making activities, financing provided to the vehicles and the Group's exposure resulting from principal protection and redemptions features. The investors typically retain the risk of loss on such transactions, but for certain fund types, the Group may provide principal protection on the securities to limit the investors' exposure to downside market risk. The Group's maximum exposure to loss does not include any effects from financial instruments used to economically hedge the risk of the VIEs.

Another model is used to assess funds for consolidation under US GAAP. Rather than the consolidation model which incorporates power and the potential to absorb significant risk and rewards, a previous consolidation model is used which results in the Group being the primary beneficiary and consolidating the funds if it holds more than 50% of their outstanding issuances.

Loans

Loans are single-financing vehicles where the Group provides financing for specified assets or business ventures and the respective owner of the assets or manager of the businesses

provides the equity in the vehicle. These tailored lending arrangements are established to purchase, lease or otherwise finance and manage clients' assets.

The maximum exposure to loss is the carrying value of the Group's loan exposure, which is subject to the same credit risk management procedures as loans issued directly to clients. The clients' creditworthiness is carefully reviewed, loan-to-value ratios are strictly set and, in addition, clients provide equity, additional collateral or guarantees, all of which significantly reduce the Group's exposure. The Group considers the likelihood of incurring a loss equal to the maximum exposure to be remote because of the Group's risk mitigation efforts which includes over-collateralization and effective monitoring to ensure that a sufficient loan-to-value ratio is maintained.

The third-party sponsor of the VIE will typically have control over the assets during the life structure and have the potential to absorb significant gains and losses; the Group is typically not the primary beneficiary of these structures and will not have to consolidate them. However, a change in the structure, such as a default of the sponsor, may result in the Group gaining control over the assets. If the Group's lending is significant, it may then be required to consolidate the entity.

Other

Other includes additional vehicles where the Group provides financing and trust preferred issuance vehicles. Trust preferred issuance vehicles are utilized to assist the Group in raising capital-efficient financing. The VIE issues preference shares which are guaranteed by the Group and uses the proceeds to purchase the debt of the Group. The Group's guarantee of its own debt is not considered a variable interest and, as it has no holdings in these vehicles, the Group has no maximum exposure to loss. Non-consolidated VIEs include only the total assets of trust preferred issuance vehicles, as the Group has no variable interests with these entities.

Consolidated VIEs

The Group has significant involvement with VIEs in its role as a financial intermediary on behalf of clients. The Group consolidates all VIEs related to financial intermediation for which it was the primary beneficiary.

The consolidated VIEs tables provide the carrying amounts and classifications of the assets and liabilities of consolidated VIEs as of the end of 2012 and 2011.

Consolidated VIEs in which the Group was the primary beneficiary

Non-consolidated VIEs

The non-consolidated VIEs tables provide the carrying amounts and classification of the assets and liabilities of variable interests recorded in the Group's consolidated balance sheets, maximum exposure to loss and total assets of the non-consolidated VIEs.

Maximum exposure to loss represents the variable interests of non-consolidated VIEs that are recorded by the Group (for example, direct holdings in vehicles, loans and other receivables), as well as notional amounts of guarantees and off-balance sheet commitments which are variable interests that have been extended to non-consolidated VIEs. Such amounts, particularly notional amounts of derivatives and guarantees, do not represent the anticipated losses in connection with these transactions as they do not take into consideration the effect of collateral, recoveries or the probability of loss. In addition, they exclude the effect of offsetting financial instru-

ments that are held to mitigate these risks and have not been reduced by unrealized losses previously recorded by the Group in connection with guarantees or derivatives.

Non-consolidated VIE assets are related to the non-consolidated VIEs with which the Group has variable interests. These amounts represent the assets of the entities themselves and are typically unrelated to the exposures the Group has with the entity and thus are not amounts that are considered for risk management purposes.

Certain VIEs have not been included in the following table, including VIEs structured by third parties in which the Group's interest is in the form of securities held in the Group's inventory, certain single-asset financing vehicles not sponsored by the Group to which the Group provides financing but has very little risk of loss due to over-collateralization and guarantees, failed sales where the Group does not have any other holdings and other entities out of scope.

33 Financial instruments

The disclosure of the Group's financial instruments below includes the following sections:

- Concentration of credit risk;
- Fair value measurement (including fair value hierarchy, transfers between levels; level 3 reconciliation; qualitative and quantitative disclosures of valuation techniques and nonrecurring fair value changes)
- Fair value option; and
- Disclosures about **◊**fair value of financial instruments not carried at fair value.

Concentrations of credit risk

Credit risk concentrations arise when a number of counterparties are engaged in similar business activities, are located in the same geographic region or when there are similar economic features that would cause their ability to meet contractual obligations to be similarly impacted by changes in economic conditions.

The Group regularly monitors the credit risk portfolio by counterparties, industry, country and products to ensure that such potential concentrations are identified, using a comprehensive range of quantitative tools and metrics. Credit limits relating to counterparties and products are managed through counterparty limits which set the maximum credit exposures the Group is willing to assume to specific counterparties over specified periods. Country limits are established to avoid any undue country risk concentration.

From an industry point of view, the combined credit exposure of the Group is diversified. A large portion of the credit exposure is with individual clients, particularly through residential mortgages in Switzerland, or relates to transactions with financial institutions. In both cases, the customer base is extensive and the number and variety of transactions are broad. For transactions with financial institutions, the business is also geographically diverse, with operations focused in the Americas, Europe and, to a lesser extent, Asia Pacific.

Fair value measurement

A significant portion of the Group's financial instruments are carried at **◊**fair value. Deterioration of financial markets could significantly impact the fair value of these financial instruments and the results of operations.

The fair value of the majority of the Group's financial instruments is based on quoted prices in active markets or observable inputs. These instruments include government and agency securities, certain **◊**CP, most investment grade corporate debt, certain high yield debt securities, exchange-traded and certain **◊**OTC derivative instruments and most listed equity securities.

In addition, the Group holds financial instruments for which no prices are available and which have little or no observable inputs. For these instruments, the determination of fair value requires subjective assessment and judgment, depending on liquidity, pricing assumptions, the current economic and competitive environment and the risks affecting the specific instrument. In such circumstances, valuation is determined based on management's own judgments about the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. These instruments include certain OTC derivatives, including equity and credit derivatives, certain corporate equity-linked securities, mortgage-related and **◊**CDO securities, private equity investments, certain loans and credit products, including leveraged finance, certain syndicated loans and certain high yield bonds, and life finance instruments.

The fair value of financial assets and liabilities is impacted by factors such as benchmark interest rates, prices of financial instruments issued by third parties, commodity prices, foreign exchange rates and index prices or rates. In addition, valuation adjustments are an integral part of the valuation process when market prices are not indicative of the credit quality of a counterparty, and are applied to both OTC derivatives and debt instruments. The impact of changes in a counterparty's credit spreads (known as **◊**credit valuation adjustments) is considered when measuring the fair value of assets and the impact of changes in the Group's own credit spreads (known as **◊**debit valuation adjustments) is considered when measuring the fair value of its liabilities. For OTC derivatives, the impact of changes in both the Group's and the counterparty's credit standing is considered when measuring their fair value, based on current **◊**CDS prices. The adjustments also take into account contractual factors designed to reduce the Group's credit exposure to a counterparty, such as collateral held and

master netting agreements. For hybrid debt instruments with embedded derivative features, the impact of changes in the Group's credit standing is considered when measuring their fair value, based on current funded debt spreads.

Based on the Group's regular review of observable parameters used in its pricing models, in 2012 the Group extended the adoption of overnight indexed swap discounting, instead of other reference rates such as LIBOR, to those businesses in fixed income where the adoption had not occurred and to certain equity derivatives, which resulted in a loss of CHF 57 million.

ASU 2011-04 permits a reporting entity to measure the fair value of a group of financial assets and financial liabilities on the basis of the price that would be received to sell a net long position or paid to transfer a net short position for a particular risk exposure in an orderly transaction between market participants at the measurement date. This change to the fair value measurement guidance is consistent with industry practice. As such, the Group continues to apply bid and offer adjustments to net portfolios of cash securities and/or derivative instruments to adjust the value of the net position from a mid-market price to the appropriate bid or offer level that would be realized under normal market conditions for the net long or net short position for a specific market risk. In addition, the Group reflects the net exposure to credit risk for its derivative instruments where the Group has legally enforceable agreements with its counterparties that mitigate credit risk exposure in the event of default. Valuation adjustments are recorded in a reasonable and consistent manner that results in an allocation to the relevant disclosures in the notes to the financial statements as if the valuation adjustment had been allocated to the individual unit of account.

Fair value hierarchy

The levels of the fair value hierarchy are defined as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group has the ability to access. This level of the fair value hierarchy provides the most reliable evidence of fair value and is used to measure fair value whenever available.
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly. These inputs include: (i) quoted prices for similar assets or liabilities in active markets; (ii) quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current or price quotations vary substantially either over time or among market makers, or in which little information is publicly available; (iii) inputs other than quoted prices that are observable for the asset or liability; or (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3: Inputs that are unobservable for the asset or liability. These inputs reflect the Group's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available in the circumstances, which include the Group's own data. The Group's own data used to develop unobservable inputs is adjusted if information indicates that market participants would use different assumptions.

The Group records net open positions at bid prices if long, or at ask prices if short, unless the Group is a market maker in such positions, in which case mid-pricing is utilized. Fair value measurements are not adjusted for transaction costs.

Transfers between level 1 and level 2

Effective January 2012, the FASB amended the disclosure requirements for the Group's reporting of transfers between level 1 and level 2. As this requirement is not retrospective, comparable data is not presented for prior periods. Previously, only significant transfers were required to be disclosed and such transfers between level 1 and level 2 were not significant in 2011.

All transfers between level 1 and level 2 are reported through the last day of the reporting period.

In 2012, transfers to level 1 out of level 2 were from trading assets and trading liabilities. The transfers were primarily in exchange traded derivative instruments as they moved closer to maturity and pricing inputs became more observable. Transfers out of level 1 to level 2 were primarily from trading assets. The transfers were primarily in **RMBS** in 4Q12 as pricing inputs became less observable.

Transfers between level 1 and level 2

¹ For all transfers to level 3 or out of level 3, the Group determines and discloses as level 3 events only gains or losses through the last day of the reporting period. ² Includes unrealized gains recorded in trading revenues of CHF 307 million primarily related to sub-prime exposures in the RMBS and CMBS businesses and market movements across the wider loans held-for-sale portfolio.

Gains and losses on assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (level 3)

| in | 2012 | | | 2011 | | |
|--|---------------------|-------------------|---------------------------|---------------------|-------------------|--------------------|
| | Trading revenues | Other revenues | Total revenues | Trading revenues | Other revenues | Total revenues |
| Gains and losses on assets and liabilities (CHF million) | | | | | | |
| Net realized/unrealized gains/(losses) included in net revenues | (1,018) | 268 | (750) ¹ | 1,768 | 1,125 | 2,893 ¹ |
| Whereof: | | | | | | |
| Unrealized gains/(losses) relating to assets and liabilities still held as of the reporting date | (1,209) | (82) | (1,291) | 546 | (32) | 514 |

¹ Excludes net realized/unrealized gains/(losses) attributable to foreign currency translation impact.

Both observable and unobservable inputs may be used to determine the fair value of positions that have been classified within level 3. As a result, the unrealized gains and losses for assets and liabilities within level 3 presented in the table above may include changes in fair value that were attributable to both observable and unobservable inputs.

The Group employs various economic hedging techniques in order to manage risks, including risks in level 3 positions. Such techniques may include the purchase or sale of financial instruments that are classified in levels 1 and/or 2. The realized and unrealized gains and losses for assets and liabilities in level 3 presented in the table above do not reflect the related realized or unrealized gains and losses arising on economic hedging instruments classified in levels 1 and/or 2.

Transfers in and out of level 3

Transfers into level 3 assets during 2012 were CHF 7,493 million, primarily from trading assets and loans held-for-sale. The transfers were primarily in the equity derivatives, private equity, corporate credit, corporate bank and securitized products (consolidated SPE positions) businesses due to limited observability of pricing data and reduced pricing information from external providers. Transfers out of level 3 assets during 2012 were CHF 11,516 million, primarily in trading assets and loans held-for-sale. The transfers out of level 3 assets were primarily in the equity derivatives, private equity, securitized products (consolidated SPE positions), corporate credit, rates and CMBS businesses due to improved observability of pricing data and increased availability of pricing information from external providers.

Transfers into level 3 assets during 2011 were CHF 14,893 million, primarily from trading assets and loans held-for-sale. The transfers were related to trading and SPE consolidated positions within the RMBS (including non-agency) and alternative investments businesses, primarily due to limited observability of pricing data and reduced pricing informa-

tion from external providers. Transfers out of level 3 assets during 2011 were CHF 14,766 million, primarily in loans held-for-sale and trading assets. The transfers out of level 3 assets in loans held-for-sale were mainly related to trading and SPE consolidated positions within the RMBS and alternative investments businesses due to improved observability of pricing data. The transfers out of level 3 assets in trading assets were related to RMBS due to greater pricing information from external providers.

Qualitative disclosures of valuation techniques

Overview

The Group has implemented and maintains a valuation control framework, which is supported by policies and procedures that define the principles for controlling the valuation of the Group's financial instruments. Product Control and Risk Management create, review and approve significant valuation policies and procedures. The framework includes three main internal processes: (i) valuation governance; (ii) independent price verification and significant unobservable inputs review; and (iii) a cross-functional pricing model review. Through this framework, the Group determines the reasonableness of the fair value of its financial instruments.

On a monthly basis, meetings are held for each business line with senior representatives of the Front Office and Product Control to discuss independent price verification results, valuation adjustments, and other significant valuation issues. On a quarterly basis, a review of significant changes in the fair value of financial instruments is undertaken by Product Control and conclusions are reached regarding the reasonableness of those changes. Additionally, on a quarterly basis, meetings are held for each business line with senior representatives of the Front Office, Product Control, Risk Management, and Financial Accounting to discuss independent price verification results, valuation issues, business and market updates, as well as a review of significant changes in fair value from the prior

quarter, significant unobservable inputs and prices used in valuation techniques, and valuation adjustments.

The results of these meetings are aggregated for presentation to the Valuation and Risk Management Committee (VARMC) and the Audit Committee. The VARMC, which is comprised of Executive Board members and the heads of the business and control functions, meets to review and ratify valuation review conclusions, and to resolve significant valuation issues for the Group. Oversight of the valuation control framework is through specific and regular reporting on valuation directly to the Group's Executive Board through the VARMC.

One of the key components of the governance process is the segregation of duties between the Front Office and Product Control. The Front Office is responsible for measuring inventory at fair value on a daily basis, while Product Control is responsible for independently reviewing and validating those valuations on a periodic basis. The Front Office values the inventory using, wherever possible, observable market data which may include executed transactions, dealer quotes, or broker quotes for the same or similar instruments. Product Control validates this inventory using independently sourced data that also includes executed transactions, dealer quotes, and broker quotes.

Product Control utilizes independent pricing service data as part of their review process. Independent pricing service data is analyzed to ensure that it is representative of fair value including confirming that the data corresponds to executed transactions or executable broker quotes, review and assessment of contributors to ensure they are active market participants, review of statistical data and utilization of pricing challenges. The analysis also includes understanding the sources of the pricing service data and any models or assumptions used in determining the results. The purpose of the review is to judge the quality and reliability of the data for fair value measurement purposes and its appropriate level of usage within the Product Control independent valuation review.

For certain financial instruments the fair value is estimated in full or in part using valuation techniques based on assumptions that are not supported by market observable prices, rates, or other inputs. In addition, there may be uncertainty about a valuation, which results from the choice of valuation technique or model used, the assumptions embedded in those models, the extent to which inputs are not market observable, or as a consequence of other elements affecting the valuation technique or model. Model calibration is performed when significant new market information becomes available or at a minimum on a quarterly basis as part of the business review of significant unobservable inputs for level 3 instruments. For models that have been deemed to be significant to the overall

fair value of the financial instrument, model validation is performed as part of the periodic review of the related model.

The Group performs a sensitivity analysis of its significant level 3 financial instruments. This sensitivity analysis estimates a fair value range by changing the related significant unobservable inputs value. This sensitivity analysis is an internal mechanism to monitor the impact of reasonable alternative inputs or prices for level 3 financial instruments. Where a model-based technique is used to determine the fair value of the level 3 financial instrument, an alternative input value is utilized to derive an estimated fair value range. Where a price-based technique is used to determine the fair value of the level 3 financial instruments, Front Office professional judgment is used to estimate a fair value range.

The following information on the valuation techniques and significant unobservable inputs of the various financial instruments, and the sensitivity of fair value measurements to changes in significant unobservable inputs, should be read in conjunction with the tables "Quantitative information about level 3 assets at fair value" and "Quantitative information about level 3 liabilities at fair value".

Debt securities

Foreign governments and corporates

Government debt securities typically have quoted prices in active markets and are categorized as level 1 instruments. For debt securities for which market prices are not available, valuations are based on yields reflecting credit rating, historical performance, delinquencies, loss severity, the maturity of the security, recent transactions in the market or other modeling techniques, which may involve judgment. Those securities where the price or model inputs are observable in the market are categorized as level 2 instruments, while those securities where prices are not observable and significant model inputs are unobservable are categorized as level 3 of the fair value hierarchy.

Corporate bonds are priced to reflect current market levels either through recent market transactions or broker or dealer quotes. Where a market price for the particular security is not directly available, valuations are obtained based on yields reflected by other instruments in the specific or similar entity's capital structure and adjusting for differences in seniority and maturity, benchmarking to a comparable security where market data is available (taking into consideration differences in credit, liquidity and maturity), or through the application of cash flow modeling techniques utilizing observable inputs, such as current interest rate curves and observable CDS spreads. Significant unobservable inputs may include price, buyback probability, correlation and credit spreads. For securities using market comparable price, the differentiation

between level 2 and level 3 is based upon the relative significance of any yield adjustments as well as the accuracy of the comparison characteristics (i.e., the observable comparable security may be in the same country but a different industry and may have a different seniority level – the lower the comparability the more likely the security will be level 3).

CMBS, RMBS and CDO securities

Fair values of RMBS, CMBS and CDO may be available through quoted prices, which are often based on the prices at which similarly structured and collateralized securities trade between dealers and to and from customers. Fair values of RMBS, CMBS and CDO for which there are significant unobservable inputs are valued using capitalization rate and estimated market internal rate of return. Price may not be observable for fair value measurement purposes for many reasons, such as the length of time since the last executed transaction for the related security, use of a price from a similar instrument, or use of a price from an indicative quote. Fair values determined by market comparable price may include discounted cash flow models using the inputs prepayment rates, default rates, loss severity and discount rates. Prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness.

For most structured debt securities, determination of fair value requires subjective assessment depending on liquidity, ownership concentration, and the current economic and competitive environment. Valuation is determined based on the Front Office's own assumptions about how market participants would price the asset. Collateralized bond and loan obligations are split into various structured tranches and each tranche is valued based upon its individual rating and the underlying collateral supporting the structure. Valuation models are used to value both cash and synthetic CDOs.

Equity securities

The majority of the Group's positions in equity securities are traded on public stock exchanges for which quoted prices are readily and regularly available and are therefore categorized as level 1 instrument. Level 2 and level 3 equities include fund-linked products, convertible bonds or equity securities with restrictions that are not traded in active markets. Significant unobservable inputs may include earnings before interest, taxes, depreciation and amortization (EBITDA) multiples and capitalization rate.

Derivatives

Derivatives held for trading purposes or used in hedge accounting relationships include both OTC and exchange-traded derivatives. The fair values of exchange-traded derivatives measured using observable exchange prices are included in level 1 of the fair value hierarchy. Some observable exchange prices may not be considered executable at the reporting date and may have been adjusted for liquidity concerns. For those instruments where liquidity adjustments have been made to the exchange price, such as long-dated option contracts, the instrument has been included in level 2 of the fair value hierarchy.

The fair values of OTC derivatives are determined on the basis of either industry standard models or internally developed proprietary models. Both model types use various observable and unobservable inputs in order to determine fair value. The inputs include those characteristics of the derivative that have a bearing on the economics of the instrument. The determination of the fair value of many derivatives involves only a limited degree of subjectivity because the required inputs are observable in the marketplace, while more complex derivatives may use unobservable inputs that rely on specific proprietary modeling assumptions. Where observable inputs (prices from exchanges, dealers, brokers or market consensus data providers) are not available, attempts are made to infer values from observable prices through model calibration (spot and forward rates, mean reversion, benchmark interest rate curves and volatility inputs for commonly traded option products). For inputs that cannot be derived from other sources, estimates from historical data may be made. OTC derivatives where the majority of the value is derived from market observable inputs are categorized as level 2 instruments, while those where the majority of the value is derived from unobservable inputs are categorized as level 3 of the fair value hierarchy.

Interest rate derivatives

OTC vanilla interest rate products, such as interest rate swaps, swaptions, and caps and floors are valued by discounting the anticipated future cash flows. The future cash flows and discounting are derived from market standard yield curves and industry standard volatility inputs. Where applicable, exchange-traded prices are also used to value exchange-traded futures and options and can be used in yield curve construction. For more complex products, inputs include, but are not limited to correlation, volatility, prepayment rate, credit spreads, basis spreads and mean reversion.

Foreign exchange derivatives

Foreign exchange derivatives include vanilla products such as spot, forward and option contracts where the anticipated discounted future cash flows are determined from foreign exchange forward curves and industry standard optionality modeling techniques. Where applicable, exchange-traded prices are also used for futures and option prices. For more complex products inputs include, but are not limited to prepayment rate and correlation.

Equity and index-related derivatives

Equity derivatives include vanilla options and swaps in addition to different types of exotic options. Inputs for equity derivatives can include correlation, volatility, skew, buyback probability and gap risk.

Generally, the interrelationship between the volatility, correlation and credit spreads inputs are positively correlated.

Credit derivatives

Credit derivatives include index and single name CDS in addition to more complex structured credit products. Vanilla products are valued using industry standard models and inputs that are generally market observable including credit spreads and recovery rates.

Complex structured credit derivatives are valued using proprietary models requiring unobservable inputs such as recovery rate, credit spreads, correlation and price. These inputs are generally implied from available market observable data. Fair values determined by price may include discounted cash flow models using the inputs prepayment rates, default rates, loss severity and discount rates.

Other trading assets

Other trading assets primarily include RMBS loans and life settlement and premium finance instruments. Life settlement and premium finance instruments are valued using proprietary models with several inputs. The significant unobservable inputs of the fair value for life settlement and premium finance instruments is the estimate of life expectancy, while for RMBS loans it is market comparable price.

For life settlement and premium finance instruments, individual life expectancy rates are typically obtained by multiplying a base mortality curve for the general insured population provided by a professional actuarial organization together with an individual-specific multiplier. Individual specific multipliers are determined based on data from third-party life expectancy data providers, which examine the insured individual's medical conditions, family history and other factors to arrive at a life expectancy estimate.

For RMBS loans, the use of market comparable price varies depending upon each specific loan. For some loans, similar to unobservable RMBS securities, prices from similar observable instruments are used to calculate implied inputs which are then used to value unobservable instruments using discounted cash flow. The discounted cash flow price is then compared to the unobservable prices and assessed for reasonableness. For other RMBS loans, the loans are categorized by specific characteristics, such as loan-to-value ratio, average account balance, loan type (single or multi-family), lien, seasoning, coupon, FICO score, locality, delinquency status, cash flow velocity, roll rates, loan purpose, occupancy, servicers advance agreement type, modification status, Federal Housing Administration insurance, property value and documentation quality. Loans with unobservable prices are put into consistent buckets which are then compared to market observable comparable prices in order to assess the reasonableness of the those unobservable prices.

Other investments

Private equity, hedge funds and other equity investments

Other equity investments principally includes equity investments in the form of a) direct investments in third-party hedge funds, private equity funds and funds of funds, b) equity-method investments where the Group has the ability to significantly influence the operating and financial policies of the investee, and c) direct investments in non-marketable equity securities.

Direct investments in third-party hedge funds, private equity funds and funds of funds are measured at fair value based on their published NAVs. Most of these investments are classified as level 3 of the fair value hierarchy, as there are restrictions imposed upon the redemption of the funds at their NAVs in the near term. In some cases, NAVs may be adjusted where there is sufficient evidence that the NAV published by the investment manager is not current with observed market movements, it is probable that these investments will be sold for an amount other than NAV or there exist other circumstances that would require an adjustment to the published NAV. Although rarely adjusted, significant judgment is involved in making any adjustments to the published NAVs. As of December 31, 2012, the fair value of investments valued at an amount other than NAV where it is probable they will be sold was CHF 576 million. The remaining actions to complete the sales include steps that are usual and customary for sales of such investments in the secondary market. Substantial increases (decreases) in the NAV for private equity and hedge funds would result in a higher (lower) fair value.

Direct investments in non-marketable equity securities consist of both real estate investments and non-real estate investments. Equity-method investments and direct investments in non-marketable equity securities are initially measured at their transaction price, as this is the best estimate of fair value. Thereafter, these investments are individually measured at fair value based upon a number of factors that include any recent rounds of financing involving third-party investors, comparable company transactions, multiple analyses of cash flows or book values, or discounted cash flow analyses. Unobservable inputs may include credit spreads, contingent probability and EBITDA multiples. The availability of information used in these modeling techniques is often limited and involves significant judgment in evaluating these different factors over time. As a result, these investments are included in level 3 of the fair value hierarchy.

Life finance instruments

Life finance instruments include SPIA and other premium finance instruments. Life finance instruments are valued in a similar manner as described for life settlement and premium finance instruments under the other trading assets section above.

Loans

The Group's loan portfolio which is measured at fair value primarily consists of commercial and industrial loans and loans to financial institutions. Within these categories, loans measured at fair value include commercial loans, real estate loans, corporate loans, leverage finance loans and emerging market loans. Fair value is based on recent transactions and quoted prices, where available. Where recent transactions and quoted prices are not available, fair value may be determined by relative value benchmarking (which includes pricing based upon another position in the same capital structure, other comparable loan issues, generic industry credit spreads, implied credit spreads derived from CDS for the specific borrower, and enterprise valuations) or calculated based on the exit price of the collateral, based on current market conditions.

Both the funded and unfunded portion of revolving credit lines on the corporate lending portfolio are valued using a CDS pricing model, which requires estimates of significant inputs including credit spreads, recovery rates, credit conversion factors, and weighted average life of the loan. Significant unobservable inputs may include credit spreads and price. During 2012, the Group refined its approach for determining the LGD parameter used in the valuation model for its corporate

loan book. This approach, which is more granular and recognizes the seniority of certain unsecured loans, aligns the LGD used for regulatory capital calculations and valuation purposes. This refinement benefitted the Group's results in corporate banking by CHF 72 million.

The Group's other assets and liabilities include mortgage loans held in conjunction with securitization activities and assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP. The fair value of mortgage loans held in conjunction with securitization activities is determined on a whole-loan basis and is consistent with the valuation of RMBS loans discussed in "Other trading assets" above. Whole-loan valuations are calculated based on the exit price reflecting the current market conditions. The fair value of assets and liabilities of VIEs and mortgage securitizations that do not meet the criteria for sale treatment under US GAAP are determined based on the quoted prices for securitized bonds, where available, or on cash flow analyses for securitized bonds, when quoted prices are not available.

Accrual based Private Banking & Wealth Management loans, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, include consumer loans relating to mortgages, loans collateralized by securities or consumer finance, as well as corporate and institutional loans relating to real estate, commercial and industrial loans, and loans to financial institutions, governments and public institutions. Fair values for these loans are determined by using a discounted cash flow model. Future cash flows are discounted using risk-adjusted discount rates which are derived from observable market interest rates for the applicable maturity and currency and from counterparty-related credit spreads.

Deposits

Accrual based deposits with a stated maturity, for which an estimated fair value is disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below, are generally fair valued by using a discounted cash flow model incorporating the Group's credit spreads. The estimated fair value of accrual accounted deposits without a stated maturity approximates the carrying amount; however, the value does not include an estimate of the value attributed to the long-term relationships with its customers that in the aggregate adds significant value to the Group's stable deposit base.

Short-term borrowings and long-term debt

The Group's short-term borrowings and long-term debt include structured notes (hybrid financial instruments that are both bifurcable and non-bifurcable) and vanilla debt. The fair value of structured notes is based on quoted prices, where available. When quoted prices are not available, fair value is determined by using a discounted cash flow model incorporating the Group's credit spreads, the value of derivatives embedded in the debt and the residual term of the issuance based on call options. Derivatives structured into the issued debt are valued consistently with the Group's stand-alone derivative contracts held for trading purposes or used in hedge accounting relationships as discussed above. The fair value of structured debt is heavily influenced by the combined call options and performance of the underlying derivative returns. Significant unobservable inputs for long-term debt include buyback probability, gap risk, correlation, volatility and price.

Generally, the interrelationships between volatility, skew, correlation, gap risk and credit spreads inputs are positively correlated.

Other liabilities

Failed sales

These liabilities represent the financing of assets that did not achieve sale accounting treatment under US GAAP. Failed sales are valued in a manner consistent with the related underlying financial instruments.

Short-term financial instruments

Certain short-term financial instruments are not carried at fair value on the balance sheet, but a fair value has been disclosed in the table "Carrying value and fair value of financial instruments not carried at fair value" below. These instruments include: cash and due from banks, cash collateral receivables and payables and other receivables and payables arising in the ordinary course of business. For these financial instruments, the carrying value approximates the fair value due to the relatively short period of time between their origination and expected realization, as well as the minimal credit risk inherent in these instruments.

Sensitivity of fair value measurements to changes in significant unobservable inputs

For level 3 assets with a significant unobservable input of basis spread, buyback probability, EBITDA multiple, life expectancy (for life finance instruments), correlation, recovery rate, price, skew, volatility and contingent probability, in general, an increase in the significant unobservable input would increase the fair value. For level 3 assets instruments with a significant unobservable input of prepayment rate, capitalization rate, internal rate of return, gap risk, default rate, discount rate, loss severity, credit spread and life expectancy (for life settlement and premium finance instruments), in general, an increase in the significant unobservable input would decrease the fair value.

For level 3 liabilities an increase in the related significant unobservable inputs would have the inverse impact on fair value. An increase in the significant unobservable input mean reversion would decrease the fair value.

Interrelationships between significant unobservable inputs

Except as noted above, there are no material interrelationships between the significant unobservable inputs for the financial instruments. As the significant unobservable inputs move independently, generally an increase or decrease in one significant unobservable input will have no impact on the other significant unobservable inputs.

Quantitative disclosures of valuation techniques

The following tables provide the range of minimum and maximum values of each significant unobservable input for level 3 assets and liabilities by the related valuation technique most significant to the related financial instrument.

