PART B – OTHER INFORMATION

1. LISTING AND ADMISSION TO TRADING

- (i) Listing and admission to trading: Application will be made to admit the Certificates for trading on the Italian multilateral trading facility Securitised EuroTLX, organised and managed by Borsa Italiana S.p.A., which is not a regulated market for the purposes of Directive 2014/65/EU as amended, with effect from the Issue Date or a date around the Issue Date.
- (iii) Estimated total expenses: The Issuer will pay approximately EUR 500

2. NOTIFICATION

The CSSF has provided the *Commissione Nazionale per le Società e la Borsa* (CONSOB) with a certificate of approval attesting that the Base Prospectus has been drawn up in accordance with the Prospectus Regulation.

3. INTERESTS OF NATURAL AND LEGAL PERSONS INVOLVED IN THE OFFER

The Issuer will act as Calculation Agent in respect of the Certificates.

The Issuer, or other companies belonging to the group of the Issuer, will act as specialist in relation to the Certificates on the multilateral trading facility where the Certificates are traded.

The Issuer, or other companies belonging to the group of the Issuer, may operate, for various reasons, on the Underlying.

The Issuer may hedge risks relating to the issue by entering into hedging contracts with counterparties which belong to the group of the Issuer.

Save for the commissions payable to the Manager, so far as the Issuer is aware, no person involved in the issue of the Certificates has an interest material to the issue.

4. REASONS FOR THE OFFER, ESTIMATED NET PROCEEDS AND TOTAL EXPENSES

- (i) Reasons for the offer: See "Use of Proceeds" wording in Base Prospectus.
- (ii) Estimated net proceeds: The net proceeds (resulting from subtracting the commissions and the costs from the aggregate Issue Price paid by the Securityholders) of the issue of the Securities will be up to EUR 48,120,000 (assuming placement commissions will be 2.00 per cent. of the Issue Price in respect of all Securities placed).

5. TERMS AND CONDITIONS OF THE OFFER

Applicable

Public Offer Jurisdiction(s)

Republic of Italy

Offer Price:

Issue Price

Investors should take into consideration that the Offer Price embeds distribution commissions and costs as described in the section Distribution below.

Investors should also take into consideration that when the Securities are sold on the secondary market after the Offer Period, the above mentioned commissions and costs are not taken into consideration in determining the price at which such Securities may be sold on the secondary market.

Conditions to which the offer is subject:

Offer of the Securities is conditional on their issue and on the release by Borsa Italiana S.p.A., or by other trading venues, before the Issue Date, of the relevant authorisation to the admission to trading of the Securities.

The Offer Period, including any possible amendments, during which the offer will be open and description of the application process:

An offer (the "**Offer**") of the Securities will be made by the Manager other than pursuant to Article 1(4) of the Regulation (EU) 2017/1129 (the "**Prospectus Regulation**") in the Republic of Italy during the period from 12 May 2023 to and including 19 July 2023 or, in respect of sales by means of financial advisors authorised to make off-premises offers (*consulenti finanziari abilitati all'offerta fuori sede*) only, to and including 12 July 2023 or, in respect of sales by means of distance communication techniques only, to and including 5 July 2023 (the "**Offer Period**").

The Securities are being offered to the public in Italy pursuant to Articles 24 and 25 of the Prospectus Regulation.

The Issuer reserves the right, in agreement with the Manager, to close the Offer Period early, also in circumstances where purchases of Securities are not yet equal to the maximum amount offered of 50,000 Securities. Notice of the early closure of the Offer Period will be given by the Issuer by publication on the website of the Issuer. The early closure of the Offer will become effective from the date specified in such notice.

The Issuer reserves the right, in agreement with the Manager, to revoke or withdraw the Offer and the issue of the Securities at any time prior to the Issue Date. Notice of revocation/withdrawal of the Offer will be given by the Issuer by publication of such notice on the website of the Issuer.

Revocation/withdrawal of the Offer will be effective

upon publication. Upon revocation/withdrawal of the Offer, all subscription applications will become void and of no effect, without further notice.