Quantitative information about level 3 assets at fair value

| 2012 | Fair value | Valuation technique | Unobservable input | Minimum value | Maximum value |

¹ Management's best estimate of the speed at which interest rates will revert to the long-term average. ² Estimate of the probability of structured notes being put back to the Group at the option of the investor over the remaining life of the financial instruments. ³ Risk of unexpected large declines in the underlying values occurring between collateral settlement dates.

Qualitative discussion of the ranges of significant unobservable inputs

The following sections provide further information about the ranges of significant unobservable inputs included in the tables above. The level of aggregation and diversity within the financial instruments disclosed in the tables above result in certain ranges of significant inputs being wide and unevenly distributed across asset and liability categories.

Discount rate

The discount rate is the rate of interest used to calculate the present value of the expected cash flows of a financial instrument. There are multiple factors that will impact the discount rate for any given financial instrument including the coupon on the instrument, the term and the underlying risk of the expected cash flows. Two instruments of similar term and expected cash flows may have significantly different discount rates because the coupons on the instruments are different.

Default rate and loss severity

For financial instruments backed by residential real estate or other assets, diversity in the portfolio is reflected in a wide range for loss severity due to varying levels of default. The lower end of the range represents high performing or government guaranteed collateral with a low probability of default or guaranteed timely payment of principal and interest while the higher end of the range relates collateral with a greater risk of default.

Credit spread and recovery rate

For financial instruments where credit spread is the significant unobservable input, the wide range represents positions with varying levels of risk. The lower end of the credit spread range typically represents shorter-dated instruments and/or those with better perceived credit risk. The higher end of the range typically comprises longer-dated financial instruments or those referencing non-performing, distressed or impaired reference credits. Similarly, the spread between the reference credit and an index can vary significantly based on the risk of the instrument. The spread will be positive for instruments that have a higher risk of default than the index (which is based on a weighted average of its components) and negative for instruments that have a lower risk of default than the index.

Similarly, recovery rates can vary significantly depending upon the specific assets and terms of each transaction. Transactions with higher seniority or more valuable collateral will have higher recovery rates while those transactions which are more subordinated or with less valuable collateral will have lower recovery rates.

Correlation

There are many different types of correlation inputs, including credit correlation, cross-asset correlation (such as equity-interest rate correlation), and same-asset correlation (such as interest rate-interest rate correlation). Correlation inputs are generally used to value hybrid and exotic instruments. Generally, same-asset correlation inputs have a narrower range than cross-asset correlation inputs. However, due to the complex and unique nature of these instruments, the ranges for correlation inputs can vary widely across portfolios.

Prepayment rate

Prepayment rates may vary from collateral pool to collateral pool, and are driven by a variety of collateral-specific factors, including the type and location of the underlying borrower, the remaining tenor of the obligation and the level and type (e.g., fixed or floating) of interest rate being paid by the borrower.

Volatility and skew

Volatility and skew are impacted by the underlying risk, term and strike price of the derivative. In the case of interest rate derivatives, volatility rates may vary significantly between different underlying currencies and expiration dates on the options. Similarly, equity derivatives' volatility may vary greatly depending upon the underlying reference name on the derivative.

Life expectancy

Life expectancy is the primary significant unobservable input on such products as life settlement, premium finance and SPIA and represents the estimated mortality rate for the underlying insured for each contract. This estimate may vary depending upon multiple factors including the age and specific health characteristics of each insured.

Fair value measurements of investments in certain entities that calculate NAV per share

Investments in funds held in trading assets and liabilities primarily include positions held in equity funds of funds as an economic hedge for structured notes and derivatives issued to clients that reference the same underlying risk and liquidity terms of the fund. A majority of these funds have limitations imposed on the amount of withdrawals from the fund during the redemption period due to illiquidity of the investments. In other instances, the withdrawal amounts may vary depending on the redemption notice period and are usually larger for the longer redemption notice periods. In addition, penalties may apply if redemption is within a certain time period from initial investment.

Investment in funds held in other investments principally involves private securities and, to a lesser extent, publicly traded securities and fund of funds. Several of these investments have redemption restrictions subject to the discretion of the Board of Directors of the fund and/or redemption is permitted without restriction, but is limited to a certain percentage of total assets or only after a certain date.

Furthermore, for those investments held in both trading assets and other investments that are nonredeemable, the underlying assets of such funds are expected to be liquidated over the life of the fund, which are generally up to 10 years.

The following table pertains to investments in certain entities that calculate NAV per share or its equivalent, primarily private equity and hedge funds. These investments do not have a readily determinable fair value and are measured at fair value using NAV.

Fair value, unfunded commitments and term of redemption conditions

| end of 2012 | Non-redeemable | Redeemable | Total fair value | Unfunded commitments |
|--|---------------------------|---------------------------|------------------|---------------------------|
| Fair value and unfunded commitments (CHF million) | | | | |
| Debt funds | 127 | 38 | 165 | 0 |
| Equity funds | 52 | 3,810 ¹ | 3,862 | 0 |
| Equity funds sold short | 0 | (111) | (111) | 0 |
| Total funds held in trading assets and liabilities | 179 | 3,737 | 3,916 | 0 |
| Debt funds | 69 | 364 | 433 | 157 |
| Equity funds | 3 | 43 | 46 | 0 |
| Others | 3 | 153 | 156 | 46 |
| Hedge funds | 75 | 560 ² | 635 | 203 |
| Debt funds | 97 | 0 | 97 | 17 |
| Equity funds | 2,633 | 0 | 2,633 | 724 |
| Real estate funds | 382 | 0 | 382 | 131 |
| Others | 846 | 0 | 846 | 198 |
| Private equities | 3,958 | 0 | 3,958 | 1,070 |
| Equity method investments | 385 | 0 | 385 | 0 |
| Total funds held in other investments | 4,418 | 560 | 4,978 | 1,273 |
| Total fair value | 4,597 ³ | 4,297 ⁴ | 8,894 | 1,273 ⁵ |

¹ 46% of the redeemable fair value amount of equity funds is redeemable on demand with a notice period of less than 30 days, 19% is redeemable on a quarterly basis with a notice period primarily of more than 45 days, 18% is redeemable on an annual basis with a notice period primarily of more than 60 days and 17% is redeemable on a monthly basis with a notice period primarily of less than 30 days. ² 72% of the redeemable fair value amount of hedge funds is redeemable on a quarterly basis with a notice period primarily of more than 60 days, 17% is redeemable on an annual basis with a notice period of more than 60 days and 10% is redeemable on demand with a notice period primarily of less than 30 days. ³ Includes CHF 2,248 million attributable to noncontrolling interests. ⁴ Includes CHF 91 million attributable to noncontrolling interests. ⁵ Includes CHF 540 million attributable to noncontrolling interests.

Nonrecurring fair value changes

Certain assets and liabilities are measured at fair value on a nonrecurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments

in certain circumstances, for example, when there is evidence of impairment. The Group typically uses nonfinancial assets measured at fair value on a recurring or nonrecurring basis in a manner that reflects their highest and best use.

Nonrecurring fair value changes

| end of | 2012 | 2011 |
|--|------------|------------|
| Assets held-for-sale recorded at fair value on a nonrecurring basis (CHF billion) | | |
| Assets held-for-sale recorded at fair value on a nonrecurring basis | 0.5 | 0.7 |
| of which level 3 | 0.5 | 0.7 |

Fair value option

The Group has availed itself of the simplification in accounting offered under the fair value option, primarily in Investment Banking and Private Banking & Wealth Management's Asset Management business. This has been accomplished generally by electing the fair value option, both at initial adoption and for subsequent transactions, on items impacted by the hedge accounting requirements of US GAAP. That is, for instruments for which there was an inability to achieve hedge accounting

and for which the Group is economically hedged, the Group has elected the fair value option. Similarly, where the Group manages an activity on a fair value basis but previously has been unable to achieve fair value accounting, the Group has utilized the fair value option to align its risk management reporting to its financial accounting.

The Group elected fair value for certain of its financial statement captions as follows:

Central bank funds sold, securities purchased under resale agreements and securities borrowing transactions

The Group has elected to account for structured resale agreements and most matched book resale agreements at fair value. These activities are managed on a fair value basis; thus, fair value accounting is deemed more appropriate for reporting purposes. The Group did not elect the fair value option for firm financing resale agreements as these agreements are generally overnight agreements which approximate fair value, but which are not managed on a fair value basis.

Other investments

The Group has elected to account for certain equity method investments at fair value. These activities are managed on a fair value basis; thus, fair value accounting is deemed more appropriate for reporting purposes. Certain similar instruments, such as those relating to equity method investments in strategic relationships, for example, the Group's ownership interest in certain clearance organizations, which were eligible for the fair value option, were not elected due to the strategic relationship.

Loans

The Group has elected to account for substantially all Investment Banking commercial loans and loan commitments and certain Investment Banking emerging market loans at fair value. These activities are managed on a fair value basis and fair value accounting was deemed more appropriate for reporting purposes. Additionally, recognition on a fair value basis eliminates the mismatch that existed due to the economic hedging the Group employs to manage these loans. Certain similar loans, such as project finance, lease finance, cash collateralized and some bridge loans, which were eligible for the fair value option, were not elected due to the lack of currently available infrastructure to fair value such loans and/or the inability to economically hedge such loans. Additionally, the Group elected not to account for loans granted by its Private Banking & Wealth Management segment at fair value, such as domestic consumer lending, mortgages and corporate loans, as these loans are not managed on a fair value basis.

Other assets

The Group elected the fair value option for loans held-for-sale, due to the short period over which such loans are held and the intention to sell such loans in the near term. Other assets also include assets of VIEs and mortgage securitizations which do not meet the criteria for sale treatment under US GAAP. The Group did elect the fair value option for these types of transactions.

Due to banks

The Group elected the fair value option for certain time deposits associated with its emerging markets activities.

Customer deposits

The Group's customer deposits include fund-linked deposits. The Group elected the fair value option for these fund-linked deposits. Fund-linked products are managed on a fair value basis and fair value accounting was deemed more appropriate for reporting purposes.

Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions

The Group has elected to account for structured repurchase agreements and most matched book repurchase agreements at fair value. These activities are managed on a fair value basis and fair value accounting was deemed more appropriate for reporting purposes. The Group did not elect the fair value option for firm financing repurchase agreements as these agreements are generally overnight agreements which approximate fair value, but which are not managed on a fair value basis.

Short-term borrowings

The Group's short-term borrowings include hybrid debt instruments with embedded derivative features. Some of these embedded derivative features create bifurcable debt instruments. The Group elected the fair value option for some of these instruments as of January 1, 2006, in accordance with the provisions of US GAAP. New bifurcable debt instruments which were entered into in 2006 are carried at fair value. Some hybrid debt instruments do not result in bifurcable debt instruments. US GAAP permits the Group to elect fair value accounting for non-bifurcable hybrid debt instruments. With the exception of certain bifurcable hybrid debt instruments which the Group did not elect to account for at fair value, the Group has elected to account for all hybrid debt instruments held as of January 1, 2007, and hybrid debt instruments originated after January 1, 2007, at fair value. These activities are managed on a fair value basis and fair value accounting was deemed appropriate for reporting purposes. There are two main populations of similar instruments for which fair value accounting was not elected. The first relates to the lending business transacted by the Group's Private Banking & Wealth Management segment, which includes structured deposits and similar investment products. These are managed on a bifurcated or accrual basis and fair value accounting was not considered appropriate. The second is

where the instruments were or will be maturing in the near term and their fair value will be realized at that time.

Long-term debt

The Group's long-term debt includes hybrid debt instruments with embedded derivative features as described above in Short-term borrowings. The Group's long-term debt also includes debt issuances managed by its Treasury department that do not contain derivative features (vanilla debt). The Group actively manages the interest rate risk on these instruments with derivatives; in particular, fixed-rate debt is hedged with receive-fixed, pay-floating interest rate swaps. The Group

elected to fair value this fixed-rate debt upon implementation of the fair value option on January 1, 2007, with changes in fair value recognized as a component of trading revenues. The Group did not elect to apply the fair value option to fixed-rate debt issued by the Group since January 1, 2008, and instead applies hedge accounting per the guidance of US GAAP.

Other liabilities

Other liabilities include liabilities of VIEs and mortgage securitizations which do not meet the criteria for sale treatment under US GAAP. The Group did elect the fair value option for these types of transactions.

Difference between the aggregate fair value and the aggregate unpaid principal balances of loans and financial instruments

| Other liabilities | 826 ² | (286) ² | (232) ² |
| of which related to credit risk | 912 | (348) | (97) |

¹ Primarily recognized in net interest income. ² Primarily recognized in trading revenues. ³ Primarily recognized in other revenues. ⁴ Changes in fair value related to credit risk are due to the change in the Group's own credit spreads. Other changes in fair value are attributable to changes in foreign currency exchange rates and interest rates, as well as movements in the reference price or index for structured notes. Changes in fair value on Credit Suisse vanilla debt and on debit valuation adjustments on structured notes related to credit risk were CHF (1,663) million and CHF (931) million in 2012, respectively, CHF 1,210 million and CHF 697 million in 2011, respectively, and CHF 341 million and CHF (73) million in 2010, respectively.

Interest income and expense are calculated based on contractual rates specified in the transactions. Interest income and expense are recorded in the consolidated statements of operations depending on the nature of the instrument and related market convention. When interest is included as a component of the change in the instrument's fair value, it is included in trading revenues. Otherwise, it is included in interest and dividend income or interest expense. Dividend income is recognized separately from trading revenues.

The impacts of credit risk on debt securities held as assets presented in the table above have been calculated as the component of the total change in fair value, excluding the impact of changes in base or risk-free interest rates. The impacts of changes in own credit risk on liabilities presented in the table above have been calculated as the difference between the fair values of those instruments as of the reporting date and the theoretical fair values of those instruments calculated by using the yield curve prevailing at the end of the reporting period, adjusted up or down for changes in the Group's own credit spreads from the transition date to the reporting date.

Disclosures about the fair value of financial instruments not carried at fair value in the consolidated balance sheet

The following table provides the carrying value and fair value of financial instruments which are not carried at fair value in the consolidated balance sheet. The disclosure excludes all

non-financial instruments such as lease transactions, real estate, premises and equipment, equity method investments and pension and benefit obligations. Beginning in January 2012, US GAAP requires the disclosure of the fair values of these financial instruments within the fair value hierarchy prospectively.

34 Assets pledged and collateral

Assets pledged

The Group pledges assets mainly for repurchase agreements and other securities financing. Certain pledged assets may be

encumbered, meaning they have the right to be sold or repledged. The encumbered assets are parenthetically disclosed on the consolidated balance sheet.

| | | |
|--|---------|---------|
| end of | 2012 | 2011 |
| Assets pledged (CHF million) | | |
| Total assets pledged or assigned as collateral | 151,419 | 157,856 |
| of which encumbered | 90,745 | 96,922 |

Collateral

The Group receives cash and securities in connection with resale agreements, securities borrowing and loans, derivative transactions and margined broker loans. A substantial portion of the collateral and securities received by the Group was sold

or repledged in connection with repurchase agreements, securities sold not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

| Cash and securities restricted under foreign banking regulations | 14,340 | 17,943 |
| Swiss National Bank required minimum liquidity reserves | 2,441 | 2,294 |

35 Capital adequacy

The Group is subject to regulation by FINMA. The capital levels of the Group are subject to qualitative judgments by regulators, including FINMA, about the components of capital, risk weightings and other factors. Since January 2008, the Group operated under the international capital adequacy standards known as Basel II set forth by the BCBS. These standards affected the measurement of both total eligible capital and risk-weighted assets. In January 2011, as required by FINMA, the Group implemented BCBS's "Revisions to the Basel II market risk framework" (Basel II.5) for FINMA regulatory capital purposes. The Group has based its capital adequacy calculations on US GAAP, as permitted by FINMA Circular 2008/34. FINMA has advised the Group that it may continue to include as tier 1 capital CHF 33 million and CHF 0.6 billion of equity from SPEs which are deconsolidated under US GAAP as of December 31, 2012 and 2011, respectively.

According to FINMA and Bank for International Settlements (BIS) capital requirements, total regulatory capital is comprised of two categories: tier 1 and tier 2 capital. Tier 1 capital consists of total shareholders' equity, qualifying non-controlling interests and hybrid tier 1 capital instruments. Deductions from tier 1 capital include, among other items, goodwill and intangible assets, participations in insurance entities, investments in certain bank and finance entities and other adjustments, including cumulative fair value adjustments on Credit Suisse vanilla debt, net of tax, anticipated but not yet declared dividends, the net long position in own treasury shares in the trading book and an adjustment for the accounting treatment of pension plans. Core tier 1 capital excludes hybrid tier 1 capital instruments. Tier 1 capital is supplemented for capital adequacy purposes by tier 2 capital, which consists primarily of unsecured, perpetual, subordinated instruments that are senior only to tier 1 instruments. The sum of tier 1 and tier 2 capital equals total eligible capital.

Risk-weighted assets include consolidated balance sheet assets, net positions in securities not held in the trading portfolio, off-balance sheet transactions converted into credit equivalents, market positions in the trading portfolio and operational risk from processes, people, systems and external events.

As of December 31, 2012 and 2011, the Group was adequately capitalized under the regulatory provisions outlined under both FINMA and BIS guidelines.

BIS statistics – Basel II.5

| end of | 2012 | 2011 |
|---|----------------|----------------|
| Eligible capital (CHF million) | | |
| Tier 1 capital | 43,547 | 36,844 |
| of which core tier 1 capital | 34,766 | 25,956 |
| Tier 2 capital | 6,389 | 11,810 |
| Total eligible capital | 49,936 | 48,654 |
| Risk-weighted assets (CHF million) | | |
| Credit risk | 143,679 | 157,237 |
| Market risk | 29,366 | 40,609 |
| Non-counterparty risk | 6,126 | 7,819 |
| Operational risk | 45,125 | 36,088 |
| Risk-weighted assets | 224,296 | 241,753 |
| Capital ratios (%) | | |
| Core tier 1 ratio | 15.5 | 10.7 |
| Tier 1 ratio | 19.4 | 15.2 |
| Total capital ratio | 22.3 | 20.1 |

Broker-dealer operations

Certain Group broker-dealer subsidiaries are also subject to capital adequacy requirements. As of December 31, 2012 and 2011, the Group and its subsidiaries complied with all applicable regulatory capital adequacy requirements.

Dividend restrictions

Certain of the Group's subsidiaries are subject to legal restrictions governing the amount of dividends they can pay (for example, pursuant to corporate law as defined by the Swiss Code of Obligations).

Under the Swiss Code of Obligations, dividends may be paid out only if and to the extent the corporation has distributable profits from previous business years, or if the free reserves of the corporation are sufficient to allow distribution of a dividend. In addition, at least 5% of the annual net profits must be retained and booked as general legal reserves for so long as these reserves amount to less than 20% of the paid-in share capital. The reserves currently exceed this 20% threshold. Furthermore, dividends may be paid out only after shareholder approval at the Annual General Meeting.

As of December 31, 2012 and 2011, the Group was not subject to restrictions on its ability to pay the proposed dividends.

36 Assets under management

The following disclosure provides information regarding assets under management and net new assets as regulated by FINMA.

Assets under management include assets from clients for which the Group provides investment advisory or discretionary asset management services. Assets that are held solely for transaction-related or safekeeping/custody purposes are not considered assets under management. Assets of corporate clients and public institutions that are used primarily for cash management or transaction-related purposes are also not considered assets under management. The classification of assets under management is individually assessed on the basis of each client's intentions and objectives and the banking services provided to the client. Reclassifications between assets under management and assets held for transaction-related or safekeeping purposes result in corresponding net assets inflows or outflows.

Net new assets measure the degree of success in acquiring assets under management. The calculation is based on the direct method, taking into account individual cash payments,

security deliveries and cash flows resulting from loan increases or repayments. Interest and dividend income credited to clients and commissions, interest and fees charged for banking services are not taken into account when calculating net new assets, as such charges are not directly related to the Group's success in acquiring assets under management. Similarly, changes in assets under management due to currency and market volatility as well as asset inflows and outflows due to the acquisition or divestiture of businesses are not part of net new assets.

A portion of the Group's assets under management result from double counting. Double counting arises when assets under management are subject to more than one level of asset management services. Each such separate advisory or discretionary service provides additional benefits to the client and represents additional income for the Group. Specifically, double counting primarily results from the investment of assets under management in collective investment instruments managed by the Group. The extent of double counting is disclosed in the following table.

Assets under management

| in / end of | 2012 | 2011 |
|--|----------------|----------------|
| Assets under management (CHF billion) | | |
| Assets in collective investment instruments managed by Credit Suisse | 182.2 | 167.0 |
| Assets with discretionary mandates | 225.3 | 223.2 |
| Other assets under management | 843.3 | 795.0 |
| Assets under management (including double counting) | 1,250.8 | 1,185.2 |
| of which double counting | 63.8 | 77.7 |
| Net new assets (CHF billion) | | |
| Total net new assets (including double counting) | 10.8 | 46.6 |

37 Litigation

The Group is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses, including those disclosed below. Some of these proceedings have been brought on behalf of various classes of claimants and seek damages of material and/or indeterminate amounts.

The Group accrues litigation provisions (including estimated fees and expenses of external lawyers and other service providers) and takes a charge to income in connection with certain proceedings when losses, additional losses or ranges of loss are probable and reasonably estimable. The Group reviews its legal proceedings each quarter to determine the adequacy of its litigation provisions and may increase or release provisions based on management's judgment and the advice of counsel. The establishment of additional provisions or releases of litigation provisions may be necessary in the future as developments in such proceedings warrant.

It is inherently difficult to determine whether a loss is probable or even reasonably possible or to estimate the amount of any loss or loss range for many of the Group's legal proceedings. Estimates, by their nature, are based on judgment and currently available information and involve a variety of factors, including, but not limited to, the type and nature of the proceeding, the progress of the matter, the advice of counsel, the Group's defenses and its experience in similar matters, as well as its assessment of matters, including settlements, involving other defendants in similar or related cases or proceedings. Factual and legal determinations, many of which are complex, must be made before a loss, additional losses or ranges of loss can be reasonably estimated for any proceeding.

Most matters pending against the Group seek damages of an indeterminate amount. While certain matters specify the damages claimed, such claimed amount may not represent the Group's reasonably possible losses. For certain of the proceedings discussed below the Group has disclosed the amount of damages claimed and certain other quantifiable information that is publicly available.

The following table presents a roll forward of the Group's aggregate litigation provisions.

Litigation provisions

| | 2012 |
|--|--------------|
| CHF million | |
| Balance at beginning of period | 870 |
| Increase in litigation accruals | 774 |
| Decrease in litigation accruals | (87) |
| Decrease for settlements and other cash payments | (373) |
| Foreign exchange translation | (27) |
| Balance at end of period | 1,157 |

The Group's aggregate litigation provisions include estimates of losses, additional losses or ranges of loss for proceedings for which such losses are probable and can be reasonably estimated. The Group does not believe that it can estimate an aggregate range of reasonably possible losses for certain of its proceedings because of their complexity, the novelty of some of the claims, the early stage of the proceedings, the limited amount of discovery that has occurred and/or other factors. The Group's estimate of the aggregate range of reasonably possible losses that are not covered by existing provisions for the proceedings discussed below for which the Group believes an estimate is possible is zero to CHF 1.7 billion.

After taking into account its litigation provisions, the Group believes, based on currently available information and advice of counsel, that the results of its legal proceedings, in the aggregate, will not have a material adverse effect on the Group's financial condition. However, in light of the inherent uncertainties of such proceedings, including those brought by regulators or other governmental authorities, the ultimate cost to the Group of resolving such proceedings may exceed current litigation provisions and any excess may be material to its operating results for any particular period, depending, in part, upon the operating results for such period.

Research-related litigation

Putative class action lawsuits were filed against Credit Suisse Securities (USA) LLC (CSS LLC) in the wake of publicity surrounding the 2002 industry-wide governmental and regulatory investigations into research analyst practices, with *In re Credit Suisse – AOL Securities Litigation*, filed in the US District Court for the District of Massachusetts, being the remaining

outstanding matter. The case was brought on behalf of a class of purchasers of common shares of the former AOL Time Warner Inc. (AOL) who have alleged that CSS LLC's equity research coverage of AOL between January 2001 and July 2002 was false and misleading. The second amended complaint in this action asserted federal securities fraud and control person liability claims against CSS LLC and certain affiliates and former employees of CSS LLC. Plaintiffs estimated damages of approximately USD 3.9 billion. On January 13, 2012, the district court granted summary judgment in favor of the defendants upon its determination to preclude a plaintiff expert witness. On May 17, 2012, the court denied the plaintiffs' motion for reconsideration. On November 15, 2012, the plaintiffs filed an appeal and on January 7, 2013, the defendants filed an opposition to plaintiffs' motion. On February 4, 2013, plaintiffs filed their reply brief and oral argument on the motion was held on March 6, 2013.

Enron-related litigation

Two Enron-related actions remain pending against CSS LLC and certain of its affiliates, both in the US District Court for the Southern District of Texas. In these actions, plaintiffs assert they relied on Enron's financial statements, and seek to hold the defendants responsible for any inaccuracies in Enron's financial statements. In *Connecticut Resources Recovery Authority v. Lay, et al.*, the plaintiff seeks to recover from multiple defendants, pursuant to the Connecticut Unfair Trade Practices Act and Connecticut state common law, approximately USD 130 million to USD 180 million in losses it allegedly suffered in a business transaction it entered into with Enron. A motion to dismiss is pending. In *Silvercreek Management Inc. v. Citigroup, Inc., et al.*, the plaintiff seeks to assert federal and state law claims relating to its alleged USD 280 million in losses relating to its Enron investments. A motion to dismiss is pending.

NCFE-related litigation

Since February 2003, lawsuits have been pending against CSS LLC and certain of its affiliates with respect to services that it provided to National Century Financial Enterprises, Inc. and its affiliates (NCFE). From January 1996 to May 2002, CSS LLC acted as a placement agent for bonds issued by NCFE that were to be collateralized by health-care receivables and, in July 2002, as a placement agent for a sale of NCFE preferred stock. From December 2000 through November 2002, an affiliate of CSS LLC acted as administrative agent for, and entered into participation agreements in, an asset-backed liquidity facility issued by NCFE that was also to be collateralized by health care receivables. NCFE filed for bankruptcy protection in November 2002. In these lawsuits, which

were consolidated as a Multi-District Litigation in the US District Court for the Southern District of Ohio (SDO) for pre-trial purposes, investors holding approximately USD 1.9 billion face amount of NCFE's bonds and approximately USD 12 million in preferred stock sued numerous defendants, including the founders and directors of NCFE, the trustees for the bonds, NCFE's auditors and law firm, the rating agencies that rated NCFE's bonds and NCFE's placement agents, including CSS LLC. The lawsuits asserted claims for breach of contract, negligence, fraud and violation of federal and state securities laws and generally alleged that CSS LLC and/or its affiliates knew or should have known that the health care receivables purportedly backing the bonds were either ineligible for the programs or non-existent. In April 2009, CSS LLC settled with the New York City Pension Fund bond investor plaintiffs for an amount covered by existing provisions. On September 25, 2012, venue for the bond investor lawsuits was transferred to the SDNY and on November 27, 2012 the suits were consolidated for trial. On October 26, 2012, the SDO issued a decision which granted CSS LLC's summary judgment motion to dismiss all the claims brought by the investor in NCFE preferred stock. On November 16, 2012, that equity investor filed a notice of appeal of that decision to the US Court of Appeals for the Sixth Circuit and on February 15, 2013 filed its appellant's brief and appendix. On November 28, 2012, the SDNY issued an order providing that trial of the bond investor cases would begin April 1, 2013. On December 28, 2012, the SDNY issued an order in the bond investor lawsuits directing all parties to engage in settlement discussions in advance of trial. On January 25, 2013, the SDNY issued an order in the bond investor lawsuits holding that in the event CSS LLC or its remaining affiliate in the litigation, and NCFE's former CEO Lance Poulsen, the only other remaining defendant, were ultimately found liable on certain of the claims at trial, the remaining defendants, including CSS LLC and/or its affiliate, would be jointly and severally liable for the losses relating to those claims, subject to an appropriate reduction for settlements entered into by the bond investors and former defendants. On March 13, 2013, CSS LLC and its affiliate entered into agreements to settle the bond investor lawsuits and resolve all remaining bond investor claims for an amount partially covered by existing provisions.

Refco-related litigation

In March 2008, CSS LLC was named, along with other financial services firms, accountants, lawyers, officers, directors and controlling persons, as a defendant in an action filed in New York State court by the Joint Official Liquidators of various SPhinX Funds and the trustee of the SphinX Trust, which holds claims that belonged to PlusFunds Group, Inc. (Plus-

Funds), the investment manager for the SPHinx Funds. The operative amended complaint in the suit asserted claims against CSS LLC for aiding and abetting breaches of fiduciary duty and aiding and abetting fraud by Refco's insiders in connection with Refco's August 2004 notes offering and August 2005 IPO. Plaintiffs sought to recover from defendants more than USD 800 million, consisting of USD 263 million that the SPHinx Managed Futures Fund, a SPHinx fund, had on deposit and lost at Refco, several hundred million dollars in alleged additional "lost enterprise" damages of PlusFunds, and pre-judgment interest. In March 2008, CSS LLC and certain other defendants removed the action to the SDNY. In November 2008, CSS LLC filed a motion to dismiss the amended complaint. In February 2012, the court granted in part and denied in part CSS LLC's motion to dismiss. The court dismissed Plaintiffs' claim for aiding and abetting breach of fiduciary duty with prejudice. The court also granted the motion with respect to part of Plaintiffs' claim for aiding and abetting fraud, but denied the motion with respect to part of that claim. In August 2012, CSS LLC filed a motion for summary judgment with respect to the remaining part of Plaintiffs' aiding and abetting fraud claim. In December 2012, the court granted the motion, thus dismissing CSS LLC from the case. The court has not yet issued a final judgment as to CSS LLC, and the dismissal of the claims against CSS LLC will be subject to appeal.

Mortgage-related matters

CSS LLC and certain of its affiliates have received requests for information from certain regulators and/or government entities regarding the origination, purchase, securitization and servicing of subprime and non-subprime residential mortgages and related issues. CSS LLC and its affiliates are cooperating with such requests.

On November 16, 2012, CSS LLC and certain of its affiliates settled an administrative proceeding with the SEC, which involved potential claims against them relating to settlements of claims against originators involving loans included in a number of their securitizations, by agreeing to pay approximately USD 120 million. This settlement also covered allegations with respect to two RMBS issued in 2006 that CSS LLC and such affiliates made misstatements in SEC filings regarding when they would repurchase mortgage loans from trusts if borrowers missed the first payment due. CSS LLC and such affiliates agreed to an order, without admitting or denying the allegations, requiring them to cease and desist from violations of Section 17(a)(2) and (3) of the Securities Act of 1933 and requiring one such affiliate to cease and desist from violations of Section 15(d) of the Securities Exchange Act of 1934. A separate possible action, which involved potential claims

against CSS LLC relating to due diligence conducted for two mortgage-backed securitizations and corresponding disclosures, formally was closed by the SEC, without any enforcement action, on November 19, 2012.