The Issuer reserves the right, in agreement with the Manager, to postpone the closure of the Offer Period, in order to extend the Offer Period. Notice of the postponement of the closure of the Offer Period will be given by the Issuer by publication on the website of the Issuer.

During the Offer Period, prospective investors may subscribe the Securities during normal Italian banking hours at the offices (*filiali*) of the Manager by filling in, duly executing (also by appropriate attorneys) and delivering a specific acceptance form (the "**Acceptance Form**") (*Scheda di Adesione*).

The Acceptance Form is available at each Manager's office.

Subscription of the Securities may also be made by means of financial advisors authorised to make off-premises offers (*consulenti finanziari abilitati all'offerta fuori sede*).

Subscription of the Securities may also be made by means of distance communication techniques.

There is no limit to the subscription application which may be filled in and delivered by the same prospective investor.

In addition to what stated above, in respect of subscription of the Securities made by means of financial advisors authorised to make off-premises offers (*consulenti finanziari abilitati all'offerta fuori sede*), subscription will be effective only after seven days following completion of the subscription form; by this deadline investor is fully entitled, at no cost and fees, to revoke its subscription by notice to the Manager and/or the financial advisor authorised to make off-premises offers (*consulente finanziario abilitato all'offerta fuori sede*).

Finally, in respect of subscription of the Securities made by means of distance communication techniques, subscription will be effective only after 14 days following completion of the subscription form; by this deadline investor classified as Consumer ("**Consumatore**") pursuant to article 67-duodecies of Italian Legislative Decree 206/2005 ("**Codice del Consumo**"), is fully entitled, at no cost

and fees, to revoke its subscription by notice to the Manager.

Details of the minimum and/or maximum amount of application:

The Securities may be subscribed in a minimum lot of no. 3 Security and an integral number of Securities higher than such amount and being an integral multiple of 1.

There is no maximum amount of application within the maximum number of Securities offered of 50,000 Securities.

The Issuer, in agreement with the Manager, reserves the right to increase, during the Offer Period, the maximum amount of Securities offered. The Issuer shall forthwith give notice of any such increase by publication of a notice on the website of the Issuer.

Description of possibility to reduce subscriptions and manner for refunding excess amount paid by applicants:

Not Applicable

Details of the method and time limits for paying up and delivering the Securities:

The total consideration for the Securities subscribed must be made by the investor on the Issue Date to the Manager's office which has received the relevant Acceptance Form.

The Securities will be delivered on the Issue Date, subsequent to the payment of the Offer Price, to potential Securityholders in the deposit accounts held, directly or indirectly, by the Manager at Monte Titoli.

Manner in and date on which results of the offer are to be made public:

Not later than 5 days on which the TARGET2 System is open following the Issue Date the Issuer will notify the public of the results of the Offer through a notice published on the website of the Issuer.

Procedure for exercise of any right of pre-emption, negotiability of subscription rights and treatment of subscription rights not exercised:

Not Applicable

Whether tranche(s) have been reserved for certain countries:

The Securities will be offered to the public only in Italy.

Qualified investors, as defined in Article 2 (e) of the Prospectus Regulation, are allowed to subscribe any Securities.

Process for notification to applicants of the

The Manager shall notify applicants with amounts

amount allotted and the indication whether dealing may begin before notification is made:	allotted. Subscription applications will be satisfied until reaching the maximum number of Securities offered of 50,000 Securities and thereafter the Manager will immediately suspend receipt of further subscription applications and the Offer Period will be closed early by the Issuer.
	Before the Issue Date, in the event that, notwithstanding the above, the aggregate amount of Securities requested to be subscribed exceed the maximum number of Securities offered of 50,000 Securities, the Issuer will allot the Securities in accordance with allotment criteria so to assure transparency and equal treatment amongst all potential subscribers thereof.
Amount of any expenses and taxes specifically charged to the subscriber or purchaser:	No expenses and duties will be charged by the Issuer to the subscribers of the Securities. Investors should take into consideration that the Offer Price embeds distribution commissions and costs as described in the section Distribution below.

(*) The balances as at 31/12/2020 of Item 10 and Item 40 a), in compliance with the provisions of the 7th update to Bank of Italy Circular 262, were restated following the reclassification required for demand loans to banks to be included under "Cash".

What are the key risks that are specific to the Issuer?

Risk related to the economic and financial crisis, the impact of current uncertainties of the macroeconomic context, the consequences of the Covid-19 outbreak and of the Russian-Ukrainian conflict

There is a risk that the future evolution of the macroeconomic context could have negative effects on the capital, the economic and the financial situation of the Issuer, as well as on its creditworthiness and / or on the creditworthiness of the Banco BPM Group.

Adverse changes in the factors described below, particularly during economic and financial crisis, could lead the Issuer and / or the Banco BPM Group to suffer losses, higher financing costs, reductions in the value of the assets held, with a potential negative impact on the liquidity of the Issuer and / or the Banco BPM Group and on its own capital solidity. Among the main factors of uncertainty that could affect the future scenarios in which the Bank will operate, the negative effects on the global and Italian economy directly or indirectly related to the Coronavirus pandemic (Covid-19) and, from the first quarter of 2022, to the conflict between Russia and Ukraine, must be considered. The spread of the Covid-19

pandemic and its implications for public health, economic activity and trade, at over two years from the start of the health emergency, continue to significantly influence the markets in which the Group operates. Although the impact of the pandemic on economic activity considerably diminished over the course of 2021, also thanks to the significant efforts made in the ongoing vaccination campaign, the development of new variants related to the virus in the last quarter did not enable those elements of uncertainty relating to the recovery of economic activity to be significantly reduced. In such complex and delicate macroeconomic context, the Group's commercial and organisational efforts made possible to achieve significant operating results.

The reduction of the impact of the pandemic on the Group's economic activity affected not only the assets of the Group, but also the liabilities issued at fair value. With specific reference to the Issuer, in 2021 financial year, characterized by the health emergency still in place at the international level, the reclassified operating income amounted to Euro 110.2 million, decreasing by 12.2% compared to 31 December 2020 and the interest margin is contracted (- 26.5%). Net profit for the period amounted to Euro 10.7 million (Euro 24.2 million as at 31 December 2020). Looking at the reclassified income statement as at 30 June 2022, it can be seen that operating income came to Euro 50.0 million, down by around 12.8% compared to the Euro 57.4 million recorded in the first half of 2021. After taxes due in the period (Euro 2.2 million) and net expenses relating to the contribution to the banking system (Euro 2.5 million), net profit for the first half of 2022 is equal to Euro 2.7 million (Euro 2.3 million in the first half of 2021, +16.9%).

The macroeconomic scenario outlined above also experienced a sudden change resulting from the tensions between Russia and Ukraine, which resulted in a military operation in the Donbass region in the early morning of 24 February 2022 that initiated the invasion of Ukraine. This conflict and the sanctions imposed by the international community on Russia's government, companies and economy, as well as the countermeasures activated by the latter, have led to a situation of high uncertainty on the macroeconomic level, exchange rates, energy and raw material costs, the cost of debt, inflationary expectations, and the cost of credit. In this scenario, Banca Akros is not expected to be significantly impacted by the Group's direct exposure to Russia and Ukraine. With regard to indirect impacts, given the elements of absolute uncertainty regarding the length and the evolution of the conflict and its consequences on macroeconomic scenarios, it is not possible to exclude negative effects for the Group.

Risk related to uncertainties in the use of estimates in preparing the financial statements and to the fair value valuation of complex financial instruments not listed on active markets on a recurring basis

The application of certain accounting standards necessarily implies recourse to estimates and assumptions that have an impact on the values of assets and liabilities recorded in the statement of financial position and on the information provided in relation to potential assets and liabilities. It should therefore be considered that valuation models inherently entail a risk of incorrect valuation.

However, the models used for the valuation of the fair value of not-listed financial instruments, especially those that are highly complex (structured securities and derivatives), besides being many and different in relation to the type of instrument to be valued, have also required the formulation of specific qualitative and quantitative assumptions that could lead to different results.

Therefore, it should be noted that these models may be extremely sensitive to the input data and the assumptions used and, by nature, imply a risk of incorrect assessment.