Following an investigation, on November 20, 2012, the New York Attorney General, on behalf of the State of New York, filed a civil action in the Supreme Court for the State of New York, New York County (SCNY) against CSS LLC and affiliated entities in their roles as issuer, sponsor, depositor and/or underwriter of RMBS transactions prior to 2008. The action, which references 64 RMBS issued, sponsored, deposited and underwritten by CSS LLC and its affiliates in 2006 and 2007, alleges that CSS LLC and its affiliates misled investors regarding the due diligence and quality control performed on the mortgage loans underlying the RMBS at issue, seeks an unspecified amount of damages, and is at an early procedural point.

CSS LLC and/or certain of its affiliates have also been named as defendants in various civil litigation matters related to their roles as issuer, sponsor, depositor, underwriter and/or servicer of RMBS transactions. These cases include class action lawsuits and putative class action lawsuits, actions by individual investors in RMBS, actions by monoline insurance companies that guaranteed payments of principal and interest for certain RMBS, and repurchase actions by RMBS trusts or investors on behalf of trustees. Although the allegations vary by lawsuit, plaintiffs in the class and putative class actions and individual investor actions generally allege that the offering documents of securities issued by various RMBS securitization trusts contained material misrepresentations and omissions, including statements regarding the underwriting standards pursuant to which the underlying mortgage loans were issued; monoline insurers allege that loans that collateralize RMBS they insured breached representations and warranties made with respect to the loans at the time of securitization; and repurchase action plaintiffs allege breached representations and warranties in respect of mortgage loans and failure to repurchase such mortgage loans as required under the applicable agreements. The amounts disclosed below do not reflect actual realized plaintiff losses to date or anticipated future litigation exposure. Rather, unless otherwise stated, these amounts reflect the original unpaid principal balance amounts as alleged in these actions and do not include any reduction in principal amounts since issuance. Further, amounts attributable to an "operative pleading" for the individual investor actions are not altered for settlements, dismissals or other occurrences, if any, that may have caused the amounts to change subsequent to the operative pleading. In addition to the mortgage-related actions discussed below, a number of other entities have threatened to assert claims against CSS LLC and/or

its affiliates in connection with various RMBS issuances, and CSS LLC and/or its affiliates have entered into agreements with some of those entities to toll the relevant statutes of limitations.

Class action litigations

In class actions and putative class actions against CSS LLC as an underwriter of other issuers' RMBS offerings, CSS LLC generally has contractual rights to indemnification from the issuers. However, some of these issuers are now defunct, including affiliates of IndyMac Bancorp (IndyMac) and Thornburg Mortgage (Thornburg). With respect to IndyMac, CSS LLC is named as a defendant in two class actions pending in the SDNY brought on behalf of purchasers of securities in various IndyMac RMBS offerings. In one class action, *In re IndyMac Mortgage-Backed Securities Litigation*, CSS LLC is named along with numerous other underwriters and individual defendants related to approximately USD 9.0 billion of IndyMac RMBS offerings. CSS LLC served as an underwriter with respect to approximately 32% of the IndyMac RMBS at issue or approximately USD 2.9 billion. Certain investors seek to intervene in the action to assert claims with respect to additional RMBS offerings, including two RMBS offerings underwritten by CSS LLC. In those two offerings, CSS LLC underwrote RMBS with an aggregate principal amount of USD 912 million. The SDNY has denied these motions to intervene, and the proposed intervenors are now appealing that ruling. In addition, plaintiffs filed a motion for reconsideration of the court's June 21, 2010 decision on defendants' motion to dismiss. The motion sought to reinstate claims with respect to previously-dismissed RMBS offerings, including 18 additional RMBS offerings underwritten by CSS LLC, with an aggregate principal amount of approximately USD 6.0 billion for which CSS LLC served as an underwriter (of which USD 912 million also is subject to the appeal of the intervention motion). On November 16, 2012, the SDNY denied that motion without prejudice to renewal at a later date. In the other IndyMac-related class action, *Tsereteli v. Residential Asset Securitization Trust 2006-A8*, CSS LLC is the sole underwriter defendant related to a USD 632 million IndyMac RMBS offering, of which CSS LLC underwrote USD 603 million of certificates. On November 8, 2012, the Second Circuit decided to hear CSS LLC's interlocutory appeal of the SDNY order granting plaintiff's motion for class certification. With respect to *Genesee County Employees' Retirement System v. Thornburg*, CSS LLC is a named defendant in a putative class action pending in the US District Court for the District of New Mexico along with a number of other financial institutions that served as depositors and/or underwriters for approximately USD 5.5 billion of Thornburg RMBS offerings. CSS LLC served as an

underwriter with respect to approximately 6.4% of the Thornburg RMBS at issue or approximately USD 354 million. All defendants have agreed to a settlement in principle in the aggregate amount of USD 11.25 million, which is subject to court approval. A further class action lawsuit pending in the SDNY against CSS LLC and certain affiliates and employees, *New Jersey Carpenters Health Fund v. Home Equity Mortgage Trust 2006-5*, relates to two RMBS offerings, totaling approximately USD 1.6 billion, sponsored and underwritten by the Credit Suisse defendants.

Individual investor actions

CSS LLC and, in some instances, its affiliates, as an RMBS issuer, underwriter and/or other participant, and in some instances its employees, along with other defendants, are defendants in: two actions brought by Cambridge Place Investment Management Inc. in Massachusetts state court, in which claims against CSS LLC, following the court's motion to dismiss ruling dismissing certain claims, relate to less than USD 525 million of the RMBS at issue, in an amount to be determined; one action brought by The Charles Schwab Corporation in California state court, in which claims against CSS LLC and its affiliates relate to USD 125 million of the RMBS at issue (approximately 9% of the USD 1.4 billion at issue against all defendants in the operative pleading); one action brought by the Federal Deposit Insurance Corporation (FDIC), as receiver for Citizens National Bank and Strategic Capital Bank in the SDNY, in which claims against CSS LLC and its affiliates relate to approximately USD 28 million of the RMBS at issue (approximately 20% of the USD 141 million at issue against all defendants in the operative pleading); four actions brought by the FDIC, as receiver for Colonial Bank: one action in the SDNY, in which claims against CSS LLC relate to approximately USD 92 million of the RMBS at issue (approximately 23% of the USD 394 million at issue against all defendants in the operative pleading), two actions in the US District Court for the Central District of California, in which claims against CSS LLC relate to approximately USD 58 million of the RMBS at issue (approximately 10% of the USD 553 million at issue against all defendants in the operative pleadings), and one action in the US District Court for the Middle District of Alabama, in which claims against CSS LLC and its affiliates relate to approximately USD 153 million of the RMBS at issue (approximately 49% of the USD 311 million at issue against all defendants in the operative pleading); seven individual actions brought by the Federal Home Loan Banks of Seattle, San Francisco, Chicago, Indianapolis and Boston in various state and federal courts, in which claims against CSS LLC and its affiliates relate to approximately USD 3.2 billion of the RMBS collectively at issue (approximately 9% of the USD 36

billion at issue against all defendants in the operative pleadings); five actions brought by the Federal Housing Finance Agency (FHFA), as conservator for Fannie Mae and Freddie Mac, in the SDNY, in which claims against CSS LLC and its affiliates and employees relate to approximately USD 19 billion of the RMBS at issue (approximately 29% of the USD 65 billion at issue against all defendants in the operative pleadings); one action brought by John Hancock Life Insurance Co. (U.S.A.) and affiliated entities in the US District Court for the District of Minnesota, in which claims against CSS LLC relate to an unstated amount of the RMBS at issue; two actions brought by Landesbank Baden-Württemberg and affiliated entities in the SDNY, in which claims against CSS LLC relate to approximately USD 200 million of the RMBS at issue (100% of the total amount at issue against all defendants in the operative pleadings); two actions brought by Massachusetts Mutual Life Insurance Company in the US District Court for the District of Massachusetts, in which claims against CSS LLC and its employee relate to approximately USD 107 million of the RMBS at issue (approximately 97% of the USD 110 million at issue against all defendants in the operative pleadings); one action brought by the National Credit Union Administration Board, as liquidating agent of the US Central Federal Credit Union, Western Corporate Federal Credit Union and Southwest Corporate Federal Credit Union in the US District Court for the District of Kansas, in which claims against CSS LLC and its affiliates relate to approximately USD 715 million of the RMBS at issue (100% of the total amount at issue against all defendants in the operative pleading); one action brought by Phoenix Light SF Ltd. and affiliated entities in the SCNY, in which claims against CSS LLC and its affiliates relate to approximately USD 362 million of the RMBS at issue (approximately 13% of the USD 2.8 billion at issue against all defendants in the operative pleading); one action brought by Royal Park Investments SA/NV in the SCNY, in which claims against CSS LLC and its affiliates relate to approximately USD 360 million of the RMBS at issue (approximately 4% of the USD 8.4 billion at issue against all defendants in the operative pleading); one action brought by Watertown Savings Bank in the SCNY, in which claims against CSS LLC and its affiliates relate to an unstated amount of the RMBS at issue; one action brought by the West Virginia Investment Management Board in West Virginia state court, in which claims against CSS LLC relate to approximately USD 6 million of the RMBS at issue (approximately 35% of the USD 17 million at issue against all defendants in the operative pleading); and one action brought by the Western & Southern Life Insurance Company and affiliated entities in Ohio state court, in which claims against CSS LLC and its affiliates relate to approximately USD 260 million of the RMBS at issue (approximately 94% of the USD 276

million at issue against all defendants in the operative pleading).

CSS LLC and certain of its affiliates and/or employees are the only defendants named in: one action brought by Allstate Insurance Company in the SCNY, in which claims against CSS LLC and its affiliates relate to approximately USD 232 million of RMBS; one action brought by Deutsche Zentral-Genossenschaftsbank AG, New York Branch in the SCNY, in which claims against CSS LLC and its affiliates relate to approximately USD 138 million of RMBS; one action brought by IKB Deutsche Industriebank AG and affiliated entities in the SCNY, in which claims against CSS LLC and its affiliates relate to approximately USD 97 million of RMBS; one action brought by Minnesota Life Insurance Company and affiliated entities in the US District Court for the District of Minnesota, in which claims against CSS LLC and its affiliates relate to approximately USD 43 million of RMBS; one action brought by The Prudential Insurance Company of America and affiliated entities in the US District Court for the District of New Jersey, in which claims against CSS LLC and its affiliates relate to approximately USD 466 million of RMBS; one action brought by Sealink Funding Limited in the SCNY, in which claims against CSS LLC and its affiliates relate to approximately USD 35 million of RMBS, following the March 1, 2013 filing of a complaint by the plaintiff which reduced the RMBS at issue by approximately USD 145 million; one action brought by Stichting Pensioenfond ABP in the SCNY, in which claims against CSS LLC and its affiliates and employees relate to an unstated amount of RMBS; and one action brought by The Union Central Life Insurance Company and affiliated entities in the SDNY, in which claims against CSS LLC and its affiliates and employees relate to approximately USD 65 million of RMBS.

These actions are at early or intermediate procedural points.

Monoline insurer disputes

CSS LLC and certain of its affiliates are defendants in two pending actions commenced by monoline insurers MBIA Insurance Corp. (MBIA) and Assured Guaranty Corp., that guaranteed payments of principal and interest that in aggregate total approximately USD 1.3 billion of RMBS issued in seven different offerings sponsored by Credit Suisse. One theory of liability advanced by the monoline insurers is that an affiliate of CSS LLC must repurchase affected mortgage loans from the trusts at issue. In addition, MBIA alleges a claim for fraudulent inducement. To date, the monoline insurers have submitted repurchase demands for loans with an aggregate original principal balance of approximately USD 2.6 billion. These actions are pending in the SCNY. In each action, plaintiff claims that

the vast majority of the underlying mortgage loans breach certain representations and warranties, and that CSS LLC and its affiliates have failed to repurchase the allegedly defective loans. Discovery in these actions is ongoing. On February 27, 2013, CSS LLC and its affiliate settled the action brought by Ambac Assurance Corp. in the SCNY for an amount covered by existing provisions. On March 8, 2013, CSS LLC settled an action brought by MBIA in California state court in which MBIA purported to be subrogated to the rights of certain RMBS holders who purchased RMBS underwritten by CSS LLC; that settlement was covered by existing provisions.

Repurchase litigations

DLJ Mortgage Capital, Inc. (DLJ) is a defendant in: one action brought by the FHFA, as conservator for Freddie Mac, on behalf of the Trustees of Home Equity Asset Trust 2006-5, Home Equity Asset Trust 2006-6 and Home Equity Asset Trust 2006-7, in which no damages amount is alleged; one action brought by Home Equity Mortgage Trust Series 2006-5, in which plaintiff alleges damages of not less than USD 497 million; one action brought by Asset Backed Securities Corporation Home Equity Loan Trust, Series 2006-HE7, in which no damages amount is alleged; one action brought by Home Equity Asset Trust, Series 2006-8, in which no damages amount is alleged; and one action brought by Home Equity Asset Trust 2007-1, in which no damages amount is alleged. DLJ and its affiliate Select Portfolio Servicing, Inc. (SPS), are defendants in: one action brought by Home Equity Mortgage Trust Series 2006-1, Home Equity Mortgage Trust Series 2006-3, and Home Equity Mortgage Trust Series 2006-4, in which plaintiffs allege damages of not less than USD 730 million, and allege that SPS obstructed the investigation into the full extent of the defects in the mortgage pools by refusing to afford the trustee reasonable access to certain origination files. These actions are brought in the SCNY and are at early procedural points.

Bank loan litigation

On January 3, 2010, the Bank and other affiliates were named as defendants in a lawsuit filed in the US District Court for the District of Idaho by homeowners in four real estate developments, Tamarack Resort, Yellowstone Club, Lake Las Vegas and Ginn Sur Mer. The Bank arranged, and was the agent bank for, syndicated loans provided for all four developments, which have been or are now in bankruptcy or foreclosure. Plaintiffs generally allege that the Bank and other affiliates committed fraud by using an unaccepted appraisal method to overvalue the properties with the intention to have the borrowers take out loans they could not repay because it would allow the Bank and other affiliates to later push the borrowers into bankruptcy and take own-

ership of the properties. The claims originally asserted by the plaintiffs include Racketeer Influenced and Corrupt Organizations (RICO), fraud, negligent misrepresentation, breach of fiduciary duty, tortious interference and conspiracy, among others. Plaintiffs have demanded USD 24 billion in damages. Cushman & Wakefield, the appraiser for the properties at issue, is also named as a defendant. An amended complaint was filed against all of the defendants on January 25, 2010, adding six new homeowner plaintiffs in the same four real estate developments. On March 29, 2010, the Bank and its named affiliates moved to dismiss the amended complaint in its entirety. The Bank and its named affiliates argued that the claims against them fail because they had no relationship with the plaintiff homeowners, and made no representations to them, fraudulent or otherwise, so there is no legal basis for the plaintiffs' claims against them. The Bank and its affiliates also argued, among other things, that the plaintiffs failed to plead the necessary elements of the claims asserted against them in the amended complaint. On March 31, 2011, the court dismissed the RICO claim with prejudice and dismissed certain other claims with leave to replead. A third amended complaint was filed on April 21, 2011, adding a Consumer Protection Act claim. On May 5, 2011, the Bank and its affiliates moved to dismiss the third amended complaint. On July 22, 2011, two developers moved to intervene in the lawsuit. On March 30, 2012, the court dismissed the unjust enrichment, fiduciary duty and Consumer Protection Act claims and limited fraud and negligent misrepresentation claims to three named plaintiffs. On September 17, 2012, plaintiffs filed a motion for class certification. On December 12, 2012, the Bank opposed the motion and oral argument is scheduled to take place on April 19, 2013.

Auction Rate Securities

On May 27, 2009, Elbit Systems Ltd ("Elbit") filed a complaint against the Group in the US District Court for the Northern District of Illinois, seeking approximately USD 16 million related to the purchase of auction rate securities, alleging federal securities law claims and state law aiding and abetting fraud and unjust enrichment causes of action. The case was transferred to the SDNY, and the Group moved to dismiss the complaint for failure to state a claim and for being barred by a prior release. The motion to dismiss the complaint for being barred by a prior release was denied without prejudice, and the court ordered the parties to engage in limited discovery concerning the release. The parties exchanged discovery on that issue and the Group filed a motion for summary judgment. On February 7, 2012, the SDNY denied the Group's summary judgment motion holding that a genuine dispute exists as to whether the prior release bars Elbit's claims. On January 7,

2013, the SDNY denied the Group's motion to dismiss the complaint for failure to state a claim.

Tax matters

Credit Suisse has been responding to subpoenas and other requests for information from the United States Department of Justice (DOJ), SEC and other authorities involving historical Private Banking services provided on a cross-border basis to US persons. US authorities are investigating possible violations of US tax and securities laws. In particular, the DOJ is investigating whether US clients violated their US tax obligations and whether Credit Suisse and certain of its employees assisted such clients. The SEC is investigating whether certain of our relationship managers triggered obligations for Credit Suisse or the relationship managers in Switzerland to register with the SEC as a broker-dealer or investment advisor. A limited number of current or former employees have been indicted and one former employee pleaded guilty to conduct while employed at other financial institutions that did not involve Credit Suisse. Credit Suisse received a grand jury target letter from the DOJ. We understand that certain US authorities are also investigating other Swiss and non-US financial institutions. We have been conducting an internal investigation and are continuing to cooperate with the authorities both in the US and Switzerland to resolve this matter in a responsible manner that complies with our legal obligations.

LIBOR-related matters

Regulatory authorities in a number of jurisdictions, including the US, UK, EU and Switzerland, have for an extended period of time been conducting investigations into the setting of LIBOR and other reference rates with respect to a number of currencies, as well as the pricing of certain related derivatives.

These ongoing investigations have included information requests from regulators regarding LIBOR-setting practices and reviews of the activities of various financial institutions, including the Group. The Group, which is a member of three LIBOR rate-setting panels (US Dollar LIBOR, Swiss Franc LIBOR and Euro LIBOR), is cooperating fully with these investigations.

In particular, it has been reported that regulators are investigating whether financial institutions engaged in an effort to manipulate LIBOR, either individually or in concert with other institutions, in order to improve market perception of these institutions' financial health and/or to increase the value of their proprietary trading positions. In response to regulatory inquiries, Credit Suisse commissioned a review of these issues. To date, Credit Suisse has seen no evidence to suggest that it is likely to have any material exposure in connection with these issues.

In addition, members of the US Dollar LIBOR panel, including Credit Suisse, have been named in various civil lawsuits filed in the US.

UK Financial Services Authority matter

On October 25, 2011, the UK Financial Services Authority announced a settlement with Credit Suisse (UK) Limited (CSUK) in respect of findings as to the adequacy of systems and controls relating to the suitability of sales of non-principal protected products in 2007 to 2009. Under the settlement, CSUK was fined GBP 5.95 million and was required to conduct a review of sales of such products in the relevant period to determine suitability. This review has now been completed and the regulatory action against CSUK in respect of this matter has concluded.

¹ Deconsolidated under US GAAP as the Group is not the primary beneficiary. ² The Group holds a significant noncontrolling interest.

39 Subsidiary guarantee information

Certain wholly-owned finance subsidiaries of the Group, including Credit Suisse Group (Guernsey) I Limited and Credit Suisse Group (Guernsey) III Limited, each of which is a Guernsey incorporated non-cellular company limited by shares, may issue contingent convertible securities fully and unconditionally guaranteed by the Group. There are various legal and regulatory requirements, including the satisfaction of a solvency test under Guernsey law, applicable to some of the Group's subsidiaries that limit their ability to pay dividends or distributions and make loans and advances to the Group.

On March 26, 2007, the Group and the Bank issued full, unconditional and several guarantees of Credit Suisse (USA), Inc.'s outstanding SEC-registered debt securities. In accordance with the guarantees, if Credit Suisse (USA), Inc. fails to make any timely payment under the agreements governing such debt securities, the holders of the debt securities may demand payment from either the Group or the Bank, without first proceeding against Credit Suisse (USA), Inc. The guarantee from the Group is subordinated to senior liabilities. Credit Suisse (USA), Inc. is an indirect, wholly-owned subsidiary of the Group.

40 Credit Suisse Group parent company

- ▶ Refer to “Note 39 – Subsidiary guarantee information” for the condensed Credit Suisse Group parent company financial information.

41 Significant valuation and income recognition differences between US GAAP and Swiss GAAP banking law (true and fair view)

The Group’s consolidated financial statements have been prepared in accordance with US GAAP.

FINMA requires Swiss-domiciled banks which present their financial statements under either US GAAP or International Financial Reporting Standards (IFRS) to provide a narrative explanation of the major differences between Swiss GAAP banking law (true and fair view) and its primary accounting standard.

The principal provisions of the Banking Ordinance and the FINMA Circular 2008/2, “Accounting – banks”, governing financial reporting for banks (Swiss GAAP) differ in certain aspects from US GAAP. The following are the major differences:

- ▶ Refer to “Note 1 – Summary of significant accounting policies” for a detailed description of the Group’s accounting policies.

Scope of consolidation

Under US GAAP, the Group does not consolidate certain entities that issue redeemable preferred securities. Under Swiss GAAP, these entities would continue to be consolidated as the Group holds 100% of the voting rights.

Under Swiss GAAP, majority-owned subsidiaries that are not considered long-term investments or do not operate in the core business of the Group are either accounted for as financial investments or as equity method investments. US GAAP has no such exception relating to the consolidation of majority-owned subsidiaries.

Fair value option

Unlike US GAAP, Swiss GAAP generally does not allow the fair value option concept that creates an optional alternative measurement treatment for certain non-trading financial assets and liabilities, guarantees and commitments. The fair value option permits the use of fair value for initial and subsequent measurement with changes in fair value recorded in the consolidated statements of income.

For issued structured products that include own debt and meet certain restrictive conditions, fair value measurement is applied on a case-by-case basis. The related changes in fair value of both the embedded derivative and the host contract

are recorded in trading revenues, except for fair value adjustments relating to own credit that cannot be recognized in the consolidated statements of income.

Other issued structured products which are not in the scope of this interpretation or for which fair value accounting is not elected under Swiss GAAP but for which the fair value option is elected under US GAAP continue to be bifurcated for Swiss GAAP purposes. This means that the embedded derivative is carried at fair value and the host contract is accounted for at amortized cost.

Other non-trading assets measured at fair value

Under US GAAP, all of our mortgage servicing rights and most of our life settlement contracts are reported at fair value, with changes in value reported in the consolidated statements of operations.

Under Swiss GAAP, mortgage servicing rights and life settlement contracts are carried at the lower of cost or market.

Goodwill amortization

Under US GAAP, goodwill is not amortized but must be tested for impairment annually or more frequently if an event or change in circumstances indicates that the goodwill may be impaired.

Under Swiss GAAP, goodwill is amortized over its useful life, generally not exceeding five years, except for justified cases where a maximum useful life of up to 20 years is acceptable. In addition, goodwill is tested for impairment.

Intangible assets with indefinite lives

Under US GAAP, intangible assets with indefinite lives are not amortized but are tested for impairment annually or more frequently if an event or change in circumstances indicates that the asset may be impaired.

Under Swiss GAAP, intangible assets with indefinite lives are amortized over a useful life, up to a maximum of five years. In addition, these assets are tested for impairment.

Pensions and post-retirement benefits

Under US GAAP, the liability and related pension expense is determined based on the projected unit credit actuarial calculation of the benefit obligation.

Under Swiss GAAP, the liability and related pension expense is primarily determined based on the pension plan valuation in accordance with Swiss GAAP FER 26. A pension asset is recorded if a statutory overfunding of a pension plan leads to a future economic benefit, and a pension liability is recorded if a statutory underfunding of a pension plan leads to a future economic obligation. Pension expenses include the required contributions defined by Swiss law, any additional contribution mandated by the pension fund trustees and any change in value of the pension asset or liability between two measurement dates as determined on the basis of the annual year-end pension plan valuation.

Loan origination fees

US GAAP requires the deferral of certain fees received upfront in connection with the loan origination for loans not held under the fair value option.

Under Swiss GAAP, only upfront payments or fees that are considered interest-related components are deferred (e.g., premiums and discounts). Fees received from the borrower which are considered service-related fees such as commitment fees, structuring fees and arrangement fees are immediately recognized in commission income.

Sale of financial instruments held at amortized cost

Under US GAAP, the gain or loss on sale or early redemption of a financial instrument is immediately recognized in the consolidated statements of operations.

Under Swiss GAAP, the gain or loss on sale or early redemption of an interest-related financial instrument held at amortized cost is deferred over the remaining original term of the financial instrument.

Extinguishment of own debt

Under US GAAP, repurchased or reacquired own debt instruments are extinguished and gains or losses from extinguishment are immediately recognized in other income.

Under Swiss GAAP, repurchased own debt is only extinguished if the respective securities are legally extinguished. Gains or losses from extinguishment of own debt that was accounted for at amortized cost are deferred and amortized over the original term of the repurchased instruments. For reacquired own debt instruments that are not legally extinguished, the repurchased own debt instruments are either held as financial investments at the lower of cost or market or as trading assets at fair value. The carrying value of the repur-

chased instruments is offset against the respective liability of own debt instruments issued.

Real estate held for investment

Under US GAAP, real estate held for investment is valued at cost less accumulated depreciation and any impairment.

Under Swiss GAAP, real estate held for investment that the Group intends to hold permanently is also valued at cost less accumulated depreciation and any other-than-temporary impairment. If the Group does not intend to hold real estate permanently, it is carried at the lower of cost or market.

Sale and leaseback transactions

Under US GAAP, gains from the sale of property subject to a sale and leaseback agreement are deferred and amortized over the leaseback period.

Under Swiss GAAP, gains from the sale of property subject to a sale and leaseback agreement are only deferred if the provisions of the leaseback contract indicate that the leaseback is a capital lease; if the leaseback contract meets the requirements of an operating lease, such gains are immediately recognized upon sale of the property.

Investments in securities

Available-for-sale securities

Under US GAAP, available-for-sale securities are valued at fair value. Unrealized gains and losses due to fluctuations in fair value (including foreign exchange) are not recorded in the consolidated statements of operations but included net of tax in AOCI, which is part of total shareholders' equity. Declines in fair value below cost deemed to be other-than-temporary are recognized as impairments in the consolidated statements of operations, except for amounts relating to factors other than credit loss on debt securities with no intent or requirement to sell that continue to be included in AOCI. The new cost basis will not be changed for subsequent recoveries in fair value.

Under Swiss GAAP, available-for-sale securities are accounted for at the lower of cost or market with valuation reductions and recoveries due to market fluctuations recorded in other ordinary expenses and income, respectively. Foreign exchange gains and losses are recognized in net trading income.

Non-marketable equity securities

Under US GAAP, non-marketable equity securities are valued at cost less other-than-temporary impairment or at fair value.

Under Swiss GAAP, non-marketable equity securities are carried at the lower of cost or market.

Impairments on held-to-maturity securities

Under US GAAP, declines in fair value of held-to-maturity securities below cost deemed to be other-than-temporary are recognized as impairments in the consolidated statements of operations except for amounts relating to factors other than credit loss on debt securities held with no intent or requirement to sell that are included in AOCI. The impairment cannot be reversed in future periods.

Under Swiss GAAP, all impairments are recognized in the consolidated statements of income. Impairments recognized on held-to-maturity securities are reversed up to the amortized cost if the fair value of the instrument subsequently recovers. A reversal is recorded in the consolidated statements of income.

Trading positions

Under both US GAAP and Swiss GAAP, positions classified in the trading portfolio are valued at fair value. Under US GAAP, this classification is based on management's intent concerning the specific instrument, whereas under Swiss GAAP, the prevailing criteria is the active management of the specific instrument in the context of a documented trading strategy.

Derivatives used for cash flow hedges

Under US GAAP, the effective portion of a cash flow hedge is reported in AOCI.

Under Swiss GAAP, the effective portion of a cash flow hedge is recorded in the compensation account in other assets or other liabilities.

Security collateral received in securities lending transactions

Under US GAAP, security collateral received in securities lending transactions are recorded as assets and a corresponding liability to return the collateral is recognized.

Under Swiss GAAP, security collateral received and the obligation to return collateral of securities lending transactions are not recognized on the balance sheet.

Derecognition of financial instruments

Under US GAAP, financial instruments are only derecognized if the transaction meets certain criteria.

Under Swiss GAAP, a financial instrument is derecognized when the economic control has been transferred from the seller to the buyer.

Discontinued operations

Under US GAAP, the assets and liabilities of an operation held-for-sale are separated from the ordinary captions of the consolidated balance sheets and are reported as discontinued operations measured at the lower of the carrying value or fair value less cost to sell. Accordingly, income and expense from discontinued operations are reported in a separate line item of the consolidated statements of operations.

Under Swiss GAAP, these positions remain in their initial balance sheet captions until disposed of and continue to be valued according to the respective captions.

Extraordinary income and expenses

Unlike US GAAP, Swiss GAAP does report certain expenses or revenues as extraordinary. Extraordinary income and expenses are reported net of tax.

Reserves for general banking risks

US GAAP does not allow general unallocated provisions.

Under Swiss GAAP, reserves for general banking risks are recorded as a separate component between liabilities and shareholders' equity. Reserves for general banking risks are established or released through extraordinary expense and extraordinary income, respectively, or result from the reallocation of provisions which are no longer economically required.

Loan commitments

Under US GAAP, the Group includes unused credit facilities that can be revoked at its sole discretion upon notice to the client in loan commitments.

Under Swiss GAAP, credit facilities that can be revoked at the Group's sole discretion are only disclosed if the notice period exceeds six weeks.

42 Risk assessment

In accordance with the Swiss Code of Obligations the following disclosure provides information regarding the risk assessment process, which was in place for the reporting period and followed by the Board.

The primary objectives of risk management are to protect the financial strength and reputation of the Group, while ensuring that capital is well deployed to support business activities and grow shareholder value. The risk management organization reflects the specific nature of the various risks in order to ensure that risks are managed within set limits in a transparent and timely manner.

The Board is responsible for the strategic direction, supervision and control of the Group and for defining its overall tolerance for risk in the form of a risk appetite statement. The Board has delegated certain responsibilities regarding risk management and oversight to the Risk Committee, the Audit Committee and to the Executive Board.

The Board's Risk Committee is responsible for assisting the Board in fulfilling its oversight responsibilities by providing guidance regarding risk governance and the review and assessment of the risk appetite framework including capital adequacy, the major risk exposures and the approval of risk limits. In addition to its other responsibilities such as reviewing the quarterly and annual financial statements and the performance and effectiveness of internal and external auditors, the Audit Committee reviews management's report on internal control over financial reporting (SOX 404), the annual report on the internal control system (ICS) and the annual compliance report.