As at 31 December 2021, financial instruments held for trading that are not listed on active markets, whose fair value was determined by using models with data and parameters both directly observable and not directly observable, represent assets for a total of Euro 3,575 million and liabilities of Euro 3,444 million, corresponding to the 43.4% of total assets and the 41.8% of total liabilities in the financial statements.

Risk related to legal and administrative proceedings and inspection activities of Supervisory Authorities

Banca Akros is subject to certain legal proceedings. In particular, as at 31 December 2021, the specific provisions allocated over the years to cover potential losses on legal disputes, lawsuits and customer complaints, amounted overall to Euro 75 thousand (compared to Euro 641 thousand as at 31 December 2020) for a "petitum" of Euro 564 thousand.

The risk deriving from legal proceedings and disputes in general consists in the possibility for the Issuer to incur compensation in the event of a negative outcome.

Market risk

The operational VaR of the trading book (i.e. the maximum potential loss from market movements under normal conditions, over a certain time horizon and with a defined confidence level), as at 31 December 2021, amounted approximately to Euro 1.7 million (Euro 4.8 million as at 31 December 2020). The Operational VaR of banking book amounted to Euro 0.126 million as at 31 December 2021 (Euro 1.2 million as at 31 December 2020) (the figure refers only to the specific risk of the HTCS book). For the first half of 2022 an average operational VaR came to around Euro 2.4 million (average of Euro 2.4 million in 2021). The average VaR for the second quarter of 2022 (around Euro 2.6 million) was higher than that of the first quarter (around Euro 2.2 million), mainly due to the high volatility of the financial markets deriving from the difficult macroeconomic scenario and the war in Ukraine, which led to new penalising scenarios for calculating operational VaR with reference to all the main risk classes (equities, bonds, interest rates and related volatility). Tensions on financial markets due to Covid-19 outbreak in Europe as well as in the rest of the world since the end of February 2020 resulted in severe shocks and high volatility on both the stock and the bond markets.

Given the trend of financial markets, the change in the value of a financial asset or liabilities could have possible negative effects on the Issuer's and / or the Group's assets and economic, capital and / or financial situation, that have diminished in 2021, mainly due to the discovery and the spread of vaccines.

Credit Risk

The Issuer is exposed to traditional credit risks. Therefore, failure by customers or counterparties to comply with their contracts and obligations, as well as any lack or errors in assessing their financial position or creditworthiness, could have negative effects on the economic, equity and / or financial situation of the Issuer.

Liquidity Risk

In order to assess the liquidity profile of the Group, the principal indicators are: (i) the short-term indicator Liquidity Coverage Ratio (LCR) subject to a minimum regulatory requirement of 100 per cent as of 2018 and which as at 31 December 2021 was equal to 209%; (ii) the structural liquidity indicator Net Stable Funding Ratio (NSFR) which as at 31 December 2021 is greater than 100%; and (iii) Loan to Deposit Ratio (LTD), which corresponds to the ratio between Net loans and Direct funding and as at 31 December 2021 was equal to 91.0%.

As at 30 June 2022, the Liquidity Coverage Ratio is 208% whereas the Net Stable Funding Ratio is greater than 100%. Any negative development of the market situation and the general economic context and/or creditworthiness of the Issuer and / or the Group, possibly accompanied by the need to adapt the liquidity situation of the Bank to the regulatory requirements updated from time to time in implementation of the applicable supervisory legislation, may have negative effects on the activities and the economic, equity and/or financial situation of the Issuer and the Group.

Risks related to the exposure to sovereign debt

As at 31 December 2021, the Issuer's exposure to sovereign States amounted, in terms of book values, to a total of Euro 208.35 million and represents 2.53% of total assets and 3.69% of total financial activities. The exposure (book values) to the Italian government included debt securities for Euro 208.34 million at 31 December 2021 and represents 2.53% of total assets and 3.69% of total financial activities.

As at 30 June 2022, the Issuer's exposure to sovereign States amounted, in terms of book values, to a total of Euro 989.58 million and represents 11.08% of total assets and 16.27% of total financial activities. The exposure (book values) to the Italian government included debt securities for Euro 989.57 million and represents 11.08% of total assets and 16.27% of total financial activities.

The persistence of tensions over Government bond market or its volatility, also following the effects of the spread of the Covid-19 and the evolution of the Italian political environment, could adversely affect the business and/or financial situation Group and/or the Issuer.

Operational risks

The Issuer is exposed to many types of operational risks, including the risk of fraud from employees and other third parties, the risk of non-authorized transactions from employees and the risk of operating errors which may result from the purchase and sale of securities and derivative financial instruments and those resulting from inadequacies or failures in information, information technology ("IT") or telecommunications systems. Operational risk management systems and methods are designed to ensure that the risks connected with the activities of the Issuer are monitored as far as possible.

If any of policies and internal procedure of risks control used by the Issuer fail or have other significant shortcomings, the Issuer's financial condition, results and services offered to customers, could be materially adversely affected.

- 3.50% on the Fourth Digital Valuation Period.

In relation to each Digital Valuation Period i-th, the Digital Coupon Threshold i, k-th is equal to 50% for each Underlying of the Basket Worst Of.

Cash Settlement Amount

The Securityholders are entitled to receive on the Maturity Date, for each Minimum Exercise Amount, a Cash Settlement Amount in the Settlement Currency equal to:

a. *If the Underlying Final Value is lower than the Protection Level (equal to 100% of the Underlying Initial Value):* equal to the product between the Nominal Value and the Protection (equal to 100%).

b. *If the Underlying Final Value is equal to or higher than the Protection Level and lower than the Cap Level (equal to 100% of the Underlying Initial Value):*

equal to the product between the Nominal Value and the sum of (i) Protection and (ii) Underlying Final Value minus the Protection Level divided by the relevant Underlying Initial Value and multiplied by the Participation.

c. *If the Underlying Final Value is equal to or higher than the Cap Level:*

equal to the product between the Nominal Value and the Cap (equal to 100%).

For the purposes of the above:

The relevant Underlying Initial Value will be calculated on 25 July 2023 (the Initial Valuation Date) in relation to each Underlying of the Basket Worst Of and it is equal to the closing level of each Underlying of the Basket Worst Of determined by Calculation Agent.

The relevant Underlying Final Value will be calculated on 18 October 2027 (the Final Valuation Date) and is equal to the closing level of the Underlying of the Basket Worst Of which has registered the worst Performance as determined by the Calculation Agent.

The Underlying is a Basket Worst Of composed by the Indexes EURO STOXX 50® (ISIN Code: EU0009658145; Bloomberg Code: SX5E <Index>) and FTSE® MIB® (ISIN Code: GB00BNNLHW18; Bloomberg Code: FTSEMIB <Index>).

The EURO STOXX 50® Index is provided by STOXX Limited. As at the date of this document, STOXX Limited appears in the register of administrators and benchmarks established and maintained by ESMA pursuant to Article 36 of the Benchmark Regulation.

In respect of the Underlying, certain historical information (including past performance thereof) may be found on major information providers, such as Bloomberg and Reuters. Information about the Index may be found on the website of the Index Sponsor www.qontigo.com.

The FTSE® MIB® Index is provided by FTSE International Limited. As at the date of this document, FTSE International Limited does not appear in the register of administrators and benchmarks established and maintained by ESMA pursuant to Article 36 of the Benchmark Regulation. As far as the Issuer is aware, the transitional provisions in Article 51 of the Benchmark Regulation apply, such that FTSE International Limited is not currently required to obtain authorisation or registration (or, if located outside the European Union, recognition, endorsement or equivalence).

In respect of the Underlying, certain historical information (including past performance thereof) may be found on major information providers, such as Bloomberg and Reuters. Information about the Index may be found on the website of the Index Sponsor www.ftserussell.com.

Seniority of the Securities in the capital structure of the Issuer in case of insolvency

The obligations of the Issuer under the Certificates constitute direct, unconditional, unsubordinated and unsecured obligations of the Issuer, ranking (subject to any obligations preferred by any applicable law (also subject to the bail-in instruments as implemented under Italian law)) *pari passu* with all other unsecured obligations of the Issuer, present and future and *pari passu* and rateably without any preference among themselves.