Within the Executive Board of the Group, the Chief Risk Officer (CRO) is responsible for providing risk management oversight

and for establishing an organizational basis to manage and report on all risk management matters. The Capital Allocation and Risk Management Committee (CARMC), the Risk Processes and Standards Committee and the Reputation Risk and Sustainability Committee have been established to assist the Executive Board, and certain responsibilities regarding risk management and oversight have been delegated to these committees. CARMC is comprised of at least five members of the Executive Board and senior management appointed by the CEO and operates in the position risk cycle for setting position risk standards and monitoring related limits, the finance and capital cycle for asset/liability management, funding, liquidity and capital matters, and the ICS cycle for operational risks, legal and compliance issues and internal control matters. CARMC may delegate its authority to set and approve certain limits for position risk, funding, liquidity and capital to the CRO or divisional risk management committees. The divisional risk management committees regularly review and discuss division-specific market and credit risk matters, operational risks, legal and compliance issues and internal control matters.

During the reporting period, the Board received the quarterly risk reports from the CRO and the annual ICS and compliance reports from the office of the General Counsel, which formed the basis of the Board's risk reviews. Additional risk information was provided at each meeting of the Board's Risk Committee and at most Board meetings. The Board, assisted by its Risk and Audit Committees, performed a systematic risk assessment in accordance with established policies and procedures.

Controls and procedures

Evaluation of disclosure controls and procedures

The Group has evaluated the effectiveness of the design and operation of its disclosure controls and procedures as of the end of the period covered by this report under the supervision and with the participation of management, including the Group CEO and Chief Financial Officer (CFO), pursuant to Rule 13(a)-15(a) under the Securities Exchange Act of 1934 (the Exchange Act). There are inherent limitations to the effectiveness of any system of controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective controls and procedures can only provide reasonable assurance of achieving their control objectives.

The CEO and CFO concluded that, as of December 31, 2012, the design and operation of the Group's disclosure controls and procedures were effective, in all material respects, to ensure that information required to be disclosed in reports filed and submitted under the Exchange Act is recorded, processed, summarized and reported as and when required.

Management report on internal control over financial reporting

The management of the Group is responsible for establishing and maintaining adequate internal control over financial reporting. The Group's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with US GAAP. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may deteriorate.

Management has made an evaluation and assessment of the Group's internal control over financial reporting as of December 31, 2012 using the criteria issued by the Committee of Sponsoring Organizations of the Treadway Commission in "Internal Control – Integrated Framework".

Based upon its review and evaluation, management, including the Group CEO and CFO, has concluded that the Group's internal control over financial reporting is effective as of December 31, 2012.

KPMG AG, the Group's independent auditors, have issued an unqualified opinion on the effectiveness of the Group's internal control over financial reporting as of December 31, 2012, as stated in their report, which follows.

Changes in internal control over financial reporting

There were no changes in the Group's internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect the Group's internal control over financial reporting.

Report of the Independent Registered Public Accounting Firm to the General Meeting of Shareholders of

Credit Suisse Group AG, Zurich

We have audited Credit Suisse Group AG and subsidiaries' (the "Group") internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Group's board of directors and management are responsible for maintaining effective internal control over financial reporting and the Group's management is responsible for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Group's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

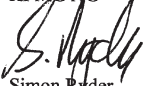

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

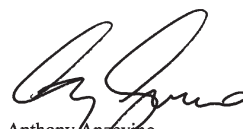

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Group maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) and Swiss Auditing Standards, the consolidated balance sheets of the Group as of December 31, 2012 and 2011, and the related consolidated statements of operations, changes in equity, comprehensive income and cash flows, and notes thereto, for each of the years in the three-year period ended December 31, 2012, and our report dated March 22, 2013 expressed an unqualified opinion on those consolidated financial statements.

Report of the Statutory Auditor on the Financial Statements to the General Meeting of Shareholder of

Credit Suisse Group AG, Zurich

As statutory auditor, we have audited the accompanying financial statements of Credit Suisse Group AG (the "Group"), which comprise the balance sheet, income statement and notes for the year ended December 31, 2012.

Board of Directors' Responsibility

The board of directors is responsible for the preparation of the financial statements in accordance with the requirements of Swiss law and the Group's articles of incorporation. This responsibility includes designing, implementing and maintaining an internal control system relevant to the preparation of financial statements that are free from material misstatement, whether due to fraud or error. The board of directors is further responsible for selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Swiss law and Swiss Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers the internal control system relevant to the entity's preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control system. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of accounting estimates made, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements for the year ended December 31, 2012 comply with Swiss law and the Group's articles of incorporation.

Financial Statements to the
General Meeting of Shareholder*

Report on Other Legal Requirements

We confirm that we meet the legal requirements on licensing according to the Auditor Oversight Act (AOA) (Switzerland) and independence (article 728 CO and article 11 AOA) and that there are no circumstances incompatible with our independence.

In accordance with article 728a paragraph 1 item 3 CO and Swiss Auditing Standard 890, we confirm that an internal control system exists, which has been designed for the preparation of financial statements according to the instructions of the board of directors.

We further confirm that the proposed appropriation of available earnings complies with Swiss law and the Group's articles of incorporation. We recommend that the financial statements submitted to you be approved.

Notes to the financial statements

1 Accounting principles

The financial statements of the Group Parent company are prepared in accordance with the regulations of the Swiss Code of Obligations and are stated in CHF. The financial year ends on December 31.

2 Contingent liabilities

| end of | 2012 | 2011 |
|---|--------|--------|
| CHF million | | |
| Aggregate indemnity liabilities, guarantees and other contingent liabilities (net of exposures recorded as liabilities) | 51,363 | 54,056 |
| of which have been entered into on behalf of subsidiaries | 51,363 | 54,056 |

The company belongs to the Swiss value-added tax group of Credit Suisse Group, and thus carries joint liability to the Swiss federal tax authority for value-added tax debts of the entire group.

3 Compensation to members of the Executive Board and the Board of Directors

As required by applicable Swiss law (Article 663b bis and Article 663c, paragraph 3 of the Swiss Code of Obligations), the following disclosure describes compensation paid to and equity holdings of the members of the Board of Directors (Board of Directors) and the members of the Executive Board as well as loans granted to this group of people and persons and companies related to them.

Executive Board compensation

Executive Board compensation for 2012

¹ Other benefits consist of housing allowances, lump sum expenses, child allowances and carried interest. ² Share awards carry the right to an annual payment equal to the dividend payable on each Group share. The dividend equivalents were paid in respect of awards granted in prior years. ³ During 2012, there were no payments made to Executive Board members for contractual agreements. ⁴ Does not include CHF 3.9 million of charitable contributions made by the Group for which the CEO and a former Executive Board member are able to make recommendations. ⁵ Of the 13 members, 5 left the Executive Board during 2012: Karl Landert and Antonio Quintella stepped down from the Executive Board effective April 30, 2012 and May 31, 2012, respectively, and Osama Abbasi, Walter Berchtold and Fawzi Kyriakos-Saad left the Executive Board effective November 30, 2012. The base salary and incentive compensation for these individuals has been pro rated accordingly. These individuals were paid incentive compensation in the form of unrestricted cash and STI awards for their performance in their respective roles on the Executive Board in 2012. ⁶ Includes pro rated unrestricted cash of CHF 10.2 million paid to the five individuals who left the Executive Board during 2012. ⁷ All short-term incentive awards for 2012 were granted as performance shares. The applicable Group share price for the performance share awards was CHF 24.62. ⁸ Long-term incentive awards vest over a five year period, payable on the third, fourth and fifth anniversaries of the grant date. The final value at vesting depends on the achievement of pre-defined performance criteria linked to the average relative total shareholder return and average return on equity. ⁹ CHF 1.87 million of this amount was granted as carried interest in 2012 (see below). In addition, in connection with his role at the time as CEO of the Asset Management division, in 2008 Mr. Shafir received a carried interest award in certain alternative investment funds. The value realized over time depends on the investment performance of the funds over their lifetime up to fifteen years. The initial value of the award is determined by making assumptions about the return that will be realized on the funds. The aggregate theoretical value of these awards was approximately USD 10 million assuming an estimated 9 percent return on all fund investments over their projected lifetime, and reducing this estimated return by 25 percent to reflect potential underperformance in some of the funds.

2012 total compensation of the CEO and highest paid Executive Board member

For CEO Brady Dougan, the Compensation Committee evaluated the performance of the Group as well as the performance of the Executive Board. In recommending the incentive compensation to the Board of Directors for Mr. Dougan, the Compensation Committee considered the improved financial position of the Group in 2012, reflected in an underlying pre-tax income of CHF 5.0 billion, more than double the CHF 2.4 billion in the prior year. In addition, the Compensation Committee considered the achievement of targets and the significant progress made in transitioning the business to the new regulatory and market environment and to meeting challenging new capital requirements, that came into effect in January 2013 with the implementation of Basel III in Switzerland. In particular, the Compensation Committee acknowledged that by year-end 2012 as compared to 2011, the Group reduced Basel III risk-weighted assets by CHF 55 billion to CHF 285 billion, reduced its balance sheet by CHF 125 billion, achieved a 9.0% Look-through Swiss Core Capital ratio and improved its leverage ratio (up to

5.8% from 4.6%). The Compensation Committee also recognized the steady progress made towards meeting the Group's challenging CHF 4.4 billion run-rate cost reduction target by year-end 2015, and the successful transformation of the Group's businesses, including the creation of an integrated Private Banking & Wealth Management division and the changes and realignment measures implemented within the Investment Banking business. Given the strong performance of Mr. Dougan during 2012 and his achievements in positioning the firm for the future, the Board of Directors decided upon the recommendation by the Compensation Committee to award Mr. Dougan unrestricted cash of CHF 0.5 million, an STI award of CHF 2.5 million and an LTI award of CHF 2.0 million, which were regarded as appropriate award levels in the current environment.

The highest paid member of the Executive Board in 2012 was Robert Shafir. For 2012, Mr. Shafir was awarded unrestricted cash of CHF 0.7 million, an STI award of CHF 3.5 million and an LTI award of CHF 2.8 million. Mr. Shafir's incentive compensation in 2012 was awarded in consideration of his continued strong performance. The Compensation Committee

noted that, in particular, Mr. Shafir had successfully repositioned the former Asset Management division while improving financial results through higher net revenues and lower total operating expenses. He also assumed the role of CEO for the Americas, in addition to his role as Head of the Asset Management division, after Mr. Antonio Quintella left the Executive Board in May 2012. In addition, for 2012 Mr. Shafir was granted a carried interest in certain alternative investment funds in the Asset Management business with a value of CHF 1.87 million. This award was granted to align Mr. Shafir with the overall special capital program where he is required to restructure the Asset Management business. Carried interest is a participation in the investment performance of a private equity or hedge fund portfolio, the value of which will vary significantly depending on the performance of the underlying portfolio.

Other aspects of Executive Board compensation

Charitable contributions

As in the prior three years, a portion of the Executive Board incentive compensation pool for 2012 was approved by the Compensation Committee to fund charitable contributions by the Group. The total amount approved for charitable contributions was CHF 3.9 million for 2012. The contributions will benefit eligible registered charities. The CEO and a former Executive Board

member are able to make recommendations in respect of the allocation of the 2012 contributions to various specific charities.

Minimum share ownership requirements

The Group applies minimum share ownership requirements for members of the Executive Board and members of the divisional and regional management committees as follows:

- CEO: 350,000 shares;
- Other Executive Board members: 150,000 shares;
- Executives responsible for Private Banking & Wealth Management and Investment Banking: 50,000 shares; and
- Executives responsible for Shared Services functions: 20,000 shares.

The thresholds include all Group shares held by or on behalf of these executive employees, including unvested share awards. All affected executive employees are restricted from selling shares (including vested share awards) until they meet the minimum share ownership requirements. The Group prohibits all employees from entering into transactions to hedge the value of unvested share awards. Pledging of unvested share awards by Executive Board members is also not permitted unless expressly approved by the Compensation Committee.

¹ Other benefits consist of housing allowances, lump sum expenses and child allowances. ² Share awards carry the right to an annual payment equal to the dividend of one Group share. The dividend equivalents were paid in respect of awards granted in prior years. ³ During 2011, there were no payments made to Executive Board members for contractual agreements. ⁴ Does not include CHF 13 million of charitable contributions made by the Group for which certain Executive Board members, including the CEO, were able to make recommendations. ⁵ As of December 31, 2011, no members of the Executive Board received unrestricted cash. ⁶ Includes CHF 22.8 million of performance share awards; the applicable Group share price was CHF 21.90. ⁷ The value of the 2011 Partner Asset Facility was the fair value as of the grant date of March 1, 2012.

Contract lengths, change of control and termination provisions

All members of the Executive Board have employment contracts with the Group. The contracts do not specify a contract length

and are valid until terminated. Members of the Executive Board are required by contract to give six months' notice of termination of employment. The Group must also give members of the Executive Board six months' notice of termination of employment.

There are no other contracts, agreements or arrangements with the members of the Executive Board that provide for payments or benefits in connection with termination of employment that are not generally available to other employees of the Group. For example, in the event of a termination of employment, pre-defined conditions apply to the balances of outstanding compensation awards, depending on whether the termination of employment was voluntary, involuntary or the result of a change in control.

In the case of a change in control, the treatment of outstanding awards for all employees, including Executive Board members, will be determined by the Compensation Committee or the Board of Directors. In the case of a change in control, there are no provisions in the employment contracts of Execu-

tive Board members that require the payment of any type of extraordinary benefits, including special severance awards.

In the event of the termination of the employment of an Executive Board member without cause, there are no pre-arranged contractual rights to a severance payment. Nonetheless, the amount and terms of a severance payment may be agreed between the Group and the respective Executive Board member.

Former Executive Board members

During 2012, five individuals left the Executive Board. As of December 31, 2012, all five individuals continued to be employed by the Group. Agreements were entered into with four of the individuals to terminate their employment during 2013.

¹ Includes shares that were initially granted as deferred compensation and have vested. ² Consists of options with an expiration date of January 22, 2013 and an exercise price of CHF 30.60. ³ In addition to the number of owned shares shown, the following Executive Board members held an aggregate number of 2,320 mandatory and contingent convertible securities (MACCS): Brady Dougan (1,336), Romeo Cerutti (60), Hans-Ulrich Meister (262), Robert Shafir (571), Eric Varvel (91); these securities are convertible into an aggregate number of 143,033 shares on March 29, 2013 at a conversion price of CHF 16.29, with settlement and delivery of shares in early April 2013. ⁴ Consists of 1,095 options with an expiration date of January 22, 2013 and an exercise price of CHF 30.60 and 13,865 options with an expiration date of December 3, 2012 and an exercise price of CHF 34.10.

Generally, former members of our most senior executive body who no longer provide services to the Group upon their request are still eligible to receive office infrastructure and secretarial support. These services are based on existing resources and are not used on a regular basis. Except as described above, no additional fees, severance payments or other forms of compensation were paid to former members of the Executive Board who no longer provide services to the Group or related parties during 2012.

Executive Board shareholdings and loans

Executive Board shareholdings

The shareholdings as disclosed in the table below include the holdings of the respective members of the Executive Board, their immediate family members and companies where they have a controlling interest. The unvested share-based awards do not include awards granted after December 31, 2012. The increase in the number of unvested share awards at the end of 2012 compared to 2011 was due to the decision by all the Executive Board members to convert into share-based awards all of their unvested cash-based Adjustable Performance Plan awards from 2010 and 2009, and the share-based awards granted in 2012 for 2011. The voluntary conversion option was offered to all employees holding cash Adjustable Performance Plan awards in the context of the capital strengthening measures announced in July 2012.

The value of share-based compensation awards granted to members of the Executive Board in prior years, but not yet fully vested, varies depending on the Group share price and other factors influencing the fair value of the award. The table "Executive Board holdings and values of deferred share-based awards by individual" shows the value of the unvested share-based compensation awards held by members of the Executive Board as of December 31, 2012. The aggregate cumulative value of these unvested share-based awards as of December 31, 2012 was 6% higher compared to the value of the awards as of their respective grant dates.

As a result of the conversion of the Adjustable Performance Plan cash awards to share awards during 2012, the remaining cash-based deferred compensation awards granted to certain Executive Board members in prior years are the 2008 Partner Asset Facility (PAF) and the 2011 Partner Asset Facility (PAF2) awards. The aggregate value of such cash-based awards at their grant dates was CHF 12.2 million compared to a value CHF 20.1 million as of December 31, 2012. The value of these awards varies depending upon the value of the underlying portfolios linked to the PAF and PAF2 awards and the length of the remaining deferral period.

Executive Board loans

A large majority of loans outstanding to members of the Executive Board are mortgages or loans against securities. Such loans are made on the same terms available to employees pursuant to widely available employee benefit plans. As of December 31, 2012, 2011 and 2010, outstanding loans to the members of the Executive Board amounted to CHF 8 million, CHF 22 million and CHF 18 million, respectively. The number of individuals with outstanding loans at the beginning and the end of 2012 was six and three, respectively, and the highest loan outstanding was CHF 4 million to Eric Varvel.

All mortgage loans to members of the Executive Board are granted either with variable or fixed interest rates over a certain period. Typically, fixed-rate mortgages are granted for periods of up to ten years. Interest rates applied are based on refinancing costs plus a margin and interest rates and other terms are consistent with those applicable to other employees. Loans against securities are granted at interest rates and on terms applicable to such loans granted to other employees. When granting a loan to these individuals, the same credit approval and risk assessment procedures apply as for loans to other employees. Unless otherwise noted, all loans to Executive Board members were made in the ordinary course of business and substantially on the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons and in consideration of the terms which apply to all Group employees, and did not involve more than the normal risk of collectability or present other unfavorable features.

Board of Directors compensation

Compensation to members of the Board of Directors is set in accordance with the Articles of Association, the Group's Organizational Guidelines and Regulations and the Compensation Committee Charter. The annual compensation paid to members of the Board of Directors is set by the Board of Directors based on the recommendation of the Compensation Committee. All members of the Board of Directors receive a base board fee plus a committee fee or an additional fee that reflects the respective Board of Directors member's role, time commitment and scope of responsibility on the Board of Directors. The full-time Chairman of the Board of Directors, the Vice-Chairman of the Board of Directors and the three committee chairmen assume the greatest responsibility and dedicate the most time in fulfilling their board duties. As such, these individuals receive a higher annual base board fee than other board members and may receive additional fees which vary according to their specific role. The base and committee fee amounts are set by the Board upon recommendation of the Compensation Committee for the 12-month period from

the current Annual General Meeting (AGM) to the following year's AGM. Fees paid to Board of Directors members are in the form of cash and Group shares, which are blocked from being sold for a period of four years. By compensating Board of Directors members to a significant degree in the form of blocked Group shares, we ensure alignment of their interests with the interests of our shareholders.

Members of the Board of Directors without designated leadership responsibilities (ten individuals) each received an

annual base board fee for 2012 of CHF 250,000 and an annual committee fee for serving on the Audit, Risk or Compensation Committees. The committee fees were CHF 150,000 for the Audit Committee, CHF 100,000 for the Risk Committee and CHF 100,000 for the Compensation Committee. Members of the Chairman's and Governance Committee do not receive a committee fee.

¹ Includes the additional fees for the full-time Chairman and the three committee chairmen as well as the additional fees paid to Noreen Doyle in 2012 as a non-executive director of two of the Group's UK subsidiaries, Credit Suisse International and Credit Suisse Securities Europe Limited. The additional fees of CHF 182,600 for Noreen Doyle corresponded to the annual fees of GBP 125,000 which Noreen Doyle received in 2012 as a non-executive director (annual fee of GBP 100,000) and audit committee chair (additional fee of GBP 25,000) of Credit Suisse International and Credit Suisse Securities Europe Limited. ² Other compensation for the Chairman included lump sum expenses, child and health care allowances and pension benefits. ³ The value of the Group shares is included in total compensation. Group shares are subject to a four-year blocking period. ⁴ The Chairman and the three committee chairmen received an annual base board fee paid in cash. They also received additional fees paid in cash and/or share awards as determined by the Board in the course of the regular compensation process. The additional fees awarded to these four individuals for 2012 were paid in Group shares (50%) and cash (50%). The applicable Group share price was CHF 24.62. ⁵ Except for the Chairman and the three committee chairmen, members of the Board were paid an annual base board fee and a committee fee for their respective committee membership in advance for the period from one AGM to the other, i.e., from April 26, 2012 to April 27, 2013. The annual committee fees are CHF 150,000 for the Audit Committee and CHF 100,000 for each of the Risk and Compensation Committees. For 2012, these total combined fees were paid in Group shares (50%) and cash (50%). The applicable Group share price as of the 2012 annual general meeting was CHF 22.16.

Compensation of the Chairman of the Board of Directors

The Chairman of the Board of Directors is paid a base board fee plus an additional fee, which is proposed by the Compensation Committee and approved by the Board of Directors. The additional fee awarded to the Chairman can vary from year to year, depending on Group and individual performance. The base board and the additional fee awarded to the Chairman reflect his full-time status and active role taken in shaping the Group's strategy, governing the Group's affairs and representing the Group vis-à-vis shareholders. The Chairman coordinates the work within the Board of Directors, works with the committee chairmen to coordinate the tasks of the committees and ensures that Board of Directors members are provided with sufficient information for performing their duties. In particular, the Chairman of the Board of Directors drives the Board of Directors agenda and key Board of Directors topics, especially regarding the strategic development of the Group, succession planning, structure and organization of the Group, as well as compensation and compensation structure, including the performance evaluation and compensation of the CEO and the Executive Board. He chairs the Board of Directors, the Chairman's and Governance Committee and the shareholder meetings, leads the Group's corporate governance and takes an active role in representing the Group to the key shareholders, investors, regulators and supervisors, industry associations and other stakeholders.

For 2012, Chairman Urs Rohner received total compensation of CHF 5.2 million, of which CHF 2.5 million was the base board fee, CHF 2.5 million was additional fees and CHF 0.2 million was other compensation, consisting mainly of pension-related benefits. Of the CHF 5.2 million, CHF 4.0 million was awarded in cash and CHF 1.2 million was awarded in Group shares, blocked for a period of four years. For the prior year, Urs Rohner received total compensation of CHF 4.3 million, for his successive roles as Vice-Chairman and Chairman, which he assumed at the AGM in April of 2011. The total compensation awarded to the Chairman for 2012 reflects the improved financial position of the Group and Urs Rohner's performance under difficult circumstances as evaluated by the Compensation Committee. In particular, it is in recognition of Mr. Rohner's leadership of the Board of Directors, his impact in closely steering and monitoring the strategic development of the Group, including the alignment of business structure and organization to the new regulatory requirements, as well as his active engagement with key stakeholders and regulators and representation of the Group in a variety of industry associations.

Compensation of the Vice-Chairman of the Board of Directors and the committee chairmen

Peter Brabeck-Letmathe, in the role of Vice-Chairman, received an annual base board fee of CHF 400,000 but no committee or additional fees. Aziz R.D. Syriani, Richard E. Thornburgh and John Tiner, each in the role of committee chairman, received an annual base board fee plus an additional fee, which reflects the greater responsibility and time commitment required to perform the role of a committee chairman. The annual base board fee for the chairmen of the Audit and Risk Committees for 2012 was CHF 400,000 and the annual base board fee for the chairman of the Compensation Committee was CHF 350,000. The base board fees for the committee chairmen are set by the Compensation Committee for the 12-month period from the current AGM to the following year's AGM. The additional fees awarded to the three committee chairmen may vary from year to year, according to their overall time commitment, and are determined and paid for the current year, in alignment with the annual variable compensation cycle. The additional fees paid to the Audit and Risk Committee chairmen, who also serve on other committees as regular members, reflect the additional time commitment required to serve as regular members on such committees, which they do not chair.

Former members of the Board of Directors

Three former members of the Board of Directors are eligible to receive office infrastructure and secretarial support. These services are based on existing resources and are not used on a regular basis. No additional fees, severance payments or other forms of compensation were paid to current or former members of the Board of Directors or related parties during 2012.

¹ Other compensation included lump sum expenses, child and health care allowances and pension benefits. ² The value of the Group shares is included in total compensation. Group shares are subject to a four-year blocking period. ³ Hans-Ulrich Doerig and Urs Rohner served in the roles of full-time Chairman and full-time Vice Chairman, respectively, from January 2011 until the AGM in April 2011. As of the 2011 AGM, Urs Rohner succeeded Hans-Ulrich Doerig in the role of full-time Chairman. ⁴ Members of the Board with functional duties received an annual base board fee paid in cash. In addition, they received variable compensation paid in cash and/or share awards as determined by the Board in the course of the regular management compensation process. Generally, variable compensation awarded for 2011 was paid in Group shares (50%) and cash (50%). The applicable Group share price was CHF 21.90. ⁵ Members of the Board without functional duties were paid an annual base board fee and a committee fee for their respective committee membership in advance for the period from one AGM to the other, i.e., from April 29, 2011 to April 27, 2012. The annual committee fees are CHF 150,000 for the Audit Committee and CHF 100,000 for the Risk and Compensation Committees. For 2011, these total combined fees were paid in Group shares (50%) and cash (50%). The applicable Group share price as of the 2011 AGM was CHF 39.31. ⁶ In July 2011, Noreen Doyle was appointed as a non-executive director and audit committee chair of the Group's UK subsidiaries Credit Suisse International and Credit Suisse Securities Europe Limited and was paid a total of GBP 50,000 in fees. ⁷ Peter F. Weibel was the Chairman of the Audit Committee until the 2011 annual general meeting, at which time John Tiner took over the role.

Board of Directors shareholdings and loans

Board of Directors shareholdings

The shareholdings as disclosed in the following table include the holdings of the respective members of the Board of Directors, their immediate family members and companies in which they have a controlling interest. As of December 31, 2012, there were no Board of Directors members with outstanding options.

Board of Directors shareholdings by individual

| in | 2012 | 2011 |
|--|-------------------------------|-------------------------------|
| December 31 (shares) ¹ | | |
| Urs Rohner | 244,422 | 221,056 |
| Peter Brabeck-Letmathe | 120,999 | 108,820 |
| Jassim Bin Hamad J.J. Al Thani | 11,790 | 5,696 |
| Robert H. Benmosche | 30,872 | 23,304 |
| Iris Bohnet | 7,898 | – |
| Noreen Doyle | 41,324 | 31,837 |

| Richard E. Thornburgh | 218,456 | 283,600 |
| John Tiner | 24,799 | 8,625 |
| Total | 1,295,277 ² | 1,203,550 ³ |

¹ Includes Group shares that are subject to a blocking period of up to four years. ² In addition to the shareholdings shown, the following Board members held an aggregate number of 1,519 mandatory and contingent convertible securities (MACCS): Urs Rohner (395), Peter Brabeck-Letmathe (175), Jassim Bin Hamad J.J. Al Thani (17), Iris Bohnet (11), Walter Kielholz (431), Andreas Koopmann (44), Aziz Syriani (113), Richard Thornburgh (297) and John Tiner (36); these securities are convertible into an aggregate number of 93,247 shares on March 29, 2013 at a conversion price of CHF 16.29, with settlement and delivery of shares in early April 2013. ³ Excludes 72,232 shares held by Peter Weibel as of December 31, 2011, who stepped down from the Board as of April 27, 2011.

Board of Directors loans

A large majority of loans outstanding to members of the Board of Directors are mortgages or loans against securities. Such loans are made to Board members on the same terms available to third-party clients. As of December 31, 2012, 2011 and 2010, outstanding loans to the members of the Board of Directors amounted to CHF 40 million, CHF 34 million and CHF 35 million, respectively.

Members of the Board of Directors with loans do not benefit from employee conditions, but are subject to conditions applied to clients with a comparable credit standing. Members of the Board of Directors who were previously employees of the Group may still have outstanding loans, which were extended to them at the time that employee conditions applied to them. Unless otherwise noted, all loans to members of the Board of Directors were made in the ordinary course of business and substantially on the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons, and did not involve more than the normal risk of collectability or present other unfavorable features. In addition to the loans listed below, the Group or any of its banking subsidiaries may enter into financing and other banking agreements with companies in which current members of the Board have a significant influence as defined by the US Securities and Exchange Commission, such as holding executive and/or board level roles in these companies. Unless otherwise noted, loans extended by the Group to such companies are also made in the ordinary course of business and at prevailing market conditions. As of December 31, 2012, 2011 and 2010, there was no loan exposure to such related party companies that was not made in the ordinary course of business and at prevailing market conditions.

Board of Directors loans by individual

8 General reserves

The increase of CHF 3,010 million in general reserves represents the proceeds received in connection with the issuance of mandatory and contingent convertible securities in July 2012. In early April 2013, after the conversion of the securities and the issuance of the shares, the amount of CHF 3,010

million will be transferred to share capital (CHF 8 million / par value for newly issued shares) and to reserves from capital contributions (CHF 3,002 million / capital surplus for newly issued shares).

9 Risk assessment

- ▶ Refer to "Note 42 – Risk assessment" in V – Consolidated financial statements – Credit Suisse Group for further information on the company's risk assessment in accordance with the Swiss Code of Obligations.

Proposed appropriation of retained earnings and capital distribution

Proposed appropriation of retained earnings

| | |
|--|--------------|
| end of | 2012 |
| Retained earnings (CHF million) | |
| Retained earnings brought forward | 4,342 |
| Net income | 324 |
| Retained earnings available for appropriation | 4,666 |
| To be carried forward | 4,666 |
| Total | 4,666 |

Proposed distribution against reserves from capital contributions

| | |
|--|---------------|
| end of | 2012 |
| Reserves from capital contributions (CHF million) | |
| Balance at beginning of year | 13,679 |
| Capital surplus for issued shares | 1,926 |
| Capital distribution | (944) |
| Balance at end of year | 14,661 |
| Distribution of CHF 0.10 per registered share in cash ¹ | (154) |
| Distribution of new shares (stock dividend) ^{1, 2} | (2) |
| Balance after distribution | 14,505 |

¹ 1,320.7 million registered shares – net of own shares held by the company – at December 31, 2012 plus 18.8 million shares issued for share-based compensation in early 2013 and 200.0 million shares to be issued in connection with the conversion of mandatory and contingent convertible securities on March 29, 2013 with settlement and delivery of shares in early April 2013. The number of registered shares eligible for distribution may change due to the issuance of new registered shares and activities in own shares. ² Represents transfer of CHF 0.04 par value per newly issued share to share capital.

**Confirmation to the Board of Directors relating to the Conditional Increase of Share Capital of
 Credit Suisse Group AG, Zurich**

We have been engaged to audit the issuance of new shares during the period from 1 January 2012 to 31 December 2012 according to the resolutions of the general meeting of shareholders from 29 September 2000 in accordance with article 653f para. 1 CO.

It is the responsibility of the board of directors to issue the new shares in accordance with the provisions in the articles of incorporation. Our responsibility is to audit whether the issuance has been conducted in accordance with the provisions of Swiss law and the articles of incorporation. We confirm that we meet the licensing and independence requirements as stipulated by Swiss law.