Restrictions on the free transferability of the securities

The Certificates will be freely transferable, subject to the offering and selling restrictions in the United States, the European Economic Area under the Prospectus Regulation and the laws of any jurisdiction in which the relevant Securities are offered or sold.

Where will the securities be traded?

Application will be made to admit the Certificates for trading on the Italian multilateral trading facility Securitised EuroTLX, organized and managed by Borsa Italiana S.p.A., which is not a regulated market for the purposes of Directive 2014/65/EU as amended, with effect from the Issue Date or a date around the Issue Date.

Offer of the Securities is conditional on their issue and on the release by Borsa Italiana S.p.A., or by other trading venues, before the Issue Date, of the relevant authorisation to the admission to trading of the Securities.

The Issuer, or other companies belonging to the group of the Issuer, will act as specialist in relation to the Certificates on the multilateral trading facility where the Certificates are traded.

What are the key risks that are specific to the securities?

Risks connected to the complexity of Certificates

The Certificates are financial derivative instruments characterized by a high degree of risk, which is mainly related to their complexity.

It shall be noted that, in general, investment in Certificates, being Certificates complex financial instruments, is not suitable for all types of investors; therefore, before carrying out any transaction concerning Certificates, the financial intermediary shall verify if the investment is suitable for the investor (with particular reference to the experience and knowledge in the investment field of financial derivative instruments by the latter) and, in the context of advisory services or portfolio management, the financial intermediary shall also evaluate the adequacy of the investment for the investor (in addition to the evaluation of experience and knowledge profiles), in the context of the particular financial situation and investment goals.

Risk related to the application of a cap

The investor should consider that the ability of the investor to participate in any change in the value of the Underlying(s) over the term of the Certificates will be limited, no matter how much the level, price, rate or other applicable value of the Underlying(s) may rise beyond the cap level over the life of the Certificates. Accordingly, the return on the Certificates may be significantly less than a direct investment in the Underlying(s) or through another product.

Risk that the Digital Coupons will not be paid

The investor should consider that, if the Underlying does not reach the relevant threshold (Digital Coupon Threshold) on the relevant Digital Valuation Period, it will not be entitled to receive the payment of the relative Digital Amount.

Price risk

Investors should consider that the Certificates are composed by multiple options. Accordingly, the price received from the sale of the Certificates on the secondary market depends on the value of each option. Before the maturity, a variation of the value of the single options constituting the Certificates may lead to a reduction in the price of the Certificates.

The value of such options may be affected by: (i) the performance of the Underlying, (ii) the volatility or expectations of the price of the Underlying, (iii) the residual life of the options incorporated in the Certificates, (iv) money market interest rates, as well as, subject to exceptions, (v) expected dividend payments with respect to Underlying. In addition, the price of the Certificates will be calculated on the basis of methodologies that take into account the pro tempore market conditions as well as the creditworthiness of the Issuer. Even if the price of the Underlying performs favourably during the life of the Certificates, there may be a decrease in the value of the Certificates due to other factors affecting the value of the options comprising them.

Risk associated with the use of bail-in

With the application of the "bail-in", the Securityholders would find themselves exposed to the risk of seeing their investment reduced, reduced to zero or converted into capital their investment, even in the absence of a formal declaration of insolvency of the Issuer, provided that the shareholders bear the losses first and that the creditors bear them after the shareholders, provided that no creditor suffers greater losses than if the bank had been liquidated under ordinary insolvency proceedings. In addition, the Resolution Authorities will have the power to cancel financial instruments and change their maturity, the coupons payable, if any, or the date from which they become payable, including by suspending the payments for a transitional period.

Risk related to the Underlying value

Investors should consider that many economic and market factors will influence the value of the Certificates.

An investment in the Certificates is therefore an appropriate investment for investors who have experience and knowledge on transactions concerning financial instruments whose value is linked to the Underlying.

The value and the return of the Certificates depend on the value of the Underlying, which may change in connection with a wide range of factors (including the gap between supply and demand, macroeconomic factors, the trend of interest rates, corporate actions, dividend distribution, micro-economic factors and speculative trading). It should also be considered that the historical data relating to the Underlying does not constitute an indication of its future performances.