Our audit was conducted in accordance with Swiss Auditing Standards, which require that an audit be planned and performed to obtain reasonable assurance that material breaches of Swiss law or the articles of incorporation are recognized. We have performed the procedures deemed necessary under the circumstances and believe that our audit provides a reasonable basis for our opinion.

In our opinion, the issuance of 38,812,660 registered shares with nominal value of CHF 0.04 each and a total nominal value of CHF 1,552,506.40 complies with Swiss law and the articles of incorporation.

Report of the Independent Registered Public Accounting Firm

Credit Suisse AG, Zurich

We have audited the accompanying consolidated balance sheets of Credit Suisse AG and subsidiaries (the “Bank”) as of December 31, 2012 and 2011, and the related consolidated statements of operations, changes in equity, comprehensive income and cash flows, and notes thereto, for each of the years in the three-year period ended December 31, 2012. These consolidated financial statements are the responsibility of the Bank's management and the Board of Directors. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States) and Swiss Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Bank as of December 31, 2012 and 2011, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Bank's internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 22, 2013 expressed an unqualified opinion on the effectiveness of the Bank's internal control over financial reporting.

¹ Reflects Credit Suisse Group shares which are reported as treasury shares. Those shares are held to economically hedge share award obligations. ² Distributions to owners in funds include the return of original capital invested and any related dividends. ³ Transactions with and without ownership changes related to fund activity are all displayed under "not changing ownership". ⁴ Net income/(loss) attributable to noncontrolling interests excludes CHF 11 million due to redeemable noncontrolling interests. ⁵ Includes a net tax benefit of CHF 30 million from the excess fair value of shares delivered over recognized compensation expense. ⁶ Represents the accrued portion of the redemption value of redeemable noncontrolling interests in Credit Suisse Hedging-Griffo Investimentos S.A. Refer to "Note 30 – Guarantees and commitments" for further information. ⁷ Represents a capital contribution from Credit Suisse Group AG to Credit Suisse AG following the issuance of mandatory and contingent convertible securities in July 2012 by the Group.

Notes to the consolidated financial statements

1 Summary of significant accounting policies

The accompanying consolidated financial statements of Credit Suisse AG (the Bank), a Swiss bank subsidiary of Credit Suisse Group AG (the Group), are prepared in accordance with accounting principles generally accepted in the US (US GAAP) and are stated in Swiss francs (CHF). The financial year for the Bank ends on December 31. Prior year's consolidated financial statements have been restated to reflect the Clariden Leu integration on April 2, 2012. In addition, certain reclassifications have been made to the prior year's consolidated financial statements to conform to the current year's presentation and had no impact on net income/(loss) or total shareholder's equity.

In preparing the consolidated financial statements, management is required to make estimates and assumptions including, but not limited to, the fair value measurements of certain financial assets and liabilities, the allowance for loan losses, the evaluation of variable interest entities (VIEs), the impairment of assets other than loans, recognition of deferred tax assets, tax uncertainties, pension liabilities, as well as various contingencies. These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the dates of the consolidated balance sheets and the reported amounts of revenues and expenses during the reporting period. While management evaluates its estimates and assumptions on an ongoing basis, actual results could differ materially from management's estimates. Market conditions may increase the risk and complexity of the judgments applied in these estimates.

- ▶ Refer to "Note 1 – Summary of significant accounting policies" in V – Consolidated financial statements – Credit Suisse Group for a summary of significant accounting policies, with the exception of the following accounting policies.

Pensions and other post-retirement benefits

Credit Suisse sponsors a Group defined benefit pension plan in Switzerland that covers eligible employees of the Bank domiciled in Switzerland. The Bank also has single-employer defined benefit pension plans and defined contribution pension plans in Switzerland and other countries around the world.

For the Bank's participation in the Group defined benefit pension plan, no retirement benefit obligation is recognized in the consolidated balance sheets of the Bank and defined contribution accounting is applied, as the Bank is not the sponsoring entity of the Group plan.

For single-employer defined benefit plans, the Bank uses the projected unit credit actuarial method to determine the present value of its projected benefit obligations (PBO) and

the current and past service costs or credits related to its defined benefit and other post-retirement benefit plans. The measurement date used to perform the actuarial valuation is December 31.

Certain key assumptions are used in performing the actuarial valuations. These assumptions must be made concerning the future events that will determine the amount and timing of the benefit payments and thus require significant judgment and estimates by Bank management. For example, assumptions have to be made with regard to discount rates, expected return on plan assets and salary increases.

The assumed discount rates reflect the rates at which the pension benefits could be effectively settled. These rates are determined based on yields of high-quality corporate bonds currently available and are expected to be available during the period to maturity of the pension benefits. In countries where no deep market in high-quality corporate bonds exists, the estimate is based on governmental bonds adjusted to include a risk premium reflecting the additional risk for corporate bonds.

The expected long-term rate of return on plan assets is determined on a plan-by-plan basis, taking into account asset allocation, historical rate of return, benchmark indices for similar-type pension plan assets, long-term expectations of future returns and investment strategy.

Health care cost trend rates are determined by reviewing external data and the Bank's own historical trends for health care costs. Salary increases are determined by reviewing external data and considering internal projections.

The funded status of the Bank's defined benefit post-retirement and pension plans is recognized in the consolidated balance sheets.

Actuarial gains and losses in excess of 10% of the greater of the PBO or the market value of plan assets and unrecognized prior service costs or credits are amortized to net periodic pension and other post-retirement cost on a straight-line basis over the average remaining service life of active employees expected to receive benefits.

The Bank records pension expense for defined contribution plans when the employee renders service to the company, essentially coinciding with the cash contributions to the plans.

Own shares, own bonds and financial instruments on Group shares

The Bank's shares are wholly-owned by Credit Suisse Group AG and are not subject to trading. The Bank may buy and sell Credit Suisse Group AG shares (Group shares), own bonds and financial instruments on Group shares within its normal trading and

market-making activities. In addition, the Bank may hold Group shares to economically hedge commitments arising from employee share-based compensation awards. Group shares are reported as trading assets, unless those shares are held to economically hedge share award obligations. Hedging shares are reported as treasury shares, resulting in a reduction to total shareholder's equity. Financial instruments on Group shares are

recorded as assets or liabilities and carried at fair value. Dividends received on Group shares and unrealized and realized gains and losses on Group shares are recorded according to the classification of the shares as trading assets or treasury shares. Purchases of bonds originally issued by the Bank are recorded as an extinguishment of debt.

2 Recently issued accounting standards

- ▶ Refer to "Note 2 – Recently issued accounting standards" in V – Consolidated financial statements – Credit Suisse Group for recently adopted accounting standards and standards to be adopted in future periods.

The impact on the Bank's and Group's financial position, results of operations or cash flows was or is expected to be identical.

3 Business developments and subsequent events

- ▶ Refer to "Note 3 – Business developments and subsequent events" in V – Consolidated financial statements – Credit Suisse Group for further information. The acquisition of Neue Aargauer Bank AG and the capital raising through mandatory and contingent convertible securities were not relevant to the Bank.

4 Discontinued operations

- ▶ Refer to "Note 4 – Discontinued operations" in V – Consolidated financial statements – Credit Suisse Group for further information.

5 Segment information

For purpose of presentation of reportable segments, the Bank has included accounts of affiliate entities wholly owned by the same parent which are managed together with the operating segments of the Bank. These affiliate entities include certain bank and trust affiliates, primarily managed by Private Banking & Wealth Management. Income from continuing operations before taxes of these non-consolidated affiliate entities included in the segment presentation for the years ended December 31, 2012, 2011 and 2010 was CHF 237 million, CHF 259 million and CHF 277 million, respectively. For the

same periods, net revenues of these non-consolidated affiliate entities included in the segment presentation were CHF 684 million, CHF 707 million and CHF 711 million, respectively, and total assets of these non-consolidated affiliate entities included in the segment presentation as of December 31, 2012 and 2011, were CHF 25.8 billion and CHF 24.9 billion, respectively.

► Refer to “Note 5 – Segment information” in V – Consolidated financial statements – Credit Suisse Group for further information.

| Adjustments ^{1, 3} | (3,804) | 133 | (1,200) |
| Income from continuing operations before taxes | 1,973 | 2,501 | 6,536 |

¹ Adjustments represent certain consolidating entries and balances, including those relating to items that are managed but are not legally owned by the Bank and vice-versa, and certain expenses that were not allocated to the segments. ² Includes noncontrolling interest-related revenues of CHF 365 million, CHF 900 million and CHF 775 million in 2012, 2011 and 2010, respectively, from the consolidation of certain private equity funds and other entities in which the Bank does not have a significant economic interest (SEI) in such revenues. ³ Includes noncontrolling interest income of CHF 307 million, CHF 816 million and CHF 702 million in 2012, 2011 and 2010, respectively, from the consolidation of certain private equity funds and other entities in which the Bank does not have an SEI in such income.

Total assets

| end of | 2012 | 2011 |
|-------------------------------------|----------------|------------------|
| Total assets (CHF million) | | |
| Private Banking & Wealth Management | 407,329 | 392,201 |
| Investment Banking | 658,622 | 790,167 |
| Adjustments ¹ | (157,791) | (147,581) |
| Total assets | 908,160 | 1,034,787 |

¹ Adjustments mainly represent certain consolidating entries and balances, including those relating to items that are managed but are not legally owned by the Bank and vice-versa and certain expenses that were not allocated to the segments.

Net revenues and income/(loss) from continuing operations before taxes by geographic location

| in | 2012 | 2011 | 2010 |
|--|---------------|---------------|---------------|
| Net revenues (CHF million) | | | |
| Switzerland | 8,017 | 7,792 | 8,533 |
| EMEA | 3,498 | 6,450 | 7,367 |
| Americas | 10,194 | 9,246 | 12,718 |
| Asia Pacific | 1,824 | 1,699 | 1,915 |
| Net revenues | 23,533 | 25,187 | 30,533 |
| Income/(loss) from continuing operations before taxes (CHF million) | | | |
| Switzerland | 1,170 | (176) | 1,117 |
| EMEA | (1,428) | 1,275 | 1,452 |
| Americas | 3,068 | 2,357 | 4,806 |
| Asia Pacific | (837) | (955) | (839) |
| Income from continuing operations before taxes | 1,973 | 2,501 | 6,536 |

The designation of net revenues and income/(loss) before taxes is based upon the location of the office recording the transactions. This presentation does not reflect the way the Bank is managed.

Total assets by geographic location

| end of | 2012 | 2011 |
|-----------------------------------|----------------|------------------|
| Total assets (CHF million) | | |
| Switzerland | 183,735 | 201,360 |
| EMEA | 221,476 | 276,674 |
| Americas | 422,181 | 469,191 |
| Asia Pacific | 80,768 | 87,562 |
| Total assets | 908,160 | 1,034,787 |

The designation of total assets by region is based upon customer domicile.

Gross unrealized losses on investment securities and the related fair value

| end of | Less than 12 months | | 12 months or more | | Total | |
|---|---------------------|-------------------------------|-------------------|-------------------------------|---------------|-------------------------------|
| | Fair value | Gross unrealized losses | Fair value | Gross unrealized losses | Fair value | Gross unrealized losses |
| 2011 (CHF million) | | | | | | |
| Debt securities issued by foreign governments | 8 | 1 | 0 | 0 | 8 | 1 |
| Debt securities available-for-sale | 8 | 1 | 0 | 0 | 8 | 1 |

There were no unrealized losses on investment securities in 2012. No significant impairment was recorded as the Bank does not intend to sell the investments, nor is it more likely

than not that the Bank will be required to sell the investments before the recovery of their amortized cost bases, which may be maturity.

Proceeds from sales, realized gains and realized losses from available-for-sale securities

| Realized losses | (2) | (22) | (11) | 0 | 0 | 0 |

Amortized cost, fair value and average yield of debt securities

| end of | Debt securities available-for-sale | | |
|------------------------------|------------------------------------|--------------|----------------------|
| | Amortized cost | Fair value | Average yield (in %) |
| 2012 (CHF million) | | | |
| Due within 1 year | 948 | 958 | 2.53 |
| Due from 1 to 5 years | 703 | 754 | 3.76 |
| Due from 5 to 10 years | 87 | 87 | 0.00 |
| Due after 10 years | 38 | 45 | 5.32 |
| Total debt securities | 1,776 | 1,844 | 2.97 |

16 Other investments

| end of | 2012 | 2011 |
|---|---------------|---------------|
| Other investments (CHF million) | | |
| Equity method investments | 2,147 | 2,508 |
| Non-marketable equity securities ¹ | 7,156 | 7,654 |
| Real estate held for investment | 641 | 731 |
| Life finance instruments ² | 1,872 | 2,022 |
| Total other investments | 11,816 | 12,915 |

¹ Includes private equity, hedge funds and restricted stock investments as well as certain investments in non-marketable mutual funds for which the Bank has neither significant influence nor control over the investee. ² Includes life settlement contracts at investment method and SPIA contracts.

Non-marketable equity securities include investments in entities that regularly calculate net asset value per share or its equivalent.

► Refer to "Note 32 – Financial instruments" for further information on such investments.

Substantially all non-marketable equity securities are carried at fair value. There were no non-marketable equity securities not carried at fair value that have been in a continuous unrealized loss position.

The Bank performs a regular impairment analysis of real estate portfolios. The carrying values of the impaired proper-

ties were written down to their respective fair values, establishing new cost bases. For these properties, the fair values were measured based on either discounted cash flow analyses or external market appraisals. Impairments of CHF 13 million and CHF 3 million were recorded in 2012 and 2011, respectively. No impairments were recorded in 2010.

Accumulated depreciation related to real estate held for investment amounted to CHF 280 million, CHF 278 million and CHF 273 million for 2012, 2011 and 2010, respectively.

► Refer to "Note 17 – Other investments" in V – Consolidated financial statements – Credit Suisse Group for further information.

| Gross impaired loans | 520 | 220 | 740 | 13 | 619 | 632 | 1,372 |

As of December 31, 2012 and 2011, loans held-to-maturity carried at amortized cost did not include any subprime residential mortgages. Accordingly, impaired loans did not include any subprime residential mortgages.

In 2012 and 2011, the number of troubled debt restructurings and related financial effects and the number of

defaults and related carrying values of loans, which had been restructured within the previous 12 months, were not material. As of December 31, 2012 and 2011, the Bank did not have any material commitments to lend additional funds to debtors whose loan terms have been modified in troubled debt restructurings.

| Income tax expense | 478 | 459 | 1,307 |

Foreign tax rate differential

2012 included a foreign tax expense of CHF 312 million in respect of profits earned in higher tax jurisdictions, mainly Brazil and the US, partially offset by foreign tax rate differential related to profits earned in lower tax jurisdictions, mainly Guernsey and Bahamas. The total foreign tax expense of CHF 514 million is not only impacted by the foreign tax expense based on statutory tax rates but also by tax impacts related to additional reconciling items explained below.

2011 included a foreign tax rate benefit of CHF 11 million in respect of profits earned in lower tax jurisdictions, mainly Guernsey and Bahamas, partially offset by foreign tax rate differential related to profits in higher tax jurisdictions, mainly Brazil and the US. The total foreign tax expense of CHF 745 million is not only impacted by the foreign tax rate expense but also by tax impacts related to additional reconciling items explained below.

Other non-deductible expenses

2012 and 2011 included non-deductible interest expenses of CHF 259 million and CHF 240 million, respectively, non-taxable offshore expenses of CHF 8 million and CHF 80 million, respectively, non-deductible bank levy costs and other non-deductible compensation expenses of CHF 57 million and CHF 49 million, respectively, and other various smaller non-deductible expenses.

Lower taxed income

2012 and 2011 included a tax benefit of CHF 29 million and CHF 52 million, respectively, related to exempt offshore income, CHF 40 million and CHF 47 million, respectively, in respect to non-taxable dividend income and CHF 11 million and CHF 47 million, respectively, related to non-taxable foreign exchange gains. In addition, 2012 and 2011 included tax benefits of CHF 100 million and CHF 42 million, respectively, related to tax credits and CHF 48 million and CHF 40 million, respectively, related to non-taxable life insurance income. 2012 also included a CHF 114 million Swiss income tax benefit as a result of foreign branch earnings beneficially impacting the earnings mix. The remaining balance included various smaller items, amongst others related to permanent tax benefits from tax deductible goodwill amortization and tax holidays.

2011 and 2010 included a tax benefit of CHF 116 million and CHF 130 million, respectively, in respect of the reversal of the deferred tax liability recorded to cover estimated recapture of loss deductions arising from foreign branches of the Bank.

2010 included a tax benefit of CHF 380 million in respect of a legal entity merger that reflected regulatory concerns about complex holding structures.

Changes in tax law and rates

2012 and 2011 included a tax expense of CHF 182 million and CHF 170 million, respectively, caused by the reduction of deferred tax assets mainly due to the impact of the change in UK corporation tax.

Changes in deferred tax valuation allowance

2012 included an increase to the valuation allowance of CHF 834 million in respect of five of the Bank's operating entities, three in Europe and two in Asia, mainly relating to deferred tax assets on current year tax losses and pre-existing loss carry-forwards. 2011 included an increase to the valuation allowance of CHF 428 million in respect of three of the Bank's operating entities, two in the UK and one in Asia, mainly relating to deferred tax assets on tax loss carry-forwards. 2010 included an increase to the valuation allowance of CHF 193 million in respect of one of the Bank's operating entities in the UK relating to deferred tax assets on tax loss carry-forwards.

2012, 2011 and 2010 also included a tax benefit of CHF 820 million, CHF 7 million and CHF 199 million, respectively, resulting from the release of valuation allowances on deferred tax assets for one of the Bank's operating entities in the US.

Other

2012 included a tax benefit of CHF 48 million relating to the re-assessment of deferred tax assets in Switzerland reflecting changes in forecasted future profitability related to such pre-existing deferred tax assets. 2012 also included a benefit of CHF 70 million relating to return to accrual adjustments following the close of a tax audit cycle and the impact of the closure of an advanced pricing agreement.

2011 included a tax benefit of CHF 261 million relating to the increase of deferred tax assets in two of the Bank's operating entities, one in Switzerland (CHF 129 million) and one in the US (CHF 132 million). The increase is related to the re-measurement of existing deferred tax assets on net operating losses due to changes in the mix of the sources of income and related tax rates that these net operating losses are expected to be applied to.

2012, 2011 and 2010 included an amount of CHF 43 million, CHF 125 million and CHF 301 million, respectively, relating to the release of tax contingency accruals following the favorable resolution of tax matters.

As of December 31, 2012, the Bank had accumulated undistributed earnings from foreign subsidiaries of CHF 6.8 billion. No deferred tax liability was recorded in respect of those amounts as these earnings are considered indefinitely rein-

vested. It is not practicable to estimate the amount of unrecognized deferred tax liabilities for these undistributed foreign earnings.

Details of the tax effect of temporary differences

| end of | 2012 | 2011 |
|---|----------------|----------------|
| Tax effect of temporary differences (CHF million) | | |
| Compensation and benefits | 2,279 | 2,172 |
| Loans | 441 | 392 |
| Investment securities | 1,818 | 1,480 |
| Provisions | 1,760 | 1,943 |
| Business combinations | 0 | 101 |
| Derivatives | 343 | 385 |
| Real estate | 242 | 212 |
| Net operating loss carry-forwards | 5,177 | 7,291 |
| Other | 204 | 174 |
| Gross deferred tax assets before valuation allowance | 12,264 | 14,150 |
| Less valuation allowance | (2,550) | (2,689) |
| Gross deferred tax assets net of valuation allowance | 9,714 | 11,461 |
| Compensation and benefits | (164) | (129) |
| Loans | (162) | (147) |
| Investment securities | (1,354) | (1,199) |
| Provisions | (402) | (378) |
| Business combinations | (20) | (227) |
| Derivatives | (295) | (392) |
| Leasing | (40) | (58) |
| Real estate | (78) | (82) |
| Other | (208) | (288) |
| Gross deferred tax liabilities | (2,723) | (2,900) |
| Net deferred tax assets | 6,991 | 8,561 |

The decrease in net deferred tax assets from 2011 to 2012 of CHF 1,570 million was primarily due to the recognition of a valuation allowance against deferred tax assets, mainly in the UK and Asia, of CHF 215 million, and taxable gains on transfers of assets within the consolidated Bank for which associated tax charges of CHF 1,511 million have been deferred as other assets in accordance with ASC 810-10-45-8 (Consolidation – other presentation matters, formerly Accounting Research Bulletin 51). The deferral will be amortized over a period of up to 15 years in line with Accounting Standards Codification 810-10-45-8 principles and will be matched by future tax deductions. In addition, the decrease reflected a write-down of CHF 182 million as a result of changes to corporation tax rates in the UK and Japan and foreign exchange

translation losses of CHF 213 million, which are included within currency translation adjustments recorded in accumulated other comprehensive income/(loss) (AOCI). These decreases were partially offset by an increase in net deferred tax asset balances following a re-measurement of deferred tax balances in Switzerland and the US of CHF 529 million. The remaining movement, an increase of net deferred tax assets of CHF 22 million, mainly represents the impact of temporary differences and taxable income in 2012.

Due to uncertainty concerning its ability to generate the necessary amount and mix of taxable income in future periods, the Bank recorded a valuation allowance against deferred tax assets in the amount of CHF 2.6 billion as of December 31, 2012 compared to CHF 2.7 billion as of December 31, 2011.

Amounts and expiration dates of net operating loss carry-forwards

| end of 2012 | Total |
|--|---------------|
| Net operating loss carry-forwards (CHF million) | |
| Due to expire within 1 year | 29 |
| Due to expire within 2 to 5 years | 10,637 |
| Due to expire within 6 to 10 years | 1,981 |
| Due to expire within 11 to 20 years | 2,759 |
| Amount due to expire | 15,406 |
| Amount not due to expire | 11,778 |
| Total net operating loss carry-forwards | 27,184 |

Movements in the valuation allowance

| in | 2012 | 2011 | 2010 |
|---|--------------|--------------|--------------|
| Movements in the valuation allowance (CHF million) | | | |
| Balance at beginning of period | 2,689 | 2,262 | 2,794 |
| Net changes | (139) | 427 | (532) |
| Balance at end of period | 2,550 | 2,689 | 2,262 |

Tax benefits associated with share-based compensation

| in | 2012 | 2011 | 2010 |
|--|------|-------|------|
| Tax benefits associated with share-based compensation (CHF million) | | | |
| Tax benefits recorded in the consolidated statements of operations | 596 | 464 | 536 |
| Windfall tax benefits/(shortfall tax charges) recorded in additional paid-in capital | 30 | (277) | 615 |
| Tax benefits in respect of tax on dividend equivalent payments | 12 | 1 | 26 |

- Refer to "Note 26 – Employee deferred compensation" for further information on share-based compensation.

Windfall deductions and dividend equivalents aggregating CHF 0.9 billion and CHF 1.1 billion for 2012 and 2011, respec-

tively, did not result in a reduction of income taxes payable because certain entities were in a net operating loss position. When the income tax benefit of these deductions is realized, an estimated CHF 192 million tax benefit will be recorded in additional paid-in capital.

Uncertain tax positions

Reconciliation of the beginning and ending amount of gross unrecognized tax benefits

| in | 2012 | 2011 | 2010 |
|---|------------|------------|------------|
| Movements in gross unrecognized tax benefits (CHF million) | | | |
| Balance at beginning of period | 370 | 578 | 944 |

| Decreases in unrecognized tax benefits as a result of tax positions taken during a prior period | (58) | (177) | (286) |
| Increases in unrecognized tax benefits as a result of tax positions taken during the current period | 38 | 29 | 37 |
| Decreases in unrecognized tax benefits relating to settlements with tax authorities | (4) | (65) | (12) |
| Reductions to unrecognized tax benefits as a result of a lapse of the applicable statute of limitations | (43) | (19) | (88) |
| Other (including foreign currency translation) | 80 | (30) | (70) |
| Balance at end of period | 416 | 370 | 578 |
| of which, if recognized, would affect the effective tax rate | 410 | 364 | 553 |

Interest and penalties

| in | 2012 | 2011 | 2010 |
|--|------|------|------|
| Interest and penalties (CHF million) | | | |
| Interest and penalties recognized in the consolidated statements of operations | (13) | (19) | (42) |
| Interest and penalties recognized in the consolidated balance sheets | 64 | 82 | 206 |

Interest and penalties are reported as tax expense. The Bank is currently subject to ongoing tax audits and inquiries with the tax authorities in a number of jurisdictions, including the US, the UK and Switzerland. Although the timing of the completion of these audits is uncertain, it is reasonably possible that some of these audits and inquiries will be resolved within 12 months of the reporting date.

It is reasonably possible that there will be a decrease of between zero and CHF 4 million in unrecognized tax benefits within 12 months of the reporting date.

The Bank remains open to examination from federal, state, provincial or similar local jurisdictions from the following years onward in these major countries: Switzerland – 2009; the UK – 2006; the US – 2006; Japan – 2005; and the Netherlands – 2005.

► Refer to "Note 26 – Tax" in V – Consolidated financial statements – Credit Suisse Group for further information.

26 Employee deferred compensation

Deferred compensation for employees

- Refer to "Note 27 – Employee deferred compensation" in V – Consolidated financial statements – Credit Suisse Group for further information.

The following tables show the compensation expense for deferred compensation awards granted in 2012 and prior

years that was recognized in the consolidated statements of operations during 2012, 2011 and 2010, the total shares delivered, the estimated unrecognized compensation expense for deferred compensation awards granted in 2012 and prior years outstanding as of December 31, 2012 and the remaining requisite service period over which the estimated unrecognized compensation expense will be recognized.

Deferred compensation expense

Does not include the estimated unrecognized compensation expense relating to grants made in 2013 for 2012.

Share awards

On January 17, 2013, the Bank granted 37.8 million share awards with a total value of CHF 947 million. The estimated unrecognized compensation expense of CHF 932 million was determined based on the fair value of the award on the grant date, including the current estimate of future forfeitures, but excluding the share awards that have been reallocated to Plus Bond awards after the grant date, and will be recognized over the three-year vesting period, subject to early retirement rules. On January 19, 2012 and January 20, 2011, the Bank granted

19.7 million and 34.0 million share awards with a total value of CHF 432 million and CHF 1,408 million, respectively, equivalent to the Group's closing share price on the grant date.

On January 17, 2013, the Bank granted 0.1 million blocked shares with a total value of CHF 3 million that vested immediately upon grant, have no future service requirements and were attributed to services performed in 2012. On January 19, 2012 and January 20, 2011, the Bank granted 0.4 million and 0.7 million blocked shares with a total value of CHF 9 million and CHF 30 million, respectively.

Performance share awards

On January 17, 2013, the Bank granted 26.0 million performance share awards with a total value of CHF 651 million. The estimated unrecognized compensation expense of CHF 668 million was determined based on the fair value of the award at

the grant date, including the current estimated outcome of the relevant performance criteria and estimated future forfeitures, and will be recognized over the three-year vesting period. On January 19, 2012, the Bank granted 23.2 million performance share awards with a total value of CHF 509 million.

2011 Partner Asset Facility

In January 2012, the Bank awarded 2011 Partner Asset Facility (PAF2) units with a fair value of CHF 497 million and the associated compensation expenses were fully expensed in the first quarter of 2012 as the awards were fully vested as of March 31, 2012.

Adjustable Performance Plan Awards

On January 20, 2011, the Bank granted Adjustable Performance Plan cash awards with a total value of CHF 1,099 million.

In 2012, the Bank executed a voluntary exchange offer, under which employees had the right to voluntarily convert all

or a portion of their respective unvested Adjustable Performance Plan cash awards into Adjustable Performance Plan share awards. Adjustable Performance Plan holders elected to convert CHF 479 million of their Adjustable Performance Plan cash awards into the new Adjustable Performance Plan share awards during the election period, which represented an approximate conversion rate of 50%.

Upon conversion, CHF 435 million of the liability related to Adjustable Performance Plan cash awards that were converted into the Adjustable Performance Plan share awards were reclassified to total shareholder's equity.

Share options

There were no options granted during 2012, 2011 and 2010. As of December 31, 2012, there was no aggregate intrinsic value of options outstanding or exercisable, no total intrinsic value of options exercised and the weighted-average remaining contractual term of options was 0.2 years. As of the exer-

cise date, the total intrinsic value of options exercised during 2011 and 2010 was CHF 1 million and CHF 8 million, respectively. There was no cash received from option exercises in 2012. Cash received from option exercises during 2011 and 2010 was CHF 2 million and CHF 32 million, respectively. In January 2013, 4.7 million options expired.

¹ The number of individuals with outstanding loans at the beginning and end of the year was six and three, respectively. ² The number of individuals with outstanding loans at the beginning and end of the year was six and five, respectively.

Liabilities due to own pension funds

Liabilities due to the Bank's own pension funds as of December 31, 2012 and 2011 of CHF 2,804 million and CHF 2,263 million, respectively, were reflected in various liability accounts in the Bank's consolidated balance sheets.

28 Pension and other post-retirement benefits

Pension plans

The Bank participates in a defined benefit pension plan sponsored by the Group and has single-employer defined benefit pension plans, defined contribution pension plans and other post-retirement defined benefit plans. The Bank's principal plans are located in Switzerland, the US and the UK.

Group pension plan

The Bank covers pension requirements for its employees in Switzerland by participating in a defined benefit pension plan sponsored by the Group (Group plan). The plan provides benefits in the event of retirement, death and disability. Various legal entities within the Group participate in the plan, which is set up as an independent trust domiciled in Zurich. On January 1, 2010, in addition to the annuity section (defined benefit), a new savings section (defined contribution) was introduced in the Swiss main plan and a partial changeover from the annuity section to the savings section has been processed. Furthermore, on December 20, 2011, the Group announced the complete changeover to the savings section of the plan and the discontinuance of the annuity section, effective as of January 1, 2013. In accordance with US GAAP, the Group accounts for the Group plan as a single-employer defined benefit pension plan, for both the annuity section and the savings section, and uses the projected unit credit actuarial method to determine the net periodic pension expense, the PBO and the accumulated benefit obligation (ABO). The Bank accounts for the defined benefit pension plan sponsored by the Group as a Group pension plan because other legal entities within the Group also participate in the plan and the assets contributed by the Bank are not segregated into a separate account or restricted to provide benefits only to employees of the Bank. The assets contributed by the Bank are commingled with the assets contributed by the other legal entities of the Group and can be used to provide benefits to any employee of any participating legal entity. The Bank's contributions to the Group plan comprise 95% of the total assets contributed to the Group plan by all participating legal entities on an annual basis.

The Bank accounts for the Group plan on a defined contribution basis whereby it only recognizes the amounts required to be contributed to the Group plan during the period as net periodic pension expense and only recognizes a liability for any contributions due and unpaid. No other expenses or balance

sheet amounts related to the Group plan were recognized by the Bank. In the annuity section of the plan, the Bank's contributions were determined using a predetermined formula based on each employee's salary level, age and funding level and amount to at least 200% of each employee's contribution. In the savings section of the plan, the Bank's contribution varies between 7.5% and 25% of the pensionable salary depending on the employees' age.

During 2012, 2011 and 2010, the Bank contributed and recognized as expense CHF 458 million, CHF 645 million and CHF 653 million to the Group plan, respectively. The Bank expects to contribute CHF 403 million to the Group plan during 2013. If the Bank had accounted for the Group plan as a single-employer defined benefit plan, the net periodic pension expense recognized by the Bank during 2012, 2011 and 2010 would have been lower by CHF 197 million, CHF 476 million and CHF 472 million, respectively, and the Bank would have recognized CHF 88 million, CHF 96 million and CHF 98 million, respectively, as amortization of actuarial losses and prior service cost for the Group plan.

As of December 31, 2012 and 2011, the ABO of the Group plan was CHF 13.8 billion and CHF 13.5 billion, the PBO was CHF 14.3 billion and CHF 13.9 billion and the fair value of plan assets was CHF 14.3 billion and CHF 13.6 billion, respectively. As of December 31, 2012 and 2011, the Group plan was overfunded on an ABO basis by CHF 519 million and CHF 137 million. On a PBO basis, the Group plan was overfunded by CHF 44 million as of December 31, 2012 and underfunded by CHF 340 million as of December 31, 2011. If the Bank had accounted for the Group plan as a defined benefit pension plan, the Bank would have had to recognize the funded status of the Group plan on a PBO basis of CHF 42 million as an asset as of December 31, 2012 and CHF 323 million as a liability as of December 31, 2011 in the consolidated balance sheets.

If the Bank had accounted for the Group plan as a defined benefit plan, the Bank would have used the assumptions made by the Group for the calculation of the expense and liability associated with the Group plan.

- Refer to "Note 29 – Pension and other post-retirement benefits" in V – Consolidated financial statements – Credit Suisse Group for information on assumptions made by the Group for Switzerland.

International pension plans

Various pension plans cover the Bank's employees outside of Switzerland, including both single-employer defined benefit and defined contribution pension plans. These plans provide defined benefits in the event of retirement, death, disability or employment termination. Retirement benefits under the plans depend on age, contributions and salary. The Bank's funding policy with respect to these plans is consistent with local government and tax requirements. The assumptions used are derived based on local economic conditions.

Other post-retirement defined benefit plans

In the US, the Bank sponsors post-retirement defined benefit plans, that provide health and welfare benefits for certain retired employees. In exchange for the current services pro-

vided by the employee, the Bank promises to provide health and welfare benefits after the employee retires. The Bank's obligation for that compensation is incurred as employees render the services necessary to earn their post-retirement benefits.

Pension costs

The net periodic pension cost for defined benefit pension and other post-retirement defined benefit plans is the cost of the respective plan for a period during which an employee renders services. The actual amount to be recognized is determined using an actuarial formula which considers, among other factors, current service cost, interest cost, expected return on plan assets and the amortization of both prior service cost/(credit) and actuarial losses/(gains) recognized in AOCI.

Components of total pension costs

| | International single-employer defined benefit pension plans | | | Other post- retirement defined benefit plans | | |
|--|--|-----------|-----------|--|-----------|-----------|
| in | 2012 | 2011 | 2010 | 2012 | 2011 | 2010 |
| Total pension costs (CHF million) | | | | | | |
| Service costs on benefit obligation | 30 | 33 | 30 | 1 | 0 | 1 |
| Interest costs on benefit obligation | 127 | 123 | 134 | 8 | 7 | 9 |
| Expected return on plan assets | (164) | (160) | (163) | 0 | 0 | 0 |
| Amortization of recognized prior service cost/(credit) | (1) | 0 | 1 | (2) | (2) | (2) |
| Amortization of recognized actuarial losses/(gains) | 74 | 51 | 36 | 13 | 9 | 6 |
| Net periodic pension costs | 66 | 47 | 38 | 20 | 14 | 14 |
| Settlement losses/(gains) | 0 | 0 | (2) | 0 | 0 | 0 |
| Total pension costs | 66 | 47 | 36 | 20 | 14 | 14 |

Total pension costs reflected in compensation and benefits – other for 2012, 2011 and 2010 were CHF 86 million, CHF 61 million and CHF 50 million, respectively.

The discontinuance of a Japanese plan in 2009 resulted in a gain of CHF 2 million in 2010 from the related settlement of the obligation.

Benefit obligation

The following table shows the changes in the PBO, the fair value of plan assets and the amounts recognized in the consolidated balance sheets for the international single-employer defined benefit pension plans and other post-retirement defined benefit plans and as well as the ABO for the defined benefit pension plans.

Obligations and funded status of the plans

| | International single-employer defined benefit pension plans | | Other post- retirement defined benefit plans | |

| ABO (CHF million) ² | | | | |
| End of the measurement period | 2,714 | 2,584 | 0 | 0 |

¹ Including estimated future salary increases. ² Exclusive of estimated future salary increases.

The total net amount recognized in other assets – other and other liabilities – other in the consolidated balance sheets as of December 31, 2012 and 2011 was an underfunding of CHF 60 million and CHF 263 million, respectively.

In 2012 and 2011, the Bank made contributions of CHF 158 million and CHF 33 million, respectively, to the international single-employer defined benefit pension plans. In 2013, the Bank expects to contribute CHF 47 million to the international single-employer defined benefit pension plans

and CHF 8 million to other post-retirement defined benefit plans.

PBO or ABO in excess of plan assets

The following table discloses the aggregate PBO and ABO, as well as the aggregate fair value of plan assets for those plans with PBO in excess of plan assets and those plans with ABO in excess of plan assets as of December 31, 2012 and 2011, respectively.

Defined benefit pension plans in which PBO or ABO were in excess of plan assets

| | PBO exceeds fair value of plan assets ¹ | | ABO exceeds fair value of plan assets ¹ | |
|---------------------------|--|-------|--|-------|
| December 31 | 2012 | 2011 | 2012 | 2011 |
| CHF million | | | | |
| PBO | 1,400 | 1,340 | 1,382 | 1,326 |
| ABO | 1,364 | 1,304 | 1,354 | 1,296 |
| Fair value of plan assets | 825 | 753 | 810 | 741 |

¹ Includes only those defined benefit pension plans where the PBO/ABO exceeded the fair value of plan assets.

Amount recognized in AOCI and other comprehensive income

The following table discloses the actuarial gains/(losses) and prior service credit/(cost) which were recorded in AOCI and subsequently recognized as components of net periodic pension cost.

Amounts recognized in AOCI, net of tax

| | International single-employer defined benefit pension plans | | Other post- retirement defined benefit plans | | Total | |
|---|--|--------------|--|-------------|--------------|--------------|
| end of | 2012 | 2011 | 2012 | 2011 | 2012 | 2011 |
| Amounts recognized in AOCI (CHF million) | | | | | | |

Assumptions

Weighted-average assumptions used to determine net periodic pension cost and benefit obligation

| | International single-employer defined benefit pension plans | | | Other post- retirement defined benefit plans | | |
|--|--|------|------|--|------|------|
| December 31 | 2012 | 2011 | 2010 | 2012 | 2011 | 2010 |
| Net benefit pension cost (%) | | | | | | |
| Discount rate | 4.8 | 5.5 | 6.0 | 4.7 | 5.5 | 6.1 |
| Salary increases | 4.0 | 4.2 | 4.3 | — | — | — |
| Expected long-term rate of return on plan assets | 6.4 | 7.3 | 7.2 | — | — | — |
| Benefit obligation (%) | | | | | | |
| Discount rate | 4.5 | 4.8 | 5.5 | 4.3 | 4.7 | 5.5 |
| Salary increases | 4.0 | 4.0 | 4.2 | — | — | — |

Health care cost assumptions

The health care cost trend is used to determine the appropriate other post-retirement defined benefit costs. In determining those costs, an annual weighted-average rate of 9.00% for 2012 and 2011 and 9.75% for 2010 was assumed in the cost of covered health care benefits. As of December 31, 2012, the rate is assumed to decrease gradually to 5% by 2020 and remain at that level thereafter. As of December 31, 2012, 2011 and 2010, a 1% increase in the health care cost trend rate assumption would have resulted in an increase in post-retirement expenses of CHF 1.4 million, CHF 1.3 million and CHF 1.5 million, and an increase in accumulated post-retirement defined benefit obligation of CHF 27 million, CHF 23 million and CHF 26 million, respectively. A 1% decrease in the health care cost trend assumption would result in a decrease in post-retirement expenses of CHF 1.1 million, CHF 1.1 million and CHF 1.2 million, and a decrease in post-retirement

defined benefit obligation of CHF 22 million, CHF 19 million and CHF 21 million as of December 31, 2012, 2011 and 2010.

Plan assets and investment strategy

- Refer to "Note 29 – Pension and other post-retirement benefits" in V – Consolidated financial statements – Credit Suisse Group for further information.

As of December 31, 2012 and 2011, no Group debt or equity securities were included in plan assets for the international single-employer defined benefit pension plans.

Fair value of plan assets

The following tables present the plan assets measured at fair value on a recurring basis as of December 31, 2012 and 2011, for the Bank's defined benefits plans.

Plan assets measured at fair value on a recurring basis

| Estimated future benefit payments (CHF million) | | |
| 2013 | 55 | 8 |
| 2014 | 64 | 9 |
| 2015 | 73 | 9 |
| 2016 | 75 | 10 |
| 2017 | 87 | 11 |
| For five years thereafter | 582 | 57 |

Defined contribution pension plans

The Bank contributes to various defined contribution pension plans primarily in the US and the UK as well as other countries throughout the world. During 2012, 2011, and 2010, the

Bank contributed to these plans and recognized as expense CHF 219 million, CHF 244 million and CHF 263 million, respectively.

29 Derivatives and hedging activities

- ▶ Refer to “Note 30 – Derivatives and hedging activities” in V – Consolidated financial statements – Credit Suisse Group for further information.

Hedge accounting**Cash flow hedges**

As of the end of 2012, the maximum length of time over which the Bank hedged its exposure to the variability in future cash

flows for forecasted transactions, excluding those forecasted transactions related to the payment of variable interest on existing financial instruments, was eight months.

The net loss associated with cash flow hedges expected to be reclassified from AOCI within the next 12 months was CHF 7 million.

¹ Included in other revenues.

The Bank includes all derivative instruments not included in hedge accounting relationships in its trading activities.

- Refer to "Note 8 – Trading revenues" for gains and losses on trading activities by product type.

Disclosures relating to contingent credit risk

- Refer to “Note 30 – Derivatives and hedging activities” in V – Consolidated financial statements – Credit Suisse Group for further information.

The following table provides the Bank’s current net exposure from contingent credit risk relating to derivative contracts with bilateral counterparties and special purpose entities (SPEs) that include credit support agreements, the related collateral posted and the additional collateral required in a one-notch and a two-notch downgrade event, respectively. The table also

includes derivative contracts with contingent credit risk features without credit support agreements that have accelerated termination event conditions. The current net exposure for derivative contracts with bilateral counterparties and contracts with accelerated termination event conditions is the aggregate fair value of derivative instruments that were in a net liability position. For SPEs, the current net exposure is the contractual amount that is used to determine the collateral payable in the event of a downgrade. The contractual amount could include both the NRV and a percentage of the notional value of the derivative.

Contingent credit risk

| end of | Bilateral counterparties | Special purpose entities | Accelerated terminations | Total |
|---|--------------------------|--------------------------|--------------------------|-------------|
| 2012 (CHF billion) | | | | |
| Current net exposure | 15.3 | 1.4 | 0.6 | 17.3 |

| Additional collateral required in a one-notch downgrade event | 0.2 | 0.5 | 0.0 | 0.7 |
| Additional collateral required in a two-notch downgrade event | 0.4 | 1.5 | 0.5 | 2.4 |
| 2011 (CHF billion) | | | | |
| Current net exposure | 17.0 | 2.0 | 0.7 | 19.7 |
| Collateral posted | 14.8 | 1.8 | – | 16.6 |
| Additional collateral required in a one-notch downgrade event | 0.2 | 1.6 | 0.0 | 1.8 |
| Additional collateral required in a two-notch downgrade event | 0.4 | 3.0 | 0.5 | 3.9 |

Credit derivatives

Credit protection sold/purchased

The following tables do not include all credit derivatives and differ from the credit derivatives in the “Fair value of derivative instruments” table. This is due to the exclusion of certain credit derivative instruments under US GAAP, which defines a credit derivative as a derivative instrument (a) in which one or more of its underlyings are related to the credit risk of a specified entity (or a group of entities) or an index based on the credit risk of a group of entities and (b) that exposes the seller

to potential loss from credit risk-related events specified in the contract.

Certain cash collateralized debt obligations (CDOs) and other instruments were excluded as they do not fall within the scope of US GAAP rules. Total return swaps (TRS) of CHF 6.0 billion and CHF 4.8 billion as of December 31, 2012 and 2011, respectively, were also excluded because a TRS does not expose the seller to potential loss from credit risk-related events specified in the contract. A TRS only provides protection against a loss in asset value and not against additional amounts as a result of specific credit events.

| Total guarantees | 55,181 | 17,012 | 7,961 | 8,514 | 88,668 | 86,987 | 3,773 | 23,042 |

¹ Total net amount is computed as the gross amount less any participations. ² Excludes derivative contracts with certain active commercial and investment banks and certain other counterparties, as such contracts can be cash settled and the Bank had no basis to conclude it was probable that the counterparties held, at inception, the underlying instruments. ³ Collateral for derivatives accounted for as guarantees is not considered significant.

Deposit-taking banks and securities dealers in Switzerland and certain other European countries are required to ensure the payout of privileged deposits in case of specified restrictions or compulsory liquidation of a deposit-taking bank. In Switzerland, deposit-taking banks and securities dealers jointly guarantee an amount of up to CHF 6 billion. Upon occurrence of a payout event triggered by a specified restriction of business imposed by the Swiss Financial Market Supervisory Authority (FINMA) or by the compulsory liquidation of another deposit-taking bank, the Bank's contribution will be calculated based on its share of privileged deposits in proportion to total privileged deposits. Based on FINMA's estimate for the Bank, the Bank's share in the deposit insurance guarantee program for the period July 1, 2012 to June 30, 2013 is CHF 0.6 billion. These deposit insurance guarantees were reflected in other guarantees.

PAF2 transaction

The Bank's results are impacted by the risk of counterparty defaults and the potential for changes in counterparty credit spreads related to derivative trading activities of the Bank. In the first quarter of 2012, the Bank entered into the PAF2 transaction to hedge the counterparty credit risk of a referenced portfolio of derivatives and their credit spread volatility. The hedge covers the approximately USD 12 billion notional amount of expected positive exposure from counterparties of

the Bank, and is addressed in three layers: (i) first loss (USD 0.5 billion), (ii) mezzanine (USD 0.8 billion) and (iii) senior (USD 11 billion). The first loss element is retained by the Bank and actively managed through normal credit procedures. The mezzanine layer was hedged by transferring the risk of default and counterparty credit spread movements to eligible employees in the form of PAF2 awards, as part of their deferred compensation granted in the annual compensation process.

The model used to value the PAF2 awards is the standard Gaussian copula valuation model used for synthetic CDO trades with adjustments necessary to incorporate the specific nature of the PAF2 transaction. The key model inputs are notional value, correlation assumption, credit spreads, liquidity and recovery rates of the portfolio, the Bank's own credit spread and the maturity of the trade. In the model, the credit spreads of the counterparties determine the respective probability of default. Such probability is used to compute the expected value of the cash flows contingent on survival and on default of the counterparties in the reference portfolio. The credit spreads are sourced using observable data from CDS on the specific reference entity. Where a specific reference entity curve does not exist for a reference name in the portfolio, a proxy curve is used. The expected value of the counterparty exposure on default determines the equivalent notional

value for the given name. This is computed from the effective positive exposure which is the weighted average over time of the expected exposure used by the Bank for counterparty risk management. As of December 31, 2012, the carrying value of the PAF2 awards was CHF 625 million. The amount of the PAF2 awards compensation expense for the year ended December 31, 2012 was CHF 645 million and is included in the amount reflected in the "Deferred compensation expense" table in Note 26 – Employee deferred compensation, which includes deferred compensation expense for a smaller plan unrelated to the hedging aspects of this transaction.

The Bank has purchased protection on the senior layer to hedge against the potential for future counterparty credit spread volatility. This was executed through a CDS, accounted for at fair value, with a third-party entity. The value of the senior layer is calculated using the same model as for the PAF2 awards. As of December 31, 2012, the CDS had a positive replacement value of CHF 8 million and was reflected in credit derivatives in the "Fair value of derivative instruments" table in Note 30 – Derivatives and hedging activities. The Bank also has a credit support facility with this entity that allows the Bank to provide credit support in connection with other assets that are commonly financed through the issuance of commercial paper (CP) and, in connection with the CDS, to provide immediately available funding to this entity in certain circumstances. Among others, such circumstances include: (i) a disruption of the CP market such that the entity cannot issue or roll a CP to fund the CDS payment or repay a maturing CP; (ii) the interest payable on the CP exceeds certain thresholds and the Bank instructed the entity to draw on the facility instead of issuing a CP; (iii) a CP was issued by the entity to fund a CDS payment and subsequently the short-term rating of the facility provider is downgraded; or (iv) to repay any outstanding CP at the maturity date of the facility. Any funded amount may be settled by the assign-

ment of the rights and obligations of the CDS to the Bank. The credit support facility is accounted for on an accrual basis and is reflected in credit guarantees and similar instruments in the "Guarantees" table. As of December 31, 2012, the carrying value of the credit support facility included in this table was CHF 7 million. The transaction overall is a four-year transaction, but can be extended to nine years. The Bank has the right to terminate the third-party transaction for certain reasons, including certain regulatory developments.

In December 2012, the Basel Committee on Banking Supervision (BCBS) published updated regulatory guidance that make the PAF2 transaction as currently structured ineligible for counterparty credit spread hedging under the Basel III framework. As a result of this new guidance, the Group now has the right to exercise the regulatory call to restructure or terminate the CDS and the credit support facility layer at par and terminate the mezzanine layer at fair value. The Group is evaluating restructuring the transaction in order for the PAF2 transaction as a whole to remain an eligible counterparty credit spread hedge under Basel III, or alternatively, the Group may decide to terminate the transaction in its entirety.

Representations and warranties on residential mortgage loans sold

In connection with Investment Banking's sale of US residential mortgage loans, the Bank has provided certain representations and warranties relating to the loans sold.

The following tables present the total amount of residential mortgage loans sold during the period from January 1, 2004 to December 31, 2012 by counterparty type and the development of outstanding repurchase claims and provisions for outstanding repurchase claims during the period from January 1, 2012 to December 31, 2012, including realized losses from the repurchase of residential mortgage loans sold.

Residential mortgage loans sold

Residential mortgage loans sold from January 1, 2004 to December 31, 2012 (USD billion)

| | |
|----------------------------------|--------------------|
| Government-sponsored enterprises | 8.2 |
| Private investors ¹ | 22.6 |
| Non-agency securitizations | 130.1 ² |
| Total | 160.9 |

¹ Primarily banks. ² The outstanding balance of residential mortgage loans sold was USD 27.6 billion as of December 31, 2012. The difference of the total balance of mortgage loans sold and the outstanding balance as of December 31, 2012 was attributable to borrower payments of USD 85.4 billion and losses of USD 17.1 billion due to loan defaults.

Sale-leaseback transactions in 2012

In the first quarter of 2012, the Bank sold the office complex of its European headquarters at One Cabot Street in London to OCS Investment S.à.r.l. and leased back this property under an operating lease arrangement for 22 years, with two options to extend the lease by five years each. OCS Investment S.à.r.l. is a company wholly-owned by the Qatar Investment Authority, which is a minority shareholder of the Group.

In the fourth quarter of 2012, the Bank sold the Uetlihof office complex in Zurich, the Bank's principal office building worldwide, to Norges Bank Investment Management and leased back this property under an operating lease arrangement for 25 years, with the option to extend the lease by up to 15 years. Norges Bank Investment Management was acting as the buyer on behalf of the Norwegian Government Pension Fund Global, which is a minority shareholder of the Group.

During 2012, the Bank entered into several smaller sale-leaseback transactions in respect of own property, which were all recognized as operating lease arrangements with lease terms of between five and ten years. Total contractual rental expenses under these leases will amount to CHF 41 million.

Other commitments

| end of | Maturity less than 1 year | Maturity between 1 to 3 years | Maturity between 3 to 5 years | Maturity greater than 5 years | Total gross amount | Total net amount ¹ | Collateral received |

¹ Total net amount is computed as the gross amount less any participations. ² Included CHF 136,669 million and CHF 134,901 million of unused credit limits as of December 31, 2012 and 2011, respectively, which were revocable at the Bank's sole discretion upon notice to the client.

In November 2007, Banco de Investimentos Credit Suisse (Brasil) S.A., a wholly owned subsidiary of the Bank, acquired a majority interest (50% plus one share) in Credit Suisse Hedging-Griffo Investimentos S.A. (Hedging-Griffo) and entered into option arrangements in respect of the remaining equity interests in Hedging-Griffo. In the second quarter of

2012, the Bank acquired the remaining equity interests in Hedging-Griffo as contemplated under the existing option arrangements at a final purchase price of BRL 1,248 million (CHF 584 million), gaining full control and ownership of Hedging-Griffo.

31 Transfers of financial assets and variable interest entities

Transfers of financial assets

Securitizations

- ▶ Refer to "Note 32 – Transfers of financial assets and variable interest entities" in V – Credit Suisse Group – Consolidated financial statements for further information.

The following table provides the gains or losses and proceeds from the transfer of assets relating to 2012, 2011 and 2010 securitizations of financial assets that qualify for sale accounting and subsequent derecognition, along with the cash flows between the Bank and the SPEs used in any securitizations in which the Bank still has continuing involvement, regardless of when the securitization occurred.

Securitizations

| in | 2012 | 2011 | 2010 |
|--|--------|--------|---------|
| Gains and cash flows (CHF million) | | | |
| CMBS | | | |
| Net gain ¹ | 56 | 6 | 13 |
| Proceeds from transfer of assets | 6,156 | 974 | 523 |
| Servicing fees | 0 | 1 | 1 |
| Cash received on interests that continue to be held | 57 | 205 | 150 |
| RMBS | | | |
| Net gain ¹ | 3 | 65 | 214 |
| Proceeds from transfer of assets | 15,143 | 30,695 | 52,308 |
| Purchases of previously transferred financial assets or their underlying collateral | (25) | (4) | 0 |
| Servicing fees | 3 | 3 | 6 |
| Cash received on interests that continue to be held | 554 | 382 | 488 |
| Other asset-backed financings | | | |
| Net gain ¹ | 83 | 24 | 85 |
| Proceeds from transfer of assets | 591 | 1,268 | 4,376 |
| Purchases of previously transferred financial assets or their underlying collateral ² | (621) | (256) | (2,519) |
| Servicing fees | 0 | 1 | 0 |
| Cash received on interests that continue to be held | 1,350 | 701 | 1,539 |

¹ Includes underwriting revenues, deferred origination fees, gains or losses on the sale of collateral to the SPE and gains or losses on the sale of newly issued securities to third parties, but excludes net interest income on assets prior to the securitization. The gains or losses on the sale of the collateral are the difference between the fair value on the day prior to the securitization pricing date and the sale price of the loans. ² Represents market-making activity and voluntary repurchases at fair value where no repurchase obligations were present.

Continuing involvement in transferred financial assets

The following table provides the outstanding principal balance of assets to which the Bank continued to be exposed after the

transfer of the financial assets to any SPE and the total assets of the SPE as of the end of 2012 and 2011, regardless of when the transfer of assets occurred.

Principal amounts outstanding and total assets of SPEs resulting from continuing involvement

| end of | 2012 | 2011 |
|--|--------|--------|
| CHF million | | |
| CMBS | | |
| Principal amount outstanding | 30,050 | 35,487 |
| Total assets of SPE | 45,407 | 52,536 |
| RMBS | | |
| Principal amount outstanding | 58,112 | 91,242 |
| Total assets of SPE | 60,469 | 95,297 |
| Other asset-backed financing activities | | |
| Principal amount outstanding | 32,805 | 35,233 |
| Total assets of SPE | 32,805 | 35,307 |

Principal amounts outstanding relate to assets transferred from the Bank and do not include principal amounts for assets transferred from third parties.

Fair value of beneficial interests

The fair value measurement of beneficial interests held at the time of transfer and as of the reporting date that result from any continuing involvement is determined using fair value estimation techniques, such as the present value of estimated future cash flows that incorporate assumptions that market participants customarily use in these valuation techniques. The fair value of the assets or liabilities that result from any con-

tinuing involvement does not include any benefits from financial instruments that the Bank may utilize to hedge the inherent risks.

Key economic assumptions at the time of transfer

► Refer to "Note 32 – Financial instruments" for further information on fair value hierarchy.

Key economic assumptions used in measuring fair value of beneficial interests at time of transfer

| | 2012 | | 2011 | |
|---|----------------|----------|----------------|----------|
| at time of transfer in | CMBS | RMBS | CMBS | RMBS |
| CHF million, except where indicated | | | | |
| Fair value of beneficial interests | 761 | 2,219 | 57 | 5,095 |
| of which level 2 | 654 | 2,090 | 42 | 4,695 |
| of which level 3 | 107 | 129 | 15 | 399 |
| Weighted-average life, in years | 8.4 | 5.0 | 7.2 | 5.4 |
| Prepayment speed assumption (rate per annum), in % ¹ | – ² | 0.1–34.9 | – ² | 9.0–34.9 |
| Cash flow discount rate (rate per annum), in % ³ | 0.8–10.7 | 0.1–25.7 | 2.9–10.6 | 0.5–71.2 |
| Expected credit losses (rate per annum), in % | 0.5–9.0 | 0.0–25.1 | 1.2–9.3 | 0.3–71.0 |

Transfers of assets in which the Bank does not have beneficial interests are not included in this table.

¹ Prepayment speed assumption (PSA) is an industry standard prepayment speed metric used for projecting prepayments over the life of a residential mortgage loan. PSA utilizes the constant prepayment rate (CPR) assumptions. A 100% prepayment assumption assumes a prepayment rate of 0.2% per annum of the outstanding principal balance of mortgage loans in the first month. This increases by 0.2% thereafter during the term of the mortgage loan, leveling off to a CPR of 6% per annum beginning in the 30th month and each month thereafter during the term of the mortgage loan. 100 PSA equals 6 CPR. ² To deter prepayment, commercial mortgage loans typically have prepayment protection in the form of prepayment lockouts and yield maintenances. ³ The rate was based on the weighted-average yield on the beneficial interests.

Sensitivity analysis

The following table provides the sensitivity analysis of key economic assumptions used in measuring the fair value of beneficial interests held in SPEs as of the end of 2012 and 2011.

Key economic assumptions used in measuring fair value of beneficial interests held in SPEs

| end of | 2012 | | | 2011 | | |

Non-consolidated VIEs

Non-consolidated VIE assets are related to the non-consolidated VIEs with which the Bank has variable interests. These amounts represent the assets of the entities themselves and

are typically unrelated to the exposures the Bank has with the entity and thus are not amounts that are considered for risk management purposes.

Non-consolidated VIEs

| | Financial intermediation | | | | | Total |

33 Assets pledged and collateral

Assets pledged

The Bank pledges assets mainly for repurchase agreements and other securities financing. Certain pledged assets may be

encumbered, meaning they have the right to be sold or repledged. The encumbered assets are parenthetically disclosed on the consolidated balance sheet.

end of 2012 2011

Assets pledged (CHF million)

| | | |
|--|---------|---------|
| Total assets pledged or assigned as collateral | 145,598 | 152,527 |
| of which encumbered | 90,745 | 96,922 |

Collateral

The Bank receives cash and securities in connection with resale agreements, securities borrowing and loans, derivative transactions and margined broker loans. A substantial portion of the collateral and securities received by the Bank was sold

or repledged in connection with repurchase agreements, securities sold not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

end of 2012 2011

Collateral (CHF million)

| | | |
|--|---------|---------|
| Fair value of collateral received with the right to sell or repledge | 402,784 | 373,794 |
| of which sold or repledged | 292,531 | 332,878 |

Other information

Other information (CHF million)

| | | |
|--|--------|--------|
| Cash and securities restricted under foreign banking regulations | 14,340 | 17,943 |
| Swiss National Bank required minimum liquidity reserves | 2,312 | 2,178 |

- Refer to "Note 34 – Assets pledged and collateral" in V – Consolidated financial statements – Credit Suisse Group for further information.

34 Capital adequacy

The Bank is subject to regulation by FINMA. The capital levels of the Bank are subject to qualitative judgments by regulators, including FINMA, about the components of capital, risk weightings and other factors. Since 2008, the Bank operated under the international capital adequacy standards known as ◉Basel II set forth by the BCBS. These standards affected the measurement of both total eligible capital and ◉risk-weighted assets. In January 2011, as required by FINMA, the Bank implemented BCBS's "Revisions to the Basel II market risk framework" (◉Basel II.5) for FINMA regulatory capital purposes. The Bank has based its capital adequacy calculations on US GAAP, as permitted by FINMA Circular 2008/34.

FINMA has advised the Bank that it may continue to include as tier 1 capital CHF 1.6 billion and CHF 3.2 billion of equity from SPEs which are deconsolidated under US GAAP as of December 31, 2012 and 2011, respectively.

As of December 31, 2012 and 2011, the Bank was adequately capitalized under the regulatory provisions outlined under both FINMA and the Bank for International Settlements (BIS) guidelines.

► Refer to "Note 35 – Capital adequacy" in V – Consolidated financial statements – Credit Suisse Group for further information.

BIS statistics – Basel II.5

| end of | 2012 | 2011 |
|---|----------------|----------------|
| Eligible capital (CHF million) | | |
| Tier 1 capital | 39,660 | 35,098 |
| of which core tier 1 capital | 30,879 | 24,210 |
| Tier 2 capital | 8,092 | 13,292 |

| Risk-weighted assets | 215,096 | 232,601 |
| Capital ratios (%) | | |
| Core tier 1 ratio | 14.4 | 10.4 |
| Tier 1 ratio | 18.4 | 15.1 |
| Total capital ratio | 22.2 | 20.8 |

Broker-dealer operations

Certain Bank broker-dealer subsidiaries are also subject to capital adequacy requirements. As of December 31, 2012 and 2011, the Bank and its subsidiaries complied with all applicable regulatory capital adequacy requirements.

Dividend restrictions

Certain of the Bank's subsidiaries are subject to legal restrictions governing the amount of dividends they can pay (for example, pursuant to corporate law as defined by the Swiss Code of Obligations).

As of December 31, 2012 and 2011, the Bank was not subject to restrictions on its ability to pay the proposed dividends.

37 Significant valuation and income recognition differences between US GAAP and Swiss GAAP bank law (true and fair view)

- ▶ Refer to “Note 41 – Significant valuation and income recognition differences between US GAAP and Swiss GAAP bank law (true and fair view)” in V – Consolidated financial statements – Credit Suisse Group for further information.

38 Risk assessment

During the reporting period the Board of Directors (Board) and its Risk Committee performed risk assessments in accordance with established policies and procedures.

The governance of the Bank and the Group, including risk governance, is fully aligned. Both the Board and the Executive Board are comprised of the same individuals.

- ▶ Refer to “Note 42 – Risk assessment” in V – Consolidated financial statements – Credit Suisse Group for information in accordance with the Swiss Code of Obligations on the risk assessment process followed by the Board.

Controls and procedures

Evaluation of disclosure controls and procedures

The Bank has evaluated the effectiveness of the design and operation of its disclosure controls and procedures as of the end of the period covered by this report under the supervision and with the participation of management, including the Bank Chief Executive Officer (CEO) and Chief Financial Officer (CFO), pursuant to Rule 13(a)-15(a) under the Securities Exchange Act of 1934 (the Exchange Act). There are inherent limitations to the effectiveness of any system of controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective controls and procedures can only provide reasonable assurance of achieving their control objectives.

The CEO and CFO concluded that, as of December 31, 2012, the design and operation of the Bank's disclosure controls and procedures were effective, in all material respects, to ensure that information required to be disclosed in reports filed and submitted under the Exchange Act is recorded, processed, summarized and reported as and when required.

Management report on internal control over financial reporting

The management of the Bank is responsible for establishing and maintaining adequate internal control over financial reporting. The Bank's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with US GAAP. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may deteriorate.

Management has made an evaluation and assessment of the Bank's internal control over financial reporting as of December 31, 2012 using the criteria issued by the Committee of Sponsoring Organizations of the Treadway Commission in "Internal Control – Integrated Framework".

Based upon its review and evaluation, management, including the Bank CEO and CFO, has concluded that the Bank's internal control over financial reporting is effective as of December 31, 2012.

KPMG AG, the Bank's independent auditors, have issued an unqualified opinion on the effectiveness of the Bank's internal control over financial reporting as of December 31, 2012, as stated in their report, which follows.

Changes in internal control over financial reporting

There were no changes in the Bank's internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect the Bank's internal control over financial reporting.

Report of the Independent Registered Public Accounting Firm to the General Meeting of Shareholders of

Credit Suisse AG, Zurich

We have audited Credit Suisse AG and subsidiaries' (the "Bank") internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Bank's board of directors and management are responsible for maintaining effective internal control over financial reporting and the Bank's management is responsible for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Bank's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

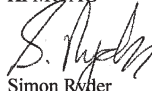

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

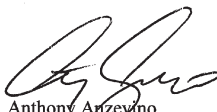

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Bank maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) and Swiss Auditing Standards, the consolidated balance sheets of the Bank as of December 31, 2012 and 2011, and the related consolidated statements of operations, changes in equity, comprehensive income and cash flows, and notes thereto, for each of the years in the three-year period ended December 31, 2012, and our report dated March 22, 2013 expressed an unqualified opinion on those consolidated financial statements.

Report of the Statutory Auditor on the Financial Statements to the General Meeting of

Credit Suisse AG, Zurich

As statutory auditor, we have audited the accompanying financial statements of Credit Suisse AG (the "Bank"), which comprise the balance sheet, statements of income and notes for the year ended December 31, 2012.

Board of Directors' Responsibility

The board of directors is responsible for the preparation of the financial statements in accordance with the requirements of Swiss law and the Bank's articles of incorporation. This responsibility includes designing, implementing and maintaining an internal control system relevant to the preparation of financial statements that are free from material misstatement, whether due to fraud or error. The board of directors is further responsible for selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Swiss law and Swiss Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers the internal control system relevant to the entity's preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control system. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of accounting estimates made, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements for the year ended December 31, 2012 comply with Swiss law and the Bank's articles of incorporation.

on the Financial Statements
to the General Meeting*

Report on Other Legal and Regulatory Requirements

We confirm that we meet the legal requirements on licensing according to the Auditor Oversight Act (AOA) (Switzerland) and independence (article 728 CO and article 11 AOA) and that there are no circumstances incompatible with our independence.

In accordance with article 728a paragraph 1 item 3 CO and Swiss Auditing Standard 890, we confirm that an internal control system exists, which has been designed for the preparation of financial statements according to the instructions of the board of directors.

We further confirm that the proposed appropriation of available earnings complies with Swiss law and the Bank's articles of incorporation. We recommend that the financial statements submitted to you be approved.

Financial review

The Credit Suisse AG (Bank) parent company (the Bank parent company) recorded net operating income of CHF 10,235 million in 2012, compared to CHF 9,467 million in 2011. After deduction of slightly increased operating expenses totaling CHF 7,110 million, gross operating profit increased CHF 564 million, or 22%, compared to 2011, and amounted to CHF 3,125 million.

Depreciation of noncurrent assets of CHF 3,267 million, which included a CHF 2,515 million impairment of participating interests, increased from CHF 602 million in 2011. Valuation adjustments, provisions and losses of CHF 526 million in 2012 was down CHF 160 million, or 23%, compared to 2011. The resulting operating loss in 2012 was CHF 668 million, compared to an operating profit of CHF 1,273 million in 2011. The Bank parent company recorded net profit of CHF 183 million in 2012, compared to a net profit of CHF 1,276 million in 2011.

Net interest income of CHF 2,991 million in 2012 increased CHF 944 million, or 46%, compared to 2011. Net commission and service fee activities of CHF 5,055 million increased CHF 490 million, or 11%. The Bank parent company reported net trading income of CHF 146 million, down 92% from CHF 1,790 million in 2011, mainly due to trading losses in credit products included in other trading losses, trading losses in equity instruments and a decrease in trading income from foreign exchange and banknote trading. These decreases were partially offset by higher income from trading in interest-related instruments. Net other ordinary income was CHF 2,043 million compared to CHF 1,065 million. The increase of CHF 978 million, or 92%, was mainly related to income from participating interests.

Operating expenses of CHF 7,110 million were up CHF 204 million, or 3%, compared to 2011. Personnel expenses were stable at CHF 5,089 million. Property, equipment and administrative costs increased CHF 191 million, or 10%, compared to 2011. Extraordinary income in 2012 of CHF 1,113 million reflected realized gains from the sale of real estate of CHF 687 million, the release of reserves for general banking risks and other provisions economically no longer required totaling CHF 234 million and realized gains from the disposal of participating interests of CHF 137 million, mainly related to the sale of the Bank's remaining ownership interest in Aberdeen. Extraordinary expenses were substantially all related to prior periods.

Changes in shareholder's equity and reserves for general banking risks included a capital contribution by the shareholder of CHF 3,500 million and the impact from the integration of Clariden Leu in the second quarter of 2012.

At the Annual General Meeting on April 26, 2013, the registered shareholders will be asked to approve the Board of Directors' proposed appropriation of retained earnings, which includes a dividend of CHF 10 million.

The company belongs to the Swiss value-added tax group of Credit Suisse Group, and thus carries joint liability to the Swiss federal tax authority for value-added tax debts of the entire Group.

Contingent liabilities to other Bank entities include guarantees for obligations, performance-related guarantees and letters of comfort issued to third parties. Contingencies with a stated amount are included in the off-balance sheet section of the financial statements. In some instances, the Bank parent company's exposure is not defined as an amount but relates to specific circumstances as the solvency of subsidiaries or the performance of a service.

Further, as shareholder of Credit Suisse International, an unlimited company incorporated in England and Wales, the Bank parent company has a joint and several unlimited obligations to meet any insufficiency in the assets in the event of liquidation.

Notes to the financial statements

1 Description of business activities

The Bank parent company is a Swiss bank with total assets of CHF 589.1 billion and shareholder's equity of CHF 39.0 billion as of December 31, 2012.

The Bank parent company is a 100% subsidiary of Credit Suisse Group AG domiciled in Switzerland. With the integration of the Private Banking and Asset Management divisions into a single division effective November 30, 2012, the Bank parent company's business now consists of two divisions: Private Banking & Wealth Management and Investment Banking:

- Private Banking & Wealth Management offers comprehensive advice and a wide range of financial solutions to private, corporate and institutional clients. The Private Banking & Wealth Management division comprises the Wealth Management Clients, Corporate & Institutional Clients and Asset Management businesses. Wealth Management Clients serves ultra-high-net-worth and high-net-worth individuals around the globe and private clients in Switzerland.

land. Corporate & Institutional Clients serves the needs of corporations and institutional clients, mainly in Switzerland. Asset Management offers a wide range of investment products and solutions across asset classes and for all investment styles, serving governments, institutions, corporations and individuals worldwide.

- Investment Banking offers investment banking and securities products and services to corporate, institutional and government clients around the world. Its products and services include debt and equity underwriting, sales and trading, mergers and acquisitions advice, divestitures, corporate sales, restructuring and investment research.

The two divisions are complemented by Shared Services, which provides support in areas such as finance, operations, human resources, legal and compliance, risk management and information technology.

2 Accounting and valuation policies

Basis for accounting

The Bank parent company's stand-alone financial statements are prepared in accordance with the accounting rules of the Swiss Federal Law on Banks and Savings Banks, the respective Implementing Ordinance and the Swiss Financial Market Supervisory Authority (FINMA) Circular 2008/2, "Accounting – banks" (Swiss GAAP statutory).

The Bank's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the US (US GAAP), which differ in certain material respects from Swiss GAAP statutory.

- ▶ Refer to "Note 1 – Summary of significant accounting policies" in VII – Consolidated financial statements – Credit Suisse (Bank) for a detailed description of the Bank's accounting and valuation principles.
- ▶ Refer to "Note 37 – Significant valuation and income recognition differences between US GAAP and Swiss GAAP bank law (true and fair view)" in VII – Consolidated financial statements – Credit Suisse (Bank) for information on significant valuation and income recognition differences between US GAAP and Swiss GAAP bank law (true and fair view).

Additional differences between US GAAP and Swiss GAAP statutory are stated below and should be read in conjunction with Note 1 – Summary of significant accounting policies in VII – Consolidated financial statements – Credit Suisse (Bank). Certain reclassifications have been made to the prior year's financial statements to conform to the current year's presentation and had no impact on net profit or total shareholder's equity.

Foreign currency translations

Under US GAAP, foreign currency translation adjustments resulting from the consolidation of branches with functional currencies other than the Swiss franc are included in accumulated other comprehensive income/(loss) (AOCI) in shareholders' equity. Under Swiss GAAP, foreign currency translation adjustments from the consolidation of foreign branches is recognized in trading income.

Under US GAAP, foreign currency translation adjustments for available-for-sale securities are reported in AOCI, which is part of total shareholder's equity, whereas for Swiss GAAP statutory purposes they are included in the statements of income.

Share-based compensation

Under US GAAP, share-based compensation plans are treated as equity awards. Under Swiss GAAP, such plans are treated as liability awards with changes in fair value of unsettled awards recognized in the statements of income.

Treasury shares and derivatives on own shares

Under US GAAP, treasury shares are recognized at cost directly in equity. Under Swiss GAAP, own shares and derivatives on own shares are recognized as assets or liabilities. Treasury shares can be classified as trading assets and marked to market through the statements of income or as financial investment carried at lower of cost or market. Derivatives on own shares are reported at fair value in other assets or other liabilities.

Derivatives used for fair value hedging

Under US GAAP, the full amount of unrealized losses on derivatives classified as hedging instruments and the corresponding gains on the hedged available-for-sale securities are recognized in income. Under Swiss GAAP, the amount representing the portion exceeding historical cost of the hedged financial investments is recorded in the compensation account.

Deferred taxes

US GAAP allows the recognition of deferred tax assets on net operating loss carry-forwards. Such recognition is not allowed for Swiss GAAP statutory purposes.

Investments in equity securities

Under US GAAP, investments in equity securities where the Bank parent has the ability to significantly influence the operating and financial policies of an investee are accounted for under the equity method of accounting or the fair value option. Under the equity method of accounting, the Bank parent's share of the profit or loss, as well as any impairment on the investee, if applicable, are reported in other revenues. Under Swiss GAAP, neither the equity method of accounting nor the

fair value option is allowed for such investments. Investments in equity securities that are held with the intention of a permanent investment are recorded as participating interests irrespective of the percentage ownership of voting shares held. Equity securities held for trading purposes that meet the criteria for trading positions are recorded in the trading portfolio at fair value. Equity securities that are not held for permanent investment purposes and do not qualify as trading portfolio position are recorded as financial investments at lower of cost or market.

Participating interests

Participating interests are initially recognized at cost. For the purpose of testing the Bank parent company's participating interests for impairment, the portfolio method is applied. An impairment is recorded if the carrying value of a portfolio of participating interests exceeds its fair value.

Notes on risk management

- Refer to "Note 8 – Trading revenues" and "Note 29 – Derivatives and hedging activities" in VII – Consolidated financial statements – Credit Suisse (Bank) for information on the Bank parent company's policy with regard to risk management and the use of financial derivatives.

Changes to accounting policies

Commission income from lending transactions

Effective January 1, 2012, non-refundable "front-loaded" credit commissions charged to borrowers for services provided in connection with the origination of loans are immediately recognized in the statements of income. Prior to this change in accounting policy, such credit commissions were deferred and amortized to interest income over the term of the loans. The cumulative pre-tax and post-tax effect of adopting this change was a release of CHF 139 million of unamortized deferred income, which was recognized in current year's commission income.

3 Additional information on the parent company statements of income

| in | 2012 | 2011 |
|--|------------------|--------------|

| Other | 1,406 | 1,056 |
| Total other liabilities | 18,795 | 21,421 |

6 Securities borrowing and securities lending, repurchase and reverse repurchase agreements

| end of | 2012 | 2011 |
|---|---------------|---------------|
| Securities borrowing and securities lending, repurchase and reverse repurchase agreements (CHF million) | | |
| Due from banks | 28,158 | 20,332 |
| Due from customers | 4,726 | 3,777 |
| Cash collateral paid for securities borrowed and reverse repurchase agreements | 32,884 | 24,109 |
| Due to banks | 12,492 | 14,144 |
| Due to customers | 1,188 | 372 |
| Cash collateral received for securities lent and repurchase agreements | 13,680 | 14,516 |
| Carrying value of securities transferred under securities lending and borrowing and repurchase agreements | 3,737 | 2,309 |
| of which transfers with the right to resell or repledge | 3,436 | 2,309 |
| Fair value of securities received under securities lending and borrowing and reverse repurchase agreements with the right to resell or repledge | 73,486 | 66,939 |
| of which resold or repledged | 35,491 | 36,473 |

7 Balance sheet items that include issued structured products at fair value

| | 2012 | | 2011 | |
|--|---------------------|------------------------------------|---------------------|------------------------------------|
| end of | Total book value | Of which reported at fair value | Total book value | Of which reported at fair value |
| Balance sheet items that include issued structured products at fair value (CHF million) | | | | |
| Liabilities from money market instruments | 35,260 | 4,916 | 53,363 | 3,301 |
| Bonds and mortgage-backed bonds | 107,573 | 11,801 | 118,613 | 18,372 |
| Total | 142,833 | 16,717 | 171,976 | 21,673 |

8 Liabilities due to own pension plans

Liabilities due to the Bank parent company's own pension plans as of December 31, 2012 and 2011 of CHF 2,553 million and CHF 1,895 million, respectively, are reflected in various liability accounts in the Bank parent company's balance sheets.

9 Valuation adjustments and provisions

| | Total 2011 | Impact from Clariden Leu integration | Utilized for purpose | Recoveries, endangered interest, currency differences | New charges to income statement | Releases to income statement | Total 2012 |
|--|---------------|--|-------------------------|---|--|------------------------------------|---------------|
| Valuation adjustments and provisions (CHF million) | | | | | | | |
| Provisions for deferred taxes | 102 | 0 | 0 | 26 | 17 | (43) | 102 |
| Valuation adjustments and provisions for default risks | 900 | 33 | (114) | 31 | 443 | (203) | 1,090 |
| Valuation adjustments and provisions for other business risks ¹ | 49 | 7 | (11) | 7 | 6 | (22) | 36 |
| Other provisions ^{2,3} | 687 | 54 | (44) | (1) | 402 | (208) | 890 |
| Subtotal | 1,636 | 94 | (169) | 37 | 851 | (433) | 2,016 |
| Total valuation adjustments and provisions | 1,738 | 94 | (169) | 63 | 868 | (476) | 2,118 |
| Less direct charge-offs against specific assets | (900) | | | | | | (1,090) |
| Total valuation adjustments and provisions as shown in the balance sheet | 838 | | | | | | 1,028 |
| Reserves for general banking risks (CHF million) | | | | | | | |
| Reserves for general banking risks | 0 | 165 | 0 | 0 | 0 | (165) | 0 |

¹ Provisions are not discounted due to short-term nature. ² Includes provisions in respect of litigation claims of CHF 370 million and CHF 339 million as of December 31, 2012 and 2011, respectively. ³ Includes provisions for pension benefit obligations from international plans of CHF 4 million and CHF 3 million as of December 31, 2012 and 2011, respectively.

10 Composition of share and participation capital and conditional capital

| | 2012 | | 2011 | |
|--|-------------------|---------------------------------------|-------------------|---------------------------------------|
| | Quantity | Total nominal value in CHF million | Quantity | Total nominal value in CHF million |
| Registered shares (at CHF 100) | | | | |
| Share capital as of January 1 | 43,996,652 | 4,400 | 43,996,652 | 4,400 |
| Share capital as of December 31 | 43,996,652 | 4,400 ¹ | 43,996,652 | 4,400 ¹ |
| Participation certificates (at CHF 0.01) ² | | | | |
| Participation certificates as of January 1 | 1,500,000 | 0 | 1,500,000 | 0 |
| Participation certificates as of December 31 | 1,500,000 | 0 ³ | 1,500,000 | 0 ³ |
| Conditional capital ⁴ | | | | |
| Conditional capital as of January 1 | 20,000,000 | 2,000 | 0 | 0 |
| Conditional capital as of December 31 ⁵ | 20,000,000 | 2,000 | 20,000,000 | 2,000 |

¹ The dividend eligible capital equals the total nominal value. As of December 31, 2012 and 2011 the total nominal value of registered shares was CHF 4,399,665,200. ² For information on principal characteristics of participation certificates, refer to articles 4a, 4b and 4c in the Articles of Association of Credit Suisse AG. ³ The dividend eligible capital equals the total nominal value. As of December 31, 2012 and 2011 the total nominal value of participation certificates was CHF 15,000. ⁴ For information on principal characteristics of the conditional capital, refer to article 4d in the Articles of Association of Credit Suisse AG. ⁵ As of December 31, 2012 and 2011 none of the conditional capital was used for capital increases.

11 Major shareholders and groups of shareholders

| | 2012 | | | 2011 | | |
|--|------------|--|---------|------------|--|---------|
| | Quantity | Total nominal value in CHF million | Share % | Quantity | Total nominal value in CHF million | Share % |

Net interest income and interest rate spread

| | 2012 | | 2011 | | 2010 | |
|---|--|------------------------------------|--|------------------------------------|--|------------------------------------|
| in | Net interest income in CHF million | Interest rate spread in % | Net interest income in CHF million | Interest rate spread in % | Net interest income in CHF million | Interest rate spread in % |
| Net interest income and interest rate spread | | | | | | |
| Switzerland | 2,129 | 1.60 | 2,262 | 1.50 | 2,355 | 1.60 |
| Foreign | 5,021 | 0.50 | 4,171 | 0.50 | 4,186 | 0.50 |
| Total net | 7,150 | 0.80 | 6,433 | 0.70 | 6,541 | 0.70 |

The average rates earned and paid on related assets and liabilities can fluctuate within wide ranges and are influenced by several key factors. The most significant factor is changes in global interest rates. Additional factors include changes in the

geographic and product mix of the Group's business and foreign exchange rate movements between the Swiss franc and the currency of the underlying individual assets and liabilities.

Selected margin information

| in | 2012 | 2011 | 2010 |
|--|-------------|-------------|-------------|
| Selected margin information (average rate in %) | | | |
| Switzerland | 1.37 | 1.46 | 1.53 |
| Foreign | 0.67 | 0.57 | 0.52 |
| Net interest margin | 0.79 | 0.72 | 0.68 |

The US Federal Reserve set the federal funds rate, which was a target band of 0.00% to 0.25% throughout 2012.

The Swiss National Bank set the three-month Swiss franc London Interbank Offered Rate, which was 0.00% to 0.25% throughout 2012.

The European Central Bank set the fixed rate tenders, which stood at 0.75% at the end of 2012.

The Bank of England set the bank rate at 0.50% in early 2009 and it remained at this level throughout 2012.

Carrying value of financial investments

| end of | 2012 | 2011 | 2010 |
|--|--------------|--------------|--------------|
| Carrying value of financial investments (CHF million) | | | |
| Debt securities issued by the Swiss federal, cantonal or local governmental entities | 483 | 348 | 282 |
| Debt securities issued by foreign governments | 1,605 | 3,322 | 6,658 |
| Corporate debt securities | 845 | 791 | 984 |
| Collateralized debt obligations | 470 | 607 | 383 |
| Total debt securities | 3,403 | 5,068 | 8,307 |

As of December 31, 2012, no aggregate investment in debt securities of a specific counterparty was in excess of 10% of consolidated shareholders' equity.

Maturities and weighted-average yields of debt securities included in financial investments

| | Within 1 year | | 1 to 5 years | | 5 to 10 years | | Over 10 years | | Total | |
|---|--------------------------------|---------------|--------------------------------|---------------|--------------------------------|---------------|--------------------------------|---------------|--------------------------------|---------------|
| | Amount in CHF million | Yield in % | Amount in CHF million | Yield in % | Amount in CHF million | Yield in % | Amount in CHF million | Yield in % | Amount in CHF million | Yield in % |
| end of 2012 | | | | | | | | | | |
| Debt securities | | | | | | | | | | |
| Debt securities issued by the Swiss federal, cantonal or local governmental entities | 60 | 1.88 | 111 | 2.29 | 169 | 1.66 | 112 | 1.37 | 452 | 1.77 |
| Debt securities issued by foreign governments | 628 | 3.22 | 780 | 3.14 | 80 | 2.77 | 35 | 1.07 | 1,523 | 3.10 |
| Corporate debt securities | 384 | 1.47 | 317 | 3.86 | 122 | 0.74 | 0 | – | 823 | 2.28 |
| Collateralized debt obligations | 37 | 3.12 | 244 | 1.63 | 130 | 1.69 | 37 | 6.00 | 448 | 2.14 |
| Total debt securities | 1,109 | 2.54 | 1,452 | 2.98 | 501 | 1.62 | 184 | 2.26 | 3,246 | 2.58 |

Since substantially all investment securities are taxable securities, the yields presented above are on a tax-equivalent basis.

The values above are based upon amortized cost, whereas certain financial investments are carried at fair value in the consolidated balance sheets.

Cross-border outstandings represent net claims against non-local country counterparties for countries where the aggregate amount outstanding to borrowers exceeds 0.75% of total assets. Monetary assets are loans (including accrued interest), acceptances, interest-bearing deposits with other banks, other interest-bearing investments and any other monetary asset with a fixed exchange value for cash. To the extent local currency outstandings are hedged or funded by local currency borrowings, such amounts are excluded from cross-border outstandings.

Deposits in Switzerland and foreign offices

| Total time deposits | 10,755 | 98,132 | 108,887 |

Balances shown are the Swiss franc equivalent of amounts greater than USD 100,000 together with their remaining maturities.

Selected information on short-term borrowings

| in | 2012 | 2011 | 2010 |
|--|---------|---------|---------|
| Central bank funds purchased, securities sold under repurchase agreements and securities lending transactions (CHF million) | | | |
| Outstanding as of December 31 | 132,721 | 176,559 | 168,394 |
| Maximum amount outstanding at any month-end during the year | 219,447 | 176,559 | 223,370 |
| Approximate average amount outstanding during the year | 181,758 | 156,472 | 199,404 |
| Interest expense for the year ended December 31 | 1,677 | 1,621 | 1,637 |
| Approximate weighted-average interest rate during the year | 0.9% | 1.0% | 0.8% |
| Approximate weighted-average interest rate at year-end | 0.7% | 0.8% | 1.2% |
| Commercial paper (CHF million) | | | |
| Outstanding as of December 31 | 10,882 | 21,444 | 15,216 |
| Maximum amount outstanding at any month-end during the year | 18,144 | 21,444 | 15,270 |
| Approximate average amount outstanding during the year | 13,876 | 16,232 | 8,746 |
| Interest expense for the year ended December 31 | 54 | 52 | 32 |
| Approximate weighted-average interest rate during the year | 0.4% | 0.3% | 0.4% |
| Approximate weighted-average interest rate at year-end | 0.3% | 0.4% | 0.6% |
| Other short-term borrowings (CHF million) | | | |
| Outstanding as of December 31 | 7,759 | 4,671 | 6,467 |
| Maximum amount outstanding at any month-end during the year | 9,444 | 9,218 | 9,797 |
| Approximate average amount outstanding during the year | 9,224 | 8,004 | 8,619 |
| Interest expense for the year ended December 31 | 130 | 17 | 31 |
| Approximate weighted-average interest rate during the year | 1.4% | 0.2% | 0.4% |
| Approximate weighted-average interest rate at year-end | 1.7% | 1.2% | 0.7% |

Generally, original maturities of central bank funds purchased, securities sold under repurchase agreements and securities lending transactions are less than six months, commercial paper are less than six months and other short-term borrowings are one year or less.

Statistical information – Bank

Statistical information for the Group is required under the SEC's specialized industry guide for bank holding companies – Industry Guide 3. Certain statistical information is also included in *VII – Consolidated financial statements – Credit Suisse (Bank)*, including *Notes 6 – Net interest income, 15 – Investment securities, 17 – Loans, allowance for loan losses and credit quality, 22 – Deposits, 23 – Long-term debt, 29 – Derivatives and hedging activities, 30 – Guarantees and commitments and 32 – Financial instruments*. Except to the extent described below, such statistical information for the Bank is not materially different, either in absolute amount or in terms of trends, from such statistical information for the Group. The principal differences described below relate to the banking businesses of the Group that are not included in the Bank's consolidated financial statements and intercompany eliminations.

The short-term borrowings of the Bank and the Group may differ from period to period. As of December 31, 2012, 2011 and 2010, the Bank had short-term borrowings of CHF 14.8 billion, CHF 26.1 billion and CHF 21.7 billion compared to short-term borrowings of CHF 18.6 billion, CHF 26.1 billion and CHF 21.7 billion at the Group, respectively. The lower level of short-term borrowings at the Bank compared to the Group at year-end 2012 was related to the mandatory and contingent convertible securities issued by the Group.

In addition, certain elements of the Group's and the Bank's investment portfolio may differ from period to period. As of December 31, 2012, the carrying value of the Group's debt securities was CHF 3.4 billion compared to CHF 1.8 billion for the Bank. The higher value of debt securities at the Group compared to the Bank primarily related to debt securities issued by Swiss federal, cantonal or local government entities, foreign governments and corporates, and collateralized debt obligations held by Neue Aargauer Bank, principally for liquidity management purposes.

The Bank's loan portfolio constitutes substantially all of the Group's consolidated loan portfolio. As of December 31, 2012, 2011 and 2010, the Bank's total loans were CHF 227.5 billion, CHF 219.4 billion and CHF 207.2 billion or 93.9%, 94.0% and 94.7% of the Group's total loans of CHF 242.2 billion, CHF 233.4 billion and CHF 218.8 billion, respectively. Differences between the Bank and the Group in the composition and maturity profile of the loan portfolio, allowance for loan losses, write-offs and impaired loans as of December 31, 2012, December 31, 2011 and December 31, 2010 principally related to Neue Aargauer Bank and BANK-now, primarily in the Swiss consumer segment.

► Refer to "Note 17 – Loans, allowance for loan losses and credit quality" in *VII – Consolidated financial statements – Credit Suisse (Bank)* for additional information on the Bank's loan portfolio and related allowances.

Ratio of earnings to fixed charges – Group

¹ Amounts reflect a portion of premises and real estate expenses deemed representative of the interest factor. ² The deficiency in the coverage of fixed charges by earnings before fixed charges was CHF 12,084 million for the year ended December 31, 2008.

Other information

Exchange controls

There are no restrictions presently in force under our Articles of Association or Swiss law that limit the right of non-resident or foreign owners to hold our securities freely or, when entitled, to vote its securities freely. The Swiss federal government may from time to time impose sanctions, including exchange control restrictions, on particular countries, regimes, organizations or persons. A current list, in German, of such sanctions can be found at www.seco-admin.ch. Other than these sanctions, there are currently no Swiss exchange control laws or laws restricting the import or export of capital, including, but not limited to, the remittance of dividends, interest or other payments to non-resident holders of our securities.

American Depositary Shares

Under Swiss law, holders of  American Depositary Shares (ADS) are not shareholders and are not recorded in our share register. A nominee for the ADS depository is the registered holder of the shares underlying the ADSs. Rights of ADS holders to exercise voting rights, receive dividends and other matters are governed by the deposit agreement pursuant to which the ADSs are issued. For further information relating to our ADSs, see the Registration Statement on Form F-6 filed with the SEC. Subject to any applicable law to the contrary, with respect to ADSs for which timely voting instructions are not received by the ADS depository in relation to any proposed resolution or for which voting instructions are received by the ADS depository but do not specify how the ADS depository shall vote in relation to any proposed resolution, the ADS depository shall, or shall instruct the nominee to, vote such shares underlying the ADSs in favor of such resolution if it has been proposed by the Board of Directors or otherwise in accordance with the recommendation of the Board of Directors.

Taxation

The following summary contains a description of the principal Swiss and US federal income tax consequences of the purchase, ownership and disposition of our shares or ADSs (Shares), but it does not purport to be a comprehensive description of all of the tax considerations that may be relevant to a decision to own or dispose of Shares. In particular, the summary is directed only to holders that hold Shares as capital assets and does not address tax considerations applicable to investors that may be subject to special tax rules, such as banks, tax-exempt entities, insurance companies, dealers in securities or currencies, traders in securities electing to mark to market, persons that actually or constructively own 10% or more of our voting stock, persons that hold Shares as a position in a “straddle” or “conversion” transaction, or as part of a “synthetic security” or other integrated financial transaction, or persons that have a “functional currency” other than the Swiss franc or US dollar.

This summary is based on the current tax laws of Switzerland and the US, including the current “Convention Between the United States of America and the Swiss Confederation for the Avoidance of Double Taxation with Respect to Taxes on Income” (Treaty), the US Internal Revenue Code of 1986, as amended (IR Code), existing and proposed regulations thereunder, published rulings and court decisions, all of which are subject to change, possibly with retroactive effect.

This discussion does not generally address any aspects of US taxation other than federal income taxation or any aspects of Swiss taxation other than income and capital taxation. Prospective investors are urged to consult their tax advisors regarding the US federal, state and local, Swiss and other tax consequences of owning and disposing of Shares.

Swiss taxation

Withholding tax on dividends and similar distributions

Dividends paid and other similar cash, in-kind taxable distributions made by us to a holder of Shares (including stock dividends) and taxable income resulting from partial liquidation as referred to below under “Capital gains tax realized on Shares” are subject to a federal withholding tax at a rate of 35%. The withholding tax will be withheld by us on the gross distributions and will be paid to the Swiss Federal Tax Administration. The repayment of nominal value of the Shares or repayment of capital contribution reserves (Kapitaleinlagen) is not subject to Swiss withholding tax.

Swiss recipients

Swiss resident individuals are generally entitled to a full refund or tax credit for the withholding tax if they are the beneficial owners of such distributions at the time the distribution is due and duly report the receipt thereof in the relevant Swiss income tax return. Swiss resident legal entities are generally entitled to a full refund for the withholding tax if they are the beneficial owners of such distributions at the time the distribution is due and duly book it as revenue in their profit and loss statement.

Non-resident recipients

The recipient of a taxable distribution who is an individual or a legal entity not resident in Switzerland for tax purposes may be entitled to a total or partial refund of the withholding tax if the country in which such recipient resides for tax purposes has entered into a bilateral treaty for the avoidance of double taxation with Switzerland and the further conditions of such treaty are met. Holders of Shares not resident in Switzerland should be aware that the procedures for claiming treaty benefits (and the time frame required for obtaining a refund) may differ from country to country. Holders of Shares not resident in Switzerland should consult their own legal, financial or tax advisors regarding receipt, ownership, purchases, sales or other dispositions of Shares and the procedures for claiming a refund of the withholding tax.

Residents of the US

A non-Swiss resident holder who is a resident of the US for purposes of the Treaty is eligible for a reduced rate of withholding tax on dividends equal to 15% of the dividend, provided that such holder: (i) qualifies for benefits under the Treaty; (ii) holds, directly or indirectly, less than 10% of our voting stock; and (iii) does not conduct business through a permanent establishment or fixed base in Switzerland to which Shares are attributable. Such an eligible US holder may apply for a refund of the amount of the withholding tax in excess of the 15% Treaty rate. The claim for refund must be filed on Swiss Tax Form 82 (82C for corporations; 82I for individuals; 82E for other entities), which may be obtained from any Swiss consulate general in the US or from the Federal Tax Administration of Switzerland at the address below, together with an instruction form. Four copies of the form must be duly completed, signed before a notary public of the US and sent to the Federal Tax Administration of Switzerland, Eigerstrasse 65, CH-3003, Bern, Switzerland. The form must be accompanied by suitable evidence of deduction of Swiss tax withheld at source, such as certificates of deduction, signed bank vouchers or credit slips. The form may be filed on no later than

December 31 of the third year following the calendar year in which the dividend became payable.

Income and profit tax on dividends and similar distributions

Individuals

An individual who is a Swiss resident for tax purposes, or who is a non-Swiss resident holding Shares as part of a Swiss business operation or Swiss permanent establishment, is required to report the receipt of taxable distributions received on the Shares in her or his relevant Swiss tax returns. An exemption from income tax applies with regard to distributions out of capital contribution reserves (Kapitaleinlagen).

Legal entities

Legal entities resident in Switzerland and non-Swiss resident legal entities holding Shares as part of a Swiss permanent establishment are required to include taxable distributions (including capital repayments or distributions out of capital contribution reserves) received on the Shares in their income subject to Swiss corporate income taxes. A Swiss corporation or co-operative or a non-Swiss corporation or co-operative holding Shares as part of a Swiss permanent establishment may, under certain circumstances, benefit from relief from taxation with respect to taxable distributions (Beteiligungsabzug).

Non-resident recipients

Recipients of dividends and similar distributions on Shares who are neither residents of Switzerland for tax purposes nor holders of Shares as part of a Swiss business operation or a Swiss permanent establishment are not subject to Swiss income taxes in respect of such distributions.

Capital gains tax realized on Shares

Individuals

Swiss resident individuals who hold Shares as part of their private property generally are exempt from Swiss federal, cantonal and communal taxes with respect to capital gains realized upon the sale or other disposal of Shares, unless such individuals are qualified as security trading professionals for income tax purposes. Gains realized upon a repurchase of Shares by us for the purpose of a capital reduction are characterized as a partial liquidation of the company. In this case, the difference between the nominal value and the distributed capital contribution, if any, of the shares and their repurchase price qualifies as taxable income to Swiss resident individuals holding Shares as part of their private property. Individuals who are Swiss residents for tax purposes and who hold the Shares as business assets (including security trading professionals for income tax purposes), or who are non-Swiss residents holding

Shares as part of a Swiss business operation or Swiss permanent establishment, are required to include capital gains realized upon the disposal of Shares in their income subject to Swiss income tax.

Legal entities

Legal entities resident in Switzerland or non-Swiss resident legal entities holding Shares as part of a Swiss permanent establishment are required to include capital gains realized upon the disposal of Shares in their income subject to Swiss corporate income tax.

Non-resident individuals and legal entities

Individuals and legal entities which are not resident in Switzerland for tax purposes and do not hold Shares as part of a Swiss business operation or a Swiss permanent establishment are not subject to Swiss income taxes on gains realized upon the disposal of the Shares.

Net worth and capital taxes

Individuals

Individuals who are Swiss residents for tax purposes or who are non-Swiss residents holding Shares as part of a Swiss business operation or Swiss permanent establishment are required to include their Shares in their assets that are subject to cantonal and communal net worth taxes.

Legal entities

Legal entities resident in Switzerland or non-Swiss resident legal entities holding Shares as part of a Swiss permanent establishment are required to include their Shares in their assets that are subject to cantonal and communal capital tax. In some cantons profit tax credits might be available for offsetting with the annual cantonal and communal capital tax.

Non-resident individuals and legal entities

Individuals and legal entities which are not resident in Switzerland for tax purposes and do not hold Shares as part of a Swiss business operation or a Swiss permanent establishment are not subject to Swiss cantonal and communal net worth and capital taxes.

Stamp duties upon transfer of securities

The transfer of Shares, whether by Swiss residents or non-resident holders, may be subject to a Swiss securities transfer duty of 0.15% (0.075% for each party to a transaction) of the transaction value if the transfer occurs through or with a Swiss bank or other Swiss or foreign securities dealer as defined in the Swiss Federal Stamp Duty Act. Newly issued shares distributed by way of a Stock or Scrip dividend are not subject to

the Swiss securities transfer duty. The stamp duty is paid by the securities dealer and may be charged to the parties in a taxable transaction who are not securities dealers. In addition to this stamp duty, the sale of Shares by or through a member of the SIX Swiss Exchange (SIX) may be subject to a minor SIX levy on the sale proceeds (this levy also includes the Swiss Financial Market Supervisory Authority surcharge).

Final foreign withholding taxes

On January 1, 2013, bilateral tax agreements between Switzerland and the United Kingdom and between Switzerland and Austria entered into force. The agreements, among other things, require a Swiss paying agent to levy a non-refundable (final) tax at specified rates in respect of an individual resident in the United Kingdom or resident in Austria, as applicable, on interest, dividends or capital gain paid, or credited to an account, relating to the Shares. The final withholding tax substitutes the United Kingdom or Austrian income tax, as applicable, on such interest, dividends or capital gain. Such a person may, however, opt for voluntary disclosure of the interest, dividends or capital gain to the tax authority of his or her country of residency rather than be subject to the final withholding tax specified in the agreements.

US federal income tax

For purposes of this discussion, a "US Holder" is any beneficial owner of Shares that is: (i) a citizen or resident of the US; (ii) a corporation organized under the laws of the US or any political subdivision thereof; or (iii) any other person that is subject to US federal income tax on a net income basis in respect of Shares. A "Non-US Holder" is any beneficial owner of Shares that is a foreign corporation or non-resident alien individual.

Taxation of dividends

US Holders

For US federal income tax purposes, a US Holder will be required to include the full amount (before reduction for Swiss withholding tax) of a dividend paid with respect to Shares, generally as ordinary income. Subject to certain exceptions for short-term and hedged positions, the US dollar amount of dividends received by an individual with respect to our Shares will be subject to taxation at a maximum rate of 20% if the dividends are "qualified dividends". Dividends paid on the Shares will be treated as qualified dividends if we were not, in the year prior to the year in which the dividend was paid, and are not, in the year in which the dividend is paid, a passive foreign investment company (PFIC). Based on our audited consolidated financial statements, we believe that the Group was not treated as a PFIC for US federal income tax purposes with respect to our 2011 or 2012 taxable years. In addition, based

on the audited consolidated financial statements of the Group and our current expectations regarding the value and nature of our assets and the sources and nature of our income, we do not anticipate the Group becoming a PFIC for the 2013 taxable year. Holders of our Shares should consult their own tax advisors regarding the availability of the reduced dividend tax rate in light of the considerations discussed above and their own particular circumstances. For this purpose, a “dividend” will include any distribution paid by us with respect to Shares, but only to the extent such distribution is not in excess of our current and accumulated earnings and profits as defined for US federal income tax purposes. Such dividend will constitute income from sources outside of the US. Subject to the limitations and conditions provided in the IR Code, a US Holder may deduct from its US federal taxable income, or claim as a credit against its US federal income tax liability, the Swiss withholding tax withheld. Under the IR Code, dividend payments by us on Shares are not eligible for the dividends received deduction generally allowed to corporate shareholders. Any distribution that exceeds our earnings and profits will be treated as a non-taxable return of capital to the extent of the US Holder’s tax basis in Shares and thereafter as capital gain.

In general, a US Holder will be required to determine the amount of any dividend paid in Swiss francs by translating the Swiss francs into US dollar at the “spot rate” of exchange on the date of receipt. The tax basis of Swiss franc received by the US Holder generally will equal the US dollar equivalent of such Swiss franc, translated at the spot rate of exchange on the date such Swiss franc dividends are received. Upon a subsequent exchange of such Swiss franc for US dollar, or upon the use of such Swiss franc to purchase property, a US Holder will generally recognize ordinary income or loss in the amount equal to the difference between such US Holder’s tax basis for the Swiss franc and the US dollar received or, if property is received, the fair market value of the property. In addition, a US Holder may be required to recognize domestic-source foreign currency gain or loss on the receipt of a refund in respect of Swiss withholding tax to the extent the US dollar value of the refund differs from the US dollar equivalent of the amount on the date of receipt of the underlying dividend.

Non-US Holders

Dividends paid to a Non-US Holder in respect of Shares will generally not be subject to US federal income tax unless such dividends are effectively connected with the conduct of a trade or business within the US by such Non-US Holder.

Capital gains tax upon disposal of shares

US Holders

A gain or loss realized by a US Holder on the sale or other disposition of Shares will be subject to US federal income taxation as a capital gain or loss in an amount equal to the difference between the US Holder’s basis in Shares and the amount realized on the disposition. Such gain or loss will generally be a long-term capital gain or loss if the US Holder holds the Shares for more than one year. A long-term capital gain realized by a US Holder that is an individual generally is subject to taxation at reduced rates.

Non-US Holders

A Non-US Holder will generally not be subject to US federal income tax in respect of gains realized on a sale or other disposition of Shares unless the gain is effectively connected with a trade or business of the Non-US Holder in the US.

Backup withholding tax and information reporting requirements

Dividends paid on, and proceeds from the sale or other disposition of, Shares paid to a US Holder generally may be subject to the information reporting requirements of the IR Code and may be subject to backup withholding unless the holder: (i) establishes that it is a corporation or other exempt holder; or (ii) provides an accurate taxpayer identification number on a properly completed IRS Form W-9 and certifies that no loss of exemption from backup withholding has occurred. The amount of any backup withholding from a payment to a holder will be allowed as a credit against the US Holder’s US federal income tax liability and may entitle such holder to a refund, provided that certain required information is furnished to the IRS.

A Non-US Holder may be required to comply with certification and identification procedures in order to establish its exemption from information reporting and backup withholding.

Listing details

Credit Suisse Group's shares are listed on the SIX under the symbol "CSGN". The Group's ADS are traded on the New York Stock Exchange under the symbol "CS".

The Group's shares are in registered form with a par value of CHF 0.04 per share.

Trading in our own shares

The Group buys and sells its own shares and derivatives on its own shares within its normal trading and market-making activities mainly through its Swiss broker-dealer operations. In the Swiss market, the Group buys and sells its shares and derivatives on these shares to facilitate customer orders, to provide liquidity as a market maker and to hedge derivative instruments.

The net long or short position held by the Group's Swiss bank subsidiaries in the Group's own shares has been at non-material levels relative to the number of the Group's outstanding shares, due in part to FINMA regulations requiring a 100% capital charge to the relevant legal entity for the entire net

position in the Group's shares. In addition to FINMA rules, the Group's trading in its own shares in the Swiss market is subject to regulation under the Swiss Federal Act of Stock Exchanges and Securities Trading, the rules of the SIX and the European Exchange electronic exchange, and the Swiss Bankers Association Code of Conduct for Securities Dealers. Trading is also limited by the Group's risk management limits, internal capital allocation rules, balance sheet requirements, counterparty restrictions and other internal regulations and guidelines. Swiss law further limits the Group's ability to hold or repurchase its own shares.

The Group may from time to time place orders for its own shares to satisfy obligations under various employee and management incentive share plans, and potentially for shares to be used as payment in acquisitions. In addition, the Group may purchase shares with the intent of cancellation. Typically in Switzerland, the purchase of shares for cancellation is done under a separate program from the repurchase of shares to be re-issued under employee and management incentive share plans.

- Refer to "Share repurchases" in III – Treasury, Risk, Balance sheet and Off-balance sheet – Capital management – Additional information for further information on trading in the Group's shares and shares repurchases.

Property and equipment

Our principal executive offices, which we own, are located at Paradeplatz 8, Zurich, Switzerland. As of the end of 2012, we maintained 539 offices and branches worldwide, of which approximately 64% were located in Switzerland.

As of the end of 2012, approximately 27% of our worldwide offices and branches were owned directly by us, with the remainder being held under commercial leases, 57% of which expire after 2017. The book value of the ten largest owned

properties was approximately CHF 1.0 billion as of the end of 2012. Some of our principal facilities are subject to mortgages and other security interests granted to secure indebtedness to certain financial institutions. As of the end of 2012, the total amount of indebtedness secured by these facilities was not material to us.

We believe that our current facilities are adequate for existing operations. Management regularly evaluates our operating facilities for suitability, market presence, renovation and maintenance.

Glossary

A

Advanced Execution Services® (AES®) AES® is a suite of algorithmic trading strategies, tools, and analytics operated by Credit Suisse to facilitate global equity trading. By employing algorithms to execute client orders and limit volatility, AES® helps institutions and hedge funds reduce market impact. AES® provides access to exchanges in more than 35 countries worldwide via more than 45 leading trading platforms.

Advanced internal ratings-based approach (A-IRB) Under the A-IRB approach, risk weights are determined by using internal risk parameters. We have received approval from FINMA to use, and have fully implemented, the A-IRB approach whereby we provide our own estimates for probability of default (PD), loss given default (LGD) and exposure at default (EAD). We use the A-IRB approach to determine our institutional credit risk and most of our retail credit risk.

Advanced measurement approach (AMA) The AMA is used for measuring operational risk. The methodology is based upon the identification of a number of key risk scenarios that describe the major operational risks we face. Groups of senior staff review each scenario and discuss the likelihood of occurrence and the potential severity of loss. Internal and external loss data, along with certain business environment and internal control factors, such as self-assessment results and key risk indicators, are considered as part of this process. Based on the output from these meetings, we enter the scenario parameters into an operational risk model that generates a loss distribution from which the level of capital required to cover operational risk is determined. We have received approval from FINMA to use an internal model for the calculation of operational risk capital, which is aligned with the requirements of the AMA under the Basel framework.

Affluent clients We define affluent clients as individuals having assets under management in excess of CHF 50,000.

American depositary shares (ADS) An American depositary receipt is a negotiable certificate evidencing an ADS, issued by a depositary bank, that represents all or part of an underlying share of a foreign-based company held in custody.

B

Backtesting Backtesting is a process used to evaluate the performance of VaR models. It consists of a comparison between actual trading revenues and 1-day, 99% VaR. Regulators also use backtesting to evaluate model performance. VaR models that experience less than five exceptions in a rolling 12-month period are deemed to be statistically correct and attract no additional regulatory capital charges.

Basel II In June 2006, the Basel Committee on Banking Supervision (BCBS) published its comprehensive version of the revised framework for the international convergence of capital measurement and capital standards known as Basel II. Basel II describes the framework for measuring capital adequacy and the minimum standards to be achieved by the adopting supervisory authorities. This framework is based on three pillars, which are viewed as mutually reinforcing.

Pillar 1: Minimum Capital Requirements – requires an institution to hold sufficient capital to cover its credit, market and operational risks.

Pillar 2: Supervisory Review Process – discusses the role of supervisors in ensuring that institutions have in place a proper process for assessing and maintaining their capital ratios above the minimum requirements.

Pillar 3: Market Discipline – sets out disclosure requirements, especially for those institutions seeking approval to use their own internal models to calculate their capital requirements.

Basel II.5 In June 2009, the BCBS published revisions to the Basel II market risk framework, commonly referred to as Basel II.5. The revisions require the trading book capital charge for a bank using the internal models approach for market risk to be subject to a general market risk capital charge. A bank that has approval to model specific risk will also be subject to an incremental risk capital charge. The BCBS required the implementation of Basel II.5 for BIS purposes no later than December 31, 2011.

Basel III In December 2010, the BCBS issued the Basel III framework, which is a comprehensive set of reform measures to strengthen the regulation, supervision and risk management of the banking sector. These measures aim to improve the banking sector's ability to absorb shocks arising from financial and economic stress, whatever the source, improve risk management and governance and strengthen banks' transparency and disclosures. Phased-in from January 1, 2013 through January 1, 2019.

Basel Committee on Banking Supervision (BCBS) The Basel Committee on Banking Supervision (BCBS) provides a forum for regular cooperation on banking supervisory matters. Its objective is to enhance the understanding of key supervisory issues and improve the quality of banking supervision worldwide. It seeks to do so by exchanging information on national supervisory issues, approaches and techniques, with a view to promoting common understanding. At times, the Committee uses this common understanding to develop guidelines and supervisory standards in areas where they are considered desirable. In this regard, the Committee is best known for its international standards on capital adequacy; the Core Principles for Effective Banking Supervision; and the Concordat on cross-border banking supervision.

Booking center Part of a legal entity of Credit Suisse AG that is registered with a domestic banking license where client assets are administered and booked.

C

Collateralized debt obligation (CDO) A CDO is a type of structured asset-backed security whose value and payments are derived from a portfolio of underlying fixed-income assets.

Commercial mortgage-backed securities (CMBS) CMBS are a type of mortgage-backed security that is secured by loans on commercial property and can provide liquidity to real estate investors and commercial lenders.

Commercial paper (CP) Commercial paper is an unsecured money-market security with a fixed maturity of 1 to 364 days, issued by large banks and corporations to raise funds to meet short term debt obligations.

Constant prepayment rate (CPR) A loan prepayment rate that is equal to the proportion of the principal of a pool of loans that is assumed to be paid off prematurely in each period. The calculation of this estimate is based on a number of factors such as historical prepayment rates for previous loans that are similar to ones in the pool and on future economic outlooks.

Credit default swap (CDS) A CDS is a contractual agreement in which the buyer of the swap pays a periodic fee in return for a contingent payment by the seller of the swap following a credit event of a reference entity. A credit event is commonly defined as bankruptcy, insolvency, receivership, material adverse restructuring of debt or failure to meet payment obligations when due.

Credit valuation adjustment (CVA) The CVA represents the market value of counterparty credit risk for uncollateralized OTC derivative instruments.

D

Derivatives Derivatives are financial instruments or contracts that meets all of the following three characteristics: (1) their value changes in response to changes in an underlying price, such as interest rate, security price, foreign exchange rate, credit rating/price, or index; (2) they requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors; and (3) their terms require or permit net settlement (US GAAP) or they settle at a future date (IFRS).

Debit valuation adjustment (DVA) The DVA represents the market value of our own credit risk for uncollateralized OTC derivative instruments.

F

Fair value The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Flow-based Flow-based businesses refer to products that are generally more liquid, less complex and less volatile and which tend to provide a more stable earnings base generated from fees and/or trading activity initiated by or in facilitation of client business. Flow-based businesses include foreign exchange, interest-rate products, cash equities, vanilla derivative products and prime services.

G

G-7 The G-7 represents the finance ministers from seven industrialized nations: the US, UK, France, Germany, Italy, Canada and Japan.

G-20 The G-20 represents the finance ministers and central bank governors from 19 countries plus the European Union.

H

Haircut The percentage by which an asset's market value is reduced for the purpose of calculating capital, margin requirements and collateral levels. This is used to provide a cushion when lending against collateral to account for possible adverse movements in the value of the collateral.

High-net-worth individuals We define high-net-worth individuals as individuals having assets under management in excess of CHF 1 million.

I

Incremental risk charge (IRC) The IRC represents an estimate of the issuer default and migration risk of positions in the trading book over a one-year capital horizon at a 99.9% confidence level, taking into account the liquidity horizons of individual positions. This includes sovereign debt, but excludes securitizations and correlation products.

L

Liquidity coverage ratio (LCR) The LCR aims to ensure that banks have a stock of unencumbered high-quality liquid assets available to meet liquidity needs for a 30-day time horizon under a severe stress scenario. The LCR is comprised of two components: the value of the stock of high quality liquid assets in stressed conditions and the total net cash outflows calculated according to specified scenario parameters. The ratio of liquid assets over net cash outflows should be at least 100%.

London interbank offered rate (LIBOR) LIBOR is a daily reference rate based on the interest rates at which banks borrow unsecured funds from other banks in the London wholesale money market.

Loss given default (LGD) LGD parameters consider seniority, collateral, counterparty industry and, in certain cases, fair value markdowns. LGD estimates are based on an empirical analysis of historical loss rates and are calibrated to reflect time and cost of recovery as well as economic downturn conditions. For much of the Private Banking & Wealth Management loan portfolio, the LGD is primarily dependent upon the type and amount of collateral pledged. For other retail credit risk, predominantly loans secured by financial collateral, pool LGDs differentiate between standard and higher risks, as well as domestic and foreign transactions. The credit approval and collateral monitoring processes are based on loan-to-value limits. For mortgages (residential or commercial), recovery rates are differentiated by type of property.

M

Match funded Match funded balance sheet items consist of assets and liabilities with close to equal liquidity durations and value so that the liquidity and funding generated or required by the positions are substantially equivalent.

Material risk takers and controllers (MRTC) MRTC are employees whose activities are considered to have a potentially material impact on the Group's risk profile.

N

Negative replacement value (NRV) NRV represents the negative fair value of a derivative financial instrument at a given financial reporting date. A negative replacement value reflects the amount payable to the counterparty if the derivative transaction would settle at the reporting date, or alternatively, the cost at a given reporting date to close an open derivative position with a fully offsetting transaction.

Net stable funding ratio (NSFR) The NSFR is intended to ensure banks maintain a structurally sound long-term funding profile beyond one year and is a complementary measure to the LCR. It is structured to ensure that illiquid assets are funded with an appropriate amount of stable long-term funds. The standard is defined as the ratio of available stable funding over the amount of required stable funding. The ratio should always be at least 100%.

Netting agreements Netting agreements are contracts between two parties where under certain circumstances, such as insolvency, bankruptcy or any other credit event, mutual claims from outstanding business transactions can be offset against each other. The inclusion of a legally binding netting agreement reduces the default risk from a gross to a net amount.

O

Over-the-counter (OTC) Over-the-counter securities and derivatives are not traded on an exchange but via private contracts between counterparties.

P

Position risk Component of the economic capital framework which is used to assess, monitor and report risk exposures throughout the Group. Position risk is the level of unexpected loss in economic value on our portfolio of positions over a one-year horizon which is exceeded with a given small probability (1% for risk management purposes; 0.03% for capital management purposes).

Positive replacement value (PRV) PRV represents the positive fair value of a derivative financial instrument at a given reporting date. A positive replacement value reflects the amount receivable from the counterparty if the derivative transaction would settle at the reporting date, or alternatively, the cost at a given reporting date to enter into the exact same transaction for the residual term, if the existing counterparty should default.

Probability of default (PD) PD parameters capture the risk of a counterparty defaulting over a one-year time horizon. PD estimates are based on time-weighted averages of historical default rates by rating grade, with low-default-portfolio estimation techniques applied for higher quality rating grades. Each PD reflects the internal rating for the relevant obligor.

R

Regulatory VaR Regulatory VaR is a version of VaR that uses an exponential weighting technique that automatically increases VaR where recent short-term market volatility is greater than long-term volatility in the two-year dataset. Regulatory VaR uses an expected shortfall calculation based on average losses, and a ten-day holding period adjusted to one day for presentation purposes. This results in a more responsive VaR model, as the overall increases in market volatility are reflected almost immediately in the regulatory VaR model.

Repurchase agreements Repurchase agreements are securities sold under agreements to repurchase substantially identical securities. These transactions normally do not constitute economic sales and are therefore treated as collateralized financing transactions and are carried in the balance sheet at the amount of cash received (liability) and cash disbursed (asset), respectively.

Residential mortgage-backed securities (RMBS) RMBS are a type of mortgage-backed security composed of a wide array of different non-commercial mortgage debts. It securitizes the mortgage payments of non-commercial real estate. Different residential mortgages with varying credit ratings are pooled together and sold in tranches to investors.

Reverse repurchase agreements Reverse repurchase agreements are purchases of securities under agreements to resell substantially identical securities. These transactions normally do not constitute economic sales and are therefore treated as collateralized financing transactions and are carried in the balance sheet at the amount of cash received (liability) and cash disbursed (asset), respectively.

Risk management VaR Risk management VaR is a version of VaR that uses an exponential weighting technique that automatically adjusts VaR where recent short-term market volatility differs from long-term volatility in the two-year dataset. Risk management VaR uses an expected shortfall calculation based on average losses, and a one-day holding period. This results in a more responsive VaR model, as the overall changes in market volatility are reflected almost immediately in the risk management VaR model.

Risk mitigation Risk mitigation refers to measures undertaken by the Group or the Bank to actively manage its risk exposure. For credit risk exposure, such measures would normally include utilizing credit hedges and collateral, such as cash and marketable securities. Credit hedges represent the notional exposure that can be transferred to other market counterparties, generally through the use of credit default swaps.

Risk-weighted assets (RWA) The value of the Group's assets weighted according to certain identified risks for compliance with regulatory provisions.

S

Stressed VaR Stressed VaR replicates a VaR calculation on the current portfolio of the Group or the Bank, taking into account a one-year observation period relating to significant financial stress; it helps reduce the pro-cyclicality of the minimum capital requirements for market risk.

Swiss Financial Supervisory Authority (FINMA) FINMA, as an independent supervisory authority, protects creditors, investors and policy holders, ensuring the smooth functioning of the financial markets and preserving their reputation. In its role as state supervisory authority, FINMA acts as an oversight authority of banks, insurance companies, exchanges, securities dealers, collective investment schemes, distributors and insurance intermediaries. It is responsible for combating money laundering and, where necessary, conducts restructuring and bankruptcy proceedings and issues operating licenses for companies in the supervised sectors. Through its supervisory activities, it ensures that supervised institutions comply with the requisite laws, ordinances, directives and regulations and continues to fulfill the licensing requirements. FINMA also acts as a regulatory body; it participates in legislative procedures, issues its own ordinances and circulars where authorized to do so, and is responsible for the recognition of self-regulatory standards.

T

Too Big to Fail In 2011, the Swiss Parliament passed legislation relating to big banks. The legislation includes capital and liquidity requirements and rules regarding risk diversification and emergency plans designed to maintain systemically relevant functions even in the event of threatened insolvency.

Total return swap (TRS) A TRS is a swap agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains. In total return swaps, the underlying asset, referred to as the reference asset, is usually an equity index, loans, or bonds.

U

Ultra-high-net-worth individuals Ultra-high-net-worth individuals have assets under management in excess of CHF 50 million or total wealth exceeding CHF 250 million.

V

Value-at-Risk (VaR) VaR is a technique used to measure the potential loss in fair value of financial instruments based on a statistical analysis of historical price trends and volatilities. VaR as a concept is applicable for all financial risk types with valid regular price histories; the use of VaR allows the comparison of risk in different businesses, such as fixed income and equity.

Cautionary statement regarding forward-looking information

This report contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. In addition, in the future we, and others on our behalf, may make statements that constitute forward-looking statements. Such forward-looking statements may include, without limitation, statements relating to the following:

- our plans, objectives or goals;
- our future economic performance or prospects;
- the potential effect on our future performance of certain contingencies; and
- assumptions underlying any such statements.

Words such as “believes,” “anticipates,” “expects,” “intends” and “plans” and similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. We do not intend to update these forward-looking statements except as may be required by applicable securities laws.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that predictions, forecasts, projections and other outcomes described or implied in forward-looking statements will not be achieved. We caution you that a number of important factors could cause results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors include:

- the ability to maintain sufficient liquidity and access capital markets;
- market and interest rate fluctuations and interest rate levels;
- the strength of the global economy in general and the strength of the economies of the countries in which we conduct our operations, in particular the risk of continued slow economic recovery or downturn in the US or other developed countries in 2013 and beyond;
- the direct and indirect impacts of deterioration or slow recovery in residential and commercial real estate markets;
- adverse rating actions by credit rating agencies in respect of sovereign issuers, structured credit products or other credit-related exposures;

- the ability to achieve our strategic objectives, including improved performance, reduced risks, lower costs and more efficient use of capital;
- the ability of counterparties to meet their obligations to us;
- the effects of, and changes in, fiscal, monetary, trade and tax policies, and currency fluctuations;
- political and social developments, including war, civil unrest or terrorist activity;
- the possibility of foreign exchange controls, expropriation, nationalization or confiscation of assets in countries in which we conduct our operations;
- operational factors such as systems failure, human error, or the failure to implement procedures properly;
- actions taken by regulators with respect to our business and practices in one or more of the countries in which we conduct our operations;
- the effects of changes in laws, regulations or accounting policies or practices;
- competition in geographic and business areas in which we conduct our operations;
- the ability to retain and recruit qualified personnel;
- the ability to maintain our reputation and promote our brand;
- the ability to increase market share and control expenses;
- technological changes;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users;
- acquisitions, including the ability to integrate acquired businesses successfully, and divestitures, including the ability to sell non-core assets;
- the adverse resolution of litigation and other contingencies;
- the ability to achieve our cost efficiency goals and cost targets; and
- our success at managing the risks involved in the foregoing.

We caution you that the foregoing list of important factors is not exclusive. When evaluating forward-looking statements, you should carefully consider the foregoing factors and other uncertainties and events, including the information set forth in *I – Information on the company – Risk factors*.
